When the business was at its peak, Jan was making 30 pounds of seitan by hand 3 times a week for a total of 90 lb/week. From this she made 360 burgers (each ¼ pound) per week. Jan ran the business until April 1979, about 6 months before they left for Japan in late October 1979 to study miso—which led to their later establishing the American Miso Co. Before they left, Jan sold the thriving business for about \$1,000 to a woman called Suji Mama—who ran it for only about 6 weeks before it failed. However later Suji Mama did a booming business in seasoning or spice blends, sold in shakers, for popcorn or other foods; she had her name on these blends.

Talk with Jan Belleme. 1992. July 4. She confirmed or corrected the above information. To make the burgers, she cooked several large cylindrical loaves of seitan, then sliced them crosswise.

972. Kim, Myung Ki; Lugay, Joaquin Castro. Assignors to General Foods Corp. (White Plains, New York). 1978. Fibrous protein materials. *U.S. Patent* 4,084,017. April 11. 8 p. Application filed 16 June 1976. [6 ref]

• **Summary:** Describes "a method for producing fibrous protein materials useful for fish analogs. According to this method, an aqueous mixture of a heat coagulable protein is frozen by cooling the mixture in a manner and at a rate effective to produce elongated ice crystals generally aligned perpendicular to the surface of cooling, then subjected to a temperature substantially different from that of the frozen mass, and the protein in the frozen mass is then stabilized effectively to preserve its structural integrity during subsequent heating to set the protein." Soybeans are the main protein source used. Address: 1. Congers, New York; 2. Thornwood, New York.

973. Swan Food Corp. 1978. Order form and price list for distributors. April, 1978. Miami, Florida. 1 p. 36 cm.

• **Summary:** This wholesale catalog lists the company's soy bean products and natural foods. For each is given: Product description, case weights, wholesale unit prices (sizes A and B), units per case, total. Minimum order: \$300.00. Prices—F.O.B. Soy products include: Regular tofu. Baked tofu. Marinated tofu. Caraway tofu. Soymelk (pints or quarts, unsweetened). Soymelk (pints or quarts, sweetened). Soymelk (pints or quarts, carob). Carob swirl cake (all cakes

and pies are 7-inch rounds [= 7 inches in diameter]). Tofu pie-cashew. Mary's carob cream cake. Mary's devil's food cream cake. Tofu chip dip. Whole grain soy burgers. Tofu vegetable stew. Soyogurt (plain, strawberry, or peach; 8 oz.). Soy shakes (carob, vanilla, or strawberry; pint). Organic yellow certified soybeans (50 lb or 1 lb bags). Mary's eggless egg salad.

Non-soy products: Iced herb tea (sweetened, unsweetened Bancha, unsweetened Mu). Barley malt syrup. Fresh frozen organic orange juice (two sizes). Organic oranges. Address: 5758½ Bird Rd., Miami, Florida, 33155. Phone: 305-667-7141.

**974. Product Name:** Whole Grain Soy Burgers (Or Wholegrain Soy Burgers).

**Manufacturer's Name:** Swan Foods Corporation.

**Manufacturer's Address:** 5758½ Bird Rd., Miami, FL 33155. Phone: (305) 667-7141.

**Date of Introduction:** 1978 April.

**Ingredients:** Organic rice, organic okra [sic, okara] (a natural fiber from soybeans), carrots, onions, garlic, stoneground whole wheat flour, unrefined corn oil, sesame seeds, rolled oats, sea salt. "Made with organic vegetables."

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** "Swan Food Corp." order form and price list for distributors. 1978. April. Case weight: 6 lb, 6 oz. 12 units per case. Wholesale prices–Per unit: \$0.60 for two. Per case: \$7.20.

Ad (full page, black-and-white) in *Alternatives* magazine (Miami, Florida). 1978. July/Aug. p. 49. "Remember the

name!" "Wholegrain Soy Burgers."

Label. 1978, undated. 3 by 3.5 inches. Self adhesive. Blue, yellow, and red on white. Illustration of a swan. "Keep refrigerated. No additives. No preservatives."

975. Walker, Robert. 1978. How to make tempeh—the nutritious meat substitute. *Alive (Canada)* No. 18. p. 13.

• **Summary:** The author started producing Canada's first commercial tempeh in June 1978. Here he describes what tempeh is, how to make it at home, and how to cook it. Photos show: (1) Robert Walker with the container he invented for making doughnut-shaped tempeh. The inside core and the holes on the outside tube allow the air to circulate evenly throughout the fermenting soybeans. (2) A close-up of two shapes of tempeh. A note at the bottom of the page states: "Robert Walker who lives in Port Perry, Ontario, is starting a tempeh making business." Address: Ontario, Canada.

976. Ward, A.G. 1978. Commercial development of soya bean protein products in the EEC. In: Commission of the European Communities. Agriculture. 1978. Report of the Study Group on Vegetable Proteins in Foodstuffs for Human Consumption, in Particular in Meat Products. See p. 83-85. Appendix IV. April.

• **Summary:** "The soya bean is the main source of specialized vegetable protein products for human consumption within the EEC. Wheat gluten is also used but only to a very limited extent." It is difficult to estimate the current scale of usage for human consumption.

"Belgium: N.V. Vamo Mills produces toasted defatted flour and grits. No extruders known to occur in Belgium. Production of isolates being undertaken by Purina Protein Europe (associate of Ralston Purina Company USA).

"Denmark: Aarhus Oliefabrik A/S produces defatted flour, soya concentrate (Danpro) and textured soya concentrate. The company operates the only extruder in Denmark. Dansk Sojakagefabrik A/S produces defatted soya flour and grits as well as full fat soya flour.

"France: Société Industrielle des Oléagineux produces defatted soya flour and grits as well as full fat soya flour. Rhône Poulenc is reported to be working with an experimental soya protein spinning plant (not yet commercial). No information has been received about extruders functioning in France.

"Germany: Ölwerke Noury and Van Der Lande, Ölmühle Hamburg A.G. and Holtz and Willemsen all produce defatted soya flour and grits and the first two also produce full fat soya flour and grits. No information has been received about extruders functioning in Germany.

"Netherlands: Cargill Soja Industrie B.V. (associated with Cargill Inc., USA) produces defatted flour and grits. The company has three extruders for textured soya products, each with a capacity of about 7,000 to 10,000 tons per annum.

These are not thought yet to be working to capacity. Unimills B.V. produces defatted soya flour, soya concentrate and products textured by extrusion with a single extruder. ADM–De Ploeg B.V. produces defatted soya flour and grits and also textured soya flour. The company has a single extruder of capacity 7,000 to 10,000 tons per annum, and is an associate of Archer Daniels Midland Co., USA.

“United Kingdom: British Soya Products produces defatted soya flour and grits as well as full fat flour. The company also produces by its own techniques (not conventional extrusion) the “Bespro” range of textured products. These may include gluten with the soya material. Spillers Ltd (Soya Food Ltd and Lucas Ltd) produces defatted flour and grits as well as full fat flour. Soya concentrate (Newpro) and textured soya flour are also produced. It is believed that the company now has the production capacity of two extruders (14,000 to 20,000 tons per annum). GMB (Proteins) Limited (jointly owned by General Mills Inc., USA and Bush, Boake Allen Ltd) produces a textured soya product (“Bontrae”), not by conventional extrusion. It is thought the current production capacity is a few thousand tons per annum. Miles Laboratories (U.K.) is linked to Miles Laboratories Inc., USA. Information is lacking as to whether the company has production capacity in the U.K. for textured products, as well as importing U.S. products. Courtaulds Limited produces a range of spun soya protein products (Kesp), some of which may incorporate gluten. Annual production is not known. The British Arkady Co. Ltd is associated with Archer Daniels Midland Co., USA. Defatted soya flour and grits, full fat soya flour and textured soya products (by extrusion) are produced. The single extruder has a capacity of 7,000 to 10,000 tons per annum. Extensive research and development has been carried out by Unilever Ltd. (in close association with Unilever in the Netherlands) to develop the “mesophase” process for the preparation of soya protein products and to utilize them in foods. The processes have not yet been commercially exploited.

“No information has been received concerning the production of soya protein products for human consumption and in particular textured products from Ireland, Italy and Luxembourg but Italy has very substantial capacity for the production of oil and meal from soya beans.” Address: Procter Dep. of Food and Leather Science, Univ. of Leeds, Leeds.

977. Bennett, Jean. 1978. Soybean curd: Ancient staple of the Oriental diet. *Los Angeles Times*. May 4. p. J25.

• **Summary:** An introduction to tofu, based on a talk with Dr. Genevieve Ho, home adviser, UC Extension Service; she was born in China and educated in the USA.

The use of bean curd in China was recorded in about 160 BC during the Han dynasty. With this long history of development and refinement, and with continuous regional

and local innovation, it is easy to understand why bean curd has become so tremendously popular in China and in nearby countries, and why so many varieties exist today.

Ho adds that “fermented bean curd has sufficient vitamin B-12 to prevent pernicious anemia.”

In East Asia, “Buddhists do not eat anything that contains blood. Nor do they eat milk, eggs, or shellfish.” In this vegan diet, tofu is a very valuable food. “Strict vegetarian restaurants serve dinners and banquets made of food from only plant sources.” Main dishes include mock chicken, mock fish, and mock sausage.

In our world, with increasing population and decreasing food supply, the soybean is “invaluable in helping us to return to original foods as opposed to converted foods.” When a food is converted from a plant to an animal food, it requires 7-11 units of plant protein to obtain 1 unit of animal protein. “No wonder I am always trying so hard to get people to eat more bean curd.” See also *The Book of Tofu* by Shurtleff and Aoyagi (Autumn Press, Box 469, Soquel, California 95073; \$6.95). Includes 4 recipes for bean curd supplied by Dr. Ho. One of these, Hot spicy bean curd, includes “1½ teaspoons hot fermented bean paste” and “1 pound fresh bean curd, cut into ½-inch cubes” as ingredients.

A photo shows Dr. Ho at a market in Chinatown.

A comparative nutritional evaluation chart gives the nutritional composition of soybean curd, pressed soybean curd, milk (cow’s, whole fluid), and soybean milk. Address: Times staff writer.

978. Granose Foods Limited. 1978. Now our range is even more wholesome (Ad). *Alive (England)*. May. p. 28.

• **Summary:** “We’ve added five exciting new products to our range of healthier wholesome foods.

“Sausfry, the versatile soya-based sausage mix.”

“Vegex Chunks, delicious spun soya protein for casseroles and pies.

“Vegex Mince for Moussaka, Lasagne or Cornish Pasties.”

“Se us at Helfex, London.”

An illustration shows a basket filled with each of the new Granose products. Address: Stanborough Park, Watford, Herts WD2 6JR [England].

979. **Product Name:** Granose Sausfry: Seasoned Soya Protein Sausage Like Mix.

**Manufacturer’s Name:** Granose Foods Ltd. (Marketer-Distributor). Made in the UK by British Arkady.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1978 May.

**Ingredients:** 1980: Vegetable fat, textured soya protein [textured soy flour], rusk, glucose, stabiliser, salt, herbs, spices, colouring, added vitamins.

**Wt/Vol., Packaging, Price:** 500 gm (1.1 lb) bag.

**How Stored:** Shelf stable.

**New Product–Documentation:** Ad in *Alive* magazine (UK). 1978. May. p. 28. “Now our range is even more wholesome.” “Sausfry, the versatile soya-based sausage mix.”

Manufacturer’s catalog. 1980. April. “Textured soya protein in a beef sausage like flavour which only requires the addition of water to make it usable in any of the ways in which sausage meat can be used.”

Form filled out and Label sent by Granose Foods Ltd. 1990. June 13. States that the product, made by British Arkady, was introduced in 1980. Address on bag is now Newport Pagnell. Label. 1990. 3.5 by 8 by 2 inch white coated paper bag. Red, yellow, brown, and black on white. An illustration (line drawing) on front panel shows a woman standing behind a table of baked goods. “Healthier wholesome food.” Pack panel: “Make it plain... Add 750 ml (1.33 pints) of cold water to contents and leave the mixture for five minutes. Divide and form into sausage shapes, fry gently until golden brown.

“Make it fancy... Cook Sausfry shapes in hot batter for a tasty toad-in-the-hole or wrap in pastry to make savoury Sausfry rolls. Add onion, tomato, sage—any of your favourite flavours—and create exciting new ways to serve Sausfry.

“Note: Sausfry contains no animal matter and no Monosodium Glutamate.

“Ingredients: Textured defatted soya flour (defatted soya flour, iron, thiamin, riboflavin, vitamin B-12), hydrogenated vegetable oil, rusk, stabiliser (Methyl Cellulose, of plant origin), sea salt, hydrolysed vegetable protein, herbs, spices, colour (beetroot red).”

Color photo of package in *Linda McCartney’s Home Cooking*. 1990. p. 18.

**980. Product Name:** Itona T.V.P. Food Mix: Tonabanga Sausage Style (Meatless Sausage Mix).

**Manufacturer’s Name:** Itona Products Ltd.

**Manufacturer’s Address:** Itona Works, Leyland Mill Lane, Wigan, Lancashire, WN1 2SB, England.

**Date of Introduction:** 1978 May.

**Ingredients:** TVP, vegetable fat, rusk, binder, salt, dextrose, spices, permitted coloring, vitamins and minerals.

**New Product–Documentation:** Ad in *Alive* magazine (UK). 1978. May. p. 2. “Banga or Burga? Itona do both! Tonabanga and Tonaburga.” “Tonabanga is an exciting new TVP Food Mix from Itona. Made from textured vegetable protein (without Monosodium Glutamate) and flavoured specially with selected spices it is a completely vegetarian replacement for sausages and sausage meat.” A photo shows a woman holding up a meatless burger in a bun and a sausage (banga) on a fork.

Itona Products Ltd. retail price list. 1980-81. Add water, allow to stand for 10 minutes. Shape, grill or fry.

**981. Product Name:** Itona T.V.P. Food Mix: Tonaburga Sausage Style (Meatless Burger Mix).

**Manufacturer’s Name:** Itona Products Ltd.

**Manufacturer’s Address:** Itona Works, Leyland Mill Lane, Wigan, Lancashire, WN1 2SB, England.

**Date of Introduction:** 1978 May.

**Ingredients:** TVP, vegetable fat, rusk, binder, salt, dextrose, spices, permitted coloring, vitamins and minerals.

**Wt/Vol., Packaging, Price:** Each pack makes 1 lb.

**New Product–Documentation:** Ad in *Alive* magazine (UK). 1978. May. p. 2. Itona Products Ltd. retail price list. 1980-81. Add water, allow to stand for 10 minutes. Shape, grill or fry.

982. Itona Products Ltd. 1978. Banga or Burga? Itona do both! Tonabanga and Tonaburga. Great meal by Itona (Ad). *Alive (England)*. May. p. 2.

• **Summary:** Full-page ad. “Tonabanga is an exciting new TVP Food Mix from Itona. Made from textured vegetable protein (without Monosodium Glutamate) and flavoured specially with selected spices it is a completely vegetarian replacement for sausages and sausage meat.”

The right 1/3 of this ad, titled “New lines from Itona, lists many Itona vegetarian products: Granny Ann High Fibre Biscuits made with Soya Fibre. Golden Archer Soya Plantmilk (100% vegetable; “Milk that’s never seen a cow”). Tona “C” Food–Fish Cake Style. Ito–Instead of coffee. Golden Archer Brown Rice Pudding with Soya Plantmilk. Noots–Roasted Salted Soya Beans. Basic TVPs–Flavoured and natural (in 4 oz packs; all flavors are given).

A photo shows a woman holding up a meatless burger in a bun and a sausage (banga) on a fork.

This same ad appeared in the Aug. 1978 issue (p. 2). Address: Leyland Mill Lane, Wigan [Lancashire, England].

983. Koch, D.S.; Nelson, A.I.; Wei, L.S. 1978. Soybean breakfast and patty foods: Time and energy saving for home preparation. *INTSOY Series* No. 14. p. 12-20. Whole Soybean Foods for Home and Village Use (College of Agric., Univ. of Illinois at Urbana-Champaign). [7 ref]

• **Summary:** A quick method for making weaning foods and meat substitutes is to crush raw beans with a hammer mill or food mill, drop them into boiling water containing a small amount of sodium bicarbonate, and boil for 10 minutes. At that point other ingredients such as cereals, vegetables, or fruits can be added. The mixture is then simmered for 15 minutes and pureed before serving. Address: Dep. of Food Science, Univ. of Illinois.

984. Nelson, A.I.; Steinberg, M.P.; Wei, L.S. eds. 1978. Whole soybean foods for home and village use. *INTSOY Series* No. 14. 31 p. May. (College of Agric., Univ. of Illinois at Urbana-Champaign). [26 ref]

• **Summary:** Contents: 1. Development of whole soybean

foods for home use: Rationale, concept, and examples. 2. Home preparation of soy milk: A new concept. 3. Soybean breakfast and patty foods: Time and energy saving for home preparation. 4. Food products from whole soybeans. 5. Developing a soybean dal for India and other countries. Address: Univ. of Illinois, Urbana.

985. LeMaire, W.H. 1978. Bacon analogs... Exciting possibilities. *Food Engineering* 50(6):ef-14, 15. June.  
 • **Summary:** Breakfast muffins, pancakes, and omelets represent three different—yet practical—applications for bacon analogs. Bacon replacers have an image problem—how to get food processors to think of them other than as a garnish for salads. Major suppliers, such as ADM, Far-Mar-Co, and Cargill either have or are close to introducing cheese, pepperoni, and ham as well as improved bacon analogs. It is known that Central Soya, since purchasing General Mills' steam texturization process for texturizing soy, is considering the flavored, textured analog market. General Mills and McCormicks are busy developing the retail market with national brands. Durkee's and other suppliers pursue regional markets with their brands. Most of these retail products are simply bought from the three major suppliers and re-packed. Altogether the market for bacon analogs is today a 10 million pound market, roughly divided between food service and retail at 4 million pounds each with over 1 million pounds in other processed foods. Address: Midwest editor.

986. Tofu Shop (The). 1978. Pricelist. Telluride, Colorado. 1 p. Undated.  
 • **Summary:** The Tofu Shop now sells 12 products: Tofu, 14 oz. Tofu, bulk (10 lb. minimum). Sprouts, alfalfa (8 oz or 1 lb). Sprouts, mixed (radish, lentil, alfalfa; 8 oz or 1 lb). Soymilk, quart, unflavored. Soymilk, quart, carob-honey. Soyburgers, frozen 5-pac. Fudge (super carob, cashew coconut, or date coconut). Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

987. Fabricant, Florence. 1978. Food: How the Chinese cook at home. *New York Times*. July 9. p. LI6.  
 • **Summary:** Chinese home cooking is, of course, much simpler, quicker, and less expensive than restaurant cooking. Bick Lee, in order to expand her knowledge of "Chinese vegetable cooking" spent several days in the kitchen of the Ching Kok Lin Buddhist nunnery in Kowloon, Hong Kong. The nuns lead very frugal, spartan lives. Bick Lee's mother is a Buddhist, but the Lees are not vegetarians—although their meals do tend to emphasize vegetables.

A meatless recipe for "Mock duck" is given. The ingredients include: "1 tablespoon light soy sauce (or Kikkoman brand soy sauce), 1/8 teaspoon monosodium glutamate (optional), 1 teaspoon sesame oil, 1 round sheet pressed bean curd (see note)." Then: "Cut sheet of bean curd in half and trim the thick edge with scissors. Lay one of the

pieces of bean curd on a cookie sheet. Moisten it with half the sauce, brushing it over the surface or folding the bean curd over itself to pick up the sauce... 4. Lay the second piece of bean curd over the first and repeat the process with the sauce and mushrooms." Steam then pan fry.

"Note: Dried straw mushrooms and bean curd sheets may be obtained only in Chinese groceries in Chinatown."

Note: These "bean curd sheets" are clearly what we call "pressed tofu sheets" (*pai-yeh* or *chien-chang*).

988. U.S. Food and Drug Administration. 1978. Common or usual names for vegetable protein products and substitutes for meat, seafood, poultry, eggs, or cheeses which contain vegetable protein products as sources of protein. Tentative final regulation. *Federal Register* 43(136):30472-91. July 14.

989. Farm, The. 1978. Make your own soyburger. *East West Journal*. July. p. 58-63.

• **Summary:** Most of the article describes how to make tempeh at home, with photos. Then there are sections on "Additional tempeh-checking tips" and "Questions and answers" about making tempeh at home, followed by recipes: Tempeh burger. Deep-fried tempeh. Tempeh pizza. Cubed fried tempeh. Tempeh and noodles. Address: Tennessee.

990. **Product Name:** Granose Curry Sauce.

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1978 July.

**Ingredients:** Textured soya protein, sultanas, wheat flour, starch, salt, pineapple, onion, sugar, tomato powder, apple flake, coconut, spices, herbs.

**New Product—Documentation:** Manufacturer's catalog.

1980. April. "Spiced curry sauce with textured soya protein and fruit. Serve with rice."

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in July 1978. It has been discontinued.

991. **Product Name:** Vegetarian Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** White Wave.

**Manufacturer's Address:** 3869 Walnut St., Boulder, CO 80301.

**Date of Introduction:** 1978 July.

**Ingredients:** 1978: Okara (soy fiber), nutritional yeast, wheat germ, whole wheat flour, soymilk, safflower oil, shoyu (soy sauce), herbs, and spices.

**Wt/Vol., Packaging, Price:** 8 oz disks in plastic wrap.

**How Stored:** Refrigerated.

**New Product—Documentation:** Label. 1979. 3.75 inches square (8 oz.). Paper. Brown on tan. Drawing of a happy pig

with a wreath of flowers around its neck.

Label. 1981. 3 inch diameter (16 oz.). Paper. Brown on tan. Ingredients on labels are: Okara (soy fiber), nutritional yeast, wheat germ, whole wheat flour, safflower oil, shoyu (soy sauce), herbs and spices. Label and recipe given by Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 169. Product Price List. 1979, winter. "Spicy vegetarian 'sausage type' soy patty. Slice thin or fry and use on pizza. 8 or 16 oz."

Interview with Steve Demos. 1987. In early 1978 they introduced soymilk. At about the same time they started to use the okara from their tofu to make one of America's earliest brands of soysage—if not *the* earliest! In late July 1978, at the first Soycrafters' Conference in Ann Arbor, Michigan, White Wave gave instructions for tube-processing of soysage.

992. **Product Name:** Soya Mince [In Bolognese Sauce with Onion, or In Mild Beef-Curry Sauce].

**Manufacturer's Name:** Brooke Bond Oxo.

**Manufacturer's Address:** England.

**Date of Introduction:** 1978 August.

**New Product–Documentation:** R.A. Sair. 1981 (presented Aug. 1978). *Marketing plant protein in Europe*. p. 397.

Shows a black-and-white photo of each product in its package.

993. **Product Name:** Danoxa Hot Dog Sausage, or Kesp Pie Filling with Kidney.

**Manufacturer's Name:** S. Daniels & Co. Ltd.

**Manufacturer's Address:** Wilec House, 82-100 City Road, London EC1Y 2BU, England.

**Date of Introduction:** 1978 August.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** R.A. Sair. 1981 (presented Aug. 1978). *Marketing plant protein in Europe*. p. 397.

Shows a black-and-white photo of each product in its can.

The subtitle of the Kesp product reads: "Tender chunks of soya protein with succulent kidney in a rich gravy."

994. **Product Name:** Sainsbury's Soya Granules: Textured Soya Protein Food. Vitamins and Iron Added.

**Manufacturer's Name:** Sainsbury.

**Manufacturer's Address:** England.

**Date of Introduction:** 1978 August.

**New Product–Documentation:** R.A. Sair. 1981 (presented Aug. 1978). *Marketing plant protein in Europe*. p. 397.

Shows a black-and-white photo of the product in its package.

• **Summary:** See next page. "Organic nigari tofu, Soymilk, Soysage, Missing egg salad, Tofu mayo, Baked savory tofu cutlets, Sweet bean tofu pie, Tofu cinnamon rolls, soy-sesame bars, Energy chews, Almond butter, Cashew butter, Peanut butter, Tahini, Figgies, Date coconut bars, Tofu 'meatball' sandwiches, 'Macro' pizza, Tofu turnovers, 'Sloppy joe' sandwiches, Tempeh." Address: Boulder, Colorado.

996. Daniels, Stevie. 1978. I was a sucker for protein. *East West Journal*. Oct. p. 60-62.

• **Summary:** Her introduction to soyfoods came the hard way—by trying a "can of textured soy protein"—the food that could end world hunger. She tried preparing it in many different ways. "Nothing worked. It was terrible. I threw it on the compost pile and watched squirrels, rats, and chipmunks detour around it for weeks... It was easy to see why even starving people gave thumbs down to this orangish, gloppy, spoiled-tasting canned concoction." She learned that the oil companies extract the oil from soybeans with hexane solvent then use the defatted leftovers to feed livestock and make textured soy protein.

Later she became a vegetarian, tried cooking whole soybeans, and then "fresh soybeans" in the pods—which a local organic farmer brought to her co-op. Finally one day she found a brochure stating: "The four main foods made from soybeans are tofu (soybean curd), tempeh (fermented soyburger), shoyu (soy sauce), and miso (fermented bean paste).

"I was amazed. The Eastern people, one-fourth of the world's population, had known how to use soybeans for

Miso and shoyu production taught by Naboru [sic, Noboru] Muramoto).

**997. Product Name:** Tofu, and Soysage.

**Manufacturer's Name:** Macon Tofu.

**Manufacturer's Address:** Macon, Georgia.

**Date of Introduction:** 1978 October.

**New Product-Documentation:** Talk with Michael Pierce. 1989. Oct. 30. He got involved with tofu while he was in Georgia. He learned to make tofu from a guy in Macon named Pat Powell, who had just gone up to The Farm in Tennessee and learned to make tofu (and Soysage) from

Lewis Headrick, who now lives in Northern California. In 1978 Pierce went to California and worked with Paul Duchesne as Wildwood Natural Foods' first tofu maker.

Letter from Michael Pierce. 1989. Oct. 31. "I learned to make tofu in Macon, Georgia, in 1978-79 from Pat Powell, who learned from Lewis [Headrick] at The Farm in Tennessee. We made it farmhouse style using a 60 quart stainless pot and a four burner stove. We used some used curtain material for pressing the okara and 4 wooden dowels as the press. It was very crude but it worked. We could get two cakes averaging 12 pounds a cake."

Talk with Michael Pierce. 1989. Nov. 6. Pat Powell's daughter was born at The Farm in April 1978. Powell returned to Macon shortly thereafter and he and his wife, Mary, started making tofu in Macon in the fall of 1978, for 9 months a year. They sold the tofu at four places in Georgia: Annapurna Health Foods (Macon), Sevananda Co-op, Rainbow Grocery, and Rainbow Cafe (Atlanta). They also made Soysage, which they sold only in Macon. Their company either had no name, or was named Macon Tofu, a pun on Makin' Tofu. Pierce was living in California at that time. He returned to Macon, learned how to make tofu from Powell, then worked as a tofu maker with him for about a year. Then Pierce returned to California and met Duchesne.

There was an earlier tofu company in Georgia. A guy made tofu in his home and had it distributed by a health foods distributor. He was moved out of there so he set up a shop at the distribution company. Then the health department shut him down. Powell thinks he then started the Soy Shop in Atlanta.

998. **Product Name:** Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Soy Plant (The).

**Manufacturer's Address:** 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.

**Date of Introduction:** 1978 October.

**Ingredients:** Okara (soybean fiber), wheat germ, nutritional yeast, whole wheat flour, bulgar [bulgur] and spices.

13 x 18 cm.

Talk with Steve Fiering. 1988. June 10. This was introduced within a few months after the Soy Crafters Conference in the summer of 1978. "We definitely got soysage recipes at the conference."

999. Starenkyj, Danièle. 1978. *Le bonheur du végétarisme: Principes de vie & recettes*. 2ième éd. [The happiness of vegetarianism: Principles of life and recipes. 2nd. ed.]. Armagh, Quebec, Canada: Orion. 351 p. Oct. Illust. by Stefan Starenkyj. Index. 23 cm. First ed. 1977. [26 ref. Fre]

• **Summary:** Soy-related recipes include: Soy coffee (p. 101). Soya souffle (with whole soybeans, p. 204). Chapter 14, titled "A cow in your kitchen" (p. 207-27), contains extensive information on soymilk, soymilk products, and problems with cow's milk. It's contents: Introduction. What is soya? The proteins of the soybean (*la fève soja*). The carbohydrates of the soybean. The vitamins and minerals of the soybean. The oils of the soybean. Soymilk: The cow of China. Reasons for replacing animal milk in your diet with soymilk: Many people are allergic to animal milk. Animal milk is a cause of anemia. Animal milk can be a cause of infection of the urinary tract, particularly in infants. Animal milk is polluted. Comparison of the composition of soymilk and cow's milk (100 gm each). How to make soymilk at home. Soymilk whipped cream. Soy mayonnaise without eggs. Soy yogurt (fermented). Tofu: The meat without bones.

 WE INVITE YOU TO TRY THESE VERSITILE HIGH PROTEIN FOODS

**New Product–Documentation:** Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 259. Soy Plant Tofu. Refrigerated. "Soy Plant Tofu Soysage" (1 lb). On p. 260 is a half-page ad: "Soysage–Bean 'sausage,' a spicy experience. Made from okara (soybean fiber), wheat germ, nutritional yeast, whole wheat flour, bulgar and spices, Soysage is a natural source of vitamin B-12 and is high in protein and fiber."

Leaflet. 1979. "Soysage." 2 panels each side. Each panel

Nutritive value of tofu. How to make tofu at home. Tofu filets. Tofu steaks. Breaded tofu slices. Tofu pâté à tartiner. Grilled tofu. Okara (*La pulpe de soja*). Okara pâté (*Pâté à la pulpede soja*). Soya butter (*Buerre de soja*; made from 1 cup lightly grilled soy flour, 2 cups water, a little salt, and about ½ cup oil). Address: Ottawa, Canada.

1000. Burda, Terrie. 1978. "Every berg needs a tofu shop." *Benton Bulletin* (Corvallis, Oregon). Nov. 29. p. 5.

• **Summary:** This article is about Mia Posner and her partner

Harry MacCormack of Sunbow Farm Products, a small tofu maker, on Plymouth Rd. in Philomath, Oregon (Route 2, Box 46, Corvallis, OR 97330). It is one of three tofu shops in all of Oregon. Their tofu, which retails for \$0.79 a pound, is “selling like crazy.” Sunbow Tofu is made from organically grown soybeans (which are grown on their property), pure well water and a bittern (nigari). The tofu at Sunbow is made in an immaculately clean room which was built as an addition to the house in January, 1978.

Describes how tofu is made in this home-based tofu shop. Describes various ways that tofu can be used (but contains no recipes). A favorite, “T-n-T” stands for Tofu & Tamari. Sunbow Farm has printed a soy cookbooklet (\$0.25) that contains more than 23 tofu recipes.

Presently Posner and MacCormack are supplying tofu, soyburgers, and soy sausage to more than a dozen stores and restaurants in the area.

Large photos show Miso Posner: (1) Stirring “milky soybean mash” which will be pressed to make soymilk. (2) Slicing tofu into 1-pound cakes.

Note: Benton County is located in the Willamette Valley of Oregon. Address: Staff writer.

1001. Garrison, Robert R.; Stinson, Wm. S. 1978. Two-stage extrusion process produces meat analogs: Increases drying efficiency with electrode boiler. *Food Processing (Chicago)*. Nov. p. 120-21.

• **Summary:** About 3 years ago Wenger Manufacturing developed a new two-stage extrusion process which uses two extruders in series to produce low-cost meat analogs in bite-sized pieces. In Oct. 1977 Garrison Products finished the first food processing plant built specifically to produce “substitute protein foods” using the double extrusion system. The process is described. Photos show: (1) Russ Garrison setting the electrode boiler control panel. (2) Overview of the processing area. (3) The finished products in 35 cubic foot woven polypropylene bags. Wenger Manufacturing is located in Sabetha, Kansas. Address: 1. President, Garrison Products, Inc., 1471 Paddock Dr., Northbrook (near Chicago), Illinois 60062; 2. Senior Associate Editor.

1002. Kan, Lilah. 1978. Introducing Chinese casserole cookery. New York, NY: Workman Publishing. 288 p. Index. 24 cm. Edited by Helen Witty.

• **Summary:** An engaging writer with outstanding descriptions of ingredients. The section titled “Ingredients” (p. 41-61) includes: Bean curd (“this means fresh bean curd (or bean cake),... Chinese call it *do fu*; Japanese say *tofu*.” Bean curd cheese, red [red fermented tofu] (“In Cantonese it is called *nom yee*”). Bean curd cheese, white [fermented tofu] (“In Cantonese it is called *foo yee*”). Bean curd, fried (“Called *doe gawk* in Cantonese,” it is made of fresh bean curd that has been cubed and deep fried. It “resembles tiny brown wrinkled pillows that seem almost hollow”).

Bean curd skin, dried [*yuba*] (This is made by heating soybean milk and “is usually sold in ½-pound packages. The skins measure about 1½ by 4 inches and are less than 1/8 inch thick.” “They look like thin pieces of light beige lacquered wood” and should be soaked in warm water until pliable (about ½ hour). Called *teem jok* in Cantonese).

Bean curd sticks [dried *yuba* sticks]. (“These sticks are made from soybean milk film that has been dried, rolled to ½-inch thickness, and bent into long pieces with a hairpin turn.” Called *foo jook* in Cantonese. They “are light beige in color and have a wrinkled, lacquered look. They come in ½-pound and 1-pound packages”).

“Black beans, salted or fermented [fermented black soybeans]: These beans serve as a condiment. They have a very pungent odor that could scare away the timid, but do not be timid. They are almost always used in combination with garlic—a marriage made in heaven—and are delicious. The beans are interchangeably called ‘fermented black beans’ and ‘salted black beans’”).

Brown bean sauce, ground (*meen see*).

Vegetarian steak (usually made from soybeans or gluten. It is sold in cans. She likes to use this meat substitute with other ingredients in Buddha’s Delight Vegetarian Casserole, a dish often served on Chinese New Year’s Eve. “I use the kind that is labeled *Chai Pow Yu* which translates as ‘mock abalone’ or ‘vegetarian abalone’”).

Soy related recipes include: Beef chunks in black bean, garlic, and egg sauce (with “3 tablespoons salted black beans, rinsed in water, drained, and mashed,” p. 68-69).

Chicken and peppers with black bean, garlic, and egg sauce (with “2 tablespoons salted black beans, rinsed in water, drained, and mashed,” p. 118-19).

Minced pork and vegetables with black bean and garlic sauce (with “4 teaspoons salted black beans, rinsed in water, drained, and mashed,” p. 146-47).

Spare ribs in black bean, garlic, and egg sauce (with “3 tablespoons salted black beans, rinsed in water, drained, and mashed,” p. 158-59).

Spare ribs in red bean curd cheese (with “½ square (about 2 tablespoons) red bean curd cheese,” p. 162-63).

Lamb and bean curd sticks with black bean and garlic sauce (with “4 bean curd sticks (8 lengths), drained” and “3 tablespoons salted black beans, rinsed in water, drained, and mashed,” p. 182-83).

Clams with black bean and garlic sauce (with “1½ tablespoons salted black beans, rinsed in water, drained, and mashed,” p. 192-93).

1003. Swan Food Corp. 1978. Swan Foods: Remember the name! (Ad). *Alternatives (Miami, Florida)*. 2(11):53. Nov.

• **Summary:** This half-page ad lists the company’s soy products, iced herbal beverages, and baked goods & pastries. Soy products include: Baked tofu, Marinated tofu, Caraway tofu, Tofu chip dip, Tofu salad dressing, Soy melk

(sweetened, or carob soy milk), Soyogurt (a cultured soy product), Wholegrain soy burgers. Baked goods include: Tofu cheesecakes, Carob maple swirl, “and more to come.”

On the top half of the ad is a large circular logo featuring a stylized swan, with two large wings symmetrical about a vertical axis and an arched neck on the left side. The other half of the arch is drawn in to form a heart, inside of which is written “Because we love you.” Across the inside top are the large words “Swan Foods.” A rainbow arches below them and over the swan. At the top center, between the words “Swan Foods,” are the smaller words “Nature’s Finest” written one below the other; between them is an infinity sign.

Across the bottom of the ad is written: “Every Swan Soybean Product contains all 8 essential amino acids (which are necessary for a balanced diet) and have no cholesterol. Available in health & natural food stores. Retailers: Swan Quality Products are distributed by Tree of Life, Inc., or contact Swan Food Corp., 5758½ Bird Rd., Miami, Florida 33155. In Miami enjoy all Swan Products at Swan’s Retail Deli & Bakery, The Soybeanery, 5758½ Bird Rd.”

Note: A full-page Swan Foods ad that is very similar to his half-page ad was published in the July/August issue of this magazine. There are four differences between the two ads: (1) This November ad is smaller; Swan Foods went out of business one month later, in December 1978; (2) A Tofu Salad Dressing and Red Zinger tea appear in this ad but not in the earlier ad; (3) This ad states that Swan Foods’ products are distributed by Tree of Life, Inc., a major distributor, whereas in July/August they had been “distributed by your local Natural Foods Distributor”—less impressive. (4) The following products appear in the earlier (July/August) ad but do not appear in this one: Soy Shakes (Carob, Vanilla & Strawberry), three iced herbal beverages (Lemon Mist, Miami Cooler, Red Quencher), and two baked goods & pastries (Mary’s Cream Cake, and Mary’s Devil’s Food Cream Cake). Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155.

1004. Boulton, Marsha. 1978. The soya dog: The same old dog minus the meat. *Maclean’s (Canada)* 91(31):11. Dec. 11. • **Summary:** Alan Kempton, age 46 and a biologist at Ontario’s University of Waterloo [Canada], is building a better hotdog with the help of soya and a \$25,000 research grant from the federal ministry of agriculture. He hopes to have the product ready by July 1979. Beef prices are up 70% from last year.

1005. Beck, Alexis. 1978. Tofu, or soybean curd, is an idea whose time has clearly come. *Boston Evening Globe*. Dec. 27. Food section.

• **Summary:** Contains 8 recipes, including Tofu Burgers and Cheesecake Hawaiian. Address: Nutritionist, Massachusetts.

1006. Swan Food Corp. 1978. Collected papers (Archival

collection). Miami, Florida. 5 file folders, 1½ linear inches.

• **Summary:** Swan Foods was the first soyfoods company in the United States to make a wide variety of innovative soyfoods products—and to make them from organically grown soybeans. The company’s papers are located at Soyfoods Center in Lafayette, California. In December 1978, when the company declared bankruptcy after about two intense years in business, Danny Paolucci cleaned out the office, keeping all documents that he believed might be of future importance. He kept them for 19 years, then sent them to Bill Shurtleff at Soyfoods Center at Shurtleff’s request. Most of the papers relate to recipes. There are no commercial papers (invoices, ledgers, etc.).

Folder 1: Bulk soyfoods recipes, typed. Each recipe is typed on a sheet of 8½ by 11 inch lined paper. Recipes made in a Hobart mixer are marked with an asterisk (\*) after the recipe name. The recipes (listed alphabetically) are: Baked tofu (with tamari sauce for marinade, bake at 350°F for 30-35 minutes). Caraway tofu (add 5 ingredients to curdling tofu; stir and let curds form). Carob cream cake\* with topping (incl. 2 gallons soymilk). Cashew carob swirl cake\* (incl. 3 gallons soymilk). Devils food cream cake\* (incl. 2 gallons soymilk and tofu topping). Eggless egg salad\* (incl. 10 lb boiled and cooled Swan Tofu). Marinade for tofu (incl. 1 gallon tamari; mix all ingredients in a 5 gallon bucket, add sliced tofu, and seal). Soy burgers\* (incl. 2 gallons each cooked rice and fresh okara, and 2½ cups tamari). Tofu chip dip\* (large and small; the small incl. 6 lb tofu boiled and cooled, ¼ cup tamari, and ¼ cup umeboshi plum paste; the large incl. 42 lb tofu).

Folder 2: Lists of ingredients for various soyfoods products typed on Swan Foods’ blue-on-white letterhead: The products (listed alphabetically) are: Carob swirl marble cake (non-dairy) (incl. soy milk). Okara granola. Roasted cashew tofu pie (incl. tofu and organic soy milk). Soyogurt (non-dairy): Note: These ingredients are handwritten below a sample label design on the back of the bottom half of a Swan Foods order form.

Folder 3: Legal-sized yellow lined note pad with 17 pages of notes written in blue ink—probably by Mary Pung. Subjects: *Nutrition Almanac* (soybeans and soy milk, p. 71; malt, p. 76). One page of 6 bibliographic references for publications related to soy, with a large note: “Sell *Book of Tofu*, etc. in shop.” *The Health Food Dictionary & recipes* (mu tea, p. 102; soybean, p. 159; tofu, p. 174). *Diet for a Small Planet* (Lappé, 1975 ed.) (protein table III—Legumes; notes on tofu, p. 102, soy yogurt vs. milk yogurt, p. 128-29; tofu, p. 132). *Recipes for a Small Planet* (Ewald, 1973) (table showing no. of calories you have to consume in order to get one gram of usable protein, p. 16; notes on Net Protein Utilization). *Soybean Diet* (Herman Aihara, 1974) (table of nutrients in various foods; cow’s milk, p. 44; soybeans can help with environmental problems, p. 4; soybeans vs. meat, p. 6, 8-9; tofu preparation, p. 115; nigari, p. 116; nutrient

value of tofu, p. 125). *The Book of Tofu* (Shurtleff & Aoyagi, 1975) (moral and emotional appeal, health, religion, ecology, economic, p. 19; complementary proteins, p. 24, 26; easy to digest and diet food, p. 26; low in saturated fats and cholesterol, linoleic acid, rich in minerals and vitamins, p. 27; nigari, free of chemical toxins, p. 28; quick and easy to use, p. 29; ecological, nitrogen from the air, p. 55; okara, p. 77-78; uses of agé, deep-fried tofu, p. 154-55; soymilk, p. 200). Six interesting teas.

Folder 4: Handwritten recipes (some very rough) and notes, in pen and pencil, mostly on individual sheets of paper. Soy-related recipe names (listed alphabetically): Basic tofu cheesecake. Basic tofu pie. Carob marble cake. Carob on blonde with tofu topping (also called Blonde on carob; baked, with soy milk). Carob tofu pie. Dips in tofu containers: Chive tofu dip, pimento tofu dip, sea tofu dip, Italian herb tofu dip, pimento olive dip (ideas only). Dressings: Miso, avocado, green goddess, creamy garlic, red Russian, spinach Russian (ideas only). Eggless egg salad. Eggless tofu salad. Frozen tofu cutlets. Mary's deluxe pizza (with tofu, from "Swan Food Corp."). Milk shake. Nori rolls. Okara products: burgers, burritos, felafels (ideas only). Pumpkin pie. Quiche with tofu. Sweetened carob shake. Tofu lemon pie. Tofu mayonnaise. Tofu pie filling. Tofu pudding, vanilla. Tofu quiche lorraine [Note: According to the *Joy of Cooking* (1975, p. 254-55), early recipes for quiche called for bacon and cream, but later cheese was added. When sautéed onions were included, the dish was called Quiche Alsacienne. Quiche Lorraine now typically contains egg white, bacon, milk or cream, and Swiss cheese]. Tofu rice salad. Tofu tarts. Tofu turkey (Barbara's, with stuffing). Yogurt dressing. The names of some people are included: Diane Kellar. Sherry (nori rolls).

Folder 5: Other. Tear-off recipes published by Natural Recipes, 94 Bourne St., Boston, Massachusetts 02130. Carob brownies (copyright 1974). Carob cake (copyright 1975). Note: Neither of these recipes contains any soy. Address: 5758½ Bird Road, Miami, Florida 33155. Phone: (305) 667-7141.

**1007. Product Name:** Yakitofu, Okara, Ganmodoki [Ganmodoki].

**Manufacturer's Name:** Aloha Tofu Factory Inc.

**Manufacturer's Address:** 961 Akepo Lane, Honolulu, Oahu, Hawaii 96817.

**Date of Introduction:** 1978.

**New Product–Documentation:** Hawaii Directory of Manufacturers. 1977-78. p. 10. Aloha Tofu Factory Inc., 961 Akepo Lane, Honolulu, Hawaii 96817. The company now makes tofu, aburage, natto, konnyaku, yakitofu, okara, pupu age, ganmodoki. Oda. 1983. Hawaii Herald. Oct. 7. p. 5. "Tofu enjoys increasing popularity." Ad in Hawaii Herald. 1983. Oct. 7. "Make your favorite recipe even better with the best in soy bean products. Tofu, natto, aburage, konnyaku,

okara, yakidofu." 961 Akepo Lane. Phone 845-2669.

**1008. Product Name:** [Like Liver-Sausage (Meatless Liverwurst)].

**Foreign Name:** WieLeberwurst.

**Manufacturer's Name:** Bruno Fischer GmbH.

**Manufacturer's Address:** Taunusstrasse 13, 5000 Köln [Cologne] 91, West Germany. Phone: 02 21 / 83 26 51.

**Date of Introduction:** 1978.

**Ingredients:** Includes whole cooked then ground soybeans.

**New Product–Documentation:** Talk with Bruno Fischer. 1995. March 22. His company's first soy product was introduced in 1978. See interview for company history and context.

Talk with Bruno Fischer. 1998. May 14. His company's first soy product was named WieLeberwurst ("Like Liver-Sausage"). It contained less than 30% of cooked, ground soybeans.

Note: This is the earliest commercial soy product seen (Feb. 2013) made Bruno Fischer GmbH. The company's next product, *Soja Drink* (soymilk) was launched in 1991.

**1009. Product Name:** Old West Texas Chili.

**Manufacturer's Name:** Creative Natural Foods, Inc.

**Manufacturer's Address:** 24270 Highlander Rd., Canoga Park, CA 91307. Phone: (213) 992-5160 or 347-4691.

**Date of Introduction:** 1978.

**Ingredients:** Textured vegetable protein (soy concentrate, natural color), and blend of these fine herbs and spices:

Onion, paprika, cumin, garlic, celery seed, oregano, bay, clove, saffron, basil, cardamom, savory.

**Wt/Vol., Packaging, Price:** 2.64 oz. paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label (dated 1978) from Ed Zakanych, vice-president of sales for CNF. 1982? 4 by 5 by 1.12 inches. Brown and white on orange. Illustration of a cowboy near a covered wagon kneeling by a smoky camp fire, holding a pot of chili over it. "Less than half the calories of regular chili. Meatless. No preservatives. No cholesterol. No sugar added. Serves four." To prepare, saute an onion, add contents of the package plus tomato sauce, water, and pinto beans. Simmer for 25-30 minutes.

**1010. Product Name:** [GranoVita Vegetarian Soy Sausages (Spicy)].

**Foreign Name:** GranoVita Vegetarisch essen Soja-Wuerstchen (Pikant Gewuerzt).

**Manufacturer's Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1978.

**Ingredients:** Vegetable oils and fats in varying proportions

by weight, water, whole soybean puree, egg protein, onions, red cabbage, garlic, wheat gluten, glucose, spices, salt, seasonings, smoke seasoning, yeast flakes, rolled oats, thickeners (carob seed meal and guar seed meal), Graham flour, citric acid as an acidifier. Sauce: Water, salt, soy sauce.  
**How Stored:** Shelf stable; refrigerate after opening.  
**New Product–Documentation:** Form filled out and Labels sent by DE-VAU-GE. 1990. June 11.

1011. **Product Name:** Seitan.

**Manufacturer's Name:** East West Center.

**Manufacturer's Address:** Moctezuma St., Ensenada, Baja California, Mexico. Phone: 52-667-61005.

**Date of Introduction:** 1978.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Carlos Richardson of Gold Mine. 1992. July 10. The first seitan sold commercially by Gold Mine (in about 1989) was purchased from Arturo Beamonte at the East West Center in Ensenada, in Baja California, Mexico.

Talk with Ygnacio Beamonte at the East West Center in Ensenada, Baja California, Mexico. 1992. July 13. Ygnacio and his wife, Loretto, began to make and sell seitan commercially in 1978 at East West Center on Moctezuma St., in Ensenada. He learned the seitan process in seminars taught by Jorge Badillo, a naturopathic doctor, who lived in Ensenada and introduced macrobiotics there; he now lives in Seattle, Washington. Jorge Badillo learned how to make seitan from Roy Steevensz at the East West Center and Kushi House in Hollywood. Later they moved to Melrose Ave. There are at least 2 places in Latin America making seitan. For details contact the Great Universal Brotherhood, an international organization which was started in Venezuela by Dr. La Ferriere (a famous French teacher) in the 1950s, and now teaches lacto-ovo vegetarianism, yoga, etc. In Mexico City and other big cities in Mexico people have started making gluten but not seitan. Ygnacio's brother, Arturo, started making seitan at the East West Center in about 1984. Then he moved to Oregon. In about 1986-87 he moved to the East West Center in San Diego, where he took over as seitan maker from David Jackson (who now lives in Arizona). The East West Center in San Diego no longer exists. In about 1989 Arturo returned to Ensenada and has been the seitan maker there from that time until today.

Ygnacio and Arturo taught the East West Center in Los Angeles a new process for making seitan using iridea [*Iridaea cordata*] seaweeds in place of kombu to make the seitan softer and creamier.

1012. **Product Name:** Whole, Cleaned Soybeans.

**Manufacturer's Name:** Farm Foods.

**Manufacturer's Address:** 156 Drakes Lane, Summertown, TN 38483. Phone: (615) 964-3575.

**Date of Introduction:** 1978.

**Ingredients:** Soybeans.

**Wt/Vol., Packaging, Price:** 3 lb (1.36 kg) paper bag.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label. 1978, dated. 4 by 9 inches. Brown, green and yellow on beige. "Store tightly sealed in a cool, dry place. Free soybean recipes inside. All goods grown and packaged in U.S.A."

Farm Foods Products Catalog. 1978. p. 1.

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 189. A photo shows the label. "Soybeans are an excellent source of protein, with the right balance of all eight essential amino acids... Soybeans can be used to make soyburgers, souffles, fritters, casseroles, soysages, soymilk, ice bean, tofu (Japanese bean curd), tempeh (Indonesian cultured soy cake), spreads, dips and soups and many more. Protein for pennies a day. Protein for pennies a day."

1013. **Product Name:** Crispy Strips (Refrigerated Alternative to Bacon).

**Manufacturer's Name:** General Foods Corp.

**Manufacturer's Address:** White Plains, New York.

**Date of Introduction:** 1978.

**Ingredients:** Incl. formed vegetable protein.

**Wt/Vol., Packaging, Price:** Dry, packed in a tubular container.

**How Stored:** Shelf stable.

**New Product–Documentation:** Article in *Food Product Development*. 1978. Sept. p. 31, 34. These are meatless bacon bits.

Talk with W.E. Marshall of General Foods. 1979. Aug. 20. General Foods is currently test marketing two meat analogs: Lean strips (refrigerated a bacon-like product) and Crispy Strips (a fried, shelf stable product like bacon bits). Both contain soy protein concentrate and isolate.

Talk with W.E. Marshall. 1981. Sept. 3. Crispy Strips has been discontinued.

1014. **Product Name:** Granose Vegex [Beef-Flavoured Chunks, or Mince].

**Manufacturer's Name:** Granose Foods Ltd. (Marketer-Distributor). Made in the UK by Courtaulds.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1978.

**Ingredients:** Soya protein, vegetable oil, edible starch, salt, flavouring, natural colour.

**New Product–Documentation:** Ad in *Alive* magazine (UK). 1978. May. p. 28. "Now our range is even more wholesome." "Vegex Chunks, delicious spun soya protein for casseroles and pies."

Manufacturer's catalog. 1980. April. "Textured spun protein which has a similar texture to meat. Beef like flavour. It has a long shelf life, and is a balanced protein."

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Courtaulds UK, was introduced in 1978. It has been discontinued.

**1015. Product Name:** Granose Ravioli (Vegetarian).  
**Manufacturer's Name:** Granose Foods Ltd.  
**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.  
**Date of Introduction:** 1978.

**Ingredients:** Durum wheat flour, tomato paste, vegetable oil, bread crumbs, salt, corn starch, spices, textured soya protein (textured soy flour), groats, yeast extract, mushroom, egg albumen, carrot, onion flakes, egg whole powder, caramel.

**New Product–Documentation:** Manufacturer's catalog. 1980. April. "Traditional Italian style pasta filled with savoury soya protein in a spicy tomato sauce. Serve hot on toast or with potatoes or other vegetables."

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1978. But a note says "Not Applicable."

Label sent by Granose. 1990. July 11. The soy is textured soy flour.

**1016. Product Name:** Granose Cannelloni.  
**Manufacturer's Name:** Granose Foods Ltd.  
**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.  
**Date of Introduction:** 1978.  
**Ingredients:** Durum wheat flour, tomato puree, vegetable oil, sugar, textured soya protein (textured soy flour), onion, carrots, salt, celery, oats, cornstarch, mushroom, spices, yeast extract, egg albumen, egg whole powder, caramel.  
**New Product–Documentation:** Manufacturer's catalog. 1980. April. "Traditional Italian style Cannelloni filled with spicy soya protein in a tangy tomato sauce. Heat in ovenproof dish topped with grated cheese."

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1978. It has been discontinued.

**1017. Product Name:** Granose Vegetarian Goulash.  
**Manufacturer's Name:** Granose Foods Ltd.  
**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.  
**Date of Introduction:** 1978.  
**Ingredients:** 1980 and 1990: Water, textured soya protein, maize starch, hydrolysed vegetable protein, tomato puree, wheat flour, salt, yeast, carrot, onion, potato, leek, capsicum, mushroom, sugar, paprika, spices, herbs, vegetable oil.  
**Wt/Vol., Packaging, Price:** 425 gm (15 oz) can.  
**How Stored:** Shelf stable; refrigerate after opening.  
**New Product–Documentation:** Manufacturer's catalog. 1980. April. "Soya protein and vegetable stew in a sauce

flavoured with paprika. May be heated as in the can or have added vegetables."

Form filled out and Labels sent by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1978. Label. 1990. 8.5 by 4.25 inches. Photos on front and back panels show a kettle or wok full of the ready-to-serve product, which resembles a meat casserole. "Textured soya protein and vegetables in a savoury sauce... A traditional stew with soya protein and vegetables in a tasty sauce seasoned with paprika and tomato. Contains no animal products."

**1018. Product Name:** Loma Linda Sizzle Burgers (Meatless Hamburger Patty based on Spun Soy Protein Fiber).  
**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1978.  
**Ingredients:** Soy protein concentrate, wheat gluten, corn oil, rolled oats, water, egg whites, onion, artificial and natural (vegetable) flavors, corn starch, dried yeast, salt, whole wheat flour, caramel color, dextrose, spices, guar gum, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 1 burger (2.5 oz–71 gm): Calories 210, protein 15 gm, carbohydrate 13 gm, fat 11 gm, cholesterol 0

mg, sodium 320 mg, potassium 180 mg.

**New Product–Documentation:** See next page. *Soybean Digest Bluebook*. 1979. p. 93. “Sizzle Burger.” Ad in *Vegetarian Times*. 1980. No. 40. Aug. p. 25. “Sizzle Burgers. A tasteful way to avoid cholesterol, preservatives and added MSG.” Ad in *Mother Earth News*. 1980. Nov/Dec. p. 2.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1978.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Sizzle Burger” (or “Sizzle Burgers”).

**1019. Product Name:** Loma Linda Swiss Steak with Gravy (Meatless).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1978.

**Ingredients:** Soy protein concentrate, wheat gluten, corn oil, water, rolled oats, egg whites, corn starch, onion, artificial flavors, natural (vegetable) flavors, dried yeast, whole wheat flour, salt, caramel color, dextrose, spices, guar gum, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 1 steak (2.6 oz–74 gm): Calories 140, protein 9 gm, carbohydrate 8 gm, fat 8 gm, cholesterol 0 mg, sodium 350 mg, potassium 180 mg.

**New Product–Documentation:** See page after next.

*Soybean Digest Bluebook*. 1979. p. 93. “New meatless swiss steak.” Sold frozen or canned. Ad (full page, color) in *Bestways*. 1980. June. p. 47. “Swiss Steak. Its a real no-meat and potatoes dinner. No cholesterol, no preservatives or added MSG.” Now available in 13 oz and 28 oz cans. They are made by “combining two nutritious vegetable proteins.”

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1978.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19.

**1020. Product Name:** Loma Linda Tender Rounds (Meatless Meatballs with Gravy).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1978.

**Ingredients:** Tender Rounds: Wheat gluten, soy protein isolate, water, corn oil, wheat flour, egg whites, soy protein concentrate, corn starch, soy flour, dried yeast, artificial flavors, dextrose, onion, oat flour, natural (vegetable) flavor, onion powder, salt, garlic powder, caramel color,

guar gum, artificial colors, spice, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Broth: Water, corn starch, natural (vegetable) flavors, wheat flour, dextrose, onion, sugar, salt, caramel color.

**Wt/Vol., Packaging, Price:** Canned.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per approximately 6 meatballs (2.6 oz–73 gm): Calories 120, protein 15 gm, carbohydrate 7 gm, fat 4 gm, cholesterol 0 mg, sodium 310 mg, potassium 115 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1978.

A product with the same name but with different soy protein ingredients was introduced in 1953.

**1021. Product Name:** Okara Soyburgers.

**Manufacturer’s Name:** Madison Tofu Co-op. Renamed Bountiful Bean Plant by Sept. 1979.

**Manufacturer’s Address:** 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.

**Date of Introduction:** 1978.

**New Product–Documentation:** Letter/Order for pamphlets on tofu, tempeh, and miso from “Bountiful Bean Plant.” 1979. Sept. 20. The company is located at the address shown above.

James Lubbe. 1988. March. *Abbreviated History of the Bountiful Bean*. Madison Tofu Co-op. 1978-79. Okara: The honorable hull. Leaflet. 4 p. Illustrations and recipes from *The Book of Tofu* (Shurtleff & Aoyagi, 1975).

**1022. Product Name:** Sanitarium Health Foods Bologna (Canned Frankfurter Flavored Loaf).

**Manufacturer’s Name:** Sanitarium Health Food Co.

**Manufacturer’s Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1978.

**Ingredients:** Wheat protein, vegetable oil, yeast, soy protein, salt, Savex, hydrolysed vegetable protein, rice, garlic, onion.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 10 by 4 inches. Full color. Photo shows a cylindrical Bologna loaf on a bed of rice and mushrooms. “Vegetable Protein–Ideal for salads, casseroles, sandwiches, etc.” Recipes for Spanish Salad and Bologna Contadini.

Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1978.

**1023. Product Name:** Sanitarium Health Foods Vita-Burger (Flavoured T.V.P.).

**Manufacturer’s Name:** Sanitarium Health Food Co.

**Manufacturer’s Address:** 148 Fox Valley Rd., Wahroonga,

Loma Linda Sizzle Burgers capture the wonderful flavor and texture of meat hamburgers, and there's no cholesterol. They're made from Loma Linda's special ingredient, combining two nutritious vegetable proteins. Thanks to our continuing food and flavor advancements, you get terrific taste without preservatives or added MSG. No animal fat or cholesterol, either!

Loma Linda Sizzle Burgers are pre-cooked, then frozen to lock in flavor. Just heat and serve like meat burgers, with buns and fixings. Or, serve as a family-pleasing main dish.

Check out the whole line of Loma Linda meatless foods today. And write us directly for your free Sizzle Burger **Loma Linda Foods** recipe folder. SINCE 1906 RIVERSIDE, CA 92515

## Sizzle Burgers. A tasteful way to avoid cholesterol, preservatives and added MSG.

# INTRODUCING OUR NEW SWISS STEAK. IT'S TOO GOOD TO BE TRUE.

Loma Linda's new Swiss Steak with Gravy has so much of the taste and texture of steak that you may even think it's better than the real thing.

That's because it contains Loma Linda's own special ingredient, combining two different vegetable proteins. This special blend results in better texture plus a more favorable nutritional balance.

Loma Linda's new Swiss Steak is precooked and comes smothered in its own rich gravy. So you just open a can and it's ready to heat and serve.

Our Swiss Steak makes a scrumptious main dish

entree when served with cooked vegetables and a salad. Or a really hearty lunch served as an open-faced steak sandwich. It can be featured in stews and casseroles.

So try Loma Linda's new Swiss Steak with Gravy soon. It has the flavor of steak with none of the animal fat, preservatives or cholesterol. Which is why we say it's too good to be true.

*Loma Linda Foods*  
SINCE 1908

Sydney 2076, NSW, Australia.

**Date of Introduction:** 1978.

**Ingredients:** Soy flour, salt, hydrolysed vegetable protein, flavouring, syrup, caramel.

**Wt/Vol., Packaging, Price:** 200 gm box.

**How Stored:** Shelf stable.

**Nutrition:** Protein 50%, moisture 8%, ash 8%, fibre 3%, carbohydrate 30%, fat 1%.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. Box. 13 by 9.5 inches. Full color. Photo shows 7 burgers in tomato sauce in a skillet. “Textured Vegetable Protein. Main course vegetable protein. Ideal for patties, burgers, casseroles.” Recipes for Spaghetti Sauce and Vita-Burgers (hamburgers).

Letter from Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1978.

**1024. Product Name:** Sweet Earth Savory Soy Vegeburger.

**Manufacturer’s Name:** Sweet Earth Natural Foods.

**Manufacturer’s Address:** 597 Lighthouse Ave., Pacific Grove, CA 93950. Phone: 408-375-8673.

**Date of Introduction:** 1978.

**Ingredients:** 1991: Organic soy beans, organic millet, carrots, bulgar, brown sesame seeds, organic cornmeal, tamari, tomato, onions, bell peppers,...

**Wt/Vol., Packaging, Price:** 12 oz vacuum packed.

**New Product–Documentation:** Listed in Fowler Brothers’ catalog. 1991. Jan. p. 74. Talk with Russel Hicks of Sweet Earth. This was the company’s first product, introduced in 1978. At that time the product name and company name were different. It is made with whole soybeans. The company also makes a Gourmet Grain Vegeburger, but it contains no soy.

Label sent by Russell Hicks. 1991. 3½ inches diameter. 4-pack. 10 oz, vacuum packed. Purple, yellow, black and

orange on tan. Note: The company address printed around the front outside of this label is almost impossible to read.

1025. Takatsuka Marugo Shokuhin. 1978. Kaisha annai [Introducing our company]. Soya 3-41-10, Ichikawa-shi, Chiba-ken, Japan. 11 p. Manufacturer’s catalog. Color. [Jap]

• **Summary:** The company was founded in March 1894 as Takatsuka Marugo Seika Shijo

Yugengaisha. In Nov. 1908 they established their first tofu plant. Jan. 1957: Started making bean sprouts (probably mung beans) Oct. 1965: Bought their first automatic tofu forming machine, a second one following in Oct. 1973. Today the company makes mung sprouts, soybean sprouts, sushi age (tofu pouches), ganmodoki, nama age, inari age, abura age, yaki-dofu, tofu.

Note: This is the earliest document seen (April 2013) that uses the term *sushi age* to refer to deep-fried tofu pouches. Address: Chiba-ken, Japan.

**1026. Product Name:** Sossoes, and Meatless Balls (Extruded Textured Soy Flour).

**Manufacturer’s Name:** Tiger Protein Industries (Pty) Ltd. Subsidiary of Tiger Oats & National Milling Co. Ltd.

**Manufacturer’s Address:** Plant: Fedler St., Randfontein 1760, Transvaal, South Africa. Office: P.O. Box 575, Randfontein.

**Date of Introduction:** 1978.

**New Product–Documentation:** *Soybean Digest Blue Book*. 1978. p. 36.

**1027. Product Name:** Solar Burgers (With Seitan and Soynuts).

**Manufacturer’s Name:** Vegetable Protein Co. (The).

**Manufacturer’s Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1978.

**Ingredients:** Seitan, soynuts.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Johnny Weissman. 1992. March 31. One day in about 1978 or 1979 he realized that deep-frying was unhealthy, and that day he

put the deep-fryer in the basement and stopped making Tan Pops—his best-selling product. At that point he invented Solar Burgers, made from a mixture of seitan and soy (in various forms, incl. soynuts and TVP).

**1028. Product Name:** Smoky Soy Bits (Bacon-like Bits made of TVP and Gluten).

**Manufacturer's Name:** Vegetable Protein Co.

**Manufacturer's Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1978.

**Ingredients:** Textured soy flour, gluten, natural flavors, spices, soy oil.

**How Stored:** Refrigerated.

**New Product—Documentation:** Letters from John Weissman. 1992. May 29 and June 25. In about 1978-79 John introduced a new product to salad bars around Boston. Named Smoky Soy Bits, it was a combination of TVP and gluten (produced by Ogilvie Ltd. in Montreal, Quebec H3C 3H1, Canada) made into bacon-like bits, but without hydrogenated oils or salt (he used tamari instead). It was an “all natural” product—to the extent that TVP is natural. It was sold to salad bars and to Tom Iglehart's Sunrise Sandwich Company for use in a sandwich. He made a thick spread out of the Smoky Soy Bits. Later versions did not contain gluten.

**1029. Calella, John R. 1978. Cooking naturally: An evolutionary gourmet cuisine of natural foods. Berkeley, California: And/Or Press. ix + 112 + 5 p. Illust. by Pedro J. Gonzalez. Index. [81 ref]**

• **Summary:** The author of this vegetarian cookbook, of Italian ancestry, is popularly known as “Organic John.” He likes to use fresh foods, and he has a call-in radio show in San Francisco. In chapter 4, Ingredients (p. 16-), he discusses soya butter [margarine], miso, tamari, instant protein powder (incl. Shaklee's Instant Protein), lecithin granules, Soyamel powder (powdered soymilk made by Worthington Foods), Balanced protein seasoning (powdered HVP made from soybeans).

Chapter 10 (p. 79-83) contains a long section on soya beans, with recipes: Homemade soya bean curd (tofu). Things you can do with tofu. Soya patties (with dry soya beans). Soya bean loaf. Green soya bean mix (with dry green soya beans). Soya beans in a beet stew. Soya bean spread.

In the section on Fruit Sherbets, many of the recipes contain 2 tablespoons Soyamel (powdered soymilk) and lecithin granules. Address: Berkeley, California.

**1030. Farm, The. 1978. Yay soybeans! How you can eat better for less and help feed the world. Second revised edition. Summertown, Tennessee: The Book Publishing Co. 14 p. Illust. 22 cm. 2nd rev. ed. 1978, 14 p.**

• **Summary:** The first edition of this creative little booklet, published in 1974, was printed with blue ink on white

paper; this 1978 edition uses brown ink on white paper. Contents: Living on soybeans. Some of our favorite ways to eat soybeans. Basic cooked soybeans: Soybeans and tortillas, Soybean stroganoff, Soy fritters, Cheezy soybeans (Good Tasting Nutritional Yeast gives the cheezy flavor), Soyburgers, Soy nuts (dry roasted), Soy coffee. Soymilk: Using soybeans or using soy flour, Soy mayonnaise (made with soymilk), Soy yogurt.

Tofu: How to make at home (6 step process using nigari, epsom [sic, Epsom] salts, vinegar, or lemon juice as a coagulant), Tofu salad dressing, Tofu salad [like an eggless egg salad], Scrambled tofu, Pan fried tofu, Tofu cheesecake. Soy pulp: Introduction, Scalloped tomatoes and pulp, Soy pulp burgers, Soy pulp cookies. Soy flour: Basic salad and sandwich spread, Seasoned sandwich spread. TVP—Textured Vegetable Protein: Introduction, TVP tortilla and taco filling, Taco filling sauce, TVP spaghetti sauce, Sloppy Joes. Good Tasting Nutritional Yeast: Introduction, Melty cheese, Cheese crackers, Golden gravy, Yeast ‘omelette.’ Eggless cookery: Introduction, Pancakes (with soymilk), Chocolate cake (with sour soymilk), Cookie crust for cheesecake. A word about vitamin B-12. Some facts about people and food. Plenty. Address: Tennessee.

**1031. Haedrich, Ken. 1978. Good food, good folks: A collection of vegetarian recipes from across America. Plainfield, New Jersey: American Impressions. 46 p. Illust. by Diane Haedrich. 21 cm.**

• **Summary:** This booklet, printed with brown ink on beige paper, was published by the author. Some of the recipes are from other books, with proper acknowledgment. Contents: Dedication (to World Hunger Year, P.O. Box 1975, Garden City, New York 11530). Introduction (He owns a print shop. The book idea was conceived while listening to singer / songwriter Harry Chapin talking about world hunger on the radio). Recipes—Breads & butter. Soups. Main courses & salads. Desserts. Many of the recipes call for “milk or soymilk,” and for “tamari or soy sauce.”

Soy-related recipes: Tofu sandwich spread (p. 20). A tofu primer (incl. Tofu “mayonnaise” and praise for *The Book of Tofu*, by Shurtleff and Aoyagi). Soyburgers (p. 23). Sweet & sour soybeans (p. 26). The rear cover states that half the proceeds from sale of this book will be “donated to World Hunger Year—an educational, resource organization focusing on food and hunger issues of local and global impact.” Address: Plainfield, New Jersey.

**1032. Hagler, Louise. ed. 1978. The Farm vegetarian cookbook. Revised ed. Summertown, Tennessee: The Book Publishing Co. 223 p. Illust. Index. 22 cm.**

• **Summary:** An expanded and extensively revised version of its pioneering and very creative and influential predecessor. There are excellent expanded sections on gluten (p. 76-81), tempeh and tempeh starter (p. 82-93), miso (p. 93), soymilk

(p. 95-101), Ice Bean (soy ice cream, including recipes for 5 flavors), Frogurt (soymilk frozen yogurt, p. 107), soy yogurt (p. 108-13 including a non-fermented cheese made by draining soy yogurt curds in a cotton bag; from this “yogurt cheese” are made soy-based cottage cheese, sour cream, cream cheese, and cheesecake), tofu (p. 114-41), yuba (142-43), soy coffee, soy nuts, granola, and Soysage (p. 144-47), soy flour (p. 148-53), sprouts (incl. alfalfa, mung beans, and soybeans, p. 154-57).

Loaded with new illustrations (including amazing border designs) and photos, such as: Soy Flar (soy flour, p. 149), and woven bread border (p. 179). Address: Summertown, Tennessee.

1033. Holmes, Charlotte Van Gundy. 1978. *Cooking for living. The art of healing.* Sulfur Springs, Arkansas: Philadelphia Institute, Inc. 102 p. No index. 20 cm. [11\* ref]  
 • **Summary:** The section titled “Soy beans” (p. 31-33) has the following contents: Introduction and list of different food products made from soy beans. Drying, freezing, canning, and tenderizing whole dry soybeans. How to make soybean milk: From beans, from soy flour, how to use the residue

[okara] left from making soy milk. Soy cheese (also called “vegetable cheese” or “tofu”): How to make soy cheese from soy milk, how to make soy cream, how to make soy mayonnaise.

Also discusses: Homemade soy butter [soynut butter] (p. 57-58). Entrees (p. 58-60): Soy bean loaf, Soy cheese patties, Soy loaf, Soy grits loaf, Peanut butter patties. Soy sauce and Sovex (p. 83).

Note 1. The author’s father, Theodore Van Gundy, was a soyfoods pioneer in southern California. The first printing of this book was in 1967, the second in 1970, and the third in 1973.

Note 2. On the cover is written (as if it were the title): *Keys to Cooking for Living: Recipes and Menus.*

Note 3. With This book, Charlotte encloses a pamphlet about Sulphur Springs, Arkansas. It is a sort of spa where people go to use the not mineral waters to help them recover from certain kinds of illnesses. Address: M.D., P.O. Box 308, Sulphur Springs, Arkansas 71768.

1034. Jonathan. 1978. *Prijzlijst 1978-1979* [Price list 1978-1979]. Holleweg 113, 2070 Ekeren (near Antwerp), Belgium. 3 p. [Dut]

• **Summary:** This price list is written on the company’s letterhead, at the top left of which is written “Jonathan.” Below that is an illustration (line drawing) of two seagulls flying. In the top center is a large round yin-yang (*t’ai chi*) symbol, around which is written: “It’s the way to a wonderful world.” Below that, as part of the letterhead is written (in Dutch and French): “Preparation of macrobiotic, natural, and vegetarian specialties.”

Fresh products: Seitan (vegetarian steak, 2 kg or 5 kg). Tofu (*sojakaas*, 2 kg or 5 kg). Mochi (sweet rice and sea salt). Seitanburger (seitan, buckwheat, fresh herbs; 20 burgers). Seitan Saté (seitan, tofu, carrots, onion; 20 skewers). Soy flour (*Sojamel, biologische gele sojabonenat* [organically grown yellow soybeans], 455 gm pots). Soya croquettes (*Sojakrokotten*, made from soybeans, 50 pieces). Vegetable pickles.

Dry goods: Sea vegetable condiment (kombu and sesame seeds). Spreads: Nut butter (*Notenpasta*). Peanut butter. Nut mix. Almonds. Cashew nuts. Hazelnuts.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Seitanburger” (or “Seitanburgers”). Address: Ekeren (near Antwerp), Belgium. Phone: 031-64.41.73.

1035. Miller, Lindsay. 1978. *The apartment vegetarian cookbook.* Culver City, California: Peace Press. 312 p. Index. 22 cm. [30 ref]

• **Summary:** Soy-related recipes include: Soybean bulgar casserole (p. 148). Soybean stuffed eggplant (p. 157). Soybean creole (with brown rice and tomato paste, p. 175). Soybean patties (p. 182). Whole wheat soy bread (with soy

flour). Cornmeal-soy grits bread (p. 211). Wheat germ-soy grits bread (p. 212). Quick wheat-soy bread (p. 219).

The glossary contains substantial entries for miso, peanut butter, soy beans, soy flour, soy grits, tamari soy sauce, tisanes or herb teas, and tofu. Address: Culver City, California.

1036. Moore, Shirley T.; Byers, Mary P. 1978. A vegetarian diet: What it is; how to make it healthful and enjoyable. Santa Barbara, California: Woodbridge Press Publishing Co. 120 p. With 7 color photos. 23 cm. [111 ref]

• **Summary:** A sound, readable, and well documented book written by Seventh-day Adventist nutritionists. Covers up-to-date information on nutritional adequacy of vegetarian diets, types of vegetarians, daily food guides, and sample menus. The tone of Chapter 1 is quite defensive, as if Seventh-day Adventists had been previously accused of being unscientific, faddists, and/or quacks.

Contents: Acknowledgments. Preface. 1. A vegetarian diet: What it is; what it is not. 2. Filet mignon or pecan patties. 3. Food and people. 4. Now for the menu. 5. The littlest vegan: A nonmeat diet for infancy. 6. Why the vegetarian lifestyle. Conclusion. Appendixes: A. Sample menus for a week. B. Suggestions for dining away from home: Full-fledged vegetarian restaurants, restaurants catering to cultural food tastes (Chinese, Japanese, Greek, Italian, Mexican), cafeterias, smorgasbords, restaurants, salad bars, airlines, supermarket meals (no specific restaurants are mentioned—only these types). C. A sampling of vegetarian cookbooks [28 books are listed, many of them by Seventh-day Adventist authors]. D. Meat analog manufacturers [ADM, Cedar Lake Foods, General Mills, Loma Linda Foods, Miles Laboratories / Worthington, Millstone Foods]. Address: 1. PhD; 2. M.A. Both: Loma Linda Univ., Loma Linda, California.

1037. Photographs of the Telluride Tofu Shop in Telluride, Colorado. 1978. Telluride, Colorado.

• **Summary:** Fourteen black-and-white photos (each 3½ by 5 inches), numbered with captions, were sent to Soyfoods Center on 24 Sept. 2002 by Matthew Schmit, founder and owner of the Telluride Tofu Shop. The photos themselves were all taken in 1978. They show: (1) Sign above entrance on Oak Street to Spectrum Shops: The Tofu Shop and Winter Stash food co-op. (2) Restaurant with “Tofools” eating and hanging out. (3) View of the “kitchen” with cutting board, pots, and shelves. (4) “The Tofools” (16 people) standing under sign in front of Oak Street entrance. Incl. Catherine Peterson, Christie Mather (front row, third from left), and Matthew Schmit (in far back). (5) Packing the day’s tofu in kitchen. Matthew Schmit (front, with beard and ponytail). Joel Rosenblum (back). Forming boxes of tofu were pressed on cutting board by Joel—who later worked for White Wave in Boulder, Colorado. (6) Interior of kitchen. Tofu stove with

lever press mounted on wall. Refrigerator.

(7) Sprout room and packaging area. (8) Matthew Schmit in sprout room holding a tray of sprouts by its shelf. They grew alfalfa, clover, radish and mung bean sprouts; no soy sprouts. (9) The kitchen. Entrance to restaurant is at back left. Christie Mather and Stuart the Hermit are bagging soy burgers for freezing. (10) Oak Street (torn up in preparation for creating a new park) looking toward the ski slopes. On left: Windows of tofu shop restaurant and entrance to tofu shop and opera house. On right: Entrance to county courthouse. (11) Tofu maker Joel Rosenblum (with pony tail and beard) slicing tofu on scale for packaging. (12) Tofu-making equipment by stove in kitchen. Left to right: 1 gallon Waring blender. Wooden forming box and lid. Wooden lever press on wall. Ceramic 10-gallon cauldron with wooden lid and wooden straining bucket from Olof Brentmar. (13) Top view of many take-out deli 14 oz tofu containers each with a label on top. An illustration shows a dragon in a circle. (14) Another view of the sprout room.

Note: Matthew later moved this tofu shop to Arcata, California, where it was renamed Arcata Tofu Shop. Address: Telluride, Colorado.

1038. Schmit, Matthew. 1978. Peaking out on tofu. Telluride, Colorado: Published by the author. [16] p. No index. 22 cm.

•

**Summary:** This booklet (brown ink on tan paper) shows a horizon of snow-capped peaks on the cover and contains handwritten 20 recipes (brown ink on tan paper) using tofu or soymilk (2 recipes): Sesame cookies (with soymilk). Refried tofu burrito. Tofu burgers. Soy mayo. Hot n' spicy tofu. Sesame tofu paté. Tofu turkey basting sauce. Vegetable sukiyaki. Tofu loaf. Cabbage noodle bake (with tofu). Eggplant bulgar casserole with tofu sauce. Scrambled tofu 'n veges. Tofu zucchini quiche. Tofu Rubin. Cheeseless cheese sauce (with yeast). Tofu high protein sandwich spread. Tofu sandwich spread. Carob milk (using soymilk). The rear cover states: "these original recipes sprouted in the kitchen of the tofu shop and are prepared with care by the telluride tofool family using our own homemade soy products. Special thanks to: Catherine Peterson, Kathy Greene, Barton Coffman, Becca Smith, and Sharyn." Address: The Tofu Shop, 116 N. Oak St., Telluride, Colorado.

1039. Sudweeks, Deanna Smith. 1978. Gluten (the economical meat substitute). Salt Lake City, Utah: Hawkes Publishing, Inc. 160 p. Illust. 5 color plates. Index. 21 cm. [12 ref]

• **Summary:** Contents: The nature and value of wheat. Gluten. 3. Soybeans. 4. Substitutions. 5. Gluten making. 6. Gluten main dishes. 7. Do-Pep (Powdered gluten) [vital wheat gluten]. 8. Soups and beans. 9. Salads. 10. Cereals and breakfasts. 11. Honey and candy. 12. Appetizers. 13. Canning. 14. Bread. 15. Desserts.

This book advocates using wheat gluten in place of meat, citing its many advantages over meat. "You can make the equivalent of 8 lbs. of meat in 15 minutes!—at a cost of \$0.80 plus electricity to cook! What a benefit!" If you ate 2 lb of meat a day at a cost of \$1.00/lb, you would spend \$720/year, but if you substituted 3 lb/day of wheat gluten at a cost of \$0.10/lb to get an equal amount of protein, you would spend only \$109—a savings of \$610.50 per year. A photo on the title page shows Sudweeks.

Update 1995. Nov. 1. The publisher's phone number in Salt Lake City is 801-266-5555. Address: Utah?.

1040. Zurbel, Runa; Zurbel, Victor. 1978. The vegetarian family: With recipes for a healthier life. Englewood Cliffs, New Jersey: Prentice-Hall, Inc. 185 p. Edited by Lester Alexander. Illust. Index. 23 cm. [44 ref]

• **Summary:** The section on soybeans (p. 62-67) discusses soybeans and soyfoods, then gives recipes for: Basic soybeans. Mediterranean soybean casserole Soybean casserole. Soybean salad. Soy milk. Sesame soy milk. Roasted soybeans (baked). Other soy-related recipes include: Soyburgers (p. 80). Ginger tamari sauce (p. 118). Miso yogurt dip (p. 127).

The section titled "Basic Macrobiotic Cooking" discusses shoyu tamari, and miso, and gives recipes for: Miso soup. Miso spread. Nerimiso (Sweet simmered miso).

Chapter 7 (p. 88-101) is titled "Tofu: The food of the future—Discovered over two thousand years ago." A full-page photo opposite the title page shows a wooden forming box, with cakes of tofu and soybeans nearby. *The Book of Tofu*, by Shurtleff and Aoyagi, is praised and credited as the source of much of the information on tofu in this book. Recipes include: Quick tofu. Homemade traditional tofu. Tofu sandwich. Tofu salad. Tofu and peas. Tofu and snow peas. Tofu and Chinese vegetables. Tofu and [mung] bean sprouts. Tofu and sesame. Kinugoshi and how to make custard style kinugoshi. The chapter ends with 2 pages on tempeh, but no recipes.

1041. **Product Name:** Loma Linda Gravy Quick [Brown, Chicken Style, Country Style, Mushroom, Onion].

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1978?

**Ingredients:** Brown: Enriched wheat flour, salt, cottonseed oil, natural (vegetable) flavors, soy flour, onion powder, monosodium glutamate, caramel color.

**New Product—Documentation:** Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27. Soy flour is typically about the fifth ingredient in each flavor of gravy.

1042. National Soybean Processors Association, Food Protein Council. 1978? The story of soy protein. Washington, DC. 6 panels. Undated.

• **Summary:** Contents: Protein power. Soybean feast. World of advantages. Processing. Soy flour. Soy protein concentrate. Isolated soy protein. Textured soy protein.

"The golden soybean is protein power. From this oil-bearing seed comes the most versatile and economical source of protein in all the world." "Every sunrise brings an estimated 180,000 new mouths to feed. In 30 years, nearly seven billion persons will likely inhabit the Earth. Few experts believe it will be possible to feed them without assistance from soy protein."

"The promise of soy protein is in its versatility. It can be concentrated; textured; spun into fibers; flavored and colored; formed into slices, chunks, and chips; and tailored into virtually any form desired by food processors. Soybeans contain nearly twice the protein content of cheese, twice the protein of red meat, and 10 times the protein of milk.

"Food technologists have great flexibility in adjusting the protein content of soy-containing foods, while tightly controlling corresponding amounts of vitamins, minerals, calories, and fats. They can actually 'build in' any desired level of nutrients, producing highly nutritious foods with no cholesterol and high polyunsaturated fatty acid content."

"Soybean feast: A noted food editor was led into the corporate dining room of a leading U.S. soybean processor.

He was served an appetizing array of hors d'oeuvres, including ham, cheese, sausage, and cocktail frankfurters. His main course included sweet-and-sour pork on rice, complemented with a French-style ham pie with egg custard filling, and a loaf of corned beef hash. Dessert was lime sherbet and a tasty selection of chocolate candy with almonds.

"There wasn't a morsel of meat in the meal. It was entirely soy protein, even down to the almonds in the candy. The 'almonds' were processed soybeans—textured, flavored and prepared to look (and taste) like the natural product."

"One acre of grazing land produces 43 pounds of food protein when fed to beef animals. This same acre will produce nearly 600 pounds of edible protein [almost 14 times as much] when planted in soybeans." Today soybeans are harvested on more than 41 million U.S. acres." Note: That was true in 1968-69.

"By 1980 experts predict soy protein sales will approach \$1.5 to \$2 billion annually, as compared to \$30 million today. Currently, about 425 million pounds of edible soy protein is produced in the U.S." Seven photos show soy protein in various applications. Address: Suite 314, 1225 Connecticut Ave., N.W., Washington, DC 20036 or Suite 600, 111 E. Wacker Dr., Chicago, Illinois 60601.

**1043. Product Name:** Vegetarian Chili (with TVP).

**Manufacturer's Name:** Vegetable Protein Co.

**Manufacturer's Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1978?

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Joel Wollner, a clerk at the Erewhon retail store on Newbury St. in Boston in the mid-1970s. 1991. Nov. 18. Joel recalls that Johnny Weissman made both Wheatmeat and Tan-Pops. He owned the Vegetable Protein Company in Cambridge, and he was into seitan and other vegetable protein foods. This was one of them (made with TVP rather than seitan). Joel does not recall the exact product name or date of introduction.

Talk with Johnny Weissman. 1992. March 31. He made a TVP chili, which he thinks was called something like Vegetarian Chili.

1044. Starr, Andy. 1979. Beyond bean sprouts: Rochester's natural food companies are doing a healthy business [Northern Soy]. *Upstate*. Jan. 28. p. 8-9.

• **Summary:** Five large, superb photos show tofu-making at Northern Soy in Rochester, New York. (1) Peter Kilbridge puts soybeans, which have been soaked in water, into a grinder. (2) Jay Stiler draws off the whey from above the curds, formed by natural nigari. (3) Kilbridge scoops the curds into cloth-lined forming boxes. (4) Kilbridge and Norman Holland fold cloths over the top of the curds in the forming boxes. (5) Cut blocks of tofu are placed into a

plastic bucket to be shipped (in bulk) to market.

Northern Soy is one of the few tofu-manufacturing firms in the USA. Andy Schecter and Greg Weaver began making tofu in the Zen Center's basement at Arnold Park a few years ago. Production has grown from 70 lb/week to 2,000 lb/week. Now they have set up a retail outlet, The Tofu Shop, at 686 Monroe Ave. in Rochester. There they serve chocolate, lemon, or carob pies made with tofu, tofu lasagna, tofu burgers without beef, tofu sloppy joes, tofu spinach casserole, tofu reuben sandwiches, tofu peanut butter cookies, and tofu gingerbread with lemon sauce. Wegmans supermarkets carry Northern Soy's tofu and Clear Eye distributes it. Address: Rochester, New York.

**1045. Product Name:** Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Crystal Hills Tofu Shop.

**Manufacturer's Address:** Bethlehem, New Hampshire.

**Date of Introduction:** 1979 January.

**Ingredients:** Okara, whole wheat flour, wheat germ, nutritional yeast, oil, soy sauce, honey, herbs, spices.

**New Product–Documentation:** Whole Foods. 1979. Jan. p. 40-41. "Soysage from Crystal Hills." The company started tofu production in September 1977. Not clear when Soysage production started, but they now make 1,500 lb of tofu and several hundred pounds of soysage each week; Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 169.

Note: This is the earliest document seen (Oct. 2001) that gives soy fiber statistics for an individual company.

1046. Fiering, Steve. 1979. A Midwestern interest in tofu [The Soy Plant in Ann Arbor, Michigan]. *Whole Foods (Berkeley, California)* 2(1):38, 40. Jan.

• **Summary:** This is basically a history of The Soy Plant and some of its creative financing schemes. The Soy Plant began operation in August 1977. New products include soymilk, tempeh, spiced tofu, two spreads (one with eggless soy mayo and turmeric; one with tofu, sweet miso and tahini), ice bean [soy ice cream], tofu pies, okara peanut butter balls, and soy sausage. Address: The Soy Plant, Ann Arbor, Michigan.

1047. Kinderlehrer, Jane. 1979. Tofu: Food of 10,000 flavors. *Prevention (Emmaus, Pennsylvania)*. Jan. p. 111, 116-18, 120, 122.

• **Summary:** "If you're into New Year's resolutions, I have a nifty one for you. Resolve to try tofu, the soft creamy cake made from cooked soybeans. Its sensational!... There's no doubt about it—tofu's time has finally arrived on our shores. Spurred by the work of William Shurtleff and Akiko Aoyagi, who wrote *The Book of Tofu* (Autumn Press, 1975), tofu shops are springing up in many communities; tofu can be found in quite a few supermarkets, health food stores, Oriental stores, and food cooperatives." Rodale Press will soon be publishing its own book on tofu, titled *The*

*Americanization of Tofu* by Bauer and Anderson.

Contains recipes for: Poached egg in a tofu basket. Tofu and brown rice casserole. Corn soufflé. Green goddess dressing. Carrots Parmesan with tofu. Tofu cream pie (from The Tofu Shop in Rochester, New York). Carob-mint pie. Tofu dogs (from the New England Soy Dairy, Inc., Greenfield, Massachusetts).

1048. Leviton, Richard. 1979. Soyship enterprises: The grasshopper that said "moo." *Whole Foods (Berkeley, California)* 2(1):36-37. Jan.

• **Summary:** Contains a good history of Laughing Grasshopper Tofu Shop in Massachusetts, which has now become the New England Soy Dairy. Discusses the company's rapid growth, larger marketplace, and new soy products. A photo shows Sue Fahey cutting and wrapping Soysage at Crystal Hills Tofu Shop in Bethlehem, New Hampshire. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

1049. Monroe, Linda. 1979. The many faces of tofu. *Alch Mist of Ann Arbor (Michigan)*. Jan.

• **Summary:** The Soy Plant, located at 211 East Ann St., is a tofu shop—but they also make soysage, missing egg salad, tempeh, spiced tofu (various spices are added when curdling the soy milk), soy milk (regular or flavored with honey and vanilla), missing egg salad, tofu-tahini spread, tofu tarts (a tasty dessert). Coming soon: Soy Scream (soy milk ice cream), and Boston brown bread (steamed). Tofu is made four days a week. "Soy products can be and indeed are the staple of many vegetarian diets."

"The Soy Plant sells one pound cubes of tofu for 70 cents (if you bring your own container), 72 cents with their plastic bag, or 85 cents in their container [plastic tub]. They encourage people to bring their own containers so as to cut down the use of plastic." "The collective has been very creative with the versatile little soy bean. Their ideas seem to be endless. They have developed many tasty foods by experimenting with different combinations of ingredients."

"The Soy Plant is a cheerful, pleasant place to visit. You'll usually find samples of their different spreads and beverages. Any questions about soy products are gladly answered either by collective members or by just looking in any of the various books available there on tofu, miso and other soy products. You can be sure the collective will always be coming up with new items to surprise and satisfy your taste buds.

"The Soy Plant is open Mondays–Fridays, 10-6, and Saturday, 9-5."

In the middle of the article is The Soy Plant Logo, two soybean plants growing (to left and right) out of Planet Earth. Around the bottom is written "The Soy Plant."

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. The title of this periodical derives

from the word "Alchemist." The logo was Steve's idea, developed by Marge Bruchac, Susanna Middaugh, and Dan Ecclestone.

1050. **Product Name:** Savory Baked Tofu (Vacuum Packed).

**Manufacturer's Name:** Quong Hop & Co.

**Manufacturer's Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1979 January.

**Ingredients:** Water, organically grown soybeans, soy sauce (water, soybeans, wheat, salt) spices, nigari (magnesium chloride).

**Wt/Vol., Packaging, Price:** Vacuum packed.

**How Stored:** Refrigerated.

**Nutrition:** Per 3.5 oz.: Calories 193, protein 23 gm, carbohydrate 5 gm, fat 9.

**New Product–Documentation:** Label. 1981. 3.5 by 2 inches. Self adhesive. Brown and silver on light green. 7.5 oz. Label. 1979. 2 by 2 inches. Self adhesive. Mustard yellow on white. Back label. 3.75 by 2 inches. Self adhesive. Brown on white. "Savory Baked Tofu has a flavor and consistency remarkably like that of smoked or seasoned ham. Enjoyed for centuries in Northern China, it is prepared by marinating pressed tofu in natural soy sauce and seasonings, then baking it to give a meaty texture and wonderful flavor. The finished savory tofu is 23% protein, more than chicken or steak, and almost three times as much as regular tofu. One 4 oz serving provides you with 27 gm of quality protein, nearly half your daily need with only 219 calories.

"Savory baked tofu is ready to eat. Sliced or diced, it can be used in sandwiches, for hors d'oeuvres or in salads like ham, bacon, or cheese. It is also delicious in soup or with noodles. For outdoors, enjoy it from the package as a quick, high-protein snack. Our unique vacuum packaging allows savory baked tofu to remain fresh in the package over one week without refrigeration.

"For more recipe ideas see *The Book of Tofu* by Shurtleff & Aoyagi (Autumn Press or Ballantine Books)." Ad in *Whole Foods*. 1979. Jan. p. 40. Poster. Color. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Vacuum packed tofu! Savory baked–Deep-fried cutlets.

1051. Quong Hop & Co. 1979. Soy foods in San Francisco since 1906 (Ad). *Whole Foods (Berkeley, California)* 2(1):40. Jan.

• **Summary:** This ¼-page black-and-white ad begins: "The traditional soy foods of China have been our family's business now for three generations. Since 1906, when our doors first opened in San Francisco's Chinatown until today, we have built our business on a firm commitment to producing only the finest quality products for our customers." Vacuum-packed tofu products include: Natural Nigari Tofu, Savory Baked Tofu, Fried Tofu Cutlets, and

Tofu Burgers.

This is the also earliest English-language document seen (April 2013) that contains the term “Fried Tofu Cutlets” (one of two documents). Address: 161 Beacon St., So. San Francisco, California 94080.

**1052. Product Name:** Tofu Burger (Vacuum Packed. Renamed New Leaf Tofu Burger by 1980).

**Manufacturer’s Name:** Quong Hop & Co.

**Manufacturer’s Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1979 January.

**Ingredients:** Nigari tofu, diced carrots, diced onions, sesame seeds, sunflower seeds, dried currants, safflower oil, sea salt, spices.

**Wt/Vol., Packaging, Price:** 100 gm vacuum pack patties. Retail for \$2.59/lb.

**How Stored:** Refrigerated.

**Nutrition:** Per pattie: 8.5 gm protein, 107 calories.

**New Product–Documentation:** Label. 1981. 4 inch diameter. Self adhesive. Red, mustard on white. “Heat & Serve!” Ad in Whole Foods. 1979. Jan. p. 40. Recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 182. Poster. 1982. Color. “Tofu Burgers Bring Tofu West, in its Most Delicious Form Ever.” Vacuum packed.

1053. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tofu: Food for mankind. Condensed and revised. New York, NY: Ballantine Books. A division of Random House, Inc. xii + 433 p. Jan. Illust. by Akiko Aoyagi Shurtleff. Index. 18 cm. [60 ref]

• **Summary:** This book has been extensively revised and updated. Many names of Japanese tofu have been Americanized. Contents: Preface. Acknowledgements. 1. Protein East and West. 2. Tofu as a food. 3. Getting started: Favorite tofu recipes. 4. Soybeans. 5. Fresh soy puree. 6. Okara (Soy pulp). 7. Curds and whey. 8. Tofu & firm tofu. 9. Deep-fried tofu: Deep-fried tofu cutlets, deep-fried tofu burgers & treasure balls (tofu treasure balls, p. 269), and deep-fried tofu pouches. 10. Soymilk. 11. Silken tofu. 12. Grilled tofu. 13. Frozen & dried-frozen tofu. 14. Fermented tofu. 15. Yuba. Appendices: A. Tofu restaurants in Japan. B. Tofu shops and soy dairies in the West. C. Varieties of tofu in East Asia. D. Table of equivalents. Bibliography. Glossary. Contains 250 recipes and 100 illustrations. Price: \$2.95.

This new edition features: (1) New recipes: Over fifty new American-style tofu recipes including Creamy Tofu Dressings, Tofu Teriyaki, Tofu Burgers, Tofu Eggless Egg Salad, and the like. The key to the book is an updated list of favorite tofu recipes plus suggestions for incorporating them into a weekly menu (p. 56). (2) New sections: An extensive new introduction to Soy Protein Foods (p. 66), dairylike products made from tofu (p. 150), dairylike products made from soymilk (p. 302) including soymilk yogurt (fermented),

ice cream, kefir, mayonnaise, whipped cream, popsicles, buttermilk, and soy shakes. (3) New chapters: Fermented Tofu and Varieties of Tofu in East Asia. (4) New basic methodologies: The key recipes for homemade tofu and homemade soymilk have been simplified and improved. (5) Updates: A complete listing of the 120 tofu shops and soy dairies now operating in the West; over 60 Caucasian-run shops have opened in the past two years. (6) New Americanized tofu names: Including deep-fried tofu burgers, deep-fried tofu cutlets, deep-fried tofu pouches, deep-fried tofu puffs, silken tofu, wine fermented tofu, and fresh soy puree. A major goal of this book is to coin English names for tofu products that will catch on and come to be used in labeling commercial products, in cookbooks, etc. (7) No sugar.

Note 1. This is the earliest English-language document seen (April 2013) that contains the following terms related to deep-fried tofu: “fried tofu cutlets” or “deep-fried tofu cutlets” (p. v, to refer to *nama-agé*), “fried tofu burgers” or “deep-fried tofu burgers (to refer to *ganmodoki*), “tofu treasure balls” or “deep-fried tofu treasure balls” (p. v, 269, to refer to *Hiryozu*), “fried tofu pouches” or “deep-fried tofu pouches” (p. v, to refer to *aburagé*).

Page 110: “In Japan, tofu is also called *momen-goshi* (‘cotton-filtered’) to distinguish it from its popular counterpart *kinu-goshi* (‘silken tofu’).” Note 4. This is the earliest English-language document seen (April 2013) that uses the term “silken tofu.”

Note 5. This is the 2nd earliest English-language document seen (Oct. 2011) that contains the term “Wine-fermented tofu” (p. 361).

In Jan. 1988 a new printing (but not a new edition) of this book (the 13th), slightly revised, appeared. It had a new cover and many new small illustrations. The subtitle was “Protein Source of the Future–Now!” The heading: “The World’s Bestselling Book on Tofu.” Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1054. *Whole Foods (Berkeley, California)*. 1979. Soysage from the Crystal Hills. 2(1):40-41. Jan.

• **Summary:** Crystal Hills Tofu Shop started production in Sept. 1977 at Bethlehem, New Hampshire. It began before that in the kitchen of Pat and Jay Gibbons. The shop is now run by 3 full-time and 2 part-time people, who make up to 1,500 lb of tofu and several hundred pounds of “Soysage” each week. These products are delivered weekly throughout New Hampshire and Vermont. The Soysage is made from okara, whole wheat flour, wheat germ, nutritional yeast, oil, soy sauce, honey, herbs and spices.

1055. *Whole Foods (Berkeley, California)*. 1979. The food of the future. 2(1):22-24. Jan.

• **Summary:** The article begins: “Why devote an entire issue

of *Whole Foods* to the subject of soyfoods? Soyfoods are a rapidly growing part of the natural foods industry...”

“The bringing of the ‘Soyfoods Revolution’ to the natural foods industry is the work of individuals, toying and playing with new recipes in their own kitchens and shops. No person deserves more credit for this revolution than William Shurtleff who, along with Akiko Aoyagi, wrote *The Book of Tofu*, and told us all how to do it. (An updated pocket-size version of *The Book of Tofu* is just off the presses of Ballantine Press.) Shurtleff travels the globe, sharing his expertise on soyfoods, covering topics as specific as chip-dip recipes and as broad as the role of soybean production in future patterns of world protein hunger.

“Other individuals, most of them with small soyfoods shops of their own, met recently to form the Soycrafters Association of North America (SANA), which is likely to serve as the backbone of the Soyfoods Revolution in the natural foods industry. [Note: This historic first meeting was held on 28-30 July 1978 at The Soy Plant in Ann Arbor, Michigan.] SANA selected Larry Needleman as its first president. Needleman, whose Bean Machines, Inc. imports the prime line of Takai tofu and soymilk equipment from Japan, has been a major source of information about soyfoods equipment for our industry.

“Needleman wrote about the spirit of the new organization at its first gathering in Ann Arbor.

“Imagine a group of seventy people representing enthusiastic dedication (almost to the point of craziness) to the production and distribution of tofu and other soyfoods, gathered in an informal setting in a university town in the Midwest, with meetings scheduled from nine in the morning till eleven at night—and you’ve got a good idea of what went on... ‘Sharing began immediately. Groups of people gathered here and there and began asking each other about their shop or organization. Those passing by would hear a familiar word such as ‘yield’ of [sic, or] ‘pressure-cooker’ and just stopped to join the conversation. It was apparent that here was a gathering destined to be stimulating and mutually beneficial...”

“The first evening, Bill Shurtleff set up a slide show about tofu and miso production in Japan. The presentation ran the gamut from small, traditional shops built over their own well, to large, fully-automated factories turning out tens of thousand of pounds per day. Bill answered questions and added a personal touch to the showing because he had shot the photos himself over a period of years, and was familiar with the language, traditions and production of the Japanese...”

“On Saturday morning, The Soy Plant showed us their method of producing tofu and soymilk. Those with less experience absorbed information and asked questions, and those with more experience volunteered information, clarified points and offered suggestions. Then Wataru Takai, the overseas manager for Takai Tofu and Soymilk Equipment

Co., Japan’s largest manufacturer of this equipment, explained principles behind each step of production, and the uses of the equipment...”

“At a later session, it was remarked that many soyfoods producers are operating on an inefficient and labor-intensive basis. Some felt this was a good way to begin, first becoming intimate with the steps of production and developing a market ‘track record,’ and then using that base to upgrade production by purchasing more sophisticated equipment. Others felt that the time and energy involved in putting together a makeshift shop which was outgrown in about six months would be better spent in the capital to start at higher technological level...”

“In one of the most popular and exciting discussions of the conference, the consensus of the group was that tofu and soymilk were the foods that Americans have been waiting for. A list of related products that have been marketed with incredible success included tofu burgers, no-egg salad, honey soymilk ice cream, tofu chip-dips and dressings, flavored soymilk, tofu ‘mayonnaise,’ and pressed, marinated tofu. There was unanimous agreement that it was these new soyfoods that would capture the interest and palate of middle America, people who had turned up their noses at that tasteless white cake of tofu floating in water...”

“Later we discussed the problems of proper storage and display of our products. In US food markets, tofu has usually been sold with Oriental foods in the vegetable section. Getting it moved to a cooler, more appropriate cheese display case, where it will stay fresh longer and compete favorably with dairy products, has met with resistance...”

“In the evening, another slide show by Bill Shurtleff showed us how tempeh, a key protein source for millions of people in Indonesia, is quickly and simply produced as a cottage industry in their homes. Having sampled this unusual food at lunch, we were eager to learn about it because it was delectable. Somewhere between a deep-fried fish cake and Kentucky fried chicken in flavor and texture, it lent itself to use in a seemingly endless variety of ways...”

“Toward the end of the conference, discussion turned to marketing and finance. It was found that some firms lacked capital for growth, while others had enough capital but needed greater management skills to keep up with the growing demand for soyfoods. That demand is not uniform nationwide. Different regions show various levels of consumer awareness, interest in, and acceptance of soyfoods. Printed hand-out sheets and cooking classes were suggested as promotional efforts were an important part of the creation of a desirable image for soyfoods.

“Before leaving Ann Arbor, the participants formed the Soycrafters Association of North America as a trade association to promote soyfoods and exchange information among the members. With the founding of SANA, the Soyfoods Revolution took its longest recent stride. Soycrafters were no longer isolated persons, groups and

shops, but had become a nationwide network devoted to the same purposes, sharing their experiences for mutual benefit and the ultimate benefit of the American consumer.”

Note: The word “soyfoods” is used throughout this article.

1056. *Ann Arbor Observer (Michigan)*. 1979. One of the few U.S. tofu manufacturers is right here in Ann Arbor: At the Soy Plant on Ann Street a collectively-run business combines political and nutritional interests to produce over 2000 pounds of soybean curd weekly. March. p. 29. [1 ref]

• **Summary:** This February morning Steve Fierling [sic, Fiering] arrives at The Soy Plant at 5 a.m. to start the day’s work in the back room of the former pizza carryout at 211 East Ann St. in Ann Arbor. He turns on the lights and the boiler, then starts cooking soy milk for the first batch of tofu. Fiering is part of a nine-member collective; this week he’s the cooker. The first batch of tofu should be ready by 7 a.m. Making tofu is a demanding discipline. Fiering, Sue Kalen, Chris Coon, and Al Dynak were the original founders of The Soy Plant one and a half years ago. Steve originally came from Camden, New Jersey, to the University of Michigan, where he majored in geology and, as he puts it, “minored in extracurricular political activism.” Politics led to a job as coordinator of the People’s Food Co-op, and that led to helping to start The Soy Plant. The Soy Plant is one of the few places in America where people can buy fresh tofu daily. A low-cost vegetable source of protein, retails for \$0.70/lb in the consumer’s tub or \$0.85 in a plastic tub.

Henry Ford was deeply interested in soybeans. He believed that “mechanized soybean production would help free the farmer from the drudgery of dealing with animals by eliminating the need for most meat... In fact his large demonstration soybean farm was near Macon, south of Saline, in Lenawee County.” Tofu can become an economical vegetarian alternative to ground beef.

The company began as the Tofu Collective, a Sundays only operation at Wildflour Community Bakery around the corner on North Fourth Avenue. A few months later, in the summer of 1977, the name was changed to The Soy Plant, and the collective moved into the basement of Eden Foods, where it attempted to produce tofu to sell wholesale. Fiering recalls that the early days were *really* hard. They used to work 14-16 hours a day. But the hard work paid off. By last spring The Soy Plant had the track record and credibility to be able to raise \$10,000 in loans to purchase more efficient equipment and move into larger quarters at its present location on Ann Street near Fourth.

For each \$100 loan, supporters were compensated with an unusual but sensible kind of interest: a pound of tofu each week, which yields a 35% annual return. Backers included both typical co-op supporters and quite a few native Asians eager to find a local source of fresh tofu.

Members of the collective now earn \$3.25 an hour—a

big increase over the \$50 a week that they were paid in the beginning. But that cheap labor was the capital that got the business started. Current members of the collective are Fiering, Sue Kalen, Dan Ecclestone, Anne Elder, Kurt Getman, George Hanley, Mike Mazzie, Jerry McKenna [sic, MacKinnon], and Ann Wilson.

The Soy Plant makes its tofu in 50-pound batches. Of the more than 2,000 lb of tofu it makes each week, about 350 lb are sold at The Soy Plant retail store, where soy milk, soy byproducts, and prepared soy foods like sandwich spreads, missing egg salad, soysage, and pies are also sold. Another 1,700 lb/week of tofu goes to local restaurants, retail stores (incl. Meijer’s Thrifty Acres, Asian-, and natural food stores), and to Midwest Natural Foods, which distributes the tofu to as far away as Pennsylvania and West Virginia.

Soy Plant workers have strong political motivations. They believe that soy products can help to solve world food problems. Fiering, a decentralist, talks about his personal beliefs. An excellent introduction to tofu is the 15-cent pamphlet titled “What is tofu?” available at The Soy Plant. It contains ten popular recipes plus basic information. “For the truly committed, there’s the encyclopaedic *Book of Tofu: Food for Mankind* by William Shurtleff and Akiko Aoyagi.” Shurtleff “has been the tofu guru for America in the 1970s, and this book has inspired and instructed most of the country’s approximately fifty tofu shops operated by non-Asians.”

A sidebar titled “Take-out tofu treats” mentions the following made and sold at The Soy Plant: Tofu-tahini spread. Tempeh—which resembles Brie cheese in texture and flavor. Tofu tarts in several flavors: pecan cream, pumpkin cream, yam, mocha, and lemon.

Photos by Peter Yates show: (1) Anne Elder adding soy puree to boiling water in the cooking kettle to make a foamy brew that is eventually curded to become tofu. (2) Steve Fiering filling one-pound tofu retail packages (in a bathtub) with water from a hose before shipping. Address: Ann Arbor, Michigan.

1057. Quass, W. 1979. Use of spun soy protein in meat systems. *J. of the American Oil Chemists’ Society* 56(3):341-43. March. [11 ref]

• **Summary:** Contents: Abstract. Introduction. Spun protein analogue process. Fibrils as an ingredient-extender: Turkey rolls (table II), beef loaf, deviled crab, economics (table III). Address: Dawson, Minnesota.

1058. Tofu Shop (The). 1979. Traditional vegetarian cuisine (Ad). *Telluride Times*. March.

• **Summary:** Features a large illustration of a dragon and “Traditional vegetarian cuisine” as part of the company logo. States: “Menus from different nationalities every night. Whatever you’re in the mood for, we can probably help you out. Thurs. 3/15 [Thursday, March 15]. Tofu

Turkey, Vegetable stuffing, baked potatoes, fruit salad. Note: The Tofu Shop in Telluride is now selling “Tofu Turkey” commercially, with all the trimmings—even though it was out of season.

Fri. 3/16. Pizza, Minestrone soup, Tossed green salad.

Sat. 3/17. Ganmo (Mock Goose), Stir-fried vegetables, miso soup, etc.

“Dine in or phone ahead for takeout (728-9940). Open Mon.–Sat. 11 a.m. to 9:30 p.m. Closed Sundays.”

Note: Unfortunately the exact date and page of this ad are unknown, but it was shortly before March 15. Address: 116 N. Oak—on the Sheridan Mall—Telluride, Colorado.

1059. Silver, James. 1979. Re: Arrowhead Mills’ soy flakes. Letter to William Shurtleff at New-Age Foods Study Center, April 3—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** “Dear Bill—Thanks for your letter. I have enclosed what little information I have on soy flakes. This is not really a new product, since I can remember Arrowhead working on setting up the flaking machinery when I passed through Hereford in 1971. They have special flaking mills which include ceramic heating units to soften the beans. I think that these things were originally developed for flaking cereals and beans for cattle feed, but they certainly turn out a nice product for humans.

“Susie likes to use them for making soyburgers, since they are so much easier to work with than beans or grits.

“And, as reluctant as I am to refer you to someone else and thus demonstrate my ignorance, I would suggest that you write to Arrowhead. I have most often found them to be helpful and productive of information and test results. I have enclosed their address. You can tell them that I suggested that you write Besides, I am sure that they would love the publicity! Sincerely, James Silver.” Address: Erewon Los Angeles, Inc., P.O. Box 58064, 4770 District Boulevard, Vernon, California 90058. Phone: (213) 582-6114.

1060. Shurtleff, William. 1979. Notes on visit to Quong Hop & Co. tofu factory in South San Francisco. Lafayette, California: New-Age Foods Study Center. 1 p. Unpublished typescript. April 26.

• **Summary:** Quong Hop is the leading (and perhaps the only) manufacturer of fermented tofu in North America. We were allowed to study and photograph the process in detail, and all our questions were answered. The entire process is described, with illustrations, in *Tofu & Soymilk Production*, by Shurtleff & Aoyagi (1979) in the Chapter 16 titled “Fermented tofu” (p. 283-86). Taken that day, photos show: (1) A man standing next to rolling rack of skewered inoculated tofu cubes, which are about to be incubated. (2) Pouring brining liquor over mold-covered tofu cubes packed into empty glass jars. (3) A close-up view of the previous view showing labels of the two different types of fermented

tofu made by Quong Hop & Co.—Bean Cake (*Fu-Yu*) and Pepper Bean Cake (with hot chili flakes in the brining liquor). (4) A sample of well-molded tofu cubes.

Also describes the process and equipment used by the company to make tofu. The soybeans are ground in a Rietz disintegrator. The whole system is run by a control panel from Japan. “You *must* have an in-house repairman for the control panel says owner Stanley Lee. From the slurry tank, the slurry is pumped into a two-chamber continuous cooker. The slurry fills the chambers and cooked slurry exits by overflowing. It works well. The cooked slurry is then pumped onto a vibrating screen and down into the Brown soymilk extractor. The soymilk from the screen is run directly into a huge steam-jacketed holding tank. The soymilk extracted by the Brown is run back into the slurry tank. Curding is done in barrels. Pneumatic pressers are used to press the curds into tofu. Vacuum packaging with a Multivac vacuum packager. Then pre-weighed labels are applied with a Hobart. But the labels are too small and unattractive; need two labels per package.

Tofu burgers: Run through three-patty former. Arrange on trays. Deep fry on screens in batch oil fryer. Slow. They have an oven for Savory Baked Tofu, which is pre-dipped in hot teriyaki sauce mixture. Address: Lafayette, California 94549. Phone: 283-3161.

1061. Duienga, Suzanne; Duienga, William. 1979. The Soy Plant. *Beansprout Flyer and Pocket Reader: Grand Rapids Food Co-op Newsletter* 2(3): April.

• **Summary:** “A current personal interest in soybeans combined with a concern about the high price of tofu at the coop led us to visit the Soy Plant in Ann Arbor. What we found was not a ‘plant’ or a factory at all, but a downhome group of people with a genuine interest in their work.

“Steve Fiering, the man who first envisioned the Soy Plant, stopped his work to show us around the shop and talk with us about his experiences and his soybean philosophy.

“When asked why Soy Plant tofu costs so much, Steve gave us some pretty impressive reasons. First of all the soybeans that the Plant uses are organic. Secondly, Steve values the people with whom he works and so wages (\$4.00 per hour) reflect this. Lastly and most importantly, the Soy Plant is the first of its kind in this area. As with all first, ‘We make mistakes and they cost money.’” Steve made much of the machinery in the shop himself.

“The Soy Plant already has a large line of delicious soy products (all personally sampled and ‘wholestomachally’ approved of), including soysage, tempeh, soymilk, brown bread, sweet white miso, spiced tofu, spreads, tofu pies, and okara peanut butter balls. Free samples of the delectable spreads are available on the counter.

“During the visit our basic curiosity evolved into true inspiration. The Plant is a living, breathing, organically growing example of how a cooperative group of people can

come together and make something happen. The place truly is a center of learning, staffed by people eager to share their newly found knowledge about the creating of this very old food.

“Do you often wonder what to make with this nutritious but strange stuff called tofu? Here are some delightful recipes:” The recipes, from *The Book of Tofu* by Shurtleff and Aoyagi, are for Tofu-nut butter spread or topping, and Banana-tofu milkshake. Address: Michigan.

1062. Winslow, Marj. 1979. Ancient and honorable tofu moves in as meat substitute. *Packer (The)*. April. Ideas in Marchandising Supplement.

• **Summary:** Inflation is causing shoppers to look for alternatives to meat—such as tofu. Murrae Haynes, marketing director of the New England Soy Dairy (Greenfield, Massachusetts), says that tofu retails in the New England area for \$0.79 to \$0.99 per pound. “The tofu market has shifted from the traditional health food store to the supermarket,” Haynes commented. “We (New England Soy Dairy) have gone into produce departments for the obvious connection between tofu and Oriental vegetables.” The company markets its product using in-store demonstrations and is preparing a series of recipe brochures. Two photos show tofu being made at the Soy Dairy.

1063. Flinders, Carol. 1979. Soybean key to world food plight? Notes from Laurel’s Kitchen. *Rocky Mountain News (Denver, Colorado)*. May 16. p. 24A.

• **Summary:** Twelve years ago (i.e., in late 1968) Carol spent a memorable week at the Tassajara Zen Mountain Center near Big Sur, California. “Among the many good people I met, one I’ve always remembered was Bill Shurtleff, who helped run the kitchen out of which was issued the well known Tassajara bread.

“Spare of words, lean and thoughtful, he had a kind of banked fire in his eyes that told you he was a man in search of a vocation. Last week Bill and his wife, Akiko, came to our home to visit and exchange ideas. It’s clear that he has found the vocation he’s been looking for, and that, in a sense, all of us stand to gain from the passion with which he’s answered it.

“The cause Bill has taken up is that of the more than one billion people of the world for whom hunger is *the* central fact of life. To be as continually mindful of their plight as he is would probably be unbearable if he didn’t believe he holds a significant key to relieving it. The key? ‘Glycine max’—soybeans to you and me.

“Western exploitation of the soybean has been absurdly slight until recent years. Mostly we’ve fattened our livestock with it. That soy is ‘king of beans’ we’ve long recognized.” But they have entered the American food supply well disguised in such forms as textured vegetable protein. “The soybean foods Bill is promoting are of a much more

sophisticated nature. Their names fall oddly on the Western ear:” tofu, shoyu, tempeh, miso.

Bill and Akiko met in Japan. She “was a fashion designer in Tokyo before they were married. The image of big city haute couture doesn’t attach easily to the simply dressed and unpretentious Akiko, and everything makes a little more sense when you find out the fashions she designed were actually for handicapped children.

“Akiko’s skill as a graphic artist and fine cook are the perfect complement to Bill’s, as writer and investigator. Her warmth and gentleness are the perfect balance to his single-minded intensity. (Akiko doesn’t just invite you for dinner. She seizes your arm as you’re walking along together, wraps it close in her own and holds on tight, convincing you life will be pure misery for them until you come to their house).

“Tofu was the soyfood that first captured Bill’s interest.” Discusses its virtues. “But what really wins him over, I think, is the sheer romance of tofu. What you know of tofu, and what I’ve told you about Bill, might make that seem unlikely. But read his book and see for yourself—beneath that samurai exterior beats the heart of a Shelley or a Keats. Listen:

“Like water that flows through the worlds, serving as it moves along, tofu joyfully surrenders itself to the endless play of transformation. Pierced with a skewer, it sizzles and broils above a bed of live coals... deep-fried in crackling oil, it emerges crisp and handsome in robes of golden brown, frozen all night in snow under vast mountain skies, it emerges glistening with frost and utterly changed. All as if it knew there was no death to die, no fixed or separate self to cling to, no other home than here.”

Contains a favorite Flinders’ recipe for tofu patties.

1064. Bulkeley, William M. 1979. The Americanization of bean curd: Tofu in tacos and burgers? *Washington Post*. May 24. p. E1, E11, E26.

• **Summary:** This article is reprinted from *The Wall Street Journal* April 12 (p. 1, 31).

An original cartoon (by Ray Driver for the Washington Post) shows a promoter in a top hat standing in the back of a covered wagon speaking to five contemporary Americans. On the side of the wagon is written: “The amazing bean curd. Tofu. Fry it. Bake it. Broil it. Grill it. Scramble it. High in protein. Low in cholesterol.” An illustrated hand is pointing to the term “bean curd.”

1065. **Product Name:** Health Valley Vegetarian Chili [Spicy, Mild, or Unsalted].

**Manufacturer’s Name:** Health Valley Natural Foods.

**Manufacturer’s Address:** 700 Union St., Montebello, CA 90640.

**Date of Introduction:** 1979 May.

**Ingredients:** Vegetable broth, organic pinto beans, tomatoes, onions, organic carrots, soy granules, olive oil, tomato paste, chili pepper, concentrated organic apple juice,

sea salt, bell peppers, unsulfured molasses, garlic powder, cumin, organic potato flakes, paprika, ground bay leaves, organic oregano, organic sage, organic thyme.

**Wt/Vol., Packaging, Price:** 15 oz (425 gm) can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 86-87. Ad: “New! From Health Valley. Vegetarian Chili. Ingredients include pinto beans, soy grits, and aged tamari soy sauce.

Ad in Bestways. 1979. Oct. p. 51.

Label obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white. Color photo of crock of chili surrounded by uncut vegetables. “Certified organic beans. Made the healthy way. Plenty of zesty robust flavor without any meat.” Distributed by Health Valley Foods, Inc., 16100 Foothill Blvd., Irwindale, California 91706-7811.

1066. Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. Index by product category. Index of manufacturers. Index of advertisers. Illust. 28 cm.

• **Summary:** On the cover are two kites (colored orange and red) flying in the sky. This catalog, largely printed by a computer, contains many ads on numbered pages. Contents: Policies and terms. Catalog information. Packaged. Books.

Refrigerated and frozen. Bulk. Literature and flyers. Indexes (3).

“One stop shopping... We are now a Full Line distributor.” List of new lines. List of new products within existing lines. Symbols and abbreviations.

Suppliers are listed alphabetically:

Arrowhead Mills, Balanced Brand [Balanced Foods, New Jersey], Bragg’s (Liquid Aminos), Dr. Bronner’s (with full page ad showing the doctor), Carmé (lecithin), Cedar Lakes, Cellu (Soy bean flour), Chico-San, A.A. Debole (Spaghetti sauce–soy conc), Dragon’s Milk (Arica), Elam’s (soy flour), El Molino, Ener-G–Jolly Joan, Erewhon (with “Erewhon West” full-page ad), Family Orchards (Tamari mixes, Trail mix), Fantastic Foods, Fantastic Falafel [Felafel], Fearn Soya Foods, Flavor Tree, Hain Pure Foods (“Cold pressed” vegetable oils, mayonnaise, nut butters), Hansen’s juices, Health Valley (incl. Vegetarian Chili), Hi-Energy Foods (food bars), Hoffman’s (protein powders, snack bars), Lact-Aid (p. 109, ad p. 118), Jack La Lanne, Lange’s, R.G. Lecithin, Lifestream (p. 113, 251, ads p. 249-50), Malt-O-Meal, Maya Grainburgers (p. 119, ad p. 126–mix with tofu), Midland Lecithin, Miso Cup, Modern Products (Gayelord Hauser), Mus-L-On (MLO), NF Factors, Niblack (“Tamari toasted sunflower seeds,” Tamari pumpkin seeds,” raw or toasted wheat germ, unprocessed miller’s bran), Old Stone Mill (soy), Orjene, Parkelp, Plus Produces (incl. Tiger’s Milk), Richter Bros., Soken, Sovex, Viobin, Waring (blender, juicer), Westbrae.

Books, Talking Foods, Meats (nitrate and nitrite free), Poultry (no hormones or antibiotics), Soy Products (Health Valley soy milk, tofu), Soy Plant Tofu (nigari, and tofu sausage, p. 259-60), Tumaros, Willow Run (Soybean spread [margarine]). Bulk–Beans, dry roasted soybeans, fruit & nut mixes (trail mix), nut butters, condiments, vegetable oils, pasta (with nomenclature), granola, teas & herbs. Literature & flyers. Indexes. Note: Many companies have a large selection of herbs. Address: 170 Aprill Dr., Ann Arbor, Michigan 48103. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

1067. Tofu Shop (The). 1979. Our favorite tofu recipes (Leaflet). Telluride, Colorado. 1 p. Spring. Single sided. 28 cm.

• **Summary:** Typewritten on letterhead. The four recipes

are: “Tofu Turkey with Mushroom Gravy (serves 12-16).” Tofuburgers. Spicy tofu and rice burritos. Creamy tofu salad dressing.

The Tofu turkey is especially innovative: Place 8 lb tofu (one large block if possible) in a large, shallow baking pan. Melt ½ lb soy margarine or butter in a small sauce pan, mix in herbs, and use this sauce to baste “turkey.” “Bake tofu for 2 hours at medium temperature, or until a golden crust forms all around. Baste regularly. Garnish with sprouts, parsley, and thin apple rings, and serve with mushroom gravy. For an extra treat, hollow out blocks of tofu and stuff with veggie and rice mixture prior to baking.”

Mushroom gravy: Add 3 tablespoons arrowroot and ½ cup whole wheat flour to 4 cups hot water, and cook 10 minutes. Sauté 2-4 cups sliced mushrooms and one small diced onion. Combine all ingredients and season to taste with shoyu [Japanese-style soy sauce], garlic, lemon, and cayenne (optional).

Letter (e-mail) from Matthew Schmit. 2009. March 28. Concerning the Tofu turkey recipe: “As technically simple as the recipe was, it was how the turkey idea started. Note the sentence at the end of the first paragraph describing ‘stuffing’ the tofu turkey. This is what I later started doing in Arcata with our tofu turkeys.” Matthew thinks this sheet of recipes was printed in the spring of 2009. Address: The Tofu Shop, 116 N. Oak St. (P.O. Box 69), Telluride, Colorado 81435.

1068. Shurtleff, William; Aoyagi, Akiko. 1979. *The book of tempeh: A super soyfood from Indonesia*. New York, NY: Harper & Row. 160 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [24 ref]

• **Summary:** Contents: Acknowledgments. What is tempeh? Preface. 1. Soybeans—Protein source of the future: Introduction, the causes of hunger and starvation—two analyses (*The Twenty-Ninth Day*, by Lester Brown—population, affluence; *Food First: Beyond the Myth of Scarcity*, by Lappé and Collins—population, narrow focus on increasing food productivity, international food exploitation, land monopolization and misuse, cash crop system of export agriculture). Ten reasons soy will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost protein. 3. High nutritional value. 4. Time tested. 5. Remarkably versatile. 6. Appropriate technology. 7. New dairylike products. 8. Hardy and adaptive. 9. Free nitrogen fertilizer. 10. Energy and resource efficient. “All of these ten factors work together synergistically, reinforcing one another, to give added weight to the prediction that soybeans will be a key protein source for the future on plant earth.” Present patterns of soy protein utilization. New developments. An idea whose time has come.

2. Tempeh as a food. 3. Getting started (incl. basic preparatory techniques and 18 recipes, incl. a recipe for sweet Indonesian soy sauce {*kechap manis*}). Favorite tempeh recipes (13 Western favorites, 6 non-fried favorites,

and 12 Indonesian favorites; also Suggestions for serving tempeh throughout the day). 4. Western-style and Oriental tempeh recipes (68 recipes). 5. Indonesian tempeh recipes (70 recipes). 6. Making tempeh at home or in a community. 7. Making tempeh starter. 8. The Indonesian tempeh shop. Map of Southeast Asia, including Indonesia. Map of Java, Madura, and Bali (p. 144). Appendix A: A brief history of tempeh East and West. Appendix B: Tempeh shops in the West. Weights, Measures, and Equivalents. Glossary. Bibliography. About the authors. About the New-Age Foods Study Center.

This book contains the first sizeable collection of American-style and Indonesian tempeh recipes (130 in all), the first illustrated descriptions of making tempeh, tempeh starter, and onchom on various scales in Indonesian tempeh shops, the first history of tempeh, detailed discussion of tempeh in Indonesian culture and of the many varieties of Indonesian tempeh, and the first recommendations for commercial names for the more than 30 types of tempeh that could easily be made in the West. It also contains chapters and reviews of the literature on tempeh nutrition and the microbiology and biochemistry of tempeh fermentation, plus the largest bibliography on tempeh to date (including many new Indonesian references), an annotated listing of 61 people and organizations around the world connected with tempeh, and the first list of tempeh companies in the West.

Page 26 states: “Modern soy-protein products, such as textured soy proteins, are increasingly available at supermarkets, often in forms that simulate the fibrous, chewy texture of meat.”

Note 1. This is the earliest known book in any language worldwide devoted entirely to tempeh. Note 2. This is the earliest English-language document seen (Aug. 2011) that contains the term “modern soy protein products;” Shurtleff would soon start to use it to refer to defatted soy flour or grits, soy protein concentrates, soy protein isolates, and textured soy protein products.

Illustrations (line drawings; unnumbered, not including “spots”). Indonesian dancer in sarong and crown. Balinese lion mask dancer. Two Indonesian women dancing. Cuts of fresh tempeh on a woven bamboo tray. Woman in a traditional Indonesian kitchen cooking tempeh. Terraced rice patties in Java. Woman selling tempeh in Bali market. Masked Indonesian figure. Soybeans in the pod. A hand holding dry soybeans over a sack of such soybeans. Three women selling beans and grains in a Javanese market. Two men selling tempeh in a Javanese market. Balinese mask. Indonesian mortar and pestle. Traditional oil skimmer for deep frying. A wok. Tamarind paste and pods. Soy sprouts. Pieces of tempeh on a bamboo tray Gado-gado. Laos root & chilies. Palm sugar. Chilies. Indonesian woman carrying fruits in a bowl on her head. Salam leaf. Botok tempeh. Peté beans. Winged and masked Balinese figure. Indonesian spices. Soybean (enlarged). Cartoon of a fuzzy little critter

driving his tiny tractor over a cake of tempeh, inoculating it with a secret enzyme (The Farm, Summertown, Tennessee). Placing tempeh into a homemade Styrofoam incubator. Cross section of good tempeh and bad. Winged beans. Close-up of outside of a homemade tempeh incubator. Dry soybeans in pods on plant. Woman in the USA making tempeh. A deep woven bamboo basket for treading soaked soybeans. Ten steps in the process for making traditional soy tempeh in a small shop (GIZI, Bogor). Twenty steps in the process for making and delivering traditional soy tempeh in a large shop (Oeben, Bandung). Two views of a modern dehuller and dehuller-separator. Five steps showing making tempeh in plastic bags. Three steps showing making tempeh in banana-leaf wrappers. Fourteen steps in the process for making and delivering Malang tempeh.

Map of Southeast Asia. Map of Java, Madura, and Bali (incl. West, Central and East Java). Indonesian stilt house (house on stilts, famous among the Dayak in Borneo, the Minangkabau and Batak of Sumatra, and the Toraja of Sulawesi). Woman selling leaf-wrapped tempeh in a Balinese market (color, rear cover).

Numbered figures (line drawings unless otherwise stated. The number before the decimal refers to the chapter number). 1.1 Table: The changing pattern of world grain trade (exporters and importers). 1.2 Graph: Projected population densities in various regions of the world. 1.3 Bar chart: Per capita protein consumption in rich and poor countries. 1.4 Bar chart: Per acre yields of usable protein from various food sources (pounds per acre). 1.5 Graph: Word soybean production (1965-1977). 1.6 Bar chart: Protein consumed vs. protein returned from milk, eggs, chicken, pork, beef. 1.7. Where the world's money goes (yearly global and U.S.).

2.1 Table: Percentage of protein in various foods. 2.2 Table: Composition of nutrients in 100 grams of tempeh of different types. 2.3 Table: Protein quality (NPU) of various foods. 2.4 Table: Amino acid composition of tempeh compared with the FAO/WHO reference pattern. 2.5 Bar chart: Limiting amino acids in rice and tempeh. 2.6 Table: Combining foods to increase protein. 2.7 Bar chart: Grams of dietary fiber in 100 grams of various foods. 2.8 Table: Fatty acids in soy tempeh. 2.9 Table: Vitamins and minerals in soy tempeh. 2.0 Table: Price of one day's supply of usable protein from various foods.

3.1 Bar chart: Comparison of nutrients in brown and white rice. 3.2 Shoyu (natural soy sauce) in four wooden keg, can, bottle, and small dispenser. 3.3 Grating a coconut. 3.4 Mortar & pestle (two types). 3.5 Cross section of a coconut in the husk. 3.6 Making coconut milk (7 steps). 3.7 Ladies in a Javanese market selling chilies (in mounds). 4.1 Deep-frying tempeh, with all utensils shown. 4.2 Shallow-frying tempeh. 4.3 Seasoned crisp tempeh with dip. 4.4 Tempeh shish kebab. 4.5 Coriander & garlic crisp tempeh. 4.6 Tempeh fondue. 4.7 Making tempeh-filled pot-stickers

or gyoza. 4.8 Tempeh pita bread sandwich. 4.9 Tempeh burger. 4.10 Tortilla with tempeh & guacamole. 4.11 Tempeh guacamole. 4.12 Tomatoes stuffed with tempeh.

5.1 Woman in an Indonesian village kitchen. 5.2 Woman grinding spices with a mortar. 5.3 Table: Indonesia's 7 most popular tempeh recipes, in descending order of popularity: Tempeh goreng, tempeh bachem, keripik tempeh, sayur lodeh, sambal goreng tempeh, terik tempeh, sambal goreng kering tempeh. Recipes for each are given. 5.4 Selling traditional banana-leaf wrapped tempeh in Yogyakarta, Java. 5.5 Deep-frying tempeh keripik in batter. 5.6 Deep-frying tempeh keripik in Javanese market. 5.7 Botok tempeh #1. 5.8 Botok tempeh #2. 5.9 Gadon tempeh. 5.10. Folding leaf wrappers for gadon tempeh. 5.11 Rolling leaf wrappers for pepes tempeh. 5.12. Pepes tempeh on broiler and packets ready to serve. 5.13 Folding leaf wrappers for Balinese pepesan. 5.15. Saté tempeh on broiler. 5.15 Saté vendor in Java. 5.16. Saté manis tempeh. 5.17 Tempeh sambal accompaniment for rice.

6.1 Flowchart for homemade soy tempeh. 6.2 Tempeh incubator (home-made). 6.3 Good soy tempeh (diagonally sliced). 6.4 Four types of homemade tempeh. 6.5 Wooden tempeh incubation tray designs. 6.6 Community tempeh incubator. 6.7 Graph: Tempeh incubation time versus temperature for soy tempeh (shows slow, moderate, and quick combinations).

7.1 Graph: Loss of tempeh starter potency when stored at various temperatures and humidities. 7.2 Sporulated tempeh for starter in bread pan. 7.3 Dry-strainer spore extraction. 7.4 Sporulated rice, pressure cooker, and Mason jar method of making tempeh starter. 7.5 Picking leaves from a hibiscus tree for tempeh starter. 7.6 Arranging inoculated soybeans on hibiscus leaves. 7.7 Covering hibiscus leaf sandwiches in trays. 7.8 Hibiscus leaves for tempeh starter ready to use. 7.9 Hibiscus inoculum leaves on round tray. 7.10 Drying inoculum leaves in sun on roof. 7.11 Tying inoculum leaves under rafters to dry.

1069. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. Professional hardcover edition. New York, NY: Harper & Row. 248 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [190 ref]

• **Summary:** A special cloth-bound professional edition of *The Book of Tempeh* prepared for libraries, commercial tempeh producers, microbiologists, students of Indonesian foods, and those who love fine books. In addition to the full

contents of the paperback edition, it contains the following lengthy appendixes: B: Tempeh in Indonesia (an overview of the tempeh industry and market, including the number of shops by province, per capita consumption, etc.). C: The Varieties of Tempeh. D: Soybean Production and Traditional Soyfoods in Indonesia. E: The Microbiology & Chemistry of Tempeh Fermentation. H. Onchom or Ontjom. A Glossary of Indonesian Foods (the most extensive one available in English). Bibliography on Tempeh containing over 190 entries: Works on the world food crisis, works on tempeh cookery or Indonesian cuisine, scientific journal articles on tempeh, early Dutch- and German-language works on tempeh, Indonesian-language works about tempeh, key English-language works on microbiology, film and color slides on tempeh. Illustration of an Indonesian dancer. Expanded Index. A great deal of original research is contained in the extra 88 pages and 54 illustrations.

Appendix C, “The varieties of tempeh, states: “The many varieties of tempeh may be grouped into five basic types, according to the primary ingredient used: legumes, grains & soy, grains, presscake residues, and nonlegume seeds. Legume tempheh: Soy tempheh (*témpé kedelé* or *kedelai*, made from the seeds of *Glycine max*). Velvet-bean tempheh (*tempe benguk* or *tempe koro benguk*, made from the seeds of *Mucuna pruriens*, which are called *kara benguk* in Indonesian). Winged-bean tempheh (*tempe kecipir*, made

from the seeds of *Psophocarpus tetragonolobus*). Leucaena tempheh (*tempe lamtoro* or *tempe mlandingan*, made from the seeds of *Leucena leucocephala*). Mung bean tempheh (*tempe kacang hijau*, made from the seeds of *Vigna radiata*, which are called *kacang hijau* in Indonesian). Broad-bean or fava-bean tempheh (*tempe kacang babi*, made from the seeds of *Vicia faba*, also called horse beans). Sesban-bean tempheh (*tempe turi*, made from the seeds of *Sesbania grandiflora*). Pigeon-pea tempheh (*tempe kacang iris*, made from the seeds of *Cajanus cajan*). Green-bean tempheh (*tempe kacang merah*, made from the seeds of *Phaseolus vulgaris*, which are called *kacang buncis* in Indonesian). Lima-bean tempheh (*tempe kara* or *tempe kara kratok*, made from the seeds of *Phaseolus lunatus*). Lablab-bean tempheh (*tempe kara-kara* or *tempe koro wedus*, made from the seeds of *Lablab purpureus*, which is called hyacinth bean in the USA). Jack-bean tempheh (*tempe kara bedong* or *tempe kara pedang*, made from the seeds of some strains of *Canavalia ensiformis*). Lupin tempheh (developed in Australia, made from the seeds of the narrow-leaved sweet lupin (*Lupinus angustifolius*) or the Andean lupin (*Lupinus mutabilis*)). Cowpea or black-eyed pea tempheh (developed in West Africa and Thailand, made from the seeds of *Vigna unguiculata*). Note: Chickpeas (garbanzo beans), baby limas, and great northern beans have also been used to make tempheh.

Grain & soy tempheh: Wheat & soy tempheh, barley & soy tempheh, rice & soy tempheh, bulgur & soy tempheh. Grain tempheh: Barley, rice, wheat, oats, and rye have been used with good results.

Presscake tempheh: Okara tempheh (called *tempe gembus* in Central and East Java where it is most popular, and called *oncom hitam* in West Java where it is not widely used). Peanut presscake tempheh (called black onchom (*oncom hitam*) in the Bogor region of West Java where it is most widely consumed, or white onchom (*oncom putih*) in the Tasikmalaya region, or “tempheh from peanut presscake” (*tempe bungkil kacang*) in East Java). Coconut presscake tempheh (*tempe bongkreng*, *tempe bungkil kelapa*, or *tempe kapuk*) comes in several varieties and can be can be poisonous if the pathogenic aerobic bacterium *Pseudomonas cocovenenans* grows on it and produces either yellow-colored toxoflavin or the more toxic colorless bongkreng acid. Peanut- & coconut-presscake tempheh (*tempe menjes*). Mung-bean-presscake tempheh (*oncom hitam* or *oncom ampas kacang hijau*). Soy- & peanut-presscake tempheh. Defatted soy-meal tempheh.

Seed tempheh (nonleguminous): Rubberseed tempheh (*tempe kaloko*) is made from the seeds of the rubber tree (*Hevea brasiliensis*). Okra tempheh. Sesame & soy tempheh. Tempheh extenders and adulterants: Okara, cassava, mung-bean presscake, soybean hulls, sweet potato, coconut- or peanut presscake, papaya. The stages of tempheh fermentation (underripe to overripe): Premature tempheh (*tempe koro*), mature tempheh, slightly overripe tempheh (*tempe semangit*

or *tempe lanas*), overripe tempeh (*tempe busuk* or *tempe bosok*), rotten tempeh. Tempeh wrappers.

Appendix D: “Soybean production and traditional soyfoods in Indonesia” discusses: Soybean production in Indonesia, traditional Indonesian soyfoods: Kecap (*kecap / ketjap, incl. kecap manis*), taucho (*tauco* or *taoco*), okara onchom, sereh (*sere*), taokoan or takoa, tofu (*tahu*). Other nonfermented soyfoods: Soy sprouts (*taugé kedele*), yuba (*bungah tahu*), soymilk, roasted soybeans (*dele sangan, kedele sangrai*), roasted soy grits or full-fat flour (*bubuk kedele*), fresh green soybeans (*kedelai rebus*).

Note: This is the earliest English-language document seen (March, 2009) uses the word “taucho” (spelled in that way) to refer to Indonesian-style miso.

Appendix E: “The microbiology and chemistry of tempeh fermentation” discusses: What are fungi?, general characteristics of *Rhizopus* molds, *Rhizopus* species used to make tempeh, pure cultures versus mixed cultures, preparing soybeans for fermentation, requirements for mold growth, general changes during tempeh fermentation, changes in nutrients and digestibility, the finished tempeh, the advantages and disadvantages of tempeh fermentation, suggestions for further research.

Appendix H: “Onchom or ontjom” discusses: Introduction. The varieties of onchom (*onchom merah* or *onchom beureum*): Peanut-presscake onchom, okara onchom, soy onchom, coconut-presscake onchom. Making peanut-presscake onchom in a commercial shop. Making okara onchom in a commercial shop. The microbiology of onchom. Laboratory studies of onchom. Aflatoxins. Works on onchom and *Neurospora*. People connected with onchom and *Neurospora*. Continued. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1070. **Product Name:** Soysage (Meatless Sausage Based on Cooked Soybeans).

**Manufacturer’s Name:** Joy of Soy.

**Manufacturer’s Address:** 510 Kasota Ave., Minneapolis, MN 55414.

**Date of Introduction:** 1979 July.

**Ingredients:** Filtered water, organic whole wheat flour, organic rolled barley, organic soybeans, tamari soy sauce (containing water, soybeans, wheat, seasalt), unrefined sesame oil, yeast, spices, granulated garlic, dried onion, vinegar, seasalt.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1981. 3 inch diameter. Self adhesive. Green on yellow. “A spicy vegetarian soyfood. Soysage is precooked. To serve, slice in sandwiches, scramble with eggs, or crumble over pizza.”

Jamie Stunkard. 1981. Soyfoods. Summer. p. 41. “Making Soysage.” The main soy ingredient in this soysage is cooked soybeans; it contains no okara.

1071. Leviton, Richard. 1979. The soy delicatessen. *Soycraft* (Greenfield, Massachusetts) 1(1):12-18. Summer.

• **Summary:** Describes The Tofu Shop (Rochester, New York), The Soy Plant (Ann Arbor, Michigan), The Cow of China (Boulder, Colorado), and The Tofu Shop (Telluride, Colorado).

Photos taken at The Tofu Shop in Rochester show: Greg Weaver at the counter serving a woman (cover photo). The inside of the restaurant, including two women seated at a wooden table and the large menu on the wall in the back. A woman employee cutting vegetables in the kitchen. Another woman working in the kitchen. A close-up of the wooden menu on the back wall (with prices; \* = organically grown), which offers: Deli: Tofu\*, tempeh\*, soy mayo, soysage, soy milk\*. Salads: Deviled tofu, tempeh, tossed. Dips (with tofu): Onion, dill. Hot sandwiches: Tofu burger, tofelafel, sloppy joe tempeh, tempeh Reuben, temptation! Cold sandwiches: Deviled tofu, tempeh salad. Casseroles: Tofu-spinach pie, tofu Italiano. Soups: Miso, soup of the day. Sampler plate. Special of the week: Ginger garlic sauce over tofu, rice and sauteed vegetables. Desserts: Lemon cream pie, tofu carob-mint pie, chocolate-mint pie, gingerbread, peanut butter cookies. Drinks: Soymilk, herb tea\*, vegetable juice\*, apple cider, Bambu (a roasted grain coffee), Banilla shake (with frozen bananas and soymilk), carobanana. The deli case at White Wave. The outside of The Cow of China.

Note 1. This is the earliest document seen (Feb. 2007) that mentions the use of frozen bananas to add thickness to a smoothie—a breakthrough idea.

“Matthew Schmit—proprietor of The Tofu Shop, in Telluride, Colorado, Juice Bar, Dining, Catering, Wholesale Kitchens, ‘producers and suppliers of specialty foods for the western slope—operates a soy-based restaurant that seats about thirty people and has waiters and waitresses. The Restaurant, which opened in October 1977, and had gross

sales last year of twenty thousand dollars, is open six days a week from 11:00 A.M. to 9:30 P.M. Matthew astonished me with the figure of one thousand dollars as the initial capital investment for this business, which now produces 250 pounds of tofu for weekly wholesale distribution in addition to the flourishing restaurant.

"The menu, which features a stunning photograph of Rocky Mountains rising out of a misty valley, and which they use as a promotional brochure, delineates the fare: Entrees (Stir-fried tofu, Rice & vegetables; Soy burgers, Tofu burgers, Okara burgers, Grilled tofu & vegetables in pita bread, Guacamole & tofu, Spicy tofu & rice filling with guacamole for burritos); Smoothies (Carob-honey soymilk with banana, Carrot sunny shake); Beverages (Miso broth, soymilk, [soy] whey); and Salads (Tofu & guacamole salad, okara salad, tofu & vegetable salad)." Matthew explains the okara salad and whey.

"Matthew and his associates regard the tofu and soyfoods as an entrance into an expanded food processing line for their local market, a move that will lessen their dependence on only one or two products. Believing that every community should have its own fresh tofu, Matthew adds that 'everyone develops their own business according to the nature of their community.'" During the holiday season, Matthew's community created an exotic recipe for "tofu turkey." "Chunks of tofu are seasoned and basted, often carved in the shape of turkeys, and baked for an entire day"—after which "they taste exactly like turkey." Address: Sunrise

Farm, 100 Heath Rd., Colrain, Massachusetts 01340.

1072. Schulz, Julie. 1979. Small is beautiful for tofu, too. *Well Being* No. 44. p. 45. July.

• **Summary:** "Mia Posner and Harry MacCormack are partners—both in marriage and in business—and they 'work like dogs.' The business is Sunbow Farm, a corporation dedicated to providing alternative, low cost protein to the Corvallis, Oregon community in the form of tofu, soy sausage [made from okara], and soy burger."

Describes make tofu at Sunbow Farm using a wood stove. They decided to begin a tofu business last July, in part because the only tofu producer in Corvallis, the Welcome Home Bakery and Tofu Shop, had recently closed. Sunbow currently transforms 1,400 lb of soybeans a month into soy products, and makes 115 pounds of tofu daily.

Harry works some nights as a carpenter on the stage crew at Oregon State University. This moonlighting helps buy new equipment and supplement their income from the business. In addition to the tofu business, Harry and Mia run a 27-acre organic farm where they grow fruits, vegetables, and grains. They use whey (a by-product of tofu) and crop rotation to enrich the soil. A photo shows Harry pressing soymilk from the pulp; Mia is about to add nigari.

1073. Shurtleff, William; Aoyagi, Akiko. 1979. Tofu & soymilk production: A craft and technical manual. Lafayette, California: New-Age Foods Study Center (Renamed

Soyfoods Center in Sept. 1980). 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. First published in Aug. 1977 as a rough photocopied manuscript with a yellow cover. [223 ref]

• **Summary:** Contents: Preface. 1. How to start a tofu shop or soy dairy. 2. Setting up shop; The community or village shop; The traditional caldron shop; The steam cooker plant; The pressure cooker plant; The soy dairy; The automatic steam cooker plant; The modern factory. 3. Ingredients. 4. Sanitation and safety. 5. Principles of tofu & soymilk production. 6. Tofu. 7. Firm tofu, pressed tofu & smoked tofu. 8. Foods made from tofu: Introduction, creamy tofu dressing, tofu chip dip, tofu mayonnaise, tofu cream cheese, cottage cheese, sour cream, tartare sauce, tofu eggless egg spread or missing egg salad, tofunafish spread or salad, tofu rice salad, tofu cheesecake (Sprucetree Baking Co. and White Wave), tofu pies, tofu creamies or tofu-coconut cream bars, tofu tarts, tofu turnovers, tofu puddings, fruit whips, custards and parfaits, tofu cinnamon rolls, tofu whipped cream, tofu icing and cream cakes, marinated tofu (fried or baked, p. 166), tofu jerky [sic, jerky] (p. 166), teriyaki tofu, tofu teriyaki, savory baked tofu, savory pressed tofu (with five spice powder, *wu-hsiang toufu-kan*), nori rolls with brown rice & tofu, tofu & brown rice burgers, tofu baby foods, tofu in ready-made sandwiches. 9. Using okara, whey, curds & hulls. Deep-fried tofu (cutlets, cubes, burgers,

treasure balls, burger balls, pouches, puffs). 11. Soymilk. 12. Dairylike products made from soymilk: Frozen soymilk desserts (soymilk ice cream, frozen soymilk yogurt, soymilk sherbets, soysicles, frozen soymilk custard, ice soymilk), fermented or cultured soymilks (soymilk yogurt, acidophilus soymilk, soymilk kefir, soymilk piima, soymilk buttermilk and other fermented milks), soymilk cheeses (unripened fresh, unripened soft {quark, queso blanco, panir, etc.}, ripened soymilk cheeses), soymilk mayonnaise, soy shakes and energy drinks, soymilk eggnog (soy nog), soymilk whipped cream, chip dips, puddings, custards. 13. Silken tofu & pressed silken tofu (Silken tofu is made from concentrated soymilk). 14. Lactone silken tofu (GDL). 15 Grilled tofu. 16. Fermented tofu. 17. Dried-frozen tofu. 18. Yuba. Appendix A: Resources. People & institutions connected with tofu & soymilk production. B: Weights, measures & equivalents. Bibliography. About the New-Age Foods Study Center.

See ¼-page ads in *East West Journal*. 1979. Dec. p. 4. 1980. Jan. p. 19.

Note 1. This is the earliest English-language book seen with the term “soymilk,” spelled as one word, in the title.

Note 2. This is the earliest document seen (Feb. 2002) that mentions tofu jerky or any kind of soy jerky.

Note 3. This is also the earliest English-language document seen (April 2013) that uses the word “quark,” or “queso blanco” in connection with soy cheese or tofu.

Note 4. This is the earliest English-language document seen (Sept. 2012) that contains the term “cultured soymilks” (or “cultured soymilk”).

Note 5. This is the earliest English-language document seen (Sept. 2012) that contains the term “ripened soymilk cheeses” (or “ripened soymilk cheese”).

Note 6. This is the 2nd earliest English-language document seen (April 2013) that uses the term “smoked tofu,” but the first that uses it in its modern sense.

Note 7. This book contains the most detailed and complete descriptions seen to date (Oct. 2012) of how to make tofu, soymilk, and yuba on a commercial scale.

Note 8. This book was first printed on 1 Aug. 1977 in a photocopied and rough-typed edition with a yellow and black cover.

Note 8. Reviews of this book appeared in many publications: (1) Richard Leviton. 1980. *Soycraft* (Massachusetts). 2(1):63-64. Winter. “An indispensable operating manual for soyfoods entrepreneurs... The illustrations alone make the book a valuable reference tool... a sustained inspiration. The only book of its kind in English.” (2) *Food Chain* (Intermediate Technology, England). 1997. No. 20. March. p. 6.

Note: As of Sept. 2014 this is the most widely cited publication by W. Shurtleff on Google Scholar, having been cited in 125 other articles and books. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1074. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. Professional hardcover edition (Continued). New York, NY: Harper & Row. 248 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [190 ref]

• **Summary:** Continued: Numbered figures (line drawings unless otherwise stated. The capital letter before the decimal refers to the appendix number). B.1 Table: Tempeh shops in Indonesia by province: Home-industry scale. B.2 Table: Relative frequency of tempeh consumption in Indonesia (by province). B.3 Carrying tempeh to market in Java using a shoulder pole and trays stacked on two baskets. B.4 Cost of one day's supply of protein in Indonesia.

C.1 Table: Edible grain legumes. C.2 Map: Distribution of legumes in southeast Asia. C.3 Winged bean, showing leaves, pods, flowers and beans. C.4 *Leucaena* leaves and pods (*peté china*). C.5 Reduction in bongkre toxicity from bongkre acid during fermentation (Ko 1977). Okra. Packets of tempeh, ready to sell, wrapped in leaves and tied. A large soybean, with hilum showing.

D.1 Table: Soybean production in Indonesia (1950-1976). D.2 Table: Major Indonesian food crops, D.3 Table: Indonesian soybean production and yields (by province). D.4 Map: Major soybean producing districts in Java (1976; most are in East Java, led by Jember and Pasuruan). Table: Daily per capita consumption of tempeh (by province, led by Central Java, then West Nusa Tenggara, Yogyakarta, and East Java). Table: Percent of dietary protein supplied by major food categories (led by cereal grains, then fish, nonlegume vegetables, and soy products). Table: Percentage of dietary protein supplied by soy products (by province, led by Central Java, then East Java, Yogyakarta, and West Java). D.5 Table: Statistics on production and consumption of basic Indonesian soyfoods (led by tempeh, then tofu, kechap, tauchou). D.6 Star anise. Grinding soybeans for tofu using traditional push-pull stone mills. Pouring soy curds into cloth-lined forming box. Javanese shadow puppet (*wayang kulit*).

Note. This is the earliest English-language document seen (April 2013) that uses the term "soy curds in connection with tofu. The curds, when pressed in the box, will become tofu.

Table: Classification of *Rhizopus oligosporus*. E.1 Two stages in the germination of a spore (after 1½ and 10 hours). E.2 Two successive views of hyphal tip growth at half-hour intervals.

E.3 *Rhizopus oligosporus* (Frazier 1957, showing sporangium, columella, apophysis, sporangiophores, stolon, sporangiospores, node, rhizoid). E.4 *Rhizopus stolonifer*. A. Columella and attached spores. B. Collapsed (invaginated) columella (Webster 1970).

E.5 Life cycle of *Rhizopus* (Raven and Everet 1976). E.6 Graph: Changes in tempeh oil and moisture content during fermentation (Sudarmadji 1977). E.7 Graph: Three phases

of tempeh fermentation (rapid, transition, and deterioration; Sudarmadji 1977). E.8 Graph: Changes occurring during tempeh fermentation (temperature, soluble solids, pH, soluble nitrogen, and reducing solids; Steinkraus et al. 1960). E.9 Graph: Yields of tempeh and of solids and different stages of the fermentation process (100 gm of whole dry soybeans yield 173 gm of tempeh on average; Steinkraus 1960; Murata 1967). E.10 Table: Loss of solids and protein during tempeh fermentation. E.11 Table: Percentage changes in composition of key essential amino acids during tempeh fermentation. E.12 Table: PER (protein efficiency ratio, a measure of protein quality for humans) changes during tempeh fermentation. E.13 Graph: Changes in concentration of three carbohydrates during tempeh fermentation (sucrose, stachyose, and raffinose, all decrease; Shallenberger et al. 1976). E.14 Table: Amount of B-complex vitamins in 100 gm of tempeh vs. 100 gm unfermented soybeans (all increase in tempeh except thiamine {vitamin B-1}). Changes in peroxide value and TBA value tempeh and soy flour during storage at 37°C (98.6°F; both rise rapidly in soybeans, but stay near zero and stable for tempeh; Watanabe et al. 1971).

H.1 Table: Foods known in Indonesia as "onchom" (made from peanuts or soybeans). H.2 Selling onchom in a Javanese market. H.3 Graph: Changes in soy onchom during fermentation (temperature, soluble solids, pH, soluble nitrogen, and reducing solids; Steinkraus et al. 1965). H.4 Flowchart for preparation of peanut presscake onchom. Unnumbered illustrations show 12 steps in the process of making onchom in a commercial shop in Indonesia. *Neurospora*: Budding conidia, conidiophore. H.5 Graph: Reduction in onchom aflatoxin during fermentation with *Neurospora* (Ko 1974). A thermometer, showing both Fahrenheit and Centigrade.

1075. Shurtleff, William; Aoyagi, Akiko. 1979. Using okara, whey, curds & hulls (Document part). In: W. Shurtleff and A. Aoyagi. 1979. *Tofu & Soymilk Production: A Craft and Technical Manual*. Lafayette, California: New-age Foods Study Center. 336 p. See p. 168-71. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm.

• **Summary:** This chapter begins: Okara (pronounced oh-KAR-uh), the insoluble residue from tofu or soymilk production (also known as soypulp or soy pulp) and whey are two byproducts of the tofu-making process.

Both can be put to a number of creative uses, which can serve as potential sources of income and utilize their nutrients. Curds can be sold at low prices for institutional use or as a ready-to-serve snack. Hulls can be ground to make soy bran.

Okara: Every pound of dry soybeans made into tofu or soymilk generates about 1.1 pounds or 2.5 cups (0.15 gallons) of well pressed, firmly packed okara, containing 76 to 80% moisture, 20 to 24% solids, and 3.5 to 4.0% protein. On a moisture free basis, this okara contains 23.6 to 24.0% protein, 8.1 to 15.2% fats, and 12.0 to 14.5% crude fiber. And it contains some 17% of the protein from the original soybeans. Not only is okara a rich source of dietary fiber, it contains higher quality protein (as measured by PER, protein efficiency ratio) than any other fraction in the tofu making process (Hackler et al., 1963, 1967), largely due to its high content of cystine, a limiting sulfur-containing amino acid. (Lysine is the first-limiting amino acid in okara.) To measure various PER values, soymilk was cold extracted and cooked at 100°C for 1 hour. The numbers in parentheses are PER values: milk casein (2.86), okara (2.71), dehulled soybeans (2.51), tofu (2.20; coagulated with glacial acetic acid), soymilk (2.11), soy whey (1.93).

In poorer countries, a majority of the okara is used as food. With the growing awareness of the importance of crude fiber in human diets, okara can be utilized in foods specially formulated with a high fiber content. Plain or with the addition of suitable flavorings, okara can easily be dehydrated on a drum dryer to make a dry staple; the Johnson Boiler Co. in Japan makes drum dryers specifically designed for drying and flaking okara. Dried okara might be able to be milled to produce a high-fiber soy flour, which could be used as is in breads or roasted like kinako. The first

three uses described below are nonfood.

**Livestock Fodder:** Most of the okara from Japanese and American tofu shops and soy dairies is fed to dairy cattle or hogs. Generally a local farmer picks it up from the shop daily in his truck and pays a small price for it (several cents a pound); in cities, some shops give it away or even have to pay farmers to truck it away. In China many makers of tofu, soymilk, or yuba run a hog farm adjacent to their shop and use the okara as a primary fodder source. Ruminants (cows, sheep, buffalo) can digest crude fiber (okara) and use it as a nutrient source. Monogastrics (chickens, hogs) cannot utilize nearly as much. While this way of using okara may be the most convenient, it is relatively wasteful of nutrients and brings only a low financial return.

**Organic Compost:** Added to a compost pile or turned directly into the soil, okara adds valuable nitrogen and organic nutrients, while helping to aerate and lighten heavy soils. Contact organic gardeners.

**Pet Food:** Okara makes a good addition to household or commercial dog or cat foods. In Japan some large factories sell much of their output to pet food manufacturers.

**Soysage:** This tasty sausage-like food, developed by The Farm in Tennessee, is now produced commercially at a number of U.S. tofu shops and soy dairies, and may be the simplest and best way to utilize okara. Packed with nutrition, it can easily be produced in large quantities.

White Wave in Boulder uses this recipe. Mix the following ingredients in a VCM-40 and blend well on low speed: 56 cups (15% gallons) okara, 21 cups each wheat germ and whole-wheat flour, 14 cups nutritional yeast, 10½ cups oil, 4 cups shoyu, 14 tablespoons each oregano, prepared mustard, and garlic, 9.3 tablespoons allspice, ½ cup salt, 6.7 tablespoons each fennel and sage, and 1 tablespoon cayenne, and a little diluted liquid smoke (hickory smoked water). (Some producers add enough soymilk to give the desired consistency.) Pack in specially made stainless steel tubes (each tube is 3 inches in diameter, 12 inches long, open at both ends, and capable of being opened and closed via a lengthwise overlap seam.) Seal both ends of tube with heavy aluminum foil. Fill a large pot with 2 to 3 inches of water, set a rack above the water, and stand the tubes upright on the rack. Steam cook at atmospheric pressure for 45 to 60 minutes, then allow to cool for easy removal. Open tube along side, slide out soysage, and cut it crosswise into 8-ounce disks, which are sold wrapped in plastic wrap. To serve, they are sliced into thin rounds and fried in oil on both sides until crisp and golden brown, then served like breakfast sausages (with scrambled tofu), used in sandwiches or pizza, or mashed and used like a vegetable pate.

Crystal Hills Tofu Shop makes several hundred pounds of soysage each week; it contains okara, whole wheat flour, wheat germ, nutritional yeast, oil, soy sauce, honey, herbs, and spices. Our favorite recipe is given in *The Book of Tofu* (Ballantine).

**Baked Goods:** Many tofu shops connected to bakeries use their okara like bran to add natural fiber and protein, and to give a crumbly texture to breads, muffins, brownies (usually made with carob), fudge, cookies (okara coconut macaroons or okara peanut butter cookies), okara & tofu gingerbread, or other baked goods. Try recipes for Wonderful Okara & Barley Flour Muffins, and for pancakes, waffles, leavened breads, and chapatias in *The Book of Tofu*. Okara might also work nicely in Japanese-style rice crackers (*senbei*). Okara contains 14.5% fiber on a dry weight basis versus only 4% for wheat bran; large amounts may cause intestinal distress in some individuals.

**Okara Tempeh:** One of the most delicious and creative ways we know of to use large amounts of okara is in the form of okara tempeh, a popular Indonesian fermented food that consists of okara (alone or mixed with soybeans) bound together into cakes or patties by a fragrant mycelium of *Rhizopus* mold. The spore starter is now available in North America and the fermentation takes only about 22 hours. The finished product, sliced and fried until crisp and golden brown, has a flavor described variously as reminiscent of “southern fried chicken,” “savory veal cutlets,” or “seafood fillets.” The concept of a tofu and tempeh shop operating together (as many do in Indonesia) is most interesting, and several tofu shops in North America are now preparing both okara and soy tempeh. For full details see our *Tempeh Production* (New-Age Foods Study Center) and *The Book of Tempeh* (Harper & Row).

**Okara Granola:** White Wave Soyfoods in Boulder, Colorado uses okara, cashews, sesame meal, safflower oil, salt, and maple syrup. For our favorite recipe, see *The Book of Tofu*. Someone should also develop an okara granola (candy) bar that is not too sweet.

**Okara Party Mix:** Develop your own using toasted okara, nuts, sunflower seeds, shredded coconut, raisins, etc.

**Soysage Pâté:** At White Wave, this pate is served in delicious sandwiches. Ingredients include: soysage, tofu, soymilk mayonnaise, mustard, celery, pickles, and sunflower seeds. It is served on onion-herb bread with alfalfa sprouts, tomato, and pickle. **Okara & Vegetable Saute:** A number of tofu shops in Hawaii and Japan use their okara to prepare this dish which is sold chilled through delicatessens or natural food stores. For our favorite recipe see *The Book of Tofu*.

**Okara Burgers:** Also called Okara & Grain Burgers these were developed by Swan Foods in Miami, Florida. Ingredients include organic brown rice, okara, carrots, onions, garlic, whole-wheat flour, corn oil, sesame seeds, rolled oats, and sea salt. Mix the okara in a VCM with dry-cooked rice (use 2 volumes water to 1 rice), plus diced onions and carrots, garlic powder, a little flour, and the remaining ingredients. Puree well, then put the mixture through a Hollymatic Burger Press; the patties, which are not as firm as burger patties, drop out on patty paper. Freeze

immediately or okara will sour. To serve, bake at 350°F for 40 minutes (or deep-fry); serve between buns or toast with trimmings. Better than soyburgers but not as good as tofu burgers. For our recipe, see *The Book of Tofu*.

**Okara Onchom:** Another popular Indonesian fermented food, onchom (also spelled ontjom) is a close relative of tempeh, made and served in the same way but using a different starter culture, *Neurospora*. The finished product has overtones of flavor reminiscent of walnuts or almonds. Starter cultures for commercial use are available in small quantities from Dr. H.L. Wang, USDA/NRRC, 1815 N. University St., Peoria, IL 61604. Preparation is described in *The Book of Tempeh*, Professional Edition.

**Other Food Uses:** Okara can be used in salads (with mayonnaise, sliced vegetables, and seasonings), in miso as a substitute for part of the whole soybeans, as a primary ingredient in dry breakfast cereals, or as a hamburger extender. Address: Lafayette, California.

1076. *Soycraft* (Greenfield, Massachusetts). 1979. “Tofu shops have sprung up like mushrooms all over North America.” A conversation with Bill Shurtleff. 1(1):58-59. Summer.

• **Summary:** “Among many of the people I know today, the beginning of a change in lifestyle and a new way of thinking about one’s own life, about one’s planet, is somehow inaugurated by a change in diet. Why should it be diet? Why shouldn’t it be clothing? I changed my way of eating and suddenly my way of looking at the world began to change. Gandhi is interesting in this sense. Gandhi set out to become an Englishman but at the height of his depression about becoming an Englishman in India, he suddenly changed his diet and that was the first step in the total transformation of himself as the person who went on to change the whole complexion of the world. The change seems to be healthy, a change towards a simpler lifestyle, a spiritual or religious attitude, a more compassionate stance. I feel diet is the very substance of our senses and brains and bodies and that by having a healthy body and clear mind, we really begin to see everything in a more sane, more real, light. I never would have believed that until I had actually experienced it for myself, having grown up on a standard American diet.

“When I went to Japan, I went as a poor student and I discovered tofu shortly after arriving there. I felt it was a delicious food. I knew it was nutritious and considered that anything that played such an important role in my diet would be of great importance, great potential interest, to the majority of people on this planet who were even poorer than I was. I felt I wanted to share what I thought was a discovery and I would share that by writing a small book, and that book, which I imagined would take six months to write, ended up taking over five years.

“How do I approach people reluctant to try tofu? I guess I approach it in a pragmatic way. I just like to serve people

our favorite recipes and most people try them, like them. They say, 'That's great! What is it?' and I say, 'Oh, its made from tofu, a staple food made from soybeans.' 'Oh, that's interesting. I've never tasted that before.' It's the same way Italian entrepreneurs introduced people to pizza. They didn't introduce them philosophically or nutritionally; people just like pizza and pizza caught on. I'm enough of a pragmatist to know that's the best way to introduce people to soyfoods in America—to introduce foods they like, and, after that, to explain to them, for instance, to those watching their weight, that soyfoods are low in calories, or to those watching their cholesterol, that all soyfoods contain no cholesterol, and to those watching their pocketbooks, that all soyfoods are relatively inexpensive. Actually, I don't ever like to convince people at all because I think the foods speak for themselves, the same way pizza does. What we're seeing now is that all over America, tofu shops last year experienced a growth rate of about twenty-five percent, which is very healthy for an industry; and that just indicates that people are discovering these foods and enjoying them.

"In the U.S. a lot of people are discovering for the first time how they can make the different soyfoods part of their daily American diets, and I want to underline the word 'American.' Today we went out to lunch and we had tofu burgers and eggless egg salad, both made from tofu and invented by the guy who runs a little restaurant here in Greenfield. People are finding ways of using soy products to make foods just like what they're used to using, except that they are free of cholesterol, low in cost, high in protein. And people somehow get an experimental sense as they tune in with tofu and that's a key part of the enjoyable thing that's happening—people have a sense of developing things themselves.

"The success continues to surprise me. We had hoped our ideas would catch on in the West, but we never imagined they would take root as quickly as they have. I think the times were ripe for this type of effort and there were many people who shared the same consciousness that I did about food; they were ready and saw the relationship between diet and world hunger, diet and health, diet and the need for simpler, lower-cost lifestyles, and all those ideas fit in beautifully with soyfoods. So, in fact, tofu shops have sprung up like mushrooms all over North America. People connect with this personally, they're taking the message to heart, going beyond what we have done. We find ourselves once again in the position of being students, learning from the people who maybe have gained some of their original inspiration from us and done a great deal of researching on their own.

"There is a very definite relationship between the way people eat and hunger on planet earth. In the U.S. today, fifty percent of the farmland is used to grow food for animals. In a world in which fifteen million people die each year of starvation, a country that has the capacity to produce food

the way we do, is using fifty percent of its land to grow food for animals. The crops being used are corn, soybeans, oats, and wheat, in that order. This pattern of food misuse is a pattern that was pioneered in America and today America is still the world's leading developer of this wonderful way of turning abundance into scarcity.

"When did it start? Basically, it started during the 1950's when American farmers had huge surpluses of basic agricultural crops. People began to ask, what can we do with these surpluses that will convert them from a problem into an asset? and they developed what is called the *feedlot system*. This means you take cattle off the rocky hillsides and hill tops—places where crops couldn't be grown yet cattle made good use of the land by converting grass into food—and put them into huge feedlots, or corrals. You begin taking all the extra soybeans, corn oats, and wheat and feeding them to the livestock. But in this process, it takes eight pounds of grain protein to produce one pound of livestock protein; basically, you're converting grain protein at only twelve percent efficiency, or at an eighty-eight percent loss. The most inefficient of all processes is raising the feedlot steer, the prime candidate of the American Steak Religion. In order to produce one pound of feedlot steer protein, you have to feed the animal fifteen to twenty pounds of grain. That means ninety-five percent of the earth's bounty is being wasted.

"The point is that in a world where hunger is becoming more and more a grim reality in the lives of many people, we have to return to the traditional pattern of eating directly the food Mother Nature provides us with. The problem is not that the earth is unable to provide humans with enough food. The problem is that humans have developed a system that makes gross misuse of the food and one of the best examples in the U.S. is the misuse of the soybean. We have never really learned all the wonderful things you can do with soybeans and, in a sense, I felt like I was discovering this first hand when I went to Japan. Other people have felt the same thing and all of us are working to introduce these soyfoods to Americans. In using soybeans directly as food rather than running them through animals, we simply liberate ninety-five percent more food."

1077. *Soycraft (Greenfield, Massachusetts)*. 1979. Successful soyfoods booth at Detroit Symposium. 1(1):6. Summer.

• **Summary:** The Soy Plant of Ann Arbor, Michigan, dispensed a lavish array of soyfoods at the Detroit Symposium on Humanity, held at the University of Detroit, from March 30 to April 1. The Soy Plant's theme was "Soybeans Can Feed the World."

The Soy Plant prepared tahini-tofu spread sandwiches, missing-egg salad sandwiches, and Sloppy Barney's (half soysage and half tofu) served in pita bread with sprouts. They also had four flavors of tofu pies (banana, strawberry, peanut, and cheesecake), and peanut butter balls (made with okara, sweet white miso, and tofu). According to

Dan Ecclestone, who helped man the Soy Plant booth, the purpose was to demonstrate the wide flexibility of tofu. “It was fantastic, the acceptance was very good. We were surely the most talked about booth at the exhibition.” In total, they sold 450 sandwiches and 200 tofu pies.

1078. *Soycraft (Greenfield, Massachusetts)*. 1979. Soyfoods at San Francisco’s New Earth Exposition. 1(1):4. Summer.  
 • **Summary:** The Soycrafters Association of North America was offered the free use of a booth at the New Earth Exposition in San Francisco from March 15-18. The booth was manned by Bill Shurtleff, Akiko Aoyagi, Larry Needleman, and friends from Quong Hop Tofu Company. Over 50,000 people attended the exposition and an estimated 12,000 visitors stopped by the booth and tasted free samples of Creamy Tofu Dip and slices of Tofu Burgers and Teriyaki Tofu, all prepared by Quong Hop. Over 6,000 “What is Tofu?” pamphlets were given away and Bill Shurtleff gave two one-hour slide presentations about soyfoods, protein, and world hunger on the main Exposition stage to an audience of 400. Down the aisle, the Gilman Street Gourmet had a large booth where over 3,000 tofu burgers were sold while The Farm [Farm Foods] sold delectable soymilk ice cream (Soy Ice Bean), tofu salad [like an eggless egg salad], and tofu cheesecake.”

1079. **Product Name:** Marinated Tofu Cutlets.

**Manufacturer’s Name:** White Wave.

**Manufacturer’s Address:** 3869 Walnut St., Boulder, CO 80301.

**Date of Introduction:** 1979 July.

**Ingredients:** Firm tofu. Marinade: Shoyu, water, granulated onion, granulated garlic, dark (toasted) sesame oil, powdered ginger, cayenne.

**How Stored:** Refrigerated.

**New Product–Documentation:** Recipe for this non-fried product is given by Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 166.

1080. Redrupp, Jackie. 1979. ‘We must return to getting protein from the earth.’ *Democrat and Chronicle (Rochester, New York)*. Aug. 4. p. 12C. [2 ref]

• **Summary:** About the work of William Shurtleff and Akiko Aoyagi with tempeh. A photo shows Akiko standing by a skillet with a freshly-made tempeh burger. The Shurtleffs are on the East Coast to attend the second annual Soycrafters of North America Conference at Hampshire College, Amherst, Massachusetts; it was attended by about 230 people. Greg Weaver, a partner in The Tofu Shop, 686 Monroe Avenue, the soy delicatessen of the Northern Soy Tofu Company of Rochester, attended the conference and invited Shurtleff to Rochester to sample the deli’s selection of soyfoods and to share ideas about the production and marketing of tempeh. Contains 3 favorite recipes from *The Book of Tempeh*.

• **Summary:** This article is almost identical to one by the same writer titled “Soybean key to world food plight? Notes from Laurel’s Kitchen” published in *Rocky Mountain News* (Denver, Colorado) on May 16 (p. 24A).

1082. *Lowry Airman (Denver, Colorado)*. 1979. Soyburgers pass (mostly) ‘gourmet’ test. Aug. 31. \*

• **Summary:** Note: Lowry Airforce Base is located near Denver, Colorado.

1083. Simonds, Nina. 1979. Chinese cuisine: Soybeans. *Gourmet* 39:28-29, 74-77. Aug.

• **Summary:** After a brief history of soya in China, gives recipes for: Fried soybeans [soynuts]. Sweet soybean milk. Stir-fried soybean sprouts red-in-snow (incl. how to sprout soybeans). Braised soybeans and meatballs. Sparerib and soybean sprout soup. Stuffed wheat gluten balls with soybean sprouts (*Mien Chin Jou Yüan*). Braised bean sticks [*fu tsu*; dried yuba sticks] with black mushrooms. Buddha’s delight (*Lo Han Su Ts’ai*). Stuffed bean curd rolls. Sweet-and-sour fish in bean milk skin [yuba]. Bean milk skin (*fu p’i*) and eggplant rolls.

1084. Harris, Michael. 1979. Tofu: A North Country kitchen produces about a ton of this protein-rich soybean curd every week. *New Hampshire Times (Concord, NH)* 9(14):22-23. Sept. 19. [1 ref]

• **Summary:** Crystal Hills Tofu Shop, a small but thriving operation in the tiny northern town of Bethlehem, New Hampshire, converts certified organically grown soybeans from Minnesota into about 1 ton of tofu every week. The founding partners, Pat and Jay Gibbons, both of Bethlehem, are “two energetic, forward-looking and unusual people who nurture a vision of tofu-based diets in a world of plenty for all.” She was formerly a New York City schoolteacher and he a London researcher for Amnesty International. Even before they met, both were vegetarians on the path of New-Age consciousness. In 1974 they moved to The Farm in Tennessee and there learned about soy crafting for the first time. After leaving The Farm, they moved to Bethlehem and started by making tofu at home. Then two years ago (1977) they decided to start a commercial tofu shop. The biggest impetus to the growth of the tofu industry was publication of *The Book of Tofu*, which not only tells what tofu is and how to make it, but also provides technical instructions for starting and operating your own soy dairy. Today Crystal Hills has two full-time and two part-time employees in addition to Pat and Jay. The process for making tofu at Crystal Hills is described in detail. The company also makes

Soysage. Pat and Jay plan to open a soy deli in Bethlehem next year. All tofu sales are in bulk, shipped in plastic buckets to retail outlets. Photos show Jay and Pat, with their equipment (all made in New Hampshire) and two workers. Recipes are given for Breaded tofu sticks, French dressing, Bulgur casserole, Tofu-vegetable pie.

1085. *Lehigh Times News (Pennsylvania)*. 1979. Soyburgers are here. Sept. 24. \*

1086. **Product Name:** Soysage Rolls (Meatless Sausage Rolls).

**Manufacturer's Name:** Cheryl Grimshaw Soyfoods.

**Manufacturer's Address:** Yandina, QLD, Australia.

**Date of Introduction:** 1979 September.

**New Product–Documentation:** Cain. 1981. Soyfoods. Summer. p. 43. "From Australia: Soysage Rolls Join the Take-Out menu."

1087. Esko, Wendy. 1979. Introducing macrobiotic cooking. Tokyo: Japan Publications. 144 p. Foreword by Aveline Kushi. Preface by Edward Esko (both written June 1978). Illust. by Bonnie Harris. Index. 26 cm. Reprinted in 2006 by Square One Publishers (Long Island, NY, 240 p.).

• **Summary:** The author was introduced to macrobiotics in upstate New York in about 1971. This is her first book on macrobiotics. It was originally published under the title of *An Introduction to Macrobiotic Cooking* by the East West Foundation, 17 Station Street, Brookline, Massachusetts 02146. Though copyrighted in 1978, the first edition appeared in Sept. 1979. The fourth printing was May 1981.

The chapter titled "Beans including tofu and natto" gives descriptions of and recipes for making: Japanese black beans (black soybeans, p. 54; "These beans are therapeutic for the sexual organs and will relieve an overly yang condition caused by too much animal food or fish.") Soybeans (p. 54. "These beans are the most yin of the bean family... It is recommended that soybeans be eaten only occasionally as a separate side dish. Because they are very yin, they should be cooked with yang vegetables such as lotus root or burdock, for balance. The best way to eat soybeans is in the form of *tofu*, *okara*, *natto*, *tempeh*, and, of course, miso and tamari.") Tofu, and Homemade tofu (curded with nigari, p. 54-55). Okara (p. 55-56). Tofu and corn. Tofu, onions and water cress. Dried tofu (dried-frozen, p. 57). Yuba (dried soy milk; how to make at home). Vegetables and dried soy milk (p. 57). Ganmodoki (Tofu and jinenjo patties, p. 57-58). Natto (description and how to make at home, p. 58-59).

Other soy-related recipes include: Tofu soup (p. 68). Miso soup (p. 69-70, basic, or quick). Watercress miso soup (p. 71). Daikon and sweet rice dumpling soup (with miso). Chinese cabbage and tofu miso soup (p. 71). Aveline Kushi's miso stuffed lotus root (p. 86). Tofu dressing (p. 91). Miso-tahini spread (p. 92). Miso-sesame spread (p. 92). Miso-

lemon sauce (p. 93). Tofu dip (p. 93). Miso with scallions (p. 95). Tamari (description, p. 95). Tekka (made with Hatcho miso, p. 96). Miso pickles (p. 100-01). Tamari pickles (p. 101). Tofu plaster (p. 130). Ume-Sho-Kuzu drink (with umeboshi, tamari and kuzu, p. 131). Ume-sho-bancha (with tamari, p. 131). Use of tamari, miso, and tekka (p. 132).

Also includes instructions for making amasake at home (p. 116; it is a natural sweetener made from fermented sweet rice), and a recipe for Amasake bread (p. 107), instructions for making seitan at home (p. 46-47, using 3½ lb of hard spring or hard winter whole wheat flour; spring wheat flour produces a much softer texture of seitan than the winter variety), and recipes for seitan stew, seitan-barley soup, sauteed vegetables and seitan, stuffed cabbage with seitan, and seitan croquettes (p. 47-49), plus recipes for leftover seitan (p. 125). Address: East West Foundation, near Boston/Cambridge, Massachusetts.

1088. Cadwallader, Sharon. 1979. Soy bean curd has many uses. *Capital Journal (Salem, Oregon)*. Oct. 3. p. 11F.

• **Summary:** This introduction to tofu begins: "By now many readers have heard of tofu, the curd or cheese made from soy beans. It is usually sold in sealed plastic boxes and found in the cold produce section of the supermarket or sometimes it is in the dairy section." Contains recipes for: Tofuburgers. Tofu & spinach stuffed manicotti. Spicy skillet bake.

1089. *Greenville News (South Carolina)*. 1979. Protein-packed tofu popular meat substitute. Oct. 4. \*

1090. *Daily Argus (Mount Vernon, New York)*. 1979. Protein rich tofu gains popularity as meat substitute. Oct. 10. \*

1091. *Tarrytown News (New York)*. 1979. Protein rich tofu gains in popularity as meat substitute. Oct. 10. \*

1092. Frank, Phil. 1979. Travels with Farley: Bean curd? (Cartoon). *San Francisco Chronicle*. Oct. 20. p. 48.

• **Summary:** A family is sitting around the dinner table. A man looks down at his plate with a puzzled look on his face and asks "Bean curd?" The woman sitting next to him replies "Tofu! It's very good for you. It gives you as much protein as the meat you're used to eating." A second man is tasting it with a dubious look on his face. The child at this table of 4 says enthusiastically, "Make it look like meat, Mom." The second frame shows only the first man and the woman. To the horror-stricken man who is still staring at his plate, the woman says heartily, "I can shape it to look like a drumstick or a hamburger patty if that'd help. Tofu can be molded into any shape..." The last frame shows all 4 people, the first man now angry, the second bewildered, and the child smiling as the woman gleefully states, "Starchild taught me that."

Note: This is the earliest cartoon seen (Oct. 2001) that mentions soy.

1093. Carlin, Margaret. 1979. Soy to the world! Tofu is cheap, nutritious and low in calories. *Albuquerque Tribune (New Mexico)*. Oct. 23. p. B-1. [1 ref]

• **Summary:** About Southwest Soy Foods. “Tofu has fed Orientals for thousands of years, and now Americans are learning to appreciate the bland white nutritious stuff.

“Tofu is bean curd, a custard-like cake made from curdled soybean milk. It is cheap, high in protein, low in calories and saturated fats and it has no cholesterol. Anybody trying to lose weight can enjoy tofu with a clear conscience.

“Tofu is practically tasteless so it blends well with other flavors. It is delicious fried, baked in souffles and casseroles, broiled, scrambled and made into burgers, tacos, enchiladas, tamales, lasagna and almost anyway you like.” Tofu mayonnaise is good tasting but low in calories.

“Tofu is showing up on vegetarian restaurant menus, health food store shelves and in Oriental shops and supermarkets as well.” Stephen and Kathryn Bennett Clarke own Southwest Soy Foods in Santa Fe, New Mexico. It started only 18 months ago but now makes more than 2,400 pounds/week of tofu. Their tofu is also sold in Albuquerque. “Mrs. Clarke wandered into the world of tofu because her daughter, Madena, 9, was allergic to milk.” She learned about soy milk and before long she was making her own tofu.

“She and her husband also were inspired by ‘The Book of Tofu,’ by William Shurtleff and Akiko Aoyagi (\$6.95), a book widely regarded as definitive. When it was published a few years ago, the book created an explosion of interest in tofu, and resulted in the opening of many tofu shops throughout the country, including the Clarke venture in Santa Fe.” “Tofu costs from \$1.09 to about \$1.20 a pound.”

Of course, if you make your own tofu at home it costs much less. “An Albuquerque engineer, Al Geduld, has designed a wooden tofu maker [tofu kit] which sells for \$20.”

Recipes from Kathryn Clarke include: Tofu mayonnaise. Missing egg salad. Ruthie’s tofu / seafood stir fry. Tofu protein pops. Photos show: (1) Overhead view of Stephen Clarke stirring soy milk before adding the curdling agent. (2) Stephen Clarke, Kathryn Clarke, and Thalia Plantian, standing behind a sink in which their tofu is cooling. Address: Tribune Accent Editor.

1094. *Loveland Reporter Herald (Colorado)*. 1979. What’s cooking? Onion tofu casserole and oatburgers. Oct. 23. \*

1095. Frank, Ellen Perley; Rubenstein, Judith. 1979. Tofu power: Protein for a small planet. *New Age Journal (Boston, Massachusetts)*. Oct. p. 52-53.

• **Summary:** About the New England Soy Dairy and tofu. “It may just turn out to be the most popular food of the ‘80s. You can fry it, freeze it, blend it, bake it. It can serve as the

basis of dishes ranging from cheesecake to fake burgers. In the past three years this lightweight white blob has jumped from the confines of Chinese restaurants to become a near-staple in many American homes.” Tofu is “blocks of intense protein made from soybean curds.”

Two years the co-founders of the Soy Dairy, Ira Leviton and his wife Kathy, were running a natural-foods bakery “when they read the tofu-eater’s bible, William Shurtleff and Akiko Aoyagi’s *The Book of Tofu* (Autumn Press, 1975) and got tofu fever. Five people banded together and built the tofu shop... Since *The Book of Tofu* was first published, fifty tofu shops have sprung up around the country.” Photos show: New England Soy Dairy owners Tom Timmins, Kathy Leviton, and Ira Leviton standing behind a large, round tank in which cakes of tofu are soaking. Richard Leviton pressing tofu. A worker removing the cloths from large sheets of pressed tofu. Address: 1. Writer for New Age; 2. An ace tofu chef.

1096. **Product Name:** Henley Vegetable Goulash, Vegetable Curry, Vegetable Chili, Vegetable Casserole (All natural soy protein meals).

**Manufacturer’s Name:** Lanzi Candy Co. (Importer).

**Manufacturer’s Address:** 2452 N. Sheffield, Chicago, IL 60614.

**Date of Introduction:** 1979 October.

**New Product–Documentation:** Ad (½ page, brown, black, and white) in *Vegetarian Times*. 1979. Sept/Oct. p. 51. “Nothing inside... Just four great tasting international vegetarian dishes.”

Letter from Arlen S. Gould, president, Lanzi Candy Co. 1982. July. They are no longer stocking the Henley line due to poor sales.

1097. Universal Press Syndicate. 1979. Cathy (Cartoon). *Unknown newspaper*. Nov. 19.

• **Summary:** This 4-part cartoon begins with a mother and daughter standing by the kitchen refrigerator. Daughter: “It’s 3 days before Thanksgiving, mom. Why is your refrigerator full of bean curd?” Mom: “Oh, didn’t I tell you? I’ve become an Earth Mother.

“My consciousness-raising group has decided to celebrate our pioneer spirits with an all-natural feast this year.

“We feel that a self-basting turkey in a self-basting oven is simply no longer an expression of the real me.”

Daughter: “Is bean curd an expression of the real you?” Mom: “Please sweetie... You’re wadding up our main course” (as the daughter crushes a blob of tofu in her left hand).

1098. Donovan, Sharon. 1979. Hamburger fans use something other than meat between buns. *Houston Chronicle (Texas)*. Nov. 22. Section 4. p. 17. \*

• **Summary:** Some hamburger chain restaurants are testing vegetarian burgers and salad bars as additions to their menus.

1099. **Product Name:** Soysage. Briefly renamed Soy Loaf in the early 1980s.

**Manufacturer's Name:** Northern Soy.

**Manufacturer's Address:** 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213.

**Date of Introduction:** 1979 November.

**Ingredients:** Incl. okara.

**New Product–Documentation:** Talk with Andy Schecter of Northern Soy. 1991. Feb. 5. This product was launched as Soysage in Nov. 1979 at 30 Somerton St. For a short time in the early 1980s the name was changed to Soy Loaf, then the company “decided to stop bucking the tide, and changed the name back to Soysage. The product was discontinued about 2 years ago, then re-introduced in 1990.”

1100. Worthington Foods, Inc. Div. of Miles Laboratories, Inc. 1979. Product catalog: Introducing the finest in vegetable protein foods. Worthington, Ohio. 8 panels. 24 cm.

• **Summary:** A brief description of each vegetarian product is given and one color photo shows all the packages and labels. The products are grouped as follows: Canned (20 products): Veja-Links, Non-Meat Balls, Sliced “Beef” Style, FriChik, Sliced “Chicken” Style, Diced “Chicken” Style, Worthington 209, Vegetable Steaks, Choplets, Cutlets, Veja-Bits, Super-Links, Chili, Saucettes, Vegetarian Burger, Vegetable Skallops, Protose, Numete, Prime Stakes, Sandwich Spread.

Dry (3 products): GranBurger, Soyamel (Regular, fortified, or lowfat), Kaffree Tea (Original, Mint, or Spicy Orange).

Frozen (20 products): Meatless “Chicken” Style, Chic-Ketts, “Chicken” Style Pie, “Beef” Style Pie, Tuno Pie, Wham, Stakelets, FriPats, Fillets, Tuno, Meatless Salami, Corned “Beef” Style, Smoked “Beef” Style, Smoked “Turkey” Style, Prosage, Vegetarian Egg Rolls, Stripples, Meatless “Beef” Style, Bolono, Croquettes. Address: Div. of Miles Laboratories, Inc., Worthington, Ohio 43085.

1101. *SoyaScan Notes*. 1979. Chronology of soybeans, soyfoods and natural foods in the United States 1979 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. Yvonne and Irene Lo incorporate The Soya Bean Products Co., N.A. in San Francisco as a marketing company and immediately begin to import and distribute Vitasoy, the world’s most popular soymilk, to Canada from their parent company in Hong Kong. It is not yet sold in America due to an FDA ban on aseptic Tetra Pak cartons.

Jan. Soycrafters Association of North America headquarters moves to Colrain, Massachusetts. Richard Leviton takes over as Director. Decides to edit and publish *Soycraft* magazine.

Jan. “The Soyfoods Revolution” published as a cover story by *Whole Foods* magazine.

Jan. 15-18. Second International Workshop on Low-Cost Extrusion Cookers held in Dar es Salaam, Tanzania, with 43 participants.

Feb. Takai catalog of large scale equipment published.

Feb. 9. Judith Rubenstein, institutional consultant for the New England Soy dairy, initiates a correspondence with Carol Tucker Foreman, Director of Child Nutrition programs at USDA, on the subjects of tofu standards and acceptance of tofu in USDA Child Nutrition Programs, including the school lunch program. Four letters are exchanged between Feb. and Aug. 1979. This is the start of work of tofu standards and tofu in school lunch programs.

Feb. *Natural Foods Merchandiser* magazine starts publication, founded by Doug and Karen Greene.

March 11. KOPTI is founded in Indonesia. It soon functions as an active, effective trade association for Indonesian tempeh and tofu manufacturers. By June 1986 it has more than 12,000 members from 40 cooperatives, and is promoting mechanization of production.

March. Soycrafters Assoc. and Quong Hop & Co. have adjoining booths at the New Earth Expo in San Francisco. 6,000 people sample free tofu burgers, tofu chip dips. Farm Foods sells Ice Bean (soymilk ice cream) and tofu cheesecakes. Gilman Street Gourmet sells tofu burgers.

March. Oak Feed Miso Company founded by Sandy Pukel, John Belleme, and Barry Evans. Joe Carpenter, Michio Kushi, and James Kenny are also involved. It is soon renamed American Miso Co.

March 26-29. World Soybean Research Conference II held at North Carolina State University. The 897-page proceedings, edited by F.T. Corbin, are published in 1980.

March. Food Protein Council holds International Soybean Fair in Washington, D.C. Many Congressmen, consular officials, etc. attend and sample soy protein products and tofu dips.

March. The Ohio Miso Company, founded by Thom Leonard and Richard Kluding, begins production in Ohio. America’s first Caucasian-run miso company.

March. Richard Leviton takes a 3-week soyfoods research trip to the Midwest. Establishes many important contacts.

April. *New England Soy Dairy Product and Merchandising Guide* published.

April 12. “Good Old Bean Curd Is Suddenly Popular, But You Call It Tofu” by W.M. Bulkeley published as a front page article in *The Wall Street Journal*.

May 24. “The Americanization of Bean Curd,” an expansion of Bulkeley’s April article, published in the *Washington Post*.

May. Quong Hop & Co. in San Francisco introduces vacuum packed firm tofu, tofu cutlets, tofu burgers, and teriyaki tofu. Each of the latter three products is the earliest

known product of its type in America.

June. *The Tofu Cookbook* by Kathy Bauer and Juel Andersen published by Rodale Press.

June 29. An internal FDA memorandum is prepared by FDA headquarters personnel to set forth the agency's views on the attributes of tofu. Publication of a "pull date" on tofu packages is encouraged.

July. Farm Foods starts national advertising of tempeh starter and tempeh kits.

July. David Mintz, owner of Mintz's Buffet, a kosher Jewish deli in New York City, first learns of tofu from Pesach Lazaroff, a young Jewish vegetarian. That summer Lazaroff spends many hours working with Mintz as a paid consultant, developing kosher tofu recipes. Mintz later becomes rich and famous for developing Tofutti, a soy ice cream.

July. *The Book of Tempeh*, by Shurtleff and Aoyagi published by Harper & Row in both large-format paperback and professional hardcover editions. The world's first book about tempeh.

July. *Tofu & Soymilk Production*, by Shurtleff and Aoyagi published by The Soyfoods Center. This is the first book to use the term "soyfoods" in English.

July 17. "Tofu—The Oriental Way to High-Protein, Low-Calorie Meals" published by *Family Circle*.

July 23. Judith Rubenstein (see Feb. above) writes the Commissioner of the FDA requesting that the agency establish a standard of identity for tofu. She notes that the Director of Nutrition and Technical Services for USDA suggested that FDA give top priority to this issue. Issues of imitation tofu products and bacterial contamination are raised.

July 26-29. Second Soycrafters of North America Conference: "Producing and Marketing Soyfoods," held at Hampshire College, Amherst, Massachusetts, organized by Richard Leviton and financed on a shoestring. A major milestone for the U.S. soyfoods industry. 230 people attend and the content is a great success, but Leviton loses \$1,000 on the venture. The first issue of Soycraft magazine, written and published (1,900 copies) by Leviton, is distributed at the conference. In the keynote address, Shurtleff notes that the biggest challenges facing the industry are to build a strong trade association with adequate funding, and to develop soyfoods standards.

July. *Alimentacion Integral Para Una Vida Plena: Los Mil Usos de la Soya (Integral Nutrition for a Full Life: The Thousand Uses of Soya)*, by Blanca Dominguez published by Editorial Posada in Mexico. The country's first book on soyfoods.

Aug. Robert Rodale and Rodale Press gives strong support to *Soycraft* magazine, with ads and a nice mention in an article, which brings in 135 subscriptions in November.

Sept. The Soycrafters Apprenticeship Program is started by Luke Lukoskie at Island Spring, Vashon, Washington. Here people can spend about 3 weeks getting hands-on

experience in making tofu, soymilk, and tempeh.

Sept. Tempeh Works, America's first Caucasian-run commercial tempeh shop in a commercial building and making only tempeh, starts production in Greenfield, Massachusetts. Founded and run by Michael Cohen.

Sept. Many articles about the Amherst Soyfoods Conference published in national magazines, such as *New Age*.

Sept. New England Soy Dairy opens America's first in-house tofu & soymilk sanitation laboratory.

Sept. "Chinese Cuisine: Bean Curd" by Nina Simonds published in *Gourmet* magazine.

Nov. 26. A fire destroys Eden Foods warehouse and \$800,000 inventory. The company, struggling for life, moves to rural Clinton, Michigan.

Oct. The Great American Tofu Cookbook by Patricia McGruter published by Autumn Press.

Dec. Rodale Press contacts Richard Leviton to announce plans to do a Soybean Newsletter, with Leviton as editor. The idea later falls through.

Dec. *Frijol Soja* (Soybeans) published in Peru by INTSOY.

Dec. *The Soysage Cookbook*, by Cloud and Burdett self-published in Vermont.

\* San-J tamari starts to be imported to America from Japan.

\* California and Maine become the second and third states to enact organic labeling laws. California's becomes a model and a standard for many other similar laws, and it is cited on many soyfood product labels. By 1988 there are 12 states with organic laws, and 5 more planned.

\* Tofu production in Japan tops 1.1 million metric tons for the first time.

\* Soybean research in America begins to shift from emphasis on production to emphasis on utilization.

\* Syntex corporation of Palo Alto, California, recalls its soymilk Neo Mull Soy after it is found to be missing a key nutrient, chloride. Many children who used this product were mentally damaged.

\* Lauhoff Grain Corp. acquired by Bunge.

\* 1979-82. Years of the "salt craze." Growing concern with the level sodium in American food products begins to hurt sales of miso and shoyu. Continued.

1102. Soy Plant (The). 1979. Tofu gratuity (Leaflet). Ann Arbor, Michigan. 1 p. Undated. 11 x 9 cm.

• **Summary:** This tiny, hand-lettered "take one" reads: "Gift certificates may be purchased at a 10% discount through January 31st 1981. Visit our retail store, 211 E. Ann, Ann Arbor, Michigan. 663-0500." An illustration shows a wheel with spokes; on each spoke is written: Tempeh, soysage, tofu, soymilk, miso. Across the diameter: "Soy foods for body & planet." In large letters across the bottom: "The Soy Plant." Address: 211 East Ann St., Ann Arbor, Michigan.

Phone: (313) 663-0500.

1103. White Wave Soy and Natural Foods. 1979. Product price list: Winter. 3869 Walnut St., Boulder, CO 80301. 6 panels. Catalog. Dec.

• **Summary:** Soyfoods: Nigari tofu (bulk, packaged, doufu [extra firm Chinese style]). Salad dressings (mellow miso salad dressing, hearty miso salad dressing). Tempeh. Soysage. Tofu Mayo. Savory baked tofu. Polar bean (banana-carob soy ice cream).

The company also sells sesame products (raw tahini, roasted tahini, sesame butter, sesame salt), peanut butters (salted or unsalted; crunchy natural, creamy natural, Valencia {crunchy or creamy}), more nut and seed butters (roasted almond butter, raw cashew butter, roasted cashew butter, roasted sunflower butter), and tamaried nuts and seeds (tamaried almonds, tamaried cashews, tamaried Spanish peanuts, tamaried sunflower seeds, and tamaried nut mix [a blend of peanuts, sunflower seeds, cashews, and almonds]). Note: This is the earliest English-language document seen (April 2012) that uses the word “tamaried” to refer to nuts and seeds that have been seasoned with tamari soy sauce and then baked.

“White Wave was founded in 1977 upon the principle of supplying the Rocky Mountain region with high quality protein foods. As these foods are an extension of our own lifestyles, we offer only products we personally feel are wholesome and nutritious. It is our pleasure to guarantee the quality of all our products. All foods carrying a White Wave label are made solely by us. We thank you for supporting our business. The Folks at White Wave.” Address: White Wave, 3869 Walnut St., Boulder, Colorado. Phone: 303-443-3470.

1104. **Product Name:** Captain Organic Vital Burgers (Meatless Burgers).

**Manufacturer’s Name:** Captain Organic.

**Manufacturer’s Address:** P.O. Box 606, Hermosa Beach, California.

**Date of Introduction:** 1979.

**Ingredients:** Incl. tofu, lentils, rice.

**Wt/Vol., Packaging, Price:** Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. This frozen veggie-burger, introduced in 1979, was the first soy product he ever developed. It was on the market until 1983, made with tofu, lentils, and rice. Another similar product of his was made with garbanzos, zucchini, and millet; it contained no tofu. He made the products in his own plant, and bought the tofu from Mr. Yamauchi of Hinode Tofu Co. He mixed the ingredients, put them through a patty machine, and then froze them. They were not fried. On the package was a cartoon of Captain Organic. Andrew’s forte is sales and marketing; he has worked with distributors and

brokers in the natural foods industry for 12 years. In the early days he worked with a yogurt company named Natural and Kosher, then went to a distribution company named Nature’s Food Farms, then spent 4 years at a brokerage named MBA and Associates where he represented a lot of soy lines like Legume and Pizsoy. In 1988 he went to Westpico Foods, which is a kosher poultry and secondary frozen supermarket distributor and he got a lot of perishable natural foods into supermarkets in southern California. From there he started Heart and Soul because he was competing against Cedarlane and Soy Power, who had their brands. One he was a vicious competitor of Cedarlane; now he works very closely with them.

1105. **Product Name:** Granose Dinner Balls: Savoury Protein Balls in Sauce.

**Manufacturer’s Name:** Granose Foods Ltd. (Distributor). Made in Denmark by Nutana Helsekost.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1979.

**Ingredients:** Textured soya protein, wheat protein, soya oil, bread crumbs, oat flakes, egg white powder, vegetable margarine, wheat flour, maize starch, salt, yeast, hydrolysed vegetable protein, onion powder, herbs, celery powder, spices, monosodium glutamate.

**Wt/Vol., Packaging, Price:** 400 gm (14 oz) can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Manufacturer’s catalog.

1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. Label. 1980, undated. 9.5 by 4.25 inches. Full color, mainly beige, blue, and white. Photo shows balls in a casserole. “Ready to serve. Heat in a pan and serve with potatoes and other vegetables, or make into a casserole.” Labels in Danish, Dutch, and Finnish.

Form filled out and Label sent by Granose Foods Ltd. 1990. June 13. States that the product, made by Nutana, was introduced in 1979. Can Label. 1990. 9.5 by 4 inches. Photo of the prepared dish with many meatlike balls on a plate atop a bed of rice, surrounded by green beans, against a brown background. Ingredients: Water, gluten, textured soya protein, vegetable margarine, soya bean oil, oat meal, wheat flour, egg white powder, vegetable stock, modified starch, onion powder, celery powder, curry, marjoram, peanuts, rolled barley, sweet basil, sea salt. Serving suggestion: Granose Dinner Balls are ready to serve. Heat in a pan and serve with potatoes and other vegetables, or make into a casserole. Ideal for lunch and dinner. Send 9”x6” SAE for FREE recipe book.

**New Product–Documentation:** Manufacturer's catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. Label. 1980, undated. 9.5 by 4.25 inches. Full color, mainly beige, blue, and white. Photo shows 2 burgers or rissoles with peas and carrots. "Ready to serve. Granose frikaletts need only to be heated in their own sauce. Serve with potatoes and other vegetables for an easily prepared meal." Labels in Danish, Dutch, and Finnish.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Nutana, was introduced in 1979. It has been discontinued.

1107. **Product Name:** [Seitan Burger].

**Foreign Name:** Seitanburger.

**Manufacturer's Name:** Jonathan P.V.B.A.

**Manufacturer's Address:** Holleweg 113, 2180 Ekeren (near Antwerp), Belgium.

**Date of Introduction:** 1979.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Jos van

de Ponsele and Magda Verfaillie of Mycelia b.v.b.a. in Gent, Belgium, in response to an inquiry. 1992. July 6. This product was introduced in 1979 as a fresh product. Jonathan was located in a garage at Holleweg 53, 2180 Ekeren, Belgium.

Label sent by Jos van de Ponsele. 1988. 6.25 by 10.5 inches. Card stock. This card-stock sleeve fits over the product. Color photo of seitan with various vegetables with item name in white on orange. The product is now named "2 Seitanburgers in Tomato Sauce—in Tomatensosse." "Vegetable product."

1108. **Product Name:** Tofu Pudding [Carob, Sweet Potato, or Coconut], and Soysage.

**Manufacturer's Name:** Lecanto Tofu.

**Manufacturer's Address:** P.O. Box 444, Lecanto, FL 32661.

**Date of Introduction:** 1979.

**New Product–Documentation:** Talk with Marvel Huffman. 1988. May 17.

1109. **Product Name:** Loma Linda Linketts, Little Links, Big Franks (Meatless Hot Dogs).

**Manufacturer's Name:** Loma Linda Food Co.

**Manufacturer's Address:** 11503 Pierce Place, Arlington, California.

**Date of Introduction:** 1979.

**New Product–Documentation:** Recipe booklet. 1979. Big Franks now made with textured soy protein. Enhanced versions of these products with the same names were introduced in 1963, 1963, and 1966, respectively.

Note: This product was first introduced in 1953, but did

not contain textured soy protein at that time.

**1110. Product Name:** Loma Linda Sizzle Links (Meatless Frankfurters).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1979.

**New Product–Documentation:** Recipe booklet. 1979.

**1111. Product Name:** Loma Linda Salami (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1979.

**Ingredients:** Wheat gluten, soy protein isolate, water, corn oil, egg whites, corn starch, salt, dried yeast, natural (vegetable) flavors, soy protein concentrate, dextrose, onion, artificial flavors, garlic, guar gum, caramel color, soy lecithin, spices, artificial colors, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**How Stored:** Frozen.

**New Product–Documentation:** Recipe booklet. 1979, dated.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

**1112. Product Name:** Loma Linda Tender Cuts?

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1979.

**New Product–Documentation:** Recipe booklet. 1979, dated.

**1113. Product Name:** Loma Linda Breakfast Sausage (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1979.

**New Product–Documentation:** Recipe booklet. 1979, dated.

**1114. Product Name:** Loma Linda Sizzle Franks (Meatless Hot Dogs Based on Spun Soy Protein Fiber).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92505.

**Date of Introduction:** 1979.

**Ingredients:** Frank: Water, soy protein concentrate, wheat

gluten, corn oil, vegetable shortening, egg whites, natural (vegetable) flavors, dried yeast, corn starch, dextrose, salt, artificial flavor, onion powder, carrageenan, caramel color whole wheat flour, garlic powder, artificial color, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

Broth: Water, salt.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 2 franks (2.4 oz–70 gm): Calories 170, protein 10 gm, carbohydrate 3 gm, fat 13 gm, cholesterol 0 mg, sodium 340 mg, potassium 100 mg.

**New Product–Documentation:** Sold frozen or canned.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1979.

**1115. Product Name:** Loma Linda Redi-Burger (Meatless Hamburger).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce Place, Arlington, California.

**Date of Introduction:** 1979.

**New Product–Documentation:** Recipe booklet. 1979.

Now made with textured soy protein. Soybean Blue Book. 1955. p. 104. "Meat substitutes." Address given as Arlington, California. *Soybean Digest Blue Book*. 1972. p. 108. "Burger, soy loaves and slices (chicken, turkey, beef, and hamlike

flavors).” Listing is now Loma Linda Foods, 11503 Pierce St., Riverside, CA 92505. A more sophisticated version of the same product with the same name was introduced in 1963.

Note: This product was first introduced in 1953, but did not contain textured soy protein at that time.

**1116. Product Name:** Millstone Burger-Like: A Vegetable Protein Product—Imitation Ground Beef.

**Manufacturer’s Name:** Millstone Foods Inc.

**Manufacturer’s Address:** P.O. Box 323, Penryn, CA 95663.

**Date of Introduction:** 1979.

**Ingredients:** Water, soy flour, textured vegetable protein, salt, hydrolyzed vegetable protein, onion, garlic, spices, tomato, caramel color, natural flavorings.

**Wt/Vol., Packaging, Price:** 19 oz (538 gm). Can.

**How Stored:** Shelf stable.

**New Product—Documentation:** Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 222-23. A photo shows the label.

Label sent by Millstone. 1981. March 1. Label reads as shown at product name. Brown and yellow lettering on white background. With recipe for Burger Patties (with eggs). The company also makes Tender Cuts (basically wheat gluten but with soy flour and TVP), and Nut Meat (mainly peanuts with corn and soy flour).

**1117. Product Name:** Millstone Tender Cuts (Meatless Gluten Patties).

**Manufacturer’s Name:** Millstone Foods Inc.

**Manufacturer’s Address:** P.O. Box 323, Penryn, CA 95663.

**Date of Introduction:** 1979.

**Ingredients:** Water, wheat protein, wheat by-products (bran, shorts, middlings, wheat germ), soy flour, oat flour, hydrolyzed vegetable protein, salt, onion, garlic, spices, tomato and celery powder, natural flavorings.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 2 slices (3.6 oz–102 gm): Calories 80, protein 14 gm, carbohydrate 3 gm, fat 1 gm, cholesterol 0 mg, sodium 410 mg, potassium 50 mg.

**New Product—Documentation:** Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 222-23. A photo shows the label. Tender Cuts are a vegetable protein product, “delicate and tender slices of gluten precooked in a broth. Tender Cuts are a convenient and easy way to fix your next entree. Serving suggestions: Roll Tender Cuts in Millstone Breading Meal and fry lightly in oil until golden brown. Serve immediately.”

Loma Linda took over the Millstone line in 1985. Label sent by Loma Linda Foods. 1988. Oct. 5. 11 by 4.25 inches. Green, yellow, black, and white. A color photo of the ready-

to-serve dish is on the front panel. Ingredients: Tender Cuts: Wheat gluten, wheat flour, water, soy flour, oat flour. Broth: Water, natural (vegetable) flavors, seasoning, (salt, onion powder, garlic powder, celery powder, thyme).

**1118. Product Name:** Millstone Wheat Fries (Meatless Gluten Chunks).

**Manufacturer’s Name:** Millstone Foods, Inc.

**Manufacturer’s Address:** Box 323, Penryn, CA 95663.

**Date of Introduction:** 1979.

**Ingredients:** Wheat gluten, water, hydrolyzed vegetable protein, salt, onion, garlic powder, spices, tomato and celery powder.

**Wt/Vol., Packaging, Price:** 16 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product—Documentation:** Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 189-90. A photo shows the label. Millstone Wheat fries are “a vegetable protein product... delicate and tender chunks of gluten prepared the way grandmother used to in her kitchen... And save the can liquid. The broth is an excellent base for gravy and flavoring for stews and soups. Serving suggestions: Cut Wheat Fries into bite size pieces, roll in Millstone Breading Mix and fry in oil until golden brown.”

**1119. Product Name:** Tofu Pattie.

**Manufacturer’s Name:** Prasad.

**Manufacturer’s Address:** P.O. Box 7434, Thousand Oaks, CA 91359.

**Date of Introduction:** 1979.

**New Product—Documentation:** The tofu used in this product is purchased from Quong Hop & Co.

**1120. Product Name:** Seitan, Chili (with Seitan), Tamale Pie (with Seitan), Sandwiches with Seitan, Basmati Rice Salad (Curried with Seitan), and Seitan Pups.

**Manufacturer’s Name:** Proteeno.

**Manufacturer’s Address:** 19805 Valley View Dr., Topanga Canyon, California.

**Date of Introduction:** 1979.

**New Product—Documentation:** Talk with Ken Smith now living in Makawao, Maui, Hawaii. 1991. Dec. 8. He learned about seitan in a macrobiotic cooking class taught by Yvette Delange in about 1971 in Hollywood, California. From 1974 to 1976 he studied macrobiotics in Boston. Then he returned to live in Topanga Canyon, near Los Angeles, where he started making and distributing seitan and seitan products 3 times a week to Mrs. Gooch’s, Quinn’s, and other places. The business was pretty low key; they were operating out of their home. His first traditional seitan was made with gluten, tamari, ginger, kombu, etc. Then he expanded into the other products shown above. The Seitan Pups, which were dipped in a batter and deep-fried, were based on the Tan Pops he

had seen (and loved) in Boston. The business was doing well and customers loved the products. He made about 60 lb/week of seitan by washing high-protein wheat. The business only lasted for 4-5 months, and he was just in the process of getting labels printed. Then they sold their house, in part because a huge flood cut off his direct access to town.

**1121. Product Name:** Solar Burger (With Wheatmeat).  
**Manufacturer's Name:** Season's Harvest.  
**Manufacturer's Address:** 52 Broadway, Somerville, MA 02145.

**Date of Introduction:** 1979.

**Ingredients:** Incl. seitan (Wheatmeat), textured soy protein concentrate (Response), whole wheat flour, and soy protein isolate.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 30. In 1976 the Solar Burger patty was still being made by John Weissman. Ademar started making and private labeling the product in 1979. John had a plant in Cambridge, Massachusetts. Then John closed the plant and Ademar bought some of his equipment and started making the Solar Burger patty for John. At that time, Ademar first discovered Response, textured soy protein concentrate.

**1122. Product Name:** Country Style Soy Sausage. Renamed Soy Sausage in 1981.

**Manufacturer's Name:** Sunbow Farm Products.

**Manufacturer's Address:** Route 2, Box 46, Corvallis, OR 97330.

**Date of Introduction:** 1979.

**Ingredients:** 1981: Soybeans [okara], brewer's yeast, wheat germ, bran, whole wheat flour, soy oil, spices, herbs and flavorings.

**Wt/Vol., Packaging, Price:** 16 oz (1 lb).

**How Stored:** Refrigerated.

**New Product–Documentation:** Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West; Mia Posner & Harry McCormick. Soy Cookbooklet. 1979.

Label. 1981. Sent by Mia Posner & Harry McCormick. 4 x 2.25 inches. Black on white. "Ready to eat or fry till

crisp."

**1123. Product Name:** Country Style Burger Mix.  
**Manufacturer's Name:** Sunbow Farm Products.  
**Manufacturer's Address:** Route 2, Box 46, Corvallis, OR 97330.

**Date of Introduction:** 1979.

**New Product–Documentation:** Shurtleff & Aoyagi. 1979. July. New Tofu Shops & Soy Dairies in the West; Mia Posner & Harry McCormick.

Sunbow Farm. 1979 Soy Cookbooklet, p. 6. Sunbow's Burger Mix (3 recipes). "Our burger mix is another high fiber product and a lot more."

**1124. Product Name:** [Tofu (Made with Natural Nigari), Okara Burgers].

**Foreign Name:** Tofu, Okaraburgers.

**Manufacturer's Name:** Svadesha Pflanzen-Feinkost.

**Manufacturer's Address:** Winterlehen 1½, Einweging, West Germany. Phone: 099-73-1066.

**Date of Introduction:** 1979.

**Ingredients:** Tofu: Water, organic soybeans, nigari.

**Wt/Vol., Packaging, Price:** Tofu packed in water in round plastic deli containers.

**How Stored:** Refrigerated.

**New Product–Documentation:** Form filled out (about mid-1982) by Swami Anand Svadesha (Ruediger Urban). The address is Aeussere Kötzing Str. 52a, 8492 Fuerth im Wald, West Germany. The company started at this address in Fuerth am Wald on 1 March 1981. They now use 20 lb of soybeans, 3 days a week.

Letter from Sjon Welters. 1982. April 16. Svadesha is a tofu producer who bought tofu from Manna.

Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: Ruediger Urban.

Interview with Bernd Drosihn. 1987. Nov. 30. They make about 1,500 kg/week of tofu.

Letter from Harry Whitford of Soyastern. 1987. Dec. 14. Svadesha makes about 1,200 kg/week of organic nigari tofu. The address is now: Ostpreussenstr. 22, 8000 Munich 81, West Germany. It is well known that Svadesha started the first tofu shop in Germany.

Talk with Michael Pierce of Georgia (Phone: 912-752-8083 Office). 1989. Oct. 30. Svadesh, who started making tofu before Peter Wiegand, had a small operation in central eastern Bavaria right near the Czechoslovakian border. He made only about 25-30 lb/week of tofu, then he drove all the way to Munich and sold it at 10-11 health food stores there and along the way. It was in small round lidded plastic deli containers immersed in water. His tofu was in the stores when Auenland introduced theirs. Pierce thinks Svadesh was a Bhagwani, a follower of Sri Rajneesh. Auenland's growing business also got Svadesha going; he decided to come out of the woods and move to Munich. So he set up his

little tofu kitchen/plant in a little place called the Werkhaus (Workhouse), a little community restaurant and counter-culture hangout in Munich.

Die Geschaeftsidee. 1989. Dec. p. 26-27, 32-33. Ruediger Urban was West Germany's first tofu maker. "Since his business was founded in 1979, Urban's clientele has grown greatly. The former proprietor of a restaurant on the Mosel (Moselle) River cooked in the early days in his own kitchen in the Bavarian forest only with a wood fire and normal kitchen utensils. Twice a week he produced 30-40 kg of tofu. He personally visited each natural food store (*Bioladen*) in Munich to enlist outlets for his product. Soon he was getting more and more orders. In 1983 he moved to Munich and started a small kitchen; the transportation had gotten too complicated for him. In 1985 he settled into his present location near Denning, a suburb of Munich. Today he makes about 230 kg/day of tofu." A photo (p. 33) shows Svadesha and his present shop.

Label sent by Anthony Marrese. 1990. March 22. 8 by 6 inch pre-printed plastic bag. Green, blue, and orange on clear plastic. Logo of orange sun behind breaking wave. Company is now Svadesha R. Urban, Ostpreussenstr. 22, 8000 Munich 81, West Germany. Phone: (089) 93 90 05. "Fresh tofu, made by hand (*in Handarbeit hergestellt*), rich in high-quality protein for light cuisine. Ingredients: Soybeans (organically grown) and water. 300 gm. 9% protein. Our tofu is made with the traditional coagulant nigari, obtained from whole sea salt. Nigari tofu is famous for its smooth consistency and its fine aroma. Tofu is free of cholesterol and non-acid forming (*nicht saeuerbildend*). Tofu contains all the essential amino acids, which make the protein high in quality."

Talk with the receptionist at this company. 1990. June 12. Ruediger Urban is now in the hospital. He is very sick, with cancer of the cheeks, but he can walk and he visits the company occasionally. The company changed ownership on 1 June 1990. It is now owned by Robert Mayer and Erhardt Schwartz. The present business name is Svadesha, and the "subtitle" is Vegetarische Feinkost.

Talk with Svadesha R. Urban. 1990. June 13. In about 1979, he started on the side to make tofu in a little farmhouse at Winterlehen 1½, Einweging, in the Bavarian Forest (*Bayerischer Wald*). He made only one product, tofu, using organically grown soybeans and nigari coagulant. He made the tofu using a gas stove, which he sometimes used in the kitchen and sometimes moved out into the garden. The tofu was sold under his name Svadesha (he was a disciple of Bhagavan Sri Rajneesh) but he had no officially registered business. Twice a week he produced about 30-40 kg of tofu, which he packed in small plastic tubs, and drove more than 200 km (120 miles) into Munich. There he personally delivered it to a handful of the new generation of natural food stores (*Biolaeden*) that sold all of his tofu.

After about a year making tofu at this location, he

decided to go to India for 6 months, so he entrusted his small business to another person while he was gone. The company fell apart during this time. Upon his return from India, Svadesha moved the business to Aeussere Kötzingenstr. 52a, D-8492 Fuerth im Wald, very near the Czechoslovakian border, and farther away (about 200 km or 120 miles) from Munich.

Talk with Ruediger Urban in hospital (8621-871-326). 1990. June 13. He has cancer of the cheeks. Letter (fax) from Bernd Drosihn. 1991. Nov. 11. "All the telephone numbers I have for Svadesh are no longer valid. The last contact I had was half a year ago. I have heard that he is now in a hospital for psychiatric problems, but I am not sure about this."

Note: This is the earliest record seen (April 2001) concerning Tofurei Svadesha Naturkost Produkte GmbH.

1125. **Product Name:** Vegetarian Beef Chunks.

**Manufacturer's Name:** Vegetarian Health, Inc. (Marketer-Distributor).

**Manufacturer's Address:** P.O. Box 525, Maywood, IL 60153. Phone: 800-323-4092.

**Date of Introduction:** 1979.

**Ingredients:** Soy flour, salt, natural and imitation flavorings (onion and garlic), spices, caramel coloring; fortified with vitamins and minerals: zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (B-1), pyridoxine hydrochloride (B-6), riboflavin (B-2), cyanocobalamin (B-12).

**Wt/Vol., Packaging, Price:** 5 oz paperboard box. Retail for \$1.99.

**How Stored:** Shelf stable.

**Nutrition:** Per 1 oz (28 gm): Protein 14 gm, carbohydrates 10 gm, fat less than 1 gm, cholesterol less than 1 mg, sodium 4 mg, fiber less than 1 gm.

**New Product-Documentation:** Ad in Whole Foods. 1991. June. p. 36. Color photo of the box. Talk with company salesperson. 1991. May 22. Both this product and Vegetarian Hamburger Bits, which contain soy, were introduced about 12 years ago.

Label sent by Vegetarian Health, Inc. 1991. May. Copyright 1990. 7 by 5 by 2 inches. Paperboard box. Turquoise blue, yellow, and dark blue. Color photo of chunks in pasta fills front panel. "Sodium free. No cholesterol. Free recipe book inside. Has the real taste and texture of real meat *without* the cholesterol or fat. Has 50% fewer calories than red meat."

1126. **Product Name:** Vegetarian Hamburger Bits.

**Manufacturer's Name:** Vegetarian Health, Inc.

**Manufacturer's Address:** P.O. Box 525, Maywood, IL 60153. Phone: 800-323-4092.

**Date of Introduction:** 1979.

**Ingredients:** Soy flour, salt, natural and imitation flavorings

(onion and garlic), spices, caramel coloring; fortified with vitamins and minerals: zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (B-1), pyridoxine hydrochloride (B-6), riboflavin (B-2), cyanocobalamin (B-12).

**Wt/Vol., Packaging, Price:** 5 oz paperboard box. Retail for \$1.99.

**How Stored:** Shelf stable.

**Nutrition:** Per 1 oz (28 gm): Protein 14 gm, carbohydrates 10 gm, fat less than 1 gm, cholesterol less than 1 mg, sodium 4 mg, fiber less than 1 gm.

**New Product–Documentation:** Ad in Whole Foods. 1991. June. p. 36. Color photo of the box. Talk with company salesperson. 1991. May 22. Both this product and Vegetarian Beef Chunks, which contain soy, were introduced about 12 years ago.

Label sent by Vegetarian Health, Inc. 1991. May. Copyright 1990. 7 by 5 by 2 inches. Paperboard box. Turquoise blue, pink, and dark blue. Color photo of burger on bun fills front panel. “Sodium free. No cholesterol. Free recipe book inside. Has the real taste and texture of real meat *without* the cholesterol or fat. Has 50% fewer calories than red meat.”

1127. **Product Name:** Morningstar Farms Grillers (Meatless Hamburger Patties).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1979.

**Ingredients:** Textured vegetable protein (soy protein

isolate, concentrate and isolate, wheat gluten), soybean and/or corn oil, egg whites, partially hydrogenated soybean and cottonseed oil, flavorings (artificial flavors, monosodium glutamate, spices, disodium guanylate, disodium inosinate), calcium caseinate, modified tapioca starch, onion powder, emulsifiers (mono- and diglycerides, glyceryl lacto esters of fatty acids), caramel color, sugar, garlic powder, ascorbic acid, vitamins [niacinamide, thiamine mononitrate (B-1), pyridoxine hydrochloride (B-6), riboflavin (B-2), B-12], iron (as ferrous sulfate).

**Wt/Vol., Packaging, Price:** 9 oz (256 gm). Four patties in paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Ad. 1980. “No cholesterol. No kidding.” Label reads: “Cholesterol Free Patties. Artificial Hamburger Flavor. Textured Vegetable Protein. No Animal Fat. Protein Rich.” Label. 1989. Sept. 7. Sold at Diablo Foods, a supermarket in Lafayette, California. The cholesterol-free meatless hamburger patties (9 oz., 4 patties) retail for \$2.45.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

Product with Label purchased at Lucky Foods supermarket in Lafayette, California. 1993. June 1. 8 by 4 by 1¼ inch box. Dark green, light green, tan, red, and blue on white. Color photo of a patty with lettuce and tomato between two buns. Morningstar Farms logo in top left corner. “Artificial hamburger flavor. No animal fat. Microwaveable. Zero cholesterol. Keep frozen.” Ingredients: Textured vegetable protein (Soy protein concentrate and isolate, wheat gluten), egg whites, corn oil, calcium caseinate, partially hydrogenated soybean and cottonseed oil, artificial

and natural flavors from non-meat sources, modified food starch, onion powder, sucrose, caramel color, emulsifiers from vegetable sources (mono- and diglycerides, glyceryl lacto esters of fatty acids), garlic powder, black pepper, methylcellulose, disodium inosinate, disodium guanylate, vitamin C (ascorbic acid), niacin, celery, iron (as ferrous sulfate), vitamin B-1 (thiamine), vitamin B-6, vitamin B-2 (riboflavin), vitamin B-12. Note: The package design and ingredients of this product are somewhat different from those of the product launched in 1979.

Ad (full-page, color) with coupon in *Vegetarian Times*. 1993. July. p. 29. "A delicious way to cut down on meat without cutting down on your options." Shows new label designs for 4 Morningstar Farms meatless products.

Talk with Dick Leiss, Director of R&D for Worthington Foods. 1993. June 30. This product never contained spun soy protein fiber.

Product (Meatless Grillers) with Label (new design) purchased at Safeway supermarket in Lafayette, California. 1994. May 18. Price: \$2.59. Frozen. 9 oz (256 gm). A huge color photo of a burger, with all the trimmings, is at the center of the front panel. "Artificial hamburger flavor. No animal fat."

1128. **Product Name:** Morningstar Farms Luncheon Slices (Meatless Ham or Sausage Slices).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1979.

**New Product–Documentation:** Shurtleff & Aoyagi. 1983. *History of Worthington Foods*. p. 10.

Talk with Dick Leiss, Director of R&D for Worthington Foods. 1993. June 30. This product never contained spun soy protein fiber. It was a reformulation of reformulated version of Morningstar Farms Breakfast Slices first launched in 1974.

1129. **Product Name:** Morningstar Farms Leanies (Meatless Hot Dogs–Links or Frankfurters or Wieners).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1979.

**Ingredients:** Textured vegetable protein (soy protein concentrate and isolate, wheat gluten and flour), egg whites, soybean and/or corn oil, sodium caseinate, water, partially hydrogenated soybean and cottonseed oil, flavorings (artificial flavors, monosodium glutamate, onion and garlic powder, spices, disodium guanylate, disodium inosinate), salt, corn syrup solids, dextrose, sodium phosphates (tripolyphosphate, pyrophosphate, hexametaphosphate, monophosphate), artificial colors, calcium chloride, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

**How Stored:** Frozen.

**New Product–Documentation:** Shurtleff & Aoyagi. 1983. *History of Worthington Foods*. p. 10.

Talk with Dick Leiss, Director of R&D for Worthington Foods. 1993. June 30. This product never contained spun soy protein fiber.

1130. Aoki, Hiroshi; Ito, Kiyoe. 1979. *Chôri to daizu* [Cooking and soybeans]. Gakken Shoin K.K., Tokyo. 173 p. Illust. Index. 22 cm. [151 ref. Jap]

• **Summary:** Contents. I. Cooking and soybeans. II. Soybean molecules and soybean protein. III. Cooking and traditional soy protein foods. 1. Cooked whole soybeans (nimame), green vegetable soybeans (yude-mame, edamame), soy sprouts. 2. Roasted soy flour (kinako). 3. Tofu. 4. Deep-fried tofu pouches and tofu burgers (aburaage and ganmodoki). 5. Dried frozen tofu (kori-dofu). 6. Yuba. 7. Natto. 8. Tempeh. 9. Soymilk. 10. Miso (Miso soup, miso-ni, ae-mono). 11. Shoyu. IV. Cooking and new soy protein products. Address: 1. Prof., Otsuma Joshi Daigaku; 2. Prof., Tokyo Gaku Gei Dai.

1131. Burnett, John. 1979. *Plenty and want: A social history of diet in England from 1815 to the present day*. Revised 2nd ed. London: Scolar Press. 387 p. Index. 21 cm. 1st ed. 1966, published by Thomas Nelson. [100+\* ref]

• **Summary:** This is the best history seen to date of food and nutrition in England after 1815. Chapter 14 (the last chapter),

titled "Since 1945" states (p. 365-66) that it is now "actually possible to convert high-protein vegetables into synthetic 'meat'. To date, the most used vegetable is soya, which can be turned either into soya flour, soya concentrates, or soya protein isolates spun or woven to produce meat 'analogues'. The last technique, which allows the resulting fibres to be given any colour, texture, flavour and nutritional value desired, has been commercially exploited jointly by Rank Hovis McDougall and Courtaulds since 1972 in the product 'Kesp', which can be used as a total replacement for meat in, for example, pies, or as a partial substitute in many dishes. So far, its acceptability has not been very high, and outside the school meals programme the impact of the analogue has not been significant, but potentially the possibility of extending the world's scarce protein resources by the use of vegetables [plants] and, even, micro-organisms such as bacteria and fungi, all of which can produce food far more rapidly than animals do, is of extreme importance.

"In Britain, the adoption of such novel foods is likely to be very slow." Address: [England].

1132. Cloud, Maxine H. 1979. *The soysage cookbook*. Hyde Park, Vermont: Cloud Mountain, Inc. 31 p. Illust. by Joan Burdett. No index. 22 cm.

• **Summary:** Contains 5 recipes for using soysage in sandwiches (incl. Hot soysage Sub, Soysage Reuben) and 28 recipes for use in main dishes (incl. Soysage loaf, Soysage burgers, Lasagna, Soysage scramble, Pat & Jay Gibbons'

quick Soysage balls, Garlic-y broccoli and Soysage, Soysage pie, Soysage quiche).

The dedication reads: "The people at Cloud Mountain dedicate this book to the spirit of cooperation. This spirit is the essence of the New Age and has been made manifest through our friends Pat, Jay, and Joan. As the New Age is upon us we should rejoice in having chosen to be on Earth during this time." Note: Maxine Cloud is the wife of Jon Cloud. Soysage is made using okara as a main ingredient. A section near the beginning titled "Dear Cooks:" states that "soysage can be to vegetarians as hamburger is to meat-eaters."

Note: As of summer 1980 (see *Soyfoods* p. 37) the cookbook is available from Cloud Mountain, Inc., 481 W. Utica St., Buffalo, New York 14213. Address: Hyde Park, Vermont.

1133. Hsiung, Deh-Ta. 1979. Chinese regional cooking. New York, NY: Mayflower Books; London: Macdonald. 224 p. Illust. (chiefly color). Maps. 28 cm. 1st American ed.

• **Summary:** A superb and beautiful book, loaded with beautiful color photos printed on glossy paper. It identifies four regional schools: Peking (Northern school). Shanghai (Eastern School). Sichuan (Western school). Canton (Southern school). The Pearl River delta, with Canton as the capital of Guangdong (W.-G. Kwangtung) province, "is undoubtedly the home of the most famous of all Chinese cooking styles... Because Canton was the first Chinese port opened for trade, foreign influences are particularly strong in its cooking." Note: Likewise, what most Westerners have traditionally thought of a "Chinese cooking" comes from Canton.

Archaeological evidence shows that by 5000 B.C. the people of north China had begun to settle down, to farm, and to make painted pottery and cooking utensils. Written records first appeared in about 3500 B.C. "Later, during the Chou dynasty (11th century to 221 B.C.) soy beans were added to the Chinese diet" (p. 32.).

Northern soy-related recipes: Fried bean-curd [tofu] (with 2-3 cakes of bean curd) and a color photo of "A bean-curd factory run by a unit of the People's Liberation Army on the outskirts of Peking" (p. 53). Rinsed lamb in fire-pot (with 2 cakes of bean curd, fresh or frozen, p. 68-71). The Yangtze [Yangtze], China's longest river, is a natural divide between north and south in China. Those in the north eat more wheat and soybeans (p. 94).

Shanghai / eastern soy related recipes: The Yangtze River has already traveled 3,000 miles before it reaches its Lower Plain where many crops, including soy beans are grown (p. 98). A page titled "Buddhist and Taoist dishes," notes that they are vegetarian (actually vegan), since "Chinese vegetarians are not allowed anything remotely connected with animals, including eggs or milk. They get their protein mainly from the soy bean and its by-products, such as bean-curd and imitation meat. Curiously these imitation meats (known as vegetarian meat, chicken, fish, and so on) bear an amazing resemblance to their fleshy counterparts in form, texture and flavor.

"For some unknown reason, the best vegetarian restaurants [in China] are to be found in Shanghai—a thriving commercial center and seaport..." (p. 119). Buddha's fry (with 1 oz. dried bean-curd skin [yuba], p. 120-21). A small color photo shows sheets of dry yuba. Eight treasure bean curd (p. 132). "This recipe used to be called 'Prince's Bean-Curd' and originally appeared in *Sui-yuan Shihtan* (Recipes of Sui-yuan), by the 18th century man of letters and gourmet, Yuan Mei." A small color photo shows fresh bean-curd on a wooden table in a Chinese market stall. Bean curd a la maison (p. 144).

Sichuan / western soy related recipes: Bean curd fish in chili sauce (p. 164). Steamed beef with ground rice (with 1 tablespoon { 15 ml } salted black beans, crushed). 'Pock marked woman' bean curd (Mabo doufu, with salted black beans, p. 173). This is another nationally popular dish that

originated in Sichuan. The woman was the wife of a well-known chef who worked in Chengdu about 100 years ago; she created the dish. Hot and sour soup (with 1 cake bean curd, p. 174). Fish soup (with bean curd, p. 181). Soy braised duck (with Hoi Sin sauce and soy sauce, p. 182).

Cantonese / southern soy related recipes: Fish and bean-curd casserole (p. 194-95). Eight treasure stuffed bean-curd (a well known Hakka dish, p. 198). Squid and peppers with shrimp (prawn) balls (with 1 tablespoon crushed black bean sauce, p. 202-03). Fish head casserole (with 2 cakes bean-curd, p. 203). Steamed bass in salted black beans (p. 209).

Glossary of main ingredients (p. 219-21) has entries for: Bean-curd (toufu, incl. dried bean-curd skin). "Bean sauce: Sometimes called 'Crushed bean sauce,' this thick sauce is made from black or yellow [soy] beans, flour and salt. It is sold in tins... (N.B. Black bean sauce is very salty, while yellow bean sauce is sweeter with sugar added)." Bean sprouts: Of the two kinds, yellow soy bean sprouts are sold only in Chinese provision stores.

A large excellent photo (p. 219) shows: 1. Hoi Sin [hoishin] sauce in white bowl. 2. Salted black beans in can. 3. Light soy sauce in bottle. 4. Dark soy sauce in bottle. 5. Red bean-curd sauce in small brown crock. 6. Crushed yellow bean sauce in bowl. 7. Yellow bean sauce in white bowl.

"Chili paste: Also called 'Chili purée,' is made of chili, soy bean, salt, sugar and flour. Sold in jars; will keep almost indefinitely." "Hoi Sin sauce: Also known as barbecue sauce. Made from soy beans, sugar, flour, vinegar, salt, garlic, chili, and sesame." "Red bean curd sauce: A thick sauce made from fermented bean curd and salt. Sold in cans or jars, will keep indefinitely." "Salted black beans: Whole bean sauce, very salty." Sesame seed oil: Chinese typically use vegetable oils; soy bean oil is very widely used. Soy sauce: "The darker colored sauces are strongest and more often used in cooking, whereas the lighter are used at the table."

1134. Huth, Tom. 1979. *Unnatural axe: A novel of Colorado*. New York, NY: Delacorte Press. 213 p. See p. 205. 21 cm. \*  
• **Summary:** Page 205: "He stopped at a waterfall, practiced Breath of Fire, ate the salami sandwich that Mary had made for him and the veggieburger from Stacie, and kept on going."

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "veggieburger" (or "veggieburgers").

1135. Loma Linda Foods. 1979. *27 Meal-Maker recipes*. 11503 Pierce St., Riverside, CA 92505. 16 p. 21 cm.  
• **Summary:** This color booklet shows how to use the following Loma Linda products in recipes: Sizzle Burgers, Meatless Fried Chicken, Meatless Turkey, Breakfast Sausage, Sizzle Franks, Meatless Bologna, Little Links, Meatless Salami, Vege-Burger, Meatless Roast Beef, Chili

Beans, Meatless Chicken Roll, Proteena, Meatless Fried Chicken with Gravy, Vita-Burger Chunks, Linketts, Nuteena, Big Franks, Redi-Burger, Dinner Cuts, Vegelona, Tender Rounds, Sandwich Spread, Vita-Burger Granules, Green Soybeans, Tender Bits, Loma Linda foods hors d'oeuvres [not a commercial product]. A small photo shows each product and label. Address: Riverside, California.

1136. MacLeod, Charlotte. 1979. *The luck runs out*. Garden City, New York: Doubleday & Company, Inc. 192 p. See Chap. 7, p. 75-77. 22 cm.

• **Summary:** This novel, a murder mystery, is set at Balaclava Agricultural College. Belinda of Balaclava, the college's prize sow has been abducted. President of the college Thorkjeld Svenson and his wife had seven daughters, each lovely and serene. The youngest of these, Birgit, was a student at the college. She was one of a small campus group called the Vigilant Vegetarians; for her, vegetarianism was a holy cause. "Her successful campaign to have soybean cutlets put on the menu in the student dining room had been

only a warm-up skirmish for her battle to get roast beef and similar viands taken off.” She and her fellow students armed themselves with statistics showing how many tons of grain it took to produce one ton of meat. They staged demonstrations at cattle shows where other Balaclava students were displaying their prize Guernseys and Holsteins.

“So far, the Viggies, as they had been dubbed, had succeeded in arousing considerable amusement...” Professor Scott, who obtained research funds for his work in breeding meat animals, was strongly disliked “by a few of the more militant Viggies.”

In his commencement address to the Class of ‘73, President Svenson slammed his fist down on the solid oak podium and clove it cleanly in twain to emphasize his deeply-felt belief: “Agri isn’t a business, its a culture!”

1137. Magic Bean Co-op. 1979. Okara: “The honorable hull” (Leaflet). Milwaukee, Wisconsin. 2 panels each side. Each panel: 22 x 14 cm.

• **Summary:** Black ink on yellow paper. On the front panel is an illustration (line drawing), taken from *The Book of Tofu*, which shows a tofu maker sitting on a pressing lever in a traditional tofu shop while pressing soymilk from a pressing sack. On panel 2 is an introduction to okara, and panel 3 contains four recipes: Okara cornbread, Okaraburgers, Soysausage, and Okara-oat pudding. “\*\*Okara is excellent compost!” Panel 4 is blank.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Okaraburgers” (or “Okaraburger”). Address: Milwaukee, Wisconsin.

1138. Ng Sock Nye. 1979. Soya bean–Nutritious food for the people. Malaysia: Institut Masyarakat Berhad, 9 Lorong Kucing, Pulau Tikus, Penang. 19 p. Illust. 21 cm. [3 ref]

• **Summary:** A very original and informative booklet, containing a photo or illustration (line drawing) of most of the soyfood products discussed.

Contents: Nutritional value of soya bean, soya bean milk (tau chui [soymilk]), soya bean curd (tau fu fah [soymilk curds]), soya bean jelly (tau fu [tofu]), fried bean cake cubes (tau fu pok [deep-fried tofu cubes]), bean cakes (tau kuah [pressed tofu]), dried soya strands (tau ki / fu chok [dried yuba sticks]), soya skin sheets (tau pui; dried yuba), sweet bamboo (t’im chok [sweet dried] yuba), vegetarian duck (chai ak [Buddha’s duck made from seasoned and steamed yuba]), vegetarian salted fish (chai kiam hu [Buddha’s fish made from tofu spread on yuba]), vegetarian meat (chai tu kar [Buddha’s ham made from seasoned yuba; may be steamed]), soya bean sprouts (tau geh [soy sprouts]), soya sauce (tau eu [soy sauce]), salted soya beans (tau chio [Malaysian fermented black soybeans]). Bibliography.

On page 18 is a photo of all the soyfood products discussed on one table, each neatly labeled with its Malaysian name.

1139. Riker, Tom; Roberts, Richard. 1979. Directory of natural and health foods: A sourcebook for dietary revolution. New York, NY: Putnam (A Paragon Book). 320 p. Index. 37 cm.

• **Summary:** The first part of this book (p. 7-49) consists of essays on natural foods and nutrition (some reprinted). Part two is a commercial catalog/directory of natural foods available in 1979; it lists and describes (with many photos and labels) products from most of the major U.S. natural foods manufacturers. An Index (p. 293-308) lists participating companies alphabetically.

Soy-related products include: Hain Super-E Soy Oil and Crude [unrefined] Soy Oil (Los Angeles, California, p. 55). Health Valley Soy Moo (Montebello, California, p. 56). Edward & Sons Miso-Cup (Union, New Jersey, p. 57). Family Orchards Fruit & Nut mixes, incl. Back Packer+\*, Hi-Fiber Mix+, Hi-Iron Mix+, Hi-Protein Mix+\*, Hiker’s Helper, Mixed Nuts\*, Mountain Munchies\*, Tamari Mixed Nuts\* (+ = contains Soy Nuts; \* = contains Tamari Peanuts) (Berkeley, California, p. 60-61). Niblack Tamari Pumpkin Seeds (Pepitas), Tamari Roasted Sunflower Seeds, Liquid Lecithin, Granular Lecithin (Rochester, New York, p. 72-73). Arrowhead Mills Unrefined Soybean Oil (Hereford, Texas, p. 75). Good Morning New England Granola incl. Cashew-Raisin Bran-ola (with okara soy fiber), Happy Trails Mix (with roasted soynuts) (Amherst, Massachusetts, p. 79). Elam’s Soy Flour (Broadview, Illinois, p. 81).

A long section on Erewhon and its products (p. 84-108) is probably the reproduction of an Erewhon catalog. Erewhon is now located at 3 East Street, Cambridge, MA 02141. Following several pages about the company and its philosophy and standards, each of its major products is discussed in detail, often with nutritional analyses. A label for Soy Flour (organically-grown stone-ground, 24 oz.) is shown; the main recommended use is for making soy milk! A major part of the presentation is titled “Japanese food guide.” Products described include: Umeboshi (2 pages): Plums pickled in brine (umeboshi). Umeboshi paste. Plum concentrate (*bainiku ekisu*). Miso (2 pages): Hatcho, waka-Hatcho, soybean, barley, brown rice, rice, and natto miso varieties. Tekka (made with Hatcho miso). Sweets made from mizu ame [rice syrup]. Nigari. Gomashio. Koji starters for various types of miso or shoyu. Goma-muso (60% barley miso and 40% whole sesame seed butter). *Gomamiso furikake* (with barley miso, whole roasted sesame seeds, and shredded nori seaweed). Kombu candy. Kokkoh. Dried tofu (*Kohya-dofu*). Brown rice sake. Mirin. Gluten cakes (*Kuruma-fu*). Seitan (Gluten cooked in shoyu). Rice crackers seasoned with tamari soy sauce. Kuzu (3 pages). Tamari and shoyu (4 pages; Johsen Shoyu is made in Sendai and tamari is made by San-jirushi Co.). Seaweeds (4 pages): Kanten, arame, hijiki, kombu, ne-kombu, nori, seasoned nori, kanten, kanten flakes, wakame, and mekabu.

Good Food brand Soy-Millet Bread (Austin, Texas, p. 120). Arrowhead Mills Bulgur-Soy Grits (p. 121). Erewhon Morning Cereal, and Infant Cereal (each containing soy beans). Chico-San Black Soybeans (imported), and Azuki Beans (Dainagon imported small red), and Lima Soy Sauce (Chico, California, p. 126-27). Arrowhead Mills 7 Grain Cereal, and Deaf Smith Crunch (granola-type cold cereal) (each contains soybeans, p. 130).

The section on pages 188-197 is titled "Soy." It lists Farm Foods Tempeh Kit, Tempeh Starter, Natural Nigari for Curding Tofu, Soyflour, Whole Cleaned Soybeans, Good for Ya Textured Vegetable Protein (Summertown, Tennessee, p. 189). New England Soy Dairy Tofu (with many tofu recipes, Greenfield, Massachusetts, p. 192-96).

The Redwood Sprouter Co. sprouter containing Soy Sprouts (1976, Austin, Texas, p. 202-04). Worthington Foods (a photo shows their line of 38 products). Millstone Burger-Like (with soy flour and TVP), Wheat Fries (with wheat gluten), Tender Cuts (with wheat protein and soy flour) (Penryn, California, p. 222-23). Sunrise Health Products Lecithin Granules (p. 274-75).

1140. Sunbow Farm Products. 1979. Soy cookbooklet. Corvallis, Oregon. 8 p. 22 cm.

• **Summary:** Sunbow produces tofu, soy sausage, and burger mix. Contents: Why the "noble" bean [noble bean]. What is tofu? 20 quick ways to use tofu: Main dishes (13 brief recipes), smoothies (2), salad dressings and sandwich spreads (6), desserts (2).

12 ways to use Sunbow Soy Sausage (11 brief recipes). Sunbow's Burger Mix (3 recipes). "Our burger mix is another high fiber product and a lot more."

The two recipes for "Smoothies" read: (1) Banana: In blender put ¼ lb. tofu, one ripe banana, ¼ tsp. vanilla and some crushed ice or cold water. Sweeten to taste. (2) Berry: Blend ¼ lb. tofu, ¼ cup water or crushed ice and drop in fresh or frozen berries to taste. Sweeten to taste.

Note: This is the earliest document seen (Feb. 2007) that uses frozen fruit (berries) to add thickness to a smoothie. Address: Route 2, Box 46, Corvallis, Oregon 97330.

1141. Tofu Shop (The). 1979. Soyboy Tofu (Leaflet). Rochester, New York. 4 panels each side. Each panel: 23 x 11 cm. Dated 1979.

• **Summary:** Brown ink on beige paper. On the front panel is an illustration of a laughing boy in a circle with soybean pods and leaves at the bottom. "High protein. Low calorie. Low sodium. No cholesterol. Tofu, the subtly sweet soybean 'cheese,' has been the key source of protein in Japan and China for thousands of years."

Contains 10 American-style tofu recipes, including: Tofu for babies. Chilled tofu. Lime tofu. Tofu "cottage" cheese. Pan fried tofu. Scrambled tofu. Tofu burgers. Ginger-garlic tofu. Tofu manicotti. Tofu spinach pie. Address: 686 Monroe

Ave., Rochester, New York 14607. Phone: 716-244-4270.

1142. Yamaguchi, Momoo; Kojima, Setsuko. eds. 1979. *Wa-Ei Nihon bunka jiten* [A cultural dictionary of Japan]. Tokyo: Japan Times. vii + 408 p. See p. 108. 19 cm. [Eng; jap]

• **Summary:** A very useful book with excellent definitions of Japanese words in English. It is divided into nine parts; No. 2 is titled "dietary habits" (p. 79-131). Each definition has four parts: (1) The word is written in romanized English, with diacritical marks and a hyphen in compound words. (2) The word is written in characters. (3) A long definition is given in English. (4) Related words and "see also" words are given (romanized) and key words in the definition are defined in Japanese (Chinese characters).

Words only distantly related to soy are preceded below by an asterisk. Soy-related words: abekawa-mochi (with "sweetened yellow soybean powder-kinako"), aburage (fried soybean curd), aemono, age-dama, age-dashi ("soybean curd fried lightly without a tempura batter"), Ajino-moto ("a popular brand of monosodium glutamate"), ama-zake, \* an (sweet bean jam = azuki-an; Can be strained {*koshi-an*} or mashed {*tsubushi-an*}), dengaku-tofu, doburoku, eda-mame, fu ("dried, bread-like pieces of wheat gluten"), fucha-ryori ("Chinese-style vegetarian dishes served in some Japanese temples of Chinese origin"), ganmodoki, goma-ae, goma-shio (widely used with sekihan), hiya-yakko, inari-zushi, isobe-maki (with mochi, soy sauce and nori), kara-age, kashiwa-mochi (stuffed with sweet [azuki] bean paste), kina-ko ("yellowish soybean powder"), kishimen (seasoned with soy sauce and topped with a few pieces of fried bean curd), kitsune udon (seasoned with soy sauce and topped with a few pieces of fried bean curd), koji, koya-dofu, \* kuzu-manju (a ball of sweet redbean paste {azuki-an} with a covering of kuzu starch), kuzu-mochi (with kinako), masu (a small square measuring box, usually made of Japanese cypress {*hinoki*}). The three sizes measure 0.18, 0.9 and 1.8 liters. It is constructed by dovetailing, without the use of nails or adhesive. It is used for measuring soybeans, cereal grains, or for drinking saké), miso, miso-shiru, miso-zuke, \* mochi, nabe-mono (often contain tofu; examples are sukiyaki, yose-nabe, and mizu-taki), nama-gashi (traditional Japanese confections made with beans and/or glutinous rice, cooked but not baked), natto, \* nori (a dried sheet of laver, a seaweed), \* oboro (related to sushi, not soy), oden, \* ohagi (coated with sweet redbean paste {*azuki-an*}), shiru-mono (the two basic types are clear soup and miso soup), \* shiruko (sweet beanpaste soup with mochi; see zenzai), shojin-age, shojin-ryori, shoyu, suki-yaki, sukiyaki-nabe, suri-bachi, suriko-gi [suri-kogi], sushi, sushi-ya, teriyaki, tofu, \* ume-boshi (a Japanese pickled plum), wa-gashi (Japanese-style confectionery), wakame, warishita (soy sauce flavored seasoning), washoku = nihon-ryori, yaki-dofu, yaki-mono, yakko-dofu, yu-dofu, \* zenzai ("a thick kind of sweet redbean soup").

Page 24 defines hiragana (lit. flat kana) as “The cursive form of *kana* script, one of the two sets of Japanese syllabary writing. *Hira-gana* is more commonly used than the other set called *kata-kana*. It is usually used for writing inflectional endings and function words not represented by Chinese characters (*kanji*).” Address: Tokyo, Japan.

1143. Loma Linda Foods. 1979? To your health, naturally! Recipes and catalog. Riverside, California. 10 panels. Undated. Front and back. Each panel: 16 x 10 cm.

• **Summary:** The cover of this very informative catalog is dark brown and orange-brown on beige, with a rustic illustration of a man and a woman with two horses and a plow in front of a small barn. Loma Linda Foods—Since 1906.” Contents of the front panels: The Loma Linda story (history). Names of vegetarian products made by Loma Linda with a recipe for each: 1. Stew-Pac, Dinner Cuts, Tender Bits (canned). 2. Meatless Fried Chicken (frozen in carton). 3. Sandwich spread (canned). 4. Soybeans—Boston Style, Chili Beans, Green Soybeans (canned). 5. Savorex (plastic tub). 6. Tender Rounds (meatless meatballs) with Gravy. Fried Chicken with Gravy (canned). 7. Soyalac. i-soyalac (canned). 8. Meatless Breakfast Sausage (chub). 9. Redi-Burger. Vege-Burger (canned). Vita-Burger (Chunks or Regular; dry in box). 10. Nuteena (with peanuts and soy flour). Proteena (nut loaf). Vegelona (canned). 11. Gravy Quik (Meatless Gravy—Chicken Style, Brown, Mushroom, Onion, Smoky Bits, Country Style). Spaghetti Sauce Mix (foil pouches). 12. Long Links. Linketts. Big Franks. Little Links (canned). 13. Meatless Slices (Roast Beef, Bologna, Chicken, Turkey, Salami; frozen in carton). 14. Soyagen (soy beverage; Carob, All Purpose {liquid}, Carob, All Purpose, No Sucrose {dry in canister}).

The back is divided into 14 rectangles of various sizes, one for each family of products described on the front. A color photo and description accompanies each of the 46 products. Address: Riverside, California.

1144. Loma Linda Foods. 1979? Recipes from around the world to break the monotony of meat, meat, meat, meat, meat (Leaflet). 11503 Pierce St., Riverside, CA 92505. 5 panels each side. Each panel: 17.8 x 13 cm. Front and back. Undated,

• **Summary:** This glossy color leaflet shows how to use the following Loma Linda meatless products in recipes:

Proteena, Little Chunks, Sizzle Burgers, Linketts, Sizzle Franks, Chicken, Meatless Bologna, Redi-Burger / Rediburger, Dinner cuts, Nuteena, Fried Chicken. A large photo shows each prepared dish. A photo on the last panel shows each of these products in its package on a wooden table with flowers, utensils, and vegetables. All are canned, except for Meatless Bologna and Sizzle Burgers. The slogan running across the bottom of the first and last panel is: “The people who believe food should not only taste good—it should be good for you.” Address: Riverside, California.

1145. Mermin, Lora. 1979? Re: Okara. Letter to William Shurtleff at New-Age Foods Study Center. 2 p. Undated. Typed, with signature.

• **Summary:** “Debbie’s [Debra Bachmann’s] okaraburgers tested out to be: protein 7.5%, moisture 64.2%, ash 1.2%, fat 7.8%, fiber 1.4%, carbohydrate 17.9%.

Page 2 begins: “Dear Bill, here are some more okara recipes.” Unfortunately, the recipes have no names. Address: The Bountiful Bean Plant, Madison, Wisconsin.

1146. Shurtleff, William; Aoyagi, Akiko. 1980. Making money making tofu. *East West Journal*. Jan. p. 18-24.

• **Summary:** Describes how to start a tofu company. Contents: Introduction. Key resources: Soycrafters Association of North America, Bean Machines Inc., Soycrafters Apprenticeship Program, the book *Tofu and Soymilk Production*, list of all tofu shops and soy dairies in the West (free from New-Age Foods Study Center). First steps in getting started. Doing a market survey. Determining

the type of shop. Making other soyfoods (from tofu or soymilk). Running a retail outlet, soy deli, or restaurant. Obtaining a building and equipment. Putting it all together.

“There are now about 160 tofu shops and soy dairies in the United States (compared to 38,000 in Japan). More than 100 of these have opened during the past three years.” Illustrations (line drawings) show: Sangen-Ya tofu shop in Tokyo. A tofu burger—“Watch out Big Mac.” Photos show Shurtleff and Aoyagi. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1147. Kalish, Jon. 1980. Let ‘em eat tofu. *Soho Weekly News*. Feb. 6. p. 5.

• **Summary:** “This spring a dozen schools with heavy populations of Seventh-day Adventists, observant Jews and Muslims (all of whom follow strict dietary laws regarding meat) will be served meals prepared with tofu. Initially the experiment will involve about 2,000 kids. The New England Soy Dairy has already begun teaching school lunch personnel how to prepare tofu burgers, tofu fish cakes, tofu egg salad, and tofu Parmesan.” Tofu is also served in schools in Rochester, New York, and Santa Barbara, California.

1148. Giuca, Linda. 1980. It’s tofu: You can steam it, fry it, broil it, bake it, simmer it or eat it uncooked. *Hartford Courant (Connecticut)*. Feb. 13. p. 1A.

• **Summary:** The first thing people ask when they see a cake of tofu is “What do I do with it?” The bland-tasting, cream-colored soy food has a custardy consistency. “Tofu (pronounced toe-foo) has been a staple in Oriental diets for centuries; to the Chinese it is ‘meat without bones.’” Some Americans know tofu under other names such as “bean curd” or “soybean cake.”

From tofu you can make garlic salad dressing, tofu burgers, chocolate creme pie [like a tofu cheesecake], lasagna, batter-fried tofu with vegetables, or a frozen treat on a stick.

Maria Orefice, a vegetarian and owner of Garden of Eating on Jefferson St., features some tofu recipes on her menu. She learned how to make tofu at home when William Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu* (Autumn Press) stayed with her during a visit to Hartford in 1976. Now she teaches classes in making and cooking with tofu at her restaurant.

Photos show two views inside the New England Soy Dairy in Greenfield, Massachusetts, where about 20,000 pounds of tofu are made each week: (1) Many packages of tofu being cooled in ice water. (2) Soybeans being soaked in water in large vats. Contains four tofu recipes: Breaded tofu, Protein pops, Chocolate creme pie, and Chili con tofu. Address: Food editor.

1149. Leviton, Richard. 1980. Soycrafters Conference: The birthing of a new industry. Director’s report: Missed all the

meals. *Soycraft (Colrain, Massachusetts)* 1(2):16-23. Winter.

• **Summary:** A report on the Second Soycrafters Conference, held 26-29 July 1979 at Hampshire College, Amherst, Massachusetts. Over 50 workshops and lectures were presented on all phases of the soyfoods industry. “Miraculously, the \$19,000 conference broke even financially, and attracted significant national press in the following three months.”

The section titled “The view from the guests” (p. 20-23) contains brief statements (all positive) about the conference from the following attendees: Luke Lukoskie (Island Spring), Rebecca Uchida (Mu Tofu Shop), Michelle Ajamian (Amesville, Ohio), Shag Kiefer (Redbud Creek Tofu), Will Truslow (Jamaica Plain, Massachusetts), Dr. Joseph Rakosky (Rakosky Services, Melrose, Illinois), Marvel Huffman (Lecanto Tofu), Francine Watanabe (La Soyarie, Hull, Quebec, Canada), Dr. Charles Howes (Loma Linda Foods, Mt. Vernon, Ohio), Timothy Metzger (Dannon Milk Products, Long Island City, New York), Lee Cunningham (Wonder Life Corp., Des Moines, Iowa), Joseph Jaffer (Waymart, Pennsylvania), Chico Wagner (Yaupon Soyfoods), Dr. Malcolm Bourne, Frank Pilotte (Golden Key Farm, Grant Park, Illinois), David Patten (Brightsong Tofu, {Redwood Valley}, California), Patti Smith (Erewhon, Cambridge, Massachusetts), Larry Needleman (Bean Machines, Bodega, California), Peter Driscoll, Goodhart Foods (Petosky, Michigan), Bill Shurtleff (New-Age Foods Study Center), George Strayer (Agricultural Exports, Hudson, Iowa), David Blumberg (San Francisco, California), Dr. Keith Steinkraus (Cornell Univ., Ithaca, New York), Bob Bergwall (Nasoya Foods, Leominster, Massachusetts).

Photos show: (1) Overview of the conference registration hall incl. Richard Leviton talking with George Strayer. (2) Kathy Leviton adding finishing touches to large trays of tofu cheesecake. (3) A woman preparing scrambled tofu and fried soysage patties in the Hampshire College kitchens. (4) Members of Okita Enterprises and the Tennessee Farm: Charles Ishigawa, Robert Dolgin, Eddie Okita, and Michael Moorman. (5) Dr. Walter Wolf (Northern Regional Research Center, Peoria, Illinois). (6) Robert Rodale, Rodale Press, Emmaus, Pennsylvania. (7) Dr. Malcolm Bourne, Cornell University, Geneva, New York. (8) Michael Cohen, holding a baby and talking with Dr. Clifford Hesseltine.

Note: This is the earliest publication seen (Feb. 2003) that mentions Brightsong Tofu. Address: Colrain, Massachusetts.

1150. *Soycraft (Colrain, Massachusetts)*. 1980. Soyfoods deli update. 1(2):10. Winter.

• **Summary:** Discusses Yellow Bean Trading Co. (Detroit, Michigan), The Tofu Shop (Rochester, New York), and The Cow of China (Boulder, Colorado), and The Soy Plant Deli (Ann Arbor, Michigan).

“The Yellow Bean Trading Company of Detroit, Michigan, began business in September 1978, with a truck, garage, and cooler, as Timothy and Carol Huang delivered tofu, tempeh, soysage, and soymilk, made by the Ann Arbor Soy Plant, around the metropolitan area. But in March 1979, they opened a retail delicatessen because they ‘wanted to teach people about soyfoods by letting them taste them, which is better than reading about them in books.’ The deli retails groceries, juices, herbs, teas, dry grains, bulk tofu, bottled soymilk, nori rolls, tofu carob creme pies, and tofu salad. The Yellow Bean has seating for fourteen and they are planning to introduce hot food items, such as tofu spinach pies, tofu lasagna, rice with tempeh, and bean and vegetable dishes.” Though currently losing money, the deli grosses about \$600 each six-day week.

Greg Weaver of The Tofu Shop in Rochester reports that August 1979 was their biggest month all year; they grossed \$2,000/week. Autumn sales averaged about \$1,700/week. During the World Series in October they invented the Not Dog—a hot dog based on baked tofu.

Steve Fiering of the Soy Plant deli in Ann Arbor reports steady sales of about \$1,000 a week. Steve Demos at the Cow of China deli in Boulder reports that retail sales peaked in August at \$450/day. Now they range from \$1,700 to \$2,000/week.

1151. Boyd, Billy Ray. 1980. The Buddha-foods of China. *Asia Mail (The)*. March.

• **Summary:** In Taipei, Canton, or many other Chinese cities or towns you can find Buddhist vegetarian restaurants. The foods, which are displayed in the window, look like pressed duck, sweet-sour pork, chicken soup, fish, etc., and invite you to enter. Yet you will find that these delicacies contain no meats or dairy products. In the island province of Taiwan alone there are almost 100 such eating places, in almost every city and town. “Over the centuries monks and nuns have developed and refined special foods made from various soy products and from gluten.” These include tofu (beancurd), gluten meat, and *doupi* [2 Cc = 2 Chinese characters given] “(the tender, fleshy skim from soymilk).” They are high in protein and look and taste remarkably like a wide array of flesh foods. “These foods are manufactured by specialized businesses and sold in market stalls dealing with nothing else. Since the food is prepared in large quantities that same day, it is inexpensive.

Note. This is the earliest English-language document seen (Oct. 2012) that uses the word *doupi* or the terms “skim from soymilk” or “fleshy skim from soymilk” or “tender fleshy skim from soymilk” to refer to yuba.

“When ordering in a Buddhist restaurant, the simplest approach is to ask for the daily special or ‘guest food’ *kuh fahn*.”

Generally it is lay Buddhists, traveling clergy, and people concerned with health who eat at these restaurants.

“The strictly vegetarian regimen is adhered to in Buddhist temples as well. In west-central Taiwan, at the very top of Lion’s Head Mountain (3 Cc) sits the Buddhist temple Shih Yen Tung (3 Cc). The resident nuns and monks here are used to visitors, including occasional westerners, and one can spend the night. As usual in temples, a modest offering of ‘incense money’ is expected to cover the costs of providing food and lodging: a few dollars for an overnight stay, meals taken with the monks and nuns in the communal dining hall. The mountain itself, when not enshrouded in timeless mists, provides a panoramic view of the region. The food served is, of course, the traditional vegetarian kind, unlike at many other temples—on the mountain and elsewhere—of mixed Buddhist and Taoist allegiance.

“Though Buddhism has in many ways been discouraged in Maoist China, the vegetarian tradition there lives on. Two famous temples where resident monks and nuns still serve elaborate vegetarian meals to pilgrims and visitors are T’ien P’ing Shan (3 Cc) in the suburbs of Soochow, and Ling Yin Ssu (3 Cc) in Hangchow. The latter city is noted for being one of the most beautiful in all China, a pre-Liberation favorite of resident foreigners.

“Chinese Buddhist restaurants can be found in several cities in southeast Asia as well, including Hong Kong, Kuala Lumpur, and Singapore. English will often appear on the menu, and/or be spoken by some of the waitpersons. The Chinese Buddhist gustatory tradition did not, unfortunately, survive the cultural transplant to the United States, though recently some non-Chinese have opened a restaurant in San Francisco where one can begin—just begin—to discover the richness and diversity of the traditional Buddhist foods.”

The author, a freelance writer and vegetarian cook, chanced upon and subsequently researched the Chinese Buddhist restaurants during a 4½-year odyssey in Asia. Address: Box 872, Santa Cruz, California.

1152. Dawson Food Ingredients. 1980. Anaprime: Meat analog products made from spun soy protein. Taste can’t tell... the only difference you’ll notice between Anaprime and meat is the low cost and convenience (Brochure). 7901 Flying Cloud Dr., Minneapolis, MN 55344. 4 p. Catalog. 28 cm.

• **Summary:** On the cover of this color glossy brochure are eight prepared dishes, each containing cubes of Anaprime. These meatlike products are made from spun soy protein fibers. They are available in three flavors, each in frozen diced pieces: beef, chicken, or ham.

Inserted into this brochure are three inserts: (1) Step-up to Anaprime: The key difference between Anaprime and textured vegetable protein is spun protein fibrils (color, one sided). (2) Comparison of approximate composition of Anaprime vegetable protein frozen products and their animal counterpart (per 100 grams edible portion): Ham (3 p.). Chicken (3 p.). Beef (3 p.). Address: Minneapolis,

Minnesota.

1153. Shurtleff, William; Aoyagi, Akiko. 1980. Tempeh production: The book of tempeh, volume II. A craft and technical manual. Lafayette, California: New-Age Foods Study Center (Renamed Soyfoods Center in Sept. 1980). 176 p. Illust. by Akiko Aoyagi Shurtleff. Index. March. 28 cm. [46 ref]

• **Summary:** Contents: Preface. 1. How to start a tempeh shop. 2. Setting up shop: Community or kitchen shop, fire cooker shop, steam cooker plant, modern factory, tropical village shop, tropical caldron plant. 3. Ingredients. 4. Principles of tempeh production. 5. Making tempeh in North America. 6. Making tempeh in Indonesia. 7. Making specialty tempehs: Introduction, specialty soy tempehs, other legume tempehs, grain (or seed) & soy tempehs, grain tempehs, okara tempeh, soy (or grain) & okara tempehs. 8. Quantity tempeh recipes & the soy deli. 9. Making tempeh starter. Appendices: A. Resources: People and institutions connected with tempeh production. B. Tempeh shops in the West. C. Measures, weights & equivalents. Bibliography. New-Age Foods study center. D. Index.

Note 1. This is the earliest known English-language book devoted entirely to tempeh production.

Note 2. On page 10 we read: "For more information about the natural low-tech soyfoods industry and its

publication *Soyfoods*, contact the Soycrafters Association of North America,..." This is the earliest English-language document seen (Feb. 2013) that contains the term "low-tech" (regardless of hyphenation) in connection with soy, or the term "low-tech soyfoods." Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1154. Shurtleff, William; Aoyagi, Akiko. 1980. Soyfoods: The Americanization of tofu. *Vegetarian Times* No. 36. March. p. 54-55. [3 ref]

• **Summary:** An introduction to tofu in America followed by 6 recipes adapted from *The Book of Tofu*.

"Westerners are doing things with tofu that the Japanese never dreamed of: "Tofu burgers," "tofu cheesecake," and soybean ice cream are all as American as apple pie. In the immortal words of Andy Schecter, of the Northern Soy tofu and tempeh shop in Rochester, New York: 'We can make tofu and soymilk products that rival even the best junk foods in America!' What more could anyone ask for?" Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1155. Schmit, Matthew. 1980. Tofu-Helper: New directions in packaging and marketing for the soy industry, 1980. Bayside, California. 5 p. April 12. Unpublished manuscript. 28 cm.

• **Summary:** A proposal for a new product developed by Matthew Schmit. Five pages of black and white photocopies: (1) Title page. Handwritten. A rectangular photo in the center shows 3 prototypes of the product and 3 tubs of tofu atop a wooden barrel, outdoors. (2) Statement of original idea (handwritten): Name: Tofu-Helper portion pouch. Description. Purpose. Adaptation. Sketch (blank). Signed: Matthew Schmit, Date: 4/12/80.

(3) Tofu-Helper: Getting off the ground: An example of the steps undertaken by a tofu company beginning to introduce Tofu-Helper sauces into their sales region. "Choose a name for the campaign, such as Tofu Internationale, and sauces such as... Tofu turkey and dressing.

(4) Letter to Mr. Jeno Paulucci, 535 Lake Avenue South, Duluth, Minnesota 55802. From Matthew Schmit, Bayside, California. 1 page typewritten, no letterhead, with signature. Explains the product to Mr. Paolucci and suggests that he make and package it. New foods, "primarily tofu, tempeh, and soysage, have burst upon the American natural foods market in the last two and a half years. I have worked with these now items since September 1977, and have followed closely the 'new soyfoods' industry."

(5) Reply from Jeno F. Paolucci, chairman. May 29. Typed on letterhead with signature. "I appreciate your writing me in this connection. However, I just don't feel we would have any interest in going into soyfoods at least at the present time."

Note 1. Jeno was founder of Chun King Corp. and

Jeno's Pizza. Matthew's father, Justin, was the company's executive vice president for years in Duluth, Minnesota, and later engineer.

Note 2. Matthew never commercialized this product. Address: Rt. 1, Box 484, Bayside, California 95524. Phone: 707-443-9054.

1156. Dunn, Carole. 1980. Soya beans are good for human 'beans.' *Chronicle, Tuesday Magazine (Eumundi, Australia)*. April 15. p. 11.

• **Summary:** Cyril and Elly Cain, originally from the USA but now living in Imbil, are selling soyfoods at the Saturday morning Eumundi market, including soymilk drinks, smoothies, plain tofu, flavored tofu dips and spreads, tofu sandwiches and burgers, Soysage rolls, ice bean (soy ice cream), and a variety of cakes and pies such as tofu cheesecake. A photo shows Elly smiling as she makes a sale at a tofu & soymilk stall; Cyril appears in the background.

1157. Belt, Becky; Jelep, Kathy. 1980. Tofu takes many forms. *Dispatch (Columbus, Ohio)*. April 23.

• **Summary:** Bill Lutz and Mick Vissman, two entrepreneurs in their 20s, recently started Rainstar Foods, which distributes tofu and other natural foods. They also started the Hip Pocket Tofu Deli [on 1 March 1980]; its popular items include: Chili with tofu, Eggless "egg salad," Saltimbocca (marinated tofu cuts), Tofu burger, Guacamole, and Tofu onion-garlic dips. Soy foods like soymilk, soysage, and seitan roast are also on the menu. For dessert there is tofu cheesecake and banana cream pie. All recipes used at the deli were developed by chef Dennis Prutsman, who cooked with tofu for 15 years in San Francisco, California. No recipes are given.

1158. Granose Foods Ltd. 1980. Granose—Britain's leading health foods: Product information. Stanborough Park, Watford, Herts., WD2 6JR, England. 5 p. April. Unpublished typescript.

• **Summary:** The name of each product is given, usually with a basic description and ingredients. Product categories include: Breakfast cereals. Protein foods—soya based: Soya beans in tomato sauce, Goulash, Curry sauce, Bolognese sauce, Chicken flavoured pie filling, Chicken flavoured savoury pudding, Ravioli, Cannelloni, Soyapro wieners, Soyapro slices, Beef like, Chicken like, Ham like. Dried foods—soya based: Vegex (Chunks and Mince), Sausfry, Granogen, Granolac. Dried foods—nut based: Rissolnut (with soya nuts). Address: Watford, Hertfordshire (Herts.), England.

1159. **Product Name:** Soysage.

**Manufacturer's Name:** Bountiful Bean Plant.

**Manufacturer's Address:** 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.

**Date of Introduction:** 1980 May.

**Ingredients:** Okara (soybean pulp), soybeans, buckwheat flour, oats, nutritional yeast, tamari, oil, malt syrup, garlic powder, allspice, ginger, fennel, oregano, sage, black pepper, cayenne pepper.

**Wt/Vol., Packaging, Price:** Four 3-lb. blocks per case, \$1.28/lb wholesale.

**How Stored:** Refrigerated or frozen.

**New Product—Documentation:** Bountiful Bean Plant. 1980. Soysage News! "Soysage is about ready to be produced for distribution to your store... The Bountiful Beaners." Suggests that stores cut each block into 12-oz. pieces.

1160. *Food Engineering*. 1980. Meat analog from "spun" protein: Soy protein is spun into fibers, then formed into analogs which have the look, taste and texture of meat. 52(5):32. May.

• **Summary:** "The basic technology that General Mills developed to produce spun soy protein is making a comeback. Dawson Mills, which purchased the technology and equipment from General Mills about 5 years ago, has just announced a new line of meat analogs under the tradename Anaprime.

"Basically, the technology is the same. 'But we did improve upon the flavor of the analogs,' reports Marty Loula, Marketing Manager for Dawson Food Ingredients (subsidiary for Dawson Mills). 'In addition,' says Loula, 'we've added a roast beef analog, which wasn't available before. And we're in the final stages of developing a pepperoni analog.' The basic analogs—beef, chicken and ham—are being produced by Dawson in its new facility in Minneapolis [Minnesota]."

1161. Nupro Foods. 1980. Nupro Soysage / Pâté. 1227 City Park Ave., Ft. Collins, CO 80521. 1 p. Single sided. Handwritten.

• **Summary:** This Soysage comes in two types: Spicy and mild. Ingredients for the spicy: 4 cups okara. 1½ cups whole wheat flour. 1½ cups wheat germ. 1 cup nutritional yeast. ¾ cup soymilk. ½ cup oil. ¼ cup shoyu (soy sauce). 1 tablespoon oregano. 1 tablespoon mustard (wet). 1 tablespoon garlic powder. 2 teaspoons allspice. 1 teaspoon kelp powder. 1 teaspoon cayenne (pepper). 1½ teaspoons fennel. 1½ teaspoons sage.

Mix and steam or bake.

For the mild version, substitute the following amounts of herbs: 2 teaspoons oregano. 2 teaspoons mustard (wet). 2 teaspoons garlic powder. 1½ teaspoons allspice. 1½ teaspoons kelp powder. ½ teaspoon cayenne (pepper). 1 teaspoon fennel. 1 teaspoon sage. Address: Fort Collins, Colorado.

1162. Robertson, Valerie. 1980. Early history of Soyfoods Unlimited, Inc.—a large, pioneering tempeh making company

in San Leandro, California.

• **Summary:** In Sept. 2011 Bill Shurtleff asked Valerie Robertson, with help from John and Gary Robertson, to reach back 30 years and (with the help of dated documents from those days) to try to reconstruct the origins of Soyfoods Unlimited—a pioneer tempeh maker in California. As Valerie recalls: “I think I first met you and Akiko at Eco House in Walnut Creek, run by Mark Maloney (later Mark Westwind); we kept our bees there and I met you one day when all three of us happened to be there. Then I saw an ad in the *Contra Costa Times* from Soyfoods Center asking for volunteers. I called and started doing work for you both, first doing office work—filing, folding pamphlets and then testing recipes and eating—tempeh!!! You were both very interested in tempeh because your *Book of Tempeh* had recently been published.

“Gary recalls that we were all at your house and you asked Gary (who was a contractor) and John (who was the Biomedical Director at John Muir Medical Center)—‘What do you want to do? Are you happy with what you are doing now or would you maybe like to do something else?’ You kind of put a bug in their ear. We talked about doing something with tempeh and we started making and eating tempeh.

“We made our own tempeh at our home in Walnut Creek (see photo) using an incubator from John Muir Hospital. It was not hard to make and turned out like magic. Starting in 1981 we sold the tempeh we made at home under the label Vasilias’s Homemade Soy Tempeh. My ancestors are Greek and ‘Vasilias’ is the Greek word for Valerie. Akiko designed the ‘Vasilias’s’ label and we had it printed up. I taught tempeh and tofu cooking classes at a health food store in nearby Concord called The Harvest House. Actually, Akiko came to one of my cooking classes with me as my ‘helper.’ So I had an outlet via Harvest House and classes to sell tempeh.

“We started to get really interested in starting a tempeh company in the San Francisco Bay Area. Above all it was the tempeh itself that convinced us to do it. 1. We *loved* tempeh. 2. We made excellent tempeh at home. 3. We wholeheartedly believed it was an excellent protein food for vegetarians and all others. We believed in tempeh. It tasted so good, and the texture was amazing. It sold itself (proven during countless demos in stores). We had the desire and ambition to give it a try with a lot of sweat equity (eventually drilling out the concrete for drains, building incubation rooms, setting up a lab etc.).

“But back to the story: You and Akiko were about to leave on a speaking tour, which you called “1980 Soyfoods America Tour,” to promote your books and tempeh, and to attend the University of Illinois soyfoods course and the 3rd annual Soyfoods Association of North American conference at the University of Illinois in Champaign-Urbana, Illinois. You both wanted to serve your favorite tempeh recipe during intermission to everyone at each talk. So Akiko asked me to help her make Tempeh Cacciatore (chunks of tempeh in a seasoned tomato sauce) and to “can” these in quart Mason

jars. We had a ball together in your tiny kitchen and ended up canning 110 quart jars.

“On May 5, 1980, you and Akiko left Lafayette, California, on your tour, with your big white Dodge van loaded with books, canned tempeh, etc. You were planning to be gone for 3 months. At about this time we decided that we definitely wanted to start a company making tempeh. I think you (Bill) came up with the name, ‘Soyfoods Unlimited.’ It ended up being a corporation, incorporated in Nov. 1980 as Soyfoods Unlimited, Inc. The ‘Inc.’ part was costly; we had to paint a lawyer’s house in Lafayette in exchange for the Inc.! It also (as you know) protected us as individuals.

“I decided to fly to Illinois to attend the SANA conference to learn as much as I could about making tempeh and the new soyfoods movement; John and Gary were busy with their work and could not go. On July 9-13, 1980, the Third Annual SANA Conference was held at the University of Illinois. It was a big success in every way. About 270-285 people from all over the world attended. I met Dr. Clifford Hesselstine and talked with him about tempeh and our ideas. He was very helpful and encouraging.

“On Aug. 3, 1980, you and Akiko returned to Lafayette from Illinois and your tour. You had given 27 programs and traveled 9,000 miles. At each program you served your favorite tofu and your favorite tempeh recipe, then asked for a show of hands as to which one people liked best—without exception tempeh was the favorite by a 2 to 1 ratio. We were ready to go.

“In about Sept. 1980 we signed the lease on a large building suitable for food processing in San Leandro, California. The first 3 months were rent-free. We knew we would need plenty of money to start the kind of company we envisioned. Gary invested \$100,000 cash and John put in more than \$35,000 by taking a second mortgage on our home on San Miguel Drive in Walnut Creek. The money started to flow out and our sweat equity began to flow in—John with his engineering mind and logic; Gary with his construction skills, and our knowledge of recipe development. We tested many recipes at home first. Murphy’s Law was in full force, as every step in the process took much longer than expected.

“On Oct. 3, Akiko finished designing for us a new Soyfoods Unlimited letterhead, with promotional materials and even aprons for demos. The logo was like a soybean leaf with three leaves, one for each of the three of us (see photo).

“On Oct. 16, 1980, we finished a new 8-panel brochure titled “What is Tempeh?”—a joint venture of the Robertsons and Shurtleffs. We both had the rights to use it as we wished.

“Finally, on Feb. 15, 1981, the three of us begin making tempeh in our state-of-the-art \$100,000 plant in San Leandro, California. The efficient, 1,850-square-foot operation, had a capacity of 10,000 pounds a week.

A photo shows Valerie seated near some tempeh on a table at her home in Walnut Creek, California. Valerie and John were married. John was Gary’s older brother. All three

lived in the same large home in Walnut Creek.

“Later that year, on July 8-12, 1981, the 4th Annual Soycrafters Conference was held at Colorado State University, Fort Collins, Colorado. I drove out with you and Akiko and Kazuko Aoyagi and Maria-Elena Nava of Mexico, stopping overnight at your cabin at Lake Tahoe and sleeping out one night in a “snake farm” in the desert.

“Our company did well, launched many delicious tempeh products, and introduced many innovations.

Note: They were the first company to do dry dehulling and hull removal from their soybeans prior to cooking; for this they used a simple and ingenious mill and vacuum cleaner system designed by the Department of Food Science at the University of Illinois but modified and enlarged by the Robertsons. They started selling frozen soy tempeh, but after 2-3 months were selling 90% of their tempeh refrigerated, after steaming. In Sept. 1981 they introduced America’s first nonfried tempeh burger, which they vacuum packed. In Jan. 1982 they started air-freighting 1,800 pounds a month of their tempeh burgers to the East Coast. In June 1983 Lonnie “Lon” Stromnes of Namaste Marketing began to work as their full-time marketing director.

“White Wave was a major tempeh maker at that time. In 1986 we met Steve Demos (founder and CEO of White Wave) at Spenger’s restaurant in Berkeley and asked him if he would be interested in buying our company. White Wave acquired Soyfoods Unlimited, Inc. on Dec. 1, 1986 and each of the three of us Robertsons ended up owning 1% of White Wave.

“By acquiring Soyfoods Unlimited, White Wave became the largest manufacturer of tempeh in the United States. And he got our greatly superior process for making tempeh, the ability to make his own tempeh starter, our excellent recipes, our list of our distributors, a much greater presence for White Wave products on the West Coast, and much more. He also took on our debt! He thanked us for offering our business and our secrets to him instead of folding up. He is Greek, just like me.

Update (Sept. 2011): “On May 7, 2002, Dean Foods acquired the remaining 64% of White Wave that it did not already own. At that point we sold our shares of White Wave stock to Dean Foods. Our stocks split and each share became 9,860 shares. We were each bought out at \$145.00 a share. Not bad!

“The home I am living in today on the big island of Hawaii was paid for by the sale of the White Wave stock. I only wish I made a deal for endless tempeh!! I love tempeh!”

“I still eat tempeh all the time and still love it. I buy White Wave tempeh out here in Hawaii. I think Turtle Island also has a great white tempeh. I’m so glad it is available here in Hawaii at all the health food stores.”

1163. Blix, Glen. 1980. Dr. Harry Miller and his International Nutrition Laboratory (Interview). *SoyaScan*

*Notes.* June 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Shurtleff and Aoyagi drove their large white Dodge van to visit the Loma Linda Foods plant in Mt. Vernon, Ohio. As they were welcomed by Glen Blix (super guy) and invited to be seated at his desk, the first thing they noticed with a sign, about 15 inches long and triangular in cross section, which stated clearly: “Do unto others as you would have them do unto you.” Wow!

History: Dr. Harry W. Miller was born north of Dayton, Ohio. He returned to the USA from China after the Japanese occupation of 1937, to Mount Vernon, a lovely remote rural area, where he had attended secondary school (Adventist). While building his soy dairy building, he taught at the local secondary school; also bought a local hospital with his brother and served as a physician. He lived in the big white house by the plant.

He bought a 120-acre farm for \$7,000. He got free bricks from a demolished schoolhouse. He and his son collected these, hired academy students to clean the bricks, then he and his son built the original building for the soy dairy about 1937-38. It was called the International Nutrition Laboratory.

Here he set up the soymilk process he had developed in China. He also set up a plant to can fresh green soybeans; this paid his way. And he developed a gluten meat analog, Miller’s Cutlets, a gluten patty with flavorings added, based on research done by Dr. John Harvey Kellogg. It contained no soy; he later sold it to Worthington Foods. Dr. Kellogg was Dr. Miller’s professor in a small class at Battle Creek Sanitarium; Dr. Kellogg taught the class lots about nutrition. All students in the class lived past the age of 80. Miller lived to 97½. In 1951 Miller sold his soy dairy at Mt. Vernon, Ohio, to Loma Linda Foods and went back to Hong Kong. He returned to America in 1972.

When he sold the plant he felt he could not sell the soymilk process, which he felt had been taught to him directly by God, who spoke to him and told him to try certain ideas that had eluded him. Thus he gave this process to the Adventist church, but sold the building to Loma Linda Foods and loaned them the money to buy it. They paid him in installments and he used this income to set up the International Nutrition Research Foundation in 1951.

One product he developed and felt he perfected here was *Acidophilus* soymilk. but it couldn’t be canned or the organism would be killed. Oliver Miller, no relation to Harry, is a top director in Loma Linda; he is a poor correspondent, so best to phone him.

Loma Linda Foods started in 1906 in Southern Calif 20 miles from Riverside. Kellogg in the early days had a philosophical / ideological split with the Adventist church and took back for himself the Battle Creek Sanitarium, whole wheat bread bakery, and breakfast cereal operation/plant (no soyfoods). The Loma Linda Riverside plant was built about

1936. It started making meat analogs, pressed wheat flakes, rusket biscuits. Now only two Adventist plants in the world make soymilk. Ohio and Saniku in Japan. The method now used is an improved variation on the Cornell method [boiling water grind]. The Ohio plant used the method patented by Miles Laboratories from 1968-69. Blix thinks that the Illinois whole-bean method has poor mouthfeel and problems with flatulence. Their claims were overexaggerated. Dr. Miller found / felt that the highest percentage of oligosaccharides were located just under the soybean hull. The present hot soak leaches them out. A high fiber diet may cause more gas than usual, so maybe some flatulence in fiber itself explains why whole soybeans cause more gas than soymilk. Most now use the word “lipoxydase” rather than lipoxygenase. More comments on Illinois whole-bean method. Chalky mouthfeel, corrosive on the homogenizer. Best to use stellite for homogenizer valve seats. At Loma Linda they also homogenize whole beans, then extract soymilk, and rehomogenize the soymilk etc. Loma Linda sells two types of soymilk products. Soyalac is for infants and Soyagen is for adults. About 75-80% of their sales are the infant Soyalac, so flavor is not so crucial. Nutritional properties are more important. Concerning protein quality: Rats have a large demand for sulfur-containing amino acids since they have lots of hair, for which these amino acids are largely used. Commercial cystine is hydrolyzed hair protein, so its not vegetarian.

Loma Linda started making isolate soymilk out of pressure from salesmen since all other infant formula makers have an isolate soymilk. They feel it is inferior to their regular Soyalac since it is less natural (has less all-natural ingredients) and has poorer flavor. But it is lighter colored, It is acceptable to Feingold hyperactive kids since it contains no additives, and it gives lower flatulence since it contains no carbohydrates (but this is not a significant problem), and the stools do not smell bad, i.e. different from the stools from animal milks. Loma Linda non-isolate soymilk sells best by 2:1 among the Loma Linda products. LLF makes 8 basic soymilks. (1) i-soyalac is the isolate and Soyalac is the natural. Both come in concentrate, ready to feed, and powdered. Soyagen, the adult preparation, comes in powdered, with either all purpose or no cane sugar (it uses corn syrup as a sweetener), Also carob. All Soyagen brands are powdered. The number 1 best seller is Soyalac concentrate, #2 is isolate concentrated, #3 is ready to feed Soyalac, #4 is powdered Soyalac. Their only competitor is Worthington Soyamel, sold powdered in Pure Pak cartons in health food stores.

Dorothea Van Gundy Jones died in 1979.

Soymilk regulatory problems: Lots of hassle from FDA. (1) Cook time in cans. (2) waste disposal.

Do old soybeans cause low protein extractability? They feel extractability is more directly affected by the hardness or pH of the water. Alkaline pH gives good extractability;

that’s why some people cook beans with baking soda. In late summer as the water table falls, the pH rises to pH = 8 in late summer, then drops to 6.3 in the spring.

Loma Linda soymilk has 65 employees. They grow much of their own beans on 500 acres of nearby land. They use field-type soybeans. Best is Williams, which has good flavor and extractability. Beeson and Amsoy are also good. Beans are not strictly organically grown but use less and milder herbicides so herbicides residues are near the lower limits of detectability. They use 30,000 bu per year = 900 tons/yr of dry beans. Beans are stored in silos by the plant and dried there to 12% moisture. If lower moisture, they crack and split. (Honey is not acceptable in baby formulae). Botulism problem; also it gets very dark when sterilized in cans. Babies can’t digest starch. So LLF uses corn and beet sugars.

The process: Weigh beans in a dry batch, wash, and run over stainless steel “stone pans” that look like a sloping scrub board to pick up metal and stones. Float off stems and sticks. Spray wash beans over a screen. Run into a large Rietz screw cooker (open top, 3 feet diameter by 20 feet long) and blanch beans at a little above 80°C for about 1 hour to draw off oligosaccharides, deactivate lipoxydase, and hydrate to double weight. This is a key innovation in the process. Drain. Mix with hot water (but no steam) and run into a Rietz disintegrator to do a hot grind at over 80°C. Repump some of the slurry back into the hopper of the Rietz as the hot “water” for the hot grind. When the batch has been ground, do a semi-high-temperature short-time cook for sterilization in a pressure cooker; this prevents subsequent bacterial growth in the holding vats. Then run through a high pressure Gaulin homogenizer at 5,000 psi to get high soymilk extractability; it works like a colloid mill to break up the cooked beans to particles of 20 microns diameter. This is essential if you do a hot pre-soak. Continued. Address: General Manager, Loma Linda Foods, Mt. Vernon, Ohio.

1164. Blix, Glen. 1980. Dr. Harry Miller and his International Nutrition Laboratory (Interview) (Continued, Document part II). *SoyaScan Notes*. June 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Then run through a Scharppel (best maker) horizontal axis decanter centrifuge, specially made for soymilk. The okara (they call them “soy fines”) have “tenacious water binding capacity.” Used in vegeburgers almost causing them to gel. Some soy fines (okara) are spray dried but this is expensive. Dehulling has been found to make soymilk with a worse flavor so don’t dehull. In a “formulation tank” mix soymilk, oil, syrup, sugar, and micronutrients, and dairy flavoring. Set the amount for each batch. Soymilk contains 6% sugar on a ready to feed basis. Now rehomogenize in 2 stages at 2,500 pounds each, run into a vertical vacuum pan evaporator to concentrate the soymilk to double strength (26-22% solids) while also

removing some volatiles. Cool in a plate-cooler to 35°F, then run into a refrigerated storage tank that holds 10 batches. All milk in one such tank is marked with one code. Refrigerate in the tank at 38°F. Try to can or spray dry within 12 hours, usually immediately.

Soy fines (okara) contain 20% protein in a dry basis. Wanted to market as a bran to the bakery industry; also gives soy protein complementarity.

The canner is a continuous retort. Sterilize for 12 minutes at 257°F, especially for botulism. Then run thru a continuous cooler, for 8 minutes to cool to 100°F. Discharge and pack in cartons. See that there is a vacuum in each can so less rancidity. Check for leaks. The milk has a 2 year shelf life. Some vitamin loss takes place during storage, as well as some separation of oil, and some protein coagulation. To spray dry, spray in the concentrated form into a chamber 50 feet high. The soymilk falls through air whose maximum temperature is 400°F for 2-3 seconds dwell time. The discharge temperature, maximum for the product, is 200°F. Then can and label.

Daily dry soybean usage at this plant is 5.7 tons. They work 4 days a week. The equipment in the plant is worth \$3 million plus \$1.5 million for the building.

Evaluation of products: Fresh Soyalac is best of all; 3.8% fat and 2.1% protein. Reconstituted powdered Soyalac is also excellent when it's new. Powdered Soyagen is salty and has a cereallike, haylike flavor. Not as good. Corn syrup sweetener. All powdered soymilk is best if mixed and allowed to stand overnight. Diluted canned concentrate is very close to the fresh Soyalac but slightly inferior from heat of sterilization. Powdered Soyagen is not so hot (see above). 2.6% fat but only about 1/3 as much oil added per vat-batch.

Basically the product is sold by "detailing" = educating doctors who recommend it to the 2% of infants who are allergic to cow's milk. Methionine has a bad, slightly fishy aroma. Of the infant formula market, 75% is dairy based, 25% is soy based. About 25-30% of all US mothers are now breastfeeding their babies—a big recent increase. Soyalac is also used as a weaning food after 3 months breastfeeding, for 6 more months. Some infants are allergic to lactose in mother's milk, or use Soyalac is used when the mother smokes, drinks, etc. and should not breast feed.

The chemicals in Loma Linda soymilk are there for nutrient fortification. They try to use only "natural" sources but the chemical methionine is preferred to animal based methionine.

In Worthington analogs the chemicals serve various functions: functional, organoleptic, caramel coloring, and nutritional (equivalency of product being replaced).

Note: if a coloring or flavoring is added, it must be called an "artificial" coloring or flavoring, even if it is natural ("natural artificial coloring"). Loma Linda is uncomfortable with mono- and diglycerides. In MSG, the problem may be with the sodium, especially in the case of headaches. Glen

Blix and most people at Worthington use MSG discreetly at their homes. Address: General Manager, Loma Linda Foods, Mt. Vernon, Ohio.

1165. Tufford, Carolyn. 1980. Versatile vegetable assumes many uses and may be the answer to world hunger. *Herald-Tribune (Bloomington, Indiana)*. June 11.

• **Summary:** A summary of a speech which William Shurtleff and Akiko Aoyagi presented about soybeans and soyfoods, especially tempeh and tofu, to about 100 persons of all ages at the Whittenburger Auditorium in Bloomington. Simply Soyfoods, a Bloomington-based company, provided recipes for tofu burgers and tofu onion dip. Address: Asst. Lifestyle Editor.

1166. *Consumer Reports*. 1980. Vegetarian meats. 45(6):362-65. June.

• **Summary:** Many meatlike commercial soy products are shown or described including Worthington Vegetarian Fillets (which got the highest entree ratings), Worthington FriChik, Worthington Vegetable Skallops, Loma Linda Foods Vegetarian, Hain Soy Oil, Cedarlake Meatless Sloppy Joe. Of the meat analogs, most were quite low in iron and protein, and high in sodium, compared with red meat. A table shows analyses of ten products in terms of their cost per package and per serving, serving size, protein PER, nutritional composition per serving, and sensory comments.

Samples of meatlike products showed considerable variation in nutritional labeling, the addition of some food additives in some products, and little taste correlation with meat.

1167. **Product Name:** Granose Sausalatas (Meatless Sausages Canned in Brine) [Plain, or Smoked].

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1980 June.

**Ingredients:** 1980: Water, wheat protein, rusk, peanuts, soya flour, vegetable fat, onion, hydrolised vegetable protein, spices, herbs, oat flour, textured soya protein comprising defatted soya flour, niacin, calcium pantothenate, iron, vitamins B-6, B-2 and B-12, salt, yeast, soy isolate.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Manufacturer's catalog. 1980. April. Shurtleff. 1981. "Delicious when fried, grilled, or baked."

Form filled out and Label sent by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1948. It is still on the market. Label. 1990. 8.5 by 4 inches. Brown, beige, and black on tan. Color photo of three sausages on a dish with vegetables. "Vegetable protein sausages containing no animal products whatsoever.

Delicious when grilled, baked or fried. Ingredients (1990): Water, wheat protein, rusk, peanuts, soya flour, vegetable shortening, seasoning (comprising dehydrated onion, hydrolysed vegetable protein, spices and herbs), oat flour, textured soya protein (comprising de-fatted soya, niacin, calcium, pantothenate, iron, vitamin B-6, B-2 and B-12), salt, yeast, soy isolate." Address is now Newport Pagnell, Bucks.

Color photo of package in *Linda McCartney's Home Cooking*. 1990. p. 18. The label is black, brown, and white on tan.

Note: This product was first introduced in 1948, but did not contain textured soy protein at that time.

**1168. Product Name:** Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Light Foods Inc.

**Manufacturer's Address:** 6144 Bartmer, St. Louis, MO 63133.

**Date of Introduction:** 1980 June.

**Ingredients:** Okara (Soypulp), whole wheat, flour, soymilk, nutritional yeast, wheat germ, safflower oil, bulghur wheat, soy grits, shoyu, honey, barley malt, sesame seeds, herbs & spices.

**Wt/Vol., Packaging, Price:** 20 oz (1 lb 4 oz), 567 gm.

**How Stored:** Refrigerated.

**Nutrition:** Per 2 oz.: Calories 147, protein 6.3 gm, carbohydrate 16.5 gm, fat 6.1 gm, sodium 292 mg.

**New Product–Documentation:** Label. 1980. June. 3 inches square. Self adhesive. Purple on white. Illustration of a winged unicorn jumping across a stream in front of a rising or setting sun. "No preservatives."

Barbara G. Ostmann. 1980. Post-Dispatch (St. Louis, Missouri). Oct. 29. p. 1E, 4E. "Time for tofu." Bob Davis' company Light Foods Inc. makes Soysage (soy "sausage").

Label. 1981, undated. 3 inches square. Self adhesive. Purple on white. Illustration of a winged unicorn rearing on its hind legs jumping across a stream in front of the rising or setting sun. "No preservatives. Please refrigerate." The size is now 22 oz (567 gm) plastic wrapped.

Leviton. 1981. Soyfoods. Summer. p. 42. "They produce up to 300 pounds weekly." 1983. Winter. p. 48. Gives name now as Light Soysage and ingredients as: Okara, bulghur wheat, whole wheat flour, wheat germ, nutritional yeast, sesame seeds, shoyu, oil, mustard, soymilk, and 10 different seasonings.

1169. Mintz's Buffet. 1980. June. New soyfoods restaurant or deli. 1040 Third Ave., New York, NY 10021.

• **Summary:** Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity: Tofu ice cream, tofu spinach egg rolls, tofu burgers, tofu quiches, tofu vegetable salads, tofu (cheese) non-dairy burger, tofu rugalach, steamed broccoli with tofu sauce, baked fish with tofu cheese sauce, veg. casserole pies with tofu, spinach tofu pancakes. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 54-55. Started by David & Ethyl Mintz. In 1962 David and Ethyl Mintz purchased a store at 1040 Third Ave. and established Mintz's Caterer's Inc., mostly over the counter, take-home kosher foods with some catering. In 1973 they renamed the place Mintz's Buffet. In about 1979-80 they first started using tofu in the kosher menu.

Note: Mintz's Buffet is located just east of the southeast corner of Central Park in the borough of Manhattan, New York City. Address: Manhattan, New York City, New York.

1170. Shurtleff, William; Aoyagi, Akiko. 1980. Kicking the meat habit with soyfoods. *Vegetarian Times* No. 38. June. p. 30-31.

• **Summary:** Contains recipes for: Tofu steak. Tofu burgers. Teriyaki tofu. Tofu cutlets. Tofu Italian meatballs. Tempeh burger. Sloppy Joe tempeh. Tofu jerky (marinated in teriyaki sauce, then baked). Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

1171. Leviton, Richard. 1980. Soyfoods in Toronto. *Soyfoods* 1(3):14-19. Summer.

• **Summary:** Discusses Vital Eat, Pyung Hwa, Soy City Foods, and Victor Food Products. Victor Food products (102

Hymus Rd., Scarborough, Ontario, Canada M1L 2C9) was founded and is owned and managed by Mr. Stephen Yu. In the 3,600 square foot tofu factory, 13 workers (mostly Vietnamese refugees) produce 1,900 lb/day of tofu, 750 gallons/week of Nutrisoya soymilk, and about 200 quarts/day of kinugoshi soybean pudding. Mr. Yu, who was born in China and educated in California, came to Toronto in 1977 to make an initial market survey. He opened his plant in Feb. 1978, with an initial production of 900 lb/day. Mr. Yu now has accounts in all major Toronto supermarket chains. He reaches about 40% of the Oriental market and about 40% of the overall soyfoods market. He speaks fluent English and is “far more forward looking and market conscious than his Oriental competitors in the Toronto area.” His production process and equipment are described in detail. Last summer he appeared on a 10-minute television feature that depicted the story of soybeans from field to shop to table. This was followed, in Jan. 1980, by a major article which profiled his company in the *Toronto Star*. This publicity ushered his tofu into the three big supermarket chains not yet carrying it and sales in the four chains that were rose 100%. Note: This is the earliest document seen (April 2001) that mentions Victor Food Products in Canada.

Soy City Foods, at 2847 Dundas St., is a new soy production site due to open in the spring. Pat Guardino is general manager and Leonard Bugyra is sales manager. The company is a subsidiary of Golden Age, Inc., a spiritual group which operates a successful vegetarian restaurant downtown and is currently installing a second one next door. The company will start by producing about 600 lb/day of tofu, as well as soymilk and soysage. They will supply their contiguous restaurant and sell bulk soyfoods from their own retail counter in the storefront. They will also produce tofu cheesecakes and okara cookies in the restaurant.

Photos show: (1) Soy City Foods and its owners (incl. Pat Guardino) under the storefront sign. (2) Pyung Hwa Tofu Shop, with cakes of tofu cooling in a bathtub. (3) Stephen Yu of Victor Food Products with Nutrisoya soymilk. Address: Colrain, Massachusetts.

1172. Leviton, Richard. 1980. Traditional tofu in New Hampshire. *Soyfoods* 1(3):34-37. Summer.

• **Summary:** There are two tofu shops in New Hampshire. Discusses the work of Jay and Pat Gibbons of North Country Soyfoods (once called Crystal Hills Tofu Shop, in Bethlehem, New Hampshire) and Robert Cook and Viney Loveland of Willowbrook Soyfoods (Gilsum, New Hampshire). Each shop “illustrates the virtues and drawbacks of operating a small, labor-intensive, low-technology, low-capital shop that serves a local clientele. Each shop embodies a portion of that original inspiring vision from *The Book of Tofu* of a multiplicity of tiny, traditional, community based tofu shops whose tofu crafters deliver fresh bulk tofu every day.

Crystal Hills opened in September 1977, after a year of preparation by Jay and Pat. Now named North Country Soyfoods, it has modified the traditional soysage recipe by eliminating wheat germ, substituting barley malt for honey, and adding 5% vinegar to increase the shelf life. The company supplies large amounts to Jon Cloud of Cloud Mountain, who helps to export about 1,000 lbs every 3 weeks to co-ops in Montreal and Toronto.

Photos show: (1) Robert Cook and Viney Loveland standing in front of the Willowbrook Soyfoods shop. (2) Jay and Pat Gibbons. (3) Adding nigari to soymilk at Crystal Hills. (4) Stirring the soy slurry in a large caldron. (5) Then pressing the okara for soymilk. Address: Colrain, Massachusetts.

1173. Palmer, Jane. 1980. Yogurt’s success inspires tofu backers. Soybean product adapts to main dishes, desserts. *World-Herald (Omaha, Nebraska)*. Aug. 6. p. 17.

• **Summary:** William Shurtleff and Akiko Aoyagi were in Omaha, Nebraska, last week to present a program on tofu and tempeh, two soybean products. Contains three tofu recipes: Tofu burgers. Creamy tofu dressing. Tofu cheesecake. Photos show Shurtleff and Aoyagi. Note: This is an second earliest document seen comparing the marketing of tofu to yogurt (the dairy product) in the title.

1174. Dinshah, Freya. 1980. More vegan recipes. Malaga, New Jersey: American Vegan Society. 27 p. Aug. No index. 22 cm. Spiral bound.

• **Summary:** Soy-related recipes include: Soy bean cheese spread (with cooked, ground soybeans, p. 5). Slicing soya cheese (with vegetable margarine and soya powder/flour, p. 5). Simple soy cheese (with soya powder and nutritional yeast, p. 5). South Jersey soy patties (with soy granules, p. 7). Corn bread (with soya powder/flour, p. 9). Sesame soy milk (with soya powder/flour, p. 11). Sunflower soy milk (with soya powder/flour, p. 11). Scrambled tofu, Tofu salad dressing, Yeasted tofu, Tofu Cantonese, Tofu, mushrooms and greens, Tofu in savory crumbs, Tofu turino, Tasty tofu strips (baked with soy sauce) (all p. 15). A photo on the title page shows the author. Address: 501 Old Harding Highway, Malaga, New Jersey 08328.

1175. **Product Name:** Island Spring Tempeh Burgers.

**Manufacturer’s Name:** Island Spring, Inc.

**Manufacturer’s Address:** P.O. Box 747, Vashon, WA 98070.

**Date of Introduction:** 1980 August.

**New Product–Documentation:** Letter from Luke Lukoskie. 1982. July 18. He started selling tempeh burgers in Aug. 1980; Shurtleff & Aoyagi. 1985. History of Tempeh. p. 56. These were “America’s (and the world’s) first commercial tempeh burgers, made on a small scale in individual petri dishes.” Form filled out by Yvonne Kuperberg. 1988. Oct. 1.

These were sold only in bulk. No labels in existence.

1176. Loma Linda Foods. 1980. What could be more appetizing than Loma Linda advertising? (Ad). *Health Foods Retailing* 44(8):110-11. Aug.

• **Summary:** A two page ad. A large photo shows a full page Loma Linda ad for Swiss Steak in a magazine on a dish on the dinner table, with two forks and a napkin to the left. "Loma Linda's been making great tasting vegetable protein foods for almost 75 years. Foods that... contain absolutely no cholesterol, preservatives or added MSG. Today, there are 59 Loma Linda brand food products available—proof of our growing popularity.

"In 1980, our advertising will deliver 22,000,000 reader impressions!" Below the company logo, photos show cans of: Swiss Steak, Breakfast Cup, and Sizzle Franks. Address: Riverside, California 92515. Phone: (714) 785-2444.

1177. MLO. 1980. Gourmet International (Ad). *Health Foods Retailing* 44(8):123. Aug.

• **Summary:** "Featuring Beef-like, Split pea, French onion, Tomato, Chicken-like, Potato [soups]. Introducing good soup and nutrition—Naturally from MLO... MLO Products. Builders of health through better nutrition. Mfd. [Manufactured] by Fillmore Foods, Inc., Hayward, California 94545." A photos shows cans of the different soups on a table setting. Address: California.

1178. Sovex Natural Foods. 1980. From Sovex Natural Foods—Without sugar (Ad). *Health Foods Retailing* 44(8):182. Aug.

• **Summary:** A half page black and white ad. "No sugar. Good Shepherd cereals—6 varieties. Sovex granolas—5 varieties. Honey sweetened natural cookies—6 varieties. Prothins—5 varieties. Bulgur wheat. Miller's bran. Corn germ flakes. Sovex flavor concentrate. New! Veg-Pats—vegetable burger, vegetable sausage." Address: Collegedale, Tennessee 37315.

1179. Redwood Valley Soyfoods Unlimited. 1980. [Real Food Tofu Shop and Café] (News release). 8473 East Rd., Redwood Valley, CA 95470. 1 p. Sept.

• **Summary:** "Redwood Valley Soyfoods Unlimited is proud to announce their opening of the Real Food Tofu Shop and Cafe. It is a 14-seat restaurant serving lunch and dinner with deli products featuring our Brightsong Tofu." The tofu shop is behind the cafe. The wholesale food processing kitchen manufactures Tofu Cheesecake, Soy Juice, Tofu Treat, Tofu Dips and Dressings, Marinated Salad, Soyannaise, Soy Loaf, frozen dinners and various sandwiches. "The cafe is the only one of its type west of Colorado."

Note 1. A leaflet (printed with black ink on pink paper, undated, 8½ by 11 inches, single sided) titled "Brightsong. The Real Food Tofu Café," gives details: Air conditioned.

Smoke free. 8473 East Road, Redwood Valley. Sandwiches \$2.00: Tofunafish, Baked-spice tofu, Missing egg salad, Happy Chicken Salad, Hummous, Tofummus, Stuffed mochi. Not dogs. Burgers \$2.50: Tempeh, Tofu, Soysage. Desserts: Creamies, Cheesecake, Cookies, Ice Bean, Banana Split, Frozen Joy. Salads: Missing Egg... Drinks: Soy shake, soymilk, Spirulina smoothies.

Note 2. This is the earliest document seen (Sept. 2011) that mentions "Redwood Valley Soyfoods Unlimited."

Note 3. On 31 Oct. 1979 Brightsong Tofu ordered *The Book of Tempeh* (professional edition) and *Tempeh Production* (Vol. II, manuscript). Address: Redwood Valley, California.

1180. **Product Name:** Tofu.

**Manufacturer's Name:** Spring Creek Soy Dairy.

**Manufacturer's Address:** 136 Main St., Spencer, WV 25276. Phone: 304-927-1815.

**Date of Introduction:** 1980 September.

**Ingredients:** Organic soybeans, water, nigari.

**How Stored:** Refrigerated.

**New Product—Documentation:** Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Stan Kenner.

Label. Undated. "Tofu." Spring Creek Soy Dairy, Inc., Spencer, WV 25276. Printed blue on white; self adhesive label.

Talk with Tenley Weaver. 1990. May 22. The company name was changed to Spring Creek Natural Foods at the time they moved in July 1989. New address: 212-C East Main St., Spencer. Owner: Mark Bossert. It is a co-op and Mark has been with the company since it started.

Talk with Jon Kessler of Twin Oaks Community Foods. 1996. Feb. 9. Spring Creek now makes about 10,000 lb/week of tofu and tofu products.

Talk with Mark Bossert, President. 1998. Oct. 11. They were worker-owned until the start of 1997. They now make about 10,000 lb/week of tofu. In addition to tofu, they now make baked tofu, soysage, soy burgers, tofu and salads. Their main regional competitors are Fresh Tofu (Easton, Pennsylvania) and Twin Oaks.

Label. Undated. "Traditional nigari tofu" [organic]. 1 lb. Spring Creek Soy Dairy, Inc., Spencer, WV 25276. Printed red, blue and yellow on white, on a clear film pouch.

1181. Wagner, Martha. 1980. Okara: The little-known superfood & soy cookbooks. *New Age Journal (Boston, Massachusetts)*. Sept. p. 69, 71.

• **Summary:** Part I is about Okara, which is defined as "the pulp left behind when soymilk is strained to make tofu. As a by-product, it is a free food for tofu makers and people who make soymilk at home or on a commercial scale... Fluffy, cream-colored okara is easily as versatile as tofu. Some

American tofu shops are now using okara to make 'soysage,' a spicy, meatlike food. It can be used in yeasted and quick breads; just substitute packed okara for a third of the flour called for... Dry-roast okara in the oven and you have the makings for granola or a crumb crust."

Part II is a brief review of some soy cookbooks, of which there has been a proliferation in the past few years. "It all began in 1975 with *The Book of Tofu* (Autumn Press, \$8.95). With this tome of 300-plus pages, including over 500 recipes, William Shurtleff and Akiko Aoyagi introduced tofu to America. A fascinating book, attractively illustrated;... the condensed, revised 1979 paperback edition (Ballantine \$2.95) has a more manageable amount of material (including 250 recipes) and is still packed with information..." Other books reviewed: *The Tofu Cookbook*, by Kathy Bauer and Juel Andersen (Rodale Press). *The Farm Vegetarian Cookbook. Tofu Goes West*, by Gary Landgrebe (Fresh Press, \$4.95). *The Great American Tofu Cookbook*, by Patricia Gaddis McGruter (Autumn Press, \$6.95).

"Shurtleff and Aoyagi have recently followed up their tofu classic with *The Book of Tempeh* (Harper & Row, \$6.95)... a thoroughly researched and fascinating book." Contains two illustrations reprinted, with permission, from *The Book of Tofu*.

1182. Dart, Susan. 1980. After thousands of years, tofu catches on: Natural foods. *Chicago Tribune*. Oct. 9. p. W\_A14.

• **Summary:** "Much of the popularity of tofu is due to Bill Shurtleff and his Japanese wife, Akiko. Together they have written the definitive book on the subject, 'The Book of Tofu' (Ballantine, \$2.95), which contains hundreds of recipes."

Gives a recipe for Tofu burgers (makes eight patties).

1183. Ostmann, Barbara Gibbs. 1980. Using soybeans: From milk to nuts. *Post-Dispatch* (St. Louis, Missouri). Oct. 22. p. 3B. Food section. [1 ref]

• **Summary:** Contains recipes—adapted from various books—for: Soynuts. Speedy soy flour. Quick and easy soy milk. Egg-sprout patties (with soybean sprouts). Spicy soybean salad (with whole dry soybeans). Soy vegetable soup (with cooked soybeans and soybean cooking liquid). Soy burgers (with cooked soybeans). Soft sandwich buns (with soy milk). Soy bread (with soy milk). An illustration (line drawing from *The Soybean Book*) shows a soybean leaf and four pods. Address: Post-Dispatch Food Editor.

1184. Goodbrad, John. 1980. Re: Soy products made by Sovex Natural Foods, Inc., "The Granola People." Letter to William Shurtleff at New-Age Foods Study Center, Oct. 23. 1 p. Typed, with signature.

• **Summary:** "A couple of months ago, we received a form letter from you indicating interest in what we produce primarily from soy products.

"Under separate cover we are sending you a package of our Prothin Snack Chips, Vege-Pat Sausage flavor, Vege-Pat Burger flavor, and Chili.

"If these meet with your definition of soy foods, please drop us a line and we will give you additional information about these products. Yours truly, John Goodbrad, President." Address: President, Sovex Natural Foods, Inc., Box 310, Collegedale, Tennessee 37315. Phone: 615-396-3145.

1185. Ostmann, Barbara Gibbs. 1980. Time for tofu. *Post-Dispatch* (St. Louis, Missouri). Oct. 29. p. 1E, 4E. Food section.

• **Summary:** When Bob Davis moved to St. Louis about 18 months ago, he was able to find tofu only in health food stores. So he started his own tofu company, Light Foods, Inc., which began making tofu 7 months ago. He got the idea from his cousin in Indiana [Rob Davis] who has a tofu shop named Simply Soy [sic, Simply Soyfoods in Bloomington]. "Prior to his involvement with tofu, Davis earned a bachelor's degree in political science and a master's degree in planetary development. He worked at the Solar Energy Institute in Washington [DC] while finishing his master's thesis. His concern about energy sources and his enthusiasm for soybeans and a vegetarian diet are a part of his philosophy of living." Davis, age 27, says that Light Foods now produces up to 1,000 lb of tofu daily, as well as assorted tofu products such as Soysage (okara-based soy "sausage"), Soyloaf (soy "meatloaf"), Marinated Tofu, soy cookies, and Tofu Cream Pies (with fruit). "His newest development is bean cream, 'to challenge yogurt' said Davis. 'I think its better than yogurt and its lower in calories.'"

Photos show: Bob Davis pouring nigari coagulant into soymilk to make curds, ladling curds into tofu forming boxes, then cutting the finished tofu. A close-up of a package of Light Foods tofu with a winged unicorn jumping across a stream. Packages of five products (with labels). Bob's mother [Donna Davis] cutting a tofu cream pie. Contains a recipe for homemade tofu (adapted from *The Book of Tofu* by Shurtleff & Aoyagi) and 5 tofu recipes.

Talk with Bob Davis, founder of Light Foods, Inc. 1994. May 7. Bob was one of the first people in America during the 1970s to try to develop a soy yogurt ("bean cream"). Actually he was working with viili cultures to try to develop a soy viili. But he was short on capital and overextended in terms of trying to do too many things with his product line, so was never able to get the product into commercial production. Bob left St. Louis in about 1983-84 for 3 reasons: (1) His company couldn't make tofu inexpensively enough to compete with regular tofu being imported from elsewhere (as from Hinoichi in California); (2) Bob had just introduced his Light Links (meatless tofu hot dogs) by August 1982. He made the tofu and the hot dogs were made and packed by a meat packer in Columbia, Missouri. Then

Bob began looking for another company to make the basic tofu, since he could not make enough at a low enough price, and for a meat packer near the tofu supplier. He flew out to California and after visiting several places decided to get the tofu from Sacramento Tofu and to have the hot dogs packed by MadeRight Meats in Sacramento initially, then shifted over to Safeway; (3) He wanted to get out of the run-down neighborhood in St. Louis where his first company was located. Address: Post-Dispatch Food Editor.

1186. Leviton, Richard. 1980. The soy deli: Tofuna salad to soysage-on-rye. *In Business*. Sept/Oct. p. 44-47.

• **Summary:** “The soy delicatessen is emerging as the most exciting and innovative means of retailing these ready-to-eat natural foods.” Discusses in detail: Hip Pocket Tofu Deli in Columbus, Ohio, started on 1 March 1980 by Mick Vissman and Bill Lutz; Soja Soyfoods Cafe & Delicatessen in Toronto, ONT, Canada, started in Feb. 1980 by Tucker Held, Lynn Sterling, and Mary Anderson; Far Pavillians [sic, Pavilions] in Telluride, Colorado, opened in October 1977 and now run by Catherine Peterson; The Tofu Shop deli in Rochester, New York, started in November 1978 by Greg Weaver, Norman Holland, and Andy Schecter; The Soy Plant Deli in Ann Arbor, Michigan, a cooperative; The Yellow Bean Trading Company, started in September 1978 by Timothy and Carol Huang. They opened a retail soy deli in March 1979; The Good Belly Deli in Boulder, Colorado, which recently changed its name from “Cow of China,” is run by Steve Demos, who also owns White Wave; and Mintz’s Buffet, in the upper East side of New York City. “David and Ethyl Mintz have incorporated tofu into their traditional kosher Jewish deli, featuring dairyless tofu cheesecakes, tofu sauces, tofu in vegetable egg souffles, along with their matzoh balls, gefilte fish, and chopped liver, or soup to nuts, old time foods like Grandma used to make, a big menu.”

Photos show: The exterior of Soja Soyfood Cafe, with Tucker Held, Lynn Stirling, and Mary Anderson standing below the sign. The wooden wall menu at The Tofu Shop in Rochester, New York. Greg Weaver and one other person working inside the kitchen of The Tofu Shop.

Note: This is the earliest article seen on David Mintz’s work with soyfoods; soy ice cream is not mentioned. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

1187. **Product Name:** Soyloaf.

**Manufacturer’s Name:** Light Foods Inc.

**Manufacturer’s Address:** 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.

**Date of Introduction:** 1980 October.

**Ingredients:** Okara, whole wheat flour, nutritional yeast, wheat germ, safflower oil, soymilk, coconut, bulgur, soy grits, mustard, tomato table sauce, barley malt, sesame seeds, herbs & spices.

**Wt/Vol., Packaging, Price:** 20 oz (567 gm) container.

**How Stored:** Refrigerated.

**New Product–Documentation:** Barbara G. Ostmann. 1980. Post-Dispatch (St. Louis, Missouri). Oct. 29. p. 1E, 4E. “Time for tofu.” Bob Davis’ company Light Foods Inc. makes Soyloaf (soy “meatloaf”).

Label. 3 inches square. Self adhesive. Orange on white. Winged unicorn rearing on its hind feet before an orange moon. “No preservatives. Please refrigerate.” Leviton. 1981. Soyfoods. Summer. p. 42. “They produce up to 100 20-ounce containers of Soyloaf.”

1188. Mandoe, Bonnie. 1980. Cooking with tofu. *Mother Earth News* No. 65. p. 124-25. Sept/Oct.

• **Summary:** Gives recipes, with color photos, for: Tofu-garlic dip. Tofu stroganoff. Baba burgers. Tofu pancakes. Tofu-walnut torte. Maple-tofu cheesecake. Address: Maui, Hawaii.

1189. Boyer, Robert A. 1980. Work with Henry Ford and soybeans. III (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 3. 3 p. transcript.

• **Summary:** Floyd Radford was head of Ford’s soy farms. At the Chicago World’s Fair the Ford exposition was producing soybean oil by solvent extraction of soybeans. The soybean oil was the sole fuel used to power a diesel engine, which ran an electric generator, which produced all of the electricity for the exhibit. It was very neat.

Boyer developed the first plant protein fiber in about 1938. That year the Ford Motor Co. had a machine to spin soy protein fibers at the World’s Fair in New York. He was aware of work in Italy spinning casein into fibers from reading technical journals prior to 1936. He used the term “spinning” because the textile industry uses that

term to describe how rayon is produced. In both cases, a more correct term would be “extruding,” since the dope is extruded through spinnerettes.

Ford’s soybean fiber spinning pilot plant had a capacity of 1,000 pounds of fiber a day, but they probably produced less than that. They would send the fiber to the mill, where 1 part of soy fiber would be blended with 3 parts wool to make sidewall (not seat) upholstery, which got less wear and wouldn’t mark like cotton.

When making soy protein isolates, the fiber (insoluble cellulose) is removed during clarification by centrifugation; no one had ever been successful in removing it by filtration, which would be better. After dissolving the soybean meal in alkali, it is clarified by centrifugation, then precipitated. Practically the same process is still used to make soy protein isolates.

Just a few plastic trunk lids were ever made, and they were used only on demonstration or experimental cars; they were never part of commercial Ford vehicles.

When Boyer left Ford Motor Co. he went to work for The Drackett Co., which bought Ford’s soy protein operations. Mr. Drackett sold [actually shut down] his soy fiber spinning operation in 1949. Drackett later sold all its soybean operations to ADM. After Boyer left Drackett in 1949 he filed for his first edible soy fiber spinning patent the same year; it may have been granted in 1951. He applied for a new, expanded patent, with much broader claims to a food product manufactured from man-made protein fibers, in 1951; it was granted in 1954.

In Aug. or Sept. 1949 Boyer paid his first visit to Worthington Foods. Worthington was the first company to whom he disclosed what he was doing, and showed a sample of a prototype product (pork chops) made from spun soy protein fiber. He did not go to Swift initially because he had been advised to keep away from meat companies, which might buy then bury his patents. If Worthington hadn’t been interested in his spinning process when he first visited them, he might have just given up then. He wasn’t sure if it was a screwball idea or not. Moreover, he had been out on his own for almost a year and was running out of money. Worthington was excited with Boyer’s idea but they needed a source of fiber.

So Boyer went to the Virginia Carolina Chemical Co. (VCCC) in Taftville, Connecticut. They were spinning fibers for cloth and they allowed him to use their spinning pilot plant in 1949 to produce the first edible spun soy protein fibers for research purposes and prototypes; he was not employed by them. VCCC was interested enough to call in Corn Products Corp. (CPC), which was interested—but they said they wanted to use corn gluten instead of soy protein. Boyer said “Fine.” After the first successful run, using the VCCC pilot plant, CPC got very interested. Fibers were spun from casein, corn gluten, and soy. CPC bought the first license to his soy fiber spinning process for food use

in 1949. They took an exclusive option on the license for 9 months. The first sale of edible protein fiber was made by CPC to Worthington Foods; the fiber was made of corn gluten. After working for a year with CPC, everyone in the project realized that the flavor of corn gluten was so horrible that it would never work in foods. So CPC converted to a non-exclusive license. Boyer, now a bit desperate and against the advice he had been given, decided to approach a meat company. He chose Swift & Co., which took an option immediately; they were the second company to license his patent and from 1950 to 1954 they retained exclusive rights to his patent. In about 1955 Swift converted to a non-exclusive, and Boyer immediately went back to Worthington to see if they were interested in a license yet. They were.

So after having waited 7 years, Worthington finally purchased a spinning license in 1956. At that time, Boyer began to spend 50% of his time at Worthington for a year after they took the license. Initially Worthington did not spin their own soy fibers since it was too expensive for them and they did not have much money at the time. Ralston Purina was well equipped to make these fibers for them. It was not until the mid-1960s that Worthington started to spin their own fibers.

By 1977 seven large food companies had licenses on the patent: Swift & Co., Unilever/Lever Brothers in England, General Foods, Nabisco, General Mills, Ralston Purina, and Worthington.

The original Bac\*O’s were made from spun soy protein fibers. Today he thinks they are made from textured extruded soy flour. General Mills took a license from Boyer. They got 25% of his consulting time, Ralston Purina got 25% and Worthington got 50%. Bac\*O’s came on the market in about 1965 and were a real sensation. It was the biggest thing that had happened with Boyer’s idea to date.

Loma Linda is now spinning soy protein fibers, as is some company in Japan—or at least they used to be.

How big is the market for foods made from spun soy protein fibers? Boyer would guess at least \$30 million a year. Worthington’s total sales was \$20 million including gluten. Miles got Worthington a new plant shortly after they bought Worthington. Now Bayer owns Miles and Worthington. The Morningstar Farms line is not making the profits they would like it to make.

Note: This is the earliest English-language document seen (Dec. 2004) that uses the term “spin soy protein fibers.” Address: 632 Edgewater Dr., Apt. 731, Dunedin, Florida 33528. Phone: 813-734-2415.

1190. Chapman, George. 1980. Work with Loma Linda Foods (Interview). *SoyaScan Notes*. Nov. 13. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** George (who speaks with an Australian accent) came from Australia in 1937 to take over the business of Loma Linda Foods (LLF); they were making soymilk at that

time and had been for a year or more—say 1936. George was the general manager of LLF for 26 years, from 1937-1963. He is now age 84. He is not aware of any history of the company.

Dr. Harry Miller wanted to sell LLF his soymilk process and formulation, but LLF felt theirs was as good or better than his.

George thinks LLF was pressure canning by 1937, when he arrived. LLF was not making any meat analogs at that time. In 1937 LLF's main products were several breakfast cereals, and several meat substitutes (such as Proteena / Proteina and Nuttena) made from gluten and/or peanuts.

George met T.A. Van Gundy in 1933 in his little factory in La Sierra, California, near Riverside. He was a Seventh-day Adventist. He had a soybean butter [soynut butter] that resembled peanut butter. He does not remember the product name or the company name.

Dorothea, his daughter, was a dietitian and a food demonstrator for LLF for many years.

All products sold by LLF kept being made in Ohio; none were or are being made in California. Address: Retired; Former General Manager of Loma Linda Foods.

1191. Goodbrad, John. 1980. History of Sovex Natural Foods, Inc. and other small Adventist food companies (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 26. 1 p. transcript.

• **Summary:** Sovex is a private company. John and his wife are Seventh-day Adventists, as are many of the company's employees. John worked at the Boulder Sanitarium (also called the "San," in Boulder, Colorado) from 1947 to 1953; the Sanitarium owned 8 health food stores and he was in charge of them. During the time he was in Boulder, the Sanitarium did not manufacture any foods; they had already gotten out of that business.

Then he went to work for Collegedale Distributors (in Collegedale, Tennessee), which was owned by Southern Missionary College. They made, and still make, granola.

Sovex was founded in 1953 by the Hurlingers in Holly, Michigan. The company's original product was Sovex, a flavor concentrate paste, made from a mixture of brewer's yeast and soy sauce. In 1964 John bought the business and moved it to Collegedale, Tennessee, where he worked.

In 1981 Sovex products containing soy include Prothin Snack Chips, Vege-Pat (textured soy flour, in sausage, burger, and chili flavors), and Granola (their main product line, in nine flavors, many of which contain soy grits).

Sovex had no relationship with Madison Foods (of Madison, Tennessee). Madison was one of the pioneers in the meat substitute field. They were purchased by Worthington Foods, which phased out the Madison products. John has eaten Madison products on and off for over 50 years, but has had no direct contact with them for a number of years. John has a copy of *Back to Eden*, autographed by Jethro Kloss.

A Mr. White, who was a grandson of Ellen G. White, had a super soymilk recipe about 20 years ago. He started with soy flour, ran it through an homogenizer, then sweetened it with honey. People loved the flavor; it was fresh, not canned. He called it Nu-Milk and made it on the sly at the Southern Missionary College dairy in Collegedale, Tennessee. It was illegal because there are laws against putting anything but milk in a milk processing plant.

John just talked with Frank Miller (phone: 817-641-8343), who used to work for Madison Foods and who now owns Texas Protein Products, a company that sells TVP in Texas. Another key man was Bruce Stepanske, who made soymilk at Madison until it was discontinued. Address: President, Sovex Natural Foods, Inc., Box 310, Collegedale, Tennessee 37315. Phone: 615-396-3145 (or 2111).

1192. **Product Name:** Soy-Pro (Meatless Sausage).

**Manufacturer's Name:** Soy City Foods.

**Manufacturer's Address:** 2847 Dundas St. West, Toronto, ONT, M6P 1Y6, Canada. Phone: 416-762-1257.

**Date of Introduction:** 1980 November.

**Ingredients:** Soybean mash [okara], durum & whole wheat flours, vegetable oil, bran, water, honey, cider vinegar, blackstrap molasses, herbs, seasonings, lecithin, sea salt.

**Wt/Vol., Packaging, Price:** 350 gm plastic bag.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm: Protein 7.2 gm, fat 1.6 gm, carbohydrates 19.9 gm, calories 203.

**New Product–Documentation:** Label. 1981. Printed on red film. 6.5 by 8 inches. "Health is the most precious thing you

have. Sustain it by eating good food.”

Interview with Jon Cloud. 1985. Aug. Label sent by Jon Cloud. 1989. May. The product was introduced in the fall of 1980.

1193. *Soyanews (Sri Lanka)*. 1980. Soyameat sales climb. 3(4):1. Nov.

• **Summary:** “A ton of soyameat is sold in a day in the city of Colombo, according to one company now marketing soyameat in Sri Lanka. There are already three companies in the soyameat or textured vegetable protein importing and retailing business with Lankasoy, the first in the market, fetching the largest sales. The others are Delmege Forsyth who sell soyameat under the brandname TVP, Textured Vegetable Protein, and Ceylon Agencies and Industries Ltd. who market soyameat under the name Bontrae Textured Vegetable Protein.

People like its convenience. Mr. R.S. Wijesekara of Lankasoy “is certain that with more salespoints opened throughout the country the predominantly Buddhist and Hindu public will increasingly turn to vegetable protein obtained from soybeans.”

1194. **Product Name:** Weissman’s Original Tofu Sausage.

**Manufacturer’s Name:** Vegetable Protein Co.

**Manufacturer’s Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1980 November.

**Ingredients:** Incl. tofu, seasonings.

**Wt/Vol., Packaging, Price:** 6 oz vacuum pack. Retails for \$2.29.

**New Product–Documentation:** Manufacturer’s leaflet. 1985. Nov.

East West. 1987. June. p. 65. The Vegetable Protein Co. makes Tofu Sausage. Company not listed in Natural Foods Merchandiser Supplier Guide (Aug. 1988).

Talk with Paul Duchesne, founder of Wildwood Natural Foods in Fairfax, California. 1991. Nov. 19. Paul was in Boston for 9 months starting in Sept. 1978. He met Johnny Weissman, who was a partner with some other person in the Vegetable Protein Co. in Cambridge. Johnny was very creative in making foods. In 1979 he developed a Tofu Bologna and some other tofu-based meatlike product, but he was so paranoid that other companies would copy him after he launched them that he never did. “I tasted the Tofu Bologna at his home and I flipped out. It was just fantastic—great texture and flavor—I’ll never forget it. He was good at product development but poor at marketing.”

Talk with then letter from John Weissman. 1992. May 8. This product was introduced in Nov. 1980. His Vegetable Protein Co. made this product for the first 4 years of its existence. It eventually became his best-selling item. As its popularity increased, he phased out retail sales of Wheatmeat and Solar Burgers, and sold only these Tofu Sausages to Restaurants in Bulk. After this period he invented only tofu products. In May 1984 he had to leave his food factory on River Street so he arranged with Michael Cohen to make the Tofu Sausage at his plant in Greenfield, Massachusetts. This was disastrous for John, since the product’s new poor quality almost ended any reputation it had left in the marketplace. But it was quite an education for John. In January 1985 he took back the product and began making it for himself again.

1195. Martin, Dale. 1980. New age eatery owners hope to attract diners from all over the state to tofu cafe in Redwood Valley. *Daily Journal (Ukiah, California)*. Dec. 4. p. 2-3. [1 ref]

• **Summary:** The article begins: “Redwood Valley may be an unlikely place to open a tofu shop and cafe, but store owners Dik and Sharon Rose are hoping this new age eatery will catch on and attract diners from all over the area. Tofu is becoming quite a business these days, as more and more people are starting to discover the cheap, nutritious, and versatile soybean product... tofu is finding its way into the American mainstream. It isn’t just a health food any more.”

“Tofu, made from curdled soybean milk, is also called bean curd. A complete protein, the custardy textured product has been hailed as being highly digestible and an excellent diet food. With meat prices going up and up, many meat eaters as well as vegetarians are increasing their tofu intake.

“Dik and Sharon Rose bought into the tofu dream in June [1980], when they took over Brightsong Tofu in Redwood Valley from its former owner, David Patton. The shop is now in its third year of production. Through increased advertising and hard work, the Roses tripled the

output of the shop in five months. The shop is now producing 1300 pounds of tofu a week... The Roses currently employ two workers who make the tofu by hand with wellwater, fresh soybeans and 'a lot of care and love,' according to Dik."

Until a few months ago, Brightsong was the only tofu shop between South San Francisco and Eugene, Oregon. But now there is a new shop in Marin and one opening soon in Arcata.

"Dik and Sharon became interested in tofu after hearing a lecture in 1976 by the 'gurus' of the soybean product, William Shurtleff and Akiko Aoyagi, who wrote 'The Book of Tofu.' After visiting a shop in Oregon, the Roses came to Mendocino County where they discovered 'Brightsong' for sale in the spring."

The Real Food Tofu Cafe seats 14. "The cafe's menu offers such dishes as spiced baked tofu sandwiches, tofu burgers, brown rice tofu burritos, 'soyonnaise' spread and tofu cheesecake." Tempeh is also served.

Photos show: (1) Sharon Rose (with long curly hair) standing at the front counter, with a large menu on the wall behind her. Menu items include cheese cake, ice bean cone, soy juice, spirulina, vege herb tofu. (2) A grinder, out of which ground soybeans are dropping into a 5-gallon plastic bucket labeled Brightsong Tofu. (3) A large, round curdling basin: "After the nigari is added, the tofu solidifies and separates into curds and whey." (4) Dik Rose, with beard and ponytail, cutting tofu into cakes. (5) Cakes of tofu cooling in water in a stainless steel sink.

Note 1. This is the earliest dated document seen (Aug. 2012) that mentions Brightsong Tofu. Note 2. This is the earliest document seen (Aug. 2012) that mentions Dik or Sharon Rose in connection with this company.

1196. Mullarkey, Barbara. 1980. Lots of goodies to munch on at the Good Nature Deli. *J. of Oak Park & River Forest (Illinois)* 1(23):9, 12. Dec. 31. Wednesday.

• **Summary:** Good Nature Deli is located at 810 Harrison St. in Oak Park. The owners are Kevin D. O'Brien and Mary Ellen Sackett. A big hand-written wall board advertises the daily fare. A recipe for Happy Turkey Pot Pie (with tofu) is given.

1197. **Product Name:** [Seitan Goulash].

**Foreign Name:** Seitangoulash.

**Manufacturer's Name:** Jonathan P.V.B.A.

**Manufacturer's Address:** Antwerpsesteenweg 336, B-2080 Kapellen, Belgium.

**Date of Introduction:** 1980 December.

**Ingredients:** Water, seitan (wheat proteins)\*, peppers, onions\*, carrots\*, leek\*, peas\*, mushrooms, soya sauce, spices, starch, sea-weed. \* = Organically grown.

**Wt/Vol., Packaging, Price:** Sterilized.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Minerals 1.64%, vegetable proteins 1.26%, vegetable fats 0.73%, carbohydrates 7.37%. 73.1 calories (Kcal) per 100 gm.

**New Product–Documentation:** Letter (fax) from Jos van de Ponsele and Magda Verfaillie of Mycelia b.v.b.a. in Gent, Belgium, in response to an inquiry. 1992. July 6. This product was introduced at the end of 1980 as a sterilized product.

Label sent by Jos van de Ponsele. 1988. 6.25 by 10.5 inches. This card-stock sleeve fits over the product. Color photo of seitan with various vegetables with item name in white on orange. The product is named Seitangoulash in English or Seitangulasch in German. "Vegetable product." Code CINAB.

1198. Tofu Shop (The). 1980. December. New soyfoods restaurant or deli. 768 18th St., Arcata, CA 95521.

• **Summary:** Matthew Schmit. 1981 Feb. 13. "Fresh tofu comes to Northern Cal." "The Tofu Shop of Arcata, California, officially opened its doors on December 12, 1980..."

Questionnaire filled out by owner of restaurant or deli. 1982. Restaurant opened for business in Dec. 1980. Lists the company's most popular soy-based menu items in descending order of popularity: 1. Tofuburger (authentic). 2. Tofu-vegetable sushi rolls. 3. Tofu spinach turnovers. 4. Tofu pumpkin pie. 5. Tofu cream pie. 6. Tofu vegetable patties. 7. Tofu tahini salad. 8. Tofu potato salad. 9. Carob soy pudding. 10. Happy-dragon soydrink. The highest weekly total sales over the past 6-2 months: \$1,200 in Oct. 1981 because of deli expansion and return of students to Humboldt State. The average weekly deli sales during this period: \$850. Note: The company also sells \$850/week wholesale. Average hourly wages paid to workers: \$3.50. The business startup cost (amount of money it cost to get the business started): \$11,000. Current profitability status: Profitable. Plans for the future: Deli display cooler, steam table for hot food, tempeh production. Advice the owner would give to someone starting a similar business: Choose the perfect community. Prepare a detailed business prospectus. Obtain sufficient capital (plus some extra). Prepare for at least one year of double-time work. Love soyfoods. Be professional. Other: "Our goal has been to develop a model for the 'all-American neighborhood tofu shop,' which produces its own fresh tofu and other soy products; where the neighbor down the street can grab a quick bite on the run, or pick up staple groceries (tofu, soymilk, soy margarine, bread, etc.) for home cooking. A large portion of our business is from people who walk to our shop. A balance of wholesale / retail and deli foods / groceries makes small scale tofu production feasible."

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started in Dec. 1980 by Matthew & Suzanne Schmit, who formerly ran Far Pavilions in Telluride, Colorado.

Packet from Matthew Schmit. 2002. Sept. 24. He encloses three original, undated menu leaflets, all vegetarian: (1) Earliest, printed in about 1982, is dark blue ink on tan paper. 3 panels each side, each panel 22 x 9 cm. The menu is on the inside 3 panels. On the 1st panel: Welcome! The Tofu Shop Deli and Grocery. A nice (3 by 2¼ inch) illustration of “The Tofu Shop Specialty Grocery and Deli” appears in the center. “We make our own tofu fresh daily...” (2) Similar. Printed in about 1987. Blue ink on light beige paper. Prices have risen a little. (3) Larger. Printed in about 1992, green ink on beige recycled paper, 8½ by 14 inches, folded into 4 panels on each side. More menu items in these categories: Green salads. Deli salads. Tofu salads. Burgers. Sandwiches. House specialties. Soups & sides. Beverages. Tofu cold-cuts. Address: Arcata, California.

1199. **Product Name:** Tofu Veggie Patties. Delicious and Baked.

**Manufacturer’s Name:** Tofu Shop (The).

**Manufacturer’s Address:** 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

**Date of Introduction:** 1980 December.

**Ingredients:** Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Fresh vegetables (carrots, green onions, parsley). Tamari (natural soy sauce made with water, soybeans, wholewheat and salt). Garlic and ginger.

**Wt/Vol., Packaging, Price:** 10 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label (metallic). Received 1988. 4 by 2.5 inches. Self adhesive. Green, red, gold, and white. “Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite burger with all the fixin’s or as a main dish. Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°.” Matthew Schmit says (March 2009) that the metallic label was first used in 1985.

1200. **Product Name:** Tofuburger, and Tofucado Burger.

**Manufacturer’s Name:** Tofu Shop Deli & Grocery.

**Manufacturer’s Address:** 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

**Date of Introduction:** 1980 December.

**Ingredients:** Tofuburger: A fresh made tofu-Veggie Patty with Tofu-Mayo, tomato, sprouts, green onion, no-salt seasoning on a whole-grain herb-onion bun.

**Wt/Vol., Packaging, Price:** 6 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. Received. 1988, July. Launched 1980, Dec. 3 inch diameter. Self adhesive. Blue, green, and yellow on white. An illustration on the perimeter of a circle of The Tofu Shop shows the ocean, with waves and trees. “An authentic tofuburger.”

Note: Matthew says (May 2012) this tofu burger was

and always has been baked.

1201. *Annual Directory of Vegetarian Restaurants*. 1980-1983. Serial/periodical. Angwin, California: Daystar Publishing Co. 22 cm.

• **Summary:** The first (1980) edition, compiled and edited by Loren Kennett Cronk, contains 283 pages (not illustrated, 22 cm tall). It gives details on nearly 1,000 restaurants in 450 cities in the USA. Subtitle on cover: “Access to prepared health foods over the entire United States.”

At the rear of the book are four ads for restaurants: (1) Whole Wheat ‘n Wild Berries (New York City). (2) Real Good Karma (San Francisco). (3) Jack LaLanne’s Nutrition Center (Los Angeles). (3) The Prophet (San Diego, California).

The book is organized alphabetically by states, and within each state, alphabetically by city. A detailed description of each restaurant is given, including the name, address, phone number, how to get there, days and hours, days and hours, cost of lunch and dinner. Types of meals served: Lacto-ovo-vegetarian, vegetarian, or macrobiotic. Use of organically grown foods, preservatives, and artificial flavors or colors. What alcoholic beverages are served (if any). Number of seats. Whether or not “food to go” (takeout) is available. Type of ownership. Year established. The earliest vegetarian restaurants seem to have been established in the early 1960s.

In San Francisco, the Real Good Karma Natural Foods Restaurant was established in 1964. The Real Food Company Cafe was established in 1976.

Restaurants that list tofu among the items they serve in 1980 include: The Sleeping Lady Cafe (Fairfax, California; tofu stroganoff). Real Food Company Cafe (San Francisco, California; tofu burgers). Taste of Honey Bakery (San Francisco, CA; tofu cheesecake). The Good Shepherd Restaurant (Santa Barbara, CA; tofu specials). Staff of Life Deli (Santa Cruz, California; tofu veggie lasagna). Mandala Cafe (Santa Rosa, California; tofu almondine). The Regular Restaurant (Rochester, New York; tofu mozzarella).

The last issue of this annual periodical was published in 1983. Address: P.O. Box 707, Angwin, California.

1202. **Product Name:** Soymilk [Plain], and Soysage.

**Manufacturer’s Name:** Central Soyfoods.

**Manufacturer’s Address:** 11 W. 14th St., Lawrence, KS 66044. Phone: 913-843-0653.

**Date of Introduction:** 1980.

**Wt/Vol., Packaging, Price:** Soymilk: Glass jar. Later in ½-gallon plastic bottle.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Jim Cooley of Central Soyfoods. 1989. Feb. 16. The original plain soymilk had nothing added. It is presently sold only from the shop. Competition from Tetra Pak soymilks has hurt his sales. In

March 1990 the company was selling only 10 gallons/week of soymilk and only directly out of the shop. It retailed for \$1.80 per half gallon.

1203. **Product Name:** [GranoVita Cutlets].

**Foreign Name:** GranoVita Phag-Schnitten.

**Manufacturer's Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

**Date of Introduction:** 1980.

**Wt/Vol., Packaging, Price:** 270 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** DE-VAU-GE leaflets.

1980? Rezepte aus der GranoVita Versuchskueche. And Neue Rezepte mit Soja-Goulasch. Manufacturer's catalog. 1981. May 1. DE-VAU-GE Sortiment-Preisliste. 4 p.

Form filled out and Label sent by DE-VAU-GE. 1990. June 11.

Note: This product was first introduced in 1958, but did not contain textured soy protein at that time.

1204. Fukakura, Noriko; Asano, M.; Murata, K. 1980. Daizu hakkô shokuhin no shikô-sei ni kansuru kenkyû [Survey on the acceptability of tempeh]. *Bulletin of Teikoku Gakuen* No. 6. p. 33-39. [8 ref. Jap; eng]

• **Summary:** A survey on the acceptability of tempeh was carried out by 50 members of a taste panel at the authors' school in Osaka, Japan. "The results of the survey indicated that the appearance of tempeh was lower than that for flavor, taste, stickiness, and texture. More than 76% of the panel members favored tempeh over natto (the result may be different if a survey is carried in Kanto district). Among methods of cooking tempeh, deep fat frying was most favored. Salt was evaluated as the best seasoning for tempeh rather than coriander or curry. The panel also compared the meat burger, the meat with soyprotein burger, and the tempeh burger. The meat only was given the highest rating, the meat with soybean protein second, the tempeh burger was the lowest. However, it was found that the tempeh burger could be acceptable." Address: Teikoku Women's Univ., 173, 6-chome, Todacho, Moriguchi-shi, Osaka, Japan.

1205. **Product Name:** Granose Chicken Flavoured Savoury Pudding.

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1980.

**Ingredients:** Wheatmeal flour, vegetable fat, textured soya protein, maize starch, soya flour, salt, onion, hydrolised vegetable protein, milk powder, leek, mushroom, yeast, vegetable oil, herbs, silica, spices, natural monosodium

glutamate.

**New Product–Documentation:** Manufacturer's catalog. 1980. April. "Chicken flavoured pie filling in the same delicious pastry case as the original Granose Savoury Pudding."

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1980. This product has been discontinued.

1206. **Product Name:** Granose Chicken Flavoured Pie Filling.

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1980.

**Ingredients:** Textured soya protein, maize starch, wheat flour, salt, onion, hydrolised vegetable protein, milk powder, leek, mushroom, yeast extract, vegetable oil, herbs, silica, spices, monosodium glutamate.

**New Product–Documentation:** Manufacturer's catalog.

1980. April. "A tasty soya protein pie filling flavoured with mushrooms and other vegetables. Bake in a pastry case, or serve as a casserole with other vegetables or as a snack on toast." Shurtleff. 1981. Overseas Adventist Food Companies. p. 6. They imported some of these meat analogs under their own brand from Nutana, and also imported soymilk from Loma Linda in Ohio, and packaged it under their Granose brand.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1980. It has been discontinued.

1207. **Product Name:** Granose Bolognese Sauce.

**Manufacturer's Name:** Granose Foods Ltd.

**Manufacturer's Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1980.

**Ingredients:** Tomato puree, textured soya protein, maize, starch, onion, hydrolised vegetable protein, salt, wheat flour, oregano, garlic, bay.

**New Product–Documentation:** Manufacturer's catalog.

1980. April. "Italian style Bolognese sauce with seasoned, minced soya protein. Serve hot with spaghetti or vegetables."

Rombauer's "The Joy of Cooking" (1975 ed., p. 353) has a recipe named Bolognese Pasta Sauce, which contains the following ingredients in descending order of predominance: Chopped lean beef, beef stock, dried mushrooms, dry white wine, and butter.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in 1980. It has been discontinued.

1208. **Product Name:** Tofuna Salad.

**Manufacturer's Name:** Lecanto Tofu.

**Manufacturer's Address:** P.O. Box 444, Lecanto, FL 32661.

**Date of Introduction:** 1980.

**New Product–Documentation:** Talk with Marvel Huffman. 1988. May 17. She learned how to make this at one of the annual soyfood conferences.

1209. **Product Name:** Loma Linda Ocean Fillets (Vegetarian Fish Fillets, Based on Spun Soy Protein Fiber). **Manufacturer's Name:** Loma Linda Foods. **Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1980.

**Ingredients:** Soy protein concentrate, soy protein isolate, water, wheat gluten, corn oil, soy flour, artificial flavors, egg whites, natural (vegetable) flavors, corn starch, oat flour, onion powder, whole wheat flour, salt, guar gum, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 1 fillet (2.0 oz–57 gm): Calories 130, protein 13 gm, carbohydrate 5 gm, fat 10 gm, cholesterol 0 mg, sodium 280 mg, potassium 340 mg.

**New Product–Documentation:** See next page. Ad. 1980. “Two new ways to nourish your business. The meatless meals they’ll be asking for.” Label reads: “Meatless. Tantalizing Fish Flavor. Cholesterol Free. 8 Fillets.” Sold frozen. Soya Bluebook. 1982. p. 60.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was said to be introduced in 1981.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

1210. **Product Name:** Dry Tofu Burger Mix.

**Manufacturer's Name:** Maya.

**Manufacturer's Address:** Ann Arbor, Michigan.

**Date of Introduction:** 1980.

**New Product–Documentation:** Shurtleff & Aoyagi. 1980. List of Soyfoods Products. To be blended with fresh tofu to make burgers.

1211. Natural Recipes. 1980. Getting to know tofu. Recipes & info (Leaflet). Boston, Massachusetts. 1 p.

• **Summary:** This “pamphlet” contains 8 American-style recipes. Any company can have its name and logo printed on the “Getting to know tofu” pamphlet, at the top of the front panel. We have one from Garden of Eatin’.

Note: At about this time, Natural Recipes had the following recipe pads that featured tofu: Creamy tofu dips/dressings. Spicy fried tofu. Sweet & Sour tofu & veggies. Tofu cheesecake. Tofu cutlets parmigiana. Tofu egg-less salad. Tofuburgers. What to do with tofu. They also had the following recipe pads that used tofu as one ingredient, but not the main ingredient: Applesauce cake (icing). Marinated veggies. Old world noodle pudding (dairyless “new world” variation). Peking fried rice. Tokyo fried noodles. Prices:

# Two new ways to nourish your business.

Introducing Loma Linda Griddle Steaks and Ocean Fillets. Two new meatless frozen dinners your customers will be warming up to.

Griddle Steaks have the hearty steak flavor of prime beef. And Ocean Fillets taste like mild ocean whitefish. And there's no cholesterol, no preservatives, and no MSG.

This fall, Loma Linda will be advertising these two new products in appetizing full color ads. And there'll be a special introductory offer for dealers.

Make sure you order plenty of Loma Linda Griddle Steaks and Ocean Fillets.

Your customers will find them very satisfying. And so will you.

**LOMA LINDA FOODS**

11503 Pierce Street, Riverside CA 92515.

**Manufacturer’s Address:** Collegedale, TN 37315.

**Date of Introduction:** 1980.

**Ingredients:** Soy flour [textured soy flour], unhulled [dehulled] sesame seeds, miller’s wheat bran, oat flour, rolled oats, tamari soy sauce, potato flour, food yeast sage, crushed red pepper.

**Wt/Vol., Packaging, Price:** 15 oz In 1 quart Pure-Pak carton.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label. Undated. Label reads: “Sovex. The Granola People. Sausage Flavor–Without Meat. Makes 18–2.5 inch patties. Contains No Animal Products. No Imitation Ingredients. No Artificial Colors or Flavors. No MSG. No Sugar.” Two recipes.

**1220. Product Name:** Tempeh of the Sea (Containing Sea Vegetables).

**Manufacturer’s Name:** Soy Plant (The).

**Manufacturer’s Address:** 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.

**Date of Introduction:** 1980.

**Ingredients:** Organic soybeans, arame, hiziki [hijiki], dulse, nori, kelp, vinegar, rhizopus oligosporus culture.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Rectangular Label in Soy Plant scrapbook. 1980. 4½ by 4 inches. Black on white. An oval illustration in the center shows plants growing by the sea shore.

Shurtleff & Aoyagi. 1985. History of Tempeh. p. 56. Sliced, this tempeh “resembled fish sticks.”

**1221. Product Name:** Westico Vege-Steak (Beef-Flavored Textured Vegetable Protein).

**Manufacturer's Name:** Westico Foods.  
**Manufacturer's Address:** West Indies College, Mandeville, Jamaica.

**Date of Introduction:** 1980.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Robert Folkenberg. 1983. Feb. 15. "This company, organized in 1970, is presently a fairly small operation, producing about 2 tons of TVP each week. We fully expect this rate of production to increase dramatically in the near future."

Form filled out and labels sent by Westico. 1990. June 28.

Note: This is the earliest known commercial soy product (one of two products) made in Jamaica.

1222. **Product Name:** Dinner Roast (Meatless Roast Beef).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1980.

**Ingredients:** Textured vegetable protein (soy protein concentrate and isolate, wheat gluten), egg whites, soybean and/or corn oil, partially hydrogenated soybean and cottonseed oil, flavorings (hydrolyzed vegetable protein, onion, monosodium glutamate, turmeric, artificial flavor, extracts of spices), disodium guanylate, disodium inosinate, modified corn starch, calcium caseinate, dextrose, sodium caseinate, yeast extract, lecithin, salt, carrageenan, niacinimide [niacinamide], caramel color, iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

**How Stored:** Frozen.

**New Product–Documentation:** Label copyrighted 1980. Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

1223. **Product Name:** Pizza Italiana (Meatless).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1980.

**Ingredients:** Topping: Water, textured vegetable protein (wheat gluten, soy protein concentrate and isolate), calcium and sodium caseinate, partially hydrogenated soybean and cottonseed oil,...

**Wt/Vol., Packaging, Price:** 15 oz (424 gm) paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1980, dated. "Completely Meatless. Contains Vegetable Protein."

1224. **Product Name:** Vegetarian Lasagna.

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1980.

**Ingredients:** Water, cooked lasagna noodles, dry curd cottage cheese, tomato paste, flavorings (artificial flavors, garlic and onion powder, spices, onion disodium guanylate, disodium inosinate), textured soy protein concentrate, modified corn starch, corn syrup solids, calcium caseinate, partially hydrogenated soybean oil...

**Wt/Vol., Packaging, Price:** 18 oz (510 gm) paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1980, dated. "Deliciously Blended with Vegetable Protein."

1225. **Product Name:** Veelets Parmesano (Meatless).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1980.

**Ingredients:** Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), water, tomato paste, flavorings (artificial flavors, onion and garlic powder, spices, disodium guanylate, disodium inosinate), soybean and/or corn oil...

**Wt/Vol., Packaging, Price:** 14 oz (398 gm) paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1980, dated. "A Meatless Vegetable Protein Delicacy in Rich Tomato Sauce."

1226. **Product Name:** Stakes Au Sauce (Vegetarian Beefsteak).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1980.

**Ingredients:** Water, textured vegetable protein (soy protein concentrate and isolate), wheat gluten, flavorings (artificial flavors, onion and garlic powder, onion, spices, disodium guanylate, disodium inosinate), soybean and/or corn oil...

**Wt/Vol., Packaging, Price:** 14 oz (398 gm) paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1980, dated. "Meatless and Delicious. Contains Vegetable Protein."

1227. Calkins, Fern; Register, U.D.; Sonnenberg, Lydia. 1980. *It's your world vegetarian cookbook.* Enlarged, 2nd ed.

Washington, DC: Review and Herald Publishing Association. 304 p. Illust. Index. 24 cm. Sponsored by Dept. of Nutrition, School of Health, Loma Linda University, and Southern California Conference of Seventh Day Adventists.

• **Summary:** It's Your World" is a television series hosted by Art Linkletter and sponsored by the Seventh-day Adventist Church in Glendale, California. The original edition was published in 1973. Contains a number of quotations on diet and health by Ellen G. White.

Soy-related recipes include: Catalina cutlets (with cooked soybeans, p. 13). Florentine fritters (with soybeans, p. 18). Frontier fritters (with soybeans, p. 21). Saucy soy sizzlers (with soybeans, p. 23). Hawaiian chestnut balls (with tofu, p. 24). Tofuburgers (p. 24). Tasty tofu timbales (p. 25). Millet gourmet casserole (with soybeans, p. 34). Tender soya broccoli (with FriChik and Soyannaise, p. 40). Savory baked beans (p. 45). Baked soybeans Americana (p. 48). Beans 'n' apples (p. 50). Soybeans Hawaiian (p. 54). Mandarin garden soys (using Loma Linda Green Soybeans, p. 60). Celebrated red rice (with adzuki beans, p. 63). Oriental tofu (p. 69). Stir-fry vegetables with tofu. Luncheon tofu (p. 70). Tofu dippers (p. 71). Pepper-olive tofu (p. 78). Emperor's feast (with tofu, p. 78). Tofu "steak" (p. 79). Tofu scramble (p. 88). Quick 'n' easy tofu (p. 89). Crispy tofu sticks (p. 89). "Cheesy" spread (with tofu, p. 96). Soybean soup a la Creole (p. 106). Tokyo special (with tofu, p. 111). Tofu salad (p. 130). Tofu stuffing (p. 132). Garlic-dill dressing (with tofu, p. 145). Tofu sour crème topping (p. 151). Garden vegetable dip, or Confetti dip (with tofu, p. 152). Whole-wheat bread (with tofu, p. 174). Wabash fried mush (with soy beans and soy flour, p. 182). Tofu "jerky" (p. 200). Roasted soy smacks (dry-roasted, seasoned soynuts, p. 201).

Pages 42-43 contain a cooking guide for dry beans, peas, and lentils. Adzuki (or Chinese red) beans are included. Concerning soybeans: "It is better to soak soybeans longer than other beans—2 or 3 hours or overnight. Soaked beans in small quantities may be frozen in containers as a convenience. Thaw before cooking or drop frozen into boiling water. 2/3 teaspoon of salt is enough for each cup of dry soybeans, or use 1 tablespoon chicken-like seasoning and ¼ to ½ teaspoon salt. When pressure cooking 1 cup soybeans, use 2 cups water; 1 teaspoon of oil may be added to keep from foaming; at the end of cooking time cool immediately under cold running water. Soybeans have a more nutty flavor and are more tender when they are served immediately after cooking."

Many recipes also called for commercial branded soy-based products made mostly by Loma Linda Foods or Worthington Foods. Pages 273-75 give a list of "Vegetable Protein Alternates (Analogues)." Those made by Loma Linda Foods or Worthington Foods are so marked. Details on tofu are given on pages 24, 69, 79, 275, and 298. Address: 1. B.A.; 2. PhD, RD, Chairman, Dep. of Nutrition; 3. M.A., R.D., Assoc. Prof., Dep. of Nutrition. All: School of Health,

Loma Linda Univ., Loma Linda, California.

1228. Easterday, Kate Cusick. 1980. The peaceable kitchen cookbook: Recipes for personal and global well-being. New York, NY, Toronto, Canada: Paulist Press. 313 p. Illust. by Ragna Tischler Goddard. 21 cm. [28 ref]

• **Summary:** A vegetarian cookbook. Page 45 describes how to sprout various seeds and beans, including soybeans. The section titled "Soybeans Simplified" (p. 66-75) begins by asking "Why are soybeans so highly praised?" then gives recipes for: Basic cook soybeans. Soyburgers (from cooked, mashed soybeans). How to make soy milk (12 cups, using soy flour or soybeans). Soy "coffee." Tofu (soybean curd). Tofu sandwich spread. How to roast soybeans (dry). The last page of the section, titled "Soybean Terminology" gives 1-2 line descriptions of: Soy grits, soy meal, soy granules, soy flour, soy powder (extra fine soy flour, used to make soy milk), soya (implies that the product has been toasted), roasted soybeans, tofu, miso, tamari.

Other soy-related recipes include: Wheat-soy pancakes (with soy flour, p. 169). Soy fritters (with mashed soybeans, p. 222). Simple soy bean loaf (p. 228). Vegetarian sukiyaki (with tofu and soy sauce, p. 231). Soy cheesecake (with tofu, p. 291). Address: Illinois.

1229. Fessler, Stella Lau. 1980. Chinese meatless cooking. New York, NY and Scarborough, Ontario, Canada: New American Library. 298 p. Illust. by Janet Nelson. Index. 20 cm.

• **Summary:** This vegetarian cookbook, which contains more than 180 recipes, demonstrates vividly how much Chinese vegetarian cookery depends on soyfoods—especially tofu (bean curd). The glossary includes excellent descriptions of bean curd—fermented red (*nan-ru*), bean curd—fermented white (*tofu-ru*), bean curd—pressed threads or noodles, bean curd sheets (*tofu-pi* [*yuba*]), bean curd sheets (*er-ju*), bean curd sheets—pressed or hundred-leaf (*bai-yeh*), bean curd sticks (folded bean curd sheets), brown bean paste or brown bean sauce, bean paste—Szechuan hot bean or spicy soy, bean sprouts—soy or yellow, fermented or salted black beans, Hoisin sauce, Oyster sauce (with soy), soy sauce, soy sauce—light or thin.

The chapter on soups stocks notes that soybeans or soybean sprouts have a delicate flavor and are most suitable for making stock. Soy sprouts, which are much larger than mung bean sprouts, have a more chewy texture and a very sweet, delicate taste; they are often used to strengthen the flavor of a dish (see recipe p. 90).

Soy-related recipes (each with the name written in Chinese characters) include: Mixed pressed bean curd threads (p. 68). Spinach and deep-fried bean curd puff salad (p. 70). Soybean sprout salad (p. 73). Pressed bean curd salad (p. 76). Monks in a storm of wind and snow (Asparagus and bean curd salad, p. 82). Soybean sprout stock (p. 90). Deep-

fried bean curd and mung bean noodle soup (p. 93). Spinach and bean curd soup (p. 98). Seaweed and bean curd soup (p. 99). Soybean soup (p. 100). Soybean with fried gluten soup (p. 101). Asparagus and bean curd soup (p. 106). Goddess of Mercy (Kuan-yin) soup (With bean curd and tiger lily bulbs, p. 112-13).

One long chapter (p. 118-160) is titled “Bean curd dishes, mock meat dishes, and mock fish dishes.” It gives good definitions of and home-scale recipes for: Bean curd. Deep-fried bean curd puffs. Plain pressed bean curd cakes. Five-spice pressed bean curd cakes. Braised deep-fried bean curd puffs. Bean curd with oyster sauce (not vegetarian). Braised bean curd. Spicy bean curd. Steamed bean curd with spicy bean paste sauce. Bean curd with tomatoes. Bean curd with fresh mushrooms. Cold bean curd. Stubborn stones’ obeisance (Fried bean curd with vegetables). Braised frozen bean curd with chives. Braised Fukien [Fujian] bean curd. Stir-fried Chinese chives with pressed bean curd. Stir-fried pressed bean curd with carrots and bamboo shoots. Mock lion’s head (with five-spice pressed bean curd). Stir-fried green peppers with mock meat (pressed bean curd). Mock moo goo gai pan (Stir-fried pressed bean curd with vegetables). Mock roast duck (with dried bean curd sheets and soy sauce). Mock soy sauce chicken (with fresh or frozen hundred-leaf bean curd sheets). Mock velvet chicken (fried bean curd with egg whites). Spicy mock chicken (with mock soy sauce chicken). Mock ham (with dried bean curd sheets). Bock abalone (braised gluten balls). Mock mu-shu pork (with five-spice pressed bean curd, shredded). Fried mock squab (with chopped pressed bean curd). Mock twice-cooked pork (with five spice pressed bean curd). Bean curd with thousand-year eggs.

Other interesting recipes include: Wheat gluten (homemade mein jin or vegetable steak, p. 165-66; At Chinese grocery stores, wheat gluten is sold in various forms—fried, dried, steamed, boiled, canned, and frozen). Fried gluten balls. Boiled gluten. Lo Han vegetable dish (with fried wheat gluten balls, p. 169-70). Chinese mustard greens in black bean sauce (p. 173-74). Stir-fried leeks with bean curd (p. 186). Fresh soybeans stir-fried with fresh mushrooms (p. 187). Boiled fresh soybeans in their pods (p. 188). Bean sprouts stir fried with wheat gluten (p. 190). Stir-fried soybean sprouts with bean curd puffs (p. 191). Cauliflower and bean curd sticks (p. 192). Winter melon with red fermented bean curd sauce (p. 195). Stir-fried asparagus with fermented bean curd (p. 197). Stir-fried lettuce with white fermented bean curd sauce (p. 198). Sweet and sour fried gluten and cabbage (p. 208). Two immortals in the apricot garden (fried gluten with vegetables and almonds, p. 209). Braised eggs with bean curd sticks (p. 213-14). Scrambled eggs with fermented bean curd (p. 214). Bean curd with salted eggs (p. 216-17). Wonton soup (with fresh bean curd, p. 233-34). Fried wontons (filled with five-spice pressed bean curd, coarsely chopped). Soybean milk, sweet

soybean milk, and salty soybean milk (p. 247-48). Deep-fried crullers (*yu chiao*; sometimes served in hot soymilk, p. 249-50). Noodles with spicy bean paste sauce (and five-spice pressed bean curd, p. 258-59).

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the term “red fermented bean curd” to refer to red fermented tofu.

Note 2. This is the earliest English-language document seen (Oct. 2011) that uses the term “white fermented bean curd” to refer to regular white fermented tofu. Address: Cornell Univ., Ithaca, New York.

1230. Gay, Martin; Gay, Kathlyn. 1980. Eating what grows naturally. South Bend, Indiana: And Books. 137 p. Illust. by Brian “Woodie” Byrn. 21 cm. [75 ref]

• **Summary:** A book about natural foods, with some vegetarian recipes. Martin was born in 1950. Pages 79-80 give ten menus based on Shelton’s food-combining principles, including (5) Stir-fried vegetables and tofu cubes, and (9) Tofu-vegetable casserole with green salad. Page 106 gives definitions of miso, tamari, tempeh, and tofu. Soy-related recipes include: Soy burgers (with ground, cooked soybeans, p. 108), and tofu casserole (p. 109).

1231. Himalayan International Institute. 1980. The Yoga way cookbook: Natural vegetarian recipes. 4th ed. Honesdale, Pennsylvania: Himalayan International Institute of Yoga Science and Philosophy. 249 p. Illust. Index. 22 cm. 1st ed. as 1974.

• **Summary:** A vegetarian and natural foods cookbook. Pages 8-9 describe in detail how to make tofu at home. A list of special ingredients includes soybeans, soy granules, grits, and flour, miso, tamari, and tofu. Soy-related recipes include: Tofu spinach pie (p. 18). Soybean tacos (p. 32). Soy burgers (p. 36). Tofu burgers (p. 40). Tofu rice with vegetables (p. 47). Soybean rice (p. 49). Soy-potato soup (with soy granules, p. 105). Miso soup (p. 116). Tamari soup (p. 117). Tofu salad dressing (p. 127). Scrambled tofu (p. 228). Tofu-avocado supersandwich (p. 233). “Short order” tofu luncheon.

1232. Kasin, Miriam. 1980. The age of enlightenment cookbook. New York, NY: Arco Publishing, Inc. v + 342 p. Illust. Index. 25 cm. [1 ref]

• **Summary:** A vegetarian cookbook. The chapter on Basic Ingredients discusses dairy substitutes (incl. recipes for soy milk [made from whole soybeans or soy flour], coconut milk, nut milk {from blanched almonds or raw cashews}, and soy margarine [free of preservatives]), bean curd (as a substitute for panir), and soy flour. The chapter on beans (p. 129-37) has recipes for: Roasted soybeans. Aduki (azuki) beans. Stewed soybeans. Soyburgers. Soy loaf. Bean curd (tofu or dofu). Stir-fried or deep-fried bean curd. Scrambled bean curd.

Other soy-related recipes include: Soy mayonnaise (p. 170). Soyburgers or tofu sandwiches (p. 186). Soy spread or dip (with whole soybeans, p. 187). Soy noodles (with equal parts soy flour and unbleached white flour, p. 201). Noodles and bean curd (Japan, kitsune udon or domburi, p. 205).

1233. Kendig, Joan; Kendig, Keith. 1980. *Modern vegetable protein cookery*. New York, NY: Arco Publishing, Inc. viii + 339 p. Illust. Index. 24 cm. [1 ref]

• **Summary:** Contents: Preface. Introduction. Cooking hints. Recipes: Basic recipes, oven loaves, oven patties and individual forms, skillet burgers, pies and crust items, crepes and thin pancakes, casseroles and oven dishes, skillet dishes, stuffed vegetables, pasta dishes. Appendixes 1, 2. Contains 200+ recipes. Joan Kendig was born in 1938. Address: USA.

1234. Nelson, A.I.; Wei, L.S.; Steinberg, M.P. 1980. *Foods from whole soybeans*. In: F.T. Corbin, ed. 1980. *World Soybean Research Conference II: Proceedings*. Boulder, Colorado: Westview Press. xv + 897 p. See p. 745-62. [12 ref]

• **Summary:** Contents: Introduction: Nutritional value. A concept for preparation of whole soybeans for human food use: Inactivation of the lipoxygenase system, use of sodium bicarbonate blanch, inactivation of anti-nutritional factors, effects of quality and variety of soybeans for direct food use, use of the concept. Home preparation of soymilk: Introduction, experimental, results and discussion, conclusions, recommendations. Soybean breakfast and patty foods: Introduction, raw bean treatments, hydration, tenderization, trypsin inhibitor inactivation, soybean foods. Weaning or breakfast foods: Soy-whole wheat, soy-corn, soy-sweet potato. Fried patty meat substitute: Soy-potato, soy-rice. Conclusions. Notes. Address: Dep. of Food Science, Univ. of Illinois, Urbana, IL 61801.

1235. *Northern Soy*. 1980. *Soyboy Tofu: Cooking with tofu*. Vol. 1 (Leaflet). Rochester, New York. 4 panels each side. Each panel: 14 x 11 cm.

• **Summary:** Brown ink on beige paper. On the front panel is an illustration of a laughing boy in a circle with soybean pods and leaves at the bottom. "High protein. Low calorie. Low sodium. No cholesterol. Tofu, the subtly sweet soybean 'cheese,' has been the key source of protein in Japan and China for thousands of years."

Contains 9 American-style tofu recipes, including tofu for babies, pan fried tofu, tofu burgers, tofu cranberry loaf, tofu onion dip, eggless tofu salad, and tofu leek quiche. Address: 30 Somerton St., Rochester, New York 14607. Phone: 716-442-1213.

1236. Pennington, Jean A.T.; Church, Helen Nichols. eds. 1980. *Bowes and Church's food values of portions commonly used*. 13th ed. Philadelphia, Pennsylvania: J.B.

Lippincott Co. xvii + 186 p. Index. 28 cm. 1st ed. was 1937. 2nd ed. was 1939. 10th ed. was 1966. [62 ref]

• **Summary:** The index contains entries for: Beans (but no soy). Cheese and cheese food (but alternatives). Cheez-its, Chili-vegetarian. Float, Dairy Queen. Flour. French fried potatoes (Arthur Treachers, Burger Chef, Burger King, Dairy Queen, Long John Silver's, McDonald's, Wendys). Ice cream bars. Infant formulas (Isomil-Ross Labs, L-Soyalac-Loma Linda, Neomullsoy-Syntex, Nursoy, ProSobee-Mead Johnson, Soyolac-Loma Linda). Irishmoss [Irish moss]. Milk (goat, human, Indian buffalo, reindeer, sheep, soybean, whole). Miso. Natto. Oils. Soyamaise dressing (p. 122). Soyamel. Soybeans, fermented. Soybean curd. Soybean flour. Soybean milk. Soybean nuts. Soybean oil. Soybean protein. Soysauce. Teriyaki sauce. Tigers Milk Bar. Tofu. Tom Collins. Veg Skalops. Veja-Links. Vegeburger. Vegetarian products made mostly by Worthington Foods and Loma Linda (p. 22-23): Beef style roll, Chicken style, Chic-Ketts, Chili, Corned beef style, Croquettes, Dinner cuts, Fry Sticks, Gran Burger, Meatloaf mix, Nuteena, Prosage, Proteena, Rediburger, Smoked beef style, Stakelets, Stripples, Tasteecuts, Turkey Style-Smoked, Vega-links, Vegeburger, Veg Skalops, Vegetarian Burger, Vitaburger, Wham. Yogurt.

Aluminum is not among the lists of trace minerals in foods in the back. The book *does* list the following as trace minerals: chromium, cobalt, fluoride, iodine, molybdenum, nickel, selenium, and tin. Address: 1. Formerly Instructor of Nutrition, City College of San Francisco, San Francisco, California [Now with U.S. Food and Drug Administration, Washington, DC]. Phone: 202-245-1064.

1237. Raymond, Jennifer. 1980. *The best of Jenny's kitchen*. Mendocino, California: Mendocino Presbyterian Church. [x] + 180 p. Preface and Foreword by Lois Jean Raymond. Illust. Index. 22 cm. [9 ref]

• **Summary:** A vegetarian cookbook (comb-bound), printed with brown ink on tan paper. Contents: Nutrition-Nutrition: protein. Nutrition: carbohydrates. Nutrition: fats. Nutrition for pregnancy and lactation. Vegetarian diets for pets. Legumes and grains. Sweeteners. Salt and sodium.

Menu planning-Menu ideas. Seasonal eating. Growing sprouts (a table, p. 31, gives details on sprouts grown from aduki beans, alfalfa, chia, cress, lentils, wheat, rye, radish, and mung). "Mung bean sprouts are the typical bean sprout used in Chinese cooking." Protein content of recipes.

The recipes-Breakfasts. Soups. Salads, spreads and sandwiches. Breads. Entrees. Desserts. Making the basics.

Sources, substitutes, and equivalents-Sources (books). Substitutes. Equivalents.

Soy related recipes: Tofu, scrambled (for breakfast, in place of eggs, p. 45). Tofu salad sandwich spread (p. 74). Soy paté (with cooked whole soybeans, as a sandwich spread, p. 76). Tofu cornbread (p. 82). Tofu burgers (p. 97).

Soybean crockpot stew (p. 108). Tofu stuffed shells (p. 127). Tofu lasagne (p. 129). Tofu & vegetables (p. 142). Okara & coconut macaroons (p. 151). Okara tofu spice bars (p. 152). Making tofu at home (p. 163). Many recipes call for either “tamari soy” or “soy sauce.”

Publishing history: First published by Mendocino Presbyterian Church, Mendocino, California. 1980. Comb binding. Next published by SunRay Press. 1980.

Jennifer sold the rights to this self-published vegetarian cookbook to Avon Press, which published it in 1982 as *The Best of Jenny's Kitchen: Cooking Naturally with Vegetables* (180 p.). Address: Teacher of Vegetarian Cooking, College of the Redwoods, Mendocino Coast Branch, California.

1238. Shandler, Nina; Shandler, Michael. 1980. How to make all the “meat” you eat out of wheat: International gluten wheat “meat” cookbook. New York, NY: Rawson, Wade Publishers, Inc. xiv + 241 p. Index. 24 cm. [10 ref] • **Summary:** How to make and use wheat gluten in a vegetarian diet, with 250 American and international recipes. Contents: Acknowledgements. Author’s note. Part I. Introducing wheat “meat”: 1. The cost of the meat-centered diet: How meat consumption affects ecology, economy and health, food economy, fuel conservation, water reserves and pollution, heart disease, cancer and meat eating, premature aging, chemical residues in meat, medical costs. 2. Introducing wheat “meat”: a low-cost, homemade alternative to meat (gluten meats cost about \$0.15 per serving). 3. How to make “meat” from wheat: Preparing raw gluten (from 7 cups whole wheat flour), seven varieties of wheat “meat,” cutlets (a veal substitute), steak (a mock beef steak), ground gluten (a hamburger taste-alike), spiced links (an alternative to sausage), roast with a beef flavor, seawheat (a clam alternative), poultry pieces (chicken-flavored wheat “meat”), using the reserved starch, bran and germ: Gluten-free crackers, and cold crunchy cereal.

Part II. Hundreds of international ways to serve wheat “meat”: 4. All-American wheat meat recipes. 5. Mexican wheat “meat” food. 6. Latin American. 7. British. 8. French. 9. Spanish. 10. Italian. 11. Austrian. 12. Greek. 13. African. 14. Indian (from India). 15. Chinese. 16. Japanese wheat “meat” cooking.

Note 1. Tamari soy sauce and miso are used to flavor a number of recipes in this book. Other soy-related recipes include: Spiced bean curd and cutlet (with tofu, p. 212). Spares with black beans (mock spare ribs with “Chinese prepared black beans [fermented black soybeans], p. 216). Family-style bean curd (with tofu, p. 219). Poultry with orange-flavored soy sauce (p. 228-29). Seawheat in soy and ginger sauce (p. 229). Seawheat with bean curd and vegetables in casseroles (p. 230). Seawheat with vinegared miso (p. 231). Note 2. This book does not mention “seitan,” but a Japanese recipe titled “Seawheat in Soy and Ginger Sauce” is quite similar; It uses tamari soy sauce and grated

gingerroot, and kombu is used in making Seawheat, a clam alternative. A photo on the inside back dust jacket shows Nina and Michael Shandler.

Talk with Michael Shandler in Amherst, Massachusetts. 1992. Jan. 14. He and Nina became vegetarians in 1969. They were first introduced to wheat gluten in about 1970; at that time they were served gluten steaks by a friend, Jayanti Peterson, in Santa Cruz, California. At the time their book was published, they were probably not aware of “seitan.” They did not know of any other books on gluten when they were writing their book—which is why no gluten books are listed in their bibliography. The book sold about 2,000 copies in hardcover and 5,000 to 6,000 in quality paperback; it went out of print 6-7 years ago. They have had many requests for the book since it went out of print. He is an organization development consultant and Nina is a child psychologist. Food is their hobby. Their best-selling book is *The Complete Guide and Cookbook for Raising your Child as a Vegetarian* which has sold over 50,000 copies (Shocken & Ballantine). Address: Amherst, Massachusetts. Phone: 413-549-1671.

1239. Tsuji, Shizuo; Sutherland, Mary. 1980. Japanese cooking: A simple art. New York and Tokyo: Kodansha International. 518 p. Introduction by M.F.K. Fisher. Illust. (510 line drawings by Yoshito Suzuki. 16 color pages, mostly photos). Index. 27 cm.

• **Summary:** This is a beautiful and informative book by a great Japanese chef, though the awkward English terminology often sounds like “Japlish.” The illustrations are very nicely done, but the artist’s name does not appear in the book. Tsuji is the author of 29 books on gastronomy, travel, and music. His basic thesis is that “like Japanese and poetry, cooking is simply the result of an acute awareness of the seasons, Freshness and naturalness are the *sine qua non* of Japanese cuisine.”

This definitive treatise on Japanese cooking, the most complete and well-thought-out to date, is written by the head of the *Ecole Technique Hoteliere Tsuji*, the technical hotel school in Osaka, Japan. This is the “largest school training professional chefs in Japan,” according to the publisher.

The excellent “Ingredients” section (p. 53-100) gives detailed descriptions (with Japanese characters) of: Azuki beans (p. 55). including red rice (*sekihan*) and “sweet red-bean paste” (*an*). Bean curd (*tôfu*, p. 56-61) incl. *momen* tofu (regular; “The type described here as ‘regular’ is known in Japan as *momen*—‘cotton’ tofu... ‘Cotton’ bean curd is the type most commonly used in Japan”), *kinu-goshi* (silk tofu), *yakidôfu* (lightly broiled or grilled bean curd), *atsu-age* or *nama-age* (thick cakes), *aburage* or *usu-age* (thin deep-fried tofu), *ganmodoki* (mixed tofu), *kôya-dôfu* or *kôri-dôfu* (“freeze-dried bean curd”), *yuba* (“soybean milk ‘skin’” [soybean milk skin]), *okara* (“bean curd pulp or ‘lees’”).

Note 1. This is the earliest English-language document seen (April 2013) that contains the term *atsu-age* or the term

*usu-age* or the term “thin deep-fried tofu” (all regardless of hyphenation), all of which refer to types of Japanese of deep-fried tofu.

Miso (p. 76-77) incl. shiro-miso, Shinshû-miso, inaka-miso, Hatchô miso, akadashi miso. Soybeans and edamame. Soy sauce (shôyu, p. 90-93) incl. Natural Japanese soy sauce, synthetic soy sauce, Kikkoman, light soy sauce (*usukuchi shôyu*), tamari (“In Japanese cooking tamari is generally used as a dipping sauce or a base for basting sauce such as Yakitori Sauce”). “Dutch traders in Nagasaki in the seventeenth century exported soy sauce to Europe, and it was the secret seasoning served at the court banquets of Louis XIV of France” (sic). Kuzu (p. 93-94). Wheat gluten (p. 98, 60).

Soy-related recipes include: Making soups (p. 151-56). Miso soup (*Miso-shiru*, p. 156-57). Ginger soy sauce (*Shôga-jôyu*, p. 172). Ponzu sauce (p. 172, with soy sauce and tamari). Mustard-vinegar miso sauce (*Karashi-su-miso*, p. 172-73). Dengaku, dengaku miso toppings, and bean curd dengaku (*Tôfu dengaku*) (p. 190-93). Teriyaki (p. 199-202, 370; the meaning in the United States is now different from the original meaning in Japan. Definition and history, homemade teriyaki sauce, teriyaki yellowtail, chicken teriyaki, steak teriyaki). Egg “tofu” (*Tamago-dôfu*, p. 216). Dressings for aemono (salads, p. 246, incl. white tofu dressing, white miso dressing, red miso dressing). Rice with miso soup and pickles (p. 270-71). Nori-roll sushi (*Nori-maki*, p. 300, with freeze-dried bean curd). Fox noodles (*Kitsune udon*, p. 312). Pickling vegetables (*Tsukemono*, p. 315, 318, with miso). Pureed corn soup (*Tômorokoshi surinagashi-jiru*, p. 347, with miso). Thunder soup (*Kaminari-jiru*, p. 349, with “1 cake *tôfu* (bean curd)” and “2-3 cakes thin deep-fried *tôfu* {*aburage* or *usage*}, cut into julienne strips). Potatoes simmered in miso (*Jaga-imo miso-ni*, p. 393). Radish with white miso sauce (*Furofuki daikon*, p. 394). Chinese cabbage and deep-fried tofu (*Age-dôfu hakusai-ni*, p. 398). Tortoiseshell tofu (*Tôfu bekkô-ni*, p. 398-99). Fried and simmered freeze-dried tofu (*Kôri-dôfu age-ni*, p. 399-400). Gold purses (*Fukuro*, p. 400, with thin deep-fried bean curd). Deep-fried tofu (*Agedashi-dôfu*, p. 412-13). Green beans with sesame-miso dressing (*Sandomame goma-miso ae*, p. 420). Savory okra (cold) (*Okura wasabi-joyu*, p. 420-21). Tangy white salad (*Shirazu-ae*, p. 421-22). “River Bank” oyster stew (*Kaki dote-nabe*, p. 433-34, with miso). Simmering tofu (*yudôfu*, p. 436-37). Mushroom rice (*Shiitake gohan*, with “1 cake thin deep-fried bean curd (*aburage* or *usage*),” p. 438-39). Soybeans in the pod (*Edamame*, p. 471-72).

Murasaki (p. 287): Japanese love *sushi* so much that they have developed a special aficionado’s vocabulary. “At a *sushi* restaurant, you do not ask for soy sauce as *shôyu*, but, rather, as ‘purple,’ or *murasaki*. Every shop has its own house sauce, made by reducing soy sauce or thicker *tamari* sauce over heat with *saké*, *mirin*, bonito flakes and so on.”

Since the resulting sauce is darker than regular soy sauce, the name *murasaki* seems appropriate.

The recipe for Abe River mochi (Abe-kawa mochi) uses “1 cup kinako (roasted soybean flour)” as a major ingredient (p. 469).

Concerning azuki beans (red beans; characters small + bean) (p. 55): “This small, red bean is the legume you will most frequently encounter in Japanese cooking besides soybeans (*daizu*). It is used in the cooking of many countries, so it is stocked in most supermarkets throughout the United States. For some historical reason this bean is commonly spelled *adzuki*. This spelling is a Victorian romanization; phonetically, *azuki* is correct.

“These beans are steamed with glutinous rice on special occasions to make the festive red rice (*sekihan*; p. 280). They are more commonly boiled with sugar to make sweet red-bean paste (*an*), which forms the base of a large percentage of Japanese sweet confections (see p. 327). *An* is made in two textures: smooth puree (*koshi-an*) and ‘chunky,’ with beans partially crushed (*tsubushi-an*). If there is no time to make *an* from scratch, ready-made *an* is available canned and stocked in most Japanese food stores.”

Note 2. This is the earliest English-language document seen (March 2006) that uses the term “sweet red-bean paste” to refer to sweet azuki bean paste [*azuki-an*], or the term “smooth puree” to refer to *koshi-an*, or the term “chunky” to refer to *tsubushi-an*. Address: Tsuji Professional Culinary Inst., Osaka, Japan.

1240. **Product Name:** Soysage.

**Manufacturer’s Name:** Mainley Tofu.

**Manufacturer’s Address:** Starks, Maine.

**Date of Introduction:** 1980?

**Ingredients:** Soy pulp [okara], whole wheat flour, oats, soy milk, yeast, fennel seed, soy sauce, salt, cayenne, honey, garlic, mustard, allspice.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** See next page. Label. 1980. Red on white with a bamboo border.

1241. **Product Name:** Kesp (Spun Soy Protein).

**Manufacturer’s Name:** Master Foods (formerly called Dornay Foods).

**Manufacturer’s Address:** England.

**Date of Introduction:** 1980?

**New Product–Documentation:** Maureen Byrne. 1988. Oct. p. 53. A spun soy protein brand-named Kesp was originally developed by Courtaulds, which sold the technology to Master Foods (formerly Dornay Foods) in the early 1980s, but products containing Kesp have now been discontinued.

1242. **Product Name:** Wheat Meat Burger.

**Manufacturer’s Name:** Sheffield Seitan.

**Manufacturer’s Address:** South Wheelock, Vermont.

**Date of Introduction:** 1980?

**Ingredients:** Seitan (wheat gluten cooked in a broth of soy sauce, garlic powder, and cayenne).

**Wt/Vol., Packaging, Price:** 5 oz.

**New Product–Documentation:** Talk with Leo Denby, owner of Sheffield Seitan. 1998. Feb. 3. The company's second product, this patty was introduced in about 1980.

1243. **Product Name:** Super-Links (Regular, or with Artificial Frankfurter Flavor).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1980?

**Wt/Vol., Packaging, Price:** 19 oz can. Retail for \$2.70 (7/90, California).

**New Product–Documentation:** Shurtleff & Aoyagi. 1983. History of Worthington Foods. p. 11. Black and white photocopy of label sent by Worthington Foods.

1244. Xiques, Linda. 1981. A surprised convert to tofu [Wildwood Natural Foods]. *Pacific Sun (Mill Valley, California)*. Jan. 16-21. p. 2. Food & Drink section.

• **Summary:** The author (whose last name is pronounced HEE-kays), formerly skeptical about tofu, becomes a convert to "Tofuism" after this visit to Wildwood and a talk with the four partners. Bill Bramblett, the partner in charge of production, is the former breakfast manager at the Sleeping Lady Cafe. Paul Orbuch is a commercial photographer, and Frank Rosenmayr a building contractor. Describes the company's tofu making process and equipment (including a Rietz disintegrator). The company has 18 part time employees. Gives recipes for Vegan Quiche and Tofu Mayo.

"Wildwood Natural Foods started out in August 1980 as a wholesale sandwich and 'deli' products supplier. A month later, the founders decided to start making their own tofu since they were stuffing so much of it into their sandwiches. Their Brown Rice and Tofu Sandwich is highly popular with the Marin vegetarian set, and the 'Tofunofish Sandwich' not only uses tofu for the 'nofish' but features 'tofunoegg'

mayonnaise. Wildwood's latest invention, the Tofu Steak Sandwich, is rising on the charts as well."

Bramblett explains that Wildwood makes four or five batches of tofu a day, each starting with 20 lb of dry soybeans and ending up with 40 lb of tofu. "It's magic!" He has written a song about tofu, titled "Tofunction," which goes: "Rinse 'em up, soak 'em up, grind 'em up, cook 'em up, squeeze 'em up, curd 'em up, press 'em up, cool 'em up, cut 'em up, pack 'em up, eat 'em up!\*

"A quick shuffle and a quick chorus and he was ready for applause. 'Here,' he said, dishing up a small container of hot tofu for me to try. "Isn't this wonderful stuff? So good when it's fresh and few people get to eat it when it's really fresh." Spooning it in, I was surprised at how flavorful it was, tender and delicate. I was softening toward tofu."

"Extending their small-is-beautiful, do-right-while-doing-well philosophy to its logical conclusion, Wildwood Natural Food products are delivered by bicycle. Pulling a small low-slung trailer, Mark Horowitz, a bike racer of some local renown, hauls their wares from Fairfax to outlets as far south as Mill Valley, delivering them fresh, with nary a drop of gasoline wasted."

Photos show: (1) Bill Bramblett using a ratchet press to press soymilk from a stainless-steel vat into a curding barrel. (2) Paul Duchesne, focused on weighing the tofu before packing.

Talk with Bill Bramblett. 2013. May 6. (1) Concerning the four original partners: Paul Duchesne put up his sandwich company and no additional money. Bramblett, Orbuch and Rosenmayr each put up \$12,000 to capitalize the new startup company. (2) Wildwood Natural Foods Inc. started making tofu from the very first day in their new shop in Aug. 1980; they did not start as a wholesale sandwich and deli products supplier and then start to make tofu a month later. However they did continue to make sandwiches (at The Sleeping Lady) using their own fresh tofu as an important ingredient.

1245. Smith, Oak B. 1981. Re: History of Wenger's work with extrusion cooking. Letter to Michael Zitt at Institut National de la Recherche Agronomique (INRA), Nantes,

France, Jan. 21. 6 p. Typed, without signature. [27 ref]

• **Summary:** “We believe that the innovation breakthrough which Wenger made was the development of the Short Time/High Temperature extrusion cooker equipped with continuous application of steam and/or water and/or syrups...

“Wenger started the development of an extrusion pelleting process in about 1938, but that extrusion equipment was cold extrusion equipment and was utilized primarily in the production of feed concentrates for ruminants.”

It occurred to Wenger in 1955 that they could develop an extrusion process which would be a cooking process. Smith persuaded the Wengers in 1955 to proceed with the development of an extrusion cooking process (in those days called an “extrusion pelleting process”). The first machines were delivered in 1957, primarily to the pet food industry. “Up to that time dry pet foods had been made primarily either by baking biscuits, or from kibbled [coarse ground] grains, or by flaking the meal portion of a meal type pet food.” The process resulted in the simultaneous gelatinization of starches, denaturation of proteins, pasteurization of the foods, and bonding of all ingredients uniformly into a bite size chunk or kibble. The first published work on the new development was Smith’s article titled “The How of Expanded” (Petfood Industry, Oct. 1959).

One of the obvious applications of the new technology was in the production of snacks. In about 1964 Wenger developed their smaller X-25 extruders, which have subsequently become the major large snack machines in the market. Capacities of puffed snacks are in the range of 700 to 1,000 lb/hour.

In 1958 Wenger started work to determine whether they could successfully control growth inhibitors (trypsin inhibitor and hemagglutinin inhibitor) which are present in soy proteins. Purdue University in Indiana subsequently confirmed that the inhibitors were inactivated. The first results, with swine, were published in Feedstuffs (4 Nov. 1961).

Oak Smith then suggested to UNICEF, and later to USDA, that extrusion cooking could be used to make low-cost cereal-soy blends for the protein deficient areas of the world. In the early 1960s Wenger was issued a U.S. patent covering extrusion cooking of soybeans and cereal soy blends (#3,385,709). Soon the Northern Regional Research Lab. at Peoria, Illinois, and the medical faculty at the Univ. of Taiwan began to work with and test Wenger extrusion cookers.

Wenger started to experiment with double extrusion in 1966 and made the first deliveries of an X-25 equipped with a secondary cooling and forming extruder in 1968. Double extrusion is used in the production of Uni-Tex meat analogs, breakfast cereal flakes, and third generation snacks.

In May 1975 Wenger applied for a U.S. patent on what is now called the Uni-Tex process. That patent (#3,970,761) was issued to Wenger on 20 July 1976. Address: Chairman,

Wenger International, Inc., 2400 Pershing Rd., Kansas City, Missouri. Phone: (816) 221-5084.

1246. **Product Name:** Tofu [Water Pack, or Vacuum Pack], Soysage, Tofu Pudding, Marinated Tofu.

**Manufacturer’s Name:** Lecanto Tofu.

**Manufacturer’s Address:** Route 2, Box 764, Lake Butler, FL 32054. Phone: 904-496-3714 or 904-496-3698 (HM).

**Date of Introduction:** 1981 January.

**Wt/Vol., Packaging, Price:** Water and vacuum packed.

**How Stored:** Refrigerated.

**New Product–Documentation:** Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: Jean Huffman. Address is given as P.O. Box 444, Lecanto, FL 32661. Talk with Rodney and Carol Prins. 1988. May. They bought the business in late 1983 from Marvel Huffman. They have continued to make the products they bought, and have not introduced any new ones, except vacuum packed tofu. The business is on a small farm. Sales are about \$50,000/year. The business is for sale.

1247. **Product Name:** Pacific Tempeh Burger (Vacuum Packed).

**Manufacturer’s Name:** Pacific Tempeh.

**Manufacturer’s Address:** 1508 62nd St., Emeryville, CA 94608.

**Date of Introduction:** 1981 January.

**Ingredients:** Soy tempeh, water, shoyu, lemon juice, garlic, paprika, thyme, oleic safflower oil.

**Wt/Vol., Packaging, Price:** 7 oz 2 x 3.5 oz burgers. Vacuum packed.

**How Stored:** Refrigerated.

**New Product–Documentation:** See next page. Label.

Undated. 3.25 inch diameter. Brown and white on orange. “A natural hearty meal.” Leviton. 1982. Soyfoods. Winter. p. 27. Sales climbed to 5,000 a week by Nov. 1981. Leaflet. 1982. 8½ by 11 inch. Color. “A what burger? A Pacific Tempeh Burger. A hearty and satisfying cultured soyfood with twice the protein of tofu and more vitamin B-12 than tuna or eggs. Take the taste test.”

Talk with Travis Burgeson of Pacific Tempeh. 1983. April. Pacific Tempeh now makes 4,000 to 4,500 lb/week of tempeh, 75-80% of it in the form of tempeh burgers.

1248. **Product Name:** Tofu Steak Sandwich.

**Manufacturer’s Name:** Wildwood Natural Foods.

**Manufacturer’s Address:** 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

**Date of Introduction:** 1981 January.

**Ingredients:** UFO Tofu by Wildwood, whole grain bread, sprouts, lettuce, brine pickles, mustard, tamari, safflower oil, apple cider vinegar, herbs & spices, sea salt.

**Wt/Vol., Packaging, Price:** 7 oz.

**How Stored:** Refrigerated.

# *A what burger?*

## *A PACIFIC TEMPEH BURGER*

A hearty and satisfying cultured soyfood with twice the protein of tofu and more vitamin B<sub>12</sub> than tuna or eggs. Take the taste test!

PACIFIC TEMPEH • 1508 62nd St., Emeryville, CA 94608 • (415) 655-4441

**New Product–Documentation:** Xiques. 1981. Pacific Sun. Jan. 16. “A surprised convert to tofu... Wildwood’s latest invention, the Tofu Steak Sandwich, is rising on the charts as well. It looks questionable... but it is quite delicious.” Phillip. 1981. May. East West Journal. p. 40 “The Amazing Tofumobile.” Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. “To make tofu steak for tofu steak sandwich, the end cuts of raw tofu blocks are marinated in tamari and baked.

Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on orange-yellow. Silhouette of woods with birds. “Fresh Daily. Ready to Eat Foods. Naturally. Perishable. Keep Refrigerated.”

Note. This is the earliest known commercial soy product named “Tofu Steak.”

1249. **Product Name:** Tofunofish Sandwich.

**Manufacturer’s Name:** Wildwood Natural Foods.

**Manufacturer’s Address:** 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

**Date of Introduction:** 1981 January.

**Ingredients:** UFO Tofu by Wildwood, onions, lettuce, scallions, brine pickles, safflower oil, tamari, apple cider vinegar, garlic, kelp, sea salt, spices, whole grain bread.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Xiques. 1981. Pacific Sun. Jan. 16. “A surprised convert to tofu... The Tofunofish Sandwich not only uses tofu for the ‘nofish’ but features ‘tofunoegg’ mayonnaise.” Phillip. 1981. May. East West Journal. p. 40 “The Amazing Tofumobile.” Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. “The tofunofish sandwich contains many of the same ingredients as the brown rice and tofu sandwich, minus the brown rice. To give it a tuna fish taste and texture, the sandwich has okara in it.

Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. “Fresh Daily. Ready to eat foods, Naturally. Perishable, keep refrigerated.”

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. This product definitely contained okara; Billy will ask Paul Orbuch and Doug Porter why okara was not listed on the label. He thinks he has the original recipe in his archive of old Wildwood recipes that are no longer in production. This was an actual sandwich, but Billy thinks that from time to time Wildwood marketed the Tofunofish filling/spread in a plastic tub.

1250. Worthington Foods, Inc. A Division of Miles Laboratories, Inc. 1981. Dealer wholesale price list–order blank. Worthington, Ohio 43085. 1 p. Feb. 1.

• **Summary:** The following products are listed: Dry Foods:

Soyamel (fortified or regular). Granburger. Kaffree tea bags (regular, mint, or spicy orange).

Canned foods: Vegetarian burger. Chili. Choplets. Vegetarian cutlets. Numete. Protose. Saucettes. Vegetable Skallops. Soyameat (sliced beef, sliced chicken, diced chicken, Frichik, prime stakes), Prime stakes. Worthington “209.” Veg. steaks. Veja-Links. Super Links. Non-meat balls. Sandwich spread.

Frozen foods: Beef, roll. Corned beef (sliced or roll). Smk. [Smoked] Beef (sliced or roll). Beef pie. Tuno pie. Chicken (sliced, diced, or roll). Chik Stik. Chicken pie. Chic-Ketts. Wham (sliced or roll). Veja Links. Prosage (patties, links, or regular). Bolono (regular or roll). Meatless salami (regular or roll). Smk. [Smoked] turkey (sliced or roll). Veg. egg rolls. Veelets parmesano. Stakes au sauce. Vegetarian lasagna. Pizza Italiana. Dinner roast. Fillets. Stakelets. Friplats. Tuno. Address: Worthington, Ohio. Phone: 614-885-9511.

1251. Miller, Jim. 1981. Re: Chronology of Quong Hop’s firsts in American soyfoods. Letter to William Shurtleff at Soyfoods Center, Feb. 9. 1 p. Typed, with signature on letterhead.

• **Summary:** In response to Shurtleff’s request for additional information about Quong Hop’s “contributions to the making of soyfoods history in the West, I thought I would send along the following list of firsts and other significant things pertaining to our own involvement in soyfoods, just to set the record straight.”

1972–“The first orientally owned and operated tofu company to make a significant move to introduce tofu to the American consumer.”

1972–“The first producer of fresh soymilk for the health and natural food as well as the oriental food market.”

1973 Jan.–“The first to promote tofu in its many varieties as an economical and nutritious alternative to meat and dairy products using the enclosed pamphlet and other p.o.p. [point of purchase] material for supermarket promotions.”

1975 Dec.–“The first commercial producer of tofu to use organically grown soybeans.”

1976 Aug.–“The first commercial producer of tofu to use natural nigari.”

1977 June.–“The first commercial producer of tofu burgers” [labeled “Tofu Burgers”]. Note: Azumaya started commercial production of tofu burgers labeled “Ganmodoki” in about 1937.

1978 April.–“The first producer of vacuum packed nigari tofu.”

1980 May.–“The first to produce aseptically packed creamy tofu dressings requiring no refrigeration.”

1980 Sept.–“The first to produce a line of frozen tofu entrees for sale to the Western market for natural convenience stores.” Address: Quong Hop & Co., 161

Beacon St., South San Francisco, California 94080. Phone: 415-873-4444.

1252. Schmit, Matthew. 1981. Fresh tofu comes to Northern Cal. Arcata, California. 2 p. Feb. 13. Unpublished manuscript.  
 • **Summary:** “The Tofu Shop of Arcata, California, officially opened its doors on December 12, 1980, after a year of low-key planning and three months of shop/equipment renovation. Owners Matthew and Susanne Schmit label the shop ‘a soy deli and whole grain bakery,’ and have designed the wholesale and retail operation to be a family run business.

“Upon entering the 500 sq. ft. shop, customers find themselves in a quaint, hand-crafted retail area, offering a full line of whole grain breads and a variety of ‘tofu-support grocery items’ such as sauces, condiments, sea vegetables, grains, and cookbooks. Deli specials, recipes-of-the-week, and soy news items are listed on central bulletin boards. Regular deli features include soymilk, tofu cheesecake, tofu-pumpkin pie, ganmo patties, and tofu-spinach turnovers. Behind the service counter customers can see dough mixers and baking ovens, and portions of the tofu-making process are also visible from the shop’s front windows—all an attempt to bring the consumers closer to the source of their food.

“The traditional-style cauldron shop is presently producing 100 pounds of firm nigari tofu per day with a capacity of 300 pounds per day. The equipment is all American made and adapted to its present function. Grinding is done with a C.W. Bell steel plate grinder. Soymilk is extracted with a traditional cider press. Settling boxes are actually stainless steel steam table inserts with drilled holes. Pressing is done with a custom-made jig using cargo jacks as adapted by Surata Soyfoods of Eugene, Oregon (Soyfoods, Summer, 1981).

“Future plans for the shop include upgrading the tofu equipment to increase production capabilities, and at the same time developing the deli facility to attract a larger cross-section of the community. Matthew and Susanne Schmit are dedicated to the community-level tofu shop concept and are happy to play a part in the growth of a viable small shop model in the United States. For information call or write: The Tofu Shop, P.O. Box 4716, 768 18th Street, Arcata, California, 95521. Phone: (707) 822-7409.” Address: 768 18th St., Arcata, California 95521. Phone: 707-822-7409.

1253. Yoshimura, Sam. 1981. Re: Chronology of work at Madison Foods and reminiscences. Letter to William Shurtleff at Soyfoods Center, Feb. 20. 2 p. Typed, with signature.

• **Summary:** 1937-1943. Sam attended Madison College and received a B.S. degree in nutrition in 1941. “At that time extensive study on soy beans and human nutrition was conducted at the college under the direction of Francis

Dittes, (Ph.D. in nutrition) Phillip Chen, (Ph.D. in chemistry) and Perry Webber (Ph.D. in nutrition). Madison Foods (owned by the college) was manufacturing various canned and dried vegetable protein products including Kre-O-Soy (soy milk) and Cheze-O-Soy (seasoned tofu) and marketed them nationally. I received valuable experience working in the food plant.

1943-1946. Sam went to Emmanuel Missionary College located in Berrien Springs, Michigan (now renamed Andrews University), and received a B.S. degree in agriculture in 1945.

1945-1956. Sam returned to Japan and re-established San-iku Foods (owned by the Japan Missionary College). The college was closed during World War II. The company made canned and baked products based on wheat and soy proteins and marketed them extensively, including at Mitsukoshi, Seibu and other department stores. A series of pilot scale tests of soy milk production was conducted under the direction of Dr. Harry Miller. However, they did not start commercial production due to the somewhat weak public response to the product.

1956-1963. He worked for Madison Foods in Tennessee, where he was responsible for managing the production, research, and development program. Various canned vegetable protein products were produced. Madison Burger based on wheat and soy protein and improved Cheze-O-Soy were well accepted by the market. At the beginning of 1962, production of Infa Soy using Dr. Harry Miller’s formula, was started under the direction of his son, Willis Miller; J.B. Craw was general manager at that time.

1963-1964. Sam left Madison Foods and went to work for Madison Hospital (owned by the organization). He was assigned to develop economical vegetable protein products suitable for hospitals, schools and other institutions. A series of frozen products including the so-called “Sam’s Chicken,” made with wheat protein [gluten] and tofu, were formulated. The product was well accepted by institutions as it had a torn chicken-like texture. “It was a least expensive product. I understand a dish prepared with Sam’s Chicken (supplied by Southern Missionary College) received recognition at the International Restaurant Show in Chicago several years ago.

1965 to present. He joined Worthington Foods after Worthington acquired Madison Foods. Worthington sent him to Africa Basic Foods Inc. in Uganda, East Africa, to assist development of soy protein products. During his 6-month stay the company produced soy milk, tofu, CSM (combination of corn, soy and powdered skim milk) and other high protein products for hospitals and the school lunch program. It was a missionary project for the company to take part in solving kwashiorkor problems. It was an unforgettable and rewarding experience for Sam. He is a staff member of the R&D department, especially assigned to develop new products. He is also a professional member of the Institute of Food Technologists.

For information regarding Krem-O-Soy and other products from the early days of Madison Foods, contact Dr. Register (Chairman, Dep. of Nutrition, Loma Linda Univ.) or Dr. Shirou Kunihara at the same university. They were students at Madison College and did R&D work for the food plant. The son of Dr. Philip Chen (deceased) is at the Weimar Institute, Box A, Weimar, California 95736. Address: 8200 Colonial Meadows, Westerville, Ohio 43081. Phone: 614-882-0625.

1254. Leviton, Richard. 1981. Tofu plant profiles: Soycrafters on the Island [Luke and Suni Lukoskie of Island Spring on Vashon Island, near Seattle, Washington]. *Soyfoods* 1(4):42-44. Winter.

• **Summary:** “From the back step of Island Spring’s soyfoods plant on Vashon Island near Seattle, Washington, when you take a moment’s break from making tofu and look out over the orchard and small plane airstrip, you enjoy a stunning view (when the sky is clear) of towering, snowcapped Mt. Rainier, rising 14,000 feet above sea level some 120 miles to the south. Island Spring, Inc., founded in 1977 by Luke Lukoskie and Suni Kim, his wife, shares space in a broad, squat building with Wax Cannery, a small-scale orchardist and fruit juice bottling company that constructed the Island Spring production space to their specifications. Outside the tofu plant, there’s a miscellany of second-hand steam kettles and bulk holding tanks and Army surplus discards, that Mr. Lukoskie was quick to scrounge up and rejuvenate for his production needs.

“The Island Spring plant is tightly laid out with five long aisles of equipment, workspace, and production supplies, flanked by an overhead loft that runs along the back wall and houses dry materials, coagulants, labels, and boxes. Immediately outside the shop, a metal silo stores 50,000 pounds of dry bulk soybeans which are augured, when needed, into the shop for soaking in either steam kettles on wheels or in stainless steel twin compartment moveable tanks. The soaked beans are then scaled up in measures (the batch size is 140 pounds of beans and 30 gallons of water) on a large industrial scale wrapped in plastic against the ubiquitous moisture, placed in polyethylene tubs, and hoisted to the floor of their five-foot raised platform. The worker mounts the platform to dump the hydrated beans into the hopper of their soybean mill (a J.C. Ford Master wet corn grinder, which they bought for \$2,850 in 1976; 548 Monterey Pass Road, Monterey Park, California).

“The worker tends two adjacent 60-gallon steam kettles that receive (alternately) the ground soybean puree from the mill; the foam is sprayed down with cold water, and when the cooking is finished, the slurry is pumped into their home-made, hand-hydraulic soymilk press. After extraction, the soymilk is pumped into one of three steam kettles that serve as curding barrels. Each barrel, which has a 120-pound capacity, produces three 40-pound batches of tofu curds, or

enough for three forming boxes. The soymilk is coagulated using either nigari or calcium sulfate. The curds are then ladled into the three forming boxes, most of the whey is drained off before ladling, and buckets filled with water are hoisted on top of the lids for weight. The finished tofu is sliced on the lid which floats in the water in the cooling tank; it’s sliced according to an imprinted grid that forms a cutting pattern on the tofu during pressing. The cooling tank, which is 25 feet long and was purchased for only \$300, holds 1,800 pounds of tofu, has circulating cold water, and Freon coils for chilling the water (not presently used). Metal screens on four-inch risers are set on the tank bottom to facilitate packing and to prevent the tofu from making contact with the tank bottom. Almost all of the tofu (silken and regular) is packaged in 16-ounce tubs, then packed in cardboard boxes and cooled until delivery. In late October the daily tofu production was 15 batches (1,800 pounds) requiring four people working 6½ hour shifts. Mr. Lukoskie reports that 70 percent of their tofu sales are to Washington supermarkets.

“Island Spring produces both regular and silken tofu (calcium sulfate-based, made every 10 days in 120-pound batches) for a weekly total of 10,000 pounds. One thousand pounds are converted into Delicious Steamed Tofu, fresh griddled slabs of tofu packed in a soy sauce, 480 pounds of Soyloaf, 210 quarts of Soyfreeze [soy ice cream] (described in *With Spoon in Hand*, this issue), nine gallons of soymilk daily, and some 700 pounds of soy tempeh every week.

“Let’s look briefly at the Island Spring tempeh process. For tempeh, the daily batch size is 80 pounds of dry soybeans that produces 260 eight-ounce units. They use a CeCoCo dehuller for bean dehulling, an item they purchased second-hand in 1976 for less than \$1,000 (purchased originally in Japan in 1966); this removes most of the hulls and the rest are skimmed off when the beans are boiled. The dehulled beans are kept at a racing boil for 30 minutes in a portable steam kettle, followed by spin-drying in the centrifuge. This requires three or four loads to get the beans sufficiently dry. This stage is slow as each load handles only 25 pounds of beans.

“The inoculated beans are packed in shallow tofu tubs which have no bottom aeration or drainage; therefore excess moisture in the beans condenses on the top lid and “rains” down on the fermenting soybeans (rather than escaping as steam), sometimes causing spoilage or retardation of the *Rhizopus*. The beans and inoculant are blended thoroughly in a Leland rotary mixer and vinegar is added; then the inoculated beans are scooped out and placed in eight-ounce tubs to be stacked on trays on moveable bakery racks. The tubs are heat-sealed with film and holes are pricked in the film with a special nail punch. This punch has been sterilized for one hour in a special Sterilizing Hood that purifies and filters air with fans and ultraviolet light; the hood is also used as a sterile workspace for tempeh starter production. The tempeh is incubated in a 6 foot x 6 foot incubator at 85°F for

12 to 18 hours. For the last step, they apply ‘crack-and-peel’ tempeh labels over the pin-pricked film, and refrigerate until delivery.

“As a soy plant, Island Spring is a model to emulate, impressive for its efficiency, economy and scale, thrift, ingenuity, and product wholesomeness. Specifically, here are 14 points of commendation: (1) their bulk soybean storage and auguring system, one of only a few such systems in the country; (2) the innovative use of steam kettles and the concept of ‘kettles on wheels’ which saves space; (3) the efficient but inexpensive dehuller and wet grinder, both not commonly known; (4) the trim production floor layout designed for compartmentalization of products, high-volume production, and efficiency; (5) the large cooling tank with inside raised mesh and Freon coils that was still inexpensive; (6) the use of removable steam injection hoses for the ‘kettles on wheels’; (7) the marvelous steaming bell that is lowered over the racks of Soyloaf to the floor with a steam hose injected in the side, then hoisted up out of the way when not in use;

“(8) iodine dip buckets for hand disinfecting, soaking tanks for production cloths, and the general high level of sanitation awareness; (9) the Sterilizing Hood used for tempeh starter production and purification of the nail punch; (10) the use of shallow broad sinks at the curding barrel stations for utensils used in coagulation; (11) the electric insect grill suspended from the ceiling; (12) the simple pumping system that moves the puree from the grinder to cooker, slurry from cooker to press, and soymilk from press to curding barrels; (13) the use of both nigari and calcium sulfate, unusual among Western shops; (14) their unique batch-piecework payment schedule that enables some production workers to earn over \$7 an hour, including a health plan and flexible schedule, making Island Spring workers just about the highest paid soycrafters in the country.

“Island Spring has not only mastered the demands of engineering a smooth production system with low-technology, low-expense solutions, they have also introduced North America’s pioneer Soycrafters Apprenticeship Program, an invaluable service where soycrafters are trained for three weeks in all aspects of soyfoods production and business management. Apprenticeship Program Director Steven Sloan reports they receive 50 inquiries a month, that they have graduated 15 students already, and that several of them have since inaugurated their own soy plants in places like Utah and Mexico. Other innovations continue. The tempeh makers are experimenting with producing preformed tempeh burgers by incubating the tempeh in round petri dishes; already they are selling 75 four-ounce patties weekly. To streamline tofu production, Mr. Lukoskie will install a new Okita three-compartment cooker and a Brown-Sweco soymilk extraction unit; and to simplify forming box tofu pressing, he will construct a series of overhead hydraulic beam presses with cement weights. With this new

system he expects to increase his production capacity per hour by 25 percent. In addition, Island Spring is the first shop in America to install Bean Machine’s brand new BMI Disintegrator for soybean grinding.

“As for new products, Younghee Kim, Suni Kim’s sister, is developing a commercial *kim che* [*kimchi*, *kim chee*, *kimchee*] (fermented Chinese cabbage, very popular among Koreans) for the Western, rather than Oriental (which has suppliers) market in Seattle. Their label describes *kim che* as ‘a spicy Korean pickled condiment in a piquant sauce,’ and includes, in one-pint jars, ‘napa cabbage, green onions, garlic, ginger, red pepper, water, salt.’ *Kim che* contains no preservatives with a shelf life of at least 50 days, and requires refrigeration after opening.”

Photos show: (1) Emptying hot okara into a steel barrel at Island Spring. (2) Suni Kim Lukoskie. (3-4) Two views of the inside of the plant. (5) Laminar sterilizing hood for tempeh-starter. Address: Colrain, Massachusetts.

1255. **Product Name:** Tofunofish Salad (Vegetarian Tuna Salad).

**Manufacturer’s Name:** Redwood Valley Soyfoods Unlimited.

**Manufacturer’s Address:** P.O. Box 371, Redwood Valley, CA 94570.

**Date of Introduction:** 1981 February.

**New Product–Documentation:** Letter from Richard Rose. 1987. Aug. 29. 16 oz.

1256. Shurtleff, William. 1981. Dr. Harry Miller: Taking soymilk around the world (Continued–Document part III). *Soyfoods* 1(4):28-36. Winter.

• **Summary:** Continued. “Introducing Soyfoods to America: Undaunted, Dr. Miller returned to the U.S., convinced that soymilk was destined for worldwide acceptance. He decided to settle in Mt. Vernon, Ohio, where he had formerly gone to school and later taught. Dr. Miller’s oldest son, Willis, had returned from Shanghai after the plant there had been destroyed and in 1938 started his own business, Miller’s Soy Foods, in Utica, New York. Later that year it moved to Washington, DC, and was successfully marketing canned soymilk, okara spreads, and gluten cutlets.

“When Dr. Miller returned to the U.S. he suggested that he and his son go into business together; Willis liked the idea. Working with his son, Dr. Miller set up a company called the International Nutrition Foundation and then began searching for a suitable site in Mt. Vernon for their new soy dairy. Soon they found a 140-acre farm, containing a number of fine springs, located several miles outside of town—and for the remarkably low price of \$7,000. Dr. Miller borrowed money from his brother Clarence to purchase this farm, then moved into the one large house on the property. Willis moved his soyfoods equipment from Washington, DC, into a garage near the house and got the plant running while the

new buildings were being built. In April 1939 Clarence, Dr. Miller's second son, left his job in Washington, DC, and went to Mt. Vernon to help with the work; he later became accountant and treasurer of the soy business. To help raise money for the soymilk operation, Dr. Miller set up a private part time medical practice, with an office in one wing of the local hospital. Although he had very little money, Dr. Miller made plans for a 60- by 130-foot building, which he planned to enlarge later by adding a second story. A local high school had been recently torn down and he obtained all the bricks for free if he would haul them away. So each evening after his medical work was done, Dr. Miller and his sons trucked the bricks over to their land, cleaned them, and built the new soy dairy building. The surgeon's skilled hands were not too delicate for the rough work. The original building still stands strong; today it houses the office, lab, and pilot plant where Loma Linda still makes Soyalac.

"The new plant was completed in the fall of 1939 and the first products, canned Soya Lac (made in a pressure cooker and fortified with vitamins and minerals) and Soy-A-Malt were available late that year; powdered Soya Lac was first produced in 1940. But contrary to Miller's expectations, the American public was simply not ready for soymilk; acceptance was painfully slow. He decided that, in order to survive, he would have to develop new products, try to get his soymilk approved by the American Medical Association, and, in the meantime, sell his soymilk and related soyfoods to ready markets in East Asia.

"With his typical boundless energy, Dr. Miller, now 61 years old, started by setting up a plant near the soy dairy to can fresh green soybeans of the tasty, large-seeded or vegetable variety, which were grown on the farm. Partially because of the mushrooming growth of interest in soyfoods during World War II (due to the rationing and high prices of meat, milk, eggs, and cheese), these found a ready market and became his most profitable product, with 40,000 cases a year being sold at supermarkets and health food stores around the Midwest by 1943. The company's best selling product (which was not as profitable due to the high production costs) was Miller's Cutlets, a canned gluten entree. He began to develop other meat analogs similar to those developed initially by Dr. J.H. Kellogg at Battle Creek. He now perfected his acidophilus soymilk but sold it only to the local Mt. Vernon hospital since he did not want to kill the culture by sterilization required for long distance distribution. (In 1934, Kellogg had patented a similar acidophilus soymilk.) He made tofu from his basic soymilk and did extensive experiments, working with Ohio State University, in making a fermented tofu cheese; tofu was pressed as hard as possible, inoculated with Cheddar microorganisms, then allowed to ripen. The product was fairly good but often excess moisture in the tofu led to the growth of unfriendly bacteria. Next came a soymilk ice cream. Dr. Miller put all of his medical income into the

soyfoods business and by 1940 the company was producing an exciting line of vegetarian soyfoods and meat substitutes, sold nationwide, mostly at health food stores. A pamphlet of that year lists the following, all sold under the brand name 'Miller's': Soya Lac, a liquid soymilk in natural and chocolate flavors sold in 13 ounce and 30 ounce cans. Soy-A-Malt, spray dried soymilk in natural and chocolate flavors in one-pound cans. Soya Sauce, produced in South China. Soya Curd, made by coagulating Soya Lac with lactic acid to make curds, then blending this with tomato puree, pimento, and soy sauce. Soya Loaf, made from a seasoned mixture of okara (soy pulp and gluten). Soya Spread, for sandwiches, also made from okara and sold in 16-ounce jars. Whole Soya Bean Flour, a naturally alkaline full-fat soy flour. Green Soya Beans, canned, vegetable type. Giant Soya Beans, cooked and canned mature vegetable-type soybeans, and Soya Beans with Tomato Sauce, edible soybeans canned with tomato puree and malt.

"Products added years later included Vegetable Chili Con Carne and Vegetable Chop Suey, both sold in 16-ounce jars with wheat gluten used in place of meat. In 1942 Kellogg's Battle Creek Food Company had a similar line of soyfoods: Soy Protose (a meat analog), Soy Gluten Wafers, canned Green Soybeans, Soy Flour, Soykee (soy coffee), and Soy Acidophilus. A few years later Dr. Miller developed Vege-Links, the world's first meatless wiener, made of seasoned okara and wheat gluten packed in a sausage casing, and Vege-Chee, a cheese analog made of curdled soymilk."

Note: This is the earliest English-language document seen (Oct. 2013) that uses the term "cheese analog" to refer to a Western-style soy cheese.

"During the years that he was developing new products, Dr. Miller made countless trips to the American Medical Association trying to convince them that the research he had done in China proved that his Soyalac was an acceptable substitute for dairy milk in feeding both infants and adults. But the AMA, apparently strongly influenced by the dairy industry, refused to grant any recognition to the product. Finally, after one fruitless trip, a member of the board took Dr. Miller aside and explained frankly that he would never get endorsement for his product unless he started to market his product specifically for that 7 percent of U.S. infants who are allergic to cow's milk, and avoided unfriendly comparisons with cow's milk. Dr. Miller was not too pleased, since he had hoped that soymilk would gradually replace cow's milk in the American diet. He felt that soymilk made much more efficient use of the world's land to feed people, and that it was a lower cost, more healthful product of comparable nutritional value. Yet he reluctantly accepted the AMA's advice and within a few months had their approval. Soyalac began to be prescribed by physicians for allergic infants and soon started to sell quite well." Continued. Address: Lafayette, California.

1257. Shurtleff, William. 1981. Dr. Harry Miller: Taking soymilk around the world (Continued—Document part IV). *Soyfoods* 1(4):28-36. Winter.

• **Summary:** Continued. “From 1939 to 1941 most of Miller’s powdered soymilk and some of his other soyfoods were sold in the Philippines and China. However World War II cut off his business, so he began to promote his soymilk more vigorously in the U.S. not only as an allergy-free infant formula that would not clog the nipple, but as a healthful beverage that alkalized the bloodstream and was good for diabetics, postoperative patients, ulcer and colitis patients, and those with atherosclerosis.

“Before World War II started, Dr. Miller had set up a branch of his International Nutrition Laboratory and a Soymilk plant in the Philippines at 41 Nagtahan in Manila. It was run by Paul Sycip (pronounced SIS-up), a private Chinese Christian (but not Adventist) businessman, who had come briefly to Mt. Vernon to learn Miller’s process, and buy equipment. Miller was in the Philippines helping to set up the plant when the Japanese attacked. During the war the Japanese stole all of the soymilk equipment but did not harm the building. In 1948 Mr. Sinclair Pinnick, a foreman at the Mt. Vernon plant since 1944, went to the Philippines, took new equipment, and got the plant reestablished. It produced regular soymilk, the first ever in the Philippines.

“The expanding success of Soyolac encouraged the growth of competing products but Dr. Miller didn’t mind. A true evangelist, he was happy to see the message finally reaching the people.

“To fully appreciate Dr. Miller’s great energy and diverse talents, we should note that during the early 1940’s, as he developed, produced, and marketed his line of innovative new soyfoods, he also maintained an active medical practice, partially because the other two doctors at the hospital where he worked were called for military duty, and partially to support his work. Prior to World War II he would fly to the Philippines about once a year, do 12 to 15 thyroid surgeries a day for two to three weeks, give half of his income to the hospital there, then return to America with the balance. In 1942 he and his brother bought the local hospital in Mt. Vernon where he worked; his son Clarence came in to manage, renovate, and expand it. Miller was the only surgeon in Knox County (population 35,000).

“At his Mt. Vernon soy dairy, Miller was always the first one to start the day’s work. One day, while experimenting with a new formula, he cut off end of his finger in a food grinder. He calmly picked up the severed part, walked into his office, and sewed it back on.

“During the years he spent introducing soyfoods to America, Dr. Miller was one of the most active supporters of the American Soybean Association, a regular speaker at conventions and contributor of articles to the *Soybean Digest*. His first speech was “The Role of the Soybean in Human Nutrition” (1940) and his first article “Soybeans and

the Orient” (1943), was followed by “Feeding the World with Soya” (1946), “Survey of Soy Foods in East Asia” (1948), and others. Then in September 1958 he was made an honorary member of the Association and awarded a gold medal.

“By the late 1930s the seeds that Dr. Miller had planted in East Asia began to sprout. It is interesting to note that most of the remarkable expansion of interest in and production of soymilk that has taken place throughout Asia during the last half of the twentieth century can trace its origins directly back to the work of Dr. Miller.

“While Dr. Miller was in Shanghai, an Adventist named Howard Hoover had come and learned the soymilk process, then started his own soy dairy and health food plant in a mission school in Canton in about 1938. This was the first offshoot.

“In 1940 Mr. K.S. Lo of Hong Kong asked Hoover if he would help him set up a plant. Hoover got approval from Miller, then went to Hong Kong and designed Lo’s first plant. [Note: K.S. Lo recalls the origin of his company quite differently; we accept his version of the story]. By 1940 Lo’s Hong Kong Milk Factory was making homogenized soymilk and selling it in natural and chocolate flavors, like dairy milk, in standard half-pint bottles sealed with a paper cap and hood. The soymilk was sweeter and a little thinner than Miller’s and had more of the natural (so-called beany) flavor, which the Chinese prefer. By 1942, when the Pacific War broke out, Lo’s company had gone broke. But in 1945, after the war, the company reopened as the Hong Kong Soya Bean Products Co., Ltd, and reintroduced their product, now called Vitasoy, not as a milk substitute, but as the world’s first soymilk soft drink. By 1974 Vitasoy passed Coca Cola to become Hong Kong’s best selling soft drink, with sales of 150 million bottles a year. In the meantime many other large soymilk plants had started up in Singapore, Malaysia, and Thailand.

“In 1948 the Chinese Quartermaster Department, with the help of Dr. Miller’s son, Willis, set up the largest soymilk plant in the world in Shanghai, using a process patterned after that used in Ohio, to make spray-dried soymilk. Costing over \$1,000,000, it had a capacity of 5 tons of dry soymilk every 12 hours. The dried soymilk would be mixed with puffed rice, pressed into wafers, and packed into cans, then opened in the field and soaked with hot water for rations. The plant was completed and ready for operation (Dr. Miller was at the dedication ceremony) just prior to the Communist takeover of Shanghai in 1949.

“Research and Work Around The World (1949-1977): In 1949, at age 70, Dr. Miller accepted the invitation of the Adventist church to take over the direction of the Shanghai Sanitarium and reestablish a soy dairy there. China was in the throes of revolutionary war and Shanghai was still held by the Nationalist forces. A daring pilot dropped Miller at the besieged Shanghai airport, hardly pausing to stop. But

Shanghai fell to the Communists in May 1949; Miller was soon evacuated, and returned to America.

“In 1950 Dr. Miller’s second wife died. Shortly thereafter he decided to sell his Mt. Vernon business. There was the increasing pressure of running a food plant and although sales were good (\$1.25 million gross in 1950) profits were only \$120,000 due to high taxes. He wanted to devote more of his time to research and medicine. Although offered a large sum of money by a private company outside the Adventist denomination, he decided to divide the company into two parts, the meat analogs and the soymilk plus related products, and sell these to Adventist-run firms. In June 1950 he sold the meat-analog part of his business (gluten meats, nut loaves, frankfurters, etc.) to Worthington Foods in Worthington, Ohio, a private company owned by Adventist laymen that had been making meat analogs since 1939. They bought the patents, recipes and formulas, equipment, technology, and good will that went with Miller’s meat analog business. Most of these analogs contained no soy. Worthington kept the brand name “Miller’s” for several years thereafter as they sold Miller’s Cutlets, Miller’s Burger, Miller’s Stew, Vege-Links, and the like. Willis Miller worked with Worthington for some time after the sale.

“In early 1951, Dr. Miller sold the rest of his business at a very low price (book value) to Loma Linda Foods of Riverside, California. This sale included the Mt. Vernon land, buildings, equipment, technology, and recipes and formulas for soymilk, canned fresh green soybeans, Vege-Cheese (a canned tofu cottage cheese) and related products. All these products continued to be produced in Ohio. Loma Linda Foods, an integral part of the Seventh-day Adventist Church, was founded in 1906 and had run a plant in Riverside making meat analogs, soymilk, and other foods since 1936. Dr. Miller had always believed that the process for making soymilk was not something that he had originated; the key to it had been a gift to him from a higher power. Thus, he felt it was simply not his to sell. So he gave the process to the Adventist church but sold the rest of the business to Loma Linda Foods (they operate the Mt. Vernon plant to this day), and loaned them the money to buy it. They paid him in installments and he returned half of the money to them for them to set up laboratories and a pilot plant in their headquarters at 11503 Pierce Boulevard in Riverside (the town was then called Arlington). Here he established the International Nutrition Research Foundation, which he further endowed heavily with his own funds; 95 percent of its future research was on soyfoods. He bought a home nearby. For the three years following his wife’s death he worked intensively on soyfoods research. In 1951 Loma Linda first introduced Soyagen, a lightly fortified soymilk for adults to match their Soyalac for babies. Miller did extensive work on further eliminating the beany flavor from soymilk using a vacuum pan and flash pasteurization. By 1958 his labs had developed new and improved soymilks, soy cream,

improved acidophilus soymilk and ice cream, cottage cheese, a soy-cream cheese spread, cholesterol-free cheese, and a non-dairy margarine.” Continued. Address: Lafayette, California.

1258. Stepanske, Kenneth. 1981. Madison Foods, Worthington Foods, and Loma Linda Foods (Two interviews). Conducted by William Shurtleff of Soyfoods Center, Feb. 12 and Feb. 15. 4 p. transcript.

• **Summary:** Kenneth started work at Madison in 1964, when the college lost its accreditation. He had been working at Worthington before that. Discusses of how Sam’s Chicken was made, using tofu.

1259. **Product Name:** Tofu Sausage.

**Manufacturer’s Name:** Vegetable Protein Co. (The).

**Manufacturer’s Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1981 February.

**Ingredients:** Incl. tofu.

**New Product–Documentation:** Talk with Johnny Weissman, inventor. 1992. March 31. In Feb. 1981 he introduced a Tofu Sausage, which tasted like bologna. A 6-ounce mixture of spices and tofu in a cellulose casing, it was cooked in a smokehouse. At one point Michael Cohen of Lightlife Foods made John’s Tofu Sausage for about 6 months.

1260. MacIvor, Charles R. 1981. Re: Dr. John Harvey Kellogg’s work with meatlike products and soyfoods. Letters to William Shurtleff at Soyfoods Center, March 4 and April 28. 3 p. and 1 p. Typed, with signature.

• **Summary:** Protose was the first meat analog made by Dr. Kellogg, introduced in 1896. Nuttolene was next. It was named Nuttose later to rhyme with Protose. Battle Creek Steaks and Battle Creek Skallops followed later, sometime before 15 Oct. 1944, as they were listed in the 1944 dealer retail price list. None of these products contained any soya. Peanut butter was first made by Dr. Kellogg in 1892. “I never heard that it was patented.”

In 1960 when Battle Creek Food Co. was purchased by Worthington Foods, Protose was a mixture of wheat gluten and peanut meal. Vegetable Steaks and Vegetable Burger were made of pure gluten with certain seasonings.

Mr. MacIvor worked in the sales division of Battle Creek Food Co. from 1929 to 1939. He was writing a book on Dr. Kellogg but it will probably never be published because it is too big and he can’t condense it.

Update: Talk with Lenna M. MacIvor. 1995. Oct. 20. Charles MacIvor, her husband, died of a massive stroke about 10 years ago, on about 28 Dec. 1985. He was age 85 at the time. He was very clear of mind until days before his death. His book on Dr. Kellogg, which he titled “The Lord’s Physician,” was never published. She and her daughter each

have a copy of the manuscript, which is about 700 pages long, and contained extensive original information. She will try to send a photocopy of the pages concerning the development and manufacture of Protose. She now lives at P.O. Box 32, Route 11, Hendersonville, North Carolina 28792-8233. Address: Route 8, Box 164, Hendersonville, North Carolina 28739. Phone: 704-684-8329.

1261. Wood, Debbie. 1981. Dining out. Good bet: Good Nature Deli. *Suburban Trib (Oak Park, Illinois)*. March 13. Section III. p. 8.

• **Summary:** Good Nature Deli, with 8 tables and 20 seats, is located at 810 Harrison St. in Oak Park. The owners, Kevin D. O'Brien and Mary Ellen Sackett, run a meatless restaurant which they claim is the only nondairy restaurant in the state of Illinois. Soy-based recipes include happy turkey (with tofu), and soy burgers.

1262. Yoshimura, Sam. 1981. Re: Reminiscences of work at Madison Foods. Letter to William Shurtleff at Soyfoods Center, March 19—in reply to inquiry. 3 p. Handwritten.

• **Summary:** Sam attended Madison College from 1937-1943, then worked for Madison Foods 1956-63. As far as he knows, no graduate of Madison College owns or presently operates a viable soy food plant.

Mr. H.J. Miller was supervisor for canned and cereal sections of the Madison plant when Sam was there. He was not related to Dr. Harry W. Miller.

Okara was used in the Madison Zoyburger exclusively. The product consisted of wheat gluten, okara, tomato paste and seasonings. It was a canned, meat loaf type of product.

Compro was a canned product made of wheat gluten, soy cheese [tofu] and seasonings. It was first distributed commercially in 1957.

Sam's Chicken was modified and called Chickettes. The product contained wheat gluten, soy protein, and seasonings. Address: 8200 Colonial Meadows, Westerville, Ohio 43081. Phone: 614-882-0625.

1263. Hibshman, Dan. 1981. From beans to burgers: Cheap crop brings nutritious rewards [Dik and Sharon Rose of Redwood Valley Soyfoods Unlimited]. *Redwood Rancher Country*. Spring, p. 32.

• **Summary:** A photo shows Dik Rose (with beard and Amazing Grace T-shirt) and wife Sharon under menu posted on the wall.

1264. McDonnell, Kathleen. 1981. From fodder to fast food: Soybeans crop up more than ever on farms and in stores. *Maclean's (Canada)*. March.

• **Summary:** Recently soybean breeders have created early-maturing varieties which are enabling soybeans to spread northward "beyond their traditional growing area in extreme southern Ontario, which now produces more than 90 per

cent of Canada's total harvest." This year substantial acreage will be seeded in Alberta, Manitoba, P.U.I. [Prince Edward Island], Quebec and eastern Ontario.

"With last year's harvest of 26.2 million bushels worth more than \$200 million, Canada has now moved into fifth place among world soybean producers—after the U.S., Brazil, China, and Argentina.

Human consumption of soybeans is definitely catching on in Canada. At one health food store in Vancouver, BC, the most popular item is tofu, or soybean curd, which is now "being touted as the 'yogurt of the '80s.' Packaged tofu is now being sold in major supermarket chains across the country..."

The largest consumers of soy products by far are vegetarians. Elsie Sokol, chief dietitian at Toronto's Branson Hospital (run by Seventh-Day Adventists) "receives 'thousands' of requests from across the country for information about soybeans and gives lectures on their nutritional value and preparation." She believes the day will come when people in general will praise soybean growers. Mary Anderson, who shares her enthusiasm, is one of three partners who run a soy-food restaurant named Soja in Kensington Market. A photo shows Mary, with a tray of soy cheesecake and burgers, in front of her restaurant's sign.

1265. **Product Name:** Soysage [Mild, or Spicy].

**Manufacturer's Name:** Spring Creek Soy Dairy.

**Manufacturer's Address:** 136 Main St., Spencer, WV 25276. Phone: 304-927-1815.

**Date of Introduction:** 1981 March.

**Ingredients:** Okara (soy pulp), whole wheat flour, nutritional yeast, water, salt, caraway, mustard, sage, onion powder, garlic powder, cayenne.

Ingredients in 1988: Okara (fiber from cooked organic soybeans\*), organic whole wheat flour\*\*, nutritional yeast, filtered water, sea salt, caraway, onion powder, garlic powder, sage, mustard, cayenne. \* = Certified by the Ohio

Ecological Food and Farm Association. \*\* = Certified by Western Pennsylvania Organic Growers Association.

**Wt/Vol., Packaging, Price:** 1 lb.

**How Stored:** Refrigerated.

**New Product–Documentation:** Two labels. 1981. 3 inch diameter. Mild is red ink on white. Spicy is red ink on yellow.

Leaflet (8½ by 11 inch, single sided, brown and green on beige) sent by Richard Rose from Natural Products Expo East. 1989. Sept. “Soysage. 100% organic wheat and soy. Each package contains six patties... Spring Creek is worker owned.”

Letter from Tenley Weaver of Spring Creek. 1990. Soysage (Spicy, and Mild) was introduced in March 1981. The current paperboard box (with a color photo on the cover) for Mild Soysage is much more recent. It is 16 oz, refrigerated.

Also enclosed is a leaflet (3 panels each side. Each panel: 21.6 x 9.5 cm. Orange and dark green on beige. Undated). Address: Spring Creek Soy Dairy, 136 Main St., Spencer, West Virginia 25276. Phone: (304) 927-1815. Contents: Okara (soy pulp). Soysage. How to use it, Serving suggestions. Recipe for Soysage quiche. “Spring Creek Soy Dairy is a worker-owned business which has been producing quality soy products since 1979. In addition to our soysage, we offer a complete line of tofu and tofu spreads.”

1266. **Product Name:** [Tofu Meatless Meatballs].

**Foreign Name:** Tofu Pflanzarl.

**Manufacturer’s Name:** Svadesha Pflanzen-Feinkost.

**Manufacturer’s Address:** Aeussere Koetzing Str. 52a, 8492 Fuerth im Wald, West Germany. Phone: 099-73-1066.

**Date of Introduction:** 1981 March.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Svadesha R. Urban. 1990. June 13. This product, which resembles Bolleten, like meatless meat balls, was introduced at Fuerth am Wald. “Pflanzarl” is a special Bavarian name for this kind of product. After moving to Munich in about 1983, he developed a new and improved variety of this product. It is now his second best-selling product after plain tofu.

1267. Wenger Manufacturing. 1981. Wenger Uni-Text meat analog process (Ad). *J. of the American Oil Chemists’ Society* 58(3):Rear cover. March.

• **Summary:** “Both the meat analogs and textured soy meat extenders can be produced on the same equipment. Uni-Text is a universal textured vegetable protein made by extruding any of several inexpensive defatted, high-protein vegetable flours such as defatted soy or peanut flours, concentrates, or grits. Uni-Text is not a meat extender, but is instead a dense, untwisted, uniformly layered, vegetable protein base replacer of meat.” Address: Plant and general offices–Sabetha, Kansas 66534. Industrial sales–Kansas city, Missouri 64112. Phone: 913-284-2133.

1268. Kempadoo, Peter. 1981. Re: My work with soyfoods in Guyana. Letter to William Shurtleff at Soyfoods Center, April 12. 2 p. Typed, with signature on letterhead.

• **Summary:** Peter started making tofu in 1972, when he learned the process from an elderly Chinese gentleman in Guyana. Since then he has made tofu for his family and for the local Seventh-day Adventist Hospital. Two years ago he started a vegetarian society. They enjoy Soyburgers (made from whole soybeans), tokara (tofu with the okara fiber), soynut butter (75% peanuts, 25% soybeans), soy bread (10% okara in whole wheat bread). Address: The Sarvodaya Development Education Organisation Ltd., 423 Golden Grove, E.C.D., Guyana.

1269. Holmes, Charlotte Van Gundy. 1981. Re: Loma Linda Foods and T.A. Van Gundy’s La Sierra Industries. Letter to William Shurtleff at Soyfoods Center, April 27–in reply to questions. 3 p. Handwritten answers between the typewritten questions from Shurtleff.

• **Summary:** Q1. You said the lights in your home were turned off for three months. Did you turn them off or did the electrical company because of unpaid bills? Ans: “Yes [the electrical company turned off the lights], we were too involved with the soy company. All our money went into it.

**MILD SOYSAGE**

**100% Organically Grown Soy and Wheat**

**CHOLESTEROL FREE**

**Net weight 16 ozs. Keep Refrigerated**

**NUTRITIONAL INFORMATION**

Serving size: 1 patty (approximately 2.6 ozs.)  
 Calories: 101      Vitamin B 1: 239% RDA  
 Protein: 7.2g      Vitamin B 2: 274% RDA  
 Carbohydrates: 17.3g      Vitamin C: \*\*

You'll find soysage in the refrigerated section of your local grocery or natural foods store.

We offer both a spicy and a mild variety to satisfy individual tastes and uses.

**Soysage Quiche**

1 whole wheat pie crust  
 ¼ pound soysage, crumble and fry until crispy  
 1 medium potato, boil for 10 minutes and slice very thin  
 ¾cup grated cheese  
**Egg Mixture:**  
 3 eggs      grated ginger  
 ½ cup milk      rosemary  
 Your choice of vegetables.

**Fill pie shell:**  
 Layer sliced potatoes, fried soysage (drained), vegetables (may be sauteed if desired). Sprinkle grated cheese over top. Blend egg mixture and then pour into pie shell. Leave some crust exposed, and cover ingredients.

Spring Creek Soy Dairy is a worker-owned business which has been producing quality soy products since 1979. In addition to our soysage, we offer a complete line of tofu and tofu spreads.

 (304) 927-1815

Our necessities were limited to our needs.”

Q2. You said you canned green soybeans. Were these the fresh immature green soybeans or mature dry soybeans with green seedcoats? Ans: “Green dried beans. Green after drying. We used Mammoth Yellow soybeans for milk [soymilk].”

Q3. In your letter you used various terms for the Protose-like product. You said “Soy Gluten, Soy & Gluten Protose, and Soy Protose.” Which of the three actually appeared on the label of the product? Ans: “Soy Gluten—I believe—it was. Similar to Protose but that was Loma Linda’s name & we could not use it.

Q4. Could you make an estimate of the company’s annual sales in the best year? What year was that? Did the company ever make a profit? Ans: “Yes, but it had to be plowed right back in because of constantly increasing demand. La Sierra was in the embryo state but was successful.”

Q5. In approximately what year did Mr. Kingman start making dairy acidophilus milk? Ans: “Don’t know.” In what year did he start making soy acidophilus milk? This is important since Dr. Kellogg started in 1933 to make Soy Acidophilus milk. Ans: Mr. Kingman asked Dad to help him make soymilk for his soy acidophilus milk in La Sierra. It must have been 1929 or 1930, but it was before we went to Ontario, I’m sure. Mr. Kingman coming to Dad made a profound impression on us. To my knowledge, Mr. Kingman never used dairy milk after finding soy milk. I have used this product and I know the source—even before I became a doctor.

Q6. You said your mother was blind. Since what year? What caused the blindness? Was she totally blind? Ans: “She was blind since 1929. The doctor’s diet caused it—malnutrition. She was considered totally blind.” On Sunday we washed and ironed all day and got ready for the next 5 days run.

In the 1st of school, about Sept. 1929, Mother’s eyes (the whites) became fiery red. It was diagnosed as ‘iritis.’ Just the August before we had heard of iritis for the 1st time. Mother was also in her menopause, which no doubt added stress to her already overloaded school work and home duties. Don’t forget we all worked and carried our own share, yet Mom and Dad had the brunt of it. We went to doctor after doctor. One doctor would send us to another. From White Memorial we were sent to specialists. One Loma Linda graduate doctor put her in bed for 6 weeks on ‘white crackers’ (which we hadn’t used for years) and water—or thin oatmeal gruel & nothing else. Why? God only knows. This developed ulcers (corneal) on both eyes, Then the treatment for this was to burn corneas at 135° with a platinum instrument until a thick scar was formed. This was done so mother’s body had to absorb pus from carbuncles (another name for ulcer in another location) so that the bursting or opening of the ulcer would not let the fluid out of

her eye. The redness still continued. God was very merciful. This did not pain mother very much. Only God’s mercy, nothing else, because she did not take pain medication. After this we moved to La Sierra and Dad made soy milk. Mother begged for carrot juice and soy milk. So we put her to bed (for fear she’d fall to pieces—I guess on such a limited diet). She had these two every hour for 10-12 hours daily. This cleared mother’s eyes of inflammation, but the damage was done. She was blind from the scar black white over pupils.

Q7. Are you aware of any exchange of information between Madison College and Van Gundy? Ans: “No.” (Incidentally note that I put in the information about when Madison started making soymilk and tofu). Ans: “I wouldn’t be surprised if they got Dad’s info for their cannery—but I have no proof. They always said they were first; I always doubted it.

Q8. Do you have any idea when Mildred Lager’s book on soybeans eventually became Dorothea’s book? What prompted Mildred to write her first book about 1943? Since when had Mildred and Dorothy been friends? Ans: “No. Competitors for the same man. Ha! They were never friends.”

Q10. Not important. Q11. Can you tell me where the family was living throughout the period from 1915 to 1920? Was part of this time spent in San Jose? Ans: “On Ranch in San Jose, 10 miles out, 1920. Mom taught in San Jose; Dad was foreman of a ranch—1920-1921. Tired of [?] & indoors. Sonoma 1913-1916, Vallejo 1919 school year only. Dad at Mare Island. Napa 1916-19. Back to Napa 1919-1920. Then to San Jose. Loma Linda 1921. We were not fickle or unstable people, but moving seemed to be in our blood or in Mother’s. Dad worked at night on Mare Island, and would come home to find a note that we had moved and the new address. Even if we lived in some town we’d move every year. We had a family joke if we got past Oct. of the year we would not move.

In 1915 Dad had a hernia operation at the St. Helena Sanitarium so he couldn’t work on Mare Island. That was his only defect. He as rarely ever sick. He worked always 16-18 hours per day. When we was a mechanic in Sonoma for a few months he often worked day & night or into the wee hours of morning in order to get a salesman’s car back on the road. You really have gotten more than you asked for. I hope you can read it & it is more accurately told. You are doing a fine job.

While Dad taught in the College of Medical Evangelists as a technician, mother taught in the academy located there on Anderson & Colton Ave. in Loma Linda. Because they were husband and wife, mother’s and dad’s wages & did not give them their full worth that any other one person received. It was due to this that Dad went to Los Angeles and started teaching so he could get enough money to pursue his lifelong dream of manufacturing [food] products.

“Again I say his first products in 1929 were soy beans,

wheat, garbanzos & brown rice—4 products. That year he added soy milk and soy cheese—cereal coffee—soy spread and soy gluten as he could make his own equipment and machinery. The last 3 products were sold only on order and soon soy prod back them off the market or little used.

Now about mother's blindness. We lived 3 blocks south of Valley and one block west of San Gabriel Blvd.—South of the city of San Gabriel. This was 9 miles from Dad's school in L.A. and 9 miles from Mother's school in Pasadena—an SDA church school. Dot and I went with mother to Pasadena Junior College. I was taking 1st year pre-med & Dot was getting a B.S. degree & finishing college. Dot took part-time work at Pasadena Jr. College, then went on to UCLA for other classes, going to both schools at once. We left at 7:30 to 8 a.m. except Saturdays and Sundays. Got home at 5:30 to 6:00. We also had two boys, ages 11 and 13, friends whose father had died and needed a home. 7 lunches we packed five days a week.

Mother's retinal optic nerves were OK but scars formed a blank curtain over each pupil. Once in a while she could see around at once side if she could tip her head just right and if the light was She could see our faces or color of flowers or bright colors of sunset a rare treat. Mother accepted her cross in Christlike style & gave an inspiration to many of her young visitors. Now if corneal implants had been older and mother younger I would have it done—but not advisable. I had to stay out of school for 3 years on [behalf of] Mother's health and I was glad to do it—while Dot finished college at P.U.C. in 1928. I finished 1929 & was out a year on daddy's death. So I was nine years getting my 5 years of medicine. I would do it over.

Now about Dot. As soon as Dot graduated from La Sierra Academy (1924) she went right to Loma Linda into dietetics. 1924 Fall Mother wanted Dot to be a teacher & did not want Dot to be a dietitian. But she went anyway, not stubborn but steadfast, as soon as she graduated 1927. She became Matron of La Sierra Academy. Good experience for later life. For about 3 months (summer to Sept. of 1927) she was dietitian for White Memorial. I worked any or all shifts setting trays at the White. 1927 Sept. we both went to Pacific Union College (PUC). Dot got B.S. in May of 1928—She carried a heavy course—last 6 weeks school took her out of lab work and she taught the girls in Home Economics classes. The teacher got sick and unless Dot did the teaching the girls would lose the year. At PUC Dot took sewing. She was a past master—could make hats, coats, gloves—anything she wanted. I was slowing. I came in second. Dot took speech classes and was always out in front. I was never jealous, but glad to be less brilliant!—or in her shadow. She was a marvelous sister & we never quarreled. Now about Dot's flare [love]. Dot 1st met Ed in the course of work she did. Now Mildred Lager lectured and knew Ed. Ed loaned her money (\$10,000 I think). After Hulda's death, Dot started going with Ed. But Mildred said or made her boasts

she would marry Ed—& if not make him lose the loan—so he married Mildred. Mildred died from cortisone drug taken for arthritis that she had. Mildred was sick most of the years she was married to Ed. After Dot & Ed married. Dot said 'Now Ed, you really have married a well wife' & in 10 days she broke out from head to foot with chicken pox. That was her only sickness though. Address: Jackson, California.

1270. Buller, Allan. 1981. Re: History of Worthington Foods and its work with soyfoods. Letter to William Shurtleff at Soyfoods Center, April 29. 2 p. Typed, with signature on letterhead.

• **Summary:** "Dear Bill: In response to your letter and telephone call, I'll try to provide you with some information that will be useful to you as you prepare material for your book on soy foods. I'll begin by trying to answer some of the questions you raised in your letter.

"One of the first products which Worthington Foods made containing soy was our Soyloin Steaks product introduced in 1949. That was the same year we also began the manufacture of Meatless Wieners which we later identified as Veja-Links. The change in name was made in 1955. Meatless Wieners, as we began making them in 1949, also contained soy.

"We acquired the rights to manufacture and market products developed by Dr. Harry Miller, who founded and operated International Nutrition Laboratories, at Mount Vernon, Ohio. We made this acquisition in 1950. Among the products involved were Miller's Cutlets, Miller's Cutletburger, and Meatless Vegetarian Stew.

"We began marketing our Soyamel soy milk in the year 1954. By 1956 we had discovered a way to instantize the product so we sold both a non-instantized and an instantized Soyamel for a number of years. We used a spray-dried material in making our Soyamel. The protein we used was Gunthers.

"I might mention that at the time we acquired the rights to manufacture and market vegetable protein foods developed by Dr. Harry Miller, the Loma Linda Food Company acquired rights to manufacture and market the soy milk that Dr. Miller had developed. The Loma Linda Food Company also purchased Dr. Miller's plant at Mount Vernon. Because we had the equipment necessary to produce textured vegetable protein foods, we were not interested in Dr. Miller's factory or equipment.

"In 1960 Worthington Foods acquired the rights to manufacture and market the Battle Creek Food Company products. Because Worthington Foods did not need the plant facilities including equipment, only the rights to the trademarks and recipes were purchased.

"In 1962 Worthington Foods began the production and marketing of frozen foods utilizing spun protein fibers which We produced under license received from Robert Boyer, the inventor and holder of the patent. The first frozen foods

we produced were chicken analogs. We had a frozen sliced chicken that resembled white meat of chicken pressed into chubs. We also had a chicken-like analog that was deep-fat fried and sold in a form that resembled fried chicken. The fried chicken-like product was sold in both frozen and canned form. It was at this time that we began use of the Word Soyameat to describe our canned meat analogs made from spun protein.

“In 1964 Worthington Foods acquired the rights to manufacture and market Madison Foods. Again the acquisition included trademarks and recipes. We operated the Madison Food plant for a couple of years but this proved to be unprofitable; therefore, all manufacturing operations were moved to Worthington.

“Going back in history a bit, I might point out that Worthington Foods was founded in 1939 under the name Special Foods. We were incorporated in December of 1945 under the name Worthington Foods, Inc. In 1970 Worthington Foods merged with Miles Laboratories.

“In response to your request, I am sending you photocopies of price lists dating back to the early beginnings of our company. I have included price lists printed at various intervals to give you some idea of the growth of the product line.

“While this information does not make a history, it may be helpful to you in putting together some information about our company. Certainly it’s better to work from the basis of a few facts than from hearsay. Very truly yours,...”

Allan sends price lists / order forms dated October 1, 1941. Feb. 15, 1945. Aug. 1, 1946. July 31, 1950. Dec. 10, 1950. Nov. 15, 1954. April 1, 1959. May 1, 1961. Dec. 15, 1969. Oct. 1, 1962. July 1, 1964. Address: Executive Vice President, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085.

1271. **Product Name:** Jerky Soy (Vegetarian Jerky) [Mild, or Wild].

**Manufacturer’s Name:** Garden of Eatin’.

**Manufacturer’s Address:** 5300 Santa Monica Blvd., Los Angeles, CA 90029.

**Date of Introduction:** 1981 April.

**Ingredients:** Soy protein, soy oil, water, lemon juice, sea salt, black pepper, garlic, onion, beet powder, natural hickory smoke.

**Wt/Vol., Packaging, Price:** 7/8 oz. in clear plastic bag.

**How Stored:** Shelf stable.

**New Product–Documentation:** Labels. 1981, dated. “100% natural. 100% meatless (and that’s no bull!).” Article and photo in Soyfoods. 1981. Summer. p. 44-45. 7/8 oz. packets retail for \$0.59.

Note: This is the earliest known commercial soy jerky product. It was made from textured soy protein.

1272. **Product Name:** Vegie Yaki (Teriyaki Flavored

Vegetarian Jerky) [Mild, or Wild].

**Manufacturer’s Name:** Garden of Eatin’.

**Manufacturer’s Address:** 5300 Santa Monica Blvd., Los Angeles, CA 90029.

**Date of Introduction:** 1981 April.

**Ingredients:** Soy protein, soy oil, water, honey, ginger, garlic, mustard, coriander, sea salt.

**Wt/Vol., Packaging, Price:** 7/8 oz.

**How Stored:** Shelf stable.

**New Product–Documentation:** Labels. 1981, dated. 100% natural. 100% meatless. (And that’s no bull!). Article and photo in Soyfoods. 1981. Summer. p. 44-45. “100% Natural. 100 Meatless (And that’s No Bull!).” 7/8 oz. packets retail for \$0.59.

1273. **Product Name:** [Seitan, and Seitan Hash].

**Foreign Name:** Seitan, Seitan-Hachee.

**Manufacturer’s Name:** Witte Wonder Products.

**Manufacturer’s Address:** Piet Heinstraat 80, 2518 CK, Den Haag, Netherlands. Phone: 070-464-5225.

**Date of Introduction:** 1981 April.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Sjon Welters. 1982. April 16. “Witte Wonder is a macrobiotic center and production plant for tofu in Den Haag (The Hague); our competitor.” Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 24. Nov. 3. Visited Witte Wonder Products, Piet Heinstraat 80, 2518 CK Den Haag (The Hague). Talked to Nico van Hagen and wife Loes Witteman, the principal tofu makers. They make 900-1,200 kg/week of tofu, plus 500 kg/week of seitan. In 1979 they started their foundation called Stichting Natuurvoeding as a health food shop and in April 1981 began to make 100 kg/week of tofu, plus seitan. Soyfoods Center has labels for Seitan, Seitan-Hachee (both contain soy sauce), and Kikkererwten Pastei made by Witte Wonder.

1274. *Dawson Sentinel (Minnesota)*. 1981. Closing of soy isolate plant heavy blow to community: Eighty-four Land O’Lakes employees affected by closing of plant last Friday. 96(40):1. May 7.

• **Summary:** On 1 May 1981, Friday, Ralph Hofstad, president of Land O’Lakes Inc., officially announced the closing of the soy isolate plant located near Dawson. Made at an open meeting in the Dawson City Building, the announcement was “received in the Dawson community with heaviness of heart.” Following personal remarks of empathy and regret, he read a printed news release which began: “Operation of Land O’Lakes, Inc. soy food processing plant east of Dawson has been suspended for an indefinite period, beginning May 1, 1981.” The facility of 100,000 square feet was built by Dawson Mills in the late 1970s to make “soy isolate and soy analog food products.” The closure was

necessary because the volume of sales anticipated originally has not developed. "Land O'Lakes plans to continue to sell soy isolate and [meat] analog food products.

Note: This is the earliest English-language document seen (Nov. 2014) that uses the term "soy analog" (or "soy analogs") to refer to soy-based meat analogs.

"Extensive efforts are being made to help the 84 affected employees find jobs elsewhere within the regional cooperative or with other employers, Hofstad said. The primary soy processing and Flour Mill activities of the Land O'Lakes Soy Group at Dawson will not be affected."

Note: Two months later (July 1981), the isolate plant building was sold to AMPI (Associated Milk Producers Inc., a cooperative formed in 1969) for cheese manufacturing. As of 2002 AMPI was still operating the plant, which employed 155 people and specialized in cheese processing and drying, milk receiving, and aseptic packaging. AMPI's mission is: "To maximize the return on milk marketed and equity invested, while: 1. Keeping ownership in the hands of current members. 2. Building a viable market for future members. 3. Representing midwest dairy producers in the development of dairy policy."

1275. Smith, Oak B. 1981. Re: History of Wenger's work with extrusion cooking. Letter to William Shurtleff at Soyfoods Center, May 12—in reply to inquiry. 3 p. Typed, with signature on letterhead. [27 ref]

• **Summary:** In 1957 Wenger extrusion cookers were first delivered. In 1961 Wenger delivered the first extrusion cooking systems for processing ground, dehulled full-fat soybeans. Wenger located the only known manufacturer of impact milling equipment that can produce a full fat soy flour from extrusion cooked dehulled ground whole soybeans. This is Alpine GmbH of Augsburg, Germany, which makes the Alpine Contraplex Mill.

Uni-Tex products were first introduced in the USA in 1976. "The Uni-Tex process has not been widely used, primarily because we have been unable to locate suppliers of flavors which could give a meat-like flavor to these extrusion cooked products, since most artificial flavors are very volatile. Recently, we have had some success in locating a supplier of flavors which have been especially developed for Uni-Tex processing and we believe that this will widen the usage of Uni-Tex very much. We are completely satisfied with the structure, the mouthfeel, and the meat-like appearance of the Uni-Tex... I believe that the most promising commercial application for Uni-Tex will be in soups, stew, curries, dry soup mixes, and in the preparation of hard sausages such as Polish sausage, etc." Address: Chairman, Wenger International, Inc., 2400 Pershing Rd., Kansas City, Missouri. Phone: (816) 221-5084.

1276. Sias, Vep C. 1981. Re: Brief history of Cedar Lake Foods. Letter to William Shurtleff at Soyfoods Center,

May 19. Following interview of Feb. 18. 1 p. Typed, with signature.

• **Summary:** "Cedar Lake Foods started in 1949 by Vesper Sias, former employee of Butler Food Products and Cedar Lake Academy. This company began in rooms in the back of the Sias home on a kitchen scale making a similar line of foods as Butler Food Products. The line started with vegetarian chops, vegeburger, soynut cheese, soynut loaf and meatlike. In 1968, Cedar Lake bought the production of Sunnydale Foods of Centralia, Missouri. At the same time, Lang Foods canning division was also purchased and the products called Turketts, Hostess Cuts, Vegebites, Lentil Roast and Breakfast Links were added to the Cedar Lake Line. In 1975, after several months of illness Sias sold Cedar Lake Foods to a corporation of five stockholders who operated business under the name Cedar Lake Foods Inc. of Tennessee. In the spring of 1981 the business was sold to Country Life Natural Foods, a non-profit corporation. At this time, Cedar Lake Foods are produced as a department of Country Life Foods."

Note: Country Life is a self-supporting Adventist group with other health food items such as juices and nut butters. In 1975 Cedar Lake employed 26 people and had sales of \$500,000. Address: 740 N.E. 42nd Terrace, Ocala, Florida 32671. Phone: 904-236-3766.

1277. Miller, Roger W. 1981. Vegetarianism: A healthy diet is quite possible. *Chicago Tribune*. May 21. p. W\_A30D.

• **Summary:** A long article in praise of vegetarianism, and explaining the many benefits of a vegetarian diet. Philosophers ask: What right do humans have to kill and eat other creatures. Nutritionists admit that a balanced vegetarian diet is healthier and leads to less obesity than the standard American diet. Cattle have to eat 16 pounds of grain to produce 1 pound of meat, so ecologists applaud vegetarians.

In 1974 the Food and Nutrition Board of the National Academy of Sciences put an end to the myth that humans need to eat meat in order to be healthy. Their statement on vegetarian diets concluded: "A vegetarian can be well nourished if he eats a variety of plant foods and gives attention to the critical nutrients (needed by all people)." The writer summarizes the Board's recommendations for vegetarians, focusing on legumes, grains, nuts and other seeds, dark green leafy vegetables, and meat alternatives.

Defines vegans, lacto vegetarians, and lacto-ovo vegetarians.

Trappist monks shun meat because they consider it a luxury, and this in conflict with their quest for the simple life. Seventh-Day Adventists, who are vegetarians, generally have fewer death due to heart disease, but this may be due to the fact that many of them do not smoke or drink, and they consume lower levels of fats and cholesterol.

Meat contains no dietary fiber; this it contributes to the U.S. laxative habit that costs several hundred million dollars

a year.

Legumes (such as soybeans, lentils, peanuts, or chickpeas), nuts, and “meat substitutes made from plant protein (usually with a soybean base) are also protein sources for a vegetarian diet. In addition to providing protein, these meat alternatives supply varying amounts of other essential nutrients.”

**1278. Product Name:** Tofu Burgers, Tofu Balls (to Serve with Spaghetti), Tofu Pouches, and Tofu Cutlets.

**Manufacturer’s Name:** American Tofu Corp.

**Manufacturer’s Address:** 6317 Welcome Ave. Suite N1, Brooklyn Park, MN 55429. Phone: 612-536-8741.

**Date of Introduction:** 1981 May.

**New Product–Documentation:** FIND/SVP. 1981, May. “The tofu market: Overview of a high-potential industry.” p. 86, 128.

**1279. Food Engineering.** 1981. Food from a fermenter looks and tastes like meat. 53(5):117-18. May.

• **Summary:** “A food based on *Fusarium* fungus is expected to be tested in British supermarkets later this year. The fungus is produced continuously in a 100-ton-per-year pilot plant” by British food manufacturer Rank Hovis McDougall (RHM), Europe’s fourth largest food manufacturer. The UK government has given the company the go-ahead to test market the product even though it still wants animal trials carried out on the food’s safety. The new food is called “mycoprotein” and its main advantages are that it has a meat-like texture (lacking in other single cell proteins such as bacteria), its mushroom-like flavor is more acceptable than the beany taste of textured soya, and since it grows more slowly than yeasts or bacteria, it contains less ribonucleic acid (RNA). “RHM has managed to reduce the nucleic acid content of mycoprotein to below the acceptable upper limit of one percent. With bacteria, RNA levels have reached as high as 25 percent and with yeasts up to 15 percent.” Mycoprotein is also not deficient in essential amino acids. On a dry-weight basis it contains 45% protein. “The fungal protein thus represents in nutritional terms the first vegetable protein with the biological value of animal protein,” said Professor Arnold Spicer, former RHM research director who was responsible for launching the mycoprotein project.” Three important things have happened to mycoprotein during the past decade. First, continuous fermentation has become a reality and process efficiency is high. It takes only 2-3 pounds of carbohydrate to produce 1 pound of protein by the RHM process. Second, RHM has learned how to turn the slurry of mycoprotein filaments that comes from the fermenter into a very convincing replica of meat, poultry and fish; these are physical, not chemical, treatments. Third, there is an increasing body of knowledge confirming the safety and nutritional value of mycoprotein. Its NPU is 70 to 75 and supplementation with 0.2% methionine raises it to 100

which is equal the standard of protein quality—namely the egg. A photo shows a chicken analog that has been battered and fried.

Note: This is the earliest document seen (Sept. 2004) that contains the word “mycoprotein.”

**1280. Keltner, Steve; Druding, David; Littell, Annee.**

**1981. New Arkansas regional tofu producer: Summercorn Soyfoods.** *Swallows (Newsletter of the New Destiny Federation of Food Co-ops, Fayetteville, Arkansas)*. Spring. p. 8-9.

• **Summary:** The soyfoods business grew out of Summercorn Bakery. It is now producing tofu, soymilk, and soysage. Contains 6 photos of the tofu making equipment, including photos of Keltner, Druding, and Claudia Smith. Annee is Druding’s wife.

**1281. Product Name:** Legume Tofu Lasagna.

**Manufacturer’s Name:** Legume, Inc.

**Manufacturer’s Address:** 150 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 857-9010.

**Date of Introduction:** 1981 May.

**Ingredients:** Feb. 1982: Crushed California tomatoes, organic tofu, water, whole soy and peanut oil, pure vegetable shortening, whole wheat flour, arrowroot, garlic, onion, oregano, basil, parsley, salt, pepper. Pasta: Fancy durum semolina pasta, soy flour, wheat gluten, wheat germ.

**Wt/Vol., Packaging, Price:** 1 lb.

**How Stored:** Frozen.

**Nutrition:** Per 8 oz.: Calories 296, protein 13 gm, carbohydrates 38 gm, fat 9 gm, cholesterol 0 mg, sodium 660 mg.

**New Product–Documentation:** Ad in Whole Foods. 1981. Sept. p. 56. “What’s 2000 years old and tastes brand new? Tofu.” States that Legume Tofu Lasagna is now available.

Food Report (Lehmann). 1982. Jan. Article in Soyfoods. 1982. Winter (Feb.), p. 56. Shows original lasagna label and lists all ingredients. Spot in Vegetarian Times. 1982. Issue #55. March. p. 59. A photo shows the original box with the Legume trefoil logo but no food illustration on cover. “Legume Inc. has announced the addition of Tofu Lasagna to its line of protein meals and snacks. This non-dairy, cholesterol-free meal is made with DeBole’s Jerusalem Artichoke Flour—a specially created blend of organic tofu and spices, and an all-natural whole tomato sauce. Also available are Tofu Ravioli, Tofu Country Pie, Tofu Muffins, Tofu “No Creme” Pies and Tofu Cakes.

Label. 7 by 9 inches. Color boxes. Now it has color illustration of lasagna on cover. “A delicious meal by Legume. 100% natural. No cholesterol. No artificial preservatives. No sugar.” The ingredients are now: Crushed tomatoes, organic tofu, whole wheat flour, water, soy and peanut oil, garlic, onion, oregano, basil, parsley, salt, pepper. Pasta: Unbleached fancy durum semolina, soy flour, DeBoles

American (Jerusalem) artichoke flour, wheat germ, wheat gluten. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Article in Soyfoods. 1982. Winter (Feb.), p. 56. Shows original label and lists its ingredients. Ad in Whole Foods. 1982. March. p. 57. "What's 2000 years old and tastes brand new? Tofu makes the difference!" Same ad in Vegetarian Times. 1982. April. p. 27, and Whole Life Times. 1982. July/Aug. p. 20.

S.L. Jacobs. 1983. The Wall Street Journal. Jan. 24. "Company finds a niche selling frozen foods made with tofu." A large Italian food company [Celentano] went on to make Legume's first tofu lasagna in May 1982, and now produces all its products. Eventually the baked goods were dropped in favor of the Italian frozen products.

1282. Obis, Clare Barrett. 1981. The versatile soybean. *Vegetarian Times* No. 46. May. p. 66-71. [7 ref]

• **Summary:** One place you won't hear any arguments about soybeans is in the kitchen of knowledgeable cooks. "High in protein, fiber and minerals, soybeans are one of nature's truly universal miracle foods." "Here is a sampling of recipes from some of our favorite cookbooks" (cites 7).

How to use soy flour. Soy coffee cake (with 1 cup soy milk and 1 cup soy flour). Tofu cheesecake. Spiced tofu marinade. Tofu spinach pie. Soy burgers. Soya paté. Scotch eggs. Arancini Siciliani (Soybean and rice croquettes). Creamy tofu dip or dressing. Dairyless, eggless quiche. Scherezade casserole. Shepherd's pie (with tofu). Zuccanoes. Spicy Sichuan tofu. Soy stock gravy. Tofu stroganoff. Tofu stuffed mushrooms. Vegetable bean noodle bake. Address: Chicago, Illinois.

1283. **Product Name:** Savory Soysage [Mild, or Spicy Hot].

**Manufacturer's Name:** Summercorn Foods Inc.

**Manufacturer's Address:** 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338.

**Date of Introduction:** 1981 May.

**Ingredients:** Okara (water-extracted organic soybeans), organic whole wheat flour, nutritional yeast, cold pressed safflower oil, sesame meal, soy sauce, unsulphured molasses, spices.

**Wt/Vol., Packaging, Price:** 12 oz.

**How Stored:** Frozen or refrigerated.

**New Product–Documentation:** Steve, David and Annee. 1981. Spring. Swallows. Summercorn Soyfoods is now producing tofu, soymilk, and soysage. Label. 1987. 3.25 x 2.75 inches. Self adhesive. Brown and green on beige. "No liquid smoke flavorings or preservatives. New high-protein recipe. Contact us for detailed nutritional information & menu ideas." The company is now named Summercorn Foods.

1284. Rothert, Yvonne. 1981. Use of soybean well-known,

but here comes tempeh. *Oregonian (The) (Portland, Oregon)*. June 24.

• **Summary:** About Seth Tibbott (a photo shows him carrying a tray of finished tempeh) and Turtle Island Soy Dairy. Tibbott started to make tempeh on a home scale in Tennessee in 1977, and commercially in December 1980 in Oregon, in 50- to 60-lb batches. Compared with tofu, says Tibbott, tempeh has a more meatlike texture and flavor that "you can sink your teeth into and chew on." "Tibbott has also begun marketing an herb-seasoned tempeh, flavored with basil and oregano, which is pressed into sausagelike rolls instead of cakes."

Contains recipes "collected from Oregon tempeh lovers" for: Indonesian-style baked tempeh. Sauteed tempeh. Tempeh spaghetti. Tempeh cutlets. Tempeh Reuben. Tempeh teriyaki. Address: Oregonian staff.

1285. *Toronto Star (Ontario, Canada)*. 1981. Meals are meatless for many families (Advertorial). June 30. p. B13. Advertising supplement.

• **Summary:** "There's a quiet revolution shaping up on your dinner table.

"Many families are eating meat analogue (meat substitute to you and me). Long acclaimed by many vegetarians and members of the Seventh-Day Adventist church, the meat analogue looks and tastes about as much like meat as margarine resembles butter, and that's close enough for many.

"Some are frozen and ready to serve, some come in sealed tins and complete a recipe, others in packages, dehydrated so that you can slip them into your knapsack when you aren't making stews and casseroles at home. Names like Vegetarian Burger, Sizzleburgers, Prosaige Links and Big Franks abound, not to mention Vegetarian Stakelets, Stripples (like bacon). You name your favorite meat, fowl, or fish and manufacturers such as Loma Linda Foods or Worthington Foods will probably be able to offer a reasonable facsimile.

"The soybean has been a staple of the oriental diet for hundreds, if not thousands of years. It is a complete protein, and enthusiasts are quick to note the absence of cholesterol and animal fat content. Add wheat gluten to capture the 'mouth feel' of flesh food, peanuts for the taste and fibrous texture, a bit of seasoning here and there, extrude the whole, cook to taste, and voila, the meat analogue!

"Soybean drink [soymilk] is another entrant in the huge North American beverage sweepstakes. With its white colour and nut-like flavour, it offers an alternative to milk for drinking and cooking."

1286. **Product Name:** Tempeh Brothers Soyfurters (Marinated Tempeh Sticks Resembling Square Hot Dogs).

**Manufacturer's Name:** Appropriate Foods, Inc.

**Manufacturer's Address:** 137 New Hyde Park Rd.,

Franklin Square, Long Island, NY 11010.

**Date of Introduction:** 1981 June.

**Ingredients:** Organic soy tempeh, shoyu, herbs, spices.

**Wt/Vol., Packaging, Price:** 5 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label. 1982. June 15. 2 by 5 inches. Orange on light grey. Interview with Robert Werz. 1987. Sept. 9. Made by slicing a cake of tempeh lengthwise into 4 sticks and marinating in a soy sauce, seasoned with liquid smoke. Introduced 15 June 1981. Discontinued 30 Dec. 1982.

1287. **Product Name:** Pacific Soy Soysage (famous Original Style).

**Manufacturer's Name:** Café à la Mode. Renamed Pacific Soyfoods in Feb. 1982.

**Manufacturer's Address:** 4th Ave., Olympia, Washington.

**Date of Introduction:** 1981 June.

**New Product–Documentation:** Product with Label purchased in Berkeley, California. 1988. Aug. 30. Listed in Fowler Brothers' catalog. 1991. Jan. p. 64.

Talk with Peter Lesser of Northwest Natural. 1991. Feb. 8. Peter started Pacific Soyfoods in 1981. Initially it was run out of the kitchen a collective restaurant named Café à la Mode, located on 4th Avenue in Olympia, Washington. They made tofu from scratch, and used the okara (a by-product from the tofu) to make soysage, using a version of the recipe published in *The Farm Vegetarian Cookbook*. Initially these products were served in the restaurant (the okara was used in sandwiches, such as the Reuben sandwich), but by about June 1981, they had started delivering the Soysage to the local food co-op and to 1 or 2 local grocery stores in Olympia. When the restaurant was closed after a year of operation, the wholesale accounts still wanted Soysage, so Peter decided to keep the soy operation going and at that time, in Feb. 1982, he coined the term "Pacific Soyfoods."

Peter stopped making tofu and bought his okara from a Korean-American tofu manufacturer named Boo Han in Lakewood, Washington. In the spring of 1982, Pacific Soyfoods' landed its first wholesale account, Pacific Rim (formerly known as something like C.C. Grain), a collective wholesaler in Seattle, that delivered to the Puget Consumers Co-op (PCC) in Seattle. Soon thereafter he started selling to

natural foods wholesalers, the first one based in Seattle and the second one based in Portland, Oregon.

1288. *Soyanews (Sri Lanka)*. 1981. How to do it: Tofu as a meat substitute. 3(11):3, 8. June.

• **Summary:** How to make tofu on a small commercial scale. Describes the process then gives 3 tables related in costs and income: (1) What you require to make about 20 kilos of tofu a day (Prices as of Aug. 1980). A list of equipment and the price of each. Total price: Rs. 4,220. (2) Costs and returns: Variable costs + fixed costs: Rs. 145. Revenue: 210. Net profit per day: Rs. 65.00.

1289. **Product Name:** Tempehroni (Herb-seasoned Tempeh in Sausage-Like Rolls).

**Manufacturer's Name:** Turtle Island Soy Dairy.

**Manufacturer's Address:** c/o Hope Co-op, 2017 21st Ave., Forest Grove, OR 97116.

**Date of Introduction:** 1981 June.

**Ingredients:** Organically grown soybeans, water, apple cider vinegar, marjoram, basil, oregano, thyme, summer savory, *Rhizopus oligosporus* (tempeh starter).

**Wt/Vol., Packaging, Price:** 8 oz plastic wrapped cylinder. Retail for \$1.28.

**How Stored:** Frozen.

**New Product–Documentation:** Tibbott. 1982. Soyfoods. Winter. p. 31. "The soy tempeh with herbs." Label, undated. "New! The soy tempeh with herbs." This label, 5½ by 3½ inches, is printed red on white. The Turtle Island logo appears large in the upper left corner. A turtle, upon whose shell appears the continents of North and South America, is inside of a circle formed by a vine with soybean leaves. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods

Center. Shurtleff & Aoyagi. 1985. History of Tempeh. p. 56.

1290. *Nation's Restaurant News*. 1981. Healthy tofu winning converts. Food of the future? July 6. p. 25.

• **Summary:** About Dik Rose, owner of Soyfoods Cafe in Redwood Valley, California. He serves sandwiches, soups, burgers, desserts and dips—all made with tofu. “His tiny restaurant, which has 10 seats, has been in operation three years and does about \$2,000 a week in sales.” Rose is not alone. Tofu is “becoming a mainstay at small nutrition-oriented restaurants across the country.” Rose also owns a tofu company, which makes about 1,500 lb/week plus 40 gallons of soymilk. None of the foods served in the cafe contain any animal products. Items on the menu are described.

1291. Mounts, T.L. 1981. Soycrafters annual meeting. *Northern Regional Research Center; Notes from the Director (Peoria, Illinois)* No. 1468. p. 1-2. July 17.

• **Summary:** “The fourth annual meeting of the Soycrafters Association was held on the campus of Colorado State University at Fort Collins, July 8-12. The foods receiving the most attention were tofu and tempeh, and modifications of them. Richard Leviton, Executive Director of the organization, pointed out that the growth rate of traditional soy foods is 25 to 30% each year, and he projected gross sales of \$620 million by 1990. Currently the total sales are more than \$50 million. California now has a pilot study on tofu for the school lunch program.”

“Since 1979, the taste and appearance of soy foods served at these meetings has greatly improved. The tempeh burgers, served on a bun with lettuce and tomatoes, were exceptionally good.” Address: Director.

1292. Cohen, Richard L. 1981. Bay Area companies excited about tempeh. *San Francisco Business Journal*. July 27. p. 8-9.

• **Summary:** About Pacific Tempeh and Soyfoods Unlimited. Pacific Tempeh was America's first company to develop and market a tempeh burger. Soyfoods Unlimited invested \$100,000 in their plant. It has the capacity to produce 10,000 lb/week of tempeh but currently produces only about 1,500 to 1,800 lb/month. The business will break even at 3,500 lb/month.

Note: This is the earliest document seen (Sept. 2011) that mentions Soyfoods Unlimited.

1293. Cain, Elly. 1981. From Australia: Soysage rolls join the take-out menu. *Soyfoods* No. 5. p. 43. Summer.

• **Summary:** On Queensland's Sunshine Coast north of Brisbane, soysage is being used to make meatless alternatives to traditional favorite dishes: Sausage rolls (seasoned pork sausage wrapped in cylinders of pastry) and Cornish pasties (meat and vegetables folded in a circle

of pastry). Photos show: Cheryl Grimshaw rolling out the pastry dough for her soysage rolls in Yandina. Many of the cylindrical and turnover-shaped (half circle) soysage rolls. Address: Australia.

1294. Cloud, Jon. 1981. The Soysage papers: Using the honorable hull. The ecological side dish [Soysage]. *Soyfoods* No. 5. p. 40. Summer.

• **Summary:** “Soysage was born out of a no-waste consciousness... The okara (soybean pulp or fiber), usually viewed as a nuisance, is now viewed as a potential resource.” Describes the basic process for making soysage with okara.

“During the World War II years, a product called Soysage was developed and trademarked by W.H. and Alice Braun, owners of Imperial Brands of Chicago, Illinois. Their Soysage was made from soyflour, peanut flour, cottonseed flour, wheat middlings, wheat germ, yeast, vegetable protein, seasoning. Very little is known about that venture, however, since the trademark was renewed for only a short time...”

The Farm in Summertown, Tennessee, rediscovered the term “soysage” in the early 1970s and developed their own version, which was used mostly as a side dish.

Photos show: Soysage labels. A large stainless steel tray filled with 3 rows of soysage patties.

1295. **Product Name:** Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Cloud Mountain, Inc.

**Manufacturer's Address:** Buffalo, New York.

**Date of Introduction:** 1981 July.

**New Product–Documentation:** Leviton. 1981. *Soyfoods*. Summer. p. 43. “Jon Cloud, owner of Cloud Mountain, manufactures and distributes 2,000 lb. of soysage monthly, fresh and refrigerated, primarily in Canada. The soysage is produced in Ontario, Canada, using the facilities of a tofu plant. Cloud Mountain is North America's largest producer and distributor of soysage.” It is the company's biggest money maker, retailing for \$1.60/lb.

1296. **Product Name:** Tofuna (Tofu-Based Meatless Tuna).

**Manufacturer's Name:** Garden of Eatin'.

**Manufacturer's Address:** 5300 Santa Monica Blvd., Los Angeles, CA 90029.

**Date of Introduction:** 1981 July.

**Ingredients:** Tofu, vegetables, soy oil, apple cider vinegar, barley malt, natural herbs & spices, sea salt.

**Wt/Vol., Packaging, Price:** 16 oz.

**New Product–Documentation:** Article and photo in *Soyfoods*. 1981. Summer. p. 44-45.

1297. Jacobson, Al. 1981. Labels that tell...sell. *Soyfoods* No. 5. p. 44-45. Summer.

• **Summary:** Jacobson is the 67 year old founder and president of Garden of Eatin', Inc. in Los Angeles. Across

the bottom of the article are clear photos of the labels of six soyfood products: Cottage Tofu, Tofuna, Mild Jerky Soy, Tofu “No Cheese” Cake (cheesecake), Vegie Yaki, and Ice Dream. Across the top of the first two labels is printed the registered trademark “Tofu never had it so good!”

Two photos show Jacobson in a chef’s top hat, across the front of which is written “Wizard of foods.” Address: Garden of Eatin’, Los Angeles.

1298. Leviton, Richard. 1981. The legal side of soysage. *Soyfoods* No. 5. p. 43. Summer.

• **Summary:** Jon Cloud, owner of Cloud Mountain, Inc. of Buffalo, New York, makes and distributes about 2,000 lb/month of soysage, fresh and refrigerated, primarily in Canada. This soysage, which retails for \$1.60/lb, is manufactured in Toronto in a tofu plant. Soysage is Cloud’s biggest money maker, and Cloud Mountain is north America’s largest producer and distributor of soysage. However when trying to apply for a Canadian trademark, they met with serious problems.

First, Canada’s Department of Consumer and Corporate Affairs said it is illegal in Canada to label a product “soysage” since it is not a qualified or standard meat substitute. It fails to meet Canada’s nutritional composition standards, and would need to be extensively fortified. Yet even if the product were fortified, the Department refused to let Cloud market the product as “soysage.”

Second, when Cloud Mountain applied for a U.S. trademark, a Bureau of Trademarks official told them to desist from using the term “soysage: as it was misleading.

After a fruitless 8-month legal struggle, Jon Cloud happened upon the Food Directorate, a division of the Health Protection Branch or Canada’s Health, Education, and Welfare Department. They classified Cloud’s product as “a non-standardized food” and allowed Cloud to sell it as a vegetarian product, rather than a meat substitute. The Food Directorate plans to draft a series of new standards for other soy products, including tofu. Address: Colrain, Massachusetts.

1299. Leviton, Richard. 1981. Using okara. *Soyfoods* No. 5. p. 41-42. Summer.

• **Summary:** Gives details of the recipe, process, and packaging for three types of soysage made in the USA. Island Spring, Inc. (Vashon Island, near Seattle, Washington) makes 500 lb/week of Smoked Soy Loaf. Four photos show this product being made; the ingredients are mixed in a Leland mixer, steamed, sliced into 16-ounce slabs, and packaged. One pound retails for about \$1.90.

At Redwood Valley Soyfoods Unlimited (Redwood Valley, California), owner Dik Rose makes 100 lb/week of Brightsong Soysage. And at Light Foods (St. Louis, Missouri), owner Bob Davis makes up to 300 lb/week of Soyloaf. Address: Colrain, Massachusetts.

1300. Needleman, Larry. 1981. Tofu plant profiles: Swan Gardens, Miami. *Soyfoods* No. 5. p. 26-27. Summer.

• **Summary:** Swan Gardens, located in Industrial Miami, is a family-run business which was started by and is now owned by Jocelyn and Dick McIntyre. It has 6 employees, including the McIntyre’s daughter and, earlier, Jocelyn’s mother. “The company began in St. Ignatius, Montana in 1978 where they produced 500 pounds of tofu weekly from a small shop situated on an organic vegetable farm, Jocelyn McIntyre had been making tofu at home for 8 years previously and finally yielded to her friends’ encouragement to produce tofu commercially. In August 1979 they sold their company and farm and used the proceeds to launch Swan Gardens in Miami, which they opened in January 1980. They wanted to get into tofu in a big way and Miami seemed like a promising, wide-open market. Today they manufacture 2,100 lb of firm, vacuum packaged tofu, 5 to 6 days weekly, and distribute over 50% of it outside of Florida, often as far as Illinois and Ohio.” A detailed description of the tofu production process and equipment is given. “What I find most impressive about Swan Gardens is their excellent application of American equipment to fashion a smooth production flow in a very clean and well maintained plant. They are among a few innovative companies that are trying vacuum-packing tofu as a way to extend shelf life and attract customers. Jocelyn McIntyre describes the company as ‘a stable, solid business with a good work crew.’ They are preparing an okara tempeh for the market and plan to release soysage and baked tofu in the future.” Photos show: (1) Dick McIntyre and his daughter, Cecilia/Ceci, standing behind a 200 gallon tank of soymilk (p. 26). Ceci and her grandmother (Joci’s mom) preparing tofu for vacuum packaging (p. 27). Address: Bean Machines Inc., Bodega, California.

1301. Needleman, Larry. 1981. Tofu plant profiles: Sunshine Soy, Miami. *Soyfoods* No. 5. p. 29-30. Summer.

• **Summary:** Sunshine Soy is owned and operated by Danny Paolucci in Coral Gables, a suburb of Miami. “Starting in 1970 when he became acquainted with the vegetarian diet and the food uses of soybeans, Mr. Paolucci has been ‘screaming soybeans,’ as he remarks. In the mid-1970s he was cook at the Mt. Baldy Zen Center in California where he experimented with soybean dishes and made community scale miso. In 1974 he wanted to open a soy plant but there was no technology or information available; existing Oriental plants were unwilling to help him. In December 1977 he linked up as manager with the meteoric Swan Foods of Miami, an early multiproducts soy company that in its one intense year of business lost some \$140,000. Mr. Paolucci emerged from the experience with considerable insight and some manufacturing equipment so that in June 1980 he was able to launch his own soy venture”—Sunshine Soy.

The company now makes 500-750 lb of tofu a day,

plus tempeh, baked tofu, soymilk, miso salad dressing, and soysage. Photos show: Danny Paolucci. A hydraulic forming box press. A clamshell sealer. A Chisholm-Ryder screw extractor; unfortunately it is no longer manufactured. Address: Bean Machines Inc., Bodega, California.

1302. Shurtleff, William; Aoyagi, Akiko. 1981. Tempeh production in community. *Communities—Journal of Cooperative Living (Oroville, California)* No. 49. p. 3-10. July. Cover story.

• **Summary:** “Portions of this article were excerpted from *Tempeh Production, The Book of Tempeh: Volume II* by William Shurtleff and Akiko Aoyagi.” Contents: What is tempeh? The community shop: Equipment. Two tempeh shops (process given for each): (1) Yellow Bean Trading Co. (Detroit, Michigan)—Dry dehull, skim preparation, bag fermentation, makes 34 pounds of tempeh. (2) It’s Natural (Evanston, Illinois)—Soak dehull, skim preparation, bag fermentation, makes 17 pounds of tempeh. Contains 15 illustrations (line drawings). Favorite tempeh recipes (five).

On the front cover of the magazine is a multi-color illustration of a tempeh burger. Address: Lafayette, California.

1303. Shurtleff, William; Aoyagi, Akiko. 1981. Das Tofu-Buch: Nahrung fuer alle Band 2 [The book of tofu: Food for mankind. Vol. 2]. Soyen, West Germany: Ahorn Verlag. 288 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 23 x 21 cm. Translated from the English by Rainer Bosch and Gudrun Klein. [43 ref. Ger]

• **Summary:** Contains 500 recipes. Contents: How to use this book. Preface. Acknowledgements. 1. Protein East and West. 2. Tofu as a food. 3. Getting started. 4. Soybeans. 5. Fresh soybean puree (*Frisches Sojapüree*). 6. Okara. 7. Soymilk curds and soymilk (*Sojaquark und Sojamolke*). 8. Tofu (History, how to make at home, basic preparatory techniques). 9. Recipes for regular and firm tofu. 10. Deep-fried tofu: tofu cutlets, burgers, and pouches (*Vorfritierter Tofu: Tofuschnitzel, Tofuburger, Tofutaschen*). 11. Grilled tofu (*Gegrillter Tofu*). 12. Frozen and dried-frozen tofu (*Gefrorener Tofu und gefriergetrockneter Tofu*). 13. Fermented tofu (*Fermentierter Tofu*). 14. Soymilk (*Sojamilch*). 15. Silken tofu (*Seidentofu*). 16. Yuba. 15. Tofu and yuba in China, Taiwan, and Korea. 17. Farmhouse tofu for large families. 19. The ethos and tradition of handmade tofu production. 20. Making tofu in a traditional shop. Appendices: A. Tofu restaurants in Japan. B. Varieties of tofu in East Asia. C. People and institutions connected with tofu worldwide (Incl. directory of tofu manufacturers). D. Sources of supply for tofu production. Bibliography. Glossary. Favorite tofu recipes. About the authors and their work (autobiographical). Tofu—An opportunity for poor and rich lands. The tofu kit (from Sojaquelle in West Germany and Oekullus in Switzerland).

Note 1. This is the earliest publication seen (April 2013) that uses term “Tofurei” to refer to tofu shops / manufacturers. The term was coined by Gabriele Furth-Kuby of Ahorn Verlag.

Note 2. “Sojaquark” is used to refer to soymilk curds rather than to tofu. Published in a hardcover edition only.

Note. This is the earliest German-language document seen (Sept. 2013) that mentions soy cream cheese (p. 104), which it calls *Tofu-Käsecreme*. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

1304. **Product Name:** Soysage (Meatless Okara-Based Sausage) [Hot].

**Manufacturer’s Name:** Soy Shop (The).

**Manufacturer’s Address:** 1081 Memorial Dr. S.E., Atlanta, GA 30317.

**Date of Introduction:** 1981 July.

**New Product—Documentation:** Label. 1981. Red on white. 4.5 x 3.18 inches. Leaflet. 1981. July. Soyfoods: Tempeh, Soysage, & No Cow Soy Drink.

1305. Stunkard, Jamie. 1981. Making soysage. *Soyfoods* No. 5. p. 41. Summer.

• **Summary:** Contains a detailed description, with a bulk recipe, of how Joy of Soy in Minneapolis, Minnesota, makes soysage in 65-70 pound batches. The soysage recipe developed by The Farm in Summertown, Tennessee, was adopted as a starting point. “Our decision not to use okara was tough. We wanted to use our tofu by-product, yet when we compared its taste and texture with soysage that uses the whole soybeans, okara just didn’t make it to the finals.

The major ingredients in the recipe are 5 gallons cooked soybeans (okara is not used), 11 lb 14 oz whole wheat flour, 5 lb rolled barley, 2 lb nutritional yeast, 2¼ lb herb & spice mix, 7 cups shoyu, 6 cups sesame oil, 1 cup vinegar, and 27 cups water.

Joy of Soy has been making soysage for two years. It sells for \$1.18/lb at the rate of about 150 lb/week. It enjoys steady sales, but is not a big seller. Address: Joy of Soy, Minneapolis, Minnesota.

1306. **Product Name:** Soysage (Meatless Okara-based Sausage).

**Manufacturer’s Name:** Sunshine Soy Co. Inc.

**Manufacturer’s Address:** 4015 Laguna St., Suite “H,” Coral Gables, FL 33146. Phone: 305-447-1277.

**Date of Introduction:** 1981 July.

**New Product—Documentation:** Needleman. 1981. *Soyfoods*. Summer. p. 29-30. “Tofu plant profiles: Swan Gardens and Sunshine Soy (Miami).”

Appropriate Foods catalog. 1982. Fall. Company listed as “Sunshine Soyfoods.” Soysage weighs 12 oz. Talk with Danny Paolucci, founder of Sunshine Soy Co. 1998.

March 8. This product was sold in squares, not in chubs or sausage shapes. To make it, he would pack the mixture of okara and other ingredients into a plastic bag, press to make indentations and four squares, then vacuum pack the product. It was delicious.

1307. Wagner, Martha. 1981. Soy down under. *Soyfoods* No. 5. p. 11-12. Summer.

• **Summary:** First discusses the work of Marcea Weber and Debbie Schmetzer in Australia. Marcea Weber owns The Soybean Factory located just outside of Sydney, Australia. Debbie, formerly a tofu maker at Surata Soyfoods in Eugene, Oregon, is now living in New Zealand, where she plans to start a soyfoods business. “Marcea, originally from New York, began her tofu business three years ago, about a year after arriving in Australia from England where she operated a small natural foods bakery. Koreans and Chinese were already producing large volumes of tofu in Australia but her business was the first to produce a nigari tofu. After three years, tofu is still quite foreign to Australians, Marcea says...

“The Soybean Factory sells to natural food stores, restaurants, and juice bars. It produces only 600 half-pound blocks a week. Using simple Takai machinery with a 45-gallon Australian pressure cooker, only 30 pounds are produced in each batch so the selling cost is high, about double U.S. prices, and much higher than Korean and Chinese tofu sold in Australia.” “The factory employs three production workers and a manager. Marcea does the promotion. She also spends much of her time teaching cooking and nutrition classes at the East-West (Macrobiotic) Center, which she and her husband, Daniel, an acupuncturist, established when they arrived in Australia.”

In New Zealand, “no one outside the Chinese community had even heard of tofu until an Auckland health food store, Harvest Whole Foods, began producing it in a backroom kitchen last October [1980]. The enthusiasm for tofu was shown by several restaurants doing an alternative lifestyle festival, which featured tofu burgers, has produced healthy sales for the shop. The three owners, Greg and Ricky Chalmers and Ricky’s wife, Elizabeth, are producing about 170 to 299 kilos (374 to 440 pounds) of tofu a week. They expect sales to grow and are planning to expand production facilities.”

Debbie Schmetzer arrived in New Zealand in Jan. 1981 with her husband, Peter (who was born in New Zealand) and their young son. She describes the process and ingredients used to make tofu at Harvest Health Foods, then notes that “Even in the Chinese community, only two Chinese restaurants are making tofu. Harvest’s main customers are Indonesians, vegetarians, people switching from dairy to soy on the advice of naturopathic doctors, and spiritual seekers such as Hare Krishna and Divine Light people.” On the Run is a fast food deli that makes excellent tofu dishes in Auckland, including tofu burgers, curried tofu salad in pita

bread, and tofu tacos with locally made tortillas.

Letter from Martha Wagner. 1981. July 24. “Before this article went to press I learned that Debbie and her husband had become disillusioned with attitudes in New Zealand toward food and organic agriculture, red tape, and toward setting up business—especially concerning a mold to make tempeh. So they took off for greener pastures in Australia. They are now mulling over the scene in the Melbourne area and may well do a bagel business combined with a soy deli. She would be a good person for a soyfoods information center there. Address: 35 Flower Street, Essendon 3040 Victoria, Australia.

“For the addresses of the Koreans and Chinese making lots of tofu in Australia, contact Marcea Weber, 29 Belmore St., Rozelle 2039, NSW.

“Did you meet the Australian couple Fred and Radhika Koch at the SANA conference? They are planning to set up a good size tofu operation as a support for a 26-person community in the country.” Address: USA.

1308. Sass, Lorna J. 1981. Soy foods: Versatile, cheap and on the rise. *New York Times*. Aug. 12. p. C1, C6. Widely syndicated.

• **Summary:** The article begins: “Soy foods have come west and, apparently, are here to stay. No longer restricted exclusively to the world of woks and cleavers, soybeans in America are now patted into soyburgers, and tofu (soybean curd) is puréed into soy mayonnaise, baked into ‘cheesecake’ and fried as ‘cutlets,’ while soy milk emerges from the blender as a frothy carob shake or from the freezer as cantaloupe ‘ice cream.’

“Because soy foods are an inexpensive source of protein, low in fat and completely cholesterol-free, they have been attracting more and more attention among the growing number of weight-conscious, health-conscious and dollar-conscious Americans. Until recently, soy sauce was the only soy product familiar to most Americans.

Contains a long discussion of David Mintz (owner of Mintz’s Buffet, a kosher delicatessen at 1040 Third Avenue at 62nd Street). He makes a tofu ice cream, and a tofu-spinach quiche. “A large Japanese company wants to buy exclusive rights to distribute Mintz’s tofutti ‘ice cream’ in Japan. ‘The more dishes I make with tofu, the better my business is,’ said Mr. Mintz.” He is frequently called upon to cater “tofu weddings.”

Also discusses Light Foods in St. Louis (Missouri), and the Rochester Soy Deli (in New York). “Two of the people most responsible for introducing soy foods to Americans are William Shurtleff and his wife, Akiko Aoyagi, who in 1975 wrote ‘The Book of Tofu,’ a comprehensive cookbook and introduction to the untapped potential of soy foods as an alternate source of protein.”

There follow seven recipes featuring tofu and tempeh: Mintz’s tofu herb dip. Breaded tofu cutlets (with frozen tofu.

Might also be called “Fillet of tofu,” plus a note on how to freeze tofu at home). Tofu tartare sauce. Tempeh salad. Carob-tofu-mint pie. Whole wheat pastry crust (with soy milk and soy oil). Lotus Cafe not-dogs (meatless hot dogs).

Next comes a section titled “Learning more about soy: A listing of useful books.” For example: “There is no more thorough book on the history and myriad Oriental forms of tofu than the profusely illustrated *“Book of Tofu,”* by William Shurtleff and Akiko Aoyagi (Autumn Press / Random House; 334 pages; \$8.95). First published in 1975, it is credited by most tofu cookbooks as the one that ‘spread the light.’ The hundreds of recipes, mostly Oriental in style, will fascinate adventurous cooks. Beginners may prefer the condensed, somewhat more Americanized version (Ballantine, 433 pages, \$2.95).”

The long article ends with a helpful sidebar titled “How to buy and store tofu.” “A four-ounce piece of tofu (bean curd) sells for about 30 cents...” One main difference “between the tofu sold in health food stores and the Oriental-style tofu sold by many greengrocers is the type of coagulant used. Tofu from health food stores is almost always made with nigari (primarily magnesium chloride and trace mineral elements derived from evaporated seawater), while Oriental tofu makers generally use calcium sulphate.”

A photo shows Katherine Iselin with some of the special sandwiches at the Tofu Shop, a fast-food soy deli in Rochester, New York. She is wearing a Soyboy Tofu T-shirt. On the wall behind her is the restaurant menu.

Note: A similar article titled “Out of the wok and into the frying pan” appeared in *The Durham Sun* (9 Sept. 1981, Section B).

Another similar article titled “More budget-conscious Americans are hitting the soy—its not just sauce” appeared in the *Chicago Tribune* (29 Oct. 1981, p. W\_A21).

1309. Miller, Dwight L. 1981. A chapter in the history of soy fiber meat analogs. *Northern Regional Research Center: Notes from the Director* No. 1473. p. 3. Aug. 21.

• **Summary:** “The concept of spinning soy protein isolates into fibers and then converting them into meat analogs has been around since at least 1954 when Robert A. Boyer first patented the idea. Subsequently, several companies licensed the process, and in the 1960’s General Mills introduced a series of meat analogs made by the spinning operation. After opening a plant in 1970, General Mills closed down operations in 1976. The equipment and process were sold to Dawson Mills” and Dawson built a new plant (just east of Dawson, Minnesota) “to produce soy isolates plus meat analogs from spun isolate. Early this week, Daniel E. Hooten (President, Dawson Food Ingredients) was here for an update on our soy protein research and to discuss functional properties of various soy protein fractions with Walter J. Wolf and A.C. Eldridge (OC [Oilseed Crops Lab]). We learned that Dawson’s parent company, Land O’Lakes, Inc.

has recently sold the soy isolate and protein spinning plant to American [sic, Associated] Milk Products, Inc. [AMPI in Texas], a Houston-based milk cooperative. They apparently plan to use the plant to process milk products. Dawson’s withdrawal leaves Miles Laboratories [Worthington Foods] as the only company that currently manufactures meat analogs from spun soy protein fibers.” Address: Acting Center Director.

1310. Krieger, Verena. 1981. Gestern Steak, Morgen Tofu: Oder was man mit einer Bohne so alles machen kann [Yesterday steak, tomorrow tofu: Or all the things that can be made with one bean]. *Tages Anzeiger Magazin* No. 34. p. 6-12. Aug. 22. Also published in English, French, and Italian. [4 ref. Ger; Eng; Ita; Fre]

• **Summary:** A lengthy, pioneering account of the virtues of tofu, and its development in the USA and Switzerland by the Sunday supplement to Switzerland’s biggest daily newspaper. Contains numerous color photos of soyfoods from around the world. Also defines and discusses soymilk, miso, tamari, shoyu, and soy sauce, tempeh, and soy sprouts. Discusses the work of Edgar W. Schweizer (underway by 1977) in attempting to grow soybean varieties suited to Switzerland.

The Geneva restaurant “La Moisson” has had tofu on the menu for 5 years. In Bern, in the beginning of July, the restaurant “Sesam” was acquired by the first Swiss organic food store (*Bioladen*), the “Lotusbluemli” (Little Lotus Blossom). Since Sesam opened, the people of Bern have been able to get to know a rich treasure of dishes from tofu made at Sesam, as well as many applications of miso and shoyu or tamari. The vegetarian restaurant “Bristol” in Lucerne is launching tofu as its summer hit this year, in the form of Tofu Schnitzels and Burgers... In organic food shops, Reform Houses and Oriental specialty shops, miso and soy sauce are available. The following places in Switzerland sell fresh tofu, which they make on the spot: (1) Centre macrobiotique de Lausanne, ruelle de Bourg 7, 1003 Lausanne. (2) S. Gänterli, Vommatstr. 50, 6003 Lucern. (3) Le Grain d’Or, rue Voltair 27, 1201 Geneva. (4) De Lade, Oberaltstadt 8, 6300 Zug. (5) S. Lotusbluemli, Gerechtigkeitsgasse 17, 3011 Bern. (6) Madal Bal, Kreuzplatz 10, 8032 Zurich. On the last page of the article is an ad for Soyana in Zurich.

Note: The Italian-language edition of this article is titled “Ieri bistecca, domani il tofu.” It is the earliest Italian-language document seen (Sept. 2011) that mentions tempeh, which it calls “tempeh.”

Note: This is the earliest Italian-language document seen (Nov. 2014) that mentions meat alternatives.

Note: This is the earliest French-language document or Italian-language document seen (Nov. 2014) that mentions a meatless burger—Tofu Burgers. Address: Lucerne, Switzerland.

1311. Sklarz, Eleen. 1981. Vegetarian stakeout: Surveying restaurants in the southland that feature meatless menus. *Los Angeles Times*. Aug. 25. p. I1, I14.

• **Summary:** Today vegetarian restaurants are widely available. In Los Angeles County: Butter Thief (Venice): Known for its vegetarian pizza. Comeback Inn (Venice): Includes a “bistro burger” with tofu, and wok-fried vegetables with tofu. Follow Your Heart (21825 Sherman Way, Canoga Park).

Golden Temple Conscious Cookery of Los Angeles (7910 West 3rd St., Los Angeles): “This is one of the oldest of vegetarian restaurants, with other locations throughout the United States and Europe.” “The restaurant is collectively owned by Sikh Pharma, a religion founded in India 500 years ago.” The “Marrakesh Vege-Kebab” is a broiled vegetable and tofu kebab.

Govinda’s (9624 Venice Blvd., Culver City). Meyera (Santa Monica). Natural Fudge Co. (Hollywood; Among other entrees are tofu platters). Organic-ville Vegetarian Restaurant (Los Angeles). Our Contribution (Van Nuys; serves a tuna sandwich). Paru’s Indian Vegetarian Restaurant (Hollywood). Two Worlds Kosher Vegetarian Restaurant (8022 West 3rd St., Los Angeles; all the dishes are kosher. If you like soybeans, this is the place for you. “Two Worlds offers soy chicken, soy scallops, soy steaks, soy fish, and even soy chicken chow mein”).

Orange County: Mother’s Market and Kitchen (Costa Mesa).

San Diego (City): Cornucopia (112 W. Washington St.; Omelet choices include tofu and mushrooms. The whole-wheat spaghetti has tofu as an ingredient). Kung Food (Serves sandwiches and dinner entrees made with tofu; tofu tostada; tofu-vegetable enchiladas, and braised tofu over brown rice, served with guacamole and *tabbouleh*). Peaceable Kingdom (Serves spring rolls stuffed with stir-fried vegetables and tofu, with sweet-and-sour sauce. Also creative sandwiches with ingredients including tofu). Prophet International Vegetarian Restaurant (Serves miso soup).

A large cartoon shows a rabbit seated at a table, with knife and fork, launching into a large vegetarian entree.

1312. Sellman, Per; Sellman, Gita. 1981. Tofun har kommit till Sverige [Tofu has come to Sweden]. *Saxons* No. 36. p. 68-69, 71. Aug. 31. [Swe]

• **Summary:** On the first page, color photos show: (1) Ted Nordquist and Tim Öhlund, founders of Aros, seated at a table, enjoying food together. (2) A tofu burger and other tofu dishes. The next page shows a 6-step process for making tofu at home and several tofu recipes. A black-and-white photo on the last page shows packages of Aros Tofu (10 korner for 400 gm), Morinaga Ever-Fresh Silken Tofu, and a can of Sunbest Bean Curd. Address: Sweden.

1313. Country Life Natural Foods. 1981. Wholesale price list. April 15. Place orders to: CLNF, P.O. Box 487, Edmore, MI 48829. National Sales Office: P.O. Box 838, Collegedale, TN 37315.

• **Summary:** The 1-page green sheet lists the following product lines: Cedar Lake Foods, incl. Chops, Vegeburger, Terkettes, Sloppy Joe, Soynut Loaf, Chili Burger, Chipetts, Tender Tips, Breakfast Links, and Hostess Cuts. Terkettes and Tender Tips (and perhaps some others) contain no soy. Address: Edmore, Michigan; or Collegedale, Tennessee. Phone: 517-427-5143 or 615-396-2192.

1314. Shurtleff, William; Aoyagi, Akiko. 1981. History of Butler Food Products (Document part). In: William Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 4-6. Unpublished manuscript. Available online at [www.soyinfocenter.com](http://www.soyinfocenter.com). [1 ref]

• **Summary:** In operation from 1939 to 1946, this was a private company in Cedar Lake, Michigan. “This creative company was founded in 1939 by Howard O. Butler and run primarily as a family enterprise. Butler got interested in soyfoods from people he knew at Madison Foods in Tennessee. He hired people with prior experience in soyfoods production; Howard Hoover (who made soymilk with Dr. Miller in East Asia) and a Mr. Roose. An initial aim of the business was to offer jobs for Adventist youth to pay their tuition at nearby Cedar Lake Academy, although the business was not formally connected with the Academy. The company’s primary product, first produced in 1942, was ‘Soya Butter,’ actually what we would now call soy margarine; it contained 79% lightly hydrogenated soy oil, soymilk (18% by weight), salt, vitamin A carotene (as a natural coloring), and butter flavor. The melting point was 110°F (43°C). Butler advertised the product as being nonfattening.

“He soon ran into problems with the government concerning his soya butter. In August 1944 the *Soybean Digest* reported that ‘H.L. Hoover, manager of the firm, claims that he is the victim of conflicting federal and state regulations, and that he cannot comply with one set of regulations without violating others. Hoover points out that while the Food & Drug Administration prohibits his company from labeling the product oleomargarine without the addition of dairy products to it, the Bureau of Internal Revenue classifies it as oleomargarine for taxing purposes.’ Margarine was then defined as vegetable oils churned with dairy milk; Butler used soymilk in place of dairy milk to give a completely vegetarian product. Furthermore, it was claimed by the Bureau of Dairying in Lansing, Michigan, that the product had been illegally colored in imitation of butter, and in several instances had been sold as butter. In August 1944 cases were pending in circuit and U.S. courts, awaiting trial. In May 1945 a federal judge in Cleveland,

Ohio ruled that Butler's Soya Butter was not taxable as margarine and should not be labeled as margarine, but shortly thereafter the Ohio Department of Agriculture, in variance with the federal ruling, classified soya butter as colored margarine, which could not be sold legally in Ohio. In June 1945 the American Soybean Association came out in favor of a congressional bill to define soya butter as being distinct from margarine. Finally in December 1945, at which time the company was manufacturing 100,000 units of soya butter a month, a federal judge in Detroit ruled that the product was oleomargarine as defined by the internal revenue code, and therefore subject to back taxes of 10 cents a pound on every pound made to date. The three-year battle and the ruling assessing an estimated \$150,000 in back taxes drove the company out of business in 1946. In about 1950, while typing out an appeal to the government to reconsider his case, Butler suffered a fatal heart attack. Shortly after his death, the margarine law was changed and the tax (on other companies) removed.

"During the early 1940s, Butler Foods was a thriving operation. In early 1942 they were making a nice line of nine soyfoods including ready to eat Soy-Fruit & Nut Cereal (with figs, dates, and bran), ViM-eat Soy-Nut-Loaf, ViM Soy-Nut Cheese, Soy-Kawfee, Entire Soybean Flour (i.e. full-fat), Entire Soybean Wheat Flour Mix (70:30), Soybeans with Tomato Sauce, ViM-ilk (soymilk) and Soy-Nuts. An attractive brochure, which described the company's products and gave recipes, noted that some of the soybeans were 'grown on Butler's own mineralized farm.' In mid-1942 Soya Butter was added to the line. The company also made bulk soymilk for use in its Soya Butter. In September 1943 Butler Foods ran a full-page ad in the *Soybean Digest* headlined 'New Foods from the Wonder Bean' showing pictures of cans of Butler's Soynut Cheese, Vegeburger, Soya Nut-Loaf, Soya Butter, and Vegetarian Chops. The chops, his most popular meat analog, were a blend of wheat gluten and soy flour, sliced, pre-cooked, then canned in a broth made of soy sauce and other savory seasonings. A September 1945 ad showed that Butler's Meatlike had been added to the line.

"After the government tax ruling of 1946, Cedar Lake Academy leased Butler's property and tried to operate the food business for 2 years, but the plant was too big and the company had now lost its vital income from sales of soya butter. The Academy food business ceased operation in 1949. The supervisor at that time, Vesper Sias, who had worked at Butler Foods since 1942, then left and started his own company, Cedar Lake, in November 1949." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1315. Shurtleff, William; Aoyagi, Akiko. 1981. History of Cedar Lake Foods (Document part). In: William Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 6-7. Unpublished manuscript. Available online at [www.soyinfo.com](http://www.soyinfo.com).

[soyinfo.com](http://www.soyinfo.com). [1 ref]

• **Summary:** In operation from 1949 to the present, this was a private company in Cedar Lake, Michigan. "In 1949 when the Cedar Lake Academy ceased operating the former Butler Foods, Vesper Sias, a former employee of both companies, purchased the name Cedar Lake Foods and the food manufacturing rights from the Academy. He then started a business in rooms in the back of his home, working on a kitchen scale with his wife, making meatless products similar to those developed by Butler Food Products. The line started with Vegetarian Chops (like a veal cutlet with a savory soy sauce), Vegeburger, Soynut Cheese (whole soaked soybeans and nuts milled together, slurried, then cooked down to form a spreadable or sliceable loaf), Soynut Loaf, and Meatlike. They also made tofu. In 1959 the business expanded into a newly constructed plant, and four workers were kept busy meeting a growing demand and adding new products such as meatless frankfurters. Sias soon opened a storefront in his plant where all of his products were retailed (*Grand Rapids Press* 1962). In 1968 Cedar Lake bought the production of Sunnysdale Foods of Centralia, Missouri. At the same time, Sias purchased the canning division of Lange Foods. The product Turkettes, Hostess Cuts, Vegebites, Lentil Roast, and Breakfast Links were added to the Cedar Lake line. In 1975, after several months of illness, Sias sold Cedar Lake Foods (which employed 26 people and had \$500,000 yearly sales) to a corporation of five stockholders, who operated the business as Cedar Lake Foods Inc. of Tennessee. In the spring of 1981 the business, after being closed for 6 months, was sold to Country Life Natural Foods, a non-profit corporation and self-supporting Adventist group that made other vegetarian health food items such as nut butters, pastas, and juices, and ran several natural food restaurants. Many of the new company's foods contained soy products. TSF (textured soy flour) and soy sauce were used in the Vegeburger. Defatted soy flour was used in the Soynut Loaf. And soy sauce was the only soyfood used in the Hostess Cuts, Sloppy Joe, Vege-bits, Chops, and Chipettes. Wheat gluten served as the primary ingredient in most of the products. In March 1981 a typical 19-ounce can retailed for \$1.75-\$1.95. The plant continued to be located in Cedar Lake, Michigan, near the original Cedar Lake Academy, founded in 1898." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1316. Shurtleff, William; Aoyagi, Akiko. 1981. History of Millstone Foods (Document part). In: William Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 8. Unpublished manuscript. Available online at [www.soyinfo.com](http://www.soyinfo.com). [1 ref]

• **Summary:** In operation from 1977-1985, this was a private company in Penryn, California (near Sacramento). "Founded in 1977 and run by Ken Innocent, who formerly worked in

the personnel department at Worthington Foods. Millstone Foods makes canned products that contain soy, including Burger-Like (an imitation ground beef of textured soy flour {TSF} in a rich broth), Dehydrated Vegetarian Stew with TSF, and Tender Cuts (a gluten patty containing a little soy flour). While the products contain no MSG, some contain HVP (hydrolyzed vegetable protein)."

In 1985 the company was sold to Loma Linda Foods in Riverside, California. Basically the same product line continued to be manufactured, with new green and yellow labels. They were still available in July 1990. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1317. Well Bean Deli (The). 1981. August. New soyfoods restaurant or deli. 349 Soquel Ave., Santa Cruz, CA 95062.

• **Summary:** Letter from Kevin Van Slooten. 1980. Dec. 15. Written on letterhead that reads: Monterey Bay Soyfoods, 594 Redwood Dr., Santa Cruz, California 95060. Phone: 408-476-5833. Producers of tofu, tempeh and other fine soy foods. "I'm planning a soy deli for the Santa Cruz area. I'm 3/4 done defining and strategizing the plan... It will be structured partly as a non-profit educational organization so I can continue doing classes on soyfoods cooking etc. We did a booth of tempeh burgers and tofu salad at a food festival last weekend. It was a big hit and I've attracted interest by the local heart association."

Leaflet. 1981. "Announcing the Grand Opening" at 349 Soquel Ave., behind the Breadline Eatery. Article in *Santa Cruz Mobile News*. 1981. Oct. 2. p. 19. "A restaurant with accent on health." A photo shows part of the menu on the wall.

Candace Atkins. 1981. Green Sheet (Santa Cruz, California). Nov. 4. p. 3. "Tofu—the 'natural' kind of fast food."

Questionnaire filled out by owner of restaurant or deli. 1982. Lists the company's most popular soy-based menu items in descending order of popularity. The highest weekly total sales over the past 6-2 months, the month that this occurred, and why. The average weekly sales during this period. Average hourly wages paid to workers. The business startup cost (amount of money it cost to get the business started). Current profitability status. Plans for the future. Advice the owner would give to someone starting a similar business.

Shurtleff & Aoyagi. 1982. Report on Soyfoods Delis, Cafes & Restaurants. p. 3. Started on 25 August 1981 by Kevin Van Slooten. Startup cost: \$43,000. Avg. weekly sales in 1982: \$2,200. Address: Santa Cruz, California. Phone: (408) 425-4544.

1318. Wallace, Dick. 1981. Re: History of ADM. Questions answered on Soyfoods Center letterhead (dated 11 Sept. 1981) and returned to SC on 3 Dec. 1981. 2 p.

• **Summary:** The largest ADM crushing plant at Decatur has

a capacity of 4,000 tons of soybeans a day. ADM Foods was formed in 1980. British Arkady first produced TVP in 1965, and was acquired by ADM in 1974.

Dates when ADM first started producing certain soy products: Edible soy oils, 1930; Food grade lecithin, June 1934; Full-fat soy flour, 1935 (still producing); Cereal soy blends such as CSM, WSB, 1965-66 (CSM production has been discontinued); Soy protein concentrate, 1976; Textured soy concentrate, 1977; Bacon-flavored TVP, 1970.

Midland Linseed Oil Co. was incorporated in 1902, then reincorporated as Midland Linseed Products Co. in 1912. William O. Goodrich Co., located in Milwaukee, Wisconsin, was acquired by ADM in 1928. Dr. J. Hayward began employment with ADM in Sept. 1935 and worked as Director of Nutritional Research until 1956, when the position of Director of Nutrition was created for him. He worked in this position until the late 1950s. In the early 1960s he worked as a consultant for the company. On 1 July 1957 ADM acquired a soy protein isolate plant from The Drackett Co. Note: That plant, located in Evendale [near Cincinnati] Ohio, made only industrial (not edible) soy protein isolates. Address: Decatur, Illinois.

1319. Centell, Linda. 1981. Tofu pioneer crosses the Rockies to establish neighborhood soy deli [Matthew Schmit and The Tofu Shop in Arcata, California]. *Union (Arcata, California)*. Sept. 24. p. 17.

• **Summary:** Schmit started selling tofu products in a restaurant in Telluride, Colorado, 3-4 years ago. Now he makes tofu and at his deli sells sushi rolls, spinach pies with tofu, soymilk, herb onion dip, salads, pumpkin pies, cookies, carob pudding, and tofu burgers. Photos show: (1) Schmit holding a handful of Minnesota certified organic soybeans. (2) Melanie Patrick holding up a cake of tofu. (3) Happy Dragon Soydrink and products made with tofu. Address: Arcata, California.

1320. Shurtleff, William; Aoyagi, Akiko. 1981. Dr. John Harvey Kellogg and Battle Creek Foods: History of work with soyfoods. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 20 p. Sept. 29. Unpublished typescript. Available online at [www.soyinfocenter.com](http://www.soyinfocenter.com).

• **Summary:** A comprehensive history of the subject. Contents: Introduction. Early life and teachings: Birth, work with Ellen White, medical school, thesis, in 1876 took charge of institute he renamed Battle Creek Sanitarium (new meaning for this term), its research kitchen developed America's first meat analogs, start of *Good Health*, famous people who came to sanitarium, trip to Europe to deepen medical knowledge, primitive state of medical knowledge, "Biologic Living," dynamic man, living proof of his techniques. Early health food products: Granola, peanut butter (probably America's first), cereals, rift with church, meat substitutes (Nuttose, Protose), Harry Miller. Early

writings about soyfoods: *The New Method in Diabetes* (1917), mentions to 1923, mentions in *Good Health* (1921-29), *Good Health* (1930-39), J.H. and W.K. Kellogg's speeches to American Soybean Association (1927 and 1930), Kellogg and Henry Ford, 1933 edition of *The New Method in Diabetes*, 1936 expanding interest, letters to Horvath and Admiral Byrd, 1937 speech to American Public Health Association. Development of early soyfoods: soy meal, early interest in fermented milks, Metchnikoff and Tissier, first soymilk (1930), soy acidophilus and diseases (1933), patent for soy acidophilus milk (SAM, 1934), Dionne quintuplets (1934), SAM from 1936-1950's, heyday of his work with soyfoods (1934-37). Later soyfoods developments: Correspondence with William Morse, products in Morse's office, 1937 Battle Creek Food Co. products, 1940 price list, first commercial soymilk (Soygal, 1942), Kellogg's first meat analog (Soy Protose, 1943), small price list in 1955, sale of company in 1960, Kellogg's death in 1943, his influence on others.

**1321. Product Name:** Soy-Millet Tempeh (Sausage Shaped).

**Manufacturer's Name:** 21st Century Foods.

**Manufacturer's Address:** 30A Germania St., Jamaica Plain, MA 02130.

**Date of Introduction:** 1981 September.

**Ingredients:** Organic soybeans (90%), organic millet (10%), purified water, fresh Rhizopus culture.

**Wt/Vol., Packaging, Price:** 8 oz or 16 oz flat, or 8 oz roll.

**How Stored:** Refrigerated, 21 day shelf life.

**Nutrition:** Per 4 oz.: Calories 197, protein 23 gm, carbohydrate 15 gm, fat 5 gm, fiber 3.45%.

**New Product–Documentation:** Spot in Soyfoods. 1982. Summer. p. 57. The company, which began production in September 1981, now makes 400 lb/week of Soy-Millet Tempeh. Label, various sizes. 2 colors each. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Label. 1987. 6 by 8 inch plastic bag. Red, yellow, black, and white. "Healthy food for the whole world. Low calories. Low sodium. No cholesterol. No preservatives. What is Tempeh? (Lengthy description on back). Dark areas may occur on our tempeh, which indicate ripeness, and are normal on foods naturally cultured."

1322. Corn Country Whole Foods, Inc. 1981. Market Street: Natural foods with a difference (Catalog). 132 South Market St., Champaign, IL 61820. 24 p. Index. 28 cm.

• **Summary:** This natural foods, vegetarian catalog is printed on beige paper with black ink. Corn Country is now distributing products made by many other companies. Interesting products: (1) Stoneground flours: Soy flour-

full fat (OG = Organically Grown). Chickpea (garbanzo) flour. Our "old fashioned granite stone mills keep the flour at the lowest grind temperature..." Soybeans and chick peas are preheated before grinding. (2) Beans: Soybeans OG. Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans (for sprouting). (3) Peanut butter. Almond butter. Sesame tahini. (4) Sea vegetables (10 types). Westbrae miso (7 types). (5) Light Foods: Tofu. Marinated tofu. "Soyproducts are becoming an increasingly attractive source of protein throughout the world... We offer a small variety of soy products." (6) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Miso (red or white). Tamari (with dispenser to quarts). (7) Market Street meals (vegetarian): Nutburger. Soyburger. Chick 'n sea burger. (8) Nutritional (brewer's) yeast (20 lb to 125 lb): "These yeasts are primary yeasts cultured on molasses for human consumption. They are not a byproduct of petroleum, or paper industries." Sold in powder or flakes. (9) Natural oils: Sesame oil. Safflower oil. (10) Seeds. Alfalfa seed for sprouting. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. (11) Market Street shoyu almonds, suns (sunflower), cashew pieces. (12) Soy & corn "nuts": Soy nuts salted. Soy nuts plain. (13) Market street mixes (unsulfured fruits and natural nuts): Sweet & shoyu mix. (14) Literature: 26 Talking Foods pads. (15) Dr. Bronner's soap (14 types). (16) Kitchen help: Tofu kit. Sprouter lids. Wok set. Address: Champaign, Illinois. Phone: 217-359-8843.

**1323. Product Name:** Country Soy Sausage (Okara-based, Meatless).

**Manufacturer's Name:** Devi's Country Foods.

**Manufacturer's Address:** P.O. Box 2451, Eugene, Oregon 97402.

**Date of Introduction:** 1981 September.

**New Product–Documentation:** Spot in Soyfoods. Winter. 1983 p. 51. "Country Soy Sausage Spices up Eugene, Oregon," by Martha Wagner. Production began in September 1981. The okara comes from Surata Soyfoods in Eugene, Oregon. Photos show: (1) Packages of the product. (2) Squares of the finished product.

1324. Devi's Country Soy Sausage. 1981. Devi's Country Soy Sausage. 100% natural, 100% meatless. Delicious for breakfast, lunch or dinner (Brochure). P.O. Box 2451, Eugene, Oregon 97402. 4 p.

• **Summary:** Gives recipe ideas and recipes for: Breakfast sausage. Hot sandwich. Soy dogs. Muffin soy pizza. Soy sausage loaf. Sally's Parmesan patties. Stuffed green peppers. Cabbage rolls. No-meat balls. Pasta sauce. Address: Eugene, Oregon.

1325. Mintz's Buffet. 1981. Mintz's tofu buffet menu. 1040 Third Ave. (between 61st & 62nd Streets, near Bloomingdale's), New York, NY 10021. 1 p. Undated.

• **Summary:** This handwritten, undated menu (which includes prices) was probably printed in about Sept. 1981. It could have originated as early as August 1980—by which time Mintz’s was serving quiches and tofu muffins. By Feb. 1981 they were serving egg rolls. Soy-related menu items include: Vegetable salads: Steamed broccoli with tofu-mustard sauce (\$3.99/lb). Tofu-vegetable quiches: Broccoli, spinach, zucchini [sic, zucchini], mixed vegetable, cauliflower (\$4.95). Vegetable tofu pies: Spinach, broccoli, cauliflower, zucchini (\$2.75). Tofu-bran muffins: Strawberry-rhubarb, apple-walnut, blueberry-bran, carrot-apple, pecan, lemon-granola, pineapple-coconut, cherry-granola. Tofu-eggrolls: Spinach, Chinese vegetable, tabouli, tofu blintzes. Hot tofu items: Soy burgers, with tempeh & soy milk. Soy pizza, with nutritional yeast (\$1.50). Eggplant Parmesan, with soy milk topping (\$6.99/lb). At the bottom right is a floral design above the words: “An affair to remember.”

Note: No ice cream of any kind is on the menu. Address: New York City. Phone: 212-751-9367.

1326. Mintz’s Buffet. 1981. Tofu Time menu. 1040 Third Ave. (between 61st & 62nd Streets), New York, NY 10021. 1 p. Undated. 28 cm.

• **Summary:** This printed, undated menu (which includes prices) was probably printed in about Sept. 1981. Tofu is included in every item on the menu.

Tofu bran muffins (\$0.95 each): Strawberry rhubarb, blueberry, carrot apple, pineapple, dutch apple, banana. Tofu vegetable salads (\$3.99): Cauliflower, eggplant, steamed broccoli with mustard sauce, spinach, broccoli, zucchini [sic, zucchini]. Tofu vegetable pies (\$2.75): Cauliflower, zucchini, spinach, broccoli. Tofu Ice Kream (Country vanilla, old fashioned chocolate, strawberries n’kream, peaches n’kream, apples n’kream, Dutch nut chocolate, apricot rum).

“All tofu dishes are completely natural and free of preservatives.” Glatt Kosher. Louise Londin / Design. Address: New York City. Phone: 212-751-9367.

1327. Soyfoods Center; Soycrafters Assoc. of North America. 1981. Soyfoods production in America and the West (Report). Lafayette, California. 1 p. Sept.

• **Summary:** This full-page table contains statistics for the following soyfoods and soy ingredients: Low technology, traditional. Tofu & tofu products. Tempeh. Soymilk & soymilk products. Soy sauce, shoyu & tamari. Soynuts & soynut butter. Miso. Soy sprouts. Whole dry or mature soybeans. Whole soy flour & grits, full fat. Fermented soymilk. Fermented tofu. Fresh green soybeans. Roasted soy flour & soy coffee. Natto, thua nao & kinema. Yuba. Soy nuggets (Hamanatto, tou-ch’ih [Fermented black soybeans]). Soy delis and restaurants. Secondary soyfoods prod-distributors. Soyfoods marketer-distributors. Subtotal.

High technology, modern [soy ingredients]: Soy flour & grits, defatted. TSP / TVP (extruded soy flour). Soy protein

concentrates. Soy protein isolates. Meat analogs (secondary products), Soy oil.

Subtotal: High tech. Total: Low tech & high tech.

This table has 12 columns with information about each soyfood. (1) Type of soyfood. (2-5) Number of manufacturers: USA, Canada, Other West, Total. (6-7) Raw soybeans used (tons / year): USA, % of total used. (8) Yield (lbs of food from 1 lb of soybeans). USA only—(9) Tons produced. (10) Wholesale value (million \$). (11) Retail value (million \$). (12) Number of employees.

Note: Total retail value in USA is \$998 million. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

1328. **Product Name:** Tempeh Burgers (Non-fried: Vacuum Packed).

**Manufacturer’s Name:** Soyfoods Unlimited, Inc.

**Manufacturer’s Address:** 14670 Doolittle Dr., San Leandro, CA 94577.

**Date of Introduction:** 1981 September.

**Ingredients:** Soy tempeh (made with soybeans organically grown in accordance with section 26569.11 of the California Health and Safety Code), natural soy sauce, herbs, spices.

**Wt/Vol., Packaging, Price:** 6 oz (170 gm). Vacuum packed in poly pouch.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

**New Product–Documentation:** Label. Undated. Blue and red on white, with rainbow border. “No oil. Tasty. To serve: Brown in oiled pan or steam for 5 minutes.” Ads in *Vegetarian Times* and *East West Journal*. 1982. Oct. “All the Sizzle... None of the Steak.” Also in *New Age*. 1982. Dec. Inside rear cover; Spot in *Soyfoods*. 1984. Summer. p. 43. “America’s first tempeh burgers were developed by Pacific Tempeh and Soyfoods Unlimited.” Shurtleff & Aoyagi. 1985. *History of Tempeh*. p. 53. America’s first non-fried tempeh burger, sold vacuum packaged.

1329. *Santa Cruz Mobile News*. 1981. A restaurant with accent on health. Oct. 2. p. 19.

• **Summary:** About the Well Bean Deli, 349 Soquel Ave., Santa Cruz, California. It was started less than 2 months ago by Kevin Van Slooten. A photo shows part of the menu on the wall. Many of the dishes feature tofu or tempeh—Tofu burger, tempeh burger, missing egg salad or sandwich, tempeh mock chicken salad, tofuna salad or sandwich, tempeh salad, soy milk, tofu cheesecakes, etc. Address: Santa Cruz, California.

1330. Shurtleff, William; Aoyagi, Akiko. 1981. *History of Worthington Foods*. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 11 p. Oct. 5. Unpublished typescript. Available online at [www.soyinfocenter.com](http://www.soyinfocenter.com).

• **Summary:** A comprehensive history of the subject. Contents: Introduction. Founding in 1939 and founders: Harding, financing and duties, first product (Proast, with soy), Numete, growth of sales, Hagle joins company, Robinson leaves, Twomley's description of Hagle: "an uncommon businessman." New Developments in the 1940's: 1945 incorporation and sales to \$500,000, Buller and Hartman, Boyer's 1949 visit. Acquisitions and analogs (1950-69): Acquisition of Dr. Harry Miller's International Nutrition Foundation in 1950, Soyamel (1954, 1961), new products introduced in 1950's, big break to go ahead with Boyer (1956) and Ralston Purina, how foods made, sales take off, 1962 first products and Soyameat, use of powdered isolates, acquisition of Battle Creek Foods and Madison Foods, Patties, Numete, spinning of soy protein fibers, praised in Stanford study. "The big time and then back home again" (1970's and 1980's): Acquired by Miles Laboratories of Elkhart, Indiana (March 1970), sales leap, expanded research, introduction of Morningstar Farms line 1972-74, rise and fall, reformulation of line and relaunching as cholesterol free, failure, growth of other products and of the "motivated" market, Bayer AG purchase of Miles in late 1977, uncertain future, "third generation" meat analogs (1976), ready-to-eat vegetarian entrees (1980), 1981 product list.

See [http://www.soyinfocenter.com/HSS/worthington\\_foods.php](http://www.soyinfocenter.com/HSS/worthington_foods.php) Address: Lafayette, California. Phone: 415-283-2991.

1331. Boyer, Robert A. 1981. Development of meatlike products based on spun soy protein fibers. Part I (Interview). *SoyaScan Notes*. Oct. 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This history is compiled from 5 interviews conducted with Robert Boyer from Oct. 1980 to Oct. 1981.

One day at the Ford plant in 1942, Boyer, while sampling fibers of his "soybean wool," realized that these same soy protein fibers, if made tender by omitting the protein denaturation, hardening, and insolubilization, could be used as a basic ingredient in making meatlike textured soy protein foods. Already he had developed an analog for the protein fibers that grow on the *outside* of a sheep (wool), why not develop an analog for those on the *inside*, a meatless meat or meat analog?

Throughout the years of World War II, the idea of using spun soy protein fibers as the basic of human foods, in the form of meat analogs, returned to Boyer again and again. In late 1943 The Drackett Co. in Cincinnati, Ohio (which had a fairly large soybean crushing operation and also made consumer household cleaning products such as Drano and Windex), purchased the Ford Motor Company's soy protein and protein spinning operations. Boyer went with the equipment and processes to Cincinnati. Boyer, now Drackett's director of research, told the company of his

interest in producing foods from soy proteins, but Drackett was only interested in industrial products at the time. In early 1949 H.R. Drackett died; the company shut down its plant that was spinning Soybean Azlon fibers, and closed part of its protein R&D laboratories. Boyer left Drackett to work on his own.

On 28 September 1949 Boyer filed for his first patent on edible protein fiber (application serial no. 118,445). It was issued in 1951, then rewritten that year in a much broader format and issued in final form in 1954 (No. 2,682,466). According to this patent (which expired in 1971 and has come to be regarded as a classic), no one can use a man-made protein fiber in a food without violating the basic claim. The patent called for the use of various proteins (including soy, casein, and peanut protein) to make edible protein fibers that could be transformed into meat analogs or extenders that are low in saturated fats and virtually free of cholesterol.

In September 1949 Boyer took his patent idea to his first company, Worthington Foods, Inc., a small company in Worthington, Ohio, operated by a group of businessmen and doctors, that produced meat analogs and vegetarian foods primarily for Seventh-day Adventists and Adventist institutions. Boyer had now been on his own for over eight months and was almost out of money. He still wasn't sure of whether the whole idea was a screwball one or not. He later commented that if Worthington had shown no interest, he probably would have just given up then and done something else. Advised to keep away from the large meat companies, who might buy up the patent and "bury" it, he went to Worthington and disclosed his concept and a pork chop prototype. Mr. Hagle, president of Worthington, was immediately very excited with the idea, but the company was reluctant to take a license until there was a source of soy protein fiber. Harrison Evans, a top Worthington employee, later recalled: "I'll never forget the day Bob Boyer came by. They brought him down with this textured protein wrapped in a piece of aluminum foil and all it looked like was rope. Just unattractive, white... It certainly did not look like real meat."

Worthington waited, so Boyer went to Virginia Carolina Chemical Company (VCCC) in Taftville, Connecticut; they were spinning fibers for textiles and Boyer hoped they would be able to produce soy fibers for Worthington. VCCC allowed Boyer to use their protein spinning pilot plant for research; he provided his own materials. Here he made the world's first edible protein fibers, which were used to make meat analog prototypes. Incorporating egg albumen binder plus vegetable fats and flavorings into the spun fibers, he fabricated the first man-made meatless pork chops and then made hams from soy protein. After the first successful run, nearby Corn Products Company (CPC) got very interested and ended up buying the first license on Boyer's patent (an exclusive option), which gave Boyer his first income from

the project. Boyer then consulted for CPC for 9 months. The first sale of commercial edible protein fiber (produced from corn gluten) was made by CPC to Worthington. Eventually, however, it was realized that corn gluten would not work well in foods because of its unpleasant and dominant flavor. The project was dropped. Continued. Address: 632 Edgewater Dr., Apt. 731, Dunedin, Florida 33528. Phone: 813-734-2415.

1332. Boyer, Robert A. 1981. Development of meatlike products based on spun soy protein fibers. Part II (Interview). *SoyaScan Notes*. Oct. 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Now somewhat desperate, Boyer decided to try a meat company anyway. He went to Swift & Co. in Chicago, Illinois, in 1950 and they immediately liked these ideas and bought exclusive rights to the patent from 1950-1954 (in 1955 they converted to nonexclusive). In 1950, the war scarcity psychology still prevailed. American consumers and food producers had watched in astonishment during the war as meats became so scarce and expensive that only a few could afford them. Thus it was easy to sell the notion that even after the war, as world population continued to rise, plant proteins would play an increasingly important role in diets throughout the world. Boyer worked with Swift for five years, but in considerable secrecy. Swift told him that if their Livestock Relations Department found out that Swift was doing research on meat analogs, "all hell would break loose." Eventually Swift made and test marketed new soy protein products. However in 1952-53 livestock producers in America were in such bad shape economically that they marched on Washington, DC, demanding a better price for their products. Swift, fearing the possibility that the media might get word of their new project and come out with headlines reading "Swift Making Synthetic Meats from Soy Protein," decided to shut down the project. None of the products was ever marketed commercially.

In 1951-52 Unilever bought a license from Boyer for spun protein isolate production throughout the rest of the world. Boyer went to England and worked with Unilever in their peanut protein isolate plant and research labs near Liverpool. Here, for the first time, his process was used in the making of sausages containing fibers of peanut protein isolate.

In 1956 Boyer returned to America and went immediately to Worthington, who had now been thinking about taking a license on Boyer's spinning patent for seven years. The first food-grade soy protein isolates were just becoming available, so the company bought the patent rights for the health food industry and asked Boyer to work with them as a consultant. Worthington eventually did more with Boyer's discovery than any company in America.

After Worthington purchased Boyer's license (for the health food trade), other large food companies followed suit:

Ralston Purina, General Mills, and Nabisco. General Foods developed their own related process. In 1962 Boyer joined the research staff of Ralston Purina as a Protein Scientist; he worked there until his retirement in 1971, at which time he became a Protein Consultant for Miles/Worthington.

After General Mills took a license on Boyer's product, they built a commercial-sized fiber spinning plant at Cedar Rapids, Iowa, and developed their Bontrae line which featured Bac-O's, a spun fiber analog resembling cooked bacon bits and launched in 1965. The venture was impressive in scope and the product was a real sensation, the biggest thing that had happened to Boyer's idea to date. (The product is now made with extruded soy flour.) The whole venture had a profound effect on the thinking of other large food producing companies concerning soy protein foods. Boyer was now spending 50% of his time with Worthington and 25% each with General Mills and Ralston.

Boyer's years of research eventually began to pay off in terms of handsome royalties from his patents, of which he now had more than thirty, some shared with Ford. These lasted until the patent expired in 1971. Now any company can use the protein spinning process without having to buy a license or pay fees. In 1981 the main American companies using spun protein fibers in foods were Worthington Foods, Dawson Mills in Minnesota (which bought General Mills' equipment), Loma Linda Foods in California, and Ralston Purina. In Europe there are two companies in the Netherlands, one in Denmark (Nutana), and one in Belgium using food-grade spun protein fibers. In Japan, Nisshin Oil Mills Ltd. built the first plant to spin edible soy protein fibers in 1968. In 1976 Fuji Purina Protein Ltd., a subsidiary of Fuji Oil Co. and Ralston Purina, introduced Fujipur SP-90 spun soy protein fibers.

Most manufacturers of meat analogs in the U.S. agree that the general market has been disappointing, but that the idea is simply ahead of its time, which will inevitably come as meat prices continue their rapid rise. The vegetarian or "motivated" market (and especially the Seventh-day Adventist sector) showed a steady increase each year. No sales figures are available on the total market size.

When asked in 1980 how he liked the newest generation of meat analogs, Boyer replied that he found the quality disappointing, since the producers have to make compromises in equipment and processing to keep costs down. A researcher can get much better textures and flavors in his lab working by hand. Another problem is the subtle beany flavors that result from isolates and from typical defatted soy meal rather than specially defatted soy meal that can be made to contain almost no beany flavor. Boyer eats store-bought meat analogs (including bacon bits) from time to time but not as a regular part of his diet. He prefers Worthington products to Loma Linda. He likes meat, too, and also uses tofu quite a bit.

How about the future? Harkening back to the years of

his work with Ford, Boyer said in 1981, “We’re at the Model T stage right now with analogs. I’m impatient to get to the Lincoln Continental stage.” He feels that the products still have a very bright future, and that when the price of meats rises to 10 or 20% above those of the analogs, sales will start a period of steady growth. Address: 632 Edgewater Dr., Apt. 731, Dunedin, Florida 33528. Phone: 813-734-2415.

1333. Photographs of Worthington Foods’ products and buildings. 1981. Worthington, Ohio.

• **Summary:** See next 8 pages. These 8 x 10-inch black-and-white photos were sent to Soyfoods Center by Frank Poston (Manager, Product Marketing) of Worthington Foods on Oct. 13, 1981. (a) First generation products—canned. (b) Second generation products, canned and frozen. (c) Third generation products—canned and frozen. (d) Worthington’s bacon-like product, Stripples, being reviewed by its counterpart.

(e) Spun soy protein coming out of a spinnerette head. (f) An old photo showing spun soy protein fiber being processed; the line is now much more automated. (g) Veja-Links—Worthington Foods’ meatless frankfurter being packed. This is an earlier photo—the line is more streamlined now. (h) Miles Laboratories and Worthington Foods personnel breaking ground for a new plant—1970.

(i) The Worthington Foods’ facilities on Jan. 26, 1972 (a Division of Miles Laboratories). Lower right building is shipping. Center is the plant. Upper left is storage, R&D, and general offices. Address: 900 Proprietors Road, Worthington, Ohio 43085. (j) New addition to Research and Development building. (k) Worthington Foods’ smoked beef-like roll and sausage, like Prosaage, being wheeled into the freezer after processing.

Worthington Foods letterhead (Oct. 1981). Address: Worthington, Ohio.

1334. *Chicago Tribune*. 1981. ‘Tofu’ and other soy books: Reader’s guide to good eating. Oct. 29. p. W\_A21, or N\_B19.

• **Summary:** This is a briefly annotated list of useful books about soy products: (1) *Soybeans for Health and Longevity*, by Philip S. Chen. (2) *The Soybean Book: Growing and Using Nature’s Miracle Protein*, by Phyllis Dobson. (3) *The Farm Vegetarian Cookbook*, edited by Louise Hagler. See recipes for making ice bean [soy ice cream], soy yogurt, and soysage. (4) *The Book of Tofu*, William Shurtleff and Akiko Aoyagi. Profusely illustrated, with hundreds of recipes. “There is no more thorough book on the history and myriad Oriental forms of tofu... First published in 1975, it is credited by most tofu cookbooks as the one that ‘spread the light.’” (5) *The Tofu Cookbook*, by Cathy Bauer and Juel Anderson. Incorporates tofu artfully into familiar international dishes. Many recipes assume access to the by-products of making tofu at home: okara (soy pulp) and whey. (6) *The Great American Tofu Cookbook*, by Patricia McGruter. (7) *Tofu*

*Goes West*, by Gary Landgrebe. For those who enjoy the chewy texture of “frozen tofu.” (3) *The Book of Miso*, by Shurtleff & Aoyagi. The best-known book about miso. (8) *The Book of Tempeh*, by Shurtleff & Aoyagi. A thorough study of this traditional Indonesian food.

1339. Smith, Oak B. 1981. Re: Research—Wenger’s accomplishments in the past 26 years. Letter to Joe Wenger, Lou Wenger, Don Wenger and Lavon Wenger at Wenger International Inc., Nov. 27. 8 p. Typed, on letterhead.

• **Summary:** I think we are observing an important development—“a technological revolution in food processing which may be the best and perhaps the only economic answer to the food and feed needs of the world which will see its population jump from four billion souls today to 7 billion by the year 2000.”

“Extrusion cooking, of course, is but one small link in that food processing chain. I think, however, that we need to look at our own contributions towards solutions of major food problems, and hope that our past accomplishments will help point us towards equally important achievements in the future. What are those Wenger accomplishments in the past 26 years? [i.e., since 1957].

“1. We saw and understood the opportunity that extrusion cooking could give us as a company.

“2. We developed the first commercially available extrusion cooker, and it was all Wenger—we followed nobody else, copied no one, we learned to control our own (often irascible) machine.

“3. We learned how to apply moisture uniformly and how to develop temperatures with screws, with steamlocks, and with final dies.

“4. We learned the advantages of preconditioning with steam.

“5. We learned what gelatinization of starches and cereal flours was, and developed our own method of gelatinizing. We defined gelatinization, and we explained our method of gelatinizing fully and quickly to the industries of pet foods, breakfast cereals, snacks, starches, and industrial processing industries. We publicized the first article written about extrusion cooking and related that to pet foods, and we made this known around the world.

“6. We learned about the toxic constituents in oilseed and pulse proteins, and studied the methods by which heat labile growth inhibitors can be controlled in soybeans, in glandless cottonseeds, and in field beans and peas.

“7. We defined growth inhibitors, and proposed to the feed and food industries the possibilities of extrusion cooking of full fat soybeans.”

“9. We explained the process for the extrusion cooking of full fat soybeans for control of growth inhibitors to

U.S.D.A., and we were told by U.S.D.A. that our methods would never work in control of growth inhibitors in soy which (they said) needed to be cooked for 30 minutes at 220 degrees F. to control the growth inhibitors. U.S.D.A. did subsequently back down, but only after we had shown them the Purdue [Indiana] work.

“10. We explained to UNICEF the dual capability of controlling the growth inhibitors in soybeans, while simultaneously gelatinizing cereal flours, thus producing the first extrusion cooked, cereal based, protein enriched, mixed and fortified foods for children. We demonstrated that capability to UNICEF and (later) to U.S.D.A.”

“11. We developed a good and simple method of dehulling soybeans.

“12. We developed a method of adding intermediate heads, screws, and steamlocks to provide additional dwell time in the extruder.

“13. We demonstrated to U.S.D.A. the first cooking of defatted soy proteins, thus producing the first chewy, meat-like substance now called textured soy protein meat extenders. We, thereafter, demonstrated this capability to ADM, Swift, and to Ralston Purina and to others who have become the major producers of textured soy proteins around the world.

“14. We developed a secondary cooling and forming extruder, which in turn brought us into the production of third generation snacks, breakfast cereal flakes, and textured soy meat analogs.

“15. We demonstrated to the world our ability to make second generation snacks at unheard of capacities, and with a versatility which no competitor could approach.”

“21. We studied and mastered our ability to process foods at the maximum capacity per hour to a preselected degree of cook of any extrusion cooker manufacturer in the world. We did so with much less electrical energy and much less steam per ton of product. The economics of these achievements are probably the largest single reason why people buy Wenger equipment today, to the exclusion of others.

“22. We developed, perfected, and patented Uni-Tex, a product which is more like the structure, appearance, and mouthfeel of meat than any man-made product in the world. We have not done as well commercially with this product as it merits, but that is only because of inability to locate good meat-like flavors which will stand the temperatures of extrusion. We will find such flavors, and we will also apply flavors externally (which could not be used in soups or stews), but which could be used in casserole dishes, curries, ethnic foods, etc.

“23. We developed our first small machine in 1962, and managed to persuade the major food companies of the world to install the X-25 (and more recently the X-20) as a research and development machine in this country and abroad.”

“25. We have greatly improved our ability to produce,

shape and continuously cook, shape and dry third generation snacks. This represents one of the best potentials for future business for us, in my opinion.

“27. We have mastered the processing arts of making dry expanded pet foods, soft moist, and semi-moist pet foods and fish foods. We have maintained our dominant position in pet foods, while developing dominant postures in the production of snacks, textured soy, breakfast cereals, instantized soups, and cereals processed for industrial purposes.” Address: [Chairman, Wenger International, Inc., 2400 Pershing Rd., Kansas City, Missouri]. Phone: (816) 221-5084.

1340. **Product Name:** Tofu Lasagna.  
**Manufacturer’s Name:** K. Tanaka & Company.  
**Manufacturer’s Address:** 326 Amsterdam Ave., New York, NY (Manhattan’s West Side).  
**Date of Introduction:** 1981 November.  
**New Product–Documentation:** Sugawara. 1981. Living Book magazine. Nov. 11. p. 82.

1341. **Product Name:** Tofu Links.  
**Manufacturer’s Name:** Soya Food Products.  
**Manufacturer’s Address:** Cincinnati, Ohio.  
**Date of Introduction:** 1981 November.  
**Ingredients:** Tofu, all natural spices, salt, vegetable oil.  
**New Product–Documentation:** Spot in Soyfoods. 1982. Summer. p. 54. “The Missing Link.” Introduced Nov. 1981.

1342. *SoyaScan Notes*. 1981. Chronology of soybeans, soyfoods and natural foods in the United States 1981 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.  
 • **Summary:** Jan. *Soyfoods* magazine issue No. 4 published. Silver cover. 10,000 copies published. Steve Fiering loans SANA money for mailing it and agrees to make a loan for a test mailing.

Jan. Union activity begins at New England Soy Dairy.

Jan. Boxed tofu (1 lb. vacuum packed in a box with a window) first made by Zakhi Soyfoods in Fort Wayne, Indiana. This important innovation of packaging tofu in a box was later employed by New England Soy Dairy (1982), Quong Hop & Co. (1983), Swan Gardens (1983), and White Wave (1985).

Jan. Hain Food Co. starts nationwide color ads for Natural Onion and Jalapeno (Soy) Bean Dips.

Jan. Travis Burgeson of Pacific Tempeh near San Francisco, CA, introduces the world’s first commercial tempeh burger.

Jan. Paul’s Tofu & Tempeh, the first European tempeh company in Europe outside of the Netherlands, opens in England.

Jan 20. Ronald Reagan inaugurated as president of the United States. His Secretary of Agriculture is John R. Block. The regulatory climate in Washington begins to shift

toward less federal regulation and more encouragement for industries to regulate themselves. The Republican administration favors free-market policies with less government regulation and involvement.

Jan. 23. Legume, run by Gary and Chandri Barat, is incorporated in New York, then that month moves to Verona, New Jersey.

Feb. 2. Island Spring in Washington becomes America’s first unionized tofu plant.

Feb. San-Jirushi International starts its first major American ad campaign using the slogan “San-J is the real tamari.” The full-color, full-page national ads aim to clarify the confusion between tamari and shoyu created by the macrobiotic movement.

Feb. Soyfoods Unlimited tempeh plant starts operation in San Francisco area. It is the most modern U.S. tempeh plant, although output is small.

Feb. Vitasoy soymilk and Morinaga tofu start to be imported and sold in the USA from Hong Kong and Japan respectively, immediately after the FDA lifts its ban on aseptic Tetra Pak type cartons. Morinaga tofu was sold by Beech Nut California Corporation, a joint venture with Beech Nuts Food Corp., established in 1977 in San Jose, California.

Feb. “Soyfoods Catching On” by Judith Brown published in *USDA National Food Review*. About tofu and tempeh.

Feb. Many tempeh plants switch to using GEM cultures tempeh starter.

March 1. Svadesha Pflanzen-Feinkost, West Germany’s first commercial tofu company, starts production. Founded by Swami Anand Svadesha (Rudiger Urban) in Fuerth im Wald.

March. Institute of Food Technologists meeting at New England Soy Dairy. Tour, dinner, and speeches.

March. Richard Leviton on National Public Radio’s “All Things Considered” talks for 10 minutes about soyfoods to 2 million people.

March. *The Book of Miso*, by Shurtleff and Aoyagi published by Ballantine Books in a mass market paperback edition.

April. USDA decides to establish tofu standards, then announce them in the Federal Register, but this plan is dropped in September, amid controversy over changes in the School Lunch Program.

April. Dr. Cook at Kansas State University publishes a paper on the possible inhibitory effects of soy proteins on nonheme iron absorption in humans. USDA becomes concerned.

April. *Tofu at Center Stage*, by Gary Landgrebe published by Fresh Press. First tofu cookbook containing many recipes calling for use of meat.

April. Bean Machines introduces new sanitary disintegrators/ grinders for tofu and soymilk production.

April. "The Miso-Master's Apprentice," by John Belleme published in *East West Journal*.

May. "The Amazing Tofumobile," by Janice Phillip, about Wildwood Natural Foods, published in *East West Journal*. Revival of interest in small tofu shops in areas where there is a high density of interest and high food consciousness, and rediscovery of soyfoods craftsmanship.

May. *Tofu Boken* by Ted Nordquist and Tim Ohlund published by Aros Sojaprodukter in Sweden. Europe's first book on tofu.

June. *Tofu Fever in New York*, by Megan B. Murray notes that David Mintz is making 275 gallons of tofu ice cream a week. This is the earliest known publication on his work with soy ice cream. He had been making it for 3-4 months.

June. "Surprise, It's Soy" by Barbara Bassett published in *Bestways*.

June. FIND/SVP survey of the U.S. tofu industry and tofu consumer survey published. 33% of respondents in major metropolitan areas were aware of tofu and 10% had purchased it. Predicts market will grow 32% a year for the next 6 years... an over-optimistic prediction.

June 29. "Trader Vic Bergeron Offers Timely Tips for Tofu" by Rose Dosti published in *Los Angeles Times*.

July. *Soyfoods* magazine is incorporated by Richard Leviton, and offers stock.

July 8-12. Fourth Annual Soycrafters Convention at Colorado State University. 240 people from 18 nations attend, 210 pay. First National Tofu Cheesecake Bakeoff and Soyfoods Equipment / Supplies Expo in the western world.

July. Mary Tolan selected Registered Young Dietitian of the Year by the American Dietetic Association. Invited to present speech on "Tofu—Food of the Future" at ADA convention in Philadelphia.

July. *Tofu Cookbook*, by Sally Sheppard published by Jack's Beanstalk.

July. "Soybean Ice Creams: Getting your Licks In" by Richard Leviton published in *Vegetarian Times*.

July. Soyfoods Center is working to build the world's largest library of documents on soyfoods, each with a bibliographic card, filed by author. Also building a large library of color slides on soyfoods.

Aug. "Tofu, Tofu Everywhere," by Karen Dukess published in *The New York Times*' Business section.

Aug. "Soyfoods: The Future Is Here but Are You Ready" by Alan Richman published by *Health Foods Business* as a cover story.

Aug. 12. "Soy Foods: Versatile, Cheap and on the Rise" by Lorna Sass, and "A Source of Quality Protein" by Jane Brody published in *The New York Times*, and syndicated nationwide.

Aug. "My Favorite Tempeh Recipes" by Aveline Kushi published in *East West Journal*.

Aug. *Delights of Tofu*, by Fox, O'Connor and Timmins

published by New England Soy Dairy.

Aug. *Das Tofu Book*, by Shurtleff and Aoyagi published in Germany by Ahorn Verlag.

Sept. "Soyfoods Report" published by *Natural Food Merchandiser*.

Sept. *Home Soyfood Equipment*, by Ray Wolf published by Rodale Press.

Sept. 13. At SANA Board of Directors Meeting held near San Francisco, the Soycrafters Association of North America has its name changed to Soyfoods Association of North America to broaden scope and support base.

Sept. SANA and The Soyfoods Center do a major press release on soyfoods production and consumption in America to 250 key media. Many magazines publish this report and conduct radio interviews.

Sept. Okita Enterprises takes 22 tofu and bean sprout makers to Japan for a 10-day tour. SANA executives Richard Leviton and Luke Lukoskie make important contacts with Japanese tofu trade officials and publications.

Sept. USDA publishes tofu regulations in the Federal Register, then withdraws entire school lunch revisions and revokes permission given to the Santa Cruz (Calif.) school system to use tofu in school lunches.

Sept. Dr. Hirayama of the National Cancer Center in Japan announces that miso soup is effective in combating stomach cancer and stroke.

Oct. "Things Go Better With Soyburgers: The New All-American Food" by Richard Leviton published in *East West Journal* as a cover story.

Oct. *Cook with Tofu*, by Christina Clarke published by Avon Books in mass market edition.

Oct. John Belleme's American Miso Corp. begins miso production in North Carolina.

Oct. Workers at Hinode Tofu Co. in Los Angeles go on strike for 2 weeks.

Oct. *Nasoya Tofu Cookbook*, published by Nasoya Foods.

Oct. *O Livro da Soja*, by Jane Cadwell published in Brazil by Editora Ground. One of the country's first books on soyfoods.

Nov. 10. Erewhon, America's natural foods pioneer, files for Chapter 11 reorganization under the U.S. bankruptcy laws. On 2 April 1982 Erewhon is sold to Nature Food Centers.

Nov. Autumn Press, publisher of *The Book of Tofu*, original edition, files for Chapter 11 bankruptcy.

Nov. New England Soy Dairy announces 28-Day Self Life Advantage Pasteurized Tofu in a 2/3 page ad in *Natural Foods Merchandiser*.

Nov. Soyfoods Unlimited advertises tempeh burgers in *Natural Foods Merchandiser*.

Nov. The Ministry of Agriculture and Forestry in Japan announces a Japanese Agricultural Standard (JAS) for soymilk. The soymilk boom in Japan starts.

Dec. *Juel Andersen's Tofu Kitchen* published by Bantam Books in mass-market paperback.

Dec. "World's Best Tofu Cheesecake" by Richard Leviton published in *Vegetarian Times*.

Dec. Food Protein Council, a trade association, changes its name to Soy Protein Council, since all of its members make only soy protein products.

Dec. *La Soya y Sus Derivados (Tofu, Tempeh, Miso)*, by Shurtleff and Aoyagi published by Quadernos de Natura in Mexico.

Dec. *The Tofu-Miso High Efficiency Diet*, by Yoshiaki Omura M.D. published by Arco Publ.

Dec. *Cooking with Tofu*, by Mary Anna DuSablon published by Garden Way.

Dec. There are now 158 tofu manufacturers and 41 tempeh manufacturers in the USA.

Dec. The Farm Vegetarian Cookbook published as *Soja Total* in German.

\* Global economic activity is shifting from the Atlantic to the Pacific. In 1981 Asia passed Europe to become the largest market for U.S. agricultural products. In fiscal 1981 Japan bought \$6,700 million worth of U.S. farm products.

\* Soybean breeders, which have formerly focused their research efforts on increasing quantity (yield) of soybeans, now start to give more attention to quality (composition). Increasing total protein, methionine, and oil, and decreasing linolenic acid and antinutritional factors are priorities.

\* U.S. soybean exports reach their peak this year of 25 million metric tons (tonnes). By 1987 they have fallen to 18 million tonnes, a 28% drop, due largely to competition from Brazil and Argentina, and to foreign subsidies. The market changes from a seller's to a buyer's market.

1343. Andersen, Juel. 1981. *Juel Andersen's tofu kitchen*. New York, NY: Bantam Books. x + 211 p. Illust. by Juel Andersen. Index. Dec. 18 cm.

• **Summary:** Contents: An introduction. Tofu is... Making tofu and soymilk. Recipes—Salad dressings, dips, appetizers, and sauces. Salads and sandwiches. The tofu burger. Soups. Tofu for dinner. Tofu for breakfast and brunch. Baking with tofu. Desserts: Pies, puddings, and pastries. Beverages. Afterword. Appendix 1: Protein and protein complementarity, including a table showing the RDA for grams of protein for children, males, females, and pregnant and lactating women of different ages, weights and heights. Appendix 2: Substitutions and equivalents. Appendix 3: Nutrients in selected foods (mostly protein sources). Address: California.

1344. **Product Name:** Tofu, Tofu Burgers, Okara Cakes.  
**Manufacturer's Name:** Regular Tofu Company Ltd.  
**Manufacturer's Address:** 75 Chandos St., Leicester, LE2 1BU, England. Phone: (0533) 549839.  
**Date of Introduction:** 1981 December.

**New Product—Documentation:** Form filled out by John Holt. ca. 1982. The company opened in Dec. 1981. He now uses 50-100 lb/day of dry soybeans to make regular tofu (vacuum packed), tofu burgers, and okara cakes. Letter from John Holt. ca. May 1982. "Having used your book to learn how to make tofu, we now have a small business here making about 700 lb/week of tofu and about 2,500 tofu burgers per week. We give our okara to a pig farmer... We sell the nigari tofu vacuum packaged." Soyfoods Center Computerized Mailing List. 1982. Sept. 17. Owner: John Holt.

1345. **Product Name:** Tempeh (Soy & Okara), Tofu, Soysage, Egg-less Salad, Flavored Soymilk (Carob & Honey, or Maple).

**Manufacturer's Name:** Soy Beings.

**Manufacturer's Address:** 13-C Railroad Square, Waterville, ME 04901. Phone: 207-872-8790.

**Date of Introduction:** 1981 December.

**New Product—Documentation:** Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Richard Tory. Shurtleff & Aoyagi. 1982. Soyfoods Industry: Directory & Databook. p. 1. Form filled out by Richard Tory. ca. 1982. This is a 5-person collective. "We have a small, light catering business and wholesale sandwich business selling locally to natural food stores, etc. Potato salad, tofu dips, tempeh sandwiches, whole wheat tofu pizza, and natural pastries." The tofu contains nigari and organically grown soybeans. Soysage is made with nutritional yeast, safflower oil, honey and spices in an okara base. Egg-less salad made with tofu and eggless mayonnaise.

1346. **Product Name:** SoyLami (Ready-to-Eat Sausage-Shaped Meatless Salami Made from Tempeh; Vacuum Packed).

**Manufacturer's Name:** 21st Century Foods.

**Manufacturer's Address:** Jamaica Plain, Massachusetts.

**Date of Introduction:** 1981.

**Ingredients:** Organic soybeans, whole wheat, sesame seeds, corn oil, tamari, herbs, spices, tempeh starter, vinegar.

**Wt/Vol., Packaging, Price:** 6 oz cylinder, vacuum packed.

**How Stored:** Refrigerated.

**New Product—Documentation:** Labels (two), undated. "Pre-cooked. Ready to Eat Snack or Hors D'Oeuvre." Spot in Soyfoods. 1983. Summer. p. 52. "One SoyLami on Rye, Please." Ready to eat. Label. 1987. 3.5 by 6 inches. Red and white on yellow-orange. "Made from Homestyle Tempeh. Ready to Eat Snack or Hors D'Oeuvre. Serving Suggestion: Cut into thin slices. Serve warm or cold. Combine with mustard or sauerkraut if desired." Talk with Rudy Canale. 1988. Sept. 13. One of their earliest products, launched in 1981, this is still a popular item.

1347. Aros Sojaprodukter. 1981. Tofu. Naturren farskvara.

**TOFU sallad**

200 g tofu i tämningar  
1 hackad salladshuvud  
1/2 skivad purjolök  
4 skivade rädisor  
1/2 knippa hackad dill eller persilja  
1 nypa basilika

Blanda alla ingredienser i en salladsskål och servera med salladsdressing, gärna tofudressing.

**TOFU dressing**

400 g tofu  
1–2 msk olja  
2 msk citronsaft  
2 tsk sojasås eller 1/2 tsk salt  
1 msk finhackad lök

2 msk finhackad dill  
2 msk finhackad persilja  
Vatten eller annan vätska till önskad konsistens

Blanda alla ingredienser väl i en mixer.

innehåll per 100 g:

72 kalorier	146 mg calcium
8 g protein	6 mg natrium
4.3 g fett	105 mg fosfor
2.3 g kolhydrater	1.7 mg järn
0 fibrer	0.02 mg B <sub>1</sub> thiamin
0 kolesterol	0.02 mg B <sub>2</sub> riboflavin
0.7 g mineraler	0.5 mg niacin

1353. **Product Name:** [Seitan, and Seitan Goulash].  
**Foreign Name:** Seitan, Seitan Goulash.  
**Manufacturer's Name:** Lima Foods (Marketer-Distributor). Made in Belgium by Jonathan P.V.B.A.  
**Manufacturer's Address:** Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.  
**Date of Introduction:** 1981.  
**Ingredients:** 11/91. Water, wheat\*, soya\*, tamari (soyasauce), kombu (seaweed), herbs. \* = Organically

grown.

**Wt/Vol., Packaging, Price:** 300 gm (10.5 oz) glass jar. Retail for \$7.65 (11/91, California).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** 15.7% vegetable protein.

**New Product–Documentation:** Lima N.V. 1981. Oct. Lima Natural Foods Pricelist. Vegetable protein products: Seitan (vegetable protein concentrate, 150 gm jar), Seitan goulash (seitan with vegetables).

Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24. Made in Belgium. Imported in USA by Eden Foods. Label: 10 by 2.75 inches. Gummed paper. Red, dark brown, and yellow on tan. Illustration of yellow ears of wheat. “Vegetable protein preparation. Basic price: 34 German marks per kg. Use in soups together with cooked or stewed vegetables, in salads, on wholemeal bread, or simply fried in the pan. Use the cooking water to make a soup or sauce.” Nature et Progres organic certification symbol. Note the high price.

Talk with then letter from Mark Callebert from Lima Foods of Belgium. 1992. April 23 and June 19. Jonathan P.V.B.A. started to make seitan in 1978. Not long thereafter, Lima contacted Jonathan in Belgium concerning seitan. In 1981, Lima began buying seitan from Jonathan, and selling it in bottles under the Lima brand. Mark started to work for Lima Foods on 1 Sept. 1975 and was working at Lima when Lima began selling the seitan made by Jonathan.

Lima acquired Jonathan P.V.B.A. on 22 April 1989. Today Jonathan still makes seitan (and tofu) at a plant in Kapellen, a small village near Antwerp in Belgium. The address is Antwerpsesteenweg 336, 2080–Kapellen, Belgium. Phone: 03/664.58.48.

Leaflet (printed with black ink on pink paper, 8½ x 11 inches) sent by Patricia Smith from Natural Products Expo West. 1999. March. “Product Data sheet: Organic Gourmet Seitan.” Distributed in the USA by Ecover Inc.

**1354. Product Name:** Loma Linda Griddle Steaks (Meatless Beefsteak. Based on Spun Protein Fiber).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1981.

**Ingredients:** Soy protein concentrate, wheat gluten, corn oil, water, egg whites, onion, soy protein isolate, natural (vegetable) flavors, corn starch, whole wheat flour, artificial flavor, soy lecithin, guar gum, caramel color, salt, garlic powder, stabilizer (cellulose gum, gum arabic), spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 1 steak (1.7 oz–47 gm): Calories 160, protein

11 gm, carbohydrate 4 gm, fat 11 gm, cholesterol 0 mg, sodium 385 mg, potassium 250 mg.

**New Product–Documentation:** Ad. 1980. “Two new ways to nourish your business. The meatless meals they’ll be asking for.” Label reads: “Meatless. Hearty Steak Flavor. Cholesterol Free. 8 Steaks.” Sold frozen. Soya Bluebook. 1982. p. 60.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1981.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

**1355. Product Name:** Tempeh Burger (with Miso).

**Manufacturer’s Name:** North Coast Tempeh Co.

**Manufacturer’s Address:** c/o Cleveland Tofu Co, 8021 Euclid Ave., Cleveland, OH 44121.

**Date of Introduction:** 1981.

**Ingredients:** Tempeh (organic soybeans, water, *Rhizopus* culture), tamari, barley miso, spring water, corn oil, rice vinegar, spices.

**Wt/Vol., Packaging, Price:** 8 oz (3 burgers).

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label. 1982. 4.25 inch diameter. Red, green, blue, and yellow on white. Logo of Jack and the Beanstalk. “No cholesterol. All natural. Pan Fry, Bake, Steam, or Grill.” Jeff Narten. 1987. “History of North Coast Tempeh and its Products.” 4 p. Dec. 7. “Our tempeh burger is our number one product after tempeh. It is unique to my knowledge in that it is a fairly complicated marinade and depends less on tamari than many I’ve tasted.”

**1356. Product Name:** Sanitarium Health Foods Textured Vegetable Protein TV [Flavour-Like Beef, Flavour-Like Fish, or Minced].

**Manufacturer’s Name:** Sanitarium Health Food Co.

**Manufacturer’s Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1981.

**Ingredients:** 1990: Soya flour, vegetable oil, salt, Savex, artificial flavour.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter from Sanitarium Health Food Co. 1981. Label. 10 by 4 inches. Full color. Photo shows round slices or minced chunks on a bed of rice. “Just heat and eat.”

Letter and Labels sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1981, and address as Sydney, N.S.W.

**1357. Product Name:** Tempeh Salad.

**Manufacturer’s Name:** Soy Plant (The).

**Manufacturer’s Address:** 711 Airport Blvd., Suite #1, Ann

Arbor, Michigan 48104. Phone: 313-663-8638.

**Date of Introduction:** 1981.

**Ingredients:** Tempeh (organic soybeans, Rhizopus culture, vinegar), simmered in shoyu & water, Soy-naise (soymilk, oil, vinegar, spices), carrots, celery, green onions, parsley, basil.

**Wt/Vol., Packaging, Price:** 12 oz. plastic tub.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label in Soy Plant scrapbook. 1980. 2.75 by 2.5 inches. Black on white.

1358. **Product Name:** Mexi-Burger.

**Manufacturer's Name:** Sunbow Farm Products.

**Manufacturer's Address:** Route 2, Box 46, Corvallis, OR 97330.

**Date of Introduction:** 1981.

**Ingredients:** Soybeans [okara], corn, whole wheat flour, spices and seasonings.

**Wt/Vol., Packaging, Price:** 16 oz (1 lb).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1981. Sent by Mia Posner & Harry McCormick. 4 x 2.25 inches. Black on white. "(Directions: Shape into pattie [sic, patty], brown in oil for sandwich or crumble into oiled skillet, cook for 10 minutes and roll into tortilla). Bean + grain = protein!"

1359. **Product Name:** All-American Burgers.

**Manufacturer's Name:** Sunbow Farm Products.

**Manufacturer's Address:** Route 2, Box 46, Corvallis, OR 97330.

**Date of Introduction:** 1981.

**Ingredients:** Soybeans (okara and Soymilque), cornmeal, oats, whole wheat flour, spices, vinegar & mustard.

**Wt/Vol., Packaging, Price:** 16 oz (1 lb).

**How Stored:** Refrigerated.

**Ingredients:** Soybeans (Okara and Soymilque), cornmeal, oats, WW flour, spices, vinegar & mustard.

Shape a pattie & fry in oil until browned. Serve with all your favorite fixin's.

Refrigerate.

Net Wt. 16 oz. 1 Lb.

**New Product–Documentation:** Label. 1981. Sent by Mia Posner & Harry McCormick. 5 x 3 inches. Black on white. "Shape a pattie [sic, patty] & fry in oil until browned. Serve with all your favorite fixin's."

1360. **Product Name:** Tofu Vegie Patties: Seasoned and Baked.

**Manufacturer's Name:** Tofu Shop (The).

**Manufacturer's Address:** 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

**Date of Introduction:** 1981.

**Ingredients:** Our own fresh tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari), fresh vegetables (carrots, green onions, parsley), tamari (natural soy sauce made with water, soybeans, wholewheat and salt). Garlic and ginger.

**Wt/Vol., Packaging, Price:** 10 oz. vacuum packed.

**How Stored:** Refrigerated.

**New Product–Documentation:** Three Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1981. Label #1 of 1981. 4 by 2.5 inches. Self adhesive. Metallic gold, red, white, and silver on green. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite burger with all the fixins, or as a main dish. or Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°." Illustration in a vertical parallelogram shows a tofu shop on stilts near the ocean with a tree arching overhead.

Label #2 of 1992. "Tofu Vegie Patties: 2 Baked." 3 inches diameter. Black, yellow, and white on green. "Crafted from whole organic soybeans. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead.

Label #3 of Oct. 2002. Dark green and orange-yellow on white. 3 inches diameter. No adhesive. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

1361. **Product Name:** Vegetarian Entrees: Tamale, Burrito, Empanada, Enchilada, Pizza, Sprout & Tofu Pie.

**Manufacturer's Name:** Tumaro's Inc.

**Manufacturer's Address:** 5300 Santa Monica Blvd., Los Angeles, CA 90029.

**Date of Introduction:** 1981.

**New Product–Documentation:** Poster, back to back color. "Tumaro's Brings You This All-Natural Family of Protein-Rich Vegetarian Entrees." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

1362. Wood, Brian J.B.; Hounam, Laura. 1981.

Dairy products from soy beans. In: 1981. Proceedings of Dairy Symposium at the Food Industries Exhibition, London. See p. 19-23. [16 ref]

• **Summary:** Contents: Introduction. History (of soy milk). Preparation and nature of traditional soy-milk and tofu. Practical aspects of soy milk and tofu. Products derived from tofu (salted tofu, smoked tofu, spiced and flavored tofu, tofu burgers, Sufu {resembling Camembert cheese}). Economic considerations. Address: 1. Dep. of Applied Microbiology; 2. Centre for Industrial Innovation. Both: Univ. of Strathclyde, Glasgow, Scotland.

1363. **Product Name:** Dixie Dogs (Meatless Hot Dogs in Batter) [Regular, or Institutional].

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1981.

**Ingredients:** Regular: Batter: Water, wheat flour, yellow corn meal, sugar, partially hydrogenated soybean oil, modified corn starch, soy flour, egg yolk, nonfat dry milk solids, baking powder, sodium caseinate, salt, wheat starch, lecithin, potato flour. Textured vegetable protein (soy protein concentrate and isolate, wheat gluten and flour), egg whites, soybean and/or corn oil, sodium caseinate, water, partially hydrogenated soybean and cottonseed oil, flavorings (artificial flavors, monosodium glutamate, onion and garlic powder, spices, disodium guanylate, disodium inosinate), salt, corn syrup solids, dextrose, sodium phosphates (tripolyphosphate, pyrophosphate, hexametaphosphate, monophosphate), artificial colors, calcium chloride, niacinimide [niacinamide], iron (as ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

**How Stored:** Frozen.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27. The food chemists went berserk on the ingredients for this one, treating it as a PhD exam for every long-named ingredient in the book.

1364. Cottrell, Edyth Young. 1981. Mrs. Cottrell's stretching-the-food-dollar cookbook. Santa Barbara, California: Woodbridge Press. 127 p. Recipe index. 22 cm.

• **Summary:** A natural foods, vegetarian cookbook. Incorporates *Stretching the Food Dollar* and *Supplement to Stretching the Food Dollar*. A color photo on the cover shows the author.

Page 15 discusses soy milk, soy milk powder, soy flour, and nut milk. Many recipes (especially recipes for breads and other baked goods) call for the use of these products. Soy-related recipes include: Basic wheat-soy bread I & II (with soy flour, p. 21-22). Golden triple-rich bread (with soy

flour and soy milk, p. 23). Rice-soy bread (with soy flour p. 27). Soy-nut bread (with soy flour and ground cooked soy beans, p. 30). Soy mayonnaise (with soy milk powder, p. 71). Savory soy loaf or patties (with soy sprouts, p. 80). How to sprout soybeans (p. 89). Soy sauce (p. 90). Address: Formerly, Research Nutritionist, Loma Linda Univ., Loma Linda, California; As of March 1993, living in Spokane, Washington.

1365. Ford, Richard. 1981. Soy foodery cookbook: Tofu, tempeh, miso, sea vegetable recipes and resources. Santa Barbara, California: Published by the author. ii + 78 p. Illust. No index. 22 cm. Spiral bound. [20+ ref]

• **Summary:** Contents: Introduction: Creative balance. Soyfoods: Foods for the future. Soyfoods resources. Tofu: A soy product catching on. Tempeh: The super soy. Soysage. Sea vegetables: The tide is rising. Miso: A food doing it with culture. Soyfood travelers guide. Contains many recipes using tofu, tempeh, sea vegetables, and miso. At the end of each chapter is a bibliography. Address: Santa Barbara, California.

1366. Jaffrey, Madhur. 1981. Madhur Jaffrey's World-of-the-East vegetarian cookery. New York, NY: Alfred A. Knopf, Inc. 461 p. Illust. by Susan Gaber. Index. 20 x 20 cm. A second edition was published in 1983 in London by J. Cape.

• **Summary:** The Indian woman author of this creative book presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Green soy beans with sauce (p. 7). Cabbage with miso (p. 15). Eggplant slices with white miso (p. 22-23). Fresh soy beans, steamed (p. 57). Spinach with fermented bean curd (p. 59). Stuffed yellow squash (with yuba, p. 62-64). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; p. 73-74). Tempura (with tofu; p. 75-77). Soy bean sprouts (how to grow; p. 100). Soy-bean and mung-bean sprouts seasoned with sesame oil (p. 105). Tempeh, Fried tempeh, Fried, preseasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (p. 108-110). Thai fried rice (with Red Bean Curd or Nam Yee [red fermented tofu]; p. 150-51).

One chapter (p. 160-89) is titled "Soy milk, bean curd, and wheat gluten." Making your own soy milk. Making your own bean curd. Udofu (*Yudofu*, simmering bean curd with seasonings). Bean curd with watercress. Korean-style bean curd in a hot water bath. *Hiya-yakko* (Chilled bean curd). Bean curd with Chinese parsley. Bean curd with broccoli. Cabbage cooked with bean curd. Bean curd with a deliciously spicy sauce. Carrots and beans with bean curd dressing. Bean curd, mushrooms, and peanuts in hoisin sauce. Sautéed bean curd. Tofu dengaku (Toasted bean curd with a miso topping). Fried bean curd cubes, soy-bean sprouts sautéed with fried bean curd. Fried bean curd with a sweet-and-sour sauce. Fried bean curd cakes with a mustard surprise. Inari-zushi ("Bags" of fried bean curd stuffed with

sushi rice). Pressed bean curd with cabbage. Salad of pressed bean curd, mung-bean sprouts, and agar-agar. How to make fried and baked wheat gluten balls (plus 5 gluten recipes). Buddha's delight (with yuba and fried bean curd).

Chawanmushi (Steamed savory custards, with tofu; p. 192-94). Omelette with bean curd (p. 198-99). Soy sauce eggs (p. 209). Paneer (milk cheese; p. 237-40). Hot or cold noodles with a soy-sauce dressing (p. 248). Noodles with a hot-and-sour bean sauce (p. 250). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs, from Thailand, p. 255-56). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 256-57). Hoppers (yeast pancakes from Sri Lanka). Roti (Flat whole-wheat bread). Delicious stock made with soy-bean sprouts. Clear soup with enok mushrooms, bean curd skins [yuba], and spinach (p. 297). Clear soup with soft bean curd and celery cabbage (p. 298). Miso soup with bean curd (p. 307). Miso soup with carrots and mushrooms (p. 308). Fried, munchable soy beans [soynuts] (p. 321-22). Potato and tempeh patties (p. 339). Dipping sauces (with soy sauce; p. 357-59). Kombu relish (with soy sauce, p. 374). Shoyu daikon (White radish pickled in soy sauce). Ginger quick-pickled soy sauce (p. 375). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; p. 377-78). Chinese-style jellied bean-curd sweetmeat with a peanut topping (p. 399-400).

General information (p. 418-36; lots on soyfoods, see: bean curd [regular, fried, fermented (Nam Yee), pressed, pressed seasoned], kochu chang [jang], miso, soy-, tempeh, yuba). Sources (of ingredients; p. 437-40). Address: New York City, NY.

1367. Kloss, Jethro. 1981. *Back to Eden: A human interest story of health and restoration to be found in herb, root, and bark.* Loma Linda, California: Back to Eden Books. xxxii + 684 p. Illust. Index. 18 cm. Kloss Family Heirloom Edition. • **Summary:** One of the most creative and original sources of early soyfoods recipes, which include "Soybean Cream" and "Soybean Ice Cream." This revised edition contains the complete original text of this classic work on healing herbs, home remedies, diet, and health—plus 16 pages of new family recollections by Jethro Kloss' daughter, son, and granddaughter at the beginning of the book, and 16 pages of previously unpublished photographs in the middle of the book. This edition was first copyrighted in 1972. The book has been published continuously by the Kloss family since 1946. A blurb on the cover of the 1981 printing (which retails for \$2.95) states: "Two million copy bestseller. The complete original text [with the same page numbers]. New family additions!" A color illustration by Harry Anderson shows a man and woman seated by an idyllic river, surrounded by birds and animals, in the Garden of Eden. The rear cover states that this is "The heirloom authorized Kloss family edition."

The contents of the book, except for the new sections

mentioned above, are identical to the original 1939 edition. But the recollections of Jethro Kloss by his children and granddaughter contain a wealth of new and interesting information. The recollections by his daughter Promise Kloss Moffett note: "My father was born on a large farm near Manitowac, Wisconsin, on April 27, 1863. The ninth of eleven children born to his pioneering parents lived a healthy and happy life in that primitive Indian country..."

"When he was about twenty, he went to Florida and worked in the orange groves, finally owning a large grove at Deland. Later he attended school in Nebraska and then in Battle Creek, Michigan. While in Battle Creek he worked closely with the then revolutionary medical leadership of the world-renowned Battle Creek Sanitarium. He saw clearly the disastrous results of the use of dangerous drugs then prevalent in caring for the sick. He developed further his own philosophy and understanding of the laws of nature..."

"He was married March 5, 1900 to Miss Carrie Stilson, who had trained as a Bible worker and teacher and had labored in a mission in Madison, Wisconsin and taught several terms of grade school. At that time he was a licensed minister in Wisconsin and they established their home at Rose Lawn. Two children were born to this union, Promise Joy and Paul, who died when only four weeks old of whooping cough. During these years, besides my father's ministerial work, my parent's operated a branch of the Battle Creek Sanitarium and also sold Battle Creek Sanitarium health foods. My mother died in July of 1905.

"In March, 1907, my father married Mrs. Amy Ponwith, a widow with a small daughter, Mabel. My father and step-mother owned and operated an attractive sanitarium in pleasant surroundings in St. Peter, Minnesota, which they named *The Home Sanitarium*... Their daughter Lucile was born here in St. Peter in 1908 and their son, Eden, in 1910.

"Next the Kloss's became interested in the self-supporting work being conducted in the south and visited some of the schools in North Carolina and Tennessee. About 1911 they sold the sanitarium in Minnesota and moved to Fountain Head, Tennessee, where their youngest daughter, Naomi, was born in 1913. Here they bought a 250 acre farm, built a large house and barn, and raised many kinds of fruits and vegetables..."

"A later development in good health was his creation of a significant health food manufacturing operation in Amqui, Tennessee after receiving a call from them to take charge of their food factory..."

"Before this factory was sold to the Nashville Agricultural Normal Institute he was shipping health foods all over the United States and Canada. It was during this time at this place that he originated many new health food recipes. This establishment later became a part of what has since become the well-known Madison College near Nashville, Tennessee.

"Our next move was to Brooke, Virginia where [in

1921] papa established a health food factory and retail market. Each of us children was pressed into service in one way or another with this family enterprise. At times we would be helping with some food experiment, or perhaps in typing and retyping the material that later became *Back to Eden*, which was many years in preparation. Jethro Kloss's son Eden was for many years his right hand helper. Whatever my father did in spreading the gospel of health and natural living, he did with all his might and trained his children in that same pattern of living...

"One of my favorite memories as a family is the daily worship hour when Father would gather his family of seven about him and we would sing hymns, read Bible verses around the circle, and pray together. He was a gentle but firm family leader.

"Although a strict disciplinarian, my father was warm-hearted and affectionate—devoted to his family. When he was away from home, we invariably received a letter from 'papa' every day...

"Eventually this health food factory at Brooke, Virginia was taken over by my step-sister, Mabel and her husband.

"The Kloss's then moved to Washington, D.C. and carried on his work of treating the sick, lecturing on health and a more intensive study of herbs and preparation of his book, *Back to Eden*. I still have in my possession an attractive menu... for a Demonstration Dinner he gave March 27, 1933, at the Dodge Hotel in Washington, D.C. The menu was completely vegetarian and included 'Sweetbreads a la Kloss.' The pumpkin pie and strawberry sundae were made with soy milk...

"*Back to Eden* was at last published in 1939, the fruition of much toil and sacrifice for many years by the entire Kloss family... [Jethro's] wife Amy [Pettis] Kloss died in 1944 at Fredericksburg, Virginia...

"In 1945 papa became acquainted with Mr. and Mrs. Deloe Robert Hiatt on a trip to Madison, Tennessee. Together they found a property at Coalmont, Tennessee, where the Hiatts took over the promotion and publication of *Back to Eden*... [Jethro] peacefully went to sleep in June of 1946, his eighty-fourth year [but he was age 83], and today rests in a little cemetery in Tennessee."

The recollections by his son, Eden, note: "I was born in St. Peter, Minnesota, on February 10, 1910, to Jethro and Amy Kloss... After the move to Tennessee, my parents developed a plant for the manufacture of a line of vegetarian meat substitutes, cereals, crackers, and other items, at Amqui, near Nashville. (Our business was called the Nashville Sanitarium Food Factory.) Many of my early memories center on that large two-story factory, where raw materials were transformed into good-tasting, healthful food products...

"My father was an untiring worker. He would be up hours before the rest of the family—building fires, starting cracker dough, and making everything ready so that the work

could go full speed ahead when the workers arrived in the morning... One day when Eden was burned while canning tomatoes, Jethro rushed him to the Madison Sanitarium for treatment. Kloss also made gluten there.

"When I was nine or ten years old, the factory was sold to the private school at Madison and transferred to that campus, and our family traveled in our pickup truck, camping en route, from Tennessee to Virginia. Here, at a town named Brooke, we found an ideal location—a plot of ground with a building in which we could make and sell health foods and teach people about healthful living...

"It was here at Brooke, Virginia, that Papa started to put in uncounted hours working on the beginnings of his book, *Back to Eden*.

"After some years, my oldest sister and her husband took over the food factory, and my parents moved to Takoma Park (on the outskirts of Washington, D.C.)...

"Papa's travels to give lectures and food demonstrations took him to places like Miami, Florida, and Houston, Texas."

There are also recollections by his granddaughter, Doris Joyce Kloss Gardiner. In about 1939-40 she used to be with her grandparents when they visited relatives in Falmouth, Virginia, just north of Fredericksburg. There she helped make soymilk: "Nor was I happy to stand at the stove stirring and stirring large kettles of soybean milk (so the milk wouldn't stick and be scorched)—a laborious and time-consuming process. But Grandpa's soybean milk was delicious, and so were the twenty or so other soy products that he originated and produced—including meat substitutes and soybean bread, butter, cheese, and ice cream..."

"Often Grandpa would prepare soybean ice cream to serve at the close of his lectures or cooking demonstrations. One of my favorite treats was to lick the paddle from the ice-cream freezer before we left home to go to the lecture..."

"Grandpa and Grandma Kloss died when I was in my mid-teens." The frontispiece (facing the title page) is a portrait photo of Jethro Kloss. An original of this photo was sent to Soyfoods Center in 1985 by Doris Kloss Gardiner of Loma Linda, California. On the 4th page of photos in the center section is an ad by "Jethro Kloss Health Food Company, Brooke, Virginia." Photos show two hand grinders, a large-scale gas-fired pressure cooker, a large stove-top pressure cooker, and a hand scaler. The text begins: "We manufacture a large line of health foods." In 1921 Kloss opened this health food factory in Brooke, VA, and it is on this site that he began writing *Back to Eden*. Address: P.O. Box 1439, Loma Linda, California 92354.

1368. Sair, R.A. 1981. Marketing plant protein in Europe. In: D.W. Stanley, E.D. Murray, and D.H. Lees, eds. 1981. Utilization of Protein Resources. Westport, CT: Food & Nutrition Press, Inc. 403 p. See p. 391-98. Chap. 22.

• **Summary:** Contents: Introduction. Unrealized expectations for vegetable proteins (due to): Social habits, health, attitudes

of food processors, attitudes of protein processors, legislation of protein products, revised marketing goals. Case history I—A commercial canned product (made by Cadbury in the UK; test marketing began in Jan. 1976). Case history II—Soy concentrates and isolates as ingredients (in meat products made by Griffith Labs). Conclusion.

“In the U.K. it was forecast that the use of vegetable proteins would increase from 1500 tons in 1972 to 60,000 tons in 1980. More recent figures (1976) suggested U.K. production of textured vegetable protein of 6,000 to 8,000 tons increasing to 30,000 tons by 1981 and a total consumption of all protein in the EEC of 23,000 to 32,000 tons with vegetable proteins representing 4,500 to 5,000 tons. New factories were built, marketing programs launched and research programs initiated; in short, the Western world mobilized its resources to cope with the expected demand for vegetable proteins. Europe generally followed the optimism concerning new proteins...

“It is now 1979 and, theoretically, the world should be in the midst of a protein revolution. Obviously, the forecasts made earlier this decade did not materialize. In retrospect, there appears to be several reasons why Europe has not met these expectations... Soy protein was perceived as imitation meat, inferior nutritionally and used only to feed school children...

“It became obvious in 1975-76 that the forecasts made previously for soy sales in Europe were not accurate. This forced a reexamination of marketing goals. Tariffs were a problem since the tariff on concentrates is higher than the tariff on isolates (20% versus 8%) and this made the competition of U.S. concentrates against isolates produced in Europe more difficult.”

On page 397, black-and-white photos show the labels of 12 products that contain soy introduced in the UK: Cadbury's Soya Choice (mince or casserole chunks). Danoxa Hot Dog Sausages or Kesp Pie Filling with Kidney (made in Holland). Clover Beef Steak & Kidney. Brooke Bond Oxo Soya Mince (in Bolognese sauce with onion, or in mild beef-curry sauce). Crosse & Blackwell Mince Savour. Sainsbury's Soya Granules. Batchelors chopped and shaped Stewed Steak & Onions (Pie Filling). Birds Eye 4 Beef Burgers (Contain at least 80% beef with onion). Findus 4 Crispy Pancakes with Minced Beef Filling. Address: Vice-President—Technical, International Operations, Griffith Laboratories, Alsip, Illinois.

1370. Shandler, Michael; Shandler, Nina. 1981. The complete guide and cookbook for raising your child as a vegetarian. New York, NY: Schocken Books. xiv + 337 p. Index. 24 cm. [65 ref]

• **Summary:** On p. 22 soybeans and rice are used to illustrate protein complementarity. Fats survival plan (p. 70-71): Describes how to make clarified butter (ghee); it is superior to other fats for frying purposes and is not subject to the same polymerization as vegetable oils. “Eggs do not constitute a cholesterol risk,” but “soy milk and tofu are... excellent high-protein substitutes for eggs if your children are allergic.” Good sources of protein during pregnancy include beans, grains, tofu, gluten, dairy products, and soy products. Use complementary proteins together. Tofu can be blended into creamy salad dressings.

“Homemade soy milk is deficient in vitamin B-12, vitamin D, and calcium. Commercial soy drinks for infants [infant formulas] are fortified with these and other nutrients but often contain sugar and other detrimental additives” (p. 110).

“After approximately 1 month of eating solid foods, a second series of foods can be introduced to your infant.” These may include puréed tofu or light miso soups (p. 116-17).

Soy-related recipes include: Whole wheat soy flakes (p. 206). Tamari broth with dumplings (and soy flour, p. 216). Nondairy cream of vegetable soup (with tofu, p. 216). Summer cucumber tofu soup (p. 218). Soyburgers (with whole soybeans, p. 222-23). Barbecued tofu sandwiches (p. 226). Tofu cheesie macaroni (p. 232). Tofu noodle casserole. Fried tofu over rice. Tomato tofu lo mien (p. 233-34). Tofu and rice seaweed rolls (p. 236). Pizza (with soy flour and gluten flour, p. 236-37). Creamed spinach with tofu (p. 254). Tamari-glazed “trees” (Broccoli, p. 255). Vegan dips (p. 264-65): Avocado tofu dip. Cucumber tofu dip. Nondairy dressings (p. 271-72): Tofu dressing. Nut and soy milks (p. 311-13): Fortified soy milk. Carob soy milk. Spiced soy milk. Almond milk. Cashew milk. Coconut milk. Tahini milk. Nondairy sandwich fillers (p. 320-21): Soy sandwich “meat” (with whole soybeans and tamari soy sauce). Tofu sandwich spread.

1371. Surata Soyfoods. 1981. Okara (Brochure). 302 Blair Blvd., Eugene, Oregon. 4 p. Front and back. Each page 28 cm. Typewritten.

• **Summary:** Defines okara, gives the nutritional

composition, and gives recipes for: Okara burgers. Okara granola. Okara and vegetable saute. Tabouli. Soysage. Okara bran cookies. Okara scrambled eggs. Okara-millet burgers. Okara cornbread. Fudge brownies. Okara bars. Okara scrambled eggs. Address: Oregon.

**1372. Product Name:** Loma Linda Vitaburger, and Vitaburger Chunks (TVP-brand Textured Soy Flour).  
**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.  
**Date of Introduction:** 1981?

**1373. Product Name:** Loma Linda Chili Beans with Vita-Burger.  
**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.  
**Date of Introduction:** 1981?

**1374. Product Name:** [Nutana Fricassee].  
**Foreign Name:** Nutana Frikasse.  
**Manufacturer's Name:** Nutana Helsekost.  
**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?  
**Ingredients:** Peas, SoyaPro with Calf-Like Flavour, water, carrots, vegetable margarine, wheat flour, spices, maize starch, parsley, vegetable aroma, caramel color (not ammonized).  
**Wt/Vol., Packaging, Price:** 425 gm can.  
**How Stored:** Shelf-stable.  
**Nutrition:** Per 100 gm: Calories 130, protein 6 gm, fat 8 gm, carbohydrate 7 gm.  
**New Product–Documentation:** Manufacturer's catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. "Use for dinner or to fill tartlet cases." It is "ready to serve. Just heat in a saucepan. Serve with boiled or mashed potatoes, and you will have an easy and delightful dish." Labels in Danish, Dutch, and Finnish.

**1375. Product Name:** [Nutana Goulash].  
**Foreign Name:** Nutana Gullasch.  
**Manufacturer's Name:** Nutana Helsekost.  
**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?  
**Ingredients:** Carrots, celery, oil, textured soya protein, onions, maize starch, tomato puree, vegetable margarine, spices, water.  
**Wt/Vol., Packaging, Price:** 415 gm can.  
**How Stored:** Shelf-stable.  
**Nutrition:** Per 100 gm: Calories 60, protein 4 gm, fat 2 gm,

carbohydrate 7 gm.

**New Product–Documentation:** Manufacturer's catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. "For dinner, heat in a pot and serve e.g. with mashed potatoes and green salad."

**1376. Product Name:** [Nutana Dinner Balls].  
**Foreign Name:** Nutana Maddagsboller.  
**Manufacturer's Name:** Nutana Helsekost.  
**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?

**Ingredients:** Water, gluten, textured soya protein, soya oil, bread crumbs, egg white powder, yeast extract, defatted soya flour, onions, grape sugar, spices, sea salt, vegetable flavouring. Gravy: Water, soya oil, wheat flour, spices, sea salt.

**Wt/Vol., Packaging, Price:** 400 gm can, of which about 180 gm are Dinner Balls.

**How Stored:** Shelf stable.

**New Product–Documentation:** Manufacturer's catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. "May be served in curry-sauce prepared by adding a level teaspoon of curry to the gravy in the tin. To be served with cooked rice and grated raw vegetables." Labels in Danish, Dutch, and Finnish.

**1377. Product Name:** [Nutana PRO with Beef-Like Flavor (Granulated, or Diced), or PRO with Neutral Taste (Granulated, TVP Vegetable Protein)].  
**Foreign Name:** Nutana PRO med boefkrydderi (Granuleret, terninger, or Diced), or PRO med neutral smag (granuleret), TVP.

**Manufacturer's Name:** Nutana Helsekost.  
**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

**Date of Introduction:** 1981?

**Ingredients:** Defatted soy flour, salt, vegetable spices.

**Wt/Vol., Packaging, Price:** 250 gm box. Becomes 750 gm after soaking.

**How Stored:** Shelf-stable.

**Nutrition:** Per 100 gm: Calories 350, protein 52 gm, fat 0-1 gm, carbohydrate 32 gm.

**New Product–Documentation:** Manufacturer's catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product.

**1378. Product Name:** [Nutana Frikalett/Rissole].  
**Foreign Name:** Nutana Rissole.  
**Manufacturer's Name:** Nutana Helsekost.  
**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?

**Ingredients:** Soya protein, egg white powder, spices, water. Gravy: Wheat flour, soya sauce, vegetable bouillon, onions.  
**Wt/Vol., Packaging, Price:** 450 gm can.  
**How Stored:** Shelf stable.  
**New Product–Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “Ready to serve. Just heat in saucepan. To be served with boiled or mashed potatoes and vegetables.” Labels in Danish, Dutch, and Finnish.

1379. **Product Name:** [Nutana Soya Goulash].  
**Foreign Name:** Nutana Soja-gullasch.  
**Manufacturer’s Name:** Nutana Helsekost.  
**Manufacturer’s Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?  
**Ingredients:** Water, Soya Pro with Beef-Like Flavour, carrots, celery, onions, wheat flour, sunflower oil, tomato puree, yeast extract, sea salt, spices, vegetable aroma, colour (caramel, not ammonized).  
**Wt/Vol., Packaging, Price:** 425 gm can.  
**How Stored:** Shelf-stable.  
**Nutrition:** Per 100 gm: Calories 110, protein 6 gm, fat 6 gm, carbohydrate 7 gm.  
**New Product–Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “For dinner or lunch. Ready to serve. Heat in a saucepan and serve with mashed potatoes, fresh grated vegetables, and beet roots.” Labels in Danish, Dutch, and Finnish.

1380. **Product Name:** [Nutana Soya Sausages].  
**Foreign Name:** Nutana Soja-poelser.  
**Manufacturer’s Name:** Nutana Helsekost.  
**Manufacturer’s Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?  
**Ingredients:** Water, sunflower oil, textured soya protein, gluten, grape sugar, sea salt, egg white powder, oat flakes, soya sauce, vegetable consistency, spices, vegetable flavouring, smoke flavour, colour (caramel, not ammonized). Water: water, vegetable bouillon.  
**Wt/Vol., Packaging, Price:** 385 gm can, of which 230 gm is sausages.  
**How Stored:** Shelf-stable.  
**Nutrition:** Per 100 gm: Calories 200, protein 13 gm, fat 15 gm, carbohydrate 4 gm.  
**New Product–Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “For dinner or lunch. Ready to serve. Heat or fry. Serve with bread, potato salad, or mashed potatoes.” Labels in Danish, Dutch, and Finnish.

1381. **Product Name:** [Nutana Soya Pro (With Beef-Like Flavor, or with Chicken-Like Flavor)].  
**Foreign Name:** Nutana Soya Pro (Soja-Oxlett, or Soja-Kylett).  
**Manufacturer’s Name:** Nutana Helsekost.  
**Manufacturer’s Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?  
**Ingredients:** Beef-Like: Water, textured soya protein, sunflower oil, wheat flour, egg white powder, yeast extract, soya sauce, grape sugar, sea salt, spices, vegetable aroma.  
**Wt/Vol., Packaging, Price:** 400 gm can, of which 170 gm is Soya Pro. The rest is sauce.  
**How Stored:** Shelf-stable.  
**Nutrition:** Beef-Like: Per 100 gm: Calories 130, protein 12 gm, fat 7 gm, carbohydrate 4 gm.  
**New Product–Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “For dinner. Ready to serve, just heat in a saucepan. Serve with potatoes and vegetables. The sauce may be varied with fried onions, tomatoes, chopped parsley, and mushrooms. Soya Pro can also be dipped in egg and bread-crumbs and fried. Shurtleff. 1981. Overseas Adventist Food Companies. p. 6. “In 1981 Nutana was doing the most advanced work with soy of any Adventist food company outside the U.S. They started in the early 1960s importing spun protein fibers (SPF) from the U.S. Now they import soy fibers spun by DE-VAU-GE in Germany and use them to make a range of meat analogs. Labels in Danish, Dutch, and Finnish.

Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. The product is now named Nutana Soja-Kylett. On the label is a photo of several round deep-fried cutlets, one cut in half, on a bed of rice.

1382. **Product Name:** [Nutana Spaghetti Sauce].  
**Foreign Name:** Nutana Spaghettilsovs.  
**Manufacturer’s Name:** Nutana Helsekost.  
**Manufacturer’s Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.  
**Date of Introduction:** 1981?  
**Ingredients:** Gluten, red paprika, onions, tomato puree, maize starch, sunflower oil, textured soya protein, wheat flour, colour (caramel, not ammonized), spices, water.  
**Wt/Vol., Packaging, Price:** 430 gm can.  
**How Stored:** Shelf-stable.  
**Nutrition:** Per 100 gm: Calories 70, protein 5 gm, fat 3 gm, carbohydrate 6 gm.  
**New Product–Documentation:** Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “For lunch or dinner, and in pizzas, heat in a pot and serve with mashed

potatoes or rice.”

1383. *Toyo Shinpo (Soyfoods News)*. 1982. [Japanese national tofu statistics for 1981]. Jan. 1. [Jap]

• **Summary:** In 1981 in Japan, the average amount of money spent on tofu per family was 6,274 yen, which bought about 87 cakes of tofu. The amount spent on aburage [deep-fried tofu pouches] per family was 3,534 yen, which bought about 93 pieces.

In 1980 the amount of soybeans used nationwide was 319,568 tonnes (metric tons) for tofu and 112,108 tonnes for deep-fried tofu pouches and tofu burgers (aburage and ganmodoki).

In 1981 the amount of soybeans used nationwide was 328,557 tonnes for tofu and 115,157 tonnes for deep-fried tofu pouches and tofu burgers (aburage and ganmodoki).

1384. Sass, Lorna J. 1982. Budget-conscious Americans are hitting the soy—its not just sauce. *Chicago Tribune*. Jan. 21. p. S\_A151.

• **Summary:** This article first appeared as: Sass, Lorna J. 1981. “Soy foods: Versatile, cheap and on the rise.” *New York Times*. Aug. 12. p. C1, C6. It first appeared in the *Chicago Tribune* on 29 Oct. 1981 (p. N\_B19).

1385. *Beanfield Newsletter (The) (SANA, Colrain, Massachusetts)*. 1982. Tempeh sales. 2(4):1. Jan.

• **Summary:** “The *Beanfield* recently contacted 15 tempeh companies around the U.S. to determine industry production figures and general prospects for tempeh sales. While overall poundage remains light except in Massachusetts and California most producers foresee a bright future and expanding sales.” Lists weekly tempeh production figures (in pounds) for each manufacturer.

The largest are: Soyfoods Unlimited (San Leandro, California; 5,900, including 3,200 lb of soy tempeh, 400 lb of five grain tempeh, and 400 lb of soy/rice, and 1,000 lb of packaged tempeh burgers every week. In addition they ship some 6,000 lb of tempeh burgers once a month to New England Soy Dairy in Massachusetts for East Coast distribution. Promotion to the local Indonesian market netted a 33% sales increase in one month).

The Tempeh Works (Greenfield, Massachusetts; 4,500), and Pacific Tempeh (Emeryville, California; 2,500). White Wave (Boulder, Colorado; 700). Cricklewood Soyfoods (Mertztown, Pennsylvania; 500). Northern Soy (Rochester, New York; 500).

1386. **Product Name:** Tempeh Burger.

**Manufacturer’s Name:** Cauldron Express.

**Manufacturer’s Address:** 123 Bolinas Rd., Fairfax, CA 94930. Phone: 415-453-2360.

**Date of Introduction:** 1982 January.

**Ingredients:** Pacific Tempeh Deep-Fried Tempeh Burger on a round whole-wheat hamburger bun with lettuce, relish, and tomato.

**Wt/Vol., Packaging, Price:** 9 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Paul Duchesne. 1989. Aug. 26. This was one of two products that he made in addition to products he distributed. It sold well.

1387. **Product Name:** Tofu, and Soysage.

**Manufacturer’s Name:** Rising Sun Soy Farms.

**Manufacturer’s Address:** 2810 Banwick, Columbus, OH 43227. Phone: 614-231-4073.

**Date of Introduction:** 1982 January.

**New Product–Documentation:** Leviton. 1982. Trip notes. They opened in January 1982. Form filled out by Tim Nusser and C.H. Burnett, in charge of Risingsun Soy Farms. They opened on 1 Jan. 1982. Gives address.

1388. **Product Name:** Upcountry Seitan.

**Manufacturer’s Name:** Upcountry.

**Manufacturer’s Address:** Huntington Rd. (P.O. Box 14x), Worthington, MA 01098. Phone: 413-238-5341.

**Date of Introduction:** 1982 January.

**Ingredients:** Organic whole wheat flour, water, tamari, cooked with kombu (sea vegetable).

**Wt/Vol., Packaging, Price:** 1 lb packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

**How Stored:** Refrigerated.

**Nutrition:** Per 4 oz.: Calories 70, protein 15 gm, fat 1 gm. Plus 6% of the RDA for vitamin C, 8% for riboflavin, thiamine, and niacin, and 10% for iron.

**New Product–Documentation:** Label printed in booklet titled “Cooking with Seitan.” 1982. Joan Donovan states that the color was deep red and gold with brown printing. “A high protein natural food. Delicious served as a sandwich or cut for a stew or casserole.”

Leaflet (6 panels), about 1982, with a description of seitan and recipes for sandwiches, baked squash with seitan, staple seitan, and seitan with pasta.

R. Leviton. 1983. *Vegetarian Times*. Jan. p. 32-37. Mochi, amazake and seitan: Introducing three new foods from the Orient. “Seitan has found a new home in the U.S. and for Winston and Joan Donovan it has proved to be both a life-sustaining and livelihood providing wholesome food. The Donovans launched their Upcountry Seitan business from their Worthington, Massachusetts, farmhouse in January 1982, largely because Winston had been diagnosed as having an incurable kidney disease which even dialysis couldn’t halt. After a consultation at Boston’s East/West Center, he adopted a macrobiotic diet featuring seitan and, in the past year, has regained his health and resolved his kidney ailment. For Winston, who drastically changed his diet in his forties, seitan’s chief attraction is that it resembles meat enough in taste and texture to satisfy most longings for beef and veal. The entire family is now vegetarian.” Describes how the Donovans use high-gluten hard red spring wheat to make 300 lb of seitan strips each 6-day week in their tidy 400 square foot shop. After kneading with water, the elastic gluten is called *kofu*. “The Donovans serve seitan in a variety of ways: deep-fried, fresh in slices, spiced with garlic and fennel, finely chopped and mixed with hummus, or in pita bread accompanied by sauerkraut and mustard.” A photo (p. 35) shows Winston and Joan Donovan in their seitan shop with their seitan, both packaged (in the same type of plastic tray or tub used to sell tofu) and on a plate.

Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. “Flour power! Cooking with seitan, the delicious natural food from grain.” “Upcountry Seitan, begun three and a half years ago [i.e., early 1982] by Win Donovan, is now owned and operated by Sandy Chianfoni. Sales have increased by 200% over the past two years and Chianfoni is currently making 600 pounds of seitan each week. The kneading and rinsing processes are automated, but the remaining steps are done by hand. Chianfoni has been experimenting with several desserts which use the starch water from the washing process. This starch has the same thickening properties as cornstarch and can be used to prepare custards and puddings... Upcountry Seitan in Lenox, Massachusetts, is the largest manufacturer we located in a recent survey of the industry. It makes 600 pounds each week and distributes through six states.” Page 39 shows 3 photos of Upcountry’s seitan-making operation.

Barbara and Leonard Jacobs. 1987. *Cooking with Seitan: Delicious Natural Foods from Whole Grains*. Current U.S. seitan manufacturers include Upcountry Seitan in Lenox,

Massachusetts, the largest known producer in America. The company is now owned and operated by Wendy Rowe and Sandy Chianfoni. They get a yield of 1.33 (i.e. 90 pounds of flour result in 120 pounds of seitan).

Talk with Sandy Chianfoni of Upcountry Seitan. 1991. Nov. 16. She moved to Boston in 1978 and in about Aug. 1983 she bought Upcountry Seitan from Win Donovan. She started production on 23 Oct. 1983. Win wanted to sell the business because it was growing and he did not want to take it to the next level. He was in good health and he did not yet know that he had cancer. He was in the process of selling his home and moving to Becket, with the Kushi Institute in western Massachusetts. He was planning to take over supervision of the property. He liked starting the business but he did not enjoy the ongoing process of running it. Upcountry was very small at the time Win sold it. Mark Betinis, who worked for him, drove the product to Boston (mostly to Bread & Circus) once a week, then Charley Kendall was distributing it with his own products to the major natural food stores in New York City. He may also have sold a little by UPS. They sold about 36 cases a week on average. He had no walk-in cooler or distributor. In June of this year she moved to a larger factory (P.O. Box 76, Lenox Dale, MA 01242), increasing to 4,700 square feet from 1,000. She wants to increase her volume because she knows the demand is there. Since the starch from her gluten process was clogging up local sewage pipes, she now has to settle out the solids and then have them pumped out. She used to make a pudding with her wheat starch. Launched in 1985, it was named “Cup o’ Puddin’” in Maple-Walnut and Almond flavors. It was delicious, but she great difficulty bringing it to a mass-production scale. Now she would like to try to make a drink with it. That is one of the main reasons there are not more gluten makers in existence. There are three countries that export a lot of gluten: Australia, Germany, and the USA.

Talk with Joan Donovan, formerly of Upcountry Seitan. 1991. Nov. 17. Their company had only one commercial product—the basic seitan. They experimented with a ginger and shiitake mushroom flavor but never really launched it. Upcountry was the first company on the East Coast to package seitan. They got the idea of using tofu tubs from New England Soy Dairy. It was packaged partly immersed in some of the tamari broth to help preserve it and keep it from molding. Initially it was sold as a ½-pound loaf in the package; later it was sold sliced. It was sold refrigerated and a shelf life of about 5 days. Worthington is a very small town. Winston, who was a carpenter, built the home on Huntington Road; they made the seitan in a shop adjoining their home. Charles Kendall now lives in that house. She learned how to make seitan at an informal macrobiotic cooking session, either from Ann Burns or a man named Jim. Her husband had eaten meat and potatoes all his life, so he wanted to tell others that there were alternatives. He died of

cancer in 1986. Talk with Joan Donovan. 1991. Dec. 7. She cannot find a copy of the original label.

Label purchased at Berkeley Natural Grocery Co., California 1991. Nov. 5.5 by 4.5 inches. 8 oz molded plastic (high-density polyethylene) tray with heat-sealed, peel-off plastic film lid. Brown, green, and orange on white. Illustration of an orange sun rising over green mountains. See-through area above mountains. "Delicious ready to eat meat substitute. No cholesterol. Higher in protein than tofu. Frozen. Retail for \$2.99. Ingredients: Organic stoneground whole wheat flour, water, tamari, kombu (sea vegetable). Upcountry, Lenoxdale, MA 01242." Circle K kosher symbol.

Talk with a person in Massachusetts who is very knowledgeable about seitan. 1992. July 2. In recent years, Upcountry has given seitan a bad image. Their seitan tastes like a wet sponge. They don't develop the gluten well enough.

**1389. Product Name:** Country Stew (Vegetarian): With hearty chunks of vegetable protein.

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1982 January.

**Ingredients:** Water, textured vegetable protein (soy protein concentrate, wheat gluten, wheat flour), carrots, potatoes, peas, celery, soybean oil, flavorings (hydrolyzed vegetable protein, monosodium glutamate, onion and garlic powder,

artificial flavor, lemon juice, spices, disodium guanylate, disodium inosinate), sodium caseinate, onions, tomato paste, yeast extract, salt, caramel color, mono- and diglycerides, niacinamide, etc.

**Wt/Vol., Packaging, Price:** 19 oz can. Retail for \$1.95 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Food Report (Lehmann). 1982. Jan. Fully prepared; just heat and serve.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 19 oz. can. Ingredients are the same as those shown above. Label copyright 1983.

**1390. Product Name:** Beef Vegetable Soups (Meatless).

**Manufacturer's Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1982 January.

**Wt/Vol., Packaging, Price:** 19 oz cans.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Food Report (Lehmann). 1982. Jan. Fully prepared; just heat and serve.

**1391. Product Name:** Chicken Noodles (Meatless).

**Manufacturer's Name:**

Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1982 January.

**Wt/Vol., Packaging, Price:** 19 oz cans.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Food Report (Lehmann). 1982. Jan. Fully prepared; just heat and serve.

**1392. Wollner, Joel. 1982. History of Erewhon, macrobiotics, and soyfoods in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 2. 2 p. transcript.**

• **Summary:** Evan Root was the first attendant at the Erewhon retail store, below street level at 303-B Newbury Street. He lacquered the walls with Michio. Evan is a great storyteller,

very intelligent. The initial store was just one room, about 10 by 20 feet. Very few people came in to buy food, so it was more like a stock room than a store. Some evenings there were lectures there. Redwing Books now occupies that space. Most of the food (a tin of miso, a keg of tamari) was just being sent by the Kushis' friends from Japan as gifts; it didn't go through customs.

The Kushis got nigari and made tofu at home. It was not for sale, but for dinner guests and cooking classes. Joel made some tofu using lemon juice when nigari was not available.

As tofu started to become more popular, Erewhon started to buy it from a tofu maker in Boston's Chinatown. First they just bought and sold that tofu, but before long (in about 1973-74) they convinced him to start making nigari tofu for them. They guaranteed to buy what he made, and they sold him the nigari at cost. This might have been the first nigari tofu made in USA. A lot of nigari tofu is still made in Boston's Chinatown. Joel thinks the tofu maker was located on Tyler, Street, perhaps Yah Kee. Nigari came in 66 pound sacks from Japan. Erewhon also sold small quantities of nigari in the retail store. Chinatown was Erewhon's main source of tofu until Laughing Grasshopper appeared.

What was the macrobiotic movement's contribution to the history of soyfoods in the United States? Macrobiotic teachers and students talked and wrote about them, ate them, and sold them. They felt soyfoods were an important part of a good diet. They educated people and developed a market for soyfoods. Few Americans had eaten miso and tofu at home before 1966—the year Erewhon started. Macrobiotics were the first Caucasian Americans to really use soyfoods regularly. Before that, soyfoods (except perhaps soy sauce) were just interesting oddities. One could say that the macrobiotic movement introduced soyfoods to America.

As for tofu, Joel thinks that Michio Kushi's students misinterpreted his remarks about tofu being yin. Macrobiotics now eat tofu regularly, 3-4 times a week. There are endless ways to prepare it. It's been years since Joel has heard that tofu is "too yin."

What did *The Book of Tofu* (published in Dec. 1975) do for tofu? It expanded its relevance for the Western diet. Before that book, most of the tofu in the United States was consumed by people of East Asian ancestry.

Charles Kendall played a key role in making and introducing natto, mochi, and amazake to Caucasian Americans. He made these foods in his home and sold them locally. Initially, it was not a formal / legal business. But today his business, Kendall Foods, sells \$500 a week of these three foods. He has been making natto for 4-5 years. He was America's first Caucasian natto maker. Natto was served in macrobiotic restaurants in Boston.

The latest soyfood to hit Boston has been tempeh. It's been a phenomenal success. Macrobiotics are going crazy over it. Thom Leonard has been giving lots of tempeh classes for the past 1½ years. For more than a year, lots of sandwich

makers in Boston have been making and selling tempeh sandwiches. Tempeh is made into cutlets, burgers, tempeh mock-tuna salad. Why is it so popular? Because it is rich and meaty in texture and flavor—the opposite of rice. Most macrobiotics crave rich, meaty foods.

Ron Kotzsch is very close to the Kushis. A very unpretentious person with a wonderful sense of humor, he is now teaching in North Carolina. He is friends with Helen and Scott Nearing. He toured China and Japan with John Denver, the singer and songwriter—who did a benefit for Michio's new college.

How does Joel see the future of Erewhon? He thinks the company will focus on manufacturing only. Now is the critical time. He'd give Erewhon a 30-70% chance of survival. Address: Boston, Massachusetts.

1393. **Product Name:** Vegetable Protein Entrees [Uncle Archie's Chicken Almondine, Sweet 'N Sour Pork Style, Pepper Steak, or Hearty Stew Style].

**Manufacturer's Name:** Archer Daniel Midland Co.

**Manufacturer's Address:** Decatur, Illinois.

**Date of Introduction:** 1982 February.

**Ingredients:** Sweet 'N Sour Pork: TVP (soy flour), sugar, cornstarch, bell peppers, natural flavorings, vinegar solids, onion, tomato paste, garlic, sherry wine solids, monosodium glutamate (flavor enhancer), salt, spice, disodium inosinate and disodium guanylate (flavor enhancers), artificial flavor and colorings, citric acid.

**Wt/Vol., Packaging, Price:** 5.8 oz paperboard box.

**How Stored:** Shelf stable.

**Nutrition:** A 2/3 cup serving contains 10% of the U.S. RDA for protein, 138 calories, and less than 1 gm fat.

**New Product–Documentation:** Spot in Soyfoods. 1982.

Winter. p. 57. The product line is billed "An Oriental style entree based on textured vegetable protein and a delightful blend of vegetables served in a sauce designed to enhance their flavors." The product is dehydrated.

1394. Aros Sojaprodukter. 1982. Prislsta februari 1982

[Price list. February 1982]. Bergsvagen 1, S-190 63

Orsundsbro, Sweden. 2 p. [Swe]

• **Summary:** Lists 27 products, including books. Foods include tofu, tofu burgers, nigari, mung- and alfalfa sprouts. Address: Orsundsbro, Sweden. Phone: 0171-604 56.

1395. **Product Name:** Tempeh Salad (A Tuna-Fish-Style Crunchy & Creamy Salad or Sandwich Spread).

**Manufacturer's Name:** Cricklewood Soyfoods.

**Manufacturer's Address:** R.D. #1, Box 161, Mertztown, PA 19539.

**Date of Introduction:** 1982 February.

**New Product–Documentation:** Leviton. 1982. Soyfoods. Summer. p. 33. Packed in 8 oz. tubs with a 2 week shelf life. Ad in CRC Reports. 1982.

1396. **Product Name:** Tempting Tempeh Burger, Barbecued Tempeh Burger, and Mock Chicken Salad.

**Manufacturer's Name:** Fresh Foods.

**Manufacturer's Address:** Boulder, Colorado.

**Date of Introduction:** 1982 February.

**New Product–Documentation:** Talk with Gloria Gilbert.

1989. Sept. 11. She got the idea of a tempeh burger sandwich from Marty Roth and Barbara Svenning in late 1981. It was a gift from them at the time Gloria bought their sandwich business. Gloria introduced the Tempting Tempeh Burger in late Feb. or early March 1982. She bought the basic seasoned tempeh burger from Steve Demos, then sold it between buns with all the trimmings, in a plastic wrap, to the same outlets as her amasake, to markets in the Boulder, Denver, Ft. Collins, and maybe northern New Mexico. In April 1982 she launched a Mock Tempeh Salad made with plain soy tempeh from White Wave. Then in about June 1982 she introduced Barbecued Tempeh Burgers, a variation on the original burger but with barbecue sauce. At the peak, she was making about 300 of the two tempeh burgers each week. Years later she made a Quinoa Salad without soy.

1397. Leviton, Richard; Shurtleff, William. 1982. The coming tempeh boom. *Soyfoods*. Winter. p. 26-34, 38-40. Cover story. [13 ref]

• **Summary:** Company profiles of Soyfoods Unlimited (San Leandro, California) and Pacific Tempeh (Emeryville, California). “On February 15, 1981, Valerie, John, and Gary Robertson began tempeh production in their state of the American art \$100,000 plant in San Leandro, California.” The 1,000 square foot plant has a capacity of 10,000 lb/week of tempeh. “While the three Robertsons are each principals, Valerie is the chief dynamo, tempeh-maker, and sales-stormer, staging three in-store product demonstrations (called ‘Tempeh Tastings’) every week while managing their line of three tempehs and tempeh burgers.” “Soyfoods Unlimited produces 1,000 pounds of tempeh weekly and 1,000 pounds of marinated, steamed tempeh burgers. The tempeh intended for distributors is frozen immediately, then thawed and predated 16 days ahead of the day of delivery. Fresh tempeh is steamed then refrigerated until delivery. The Robertsons refrain from vacuum packing their tempeh in order to preserve the firm, white cake; the vacuum compression tends to darken and crush the fragile white mycelium. Although their tempeh was presented initially as a frozen food, the lack of product shelf visibility prompted the Robertsons to supply a refrigerated tempeh as well. The tempeh burgers, which are vacuum packed in six ounce plastic bags (with two burgers) are marinated in a steam kettle, then steamed... Their Brown Rice Soy Tempeh is fast becoming popular while the burgers are available in both round and square shapes (called ‘Tempeh Cutlets / Burgers’).”

“The energetic Valerie continually drives around the Bay

Area to conduct new Tempeh Tastings in the high volume stores among the region’s natural foods outlets. At a typical demonstration she offers samples of Tempeh with Herb Tomato Sauce, Sweet and Sour Tempeh, Mock Chicken Tempeh Salad, and Tempeh Burgers. To complement the demonstrations, the Robertsons have launched a cautious advertising campaign targeted for both the Bay area and selected national natural foods publications.”

The plant has a powerful sanitation system, which is described in detail.

Pacific tempeh was launched in Aug. 1980 on a \$40,000 investment that secured a 1,000 square foot facility in Emeryville, California. “The plant has a per week capacity of 5,500 pounds while current weekly tempeh production is 2,400 pounds.”

Photos show: (Cover) Valerie Robertson standing behind a table of tempeh dishes and promotional materials. (1) Valerie Robertson pulling a tray of finished tempeh in perforated plastic bags from a rolling rack. (2) Inside of the Soyfoods Unlimited plant. (2) Travis Burgeson holding a tray of finished tempeh. (4) A person vacuum packing tempeh burgers. (5) Travis Burgeson standing by a rolling rack. Address: 1. 100 Heath Rd., Colrain, Massachusetts 01340; 2. Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 413-624-5591.

1398. Leviton, Richard. 1982. Soy delis: Fast, natural, and growing. *Soyfoods*. Winter. p. 35-37.

• **Summary:** Discusses the Well Bean Deli in Santa Cruz (with a photo of Kevin Van Slooten); Real Food Tofu Cafe in Redwood Valley; and The Tofu Shop in Arcata. All in California. 2-3 photos show each location.

Concerning The Tofu Shop (768 18th St., Arcata, CA 95521): It “combines retail take-out with small scale tofu production and bakery products in a wood-lined airy storefront. Owner Matthew Schmit (who earlier managed a soy deli in Telluride, Colorado) has filled his 1,000 square feet with a small commercial cauldron-style tofu shop, small bakery, and 200 square foot retail front, all of which he launched on \$11,000 investment on December 15, 1980. The cozy retail space features racks of soy cookbooks and crackers, teas, packaged miso, tofu and tempeh kits, noodles, seaweed, and a handsome reach-in cooler where the tofu herb burgers, tofu spinach pies, vegetable tofu sushi rolls, tofu tahini salad, tofu herb dip, tofu cream pies, and bottled soymilk are displayed. Monthly sales average \$3,500 with some outside distribution of tofu, soymilk, and burgers. The deli attracts walk-in customers from the nearby Humboldt branch of the University of California while tofu burgers and tofu spinach turnovers are probably the most popular products at the deli.” Photos show: (1) Matthew Schmit standing at the wood-lined counter. (2) Matthew and Susan [Suzanne] Schmit with their shop’s specialties.

Concerning the Real Food Tofu Cafe (8473 East Rd.,

Redwood Valley, California): The Tofu Cafe is “in the tiny inland town of Redwood Valley (population: 400). Real Food (billed as ‘Vegetarian whole foods, specializing in delights from the humble soybean’) opened its 900 square foot facility (which includes in-house tofu production and secondary tofu products) in November 1980. The cafe is open for leisurely lunches, from noon until four and the customer often feels as if he is dining in someone’s large, lovely living room. The deli is outfitted with wall-to-wall carpeting, an authentic rock wall, hefty wooden tables, plants. The decor, in fact, in most soy delis is typically tasteful, low key, earthy, and exudes a subdued sense of quality. ‘Anyone who runs a soy deli,’ Dik Rose remarks ‘should make secondaries because of their promotional value for the deli name.’ Rose’s cafe, which is the retail branch of his Brightsong Tofu Company, produces Missing Egg Tofu Salad, Tofummus, Almond Tofu Creamie, and Strawberry Tofu Creamie, packaged in 8 ounce plastic tubs, and shipped frozen (with a 17 day refrigerated shelf life) around the San Francisco market. Missing Egg Tofu Salad sandwich and banana carob soymilk shakes are the deli best sellers, the average ticket is \$3.50, and take-out and sit-down each draw 50 percent.” Photos show: (3) The inside of the deli. (2) Dik and Sharon Rose behind the counter, with their large menu on the wall behind them. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

**1399. Product Name:** Loma Linda Corn Dogs (Meatless).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1982 February.

**Ingredients:** Meatless wiener: Wheat gluten, corn oil, water, dried yeast, soy protein concentrate, artificial and natural (vegetable) flavors, wheat germ, soy flour, onion, vegetable mono- and di-glycerides, garlic powder, salt, soy lecithin, caramel color, L-lysine, paprika, artificial color, spice, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Batter: Enriched flour, corn flour, enriched corn meal, sugar, salt, soy flour, soy oil, whey, egg yolks, dried honey, sodium acid pyrophosphate, sodium bicarbonate, monocalcium phosphate, artificial and natural (vegetable) flavors.

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 1 corn dog (2.5 oz–71 gm): Calories 250, protein 12 gm, carbohydrate 7 gm, fat 19 gm, cholesterol 0 mg, sodium 300 mg, potassium 120 mg.

**New Product–Documentation:** Food Report (Lehmann). 1982. Aug. The frozen corn dogs are meatless wieners

dipped in corn batter.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1982.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

**1400. Product Name:** Living Lightly Ready to Eat Tofu Cutlet (Deep-fried Cake of Tofu).

**Manufacturer’s Name:** Pacific Trading Co. Distributed by Living Lightly.

**Manufacturer’s Address:** P.O. Box 40429, San Francisco, CA 94110.

**Date of Introduction:** 1982 February.

**Ingredients:** Water, soybeans (organically grown in accordance with Section 26569.11 of the California Health & Safety Code), soy oil, curded with natural calcium sulfate.

**Wt/Vol., Packaging, Price:** 6.5 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1982, undated. 4 by 2.75 inches. Self adhesive. Blue, brown, green and white.

Film label (see next page). 1983. 7.5 by 4.5 inches. Blue and green on white. “Organic soybeans. Use like meat or cheese.” “Serving Suggestions: Tofu Cutlets are ready to eat. Serve like cheese, ham, or bacon; sliced in sandwiches or with fried eggs; diced in salads, soups, casseroles, stews, or scrambled eggs. Or reheat in a toaster, oven or barbecue, and serve with a little soy sauce, and garlic or grated ginger.”

**1401. Product Name:** Living Lightly Tempehroni Pizza.

**Manufacturer’s Name:** Pacific Trading Co.

**Manufacturer’s Address:** P.O. Box 40429, San Francisco, CA 94110.

**Date of Introduction:** 1982 February.

**Ingredients:** Crust: Whole wheat flour, water, yeast, sesame seeds, salt. Sauce: Tomatoes, onions, carrots, parsley, soy oil, garlic, green pepper, spices. Rennetless mozzarella cheese,

Tempehroni (Soybeans, brown rice, water, tempeh culture), shoyu soy sauce, herbs, spices.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Label. “No Preservatives.”

1402. **Product Name:** Living Lightly Tofu Lasagna.

**Manufacturer’s Name:** Pacific Trading Co.

**Manufacturer’s Address:** San Francisco, California.

**Date of Introduction:** 1982 February.

**Ingredients:** Rennetless ricotta cheese, tofu, tomatoes, rennetless mozzarella and Romano cheese, whole wheat flour, green onions, carrots, eggplant, soy oil, garlic, herbs and spices.

**Wt/Vol., Packaging, Price:** 18 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1982. 4 by 2.75 inches. Self adhesive. Green and red on white. “Tofu with pastabilities... For more about tofu see *The Book of Tofu...*” Spot in Soyfoods. 1982. Winter. p. 57. 18 oz.

1403. **Product Name:** Living Lightly Tempeh Patties (Meatless Burgers: Vacuum Packed).

**Manufacturer’s Name:** Pacific Trading Co.

**Manufacturer’s Address:** P.O. Box 40429, San Francisco, CA 94110.

**Date of Introduction:** 1982 February.

**Ingredients:** Soy tempeh (made from organic soybeans), natural soy sauce, herbs, spices.

**Wt/Vol., Packaging, Price:** 6 oz vacuum packed.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 3 oz.: calories 120, protein 12 gm, sodium 443 mg, carbohydrates 8 gm, fat 4 gm.

**New Product–Documentation:** Label. Undated. 3.5 inch diameter. Red and blue on white. “Meatless, Ready to eat. Not fried! No cholesterol. Shelf life at 40°F is up to 28 days.”

1404. **Product Name:** Living Lightly Chili Con Tempeh (Meatless Chili).

**Manufacturer’s Name:** Pacific Trading Co.

**Manufacturer’s Address:** San Francisco, California.

**Date of Introduction:** 1982 February.

**Ingredients:** Pinto beans, soy & rice tempeh, tomato sauce, onions, water, jalapeno peppers, serrano peppers, soy oil, chili powder, spices, sea salt, shoyu soy sauce, garlic powder.

**Wt/Vol., Packaging, Price:** 12 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Label. “Ready to Eat. For delicious tempeh recipes see *The Book of Tempeh* by Shurtleff & Aoyagi.”

1405. Percival, Bob. 1982. Easy to do tofu. *Vegetarian Times* No. 54. Feb. p. 61-64.

• **Summary:** How to make tofu at home, plus recipes for Tofu Guacamole and Soysage. A photo shows the utensils necessary for making tofu (found in most kitchens).

1406. Shurtleff, William; Aoyagi, Akiko. 1982. Tofu &

soymilk production: A craft and technical manual. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Feb. 28 cm. [223 ref]

• **Summary:** The contents is identical to that of the original Aug. 1979 edition, but the publisher's name has changed to Soyfoods Center from New-Age Foods Study Center. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1407. **Product Name:** Furama Bean Curd (Yuba) [Fresh Frozen Sheets, or Dried Sticks].

**Manufacturer's Name:** Soyfoods of America.

**Manufacturer's Address:** 1091 E. Hamilton Rd., Duarte, CA 91010. Phone: 213-223-4473. Later: 213-681-5393.

**Date of Introduction:** 1982 February.

**Ingredients:** Soybeans, water.

**Wt/Vol., Packaging, Price:** 8 oz.

**New Product–Documentation:** Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number (213-223-4473). The owner is Mr. Ken Lee. "A yuba factory." Another listing at Los Angeles says: "Lee Way Industries, 658 N. Broadway, 90012. Phone: 213-223-4473 (Ken Lee, a yuba factory)."

Leviton, R. 1982. "Soyfoods of America." *Soyfoods*. Summer [July]. p. 30-31. Ken Lee's tofu plant opened in Sept. 1981, with nearly a million dollars in startup capital. Ken took several trips to Japan and Hong Kong to study process and machinery. Yuba production is currently 1,000 lb/week, working 5 days a week with 3 workers. It is sold in dry rolls and semi-moist frozen form. Lawrence Wu was hired to supervise yuba production and new product development. He plans to make "Yubaloney" (Buddha's Chicken) from marinated yuba sticks, wrapped in tight cloth bundles and steamed under pressure for 40 minutes until the yuba has congealed into a sausage-like roll.

Ad in *Soyfoods*. 1984. Summer. p. 3. The dried yuba comes in 8-oz. brittle sticks with 6-months unrefrigerated shelf life. The fresh yuba has 5 soft sheets per package with a 6-month frozen shelf life.

Talk with Ken Lee. 1988. Aug. 29. His company started production in Nov. 1981, making yuba, soymilk, and tofu. Of the yuba, 90% is fresh frozen sheets and 10% is dry sticks. See 1988 interview. Mrs. Lee recalls the introduction date to be Aug. 1981.

Labels. 1988. 7 by 2 inches. Paper. Letter from Ken Lee. 1988. Oct. 10. Now states he started marketing the yuba in Feb. 1982, before Chinese New Year. So the starting date is somewhere between Nov. 1981 and Feb. 1982.

1408. *Soyfoods*. 1982. Soyfoods marketer. Winter. p. 57.

• **Summary:** "Mark Brawerman's Pacific Trading Co. distributes a diverse line of frozen and refrigerated soyfoods around the greater San Francisco area. Besides his stock

of yogurt, cheeses, juices, eggless honey dairy ice cream, and middle eastern specialty foods, Brawerman distributes soyfoods from three West coast producers including Island Spring (Smoked Soyloaf, Steamed Tofu), Redwood Valley (Almond Creamie, Berry Creamie, Soysage, Tofumous, Missing Egg), and Soyfoods Unlimited (Tempeh, Tempeh Burger). Brawerman also handles two brand name lines of his own, Jolly Licks Non-Dairy Frozen Desserts and Living Lightly. The Jolly Licks line of soymilk ice creams was introduced in July 1980 and includes these flavors: Toasted Almond, Strawberry, Coffee, Carob, Orange, Carob Mint, Vanilla, Chocolate, (in pints and 5 oz cups). The Living Lightly line includes soft and firm tofu (water-packed and vacuum packed), tofu cutlets, SoyMoo beverage (plain, vanilla-cinnamon, in pints and quarts), two flavors of Tofu No-Cheese Cake (Hawaiian, Strawberry, at 12 oz), and six frozen tofu entrees, (Tofu Tamale, 7 and 12 oz; Tofu Enchilada, 12 oz; Tofu Lasagna, 18 oz; Tofu Ravioli, 14 oz; Tofu Italian Salad, 8 oz; and Tofu No Egg Salad, 8 oz)."

1409. *Soyfoods*. 1982. Welcome to the all tempeh restaurant. Winter. p. 29.

• **Summary:** About Java Murni Indonesian Ricetable (4509 Adams St., Carlsbad, California 92008). Lists all the tempeh dishes on the menu. Java Murni also produces a tempeh burger.

1410. Stephensen, Susie; Frumkin, Paul. 1982. Budget stretching entrees: The economy and you. *Food Management*. Feb. p. 47-53.

• **Summary:** "One budget stretcher that is increasing in popularity all over the country is tofu." At Bryn Mawr College in Pennsylvania, foodservice director Gail Finan serves chopped tofu on the salad bar, plus a tofu parmigiana and a tofu served in marinara sauce. These have proved "quite successful among students and faculty."

Other tofu recipes described are: Marinated orange tofu salad (Boston College). Tofu with taco. Tofu burger on a sesame bun. Tofu cutlet with cheese (the tofu is deep fried). Tofu tempura. Address: 1. Senior editor; 2. Contributing editor.

1411. Tibbott, Seth. 1982. Turtle Island Tempeh, Oregon. *Soyfoods*. Winter. p. 31.

• **Summary:** "Turtle Island Soy Dairy is a small tempeh shop in Forest Grove, Oregon. Three of us make tempeh four nights a week in an old creamery building and we make three tempeh products: plain old soy tempeh, Five Grain, and Tempehroni (the soy tempeh with herbs)... We make our Five Grain style from soybeans, millet, rice, sunflower and sesame seeds... Since pizza was always one of our favorite ways to eat tempeh, we designed Tempehroni to be sliced into attractive two-inch rounds similar to its more well-known cousin, pepperoni. After much experimentation we settled

on marjoram, basil, oregano, thyme, and summer savory [as Tempehroni seasonings]. Tempehroni's relatively high price (\$1.28 for 8 oz) reflects the high labor costs involved, chiefly funneling all those beans down a thin chute into a specially made bag."

A photo shows 3 Turtle Island tempeh products. An illustration shows the Turtle Island Soy Dairy logo. Address: Owner, Turtle Island Soy Dairy, Forest Grove, Oregon.

**1412. Product Name:** [Tofu Burger (Ready-to-Eat in Buns, or 3 Pieces in Vacuum Pack)].

**Foreign Name:** Tofu Burger.

**Manufacturer's Name:** Auenland Tofu und Soja Produkte.

**Manufacturer's Address:** Hub 2, D-8210 Prien-Chiemsee, West Germany.

**Date of Introduction:** 1982 March.

**Wt/Vol., Packaging, Price:** Vacuum packed.

**New Product–Documentation:** Talk with Peter Wiegand. 1987. Nov. 11. He introduced 7 tofu products on the day he started. The Tofu Burgers were the most successful of his products, followed by the Tofu Cakes. He was in business for two and a half years, closing in Oct. 1986. He was very evangelical during that time.

**1413. Product Name:** [Tofunafish Salad or Tofu Salad].

**Foreign Name:** Tofunafish Salad.

**Manufacturer's Name:** Auenland Tofu und Soja Produkte.

**Manufacturer's Address:** Hub 2, D-8210 Prien-Chiemsee, West Germany.

**Date of Introduction:** 1982 March.

**Wt/Vol., Packaging, Price:** Round plastic deli tubs.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Peter Wiegand. 1982. June 22. Followed by phone talk. Talk with Peter Wiegand. 1987. Nov. 11. He introduced 7 tofu products on the day he started.

Talk with Michael Pierce (Graphic artist, Macon, Georgia). 1989. Oct. 30. He recalls that the Tofunafish Salad was sold in round plastic deli tubs.

**1414. Product Name:** Tofu Burger.

**Manufacturer's Name:** Bud, Inc.

**Manufacturer's Address:** 1100 Wicomico St., Baltimore, MD 21230.

**Date of Introduction:** 1982 March.

**Ingredients:** Natural nigari tofu, carrots, cabbage, onion, celery, okara, soymilk, sesame seeds, sunflower seeds, soybean oil, sea salt, spices.

**Wt/Vol., Packaging, Price:** 7 oz vacuum pack.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 3.5 oz.: Calories 190, calories 12 gm, carbohydrates 11 gm, fat 12 gm, sodium 250 mg (250 mg/100 gm).

**New Product–Documentation:** Label. 1982. March

(dated). 4.5 inches square. Black and white on yellow. "Keep frozen. Completely vegetarian. All natural. No preservatives." Logo reads: "Soyfoods for a healthy world"; This company is run by a Taiwanese family.

This product is still being sold with the same label in July 1992.

"Fresh tofu comes to Northern Cal.," by Matthew Schmit (*Sketch of The Tofu Shop in Arcata*, 13 Feb. 1981). Article—"Back to basics' approach provides answers to challenges facing product developers," by James S. Burns (Oct. 1979, p. 40, 42, 46, 58). Address: Colrain, Massachusetts. Phone: 413-624-5591.

1416. Shurtleff, William; Aoyagi, Akiko. 1982. *History of the soyfoods movement in North America.* Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 50 p. March. Unpublished typescript. Available online at [www.soyinfocenter.com](http://www.soyinfocenter.com).

• **Summary:** A comprehensive history of the subject. Contents: New image of soyfoods and causes of interest: Good health, nutrition and fatness, weight loss diets, low-cost protein, meatless and vegetarian diets, world hunger, appropriate technology and right livelihood, voluntary simplicity, ecology and conservation, interest in East Asian cultures, spiritual practices, and cuisines.

Allied movements: Macrobiotics, natural foods, Rodale

Press, vegetarianism.

Characteristics of the soyfoods movement: Major foods and types of products, comparison of soy protein industry (high tech) and soyfoods industry (low tech), appropriate technology, relevance to the Third World, conclusion.

The Farm in Tennessee. *The Book of Tofu* and Soyfoods Center. Early soyfoods manufacturers. Soyfoods delis and restaurants. Second-generation soyfoods manufacturers and distributors (e.g. Swan Foods in Florida). Tofu kits and equipment. Soyfoods terminology. Founding of the Soycrafters/Soyfoods Association of North America: Richard Leviton. Growth of the Soyfoods Association: First conference, Soyfoods magazine, subsequent conferences, SANA problems, The New Soyfoods Association—Gary Barat and Michael Austin of New York City.

Soyfoods books and booklets. Media coverage. Growth of the soyfoods industry, including the Soycrafters Apprenticeship Program. Soyfoods Marketer/Distributors: Yellow Bean Trading Co., Garden of Eatin', Jolly Licks. Soyfoods in foodservice institutions. Influence and activities abroad. The future.

Note: This is the earliest document seen (Oct. 2008) that uses the term “Second-generation” in connection with soyfoods to refer to a soyfood product which uses a basic soyfood as its major ingredient. Thus, Tofu Cheesecake, Tempeh Lasagna, and Instant Miso Soup are all commercial “second-generation soyfood products.” If made at home for home use, they would be “second-generation soyfoods.” For some products, the line between basic and second-generation soyfood products is blurred, since some second-generation products that have a long history have come to be thought of as basic. For example: Deep-fried tofu burgers (*ganmodoki*), teriyaki sauce, etc. Address: Lafayette, California. Phone: 415-283-2991.

1417. Soy Plant Co-op Inc. (The). 1982. Price list effective 3/22/82 [22 March 1982]. Ann Arbor, Michigan. 1 p. 28 cm.  
 • **Summary:** This typewritten sheet contains three columns: Supplier, product, and price. The Soy Plant is supplier of (packaged or in bulk): Tofu (1 lb tub), plain soy milk and flavored soy milk (quarts), tempeh (8 oz), soysage (8 oz), miso garlic dressing (16 oz), Soyanaise (soy mayo, 16 oz), carob tofu pies, missing egg salad, tofu spinach quiche, gomaseao [gomashio]. Other suppliers are Micro Farms (alfalfa- or mung bean sprouts), Westbrae Foods (miso—3 types), The Grocery (The Tofu Cookbooklet), and Learning Tree (tofu kit, \$13.50 each).

New products available soon: Tempeh salad. Tofu tahini spread. Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

1418. **Product Name:** Meatless Frozen Entrees with Soy Pepperoni [Ranch Barbecue, Texas Tamale, Texas Burrito, or Pizza Royale].

**Manufacturer's Name:** Tumaro's Inc.

**Manufacturer's Address:** Los Angeles, California.

**Date of Introduction:** 1982 March.

**Ingredients:** Textured soy protein. Sauce: Tomato paste, honey, apple cider vinegar, water, tamari, arrowroot starch, spices, natural distilled wood smoke.

**New Product—Documentation:** Food Report (Lehmann). 1982. March. Spot in Soyfoods. 1982. Summer. p. 56. “Hottest Meal on the Range.” Frozen entrees using tender, beeflike textured soy protein strips, smothered in a tangy Texas-style sauce.

1419. *Whole Foods (Berkeley, California)*. 1982. New England Soy Dairy [distributing tempeh products]. March. p. 51.

• **Summary:** New England Soy Dairy has entered into an exclusive distribution agreement to distribute Soyfoods Unlimited Tempeh Burgers and Cutlets and the Pacific Tempeh Burger.

1420. Welters, Sjon. 1982. Re: Recent developments with soyfoods in Europe, and ties with macrobiotics. Letter to William Shurtleff at Soyfoods Center, April 16. 6 p. Typed, with signature on letterhead (photocopy).

• **Summary:** This letter, whose letterhead reads “Manna Natuurlijke Levensmiddelen,” contains names and addresses of many new soyfoods companies, many of them started by people interested in macrobiotics. Names and addresses of the following companies are given: Tofu Denmark (in Valby, run by Per Fruergaard, a macrobiotic), Bernard Storup, Ab & Paulien Schaft (Dutch, setting up a small shop in Baillestavy, France, to make miso, shoyu, natto, and koji), Traditions du Grain (Jean Luc Alonso is setting up a macrobiotic tempeh shop in Ivry France; they will start this summer), Paul Jones (Tofu shop in London), Saskia de Jong (may make miso in Ireland), de Brandnetel (tofu shop in Antwerp, Belgium), Jonathan (makes tofu, ganmo, seitan, mochi in Ekeren, Belgium. Run by J. v. Ponselee), Seven Arrows (Leuven, Belgium; making tofu), Lima Foods (now sell miso made at their plant and farm in France), Witte Wonder (Den Haag, Netherlands), De Morgenstond (Bakkeveen, Netherlands), Jakso (Heerwaarden, Netherlands. Run by Peter Dekker. The first and only shop making tempeh from organic soybeans), Firma Lembekker (Amsterdam), Unimave (Lisbon, Portugal), Jose Parracho (Setubal, Portugal), Swame [sic, Swami] Anand Svadesha (Furth im Wald, West Germany), Bittersuess (Cologne, West Germany. Attn: Thomas Kasas/Karas). Three distributors of soyfoods and natural foods in Germany are YinYang (Berlin), Rapunzel (Heimraadshofe), and Mutter Erde (Werbelen). In Finland: Luonnonruokakauppa AUMA (Helsinki). In Switzerland: Verena Krieger of Sojalade (Engelberg, tofu shop), Hans Rudolph Opplinger (Cham, tofu shop), Marty Halsley (Nyon, tofu & tempeh), Restaurant Sesam (Bern). P. Ton van Oers

is a Dutch priest who works in Kananga, Zaire. The natives have grown soy for 10 years and he is thinking of making tofu and soymilk from them.

“In Great Britain the East West Centre is very active in promoting soyfoods. As a part of the Kushi Institute program they have home-scale processing, in which tofu, tempeh, and miso-making are taught by Jon Sandler [Sandifer?]. He is the tempehmaker of the EWC too at Community Health Foundation, 188 Old St., London EC1. In the Netherlands, a great deal of soyfoods promotion is done by the East West Center and Manna. As you probably know, Manna was the first to introduce miso, tamari, shoyu, tempeh, tofu and koji to the larger public and we are still the main promoters of soyfoods as part of a more natural, vegetarian, and economic diet. Manna has been followed by a lot of other distributors of natural and health foods. We have two competitors in the tofu business: Witte Wonder and De Morgenstond.

“At the moment I’m the only teacher giving lectures on homescale miso-, tofu-, tempeh-, shoyu-, tamari-, natto-, and koji-making in the Netherlands. Mainly at the East West Centre and sometimes at different places in the country. People are starting to get interested.”

Note: This is the earliest document seen (Jan. 2003) concerning the work of Swami Anand Svadesha of West Germany, and of Thomas Karas of Bittersuess (Cologne, West Germany). Address: Stichting Natuurvoeding Amsterdam, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands. Phone: 020-323977.

1421. MacCormack, Harry. 1982. Re: Okara and Sayuri Furukawa. Letter to William and Akiko Shurtleff at Soyfoods Center, April 21. 3 p. Typed, with signature on letterhead.

• **Summary:** “We can’t find the *Well Being* article [about okara] although I remember it as being poorly written.”

“Your question about Burgers is I hope answered with the labels. Sayuri Furukawa was visiting with us from Japan last week. She will be contacting you both in the next couple of weeks as she plans to spend 6 weeks at Green Gulch. She is a wonderful woman, her father a Zen monk, she trained in an ‘old way’ tofu shop. She was teaching us how to make miso and shoyu.” They taught her how to make okara burgers.

Attached are labels for the following Sunbow Farms Products: Country Style Tofu, Soy Sausage, All-American Burgers [meatless, made with okara and soymilque], Gentle Felafer, Soymilque, Mexi-Burger. Address: Sunbow Farm Products, Route 2 Box 46, Corvallis, Oregon 97330. Phone: 503-929-5782.

1422. **Product Name:** [Ganmo {Tofu Burger}].

**Foreign Name:** Ganmo.

**Manufacturer’s Name:** Jonathan P.V.B.A.

**Manufacturer’s Address:** Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

**Date of Introduction:** 1982 April.

**Ingredients:** Crushed tofu, sesame seeds, vegetables, tamari, fresh herbs and spices, wheat flour.

**Wt/Vol., Packaging, Price:** Vacuum packed.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Sjon Welters. 1982. April 16. “Jonathan is a macrobiotic food company. They produce a wide assortment of macrobiotic products, such as tofu (3,000 lb/week), ganmo, etc.

Jonathan catalog. 1988. A full-page color plate shows all these products. These are deep-fried tofu burgers. Ingredients are listed (see above).

1423. Leviton, Richard. 1982. On the road for the fast food burger: A soy deli odyssey. *Vegetarian Times* No. 56. April. p. 62-65.

• **Summary:** Includes visits to and detailed descriptions of the ambience and menu at: The Well Bean Deli in Santa Cruz, California (Kevin Van Slooten), Real Food Tofu Cafe in Redwood Valley, California (Dik & Sharon Rose), The Tofu Shop in Arcata, California (Matthew & Susanne Schmit), South Fork Tofu Cafe in Helena, Montana (Bruce Anfinson, Vicki Keller, and Richard Saravalli), The Good Nature Deli in Oak Park, Illinois (Kevin O’Brien and Mary Ellen Sackett), The Soy Plant Deli in Ann Arbor, Michigan (a co-op), Hip Pocket Tofu Deli in Columbus, Ohio (Bill Lutz), Nature’s Grace in Honesdale, Pennsylvania (Jamie and Nancy Stunkard), Lotos Cafe in Rochester, New York (Greg Weaver), Soyateria in Toronto, Ontario (owned by Soy City Foods), Mintz’s Buffet in New York City (David Mintz), and Everybody’s Vegetarian Restaurant in Nashville, Tennessee (run by The Farm).

At Mintz’s Buffet (1040 Third Ave., 10021) “David Mintz would like to stuff the Big Apple with savory tofu, judging by the enthusiasm with which he embraced tofu a year ago in his traditional Jewish kosher deli and catering company. Mintz added tofu to his line of ‘soup to nuts, old time foods like Grandma used to make, a big menu,’ and placed tofu vegetable pies and tofu ice cream proudly next to the gefilte fish, chopped livers and matzoh balls. Located on New York’s upper east side near Bloomingdale’s, Mintz’s (which seats 15) receives celebrities and ordinary folk alike, people who are drawn to its special ‘Mintz’s Tofu Buffet of Vegetable Quiches,’ Tofu Vegetable Pies, Tofu Vegetable Salads (for instance, steamed broccoli with tofu mustard sauce), Tofu Egg Rolls, Tofu Blintzes, Tofu Bran Muffins (strawberry-rhubarb, apple-walnut, blueberry-bran, carrot-apple, pecan, lemon-granola, pineapple-coconut and cherry-granola), Soy Burgers and Soy Pizza. Before we glide out of Mintz’s soy emporium on a cloud of soybeans, we must sample his renowned Tofu Ice Cream (also called *Tofutti*) made from tofu, soymilk, fresh fruit, essences of apples, figs and raisins, honey, egg whites, soy oil—‘creamy and delicious, it’s beyond cream.’” Address: 100 Heath Rd.,

Colrain, Massachusetts 01340. Phone: 413-624-5591.

1424. **Product Name:** Vegetarian Steak Mix.  
**Manufacturer's Name:** Natural Way Mills.  
**Manufacturer's Address:** Middle River, Minnesota.  
**Date of Introduction:** 1982 April.  
**Ingredients:** Incl. stone ground wheat, corn, oats, barley, and soybeans.  
**New Product–Documentation:** Food Report (Lehmann). 1982. April. Water is added to the mix, which is then formed into a roll, chilled, and boiled in broth.

1425. **Product Name:** Deli Salad (A Tuna-Fish-Style Crunchy & Creamy Tempeh Salad or Sandwich Spread).  
**Manufacturer's Name:** Pacific Tempeh.  
**Manufacturer's Address:** 1508 62nd St., Emeryville, CA 94608.  
**Date of Introduction:** 1982 April.  
**New Product–Documentation:** Shurtleff & Aoyagi. 1985. History of Tempeh. p. 52. America's first product of this type.

1426. Wagner, Martha. 1982. Cooking with okara. *Vegetarian Times* No. 56. April. p. 46-48.  
 • **Summary:** The subtitle continues: Okara, high in protein and fiber, is a by-product of tofu which lends itself to a variety of cooking methods." Gives an introduction to okara with 8 recipes: Okara-millet burgers. Okara dumplings. Okara cornbread. Marlene's soysage. Fudge brownies. Sweet pie shell. Okara crackers. Okara waffles.

Fiber is now making a comeback in America—and none too soon. The average American intake of dietary fiber today is about 20% of what it was 100 years ago.

1427. *Whole Foods (Berkeley, California)*. 1982. Convenience soyfoods. April. p. 60.  
 • **Summary:** "Brightsong Tofu announces their line of quality convenience soyfoods: Premium handmade Brightsong tofu is the base for Missing-Egg and Cottage (with soy yogurt) tofu salads, Strawberry and Almond tofu creameries [sic, creamies] (two desserts), and Tofummus (a tofu hummus).

"Brightsong's Soysage is a vegetarian paté that contains mostly okara, the soy fiber from tofu-making. Hummous is a California-style sesame-bean spread. All products are organic, natural, dairy-less and contain no sugar or artificial anything. They are sold in eight and 15-ounce sizes with a four-color printed lid.

"Circle No. 69 on Reader Service Card."

A black-and-white photo shows seven Brightsong products.

1428. **Product Name:** Whole Earth VegeBurger (Dry Mix) [Herb & Vegetable, Chili, No-Salt (Aug.)].  
**Manufacturer's Name:** Yin Yang Ltd. [Whole Earth].

Renamed The Realeat Company in June 1982.  
**Manufacturer's Address:** London NW10, England.

**Date of Introduction:** 1982 April.

**Ingredients:** Sesame seeds, rolled oats, wheat gluten, textured soya flour, wholewheat rusk, dehydrated onion, dried mixed vegetables, yeast extract (Seasoning and seasalt vary between the 3 varieties).

**Wt/Vol., Packaging, Price:** 125 gm foil sachet, makes 4 x 70 gm burgers. Retails for 59 pence.

**How Stored:** Shelf stable.

**Nutrition:** Contains more protein, half the fat, and less calories than an average beefburger. Cooked product: Protein 19%, carbohydrate 17%, vegetable fat 6%, dietary fibre 5%, calories 190/100 gm when fried.

**New Product–Documentation:** Low, Robert. 1983. "And here comes... the VegeBurger." *Observer (The)* (London). Feb. 27. p. 4. Sunday. This meatless burger, which was created by Gregory Sams, was launched nationally last week.

Leaflet. 1986. VegeBurger. "Realeat made the VegeBurger famous in 1982..." But in other Realeat publications the year of introduction is given as 1983. Note: It was sold locally in 1982, then launched nationally in Feb. 1983. "You just mix it with water and egg (optional), wait for 15 minutes, and shape into burgers for frying."

Ad in *The Vegetarian*. 1984. May/June. p. 12. "Vege Burger by Realeat. The alternative that works. From health and natural food stores everywhere."

Letter from Gregory Sams. 1988. March 30. Says the product was introduced in 1982. Leaflet, undated. "A Recipe for success." Gives detailed product information. "Realeat made the VegeBurger famous in 1982 with the launch of the first all-natural meat alternative that tasted better, cost less, and did you good—with convenience. It proved a powerful combination and paved the way to a new market in meatless foods."

Talk with Philip Marshall of Cauldron Foods Ltd. 1990. July 9. This is probably the Haldane Food Group's best-selling soy product. Greg and Craig Sams are brothers, and both American. Philip does not know if they still work with Haldane or if they are retained as consultants. Both are very talented guys, excellent at marketing, and probably made their money quite nicely. One is in a wheelchair, paralyzed from the waist down. In the early days, both were involved with Whole Earth and the early events at Portobello Road. Whole Earth became Harmony Foods, a large health food wholesaling company.

Color photo of package in *Linda McCartney's Home Cooking*. 1990. p. 18. "Realeat Vege Burger Mix. Herb & Vegetable Style." The package is orange, yellow, and brown. "All natural—All vegetable." A large color illustration shows a burger between buns.

Letter (e-mail) from Greg Sams, originator of the VegeBurger—in response to questions from William Shurtleff. 2007. Feb. 8 and 12. "The initial VegeBurger was launched

as a Whole Earth branded product when I was still running Whole Earth, located in London at NW10. That was in April 1982. The VegeBurger was launched in two flavours: Herb & Vegetable, and Chili. A No Salt variety came out in Aug. 1982. The *Official* name of the company was still Yin Yang Ltd. VegeBurger and I went solo as The Realeat Company in June 1982. Whole Earth was in deep financial trouble and our investors and bankers had no faith in the product which I'd created to help save us. I had faith and was happy to pass the reins over to my brother Craig and to go off and work from home (at 2 Trevelyan Gardens, London, NW10 3JY—where I had been living since Feb. 1980) with my new baby [VegeBurger]. It was our joint rescue plan, and the backers and bankers bought it. It worked for both of us. By early 1983, VegeBurger was a best seller in health food shops throughout the country. The article by Low on the VegeBurger in *The Observer* (London; Feb. 27. p. 4. Sunday) was prompted by my press release, which tied into the launching of the frozen VegeBurger in Feb. 1983. In 1988 The Realeat Company moved from my home to a serviced location at Acorn House in Nearby Acton for six months prior to my sale of the company."

1429. **Product Name:** [Seitan].

**Foreign Name:** Seitan.

**Manufacturer's Name:** Zuaitzo.

**Manufacturer's Address:** Calle Diputacion 5\* Piso, Calle Correria 39 Bajo, 01001 Vitoria-Gasteiz, Spain. Phone: 945/28 86 30.

**Date of Introduction:** 1982 April.

**New Product–Documentation:** Dear clients. 1985. May 1. Letter from Zuaitzo to clients introducing tofu and seitan. Letter from Javier Arocena on letterhead. 1986. Sept. 10. "I've been working in the last four years making tofu, seitan, and tempeh, in a craftsman way, in the north of Spain, in the Basque country."

Letter from Javier Arocena. "I started to work with soy in 1982 on a family scale and in 1984 on an industrial level. I started to sell tofu and seitan in March 1984."

1430. Holt, John. 1982. Re: New developments at The Regular Tofu Co. Letter to William Shurtleff at Soyfoods Center, May 1. 1 p. Handwritten, with signature on letterhead.

• **Summary:** "Having used your book to learn how to make tofu, we now have a small business here making about 700 lb/week of tofu and about 2,500 tofu burgers per week. We give our okara to a pig farmer... We sell the tofu vacuum packaged. As yet we don't have a means of packaging soya milk. It is sold over here in Tetra Briks and is very expensive. We want to expand the business to make larger quantities of tofu (regular and silken if possible) and to sell soymilk more cheaply... At present, our equipment is very similar, I should imagine, to a small Japanese tofu shop. We use nigari.

An accompanying form states that this company started business in Dec. 1981 and now uses 50-100 lb/day of dry soybeans. Address: 75 Chandos St., Leicestershire LE2 1BU, England. Phone: (0533) 549839.

1431. Burros, Marian. 1982. Food notes: How about tofuburgers? *New York Times*. May 5. p. C9.

• **Summary:** "When the students at P.S. [Public School] 128, on West 169th Street in Manhattan [New York], were introduced to tofuburgers last week, some ate them and some didn't; some liked them and some didn't."

"Two years ago the city received permission from the United States Department of Agriculture for a pilot program to serve meatless meals as part of the approved school-lunch program. The first year 17 schools participated; this year there are 40. The meatless meals include peanut butter made with tofu; beans and rice; vegetarian chili, and now, for the first time, tofuburgers.

"But Barbara Friedlander, nutrition education coordinator for the city schools, is returning to the stove. Next time she is going to have the cooks add soy sauce to the tofu mixture 'so it will look brown instead of white,' and she will have them make hamburgers of a mixture of tofu and ground beef." Address: New York.

1432. Sheraton, Mimi. 1982. Restaurants: Rumania to China on the East Side [of Manhattan]. *New York Times*. May 21. p. C20.

• **Summary:** This is a review of the Chinese restaurant Sichuan Pavilion (322 East 44th St., between First and Second Avenues, Manhattan, New York City).

Among the best main courses are: "Crispy shrimp packets—pounded shrimp deep-fried in wrappings of golden, crackling bean curd sheet."

Also tasty were "bean curd slices with ground pork that were properly dosed with chili oil. Perhaps the biggest disappointment on two recent visits was Buddha's duck," formerly tender and aromatic, now fatty, stale and bland.

Note: This "bean curd sheet" is what we call a "pressed tofu sheet."

1433. Wiegand, Peter. 1982. Re: Starting Auenland Tofu in Germany. Letter to William Shurtleff at Soyfoods Center, June 22. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** This letter is written on a colorful letterhead showing a rayed reddish-orange sun setting over a village. "I learned to make tofu in Fairfax, California, at Wildwood Natural Foods, working with Paul Duchesne for about 6 months. In the autumn of last year my family and I returned to Germany and opened a tofu kitchen in the spring of this year [March 1982]. At the beginning we named our kitchen the same as in California (Wildwood Natural Foods), but we soon decided to give it a German name. Tofu is getting a bigger market more and more. Our small kitchen is now

able to produce about 200 kg/day of tofu. Since we started I have met a lot of people who are really interested in tofu and Sojaproducts, and they want information. We are right at the beginning and tofu needs a lot of promotion because it is unknown. The health department gives us a lot of trouble about using nigari, the shelf life, packaging, using another name than tofu, etc.

Follow-up phone talk: Since the beginning we have made tofu burgers, tofu salad, tofu pizza, and Tofu Apfelkuchen (Apple Tart, using tofu instead of quark). There was a big party when the company started. Address: Auenland Tofu & Sojaproducte, Hub 4, D-8210 Prien/Chiemsee, West Germany.

1434. Yamauchi, Shoan. 1982. History of Matsuda-Hinode Tofu Co. (Interview). *SoyaScan Notes*. June 29 and Aug. 11. Conducted by William Shurtleff of Soyfoods Center. Then two follow-up interviews in Oct. 1988.

• **Summary:** The company traces its roots back to Hawaii to the Uyeda/Ueda Tofu Co., which may have started at an earlier date. In 1939 Mr. and Mrs. Shokin Yamauchi, who had 6 (8?) children and very little money (the effects of the Depression were still being felt), bought Uyeda/Ueda Tofu Co. on Aala Street from Mr. and Mrs. Uyeda/Ueda, who had bought it 2-3 years earlier from someone else. It was a very small mom and pop operation. Two friends of the family, one an uncle, helped the Yamauchi family to buy the company. Either shortly before or shortly after the Yamauchi family bought the business, it was renamed Aala Tofu Co. It was never named Shoan Yamauchi Tofu, the name that appears in a 1942 Honolulu City Directory. Mrs. Yamauchi and her two sons, Shoan (the #2 son, who had previously baked cakes in a bakery) and Shojin (the #3 son, who was still in high school), ran the family business successfully. Shoan, who learned how to make tofu from Mr. Ueda, the eldest son did most of the work. He recalls: "I worked like a dog, 15-16 hours a day, 7 days a week, for no pay and with almost no help from machines." Shoan's father did other work in the shipyards. In 1942 Shoan married Shizuko (?), who also lived in Hawaii. She joined him working at the tofu shop.

After World War II, in 1946, on his younger brother's recommendation, Shoan went to Los Angeles. The Japanese were just coming out of the wartime intern camps, many having lost everything. First he talked to the five partners at Matsuda Tofu Co., which had about 5,000 square feet versus 700 square feet for Hinode, but Matsuda didn't want to sell. So 1946, Shoan gave the family tofu shop in Hawaii to his brother, Shojin, and in September 1947 he and his wife moved to the mainland. Before buying a business [?]. The owners of the Hinode Tofu Co. in Los Angeles offered to him their company for \$4,000; it had cost them \$8,000 to set it up. Shoan decided to buy it, even though his wife didn't want to.

A little background on tofu in Los Angeles. The two

early tofu companies were Japanese-run Matsuda and Chinese-run Wing Chong Lung. Both had started in about the 1920s (or perhaps before) in Los Angeles.

Matsuda Tofu Co. was started in about 1920 by a Mr. Matsuda. During World War II the company was closed. Mr. Matsuda and his workers were sent to intern camps. After the war, 5 partners (including Ken Osaki and a Mr. Sasaki), who had very little money, obtained the Matsuda name from Mr. Matsuda and essentially started a new company. They had to move the business to a new location, probably because of zoning problems.

Shortly after the war a new company named Tomoi Tofu Co. was established in Los Angeles at First and San Pedro Streets. But they were bought out by Matsuda in 1946 for \$8,000. Thereafter, having no competition, Matsuda raised prices and there was a furor among consumers. So the former owners of Tomoe (Mr. Tomoe and probably a partner) started Hinode Tofu Co. in March 1947 at 6th St. and Towne Ave. They made 1,500 cakes of tofu a day.

Then the owner of Tomoe Tofu Co. got sick. Shoan Yamauchi's younger brother, Shojin ("Jin"), had visited Hinode in May 1946, then returned to Hawaii and told Shoan to go to Los Angeles, as described above.

In November 1947 Shoan and Shizuko began to run Hinode Tofu Co. at 6th St. and Towne Ave. They made only three products: Japanese-style soft and Chinese-style firm tofu, plus agé (deep-fried tofu pouches). The early years were tough; it was a small company with no reputation, and almost no machinery or capitalization. The tofu wholesaled for \$0.20/lb and was sold only in bulk. Again the work was hard and the hours long. In 1952-53 he moved the business to 4th St. and Towne Ave., where he bought his own building. Most of Mr. Yamauchi's customers were Chinese and Japanese, with very few Caucasians. Hinode Tofu Co. grew steadily, and in 1956 Mr. Yamauchi bought out his competitor, Matsuda Tofu Co., the only other Japanese tofu maker in the area. The new company, named Matsuda-Hinode Tofu Mfg. Co. was now the biggest on the mainland United States. In 1964 (1962) the company established three milestones: (1) It became the first company on the West Coast (and perhaps in the world) to package tofu; (2) It became the first U.S. company to get tofu into a supermarket chain (Boy's Market in Los Angeles); and (3) It became the first U.S. company to make natto.

In 1969 the company built and moved into its present location at 526 S. Stanford Ave. That same year the company introduced several new tofu products that Yamauchi had learned to make in Hawaii, which were not yet widely made on the mainland: Kinugoshi (silken) tofu, nama agé (deep-fried tofu cutlets), and yaki-dofu (grilled tofu).

In about 1976 he added ganmodoki (deep-fried tofu burgers). In 1978 the company expanded into a million-dollar automated factory, which made the first pasteurized tofu in the western world. In 1981 the company's name was

shortened to the original name, Hinode Tofu Co. That year tofu production was 81,000 pounds a week, rising to an estimated 140,000 lb/week in 1982—27% more than the next largest tofu manufacturer in the western world, Azumaya.

Mr. and Mrs. Yamauchi have three children, all adopted. John Yamauchi, the second oldest, is very involved with the tofu business. Rodney does sprouts. Address: 526 S. Stanford Ave., Los Angeles, California.

1435. Cohen, Michael. 1982. New developments at The Tempeh Works (Interview). *SoyaScan Notes*. June 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** His weekly tempeh production peaked at 6,800 lb in Sept. 1981; it stayed at this level for 3 weeks. Then in early 1982 five competitors appeared in his market area; his production dropped by 35%. He was also slow to introduce variety tempehs and second generation tempeh products. In May 1982 he introduced 3 grain and soy tempeh, and in July tempeh burgers—with more new products planned for this summer. Now sales are rebounding, having reached 4,000 to 4,500 lb/week during June 1982. In the winter of 1981-82 he expanded his incubation space by adding 650 square feet with trailers. Address: Greenfield, Massachusetts.

1436. **Product Name:** Tempeh Brothers Tempehburger. Renamed Tempeh Brothers Tempeh Burgers by early 1983.

**Manufacturer's Name:** Appropriate Foods, Inc.

**Manufacturer's Address:** 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

**Date of Introduction:** 1982 June.

**Ingredients:** Organic soy tempeh, shoyu, herbs & spices.

**Wt/Vol., Packaging, Price:** 7 oz.

**How Stored:** Refrigerated or frozen.

**New Product—Documentation:** Label. 1982. June 15. 3 inch diameter. Yellow, red, blue and white. Spot showing label in Soyfoods. Winter. 1983. p. 50. "The Tempeh Burger Takeover. Nationwide at least 7 brands of prepared tempeh burgers are produced." The label reads "tempeh burgers." Also in Soyfoods. 1984. Summer. p. 43. Interview with Robert Werz. 1987. Sept. 9.

1437. **Product Name:** A. Vogel's Soja Mix (Burger, Bolognese, Curry), and Soja Italian Dinners (Cannelloni, Lasagne, Ravioli).

**Manufacturer's Name:** Bioforce of America Ltd. (Importer). Made in Roggwil, Switzerland by Bioforce AG.

**Manufacturer's Address:** 21 West Mall, Plainview, NY 11803. Phone: 516-420-1600.

**Date of Introduction:** 1982 June.

**New Product—Documentation:** Ad in Whole Foods. 1982. June. p. 45, and 1983. Jan. p. 39. "A Vogel's Meat-free soy mixes and soy dinners: Simple and quick to prepare, fewer calories, nothing artificial." A black-and-white photo shows six packages. The soja mixes are available in Burger,

Bolognese, and Curry flavors. The soja Italian dinners come in Lasagne, Ravioli, and Cannelloni flavors.

Letter and color 8½ by 11 inch ad sent by manufacturer in response to enquiry. These 2 new lines of products are made by Bioforce AG, 9325 Roggwil TG, Switzerland. Bioforce of America Ltd. has the exclusive distribution rights in the U.S. and Caribbean.

1438. Howe, J.M.; Hoff, J.E. 1982. Plant diversity to support humans in a CELSS ground-based demonstrator. Moffett Field, California: National Aeronautics and Space Administration (NASA). 51 p. June. 28 cm. Report No. NASA CR-166357. [49 ref]

• **Summary:** Prepared under NASA Grant NSG-2401. CELSS stands for "controlled ecological life support systems." Contents: Introduction. Human nutritional requirements in CELSS-GD: Nutrient composition of total plant [vegan] diets (energy, protein, vitamins, minerals), interaction of dietary components, stress. Bioavailability studies of minerals: Rationale (calcium, iron, zinc), experimental procedure (planning of diet, experimental animals), results, experiment IV. Summary. Bibliography of CELSS reports.

Appendix A is a 14-day total vegetarian [vegan] cycle menu. Soy products appear as follows (B = Breakfast, L = Lunch, D = Dinner): Day 1—Sandwich of soy pate (L), soy milk (L&D, 1 cup each). Day 2—Tofu (L, ¼ cup), soy milk (L). Day 3—Soy milk (D). Day 4—Soy milk (B&L). Day 5—Soy milk (B&L), soy burgers (L, 2). Days 6 and 7 = none. Day 8—Soybeans (D, 1 cup). Day 9—Soy milk (B&D), soy bean and winter squash (L, ½ cup each), soy sauce with cooked veggies & brown rice. Day 10—Soy milk (B). Day 11—Soy milk (L). Day 12—Soy meat analogue (D, 3 oz). Address: 1. Dep. of Food and Nutrition; 2. Dep. of Horticulture. Both: Purdue Univ., West Lafayette, Indiana 47907.

1439. Lotus Cafe (The). 1982. Menu. Rochester, New York. June.

• **Summary:** This original menu, dated June 1982 and typed on beige paper, is divided into: Soups. Salads (incl. Hummus, Devilled tofu, Tempeh salad). Sandwiches (all with the Lotus Cafe's original tofu mayonnaise): Tofuburger, Tempehburger, Not dog, Tempeh Reuben, Pita sandwiches in Syrian pocket bread (incl. Tofulafel, Temptation). Entrees: Incl. Tofu spinach pie, Tofu ravioli, Tofu and sauce with brown rice and marinated tofu. Side dishes. Beverages: Incl. Shakes with fresh soymilk (Banilla, Carobanana, Banana

colada), freshly made juices, sparklings, glass of soymilk or carob soymilk. Desserts: Incl. Almond cream cheese tart, Maple walnut pudding, carob brownie, ice cream (Ice Bean).

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Tempehburger” (or “Tempehburgers”). Address: 686 Monroe Ave., Rochester, New York 14607.

1440. Shurtleff, William; Aoyagi, Akiko. 1982. Soyfoods industry: directory and databook. 2nd ed. Lafayette, California: Soyfoods Center. 56 p. June. 28 cm. [24 ref]

• **Summary:** A detailed study of the rapidly emerging soyfoods industry and market. Contains original statistics compiled by the Soyfoods Center through interviews with companies. Contents: 1. Terminology: The many types of soyfoods. I. Traditional low-technology soyfoods. 1A– Nonfermented soyfoods: Fresh green soybeans, whole dry soybeans, soynuts and soynut butter, soy sprouts, whole soy flour & grits, roasted soy flour [kinako] & soy coffee, soymilk and dairylike soymilk products, tofu (eight types), okara or soy pulp, yuba.

1B–Fermented soyfoods: Tempeh, miso, soy sauce, shoyu & tamari, natto & thua-nao, fermented tofu & soymilk, soy nuggets [fermented black soybeans] (Hamanatto & tou-ch’ih).

II. Modern soy protein foods: Defatted soy flour, grits & flakes, soy protein concentrates, textured soy protein products, soy protein isolates.

III. Soy oil products: Soy salad oil & cooking oil, soy oil margarine & shortening, soy lecithin.

2. Soyfoods industry directory: Names and addresses of over 850 soyfoods manufacturers in the Western world, plus major soymilk, miso, shoyu, and yuba manufacturers in East Asia. 3. Analysis of the soyfoods industry in the U.S.

4. Trends in U.S. and world soybean production: Graph of world soybean production (1922-1979) including graphs for the world total, USA, Asia total, and Latin America. Graph of U.S. soybean production, yields, and exports (1924-1979).

5. Analysis of the tofu industry in the West: The U.S. tofu market: overview and outlook. Graph of the number of tofu (and tempeh) manufacturers in the West from 1975 to 1982. Four-year analysis of the tofu industry in the West. Listing of North America’s largest tofu manufacturers and their weekly tofu output. Japan’s largest tofu manufacturers and their daily output. Favorite tofu, soymilk, and tempeh recipes as served at U.S. soyfoods, delis, cafes, and restaurants, or marketed as ready-to-serve products. Books on tofu published in America.

6. Analysis of the tempeh industry in the West: Graph of number of tempeh manufacturers. Recipes. Listing of North America’s largest tempeh manufacturers and their weekly output.

7. Analysis of the worldwide soymilk industry: Analysis

of the soymilk industry in the United States. Analysis of the soymilk industry in Japan. Major Japanese soymilk companies and their products.

8. Analysis of the soy sauce / shoyu and miso industries worldwide. Statistics on fermented soyfoods in East Asia. The soy sauce market in the United States (1981). U.S. imports of soy sauce. Graph (1947-1981. Source: U.S. General Imports, Schedule A. Commodity by Country. U.S. Dept. of Commerce, Bureau of Census). U.S. imports of soy sauce. Table (1947-1981. Source: U.S. General Imports, etc. See above). The shoyu / soy sauce market in Japan. Graph. (1886-1980. Includes: Number of manufacturers. Per capita consumption. Shoyu production. Kikkoman’s market share (%)). The miso market in Japan. Graph. (1930-1980. Includes: Per capita consumption. Total miso production. Factory production. Number of manufacturers. Home production. Amount of soybeans used). Overview of the miso market in the United States. Miso exports from Japan (1981). Japan’s ten largest miso manufacturers and their output.

9. Other: Analysis of the soynuts industry in the U.S. North America’s larger soyfoods delis, cafes & restaurants. The soybean crushing industry; overview.

10. Soyfoods terminology and standards (Glossary of soyfoods terms): I. Traditional nonfermented soyfoods: Fresh green soybeans, okara, roasted soy flour (soy coffee, soy chocolate), soybeans, soymilk (soymilk ice cream, soymilk soft serve, frozen soymilk yogurt, soymilk mayonnaise, soy shakes, soy nog, soymilk whipped cream), soynuts, soy sprouts, tofu (regular tofu, deep-fried tofu {deep-fried tofu cutlets called nama-age or atsu-age in Japan, deep-fried tofu burgers or burger balls, called ganmodoki or hiryozu in Japan, deep fried tofu pouches (called aburage in Japan; the words “deep-fried” may be dropped from the names after the initial usage, and in recipes or on package labels, if desired}), silken tofu {made without separation of curds and whey, called kinugoshi in Japan; modern types, all made with glucono delta-lactone as coagulant, and all known in Japanese as juten-dofu, are packaged lactone silken tofu, bagged lactone silken tofu (fukuro-dofu), sealed lactone silken tofu (buro-dofu), and Ever-Fresh Lactone Silken Tofu (in Tetra-Pak)}, grilled tofu, frozen and dried-frozen tofu. (Note 1. It is illegal to describe the latter product as “freeze-dried tofu,” since freeze-drying is a completely different process), terms associated with making tofu {fresh soy puree, a coagulant or curdling agent, forming box, filter bag or pressing sack, tofu comes in cakes, not blocks}), whole soy flour, flakes and grits, yuba.

II. Traditional fermented soyfoods: Fermented soymilk products (soymilk yogurt {Soy Yogurt, Soyogurt, Soygurt}, acidophilus soymilk, soymilk kefir, viili, piima, buttermilk {Soy Kefir, etc.}), fermented tofu (wine-fermented tofu, brine-fermented tofu), miso (rice miso, barley miso, soybean miso, Chinese soybean chiang), natto (thua-nao

from Thailand and kinema from Nepal; all are non-salted), fermented black soybeans [fermented black soybeans] (Chinese fermented black soybeans know as shih, tou-ch'ih, tou-shih, or dow-si; savory fermented black soybeans called Hamanatto in Japan, Daitokuji fermented black soybeans called Daitokuji natto in Japan, Philippine fermented black soybeans called tausi or tao-si in the Philippines, Indonesian soy nugget paste called tauco, formerly spelled tao-tjo, Malaysian soy nugget sauce called tao-si), soy sauce (shoyu). The five basic types of Japanese shoyu are: regular shoyu called koikuchi shoyu in Japanese, light-colored shoyu called usukuchi shoyu, tamari shoyu, clear shoyu called shiro shoyu, and rich shoyu called saishikomi shoyu), tempeh, other fermented soyfoods.

Note 2. This is the earliest document seen (Sept. 2012) that uses the word "Soygurt" to refer to soy yogurt.

III. Soy oil and modern soy protein foods: soy oil, defatted soy flour, flakes and grits, soy protein concentrate, soy protein isolate, textured soy protein products (TSP, TVP is a registered trademark of the Archer Daniels Midland Company and cannot be used as a generic name for this product), meat analogs (foods typically made from spun soy protein fibers to resemble meat, fish, or poultry products).

11. Names of soyfoods around the world: Names of 40 products. Brazilian / Portuguese names. British English names. Chinese names (fermented tofu is Toufu-ju or Sufu). French names. German names. Japanese names. Spanish names.

12. Key institutions working with soyfoods in the West: The Soyfoods Center, Soyfoods Association of North America, INTSOY, American Soybean Association, Bean Machines, Inc., Soycrafters Apprenticeship Program, USDA Northern Regional Research Center, Sojaquelle.

About The Soyfoods Center.

Note 3. This is the 2nd market study published by Shurtleff. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1441. **Product Name:** Tempeh (Soya Karawala) [Dried, or Fresh].

**Manufacturer's Name:** Soya Foods Research Centre. Sri Lanka Dept. of Agriculture.

**Manufacturer's Address:** P.O. Box 53, Peradeniya, Sri Lanka.

**Date of Introduction:** 1982 June.

**Ingredients:** Split soya beans, tempeh culture, rice flour (aids culture growth and binding).

**Wt/Vol., Packaging, Price:** Fresh: 300 gm bag retails for Rs. 4/50. Dried: 100 gm bag with label and recipe retails for Rs 4/-.

**Nutrition:** Fresh: 19.5% protein. Dried: 50.6% protein.

**New Product–Documentation:** Label. 1988. 5 by 3.5 inches. Purple on white paper. "Tempeh (Soya Karawala [Karawala means 'dried fish']) (High Protein)." In English

and Sinhala. Form filled out by Jane Gleason. On 23 March 1988 she met with Mr. H.G. Jayatissa, Project Manager, at Plenty Soya Food Centre. Plenty has marketed SFRC (Soya Foods Research Center) products since Oct. 1987. In addition, they are available at the SFRC retail outlet in Gannoruwa, as they have been since each product was introduced. Plenty is currently assisting an entrepreneur, Mr. Ratnayeke of Welligama, near Gampola, in starting production of dried tempeh at his rice mill. On 25 April 1988 Gleason met with Mrs. K.G.S. Ariyaratne, Agriculture Instructor. At the SFRC shop dried tempeh is sold in a 100 gm unlabeled bag for Rs. 3/- and fresh tempeh in a 250 gm bag for the same price.

1442. Tofu Shop (The). 1982. Take-out deli (Menu). 768 18th St., Arcata, CA 95521. 3 panels each side. Each panel: 22 x 9 cm. Undated.

• **Summary:** This 6-panel leaflet and menu is mostly handwritten but partly printed. On the front cover is the logo of a dragon in a circle. "9-6 Monday–Saturday. Hot food served 12-6 daily. In a hurry? Call ahead: 822-7409. Your local soyfoods producer." One panel, titled "Welcome to the tofu shop," states that this is "one of only a handful of traditional-style tofu shops in the Western Hemisphere."

Another titled "Inside our sandwiches" lists the ingredients in each sandwich. Soy-related menu items include: Sandwiches: Tofuburger. Dragonburger. Tofucadoburger. Spinach turnover (with tofu filling). Sesame tofu pocket. Mexican pastry (a mini-burrito filled with spicy tofu). Fuji roll (with rice, [mung] bean sprouts, tofu, and miso). Sushi roll (with nattoh miso filling). Tofu burrito. Salads: Potato-tofu. Tahini-tofu. Desserts. Beverages: Soymilk. Sides: Tamari, olive and lemon. Sesame tofu dressing. Miso onion sauce. Tofu veggie patty. Baked tofu cutlet. Specialty groceries: Tofu, miso, condiments, crackers, recipes, supplies for tofu and miso making. Address: Arcata, California. Phone: 707-822-7409.

1443. Pautz, Jane Abe Cadwell. 1982. Re: Brazilian names for soyfoods. Letters to William Shurtleff at Soyfoods Center, July 15 and Aug. 22. 3 p. Typed.

• **Summary:** Portuguese names for the following foods are given: Green vegetable soybeans, whole dry soybeans, fresh soy puree, soynuts, soynut butter, deep-fried tofu cutlets, tofu burgers, tofu pouches, fermented black soybeans; isolated soy protein, textured soy protein products, textured soy flour.

Jane's book is the first book published in Brazil that is exclusively on soyfoods. Address: Sao Paulo, Brazil.

1444. Sheraton, Mimi. 1982. Restaurants: West Side duck, swinging brasserie. *New York Times*. July 23. p. C18.

• **Summary:** This is a review of the Chinese restaurant Peking Duck West (199 Amsterdam Ave. at 69th St., Manhattan, New York City).

“But greasiness marred such appetizers as... vegetarian duck, which is formed of bean-curd sheets.”

Note: These “bean curd sheets” are what we call “pressed tofu sheets.”

1445. Itona Products Ltd. 1982. Dairy replacement foods (Ad). *Here's Health*. July. p. 94.

• **Summary:** This full-page black-and-white ad also appeared in *The Vegetarian*. 1984. May. p. 2. “These are important and very special health foods. Foods sold under the Granny Ann and Golden Archer brands all have one thing in common—they don’t contain cow’s milk or any other animal ingredient. This is important for a variety of reasons. Many people are allergic to dairy milk whilst others are rightly concerned about the ethical, medical, and social considerations.

“The ‘Milk’ and ‘Milk-Base’ ingredients in Granny Ann and Golden Archer foods are derived from the soya bean. Not from cows.

“These Dairy Replacement Foods also have further, decided advantages. The flavours are quite excellent and the nutritional values are very high. They are exceptionally good foods which you really should try—whatever reason you may have.”

Photos show 11 of the company’s products: Itona TVP (chunks, ham flavor). Itona TVP food mix: Itonaburga (burger style). Itona Tonabana: Sausage Style. Granny Ann Noots. Granny Ann Grannymels: Caramels. Granny Ann Noot Bar (with “Roasted, salted beans. Handy packets”). Granny Ann Beanmilk Chunky Bar (“A thick Beanmilk bar but without the Noots”). Golden Archer Soya Beanmilk (“From soya not cows”). Golden Archer Brown Rice Pudding (“Whole brown rice with Beanmilk and unrefined

sugar”). Golden Archer Custard (“Made entirely from non-animal ingredients”). Golden Archer Beancream (“A wonderfully rich cream made from Beanmilk”). Granny Ann High Fibre Biscuits (“A convenient and tasty way to take your daily fibre. Made with soya fibre—better than bran”).

Note: It is unclear whether this “soya fibre” is okara or soy bran (ground soybean hulls). Since Itona is also selling soymilk, of which okara is a byproduct, okara seems more likely.

“‘Granny Ann,’ ‘Golden Archer’ and ‘Itona’ foods are made by Itona Products Limited, Leyland Mill Lane, Wigan. Send large SASE for leaflet.”

1446. Leviton, Richard. 1982. Multimarket targeting: Where is the soyfoods market? *Soyfoods*. Summer. p. 61-68.

• **Summary:** Discusses Pacific Tempeh, White Wave, Quong Hop Tofu Cutlets Marinara, Burgers, Cannoli. Photos show: Jim Miller and his wife Emily of Quong Hop, with the New Leaf products. Steve Demos at Pat Calhoun in the White Wave booth at the Natural Foods Expo, 1982, Anaheim, California. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1447. **Product Name:** Vegi-Patties (Meatless Burgers).

**Manufacturer’s Name:** Lifestream Natural Foods Ltd.

**Manufacturer’s Address:** Richmond, BC, Canada V6V 1J7.

**Date of Introduction:** 1982 July.

**Ingredients:** Textured soya flour, wheat gluten, safflower oil, whole wheat bread crumbs, tomato paste, dried vegetables, oat flour, pea flour, tamari, sunflower seeds, sesame seeds, nutritional yeast.

**Wt/Vol., Packaging, Price:** Four 3-ounce burgers per box.

**How Stored:** Frozen.

**Nutrition:** Per 3-oz. burger: 230 calories, 15 gm protein, 17 gm carbohydrate, 13 gm fat, 485 mg sodium.

**New Product–Documentation:** Spot in Soyfoods. 1982. Summer. p. 55. “All vegetable meat substitute.” Spot in Adweek East. 1987. April 6. All vegetable meat substitute. Label. 1987 (undated). Box 8.5 by 4.5 by 1 inch. Color illustration of burger on lettuce and tomatoes. “All vegetable meat substitute made with textured soy flour. An exciting new way to cook. Look for recipe ideas on back.” Cheese and Spinach Casserole. Spaghetti Sauce with Vegi-Balls.

1448. **Product Name:** Light Links (Meatless Tofu Hot Dogs with Egg Whites). Renamed Tofu Light Links by 1987.

**Manufacturer’s Name:** Light Foods Inc.

**Manufacturer’s Address:** 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.

**Date of Introduction:** 1982 July.

**Ingredients:** Tofu, soy oil, okara, dried egg white, textured soy protein, salt, barley flour, honey, shoyu, locust bean gum, natural spices.

**Wt/Vol., Packaging, Price:** 16 oz vacuum pack. Ten links per pack.

**How Stored:** Frozen.

**Nutrition:** Per 1.6-oz. link: 105 calories, 6.36 gm protein, 7.04 gm fat, 0.59 mg cholesterol.

**New Product–Documentation:** This pioneering and creative

product was introduced by Robert Davis at the NNFA convention in New Orleans, Louisiana, July 1982. Food Report (Lehmann). 1982. Aug. The product “Has absolutely no meat, no nitrites, no additives, no preservatives, no artificial coloring and no sugar.” Spot in Soyfoods. 1983. Winter. p. 49. “Tofu Dogs. Possibly the most maturely conceived, expertly produced, and appropriately packaged prepared convenience soyfood on the market.”

Label (orange, brown, and yellow on white) reads: “Meatless. A vegetable based product. A food for thought. 99% cholesterol free. Low calories.” Spot in Whole Foods. 1983. Jan. p. 39. “New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage.

Leaflet. 1983. “Light Foods Inc. presents Light Links: A tofu-based hot dog developed for the healthy child in us all.” 1 p. Single sided. 28 cm. Brown ink on beige paper. “This product has absolutely: No meat. No nitrites. No additives. No preservatives. No artificial coloring. No sugar... and are 99% cholesterol free.”

Spot in Soyfoods. 1984. Summer. p. 42. Label. 1988, received. Tofu Light Links. 5.5 inches square. Light and dark purple, beige, and white. Logo of smiling sun in upper left. “A meatless vegetable based product. No cholesterol. Low calories.” Ingredients are now: Tofu, soy oil, water, dried egg white, textured soy protein (made from soy flour), salt, barley flour, honey, tamari (a natural soy sauce), beet juice, spices, natural extractives of paprika, natural spice oils. Now contains only 76 calories and 6.0 gm of fat per 1.2 oz serving.

1449. Mandoe, Bonnie. 1982. Soy power. Part III. Soybeans, soy grits, and TVP. *Bestways*. July. p. 96, 98.

• **Summary:** Discusses and gives recipes for whole soybeans, soyburgers, soy sandwich spread, soynut butter, soy-grit wheat bread, TVP moussaka, and TVP stuffing (for tomatoes, green peppers, or zucchini). “The more I study and use soybeans the more impressed I am with these versatile, high-protein legumes. It’s no exaggeration to say that there are hundreds of ways to use them.”

1450. **Product Name:** California Meatless Chili.

**Manufacturer’s Name:** Meatless Foods, Inc.

**Manufacturer’s Address:** Hollywood, California.

**Date of Introduction:** 1982 July.

**Ingredients:** Red kidney beans, textured vegetable protein [soy flour], onions, tomatoes, herbs, shoyu, honey.

## LIGHT FOODS INC. PRESENTS: LIGHT LINKS

A Tofu based Hot Dog developed for the healthy child in us all.

This product has absolutely,

- No meat
- No nitrites
- No additives
- No preservatives
- No artificial coloring
- No sugar

Light Links are also low in calories and are 99% cholesterol free.

Delicious when broiled, browned, or bar-b-qued.

In Joy!

Consciously crafted by Light Foods Inc.  
6144 Bartmer / St. Louis, MO 63133

**Wt/Vol., Packaging, Price:** 1.5 lb in plastic tub with preprinted film lid.

**How Stored:** Frozen.

**Nutrition:** 8 oz. contains 417 calories and 30% of the protein RDA.

**New Product–Documentation:** Spot in Soyfoods. 1982. Summer. p. 56. “Vegetarian Chili with TVP.”

1451. **Product Name:** Hera Meatless [Hamburgers, Croquettes, Goulash Mix, Chili Mix, Stroganoff Mix, Goulash, Tomato Soup, Vegetable Soup].

**Manufacturer’s Name:** Pharma Food (Distributor). Made in England by Haldane Foods Ltd.

**Manufacturer’s Address:** Netherlands.

**Date of Introduction:** 1982 July.

**New Product–Documentation:** Food Report (Lehmann). 1982. July. The hamburgers and croquettes in 200 gm cartons retail for Hfl. 5.95. The goulash mix, chili, and stroganoff also in 200 gm boxes for Hfl. 2.95. The goulash, tomato and farmers vegetable soup in 125 gm packs, sufficient for making 1 liter of soup, at Hfl. 2.85.

1452. **Product Name:** Vegetarian Tofu Pizza.

**Manufacturer’s Name:** Pizza Naturally.

**Manufacturer’s Address:** Blenheim, New Jersey.

**Date of Introduction:** 1982 July.

**Ingredients:** Stone ground whole wheat flour, tomatoes, SoyDairy tofu, mushrooms, peppers, shoyu, honey, yeast onion, garlic, oregano, basil, pepper.

**Wt/Vol., Packaging, Price:** 9-inch pizza weighing 16 oz. Retail for \$2.39.

**How Stored:** Frozen.

**New Product–Documentation:** Spot in Soyfoods. 1982. Summer. p. 55. “Frozen Tofu Pizza Introduced.”

1453. **Product Name:** The Soy Deli Starter Kit: Tofu Cutlets Marinara, Tofu Eggplant Marinara, Tofu Cacciatore, Tofu Quiche, Tofu Ravioli, Tofu Burgers-in-a-Bun, Tofu Wholly Cannoli.

**Manufacturer’s Name:** Quong Hop & Co.

**Manufacturer’s Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1982 July.

**New Product–Documentation:** 2-page leaflet. 1982. Each of these is a separate commercial soy product. Each label is 4 by 2.75 inches.

1454. **Product Name:** Vegetable Jerky.

**Manufacturer’s Name:** Soy Power Company, Inc. (Marketer-Distributor). Made in Los Angeles by Maple Meadows.

**Manufacturer’s Address:** 2811-A Ocean Park Blvd., Santa Monica, CA 90405.

**Date of Introduction:** 1982 July.

**New Product–Documentation:** Spot in Soyfoods. 1982. Summer. p. 56. “Everyone Needs Soy Power.” They also market tofu, tempeh, soymilk, savory baked tofu, tofu burger, and salads. Talk with Kevin Cross. 1988. Sept. 22. Maple Meadows was the real brand of this product. The manufacturer was in Los Angeles. It was a double extruded product. Al Jacobson also distributed it. The product sold

like crazy, but the man who made it either died or was very sick. They stopped making it. There were so many names associated with the product. It was sort of strange. Howard Pollack of Rainbow Acres in Los Angeles would know the story.

**1455. Product Name:** Mild Italian Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Swan Gardens.

**Manufacturer's Address:** 940 17th St., Miami Beach, FL 33139. Phone: 305-324-8910.

**Date of Introduction:** 1982 July.

**Ingredients:** Soy press cake, whole wheat flour, nutritional yeast, soy oil, soy milk, salt, seasonings, spices.

**Wt/Vol., Packaging, Price:** 8 oz. Retail for \$1.79.

**How Stored:** Refrigerated.

**New Product–Documentation:** Find/SVP. 1981. May. The Tofu Market. Gives Miami Beach address. Spot in Soyfoods. 1982. Summer. p. 55. “Vacuum Packed Soysage.” 250 lb are produced weekly.

Soyfoods. 1983. Summer. p. 43. They make a “spicy Soysage.”

Label. 1985, undated. 3.25 inch diameter. Self adhesive. Blue and red on shiny gold. An illustration shows a swan on lotus. “Ready to eat!” Made by Swan Gardens, Inc. Miami, Florida 33127.

**1456. Product Name:** New England Tempeh Burgers (By 1984 renamed Lightlife Meatless Tempeh Burgers).

**Manufacturer's Name:** Tempeh Works (The).

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302.

**Date of Introduction:** 1982 July.

**Ingredients:** Organic soy tempeh, soy sauce, spices.

**Wt/Vol., Packaging, Price:** 7 oz 2 x 3.5 oz burgers per package.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label. 1983, undated. 3.5 inches square. Brown, yellow and white. Spot in Soyfoods. 1983. Winter. p. 50. “The Tempeh Burger Takeover. Nationwide at least 7 brands of prepared tempeh burgers are produced.” Also 1984. Summer. p. 43. Product list. 1984. “Now you can have a tempeh burger made right here in New England.” Shurtleff & Aoyagi. 1985. History of Tempeh. p. 52.

**1457. Product Name:** Tumaro's Beef-like Soy Strip.

**Manufacturer's Name:** Tumaro's Natural Foods.

**Manufacturer's Address:** Los Angeles, California.

**Date of Introduction:** 1982 July.

**How Stored:** Shelf stable.

**Nutrition:** Per 100 gm.: 395 calories, 34.3 gm protein, 22 gm fat, 1.5 gm fiber, 3.95 gm ash, 175 mg calcium, 775 mg sodium.

**New Product–Documentation:** Leaflet.

1458. Gall, N. 1982. Those who can... don't. *Forbes* 118:122. Aug. 30.

• **Summary:** This is a sidebar to a larger article by the same author in this issue titled “The Brazilian connection.” “In 1959 General Mills began spending around \$3 million a year to turn soybeans into imitation beef, ham, sausage, bacon and other favorites for American kitchens. Ten years and nearly \$30 million later, it plunked down another \$10 million to put a new plant on a green field in Cedar Rapids [Iowa]. Dr. Art Odell, General Mills' top soybean production expert at the time, wistfully recalls his company's project as ‘our chance to make clean, cholesterol-free food.’ The company developed around 30 soya-based products under the Bontrae label: crab meat, beef, ham and chicken in various forms. Sausos (sausage-flavored bits) and Pepros (pepperoni-flavored) were marketed but failed to sell well. Only Bacos (bacon-flavored) have survived. Seventeen years and another \$60 million later, General Mills ended its affair with the Bontrae line. Says General Mills' vice president of marketing Cy Ducharme: ‘The returns just weren't there...’

“Dr. Joe Rakosky, a former research scientist at Central Soya and now a consultant to the American Soybean Association, thinks he knows where soya marketers have been going wrong. ‘It should have been marketed as being a lot *more* expensive than real food, not a little less,’ he says. ‘You can't make a poor people's food and expect to sell it.’ Romeo Kihhl, a plant breeder at the National Soybean Research Center in Brazil, made the same point to *Forbes* somewhat more elegantly. ‘Soya as a protein source has not found its place in the world yet,’ he says, ‘because those who need more protein are poor and cannot afford to pay for it,

while those who can pay for it can afford to eat beef.”

**1459. Product Name:** Tofu Sausage Patties: Seasoned and Baked.

**Manufacturer's Name:** Tofu Shop (The).

**Manufacturer's Address:** 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

**Date of Introduction:** 1982 August.

**Ingredients:** Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Marinated in a sauce of Tamari (a natural soy sauce made with water, soybeans, wholewheat and salt). Unrefined coldpressed Safflower oil, and a blend of eight herbs and spices.

**Wt/Vol., Packaging, Price:** 8 oz. vacuum packed.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. Received 1988. 4 by 2.5 inches. Self adhesive. Metallic red, blue, gold, and white. “Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great for breakfast, in a burger, or in your favorite pizza or spaghetti sauce. Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°.” Matthew Schmit says (March 2009) that the metallic label was first used in 1985.

Two Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1985. Label #1 of 1992. “Tofu Sausage Patties: 4 Seasoned & Baked. 3 inches square. Self adhesive. Black and yellow on red. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead. Ingredients similar to above, but more organic. \* = Grown according to California Natural Foods Act of 1990. “With whole, organic, GMO-free soybeans.” Ready to eat or heat. A Perfect snack fresh from the pack.”

Label #2 of Oct. 2002. No adhesive. Red and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. “Good source of protein. Low in saturated fat. Cholesterol free.”

Talk with Linda Redfield. 2002. Sept. 23. Linda arrived in Arcata in May 1982 and introduced this recipe to The Tofu Shop; as far as she knows, she developed it. It was probably first sold commercially at The Tofu Shop in about Aug. 1982; there was only one flavor.

1460. Marshall, Philip. 1982. Re: The establishment of Cauldron Foods Ltd. Letter to William Shurtleff at Soyfoods Center, Sept. 8. 3 p. Handwritten.

• **Summary:** Cauldron Foods was formed in Nov. 1981 as a partnership between Philip Marshall and Mr. Peter Fagan. They began tofu production in March 1982. They now have a “cauldron shop” type tofu plant presently producing 200 lb. of firm tofu (9.3% protein) 3 to 4 times weekly. “Sales of tofu itself may not have risen very dramatically, but public awareness concerning tofu and related products is growing

steadily. A local television station filmed the process of tofu being made at our plant, to be included in a program on nutrition later this year... We have had more success perhaps with our burger containing tofu and grains, vacuum packed giving it a shelf-life of 3 weeks. Our turnover is rising at a good pace, and we are introducing new products to our range as we improve production methods. We would like to move into sterilized tofu creams and spreads... We would like to keep informed of new developments in the industry in America...” and to establish contact with similar American businesses.

Note: This is the earliest document seen (April 2001) that mentions Cauldron Foods. Address: Chapel Lane, Sunnybank, Fishponds, Bristol 16, England.

1461. Winter, Christine. 1982. News for you: Good ‘n’ healthy. *Chicago Tribune*. Sept. 15. p. E2.

• **Summary:** “Health foods are becoming increasingly popular, and even mainstream foods are taking on a healthy glow...” New Product News is filled with page after page of new health food products including tofu hot dogs (Light Links, from Light Foods) and soy ravioli (New Leaf Soyfoods).

1462. Corn Country Whole Foods, Inc. 1982. Fall-winter 1982: New & improved (Catalog). 132 South Market St., Champaign, IL 61820. iv + 26 p. No index. 28 cm.

• **Summary:** The cover of this natural foods, vegetarian catalog is printed on orange paper with brown ink. Corn Country has increased the number of products it distributes, both those under its own Market Street brand and those made by many other companies. Corn Country trucks deliver throughout the Midwest: Freight is free with a minimum order of \$400. Product categories: Refrigerated products. Bulk foods. Packaged foods. Snacks. Other.

Interesting products: (1) Tofu: Packaged (\$0.82/lb) or bulk (\$80/lb). (2) Market Street bread: Cinnamon raisin and Whole wheat both contain “whole soy flour.” (3) Stoneground flours: Soy flour-full fat (OG = Organically Grown) (\$0.42/lb). Corn Country uses old fashioned granite stone mills to keep the temperature low, which “preserves the nutritional value and flavor of the whole grain... Whole soy flour is milled from soybeans which have been heated first to destroy an enzyme which interferes with protein digestion. It is milder tasting compared to the defatted soy flour typically sold commercially.” (4) Market Street granolas: Of the 7 varieties, 6 contain small amounts of “soy flour.” (5) Beans, peas, and lentils: Soybeans OG (\$0.28/lb). Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans. (6) Market Street meals (vegetarian): Nutburger (incl. soy flour). Soyburger (soy flour is main ingredient). (7) Sea vegetables (9 types). (8) Westbrae miso (6 types). (9) Market Street nut butters: Peanut butter (“coarsely ground to retard oil separation”). Almond butter.

Sesame tahini. (10) Natural oils: Sesame oil. Safflower oil. (11) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Tamari (with dispenser to quarts). (12) Seeds: Alfalfa seeds. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. Pepitas. (13) Market Street snack nuts: Shoyu almonds. Shoyu suns (sunflower), Shoyu cashew pieces. (14) Soy & corn snacks: Soy nuts salted. Soy nuts unsalted. (15) Market street mixes (unsulfured dried fruits, nuts and seeds): Sweet & shoyu mix (ingreds: Raisins, date pieces, dried bananas, shoyu almonds, shoyu cashews, shoyu sunflower seeds). Flatland mix (incl. unsalted “soynuts” {soybeans, vegetable oil}, fancy cashew pieces, and pumpkin seeds). (16) Health and beauty aids: Dr. Bronner soap (14 types). (17) Literature: 25 Talking Foods pads. (18) Traditional medicinal herb teas (27 types). (19) Celestial Seasonings teas (38 types); (20) Packaging supplies and kitchen help: Tofu kit (\$12.56). Address: Champaign, Illinois. Phone: 217-359-8843.

1463. Dimock, Janet. 1982. East meets west in seitan. *Daily Hampshire Gazette (Northampton, Massachusetts)*. Oct. 8.  
 • **Summary:** Winston and Joan Donovan have started a company named Upcountry in a building adjoining their home on Huntingdon Road in Worthington, Massachusetts. There they make seitan, a product introduced to America from Japan, from the gluten in wheat. A description of their process is given. Five pounds of flour yields 4.2 pounds of seitan. Each batch takes about 8 hours to make. On average, they make 400 lb/week of seitan, but sometimes as much as 600 lb. All of the work is done by the Donovans, with help from their son, Michael, age 15. Seitan originated in China as a “travel food,” meant to keep for long periods. “Seitan is a near-cousin to the more familiar ‘wheat meat’ often sold in vegetarian restaurants, shaped as burgers and other cuts of meat. The ‘wheat meat’ is also sold canned or frozen...”

“This is the first commercial seitan enterprise in this area, but it’s been done for a long time regionally, Donovan said. He was introduced to this vegetarian dish while studying at the Kushi Institute, a macrobiotic center in the Boston area. Seitan was used there as a specialty dish for certain occasions such as holidays, mainly because of the food’s long processing time.

“Donovan recalls enjoying barbecued seitan one Fourth of July, an example of American tradition meeting Eastern philosophy...”

“They began commercial production earlier this year and now sell seitan north to Brattleboro, Vermont, and Keene, New Hampshire, west to Pittsfield and through a distributor to a ready market in Philadelphia [Pennsylvania]. They also make delivery runs to Boston every two weeks.

“Locally seitan is sold at the Whole Wheat Trading Company on North Pleasant Street in Amherst and at Cornucopia and The Granery, both on Main Street in Northampton.” Recipes are given for Upcountry Chili and

Seitan Kabobs. A photo shows Winston pouring broth over seitan in plastic trays just before they are sealed.

1464. Leviton, Richard. 1982. The Perriers of soy foods: With large initial capital investments and national marketing plans, these companies are positioned for rapid growth. *In Business*. Sept/Oct. p. 53-56.

• **Summary:** Discusses three soyfoods companies: Legume, Soyfoods Unlimited, and American Miso Co. “While most companies in the industry operate on local or regional levels at best, these three progressive firms uphold nationwide market goals, have tied up large amounts of capital, and nurture vigorous plans to capture the American mainstream market. Legume, located in Caldwell, New Jersey, and run by Gary and Chandri Barat, and Robert Shapiro, “distributes an impressive line of tastefully packaged, prepared convenience soyfoods in 40 states. Legume practically invented the product category, which includes tofu pizza, lasagna, ravioli, egg-plant Parmesan, tofu-vegetable pot pies, muffins, cakes, and tofu cheese-cakes. Currently the company, with weekly sales of \$8,000, contracts out all its food production, thereby allowing its lean staff of three to concentrate on sales and marketing. The Barats expect 1982 sales to top \$1 million with three employees, and \$3 million by 1983 with only five workers.” A good history of Legume begins: “Gary and Chandri Barat first caught wind of the swelling enthusiasm for soy products in July, 1979 at the Second Soycrafters Conference in Amherst, Massachusetts. They gathered over 500 pages of industry documentation and while uncertain of a specific product line, they were convinced that soyfoods, particularly prepared convenience offerings, were to be *the growth* area of the general food industry. Yet in their search for venture capital, holding only their prospectus as bait, they experienced difficulty... ‘Let’s taste the product,’ potential investors demanded.

“The Barats lacked a track record in the food industry,... But today, investment money firmly in hand, Gary reflects: ‘When raising money, make it a learning experience.’ Ask a lot of questions. Find out why people say no, listen carefully, study their answers, then make adjustments to address their concerns. Then ask again. Never take the rejections personally. Developing a business plan is an ongoing venture; it never stops and never ends. In the summer of 1980 the Barats took their fledgling concept to the streets of New York City, where they served their new line of prepared tofu products to a series of street fairs. “They served over 10,00 meals of tempeh chili, tofu chocolate mousse, and tofu cutlets, and studied faces carefully for reactions. Buoyed by the positive response,” they added tofu muffins, then vegetarian quiche to their line. The “R&D Taste Testing” at the street fairs eventually secured them \$50,000 in capital and \$100,00 in loans. They still managed to hang on to 51% ownership in their new company. They did careful market research using the influential SAMI (Standard

Area Marketing Index) data, read reports, and interviewed industry leaders. They began to promote frozen tofu entrees but the profit margins were too slim. Their latest 1982 plan “calls for introducing six or eight boxed, frozen tofu entrees for national distribution.”

Valerie, John and Gary Robertson launched Soyfoods Unlimited in San Leandro, California in Feb. 1981. They focus on making and marketing selling. A big break came when New England Soy Dairy in Massachusetts bid to distribute 2,700 lb/month of their tempeh burgers. Once a week Valerie delivers the cases of frozen tempeh to the San Francisco airport.

John and Jan Belleme started the American Miso Co. in Aug. 1981 in Rutherfordton, North Carolina, after a \$300,000 investment in plant and equipment. They hope to produce 500,000 lb/year of miso. They did an 8-month apprenticeship in Japan with a master misomaker.

Photos (by Richard Leviton) show: (1) Valerie Robertson of Soyfoods Unlimited with a tray of freshly-made tempeh. (2) John, Valerie, and Gary Robertson; the two men are wearing masks. (3) John Belleme of American Miso Co. empties hot, steaming soybeans. Address: Colrain, Massachusetts.

1465. Soyfoods Unlimited. 1982. All the sizzle... None of the steak (Ad). *Vegetarian Times*. Oct.

• **Summary:** See next page. A full-page ad for tempeh burgers. “Mmmm... go ahead, bite into this thick and juicy ‘All American’ Tempeh Burger from Soyfoods Unlimited. It’s a real taste sensation that is wholesome and full of hearty flavor.”

1466. **Product Name:** Tofu, Soymilk, Soysage, Seasoned Tofu, Falafel Made with Okara, Granola with Okara.

**Manufacturer’s Name:** Springfield Community Foods.

**Manufacturer’s Address:** 300 N. Waverly, Springfield, MO 65802. Phone: 417-866-1337.

**Date of Introduction:** 1982 October.

**New Product–Documentation:** Letter from Jim Hawkins. 1982. Oct. 12. Nice letterhead. “Home Town Tempeh is one of several businesses operating under one roof as Springfield Community Foods. The tofu shop in association with Springfield Community Foods makes tofu, soymilk, soysage & seasoned tofu. Other products available at the store include falafel made with okara, granola with okara, tempeh & tofu sandwiches (in pocket bread made by our in-house baker). The deli section is evolving, and other soy products are in the works, including a tofu dressing/dip and tempeh salad.”

Soyfoods Center Computerized Mailing List. 1983. June 20. Muckfoot Farms and Springfield Community Tofu are both listed as tofu manufacturers at 300 N. Waverly, Springfield, Missouri 65802. Phone: 417-866-1337. Owner of Muckfield is Paul Day.

1467. *Sunset (Menlo Park, California)*. 1982. It’s a tofu burger open-faced. 169:180. Oct.

• **Summary:** The recipe, which is accompanied by a photo, was submitted by R.K. of Soquel, California.

1468. Parker, Paula. 1982. San Diego vegetarians celebrate the Soy of Cooking with the unturkey. *Los Angeles Times*. Nov. 25. p. SD\_A1.

• **Summary:** The Prophet International Vegetarian Restaurant, on University Ave. in San Diego is offering a “living Thanksgiving” today, with a choice of three meatless entrees, says owner Marianne (Makeda) Cheatom. One features a “soy turkey,” with cornbread dressing and cranberry relish. Another is built around Wham (a meatless ham made of soy), covered with pineapple glaze and served with raisin sauce. Cheatom (who insists people can’t tell the difference between her soybean turkey and the real thing) wonders why should have to kill to express thankfulness. “Everything’s centered around this dead thing,” she says.

The Thanksgiving favorite of Sandy Katz, a waitress at Kung Food vegetarian restaurant in Hillcrest, is “tofu turkey,” a blend of soybean curd, nuts, vegetables, and breadcrumbs.”

1469. Barber, Linda. 1982. Tofu sampler. Menomonie, Wisconsin: University of Wisconsin-Stout Print Shop. 24 p. Nov. 22 cm. [7 ref]

• **Summary:** A saddle-stitched (stapled) booklet of creative American-style tofu recipes with an orange cover and black lettering. Contents: What is this thing called tofu? Tofu mayonnaise. Deviled tofu salad. Tofu mayo dip. Tofu cheese rolls. Tofu burgers. Chinese steamed buns with tofu. Nail soup (with heart-warming story about the hobo who came for dinner). Tofu pancakes. Tofu quiche. Easy pie crust. Tofu jumbles. Tropical tea bread. Dark mystery cake. Chocolate tofu creme. Tofu ambrosia pudding. Banana cream pudding or pie filling. Tofu cheesecake. Bread crumb crust. Tofu carrot cake. Tofu nog. Tofu peach frozen dessert. One more idea [about a beautiful geisha in Japan who used tofu externally as an aid to beauty]. A sampler of soyfood books [cites 7 books].

E-mail from Linda Barber Pike in reply to questions after she sent booklet to Soyinfo Center. 2012. May 11. “The booklet was developed for a presentation I gave to the Vocational, Technical and Adult Education meeting in Wausau, Wisconsin, November 19th, 1982. The title of my workshop was ‘Creativity with Tofu... The Food of the Future,’

“The first printing was done by the print staff at the University of Wisconsin-Stout, Menomonie, Wisconsin. About 30 booklets were printed. I was a grad student earning a Masters degree in Vocational and Adult Education. I completed the degree in 1983. I used the booklet as a

# All the Sizzle... None of the Steak.

Mmmm...go ahead, bite into this thick and juicy "All American" Tempeh Burger from Soyfoods Unlimited. It's a real taste sensation that is wholesome and full of hearty flavor.

There's no need to worry about fat and cholesterol while you're enjoying this burger. Made from cultured organic soybeans, natural soy sauce and a unique blend of seasonings this new burger alternative is a complete protein containing *no animal products*, *no oil*, and *no cholesterol*. And there are only 120 calories per burger. The Tempeh Burger from Soyfoods Unlimited is *pre-cooked* so it's ready to eat. Add it to casseroles, pizzas, tacos or one of your favorite recipes.

*Enjoy the best of both worlds; meaty flavor, high protein, plenty of B vitamins and lots of sizzle...but none of the steak.*

Available in popular square and round shapes.

Like our other delicious soy products from Soyfoods Unlimited: Soy Tempeh • Soy and Five Grain Tempeh • Soy and Rice Tempeh • Available in the refrigerator or freezer case wherever you buy natural foods.

## The Tempeh Burger from Soyfoods Unlimited

Soyfoods Unlimited, Inc., 14670 Doolittle Dr., San Leandro CA 94577

take home for the participants. There were about 30 home economics teachers there.

The second printing was done about 16 years later; I was married and a teacher. I used it for my students who were enrolled in the foreign foods class, Family Consumer Science Department, Carmel High School, Carmel, Indiana, 1998. The reason the pages are out of order in this booklet, second printing (1998) is that the student print shop at Carmel High School messed up... I had about 35 students enrolled in this class. About 40 booklets were printed in second printing. This booklet is very typical of what we used to make for our students for classroom use and hopefully, the participants in both situations would take the booklet home and use the recipes! Address: Menomonie, Wisconsin.

1470. Cohen, Michele. 1982. Local bean makes good: A look at Wildwood Natural Foods. *T&T Natural News (San Rafael, California)*. Oct/Nov.

• **Summary:** When the author visited Wildwood, “Marin’s local tofu-making factory in Fairfax, she was given a guided tour by Paul Orbuch, one of the company’s four owners. The place was “a flurry of impressively organized activity in an area of less than 1,000 square feet. Paul explained that each morning at 5 A.M. 8 workers arrive and begin the day’s preparation of sandwiches, which have become standard favorites of many. The selection includes a brown rice and tofu sandwich, Tofunofish, Avotofu, Tofu-Steak and a Supreme-Bean Tempeh Burger. The Deli line offers hummus, potato salad, tofu-dill salad, tobouli [sic, tabouli, tabbouleh] and tofu-vegetable salad.”

“Bill Bramblett, another partner who popped into the office added that the clear structure, right personnel and smooth system are what keep those soybeans cooking.”

The author then describes how “20 pounds of organic Midwestern soybeans are alchemically transformed into 40 pounds of tender tofu... The capacity of Wildwood’s facilities allows them to manufacture a maximum of 330-340 pounds of tofu per day.”

Photos show: Eleven Wildwood employees, around a table with their products. Tom Meyer stirring tofu curds in a large stainless steel barrel. Soybeans soaking and a press.

Note: *T&T Natural News* is published by a two-chain food store in San Rafael, California. The T&T stands for Throckmorton and Thunderstrand.

1471. **Product Name:** [Soy-Based Cream Spreads (Herb, Olive, Mushroom), Steaklets, Pasta Chuta, Sausages, Gulasch].

**Manufacturer’s Name:** Husen (H.J.).

**Manufacturer’s Address:** West Germany.

**Date of Introduction:** 1982 November.

**New Product–Documentation:** Food Report (Lehmann). 1982. Nov. The cream spreads are in 200 gm packs priced between DM 3.90 and DM 4.40. The four ready meals are in

500 gm packs at prices up to DM 6.50. They may be canned.

1472. *SoyaScan Notes*. 1982. Chronology of soybeans, soyfoods and natural foods in the United States 1982 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. White Wave in Colorado is the first company to get its tofu placed in the yogurt / dairy case in supermarkets.

Jan. Legume, Inc. launches Tofu Lasagna, frozen in a box. It is soon followed by Tofu Ravioli.

Jan. *The Incredible Tofu Cookbook, California Style*, by Immegart and Dansby self published.

Jan. New England Soy Dairy launches “Year of the Dog” Chinese New Year tofu promotion and nets 47% immediate sales increase.

Jan. Island Spring survives industry’s first publicized tofu recall and the discovery of new tofu spoilage microorganism, *Yersinia enterocolitica*.

Jan. ADM becomes sponsor of “This Week with David Brinkley” on Sunday ABC TV, with 4.4 million viewers.

Jan. Soyfoods Unlimited in California introduces tempeh burgers and ships them air freight to East Coast markets; Pacific Tempeh in California follows suit.

Feb. Yuba is first produced and sold commercially in the Western world by Ken Lee of Soyfoods of America, in Duarte, southern California. Trial production had begun in Nov. 1981.

Feb. *Soyfoods* magazine No. 6 (yellow cover) published.

Feb. Many large ads run by San-J (tamari), New England Soy Dairy, and Legume in major national trade journals.

Feb. Unicorn Restaurant in Miami has \$15,000 gourmet, soy / natural foods banquet to welcome chef Ron Pikarski, who makes elegant tofu dishes and carves a swan from soy butter.

Feb. Nasoya buys \$50,000 Kutter vacuum-packaging machine, which helps to popularize this packaging style for tofu.

March. *Tofu Fantasies*, by Juel Andersen published by Creative Arts.

March. USDA issues new school lunch regulations, fails to approve tofu for use.

March. Inaccurate, damaging article on iron binding by soy proteins appears in San Francisco Chronicle and Los Angeles Times.

March. Fifteen soyfoods companies exhibit at Natural Foods Expo, Anaheim, CA. Richard Leviton gives key speech. 5,000 visitors see expo. Pacific Tempeh unveils new full-color tempeh burger poster.

March. Big increase in European soyfoods companies; there are now 11.

March. Name of *The Beanfield* newsletter changed to *Soyfoods Monthly*.

March. Great Eastern Sun trading company founded in North Carolina by Barry Evans.

April. At New York's International Food Show, Quong Hop, Yeo's, and President brand soymilks, and Veda's Bayou Delights (tofu / tempeh pot pies) exhibit. ADM serves soy isolate ice cream and soymilk.

April. Quong Hop unveils its new Soy Deli marketing concept for retail using posters and tofu entrees sold frozen.

April. Jack's Beanstalk in Utah does creative work at introducing tofu to institutions. Develops 30 bulk recipe cards scaled to 100 servings.

April. ADM unveils work with glucono delta-lactone (GDL) and soy isolates in making tofu.

April. *Toyo Shimpo*, Japan's tofu newspaper, gives extensive coverage to upcoming Soyfoods Come West conference in Seattle.

May. Island Spring releases two 5-minute color video tapes demonstrating tofu cooking for showing in supermarkets.

May. Public schools in Hawaii are granted permission to use tofu in meals.

May. *Soyfoods Directory and Databook*, by Shurtleff and Aoyagi published by Soyfoods Center, the first book of its type listing all soyfoods companies and industry and market statistics, 21 pages. Second edition published in June as *Soyfoods Industry: Directory and Databook*, 52 p.

May. William Shurtleff and Mark Fruin receive a grant from Kikkoman to write a book on soy sauce.

May. *Cook with Tofu*, by Christina Clarke is 2nd runner-up in R.T. French's Tastemaker awards for cookbooks.

May. Clearway Tofu sponsors the first Mother's Day Tofu Fair in Santa Cruz, California, with tofu recipe competition, music, and prizes.

June. Vitasoy USA runs color display ads for soymilk on San Francisco buses.

June. Kibun of Japan exhibits four flavors of soymilk in Tetra Pak cartons at National Restaurant Show in Chicago.

June 16. *The New York Times* runs an article on Dieter Hannig, Director of Food Research for Hilton Hotels. His many tofu recipes on microfiche are sent to 86 Hiltons worldwide.

June. Bestways magazine begins 3-part series on soyfoods by Bonnie Mandoe.

June. *The Soy Dairy: A Way to Save the Small Farm*, by MacCormack published by Sunbow Farm.

June. *The Book of Nigari Technique* (in English) published by Yoshikawa Kagaku in Japan.

June. Metta Tofu Products in Denman Island, B.C., Canada, introduces Frozen Buddha soymilk ice cream.

June. Haarmann & Reimer debuts flavors for tofu and okara at IFT convention in Las Vegas.

June. Royal American Foods is launched in Kansas City with \$1 million startup capital to sell TVP entrees, tofu-like products via multi-level marketing system.

June. Granny Goose Potato Chips does extensive radio advertising in California for a new potato chip. Ad makes frequent, positive reference to tofu. First national radio ads mentioning tofu.

June. Farm Foods presents Ice Bean at American Booksellers Convention at Anaheim, California, along with previews of their new tofu cookbook.

July. "Discover Tofu" published by *Cosmopolitan* magazine.

July. Farm Foods receives a U.S. trademark for "Ice Bean" as a soy ice cream.

July. Light Foods excites NNFA convention in New Orleans with debut of Light Links, the world's first tofu hot dogs.

July. Eden's Orchard tofu / soymilk ice cream introduced in New York by Heller Enterprises.

July. Richard Jennings announces a new formula for okara / barley tempeh; later purchases Southwest Soyfoods, relocates company in Santa Fe, New Mexico. Continued.

1473. *SoyaScan Notes*. 1982. Chronology of soybeans, soyfoods and natural foods in the United States 1982 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. July. Turtle Island releases liquid tempeh starter to industry.

July. *Soyfoods* magazine No. 7 published by Richard Leviton, with 4-color cover (brown border) and glossy paper.

July. Bean Machines introduces its new Continuous Pressurized Slurry Cooker. July. *Tofu: Einladung ins Schlaraffenland* (Tofu: Introduction to the Land of Milk and Honey), by Walter Daenzer published by Verlag Bewusstes Dasein in Zurich, Switzerland (in German). Europe's third tofu book.

July. *Using Tofu, Tempeh & Other Soyfoods in Restaurants, Delis & Cafeterias*, by Shurtleff and Aoyagi published by The Soyfoods Center.

July. Soyfoods Come West, the Fifth Annual Soyfoods Convention and Expo, in Seattle draws 250 people from 12 nations and makes a profit. Plans are made for a new tofu trade group to represent the larger manufacturers. Gary Barat of Legume and Steve Snyder lead this effort to break away from SANA.

July. *Diet for a Small Planet*, by Frances Moore Lappe, a completely revised edition, published by Ballantine Books. Over 2 million copies of the book have been sold since 1971. The new edition contains many new soyfoods recipes, including 8 tofu and tempeh recipes submitted by Shurtleff and Aoyagi as part of a recipe contest.

Aug. The BBC of London, England, runs a 30-minute program on the U.S. tofu industry and market.

Aug. "Why Are Soyfoods Catching On?" by Judy Brown published in *Whole Life Times*.

Aug. Soy Protein Council in Washington, D.C. releases

filmstrip on soy proteins.

Aug. *Tofu, Tempeh, Miso & Other Soyfoods*, by Richard Leviton published by Keats. 32 p., 15,000 copies printed.

Aug. Mexico announces that it can no longer meet its foreign debt repayment obligations. The first major debtor nation to do so.

Sept. New England Soy Dairy launches herb and spice preflavored tofu in colorful boxes. This is an important innovation in tofu packaging.

Sept. Miyako / Cold Mountain Miso in Los Angeles moves into new plant, has \$15,000 reopening party.

Sept. Dr. C.W. Hesseltine, at USDA Northern Regional Research Lab., receives \$50,000 research grant to study shelf life of tofu, tempeh, miso.

Sept. *Soyfoods Labels, Posters, and Other Graphics*, compiled and edited by Shurtleff and Aoyagi, published by Soyfoods Center. 185 p.

Sept. Soyfoods Unlimited runs full-page color ads for tempeh burgers in national magazines: *Vegetarian Times* and *New Age*.

Sept. Richard Leviton plans to move to Ann Arbor. Steve Fiering offers to recapitalize Soyfoods magazine and buy typesetting equipment. Plan dropped by Fiering in October.

Oct. Legume Inc. has its first of many public stock offerings; raises \$100,000 from sale of stock plus \$100,000 from a loan. Legume thus becomes the first of the new wave of soyfoods companies to be publicly owned. In Nov. 1983 Legume raised \$600,000 more, two-thirds from sale of stock and one-third from debt.

Oct. Richard Leviton does "Soyfoods in the Heartland" nationwide tour with 13 programs, 11,000 miles. Net loss of \$300 but lots of fun.

Oct. *Tofu Cookery*, by Louise Hagler published by The Farm's Book Publishing Co.

Oct. *Tofu Cookery* by Fusako Holthaus published by Kodansha, New York. Japan's first tofu book aimed at the American market. Both this and the Farm's tofu book are America's first tofu books with color plates.

Oct. Beatrice Wittels' CSC sponsors World Food Day in Philadelphia, with speech by Richard Leviton and soyfoods banquet. 200 people, including a Pennsylvania senator, attend.

Oct. South River Farm Miso Co. opens in Massachusetts as the nation's second Caucasian-run miso manufacturer. It was formerly Ohio Miso Co.

Oct. "The Hilton Hotel's Gourmet Tofu Dishes" by Clare Barrett published by *Vegetarian Times*. Dishes made from Dieter Hannig's tofu recipes are shown in full color.

Nov. Unicorn Restaurant in Miami prepares three tofu turkeys for Thanksgiving Day.

Nov. Restaurant Business magazine praises Legume products as "tasty, superb."

Nov. Whole Life Expo held in New York. Farm Foods

gives speech on soyfoods.

Nov. "Mainstreaming Soyfoods" by Richard Leviton published by *Vegetarian Times*.

Nov. Campbell Soup makes offer to buy Legume stock. Quaker Oats is reported to make tender to buy any of America's largest tofu makers. But nothing happens.

Nov. Pacific Tempeh introduces nitrogen-flush vacuum packaging for tempeh.

Nov. Well Bean Soy Deli in Santa Cruz changes its image to "Fast Natural Foods" after soy deli sales sag.

Nov. *East West Journal* publishes article on The Bridge tofu company in Connecticut.

Nov. Lane County Natural Foods Assoc. sponsors large, Natural Horizons Expo in Eugene, Oregon. Richard Leviton gives speech. Surata Soyfoods and Devi's Country Soy Sausages have exhibits.

Nov. *Quick & Easy Tofu Cookbook*, by Yukiko Moriyama published by Joie in Japan. Aimed at American market; over 400 full-color photos but poor English translation.

Nov. *La Magie du Tofu* (The Magic of Tofu), by Tremblay and Boyte published by Stanke in Montreal. Canada's first original tofu cookbook. It becomes a best-seller.

Nov. *Le Plaisir de la Cuisine au Tofu* by Marie Poirier published by Unisoya in Quebec, Canada.

Nov. *Cooking with Tempeh*, by Claire Seguin published by Higher Ground Press. America's second tempeh cookbook.

Dec. Robert Davis of Light Foods helps establish a soup kitchen in St. Louis; will provide okara and tofu scraps free of charge to the city's indigent.

Dec. Nasoya restyles their tofu dips as "Vegi-Dips" in new containers.

Dec. Soyfoods of America runs \$2,800 large display ad in Los Angeles Times (circ. 1 million) with tofu recipes.

Dec. *Washington Post*, in the Style section, says frozen yogurt is "Out" and frozen tofu desserts are "In."

Dec. Swan Gardens, Miami, after 3 years of R&D, announces informally that it has three flavors of "meltable" cheeselike tofu. It is introduced as Soya Kaas in Feb. 1986.

Dec. *Le Tofu dans le Cuisine Macrobiotique*, by Eddie H. Hara published in France by Editions de la Maisnie.

Dec. Since 1974, 25 books on tofu have been published in the U.S. In 1981 and 1982 publication of books on tofu in North America and Europe reaches its peak, with 12 published each year.

Dec. There are seven brands of tempeh burgers on the market; four brands of frozen tofu ravioli; 8 brands of soy ice creams.

1474. **Product Name:** Soyettes (Meatless Okara Patties / Burgers). Renamed Veggie Burger in Feb. 1992.

**Manufacturer's Name:** Soy City Foods.

**Manufacturer's Address:** 2847 Dundas St. West, Toronto, ONT, M6P 1Y6, Canada. Phone: 416-762-1257.

**Date of Introduction:** 1982 December.

**Ingredients:** Soybean pulp [okara], durum flour, cornmeal, water, vegetable oil, onion flakes, vegetable flakes, lecithin, sunflower seeds, herbs, spices, sea salt.

**Wt/Vol., Packaging, Price:** Four 64.2 gm patties in a bright red box with a color photograph.

**How Stored:** Frozen.

**New Product–Documentation:** See next page. Spot in Soyfoods. 1983. Winter. p. 48. "Give Okara a Pat."

Interview with Jon Cloud. 1985. Aug. Label sent by Jon Cloud. 1989. May 5. Product was introduced in 1982.

Talk with Lorraine Guardino of Soy City Foods. 1992. Feb. 18. The Soyettes are now called the Veggie Burger. The ingredients are different; it has no cholesterol and is low in fat. The packages will be ready in about 3 weeks, and should be available at retail stores within 1 month. The product is now sold only to the food service industry; it first became available in early Feb. 1992 [sic, 1983 or 1982].

1475. **Product Name:** Tofu.

**Manufacturer's Name:** Bean Machine.

**Manufacturer's Address:** 45 Maes Inqli, Newport, Pembrokeshire Coast National Park, Wales, UK. Phone: 820-896.

**Date of Introduction:** 1982.

**New Product–Documentation:** Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Zorah Groom. Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 29. Bean Machine is a 12-member co-op in Wales using someone's kitchen. Their best-seller is soysage. Cauldron Foods in Bristol invited them to move to Bristol and consolidate. Jon and Zorah Groom. 1985. La Lettre de L'ARTS. No. 3. p. 8. "Bean Machine story."

Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story" The tofu is made largely by hand at the rate of 60 lb every 2 hours. The soymilk is curded with calcium sulfate. The company presently makes a range of three flavors of tofu, plain, chives, and garlic. The tofu is put into round presses and cut into two sizes, 227 gm and 454 gm, then vacuum packed in bags.

Letter from Simon Bailey. 1988. Oct. 10. Ceased trading.

1476. **Product Name:** Soysage [Regular, Tomato, or Spicy].

**Manufacturer's Name:** Bean Machine.

**Manufacturer's Address:** 45 Maes Inqli, Newport, Pembrokeshire Coast National Park, Wales, UK. Phone: 820-896.

**Date of Introduction:** 1982.

**Ingredients:** Incl. okara, tofu, spices, and flavors.

**Wt/Vol., Packaging, Price:** 213 gm or 426 gm sausage

shaped casing.

**How Stored:** Refrigerated.

**New Product–Documentation:** Soyfoods Center Computerized Mailing List. 1983. June 20. Owner: Zorah Groom.

Jon and Zorah Groom. 1985. La Lettre de L'ARTS. No. 3. p. 8. "Bean Machine story."

Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story." Soysage is made with okara, a by-product of tofu. Flavors and spices are added. Tofu is also a main ingredient. They now make a range of 3 flavors: regular, tomato (with added tomato puree), and spices (with added spices and chili). They are sold in 213 gm and 426 gm packages. The packages are sausage shaped.

Letter from Simon Bailey. 1988. Oct. 10. Ceased trading.

**Date of Introduction:** 1982.

**New Product–Documentation:** Letters from Norbert Brunthaler of Sojvita. 1988. Jan. 4 and Feb. 2. Price List. 1988. With dates products were introduced. Tofu. 250 gm and 1000 gm. Grilled tofu, 200 gm, is basted in soy sauce and ready to grill. Jausen Tofu, 170 gm, is marinated and pre-baked for use with bread, soups, or salads. The croquettes, 200 gm, provide bulk. A letter from I.A. Gertraud, managing director, notes that Walter Schoen is the owner. In 1987 the company name was changed to Schoen Tofurei. They have created a video about tofu. Envelope reads: Tofurei. Producer of plant foods. Reformfrischdienst.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990.

May 28. He says this is the third largest tofu maker in Austria, after Sojarei Ebner-Prosl and SoyVita.

1502. Unicorn Village Restaurant. 1982. Menu. North Miami Beach, Florida. 1 p.

• **Summary:** The five “Sensational Sandwiches” include Tofu Reuben Sandwich. The nine Lunch Specialties include: Sweet & sour tofu stir-fry. Unicorn burgers (with tofu). Tofu vegetable tempura. Address: North Miami Beach, Florida.

1503. Well Bean Deli (The). 1982. Menu. Santa Cruz, California. 1 p.

• **Summary:** Hot sandwiches: Tofu burger. Tofu Santa Cruz. Tempeh burger. TLT. Falafel burger. Mochi burrito. Bean taco.

Cold sandwiches: Missing egg sandwich. Tempeh salad sandwich. Sushi rolls.

Soups with Ak Mak crackers: Miso. Cream of mushroom (changed daily).

Spreads: Tossed. Tofu salad. Tempeh salad. Salad of the day.

Special entree: Tofu quiche. Tofu eggplant Parmesan (changed daily).

From the deli: Tempeh salad. Missing egg salad. Tempeh chips. Garlic onion dip. Tahini dip. Burger mix. Soy yogurt. Fresh fruit salad.

Desserts: Carob mint pie. Tofu cheesecake. Fresh fruit salad.

Drinks: Carobanana shake. Shake-a-leg hi protein drink. Strawbanana shake. Soymilk–plain, carob. Herb teas (assorted). Fruit smoothie–apple plus choice of orange plus two fruits.

Note: This deli was previously located at 349 Soquel Avenue, Santa Cruz. Address: 594 Redwood Dr., Santa Cruz, California 95060. Phone: (408) 427-2586.

1504. **Product Name:** Tuno (Vegetarian Tuna).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. of Miles Laboratories, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1982.

**Ingredients:** Textured soy concentrate, soybean and/or corn oil, flavorings (artificial flavors, disodium guanylate, disodium inosinate [both flavor enhancers]), modified tapioca starch, salt, citric acid, niacinamide, iron as ferrous sulfate, vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 12 oz. Plastic chub pack.

**How Stored:** Frozen.

**New Product–Documentation:** Label. 1982, undated.

Green and blue on white. “A soy protein product. Artificial tuna flavor. Contains no tuna. No preservatives.”

1505. Blair Island. 1982. Menu. Eugene, Oregon. 1 p. both sides. 24 x 11 cm. Black on yellow.

• **Summary:** This soy deli serves breakfast and lunch. Soy-related products in the breakfast menu include: Tofu pocket (sauteed tofu in a pita pocket). Tofu scrambles (Blair Island style tofu, sauteed onions and cheddar cheese). Tofu breakfasts: “Blair Island style tofu is pressed, then sauteed with seven herbs, spices, and shoyu. Served with sprouts, fresh-baked toast or muffin and a side of sweet and sour tomato sauce. Regular (tofu, sprouts and sauce), or Special (tofu smothered with mushrooms and onions).” Side orders: Cup of tofu. Cashew milk.

Lunch. Tofu tia (tofu with sprouts and sauce wrapped in a corn tortilla). Tofu pocket sandwich. Tempeh tia. Tia special. Buddah burger (tofu-mushroom burger). Temptation (tempeh burger). Tempeh burrito. Bean burrito with tofu sour cream. Salads with tofu sour cream dressing. Tofu cheesecake desserts with different toppings.

Note: This company was in business in Aug. 1979, located on an island between two branches of the road. Address: 325 Blair Blvd., Eugene, Oregon 97402. Phone: 683-5117.

1506. Hara, Eddie H. 1982. *Le tofu dans la cuisine macrobiotique* [Tofu in macrobiotic cuisine]. Paris: Guy Tredaniel. Éditions de la Maisnie. 85 p. Illust. No index. 25 cm. Preface by Clim Yoshimi. [Fre]

• **Summary:** This attractive book, featuring 36 recipes, starts with one for homemade tofu, and includes recipes for tofu mayonnaise, tofu omelets, salads, soups, bread, tofu hamburger, tofu steak, and desserts. Address: Japanese photographer living in France.

1507. Henderson, Bruce R. 1982. *Oakland organic: A vegan primer*. Albany, New York: Caboose Press. 200 p. Illust. 23 cm. [24 ref]

• **Summary:** This is a book about veganism which contains a few vegan recipes near the back. It focuses on the San

Francisco Bay Area and urban areas, and contains extensive information about soybeans and soyfoods, much of it inspired by *Yay Soybeans*, from The Farm in Summertown, Tennessee. As follows: Miso, and Soya-Mineral Bouillon (Dr. Bronner’s) (p. 19). Soy as an alternative protein source (p. 37-43). Soymilk (p. 53-56; Jethro Kloss). More soy (p. 57-61; soy pulp [okara] pudding, soysage, Garden of Eatin’ Soy Jerky (illustration of package), Brightsong Missing Egg Tofu Salad (illustration), soy yogurt (fermented), soy tofu—hard, baked, or fried). Sprouting (p. 67-70; incl. soybeans). Fermented foods (p. 71-74; incl. tempeh, raw tofu). Snacks &

quick foods (p. 88-96; incl. Ice Bean—soy ice cream, Ice-C-Bean). Miso and soy sauce (p. 120-21). Soy-related recipes: Baked apples with miso (p. 185-86). Tofu cheesecake (p. 188-89). Soysage (p. 193). Soy ice bean (p. 195). Note: Bruce Henderson was born in 1946. Address: Oakland, California.

1508. Re: Names of soyfoods around the world: French. 1982. Form filled out by William Shurtleff based on sources given below. 1 p. [Eng; Fre]

• **Summary:** Gives the names of the main soyfoods in French. Sources: Bernard Storup; Bau & Debry, of France.

“Soyfoods—Aliments à base de soja.

Fresh green soybeans (edamamé)—Edamamé or Soja frais.

Whole dry soybeans—(haricots de) Soja sec / secs.

Black soybeans -

Fresh soy puree—Purée de soja.

Soy sprouts—Pousses de soja. Soja germe.

Soynuts—Soja grillé. Graines de soja grillées.

Oil roasted soynuts—Graines de soja grillées (à l’huile). Soja grillé, revenu dans l’huile.

Dry roasted soynuts—Soja grillé à sec. Graines de soja grillées à sec (or sans huile). Haricots de soja, grillés à sec.

Soynut butter—Buerre de soja grillé.

Roasted soy flour—Farine de soja grillé.

Soy coffee—Café de soja.

Soy chocolate—Chocolat de soja.

Soymilk—As of Feb. 2012 only the terms “boisson au soja” or “jus de soja” or “tonyu” (the Japanese word for “soymilk”) can be used legally on commercial soymilk products in France—because of dairy lobby protests. The term “lait de soja” is generally used in cookbooks, books, articles, etc.

Soymilk ice cream—Glace au soja or glace au lait de soja.

Soymilk curds -

Tofu (regular)—Tofu or Tofou (le). Note: Many French speakers, who are also soyfoods experts, prefer “Tofou.”

Soft tofu—Tofu mou.

Firm Tofu—Tofu ferme. Extra firm tofu—Tofu très ferme.

(Deep fried) Tofu cutlets—Tranches de tofu frites.

(Deep fried) Tofu burgers—Tofuburgers frits. Burgers de tofu (frits).

(Deep fried) Tofu pouches—Poches de tofu (frites).

Silken tofu—Tofu soyeux.

Pressed silken tofu—Tofu soyeux.

Grilled tofu—Tofu grillé.

Dried frozen tofu—Tofu séché. Tofu déshydraté.

Okara or soy pulp—Okara (l’).

Yuba—Yuba (le).

Dried yuba sticks -

Sweet dried yuba -

Fermented black soybeans -

Miso or soybean jiang—Miso (le).

Soy sauce—Sauce de soja. Sauce soja. Shoyou (le).

Chinese sauces -

Tamari—Tamari (le).

Tempeh—Tempeh (le).

Fermented tofu—Tofu fermenté (au vin).

Fermented soymilk—Lait de soja fermenté.

Natto, thua-nao, kinema—Natto (le).

Soy oil—Huile de soja.

Soy lecithin—Lecithine de soja.

Soy flour—Farine de soja.

Whole (full fat) soy flour—Farine de soja entière.

Defatted soy flour—Farine de soja dégraissée.

Soy grits and flakes—Flocons et granule de soja.

Cereal-soy blends (CSM, WSB, etc.) -

Soy protein concentrate—Protéine de soja concentrée.

Soy protein isolate / Isolated soy protein—Isolat de protéines de soja. Protéine de soja isolée.

Textured soy protein products—Protéines de soja texturées (Produits à base de protéines de soja texturée).

Textured soy flour, TSF, or TSP—Farine de soja texturé.

Textured soy concentrates—Concentrat de soja texturé.

Textured soy isolate—Isolate de soja texturé.

Spun soy protein fibers. Address: Soyinfo Center, Lafayette, California 94549.

1509. Simonds, Nina. 1982. *Classic Chinese cuisine*. Boston, Massachusetts: Houghton Mifflin. xi + 353 p. Illust. Map. Index. 23 cm.

• **Summary:** This is a remarkable book by one who is part “of a new generation of American chefs and food writers.” The Pinyin system of romanization, “which was officially adopted by the People’s Republic of China in 1979, has been used for most of the Chinese words in this book” (p. vi).

A map of China (facing page 1) shows the individual provinces and the four main culinary schools: northern, western, eastern, and southern—as explained on pages 1-4.

Taiwan is considered part of the eastern school. The southern school is comprised of only two provinces: Guangdong (which includes the city of Guangzhou—formerly named Canton) and Guangxi.

Soyfoods are used and discussed liberally throughout this book. The section titled “Condiments, seasonings, and special ingredients” (p. 5-11) gives detailed discussions of hoisin sauce, oyster sauce, soy sauce (the three grades are light, medium and heavy, with light having a delicate and slightly more subtle flavor than the other varieties), sweet bean sauce (and bean pastes including brown bean paste and yellow bean paste), fermented black beans (and black bean sauce).

The next section, “Selected fresh and pickled vegetables” (p. 11-14) has an entry for bean sprouts (the two main types are sprouted from mung beans {which are green} and soybeans {which are yellow}; soybean sprouts have a stronger flavor and require longer cooking).

Soy related recipes: Beef with noodles in a pot (with “2 cakes bean curd,” p. 76). Cold spicy noodles (with “2 cakes bean curd, about 3 inches square and 1 inch thick,” p. 80).

One chapter, titled “Soybeans and bean curd” (p. 113-29) begins with a charming introduction to “stinky bean curd” (fermented tofu). As evening fell after dinner, luscious scents and fragrances filled the air. Yet there was “a putrid smell that defied classification. What was that baffling, pungent odor, present in every part of the city.” After a bit of research she soon discovered that it came from “stinky bean curd (*chou dou fu*), a favorite snack of the Chinese.” Vendors of this unusual “delicacy ran rampant all over the city with their portable deep deep-fryers. My Chinese surrogate sister and brothers, who were great fans of the stuff, used to race outside, armed with empty bowls and chopsticks, at the sound of the stinky bean curd man’s call. (The smell usually preceded him by two blocks, giving everyone plenty of notice.)” It is “made by fermenting fresh bean curd squares in a brine with assorted spices and pickled vegetables.” The resulting cakes are deep-fried... until golden and eaten with soy sauce, vinegar, mashed garlic, or chili paste.”

The soybean is used to make various Chinese seasonings including soy sauce, hoisin sauce, sweet bean sauce or paste, and hot bean paste. Fresh green soybeans are cooked and served with soy sauce and sesame oil. Whole dry soybeans are fried and eaten as a snack.

“The nutritious properties of the soybean further explain why it is so popular with the health-conscious Chinese.”

Heating soybean milk gives “bean milk sheets (*fu pi*)” [yuba]. Also mentions “bean curd sticks (*fu zu*)” [dried yuba sticks], bean curd sheets (*bai ye*),” and “bean curd noodles (*gan si*).” In terms of consistency, the three basic types of bean curd are soft, medium, and hard (*dou fu gan*).” “Bean curd is also fermented in rice wine and spices to make a popular seasoning (*dou fu ru*), which has a “slightly cheeselike flavor.”

Nina concludes the introduction: “As most nutritionists will agree, the soybean and its many by-products are the foods of the future.” Line drawings show: soybeans, bean curd, bean milk sheets, bean curd sheets, bean curd sticks, and bean curd noodles. Recipes in this soy chapter: Meatball and soybean casserole (with “4 cups dry soybeans, p. 116). Sweet soybean milk (How to make at home; the Chinese equivalent of America’s cup of coffee for breakfast, with 2 cups dry soybeans and 1 cup sugar. Typically accompanied by a sesame flat bread {*shao bing*} and a fried cruller {*you tiao*}). Stir-fried soybean sprouts with red-in-snow. Stuffed bean curd rolls (with “8 dried bean curd sheets or bean milk sheets”). Sweet-and-sour fish slices (with “10 dried bean milk sheets”). Eggplant rolls (with “6 dried bean milk sheets”). Buddha’s delight (a well-known vegetarian dish, with “2 ounces bean curd sticks”). Cold tossed bean curd and celery shreds (from Sichuan, with “8 cakes bean curd, about 3 inches square and 1 inch thick”). Red-cooked bean curd. Braised bean curd with black mushrooms in oyster sauce (from Sichuan). Stuffed bean curd (from Canton). Ma po bean curd (from Sichuan). Eight-treasure stir-fried vegetables with meat (with “3 cakes bean curd, about 3 inches square and 1 inch thick”). Northern-style bean curd (p. 129).

More soy related recipes: Steamed fish fillets in black bean sauce (with “1 tablespoon fermented black beans, rinsed, drained, and minced,” p. 183). Double-cooked pork slices (with “3 cakes bean curd,” p. 230). Steamed spareribs in black bean sauce (with “2 tablespoons fermented black beans, rinsed, drained, and coarsely chopped,” p. 234). Stuffed peppers in black bean sauce (with “1 tablespoon fermented black beans, rinsed, drained, and minced,” p. 272).

One entire chapter is titled “Vegetarian dishes” (p. 279-94). The introduction discusses the Kuantu Temple (a Buddhist-Taoist sanctuary about 1 hour drive from Taipei), and the origin of vegetarian cuisine in China in early Buddhist and Taoist monastery kitchens. Wheat gluten (*mian jin*) and related preparations such as deep-fried wheat gluten balls (*mian jin pao*), steamed wheat gluten chunks (*kao fu*), plus seasonings such as “pickled bean curd (*dou fu ru*)” are often used. Soy related: Broccoli in mock crabmeat sauce (with “1 cake bean curd,” p. 285). Vegetarian lion’s head (with “4 cakes bean curd,” p. 287). Mock goose (with “20 bean milk sheets” [yuba], p. 290-91). Vegetarian eight treasures (with “2 cakes bean curd,” p. 291). Wheat gluten (how to make at home from wheat flour, p. 292).

More soy related: Eight-treasure mixed soup pot (with 2 cakes bean curd,” p. 310-11). Hot and sour soup (with “2 cakes bean curd,” p. 316).

About the author: A photo of Nina Simonds (in Chinese clothing) appears on the inside rear dust jacket. She studied Chinese food and cooking, language and culture, in Taiwan for more than three years (she arrived there at age 19) with Chinese master chefs at the Wei-Chuan school in Taipei, while living with a Chinese family. She subsequently

received the Grand Diplôme from La Varenne École de Cuisine in Paris, where she also taught Chinese cooking. “For the past eight years (prior to 1982) she has taught in cooking schools all over the United States and Canada and her articles have appeared in *Gourmet* and *Cuisine* magazines and the *Boston Globe*” (from the inside rear dust jacket). Address: Salem, Massachusetts.

1510. Soyfoods Unlimited, Inc. 1982. Free tempeh tasting: Come & enjoy delicious tempeh recipes (Leaflet). 14668 Doolittle Dr., San Leandro, CA 94577. 1 p. 28 cm.

• **Summary:** “New meat substitute! A cultured soy product. “High in protein. No cholesterol. Low in fat and carbohydrates. Free pamphlets with recipes. Date. Time. Place. Free.” A small illustration shows a tempeh burger. Address: San Leandro, California.

1511. Time Inc. 1982. People weekly cooks. New York, NY: Time Inc. 49 p. Illust. No index. 21 cm. [1 ref]

• **Summary:** This hardcover, spiral-bound book features cooks who have appeared on the pages of *People* magazine. Each person (or people) is given a two-page spread. On the left page is a large black-and-white photo. On the right page is a favorite recipe and some information about both the recipe and the person. William Shurtleff and Akiko Aoyagi Shurtleff appear on pages 40-41. The photo shows her using chopsticks to deep-fry tofu burgers in a heavy skillet at their home at 951½ Mountain View Drive, Lafayette, California. He is holding a metal baking sheet on which are a number of unfried burger patties. The recipe is for “Tofu eggless egg salad sandwich.” The text notes: “‘I want soyfoods to be the most important source of protein in the world,’ declares William Shurtleff.” Address: New York City.

1512. Tropp, Barbara. 1982. The modern art of Chinese cooking. New York, NY: William Morrow and Co. 623 p. Illust. Index. 23 cm.

• **Summary:** One of the best and most authoritative books on Chinese food written by a Westerner, who is a Chinese scholar turned Chinese cook, and who lives in San Francisco. Contains an excellent, long “Glossary of Ingredients” (p. 529-81) with extensive information about Chinese foods (plus their names spelled phonetically in Mandarin and Cantonese) including: Hoisin sauce (Mandarin: hai-hsyen-jyang; Cantonese: hoi-seem-jyenug. The characters mean “sea-freshness sauce.” She uses a widely distributed brand, Koon Chun, that is jam-like in consistency and on the sweet side). Mock meat (Mandarin: myen-jin; Cantonese: ming-gun. incl. Companion brand Braised Dried Bean Curd, Curried Braised Gluten, Curry Vegetarian Mock Duck, and Longevity brand Curried Mock Abalone). MSG (“Originally made from dried fermented wheat gluten”). Salted black beans (Mandarin: doe-jrr; Cantonese: dao-see; fermented black soybeans. This “popular Chinese seasoning is also

known as Chinese black beans, salted beans, fermented black beans, and occasionally ginger black beans.” “Shreds of ginger or orange peel or a dash of five-spice powder occasionally added to season the beans in the final soaking stage.” Barbara prefers salted black beans that are seasoned with ginger and she avoids the kind seasoned with five-spice powder. She uses Mee Chun brand and does *not* wash salted black beans, as is common; it is a practice she has never understood).

A recipe for Hot and sour Hunan chicken (p. 142-43), in the ingredients section titled “Aromatics,” calls for “2 tablespoons Chinese salted black beans (page 561).”

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term “Chinese salted black beans” or the term “ginger black beans” to refer to fermented black soybeans. This term former is also used in recipes for Garlic-stewed sparerib nuggets (p. 203) and Hunan eggplant with spicy meat sauce (p. 293).

Soyfoods: Introduction, soy sauce (Kikkoman soy sauce {Barbara’s everyday favorite}, thin soy sauce, black soy sauce, mushroom soy sauce; good Chinese brands are Superior and Koon Chun). Tofu (fermented tofu {incl. Pepper Bean Cake with hot chili flakes—[*la jiao doufu-ru*]}, fresh tofu, pressed tofu.

“Mushroom soy sauce is a flavored soy sauce, something between thin soy sauce and black soy sauce in saltiness. The brand I like best is Pearl River Bridge, which is made specifically with straw mushrooms and is classified in Chinese as black soy sauce owing to a touch of sugar that is included in the mixture,” p. 569).

Note: This is the earliest document seen (June 2011) that uses the term “ginger black beans” to refer to fermented black soybeans (*douchi*).

Ms. Tropp (see photo on inside rear dust jacket) studied Chinese language, poetry, and art history at Columbia University, Yale, Princeton, and the University of Taiwan. Her two-year sojourn in Taiwan found her living with remarkable Chinese families. On the rear cover is a nice long quotation from James Beard.

1513. Wholefood Cookery School. 1982. Homemade tofu and its uses. Wigston, Leicester: WCS. 12 p.

• **Summary:** Contents: Introduction: What is tofu? Buying and storing tofu. Making tofu at home. Recipes using tofu: Tofu tamari and ginger. Tofu burgers. Tofu ice-cream. Tofu mayonnaise. Tofu quiche. Tofu dip. Address: 16, 18 Bushloe End, Wigston, Leicester, LE8 2BA England. Phone: Leicester (0533) 883701.

1514. Yoneda, Soei; Hoshino, Koei; Schuefftan, Kim. 1982. Good food from a Japanese temple. Tokyo, New York, and San Francisco: Kodansha International. 224 p. Illust. Index. 27 cm.

• **Summary:** An outstanding, beautiful book, the best seen

# GOOD FOOD from a JAPANESE TEMPLE

Soei Yoneda  
Abbess, Sankō-in Temple

introduction by  
Robert Farrar Capon

## a 600-year tradition of simple, elegant vegetable cookery

to date on Buddhist Vegetarian Cookery (*shojin ryori*)—after you get past the poor, almost embarrassing introduction, written by Robert Farrar Capon of New York. The author, Sōei Yoneda, is a great Zen Abbess and cook, and a visit to Sankō-in, a Rinzai nunnery, is an unforgettable experience. The recipes are arranged by season: Spring, summer, autumn, winter, all seasons. For every recipe, both a Japanese and an English-language name are given. Soy-related recipes include: Soybean rice (*mame gohan*, p. 73). Unohana rice (with fried okara, p. 75). Thick-rolled sushi (with dried-frozen tofu, p. 75). Tofu rice (p. 80). Soy bean dashi (p. 82). Miso soups (p. 85-88; 14 recipes, one for each month but two for Jan. 1 and 2—White miso Ozoni and Zen temple ozoni—and one for all seasons—Saké lees soup). Pickling with miso (p. 89). Rape blossoms with miso-mustard dressing (p. 93). Bamboo shoots with vinegar-miso dressing (p. 98-99). Quick oden (with tofu, p. 107-08). Green beans with miso dressing (p. 113-14). Eggplant with miso sauce (p. 123). Zucchini with sesame-miso sauce (p. 129). Steamed zucchini with three-color miso (p. 130-31). Jade nuggets (*kizami nattō no ao-jiso age*, p. 136). Pine cones (*matsukasa*, with tofu, p. 151). Miso-pickled vinegared konbu kelp (p. 153). Crisp turnip with sesame-miso dressing (p. 158). Amazake (p. 162). Daikon with miso sauce (*daikon oden*, p. 170).

Brussels sprouts with miso sauce (p. 179-80). Dried-frozen tofu mélange (p. 181-82). Not exactly hamburger (“patties” with dried-frozen tofu and okara, p. 182). Simmered dried-frozen tofu (p. 182-83). Dried-frozen tofu tempura (p. 183). Konnyaku in miso dressing (p. 184). Fried unohana (*iri unohana*, with thin deep-fried tofu and okara, p. 187; “The mash or lees (*okara*) remaining after making tofu are inexpensive, plentiful, and nourishing—ideal everyday temple food. By itself *okara* is not interesting, but it is brought to life by the addition of a little oil and a few other ingredients”). Inari-zushi (p. 189-90). Grilled usuage (with thin deep-fried tofu, p. 190). Deep-fried usuage (p. 190-91). Golden sushi rolls (with usuage, p. 191). Rôbai (Sanko-in fresh wheat gluten, p. 192-93). Deep-fried dried yuba (p. 195). Fried and simmered dried yuba (p. 196). Sesame “tofu” (with kuzu, p. 196-99). Almond tofu (p. 202). Salt-grilled tofu (from old Naniwa, today’s Osaka, p. 203-04). Steamed tofu loaf (p. 206). Salad with white [tofu] dressing (*shira ae*, p. 206-07). Steamed tofu cup (*otôfu no chawan mushi*, p. 208). Deep-fried tofu in thick sauce (p. 209). Tofu sauté (*yaki-dofu no atsuyaki*, p. 213). Bean flowers (*nattô no mochi gurumi*, p. 215). Buckwheat-miso topping (p. 215-16). Miso mayonnaise (with sweet white Saikyo miso, p. 216-17).

Contains 17 pages of color photos showing dishes prepared from recipes in this book. The 510 delicate illustrations (both line drawings and simple brush paintings) clarify and enhance the text throughout.

In 1987 this book was re-issued with a new title: *The Heart of Zen Cuisine: A 600-year Tradition of Vegetarian Cookery*. Address: 1. Abbess, Sanko-in Zen temple, Honcho 3-1-36, Koganei-shi, West Tokyo (Musashi Koganei Station).

1515. Desert Gardens. 1982? New soyfoods restaurant or deli. 702 Main St., Safford, AZ 85546.

• **Summary:** Menu sent by owner Katerina Lewis about 1982. “One of our main staples is tofu...” Soy-related recipes include—Appetizers: Eggless salad (with tofu), Brazilian bean dip (with tofu), French onion dip (with tofu & miso), California guacamole (with tofu). Side dishes: Potato tofu knish, Chili beans & tofu, Baked potatoes (with tofu sour cream), Tofu pizza. Deli: Tofu cottage cheese, Soy sour cream, Tofu cream cheese. Entrees: Sicilian eggplant Parmesan (with tofu), Tofu & fresh vegetable saute, The combo (featuring breaded tofu cutlets). Sandwiches: Tofuburger with millet, Sizzling tofu, Guacamole, Tofu (tofu, sprouts, and tomato on a toasted bagel). Beverages: Soy milk, Soy shakes. Desserts: Tofu cheesecake. Soybean ice cream. Address: Safford, Arizona. Phone: 428-5132.

1516. **Product Name:** Tofu, and Soysage.

**Manufacturer’s Name:** Mainley Tofu.

**Manufacturer’s Address:** P.O. Box 209, Anson, ME 04911. Phone: 207-696-5845.

**Date of Introduction:** 1982?

**New Product–Documentation:** Letter from Peter Beane. ca. 1982. David Friedman and Amythyst Montford are friends at Mainley Soyfoods. He is making tofu and soysage again, but now his main business is growing alfalfa sprouts (450 lb/week). He is about to marry Noreen O’Leary. Shurtleff & Aoyagi. 1982. *Soyfoods Industry: Directory & Databook*. p. 1.

1517. **Product Name:** Paul’s Tofu Burgers.

**Manufacturer’s Name:** Paul’s Tofu.

**Manufacturer’s Address:** The Old Brewery, Wheathampstead House, Wheathampstead, Hertfordshire, England. Phone: Wheathampstead (058283) 4241.

**Date of Introduction:** 1982?

**Ingredients:** Organically grown soya beans, whole grain cereals, vegetables, and herbs.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet titled “Paul’s Tofu” (undated, but sent in 1982). Address: The Old Brewery, Wheathampstead House, Wheathampstead, Hertfordshire, UK. Phone: Wheathampstead (058283) 4241. 3 panels on each side. Each panel: 21 x 10 cm. Printed brown ink on beige paper. Contents: Introduction to tofu. For whom is tofu intended? The qualities of tofu. Suggestions for use. Storage. Try these recipes with your tofu (5 recipes from *The Magic of Tofu*, by Jane O’Brien; Thorsons Publishers). Community Health Foundation (188-94 Old Street, London EC1V 9BP). “Paul’s Tofu Burgers are made from organically grown soya beans, whole grain cereals, vegetables and herbs...”

1518. Mouish, Jo Collins. 1983. Cook uses tofu to create ‘luscious’ cheesecake: Cook’s corner. *Press (Ypsilanti, Michigan)*. Jan. 5. p. 1C.

• **Summary:** Karen Malofy, age 29, works as a cook at The Soy Plant in Ann Arbor, is married and has two daughters. The “hidden ingredient” in her recipes is tofu. Recipes are given for: Tofu cheese cake. Tofu quiche. Tempeh mock chicken salad. Missing egg salad. Tempeh with nutritional yeast gravy. Photos show: (1) Ms. Malofy. (2) A block of tofu and tofu cheesecake. Address: Living editor.

1519. Munson, Judy. 1983. Dining out: The Golden Mushroom (Ad). *Chicago Tribune*. Jan. 7. p. SWC7, or SC7.

• **Summary:** The menu of this natural foods restaurant, at 18500 S. Vincennes Ave., compromises with a few chicken, shrimp and tuna offerings, but no white sugar is allowed in the place. The most popular item on the lunch menu is the veggieburger, served stuffed in whole wheat pita bread. Tofu, a food well known to vegetarians, is served scrambled with green onions and sesame seeds.

“For the uninitiated, tofu looks like cubes of chicken breast, but actually is a soy bean curd (soy milk made into cheese). ‘It’s a perfect food, if you can get used to the taste,’ said the chef.”

1520. **Product Name:** Vegie Burger.  
**Manufacturer's Name:** Bud, Inc.  
**Manufacturer's Address:** 1100 Wicomico St., Baltimore, MD 21230.  
**Date of Introduction:** 1983 January.  
**Ingredients:** Natural nigari tofu, carrots, cabbage, onion, celery, potato, yam, okara, soymilk, sesame seeds, sunflower seeds, soybean oil, sea salt, spices.  
**Wt/Vol., Packaging, Price:** 7 oz vacuum pack.  
**How Stored:** Frozen.  
**Nutrition:** Per 3.5 oz.: Calories 210, calories 12 gm, carbohydrates 13 gm, fat 13 gm, sodium 235 mg (235 mg/100 gm).  
**New Product–Documentation:** Label. 1983. Jan. (dated). 4.5 inches square. Black and white on reddish-purple. “Keep frozen. Completely vegetarian. All natural. No preservatives.” Logo reads: “Soyfoods for a healthy world”; East West. 1987. June. p. 65.

1521. **Product Name:** Royal American Stroganoff Style Dinner. Meatless Main Course.  
**Manufacturer's Name:** Royal American Food Co.  
**Manufacturer's Address:** P.O. Box 1000, Blue Springs, MO 64015.  
**Date of Introduction:** 1983 January.  
**New Product–Documentation:** Label (foil pouch). 1983, dated. 7.5 by 10.5 inches. Blue lettering with red subtitle on white background.

1522. Low, Robert. 1983. And here comes... the VegeBurger. *Observer (The) (London)*. Feb. 27. p. 4. Sunday.  
 • **Summary:** This meatless burger, which was created by Gregory Sams, was launched nationally last week. He hopes “it will be the next product to graduate from the health food shop circuit into the mainstream of national gastronomical life.”

In the late 1960s, his brother Craig founded the Ceres Bakery in Portobello Road. Greg started “the Harmony Foods health food business, developing it into a £2.5 million a year turnover operation when he sold it out last to concentrate on the VegeBurger.” He now lives in Kansal Rise, West London, where he worked for 6 months to perfect the [dry mix] recipe, whose main ingredients sesame seeds, oats, soya, wheat, and vegetables.

1523. **Product Name:** The First Great Tofuburger Mix.  
**Manufacturer's Name:** Essential Foods, Inc. (Product Developer-Marketer).  
**Manufacturer's Address:** P.O. 8462, Emeryville, California. Phone: 314-832-7575.

**Date of Introduction:** 1983 February.  
**Ingredients:** Sunflower seed meal, soy flour, sesame seed flour, arrowroot, garbanzo flour, sea salt, soy sauce, garlic, onion, torula yeast, natural herbs & spices.  
**Wt/Vol., Packaging, Price:** 5.3 oz (150 gm) foil packet.  
**How Stored:** Shelf stable.  
**New Product–Documentation:** Label (foil packet). Undated. 5.5 by 7.5 inches. Orange, blue, red, tan. Color photo of burger on front. Recipes on back for Tofuburgers, Tofuballs or Appetizers, Tofuloaf. Spot in *Soyfoods*. 1983. Summer. p. 54. The contents of the packet is mixed with 1 lb of tofu to make 6 tofu burgers.

Leaflet. 1983. The First Great Tofuburger Mix. 2 p. Address is 5565 Fremont St., Oakland, CA 94606. Talk with Craig Ramsell. 1989. March 14. This product was discontinued in late 1983, having been replaced by the Lite Chef California Burger. The product was co-packed by another company.

1524. **Product Name:** Light Tofulogna (Cooked Tofu Bologna).  
**Manufacturer's Name:** Light Foods Inc.  
**Manufacturer's Address:** 6144 Bartmer, St. Louis, MO 63133.  
**Date of Introduction:** 1983 February.  
**Ingredients:** Organic tofu, okara, soy oil, water, dried egg white, textured soy protein, salt, barley flour, honey, shoyu, locust bean gum, onion and garlic, natural spices, paprika, natural spice oils.  
**Wt/Vol., Packaging, Price:** 12 oz cylinder, plastic wrapped and vacuum packed.  
**How Stored:** Refrigerated.  
**Nutrition:** Per 1.6 oz. slice: Calories 105, protein 6.4 gm, carbohydrates 5.9 gm, fat 7.0 gm, sodium 510 mg, cholesterol 590 mg.  
**New Product–Documentation:** Spot in *Whole Foods*. 1983. Jan. p. 39. “New Tofu Line. Light Foods, Inc. presents

a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage. Spot in Soyfoods. 1983. Winter. p. 48; Manufacturer's leaflet. 1983, undated.

Label. 1988 received. Chub-packed in a sausage-style waxed paper tube. 10 by 3 inches. Orange, yellow, and tan. With label printed directly on tube. "Pre-cooked. Meatless. 100% cholesterol free."

**1525. Product Name:** Light Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Light Foods Inc.

**Manufacturer's Address:** 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.

**Date of Introduction:** 1983 February.

**Ingredients:** Okara (soy pulp), whole wheat flour, soymilk, nutritional yeast, wheat germ, soy oil, bulgar wheat, shoyu, honey, sesame seeds, herbs & spices.

**Wt/Vol., Packaging, Price:** 12 oz sausage-like dark reddish brown paperboard tube.

**Nutrition:** Per 2 oz.: Calories 147, protein 6.3 gm, carbohydrate 16.5 gm, fat 6.1 gm, sodium 292 mg.

**New Product–Documentation:** Spot in Whole Foods. 1983. Jan. p. 39. "New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage.

Label. 1988 received. Chub-packed in a pre-printed sausage-style casing. 10 by 3 inches. Orange, yellow, and reddish brown. With label printed directly on tube. "Pre-cooked. Meatless. 100% cholesterol free."

Talk with Bob Davis, founder of Light Foods. 1994. May 7. This product was similar to his first Soysage except that the packaging was different; the Light Soysage was chub packed. Other products in this line that were chub packed were Light Tofulogna and Light Loaf. The latter product was never commercialized.

1526. Light Foods Inc. 1983. Light Foods Inc. is proud to present tomorrow, today: A light line of distinction (Leaflet). St. Louis, Missouri. 1 p. Feb. Front and back.

• **Summary:** See next page. This 4-panel leaflet is printed with brown ink on beige paper. On the front panel is a stylized smiling sun. On the two inner panels are descriptions of the following meatless products, each with ingredients and nutrition facts. Right page: Light Links (tofu hot dog) [launched July 1982], Light Soysage (sausage featuring okara, whole wheat flour, and soymilk), Light Tofulogna (featuring tofu and okara).

Right page (the label of each product is shown): Crusts (frozen): Golden Crusts (featuring whole wheat flour and soy margarine), Amazing Crusts (featuring cornmeal, okara, whole wheat flour). Pie in the Sky (Tofu Spinach Pie, Tofu Tamale Pie [launched June 1983], Tofu Apple Pie).

Back panel: "Thank you for your attention. In the spirit of light. In Joy."

Talk with Robert Davis. 2007. June 5. He recently underwent a personal transformation of spiritual death, dying to the Self and opening of the heart. The illustration of the sun was probably drawn by Martha Johnson. He will soon be moving to Nelson, BC, in the Kootenays (mountains) near Kootenay Lake to create the Shunya Institute, a safe space. Address: 6144 Bartmer, St. Louis, Missouri 63133. Phone: (314) 721-3960.

**1527. Product Name:** Tempehroni (Herb-seasoned Tempeh in Sausage-Like Rolls) [Hot!, or Mild].

**Manufacturer's Name:** Turtle Island Soy Dairy.

**Manufacturer's Address:** P.O. Box 218, Husum, Washington 98623.

**Date of Introduction:** 1983 February.

**Ingredients:** Hot! Organically grown soybeans, water, apple cider vinegar, marjoram, basil, oregano, thyme, savory, cayenne, garlic,

onion, black pepper, *Rhizopus oligosporus* (tempeh starter).

**Wt/Vol., Packaging, Price:** 8 oz plastic wrapped cylinder.

**How Stored:** Frozen.

**New Product–Documentation:** Labels sent by Seth Tibbott of Turtle Island. 2000. Sept. 12. Tempehroni, introduced in June 1981, now has a spicy cousin. And the label for regular/mild Tempehroni has been changed. Each label (red on white) has a thermometer on the right side; it measures the "Tempepture." For the hot, the red mercury rises to the top, labeled "Hot." A cartoon figure standing to the right of the thermometer, with a body like a soybean pod and wearing a sombrero, makes a gesture with one hand to indicate "just right." For the mild, the red mercury rises only halfway up-to the mild mark. A different cartoon figure, with a body

Thank you for your attention.

In the Spirit of Light  
In Joy

Light Foods Inc.

# Light Links

A nutritional and fully cooked Tofu Hot Dog for the conscious child in us all. Our Tofu Hot Dog is made from the following ingredients:  
Dried Egg White, Textured Soy Protein, Salt, Barley Flour, Honey - Shoyu, Locust Bean Gum, Onion and Garlic, Natural Spices, Natural Extractive of Paprika and Natural Spice Oils.

One Serving, 1 link (1.4 ounces) has less than 100 calories, 6 grams of protein, 4 carbohydrate grams, 7 grams fat, .51 grams of sodium and .59 mg. of cholesterol (99% cholesterol free).

Light Links are packaged 11 per unit, 12 units per case.

# Light Soysage

A magically versatile and nutritional Soybean Sausage that is fully cooked. Perfect in Italian and Mexican dishes. (Makes a great chili sauce for the Light Link) or just brown and serve with your scrambled Tofu for breakfast. It is made from the following ingredients:

Okara, Whole Wheat Flour, Soymilk, Nutritional Yeast, Wheat Germ, Soy Oil, Bulgar Wheat, Shoyu, Honey, Sesame Seeds, Herbs and Spices.

A 2 oz. serving contains 147 calories, 6.26 grams of protein, 16.51 carbohydrate grams, 6.14 grams of fat, 292 mg. of sodium, and is cholesterol free. Light Soysage is packaged 12 oz. per unit, 12 units per case.

# Light Tofulogna

A fully cooked Tofu Bologna for the conscious sandwich and hors d'oeuvre gourmet. Light Tofulogna is made from the following ingredients:

Organic Tofu, Okara, Soy Oil, Water, Dried Egg Whites, Textured Soy Protein, Salt, Barley

Flour, Honey, Shoyu, Locust Bean Gum, Onion and Garlic, Natural Spices, Paprika and Natural Spice Oils.

A 1.6 oz. slice contains 105 calories, 6.36 grams of protein, 5.9 grams of carbohydrates, 7.04 grams of fat, .51 grams of sodium, .59 mg. of cholesterol. (99% cholesterol free).

Light Tofulogna is packaged 12 oz per unit, 12 units per case.

## CRUSTS

Light Foods is proud to present the finest Frozen Crusts available anywhere.

**Golden Crust** - This fine Crust is made from: Whole Wheat Flour, Soy Margarine, Water, Wheat Germ, Salt and Aluminum Free Baking Powder. Packaged 2 per unit, 6 units per case.

**Amazing Crust** - This fine Crust is made from: Cornmeal, Okara, Whole Wheat Flour, Soy Margarine, Salt, Water and Aluminum Free Baking Powder. Packaged 2 per unit, 6 units per case.

## PIE in the SKY™

The following Pies have been developed with only one thought in mind - to be the very best. And they are.

### Tofu Spinach Pie

A gourmet Tofu Spinach Quiche, contains no Cheese or Eggs. It is made from the following ingredients:  
**Filling:** Tofu, Spinach, Nutritional Yeast, Onion, Safflower Oil, Lemon Juice, Salt and Herbs.  
**Crust:** Whole Wheat Flour, Soy Margarine, Water, Wheat Germ, Salt and Aluminum Free Baking Powder.  
10 oz. per pie, 12 pies per case.

### Tofu Tamale Pie

The finest Mexican Soy Food Entree that can be purchased. Contains no Cheese or Eggs. It is made from the following ingredients:  
**Filling:** Light Soysage, Tomatoes, Tomato Paste, Sunflower Seeds, Mushrooms, Rasins, Honey, Herbs and Spices.  
**Yeast Cheese:** Tofu, Nutritional Yeast, Soy Margarine, Soy Oil, Brown Mustard, Apple Vinegar, Herbs and Spices.  
**Crust:** Cornmeal, Okara, Whole Wheat Flour, Soy Margarine, Water, Salt and Aluminum Free Baking Powder.  
9 1/2 oz. per pie, 12 pies per case.

### Tofu Apple Pie

A new healthful twist of a mouthwatering American standard. Unlike any Apple Pie you have ever tasted. It is made from the following ingredients:  
**Filling:** Apples, Water, Honey, Soy Margarine, Lemon Juice, Spices and Vegetable Gum.  
**Cream:** Tofu, Soy Oil, Honey, Lemon Juice, Vanilla and Salt.  
**Crust:** Whole Wheat Flour, Soy Margarine, Water, Wheat Germ, Salt and Aluminum Free Baking Powder.  
Approx. 9 oz. per pie, 12 pies per case.

of similar shape and wearing a chef's hat (toque) is tossing a pizza into the air over his head. The Turtle Island logo appears large in the upper left corner of each label.

Talk with Seth Tibbott, founder and owner of Turtle Island. 2000. Oct. 10. These two products were introduced in about Feb. 1983, shortly after the company moved to Husum.

1528. *Toyo Shinpo (Soyfoods News)*. 1983. Issetai atari nenkan oyobi ikkagetsu-kan no himmoku-betsu shishutsu kingan [Amount of money spent and amount of soyfood products consumed per household per year and per month in Japan, 1977-1982]. March 1. [1 ref. Jap]

• **Summary:** Gives figures for tofu, ganmodoki, natto, other, shoyu, miso, soy oil, and margarine. Tofu consumption is lowest in February and highest in August, followed by July, May, and June. Natto consumption is highest March then February, and lowest in August. Shoyu consumption is highest in July then May, and lowest in January then February. Miso consumption is highest in April then May, and lowest in January. Soy oil consumption is highest in July and lowest in January. Address: Japan.

1529. *Washington Post*. 1983. Key. March 20. p. SM26.

• **Summary:** Includes a brief review of the Berwyn Cafe (5010 Berwyn Rd., College Park, Maryland). "A half-dozen years ago, the Berwyn Cafe served delicious and carefully prepared food. Now they've too often gone the way of convenience, serving frozen tofu burgers, packaged tofu dressing spread on predictable salads and pita bread sandwiches."

1530. **Product Name:** Tofu Burger Mix (Meatless).

**Manufacturer's Name:** Fantastic Foods.

**Manufacturer's Address:** 106 Galli Dr., Novato, CA 94947. Phone: 415-883-7718.

**Date of Introduction:** 1983 March.

**Wt/Vol., Packaging, Price:** 4.4 oz box.

**How Stored:** Shelf stable.

**New Product-Documentation:** Label. Ad in *Whole Foods*. 1983. Oct. p. 23. "Tofu Burger. The Most Fantastic Way to Enjoy Tofu." Just mix 1 lb of tofu with the contents of the package to make 5-6 tofu burgers. All vegetarian. Also in *East West Journal*. Dec. Inside front cover. Full page, color.

1531. Hankin, Lester; Hanna, J. Gordon. 1983. Quality of tofu and other soy products. *Connecticut Agricultural Experiment Station, Bulletin* No. 810. 4 p. March. [8 ref]

• **Summary:** This cooperative study by the Connecticut Agric. Exp. Station and the Connecticut Department of Consumer Protection analyzed the microbial and nutrient content of 17 soy products: 5 tofu products made by New England Soy Dairy (Greenfield, Massachusetts), Firm Organic Tofu, and Tofu Slices (Marinated and Broiled) made by Nasoya Foods (Leominster, MA), Soy-Moo soymilk sold

by Health Valley Natural Foods (Montebello, California), Tempeh Burgers made by Soyfoods Unlimited (San Leandro, CA), Tempeh Burger made by Pacific Tempeh (Emeryville, CA), Tofu Lasagna with Sauce marketed by Legume, Inc. (Bloomfield, New Jersey), Tempeh made by Tempeh Works (Cambridge, MA), Genmai Miso distributed by Erewhon, Inc. (Cambridge, MA), Kome Miso distributed by Tree of Life (St. Augustine, Florida), and 3 tofu products made by The Bridge (Middletown, Connecticut). Ingredients of each product are given.

The study showed high levels of bacterial contamination in many of the products, much higher than for dairy products. Only 41% met the coliform bacteria standard of less than 10 per gram of product, 29% met yeast standard of less than 10/gm, 41% met the 10 mold standard of less than 10/gm, and only 12% met the standard for total aerobic bacterial count (less than 25,000/gm). In addition, soyfoods generally contained more fat than claimed.

This report had widespread repercussions for the soyfoods industry, which (in the short term) were negative. The authors had previously published studies on the microbiological quality of numerous dairy products. Address: P.O. Box 1106, New Haven, CT 06504. Phone: 203-789-7272.

1532. **Product Name:** Ray's Seitan "Wheat Meat," and Ray's Seitan Sandwich (in a Pita Pocket).

**Manufacturer's Name:** Ray's Seitan.

**Manufacturer's Address:** 1865 East Ontario St., Philadelphia, PA 19134. Phone: 215-634-3361.

**Date of Introduction:** 1983 March.

**Ingredients:** Seitan "Wheat Meat" (12/91): Organic whole wheat flour, wheat gluten, filtered water, natural tamari soy sauce, kombu (sea vegetable).

**Wt/Vol., Packaging, Price:** Seitan: 6 oz and 12 oz round plastic deli tubs, filled 3/4 full with broth.

**How Stored:** Refrigerated.

**New Product-Documentation:** Appropriate Foods, Inc. Eat Appropriately! [Catalog and price list] (Brooklyn, New York). 1987. Feb. "Ray's Seitan Wheat Meat." Talk with Ray Reichel of 1865 E. Ontario St., Philadelphia, Pennsylvania 19134. 1991. Dec. 10. He first started making and selling seitan in March 1983. The only other company that he knows of to make seitan before him was Upcountry. The label says Ray's Natural Foods but its real registered and licensed name is "Ray's Seitan." It is not listed in the phone directory. He makes two seitan products, sells some himself locally, and also sells to a distributor in the Delaware Valley, and a small distributor in New York named "Fill the Basket." It keeps him very busy, and his business has been operating at full capacity for quite a while. He is planning to expand next year but he is unwilling to make any changes that would lower the high quality of his product. The broth for his basic seitan is made only from tamari, kombu seaweed, and water. The

sandwich is in a pita pocket with tahini dressing, scallions, and lettuce. The gold foil label for the packaged seitan is much nicer than that on the sandwich.

He was introduced to seitan through his vegetarian diet and macrobiotics; there is an East West Foundation in Philadelphia, but he has never studied in Boston. He got interested in seitan, and since he was unemployed, he learned how to make it from cookbooks by Wendy and Edward Esko titled *Introducing Macrobiotic Cooking* (1979) and *Macrobiotic Cooking for Everyone* (1980). Today his average production of seitan is about 350 lb/week, sometimes reaching 400 lb/week.

Label sent by Ray Reichel. 1991. Dec. 20. 3.5 inch diameter. Red, gold, and black on orangish-yellow. Illustration of a bird flying across a rayed gold sun with ears of wheat on both sides. "Delicious meat substitute."

1533. **Product Name:** Saucy Joe (Sloppy Joe Made with Tofu).

**Manufacturer's Name:** Simple Soyman.

**Manufacturer's Address:** 3015 N. Buffum St., Milwaukee, WI 53212. Phone: 414-765-3733.

**Date of Introduction:** 1983 March.

**Wt/Vol., Packaging, Price:** Sold in a cottage cheese container.

**New Product–Documentation:** Talk with R. Jay Gruenwald. 1989. June 12. This was the company's first product. Ready to eat, cold or warm. Every product that company has ever launched is still being made. Simple Soyman has never made their own tofu; for 4 years they have bought the basic tofu from Mu Tofu, where it is made by Yoshi Uchida and his wife. Simple Soyman has been very happy with their product. Now he wants to start making his

own tofu, since he needs a larger market and the price of tofu is going up and the logistics of shipping are complicated. He now has some equipment from the Magic Bean, which he recently bought from the person who recovered it when Magic Bean went bankrupt. He now needs a grinder/disintegrator. People named Cassel and Carla Pulley were involved with the company in its early days.

Talk with R. Jay Gruenwald. 1991. Jan. 24. The Bountiful Bean is now for sale. He is thinking of a joint venture with Mu Tofu. The competition from Nasoya and White Wave is becoming severe.

1534. Wagner, Martha. 1983. Forget about meatballs, America; after 2000 years its time for tofu. *Chicago Tribune*. April 27-28. Section 7. p. 8B. Wed/Thurs.

• **Summary:** "Hawaii, where tofu is as common as peanut butter, can now offer tofu in all school lunch programs. And in New York City, 40 schools use tofu in a pilot program serving meatless meals."

Prepared soy foods are selling well. Eight brands of soy milk ice cream are now available, not to mention tofu salads and frozen tofu entrees such as lasagna and enchiladas, plus tofu dips, salad dressings, muffins, cheesecakes, tofu burgers and hot dogs, and much more. Gives a brief summary of three of America's most popular tofu cookbooks, plus recipes for Sunny tofu salad, and Baked marinated tofu.

1535. **Product Name:** [A. Vogel's Soja Mix (Burger, Bolognese, Curry), and Soja Italian Dinners (Cannelloni, Lasagne, Ravioli)].

**Foreign Name:** A. Vogel's Soja Mix (Burger, Bolognese, Curry), and Soja Italian Dinners (Cannelloni, Lasagne, Ravioli).

**Manufacturer's Name:** Bioforce A.G.

**Manufacturer's Address:** CH-9325 Roggwil TG, Switzerland.

**Date of Introduction:** 1983 April.

**Ingredients:** Bolognese (10/91): Defatted soybean meal [probably TVP], whole wheat flour, tomato powder, vegetable oil, yeast extract, cornmeal, fructose, onion powder, wheat germ, wheat bran, herbed sea salt, garlic powder, herbs, spices.

**Wt/Vol., Packaging, Price:** 200 gm box retails for 20 Swiss Franks (10/83), and for DM 5.92 (Bremen, Germany 10/91).

**How Stored:** Shelf stable.

**Nutrition:** Per 100 gm.: Protein 21 gm, vegetable oil 12 gm, carbohydrates 41 gm, calories (kcal) 363 (1520 kJoules).

**New Product–Documentation:** Ad in Whole Foods. 1983. Jan. p. 39 and April. p. 21. "A Vogel's Meat-free soy mixes and soy dinners: Simple and quick to prepare, fewer calories, nothing artificial." A black-and-white photo shows six packages. The soja mixes are available in Burger, Bolognese, and Curry flavors. The soja Italian dinners come in Lasagne, Ravioli, and Cannelloni flavors. This ad also appeared in

Vegetarian Times (May 1983, p. 8).

R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17. Product seen in Reformhaus health food store in Zurich, Switzerland.

Manufacturer's catalog. 1985. Full color, 6 panels. "A. Vogel's Soja Produkte." A color photo shows the labels of all the boxes. Contains 5 recipes.

Label for Bolognese sent by Anthony Marrese of Bremen, Germany. 1991. Oct. 7. 4.75 by 6.5 by 1.5 inches. Heavy paperboard box. Black and yellow on grayish-tan. Color photo of a white bowl of the Bolognese sauce next to a dish of noodles, surrounded by tomatoes, an onion, and parsley. 100 gm of the dry mix yield 500 gm of the finished dish. A leaflet in the box contains 5 recipes in French and German.

1536. **Product Name:** VegeBurger (Frozen) [Herb & Vegetable].

**Manufacturer's Name:** Realeat Company (The).

**Manufacturer's Address:** 2 Trevelyan Gardens, London NW10 3JY, England.

**Date of Introduction:** 1983 April.

**Ingredients:** Sesame seeds, rolled oats, wheat gluten, textured soya flour, wholewheat rusk, dehydrated onion, dried mixed vegetables, yeast extract (Seasoning and seasalt vary between the 3 varieties).

**How Stored:** Frozen.

**New Product–Documentation:** Letter (e-mail) from Greg Sams, originator of the VegeBurger—in response to questions from William Shurtleff. 2007. Feb. 8. The article by Low on the VegeBurger in *The Observer* (London; Feb. 27. p. 4. Sunday) was prompted by my press release, which tied into the launching of the frozen VegeBurger in Feb. 1983. That product was made under license with my mix and to my specs by a firm named Maynards in Taunton, Somerset, England.

1537. Rosenbaum, Ron. 1983. The alternative Big Mac. *Esquire* 99(4):126. April.

• **Summary:** "I'm sorry, I draw the line at tempeh. I had no qualms about tasting soy burgers, tofu burgers, lentil-walnut burgers, and sunflower-seed burgers, but I simply refuse to taste a tempeh burger.

"Tempeh, if you must know, is soybeans fermented with a mold. Soyheads say that tempeh has all sorts of high-quality-protein benefits you can't get even from the highly acclaimed soybean-curd tofu. It's the hot new item on the health food scene. I don't care. All I can think of when I hear 'tempeh' is those pallid squares of tofu floating in basins of dirty water in health food stores and developing mold. Yucch. I'm all for the health benefits of natural foods, but I have some aesthetic standards.

"The idea here was to search for a health food alternative to the hamburger, something that tasted good on

the sensual level and satisfied on the soulful level...

"Do the substitutes offer that kind of satisfaction? Well, forget about tofu burgers. We're looking for hamburger alternatives, not hamburger helper. Tofu burgers are so bland, so ascetic, so utterly tasteless that they may be natural as hell but they taste like polyester."

1538. *Soyfoods Monthly* (Colrain, Massachusetts). 1983. Bureaucratic flak on terminology. 3(4):2. April.

• **Summary:** "According to Wildwood Natural Foods, Fairfax, CA, the California Food & Agriculture Dept. has told them to desist from labelling their soy beverage 'soymilk' unless they wish to be inspected as a dairy or else register as an imitation milk. The California State Health Dept. has instructed them to desist terming a product 'tempeh burger' because of labelling confusion with hamburgers. The company is planning to contest both rulings."

1539. Cohen, Michael. 1983. New developments at The Tempeh Works (Interview). *SoyaScan Notes*. May 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael's company now makes just over 5,000 lb/week of tempeh and has 13 employees. His main products, in descending order of sales, are soy tempeh, 3-grain tempeh, and tempeh burgers. Today he plans to sign the papers that will enable him to move into a 4,000 square foot building on 2 acres of land in Greenfield in September. His post office box and phone number will not change.

In 1982 his company almost went out of business. He made big capital investments to expand into trailers, adding lots of new tempeh incubation space, then suddenly 4 competitors appeared in the New York-Boston area. For 9 months in 1982 he suffered big monthly losses. But he learned new ways of managing resources and people, recovered, and again achieved a positive monthly cash flow. He now has 2 production managers, which allows him to focus on marketing and sales. He has opened many new supermarket accounts, and is conducting many in-store demonstrations serving Sloppy Joes (multi-use for pasta filling, etc.) and Tempeh Mock Chicken Salad. He is trying to get the salad into salad bars but it is more expensive than potato salad or macaroni salad. Address: Greenfield, Massachusetts.

1540. Kremin, Carol. 1983. Tofu recipes for people who think they hate tofu. *Bestways*. May. p. 94-96.

• **Summary:** "These dishes are guaranteed to make a tofu lover out of the most adamant die-hard." "...tofu is probably the most perfect natural food. You simply cannot beat it for nutritional value."

Recipes include: Tofu spinach salad. Italian tofu. Marinated tofu salad. Tofuburgers. Tofu and spinach. Tofu-sesame scrambled eggs. Tofu fruit cream.

A small portrait photo shows Carol Kremin. Address: Staff.

**1541. Product Name:** [Tofu Burgers (Garlic / Herbs, Black & Green Olives, Mushrooms, Provençale with Tomato & Olives, Emmenthal Cheese)].

**Foreign Name:** Croque Tofou (Ail / Fines Herbes, Olives Noires et Vertes, Aux Champignons, Provençale, Emmenthal).

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

**Date of Introduction:** 1983 May.

**Ingredients:** Garlic/Herbs: French-grown soybeans, rolled oats (organically grown), soy sauce, sunflowerseed oil, aromatic herbs.

**Wt/Vol., Packaging, Price:** 160 gm vacuum pack, 2 croquettes per pack.

**How Stored:** Refrigerated, 30 day shelf life.

**New Product–Documentation:** Richard Leviton. 1983. Oct. 16-17. Visit to Societe Soy in Cerny. The company produces

10,000 Tofu Croques (burgers) a week in 6 flavors. They are vacuum packed for a 3 week shelf life, refrigerated. The Labels. 1983, undated. 2.75 inches diameter. Self adhesive. Red and green, brown, yellow or black on white. Flavors include Olives, and Garlic & Fines Herbes. Ad in Le Compas. 1986. March-April. No. 26. p. 32. Letter from Bernard Sturup. 1984. March 22. They now make 1,400 kg/week of tofu burgers. Label for Ail-Fines Herbes from about 1986. 3.5 by 6.5 inches. Red, green, yellow, blue, and white. Self adhesive. Address is still Cerny. Letter from Bernard Sturup. 1989. March 3. The first 5 varieties were launched in May 1983. Three more were launched in March 1985, which see.

New Labels (for Ail et Fines Herbes, Provençale, Forestiere, Emmenthal). Introduced in Jan. 1989. 3.25 by 5.25 inches. Self adhesive. Green, gold, and one other color on a white background. Beautiful color combinations and design. But the labels are confusing since each says "Léger" at the top but these are different from Croque Tofou Léger. "Mention Nature et Progres logo."

Letter from Bernard Sturup. 1990. Dec. 26. Since Jan. 1989 this product has been the same as Dorés de Soja (Tofu Burgers) but with different packaging.

Product ("Soy Croque Tofou: aux olives") with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches. Dark green, light green and black on white.

Letter (e-mail) from Bernard Sturup, founder of Nutrition & Nature (Revel, France). The product named "Soy Croque Tofou: aux olives" was first sold commercially in March 1990.

1542. Gullo, Karen. 1983. Soyfoods consumption hits all-time high. *Vegetarian Times*. June. p. 12. [1 ref]

• **Summary:** This is a review and summary of *Soyfoods Industry Directory and Databook 1983* by Shurtleff and Aoyagi. 1982 USA production and retail sales figures are given for the following foods: Tofu (27,500 tons, \$50 million in 1981), tempeh (450 tons, \$2 million), and miso (750 tons). Four factors contributing to the growth of soyfoods are summarized. "Low-calorie convenience soyfoods products and frozen, meatless 'heat and serve' entrees will play an important role in soyfood's entrance into the mainstream American diet... Dairy-like soymilk and soymilk shakes, yogurt and ice cream, tofu cottage cheese and tofu burgers will soon be low-cost, low-calorie alternatives to mainstream supermarket fare."

**1543. Product Name:** Tempeh Burgers.

**Manufacturer's Name:** Nasoya Foods (Distributor). Made in Greenfield, Mass., by The Tempeh Works.

**Manufacturer's Address:** Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.

**Date of Introduction:** 1983 June.

**Ingredients:** Organic soy tempeh, natural soy sauce, herbs, spices.

**Wt/Vol., Packaging, Price:** 7 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label. 1983, undated. 4 inches square. Yellow, black, blue, green. “100% natural.” Coupons. 1983. Dated.

1544. **Product Name:** Chili Con Tofu.

**Manufacturer’s Name:** San Diego Soy Dairy.

**Manufacturer’s Address:** 2965 5th Ave., San Diego, CA 92103.

**Date of Introduction:** 1983 June.

**Ingredients:** Incl. kidney and pinto beans, tofu, a vegetable variety, green chilies, tamari.

**Wt/Vol., Packaging, Price:** 16 oz deli container.

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in Soyfoods. 1984. Summer. p. 45. “Tofu Ole.” Talk with Gary Stein. 1989. Feb. 17. He thinks this product was introduced in about June 1983.

1545. Shurtleff, William. 1983. Yuba: The creamy film on soymilk. Often sold in the U.S. as “bean curd skins,” this popular Chinese soyfood has a rich taste and surprising uses. *Soyfoods*. Summer p. 73-76.

• **Summary:** This is primarily a history of yuba with five black-and-white photos of yuba being made at Yuba Han in Kyoto.

“When soymilk is gently heated in shallow, open pans at 80 to 90°C, a creamy-yellow, bland-flavored, concentrated protein-lipid surface film gradually forms. This is called yuba. The films are successively removed from the soymilk surface using a long skewer, hung to air dry, and marketed as fresh or dried sheets, sticks, or chips, or made into a variety of meatlike textured protein products.

“In standard Chinese (Mandarin), yuba is called *tofu-p’i*, which means ‘tofu skin’ or ‘tofu film’. It is less commonly known as *tofu-i* (‘tofu robes’) and *yu p’i* (‘oil skin’). According to the *Pen Chao Shih Chien* (1695), at that time this food was most widely called *tofu-lao*, where the character *lao* refers to either an old woman or a wet nurse.

“Yuba is actually a Japanese word. As presently written, the character *yu* means ‘hot water’ and the *ba* means ‘leaf’ or ‘flat thing.’ The etymology of the present term, however, is both obscure and complex, being intricately linked with the early history of the food itself. Reference to this food first appeared in Japan in the *Pen Chao Shih Chien* published in 1695.

“The next mention of yuba was in the *Wakan Sanzai Zukai* (1711), which referred to it as *tofu-p’i*, the present Chinese term. Interestingly the text notes that ‘The wrinkled look of the film resembles (the skin of) an old woman.’ This explanation seems to imply that the earlier term *lao* or

*uba* was used because of the similarity of yuba and an old woman’s face. The term yuba first appeared in 1813 in the *Kyonan Rubetsu-shi*. This new term’s origin was explained as follows.

“On Yuden Mountain, a sacred holly mountain in the feudal province of Dewa, there was an inn, Kinshiya Inn, visited by many pilgrims who came to the mountain to pray. The esteemed vegetarian cuisine was prepared by an old woman who was very skilled at making a variety of delicious foods from ground soybeans and soymilk. One of the foods was a thin film, which she fried before seasoning it. Others liked it so much that they began to make it themselves sometimes in the shape of bags and squares. In Kyoto, the capital, they used it in vegetarian dishes. Since the new food had been created by the old woman of Yuden Mountain, people named it yuba, where *yu* is taken from the Yu of Yuden mountain, meaning ‘hot water’ and *ba* is the character for ‘old woman.’

“There are also other explanations of the origin of the term. For example, *uba* (Tofu-p’i has traditionally been called yuba; however, this is a mispronunciation. Its real name is uba.) may be written with two characters meaning ‘upper’ and ‘waves,’ signifying that it is the ‘upper waves of tofu.’ It is not clear when or why the present characters meaning ‘hot water’ and ‘leaf’ came to be used, but they are thought to be of relatively recent origin.

“In early times, yuba was probably heated in shallow, circular, round-bottomed pots over a bed of coals. The round sheets of yuba, each draped over a skewer, were dried slowly over a weak bed of coals. This method can still be seen in some villages in Taiwan.

“Worldwide, yuba is most widely used in China, Taiwan, Japan and Hong Kong. Sold fresh or dried, generally in sheets, at prices anyone can afford, yuba is also made into a remarkable variety of ready-to-eat foods. The ‘bamboo yuba’ made by rolling up fresh yuba sheets, then hanging them over a line to dry, so they come out looking like a V-shaped beige rope, with each leg about 7 inches long, are also popular, as is the thick sweet yuba that forms on the bottom of the pan during simmering.

“The world’s first meat analogs, made from yuba, were developed in China, probably at least several hundred years ago, probably by Buddhist chefs in temples, monasteries, or Buddhist vegetarian restaurants. The earliest process for making these ‘meatless meats’ probably consisted of rolling sheets of yuba around a filling of minced and seasoned pieces of yuba, tying closed the bundles with string, and steaming for 30 to 50 minutes, or until a meaty texture and flavor developed. The finished products are still widely sold as vegetarian sausages, drumsticks and liver.

“Later, sheets of fresh or rehydrated yuba were mixed with various seasonings (usually including soy sauce) and packaged into the hollow two-piece molds (typically shaped like a chicken or fish), which were then clamped shut and

steamed for about 50 minutes. When the form was opened, behold: a perfectly shaped, tender chicken—with no bones. The finished product was then usually deep-fried (whole), carved, and served. Monks would enjoy these exotic dishes on special occasions and Buddhist laymen would enjoy them on the traditional ‘meatless’ days, the first and fifteenth day of each lunar month. Today in any major Chinese or Taiwanese city, one can view in the display case of the many Buddhist vegetarian restaurants (as well as in market stalls) almost perfect replicas of plucked hens, roosters, and ducks, light brown fish (complete with fins, gills, eyes, and mouth), juicy hams, tripe, liver, and rolled meats, all made from yuba and bearing such fanciful names as Buddha’s Chicken or Buddha’s Duck. Rich red sausage links hang in rows and deep-fried drumsticks are handsomely arranged on a large platter, together with a life-sized pig’s head-made of yuba, of course.

“Since earliest times, there have been thousands of small yuba producers throughout China. However in the early 1970’s, a number of large, modern factories came to be built in Hong Kong and Taiwan using updated methods. The soymilk was heated with steam from a boiler, the soymilk was run into the steaming trays using pipes and gravity flow, while the yuba was made in both round and square compartments, and much of it was dried indoors using dry steam heat. Production costs dropped, output skyrocketed, and the yuba began to be sold worldwide, mostly in overseas Chinese food stores and restaurants.

“Chinese-style yuba eventually began to spread to areas with large Chinese populations in Southeast Asia. Today in Malaysia, for example, one can find dried yuba strands (*tau ki* or *fu chok*), dried yuba sheets (*tau put*), sweet thick yuba (*t’im chok*), vegetarian sausage (*chak tie*), vegetarian duck (*chai ak*), vegetarian salted fish (*chai kiam hu*), or vegetarian meat (*chai tu kar*). Similar foods, such as yuba sausage, are found in Singapore.” Address: Soyfoods Center, Lafayette, California.

1546. *Soyfoods*. 1983. Profile: Azumaya tofu company. Summer. p. 34-37.

• **Summary:** One of the best studies of Azumaya ever published, including an in-depth history. The family-run company, which has 70 employees, is now America’s second largest tofu manufacturer, making 110,000 pounds/week of tofu and shipping it to 20 states. The plant, with 6,000 square feet of tofumaking space, starts operation at 3:00 A.M. each morning. The 147,000 Asian Americans in San Francisco are a major market.

Jack Mizono’s parents bought the business from a Mr. Sakamaki in June 1937. According to Jack, “Azumaya Company had been founded in Stockton, California, in 1920 by a Mr. Teranishi, who later moved it, in 1927, to San Francisco; in Feb. 1936 he sold it to Sakamaki.”

“In 1937 Azumaya was processing soybeans on Post

Street in a nondescript building all of 35-by-40 feet, or 1,000 square feet. In 1940 the rent went up considerably and they moved to Geary Street, setting up shop in the basement of a 25-by-40 foot building. Their equipment was traditional: stone grinder, gas steamers, large kettles, brick-reinforced wok cookers; they hand-scooped soymilk into flour sacks, hand twisted them, then hung them from hooks to lever press out the soymilk. Jack and brother George were Azumaya’s principal tofumakers then but their parents still helped with the tofu pouches, burgers, and grilled tofu.

“Jack didn’t like tofumaking too much. The work started at three in the morning, he wasn’t making a living from it, he had to paint houses, refinish floors on weekends, and his wife, Aya, worked as a seamstress. I’ll try this for a few years to help my parents, Jack said to himself. For the generation of new Caucasian tofu companies, this would seem like 1976 all over—the good old traditional, laborious, back-straining, unprofitable, daylong adventure.

“The war in 1941 seriously disrupted the business and their lives. The Mizono family was involuntarily ‘resettled’ in a government camp in California; after a few years there, Jack was sent to Utah, then to New York City where he worked 6 months in the shipyards. Then he was drafted into the U.S. Army. Finally in 1947 the Mizono family reassembled in San Francisco to re-open Azumaya.”

“Azumaya remained on Geary Street for about 10 years until their neighborhood underwent ‘redevelopment’ and the Mizonos lost their occupancy rights. Once again they packed up their tofu plant and in 1957 settled on [855] Golden Gate Avenue where they invested \$25,000 in constructing a 25-by-75 foot building (to which they added an additional 25-by-100 feet soon after). They were still using the labor intensive manual tofumaking tools.

“Around this time, Jack Mizono made the acquaintance of Mr. Kunishi, the proprietor of Sacramento Tofu Company, which had opened in the Capitol in 1948. Kunishi introduced Mizono to high technology Japanese equipment and showed him the proper import channels. In 1957, when Azumaya ordered its first pressure cooker system and hydraulic press, Jack’s brothers, John and Bill, joined the company and together the four Mizonos ran the plant. In production 6 days weekly, Azumaya began making 7,200 pounds of tofu a week.

“Then in 1968 the Mizono clan made a move that would continue to favorably affect their business for the next 15 years. Packaging. Shoan Yamauchi of Hinode Tofu Company in Los Angeles had already begun to package tofu in 21 ounce sealed plastic tubs and had acquired a special blow-mold form from Sealright Containers. Yamauchi agreed to supply Mizono with tofu tubs which Azumaya initially sealed with a laborious primitive hand sealer until 1971 when they bought a semi-automatic Japanese model. At the time, Azumaya was making 3 weekly deliveries to accounts in the East Bay, and 4 to San Jose, but the bulk of their tofu

sales were right in San Francisco. With the new packaging system on line, facilitating wider distribution and longer shelf life, their tofu sales nearly doubled in the next year.

Once again it came time to move the plant. This time, in 1970, it was to [95] Boutwell Street. Redevelopment had edged them out and Azumaya needed more production space for expanding sales. The brothers sold their Golden Gate building, took the \$40,000 to buy the new equipment and construct a 40-by-120 foot building to which they soon added another 30-by-120 feet. In 1973 they added noodles to their product line and downscaled the size of their packaged tofu from 21 ounces to 16 ounces for supermarkets.

“In 1975 they began shipping tofu out of state, a smart move apparently, as in 1983 about 50% of Azumaya sales were out of state. In 1978 noodle production represented only 20% of their business but by 1983 pasta madness had blossomed and noodles are half their wholesale business. The company began to grow fast. By 1978 Azumaya’s gross sales topped \$1 million; by 1980 their tofu production was 48 bushels [60 lb each] of soybeans a day, 6 days weekly, or about 43,000 pounds of tofu every week.

“In late 1979 Azumaya purchased 2½ acres of land and began the process of moving into their present, very modern plant. Once installed at Burke Avenue, Azumaya introduced pasteurization to obtain a longer shelf life for their widely, and increasingly wider, distributed tofu. Tofu lovers in Illinois, Missouri, Oregon, Georgia, and Massachusetts are now able to buy Azumaya brand tofu.” Regular and firm tofu are code dated for 21 days, silken for 30 days. Azumaya investigated vacuum packaging but dismissed it because they found it couldn’t produce a dependably long shelf life and it tended to compact the tofu, making the texture undesirably dense; a 19-ounce block ended up weighing only 16 ounces after the 2-hour treatment.

“Once a year Jack travels to Japan to monitor the latest tofu and noodle equipment innovations.” His tofu equipment can now process 18 bushels (1,080) lb of dry soybeans an hour to yield 3,000 pounds of tofu an hour (yield = 2.77). Last year Azumaya switched from the Sweco vibrating screen to the traditional roller extractor. A detailed discussion is given of Azumaya’s progressive employee benefit package, including medical insurance, bi-annual bonuses, pensions, and profit sharing. In total in 1982, these benefits “cost Azumaya \$40,000 for medical insurance, \$120,000 for pensions and profit sharing, and \$45,000 in bonuses and raises—\$2,928.57 per employee, to be exact. With a program as comprehensive as this, it is not too surprising that Azumaya operates productively and it doesn’t have a union, nor is likely to.”

Photos show: Three views of the inside of the plant. Azumaya’s products. John, Dorothy, Aya, and Jack Mizono.

1547. *Soyfoods*. 1983. The Miami soyfoods scene [Heartsong Tofu, Sunshine Soy, Swan Foods, Swan Gardens, Unicorn

Village, Oak Feed Store]. Summer. p. 38-39, 43.

• **Summary:** In Miami, three major tofu companies make about 25,000 pounds a week of vacuum packed tofu, prepared tofu products, and tempeh.

Brightsong Tofu: Bob and Toni Heartsong began making tofu in “1976 in a south Miami cottage style tofu shop which lasted until 1978. Making 900 pounds of hand-made tofu every week, the Heartsongs pioneered the Miami market, fully one year before the legendary and short-lived Swan Foods was opened in 1977. In January 1978 the Heartsongs moved to Redwood Valley, California, to help launch Brightsong Tofu. Meanwhile in 1977 they had written and Banyan Books had published, *The Heartsong Tofu Cookbook*, one of the first designed-for-tofu cooking guides. Bob Heartsong then worked in Hawaii for Mrs. Cheng’s Soybean Products where he made 600 pounds of tofu daily.”

Finally, the Heartsongs, peripatetic tofumakers, returned to Miami and in January 1982 opened Heartsong Tofu, a “1,200 square foot plant where today they produce 4,500 pounds of vacuum packed tofu each week (with an 18-day shelf life).” The company employs 6 full-time and 2 part-time workers. A list of their tofu products and equipment is given. The Grand Union supermarket chain sells \$2,200/week of their tofu products.

“Sunshine Soy, owned and managed by Danny Paolucci, occupies 2,500 square feet, in suburban Coral Gables, of what once was a Borden’s walk-in cooler... Paolucci opened Sunshine in June 1980, a company which today produces 4,000 pounds of tofu and various secondary products every week.

“Previously Paolucci served as production manager for Swan Foods until its closing in December 1978. [Note: Swan Foods opened in 1977.] Paolucci often measures his Sunshine Soy’s sensible survival against Swan Foods exciting but disastrous history. Swan Foods was, unfortunately, a textbook example of uncontrolled growth marked by nonmanagement: no competition, distribution by the formidable Tree of Life, a wildly innovative product line, a quadrupling of sales in the first 18 months, \$2,200 in weekly sales—ending in a disheartening crash. Their product line included baked, marinated, regular, and caraway tofus, soymilk (1,000 quarts weekly), tofu cashew pie, tofu dips and salads, soy yogurts, and soymilk shakes.

“Sunshine Soy, which employs four workers, has a privately labelled vacuum packed tofu (Golden Harvest brand) in most of Florida’s 100 General Nutrition Centers; Tree of Life, out of St. Augustine, handles the distribution.”

Swan Gardens: “Commanding the top tofu market position in Miami, Jocelyn and Richard McIntyre’s Swan Gardens, which moved to south Florida in 1979 from Montana, produces 15,000 pounds each week of vacuum packed tofu. Their 10,000 square foot plant uses only 3 production workers, each working 10 hour days, 5 days weekly—a model of streamlining. In March 1982 Swan

introduced their boxed tofu (see New Products, this issue) featuring their firm (16.6% protein) tofu which sells for \$1.19 a pound in produce at Winn Dixie. A major Florida distributor moves an estimated 5,000 pounds of their dealer brand every week as far north as Washington, DC. Recently Swan introduced an okara tempeh with a two week refrigerated shelf life, and this product joins their Spicy Soysage and Baked Tofu, also vacuum packed. Swan Gardens tofu is pre-dated 4 weeks for the supermarkets but McIntyre claims it remains microbially sound for 6 weeks. The company is comfortably profitable.”

Photos show: (1-2) Bob Heartsong, with tofu pressing in stainless steel forming boxes, and a close-up of his line of products. (3-4) Danny Paolucci and a close-up of his line of products. (5) A close-up of Swan Gardens' products.

“On the retail natural foods level, four major stores share the bulk of Miami soyfoods sales. The Unicorn Village in North Miami Beach is stocked with 25 soy products... The Unicorn itself prepares a Tofu Cottage Salad, Eggless Egg Tofu Salad, Baked Tofu, and Tofu Onion Dip in their restaurant for retail sale in their adjoining store.” Also discusses: The Oak Feed Store, a macrobiotic retailer in Coconut Grove (carries 44 soy products). Sundance Natural Foods in downtown Miami (many tofu-based deli items prepared in their kitchen). Nature's Touch in Miami.

1548. *Soyfoods*. 1983. Wildwood's sandwich power [Tofu sandwiches from Wildwood Natural Foods in Fairfax, California]. Summer. p. 42.

• **Summary:** “Wildwood Natural Foods has carved out a successful market niche in the competitive Bay Area soyfoods scene with their daily delivery of fresh tofu sandwiches and tempeh salads. The three year old company has built its reputation and sales volume on same-day freshness as all products reach the stores by 12 noon on the same day as manufacture. Wildwood's concept, backed by their in-house tofu shop, is eminently worth imitating in other similarly strong retail marketplaces.

“The Wildwood shop begins bustling with sandwich-making activity at 5 a.m. six mornings a week as about a dozen (out of a 35 member staff) workers prepare the daily quota of 800 sandwiches completing them by 10 when the truckers take them down to San Francisco, about 60 minutes drive away. With their 340 square foot steam kettle tofu shop, Wildwood, located in Fairfax, California, produces 2200 pounds of nigari tofu every week of which one half is used for sandwiches, the other half for distribution as bulk tofu under the “UFO” brand name (“us feeding ourselves”). In the busy summer months, sandwich production can easily soar to 6000 a week; surprisingly the returns on day-old sandwiches is only 5%.

“Under the guidance of Paul Duchesne and Bill Bramblett, the company was launched in August 1980 [Note: Actually that was when Wildwood began manufacturing

tofu, on 8 Aug. 1980; they had incorporated in April or May 1980]. Duchesne had been supplying Marin County with his brown rice and tofu sandwiches since 1975 [Note: Actually since late 1977] when Bramblett suggested they expand his concept, make tofu, and distribute a wider line of tofu sandwiches.

“Today in mid-1983 (with partners Bramblett, Frank Rosenmayr, and Paul Orbuch) Wildwood distributes an impressive line of sandwiches (which retail for \$2.25 each) including Avo-Tofu, Brown Rice & Tofu, Mustard Brown Rice & Tofu, Curry Brown Rice and Tofu, Sushi, Tofu Steak, Supreme Bean Tempeh Burger, Hijiki Rice Pie, and Seventh Heaven Bread. They also make prepared salads, packaged in 12 ounce containers which retail for \$2.25, including Curry Tofu, Tofu Vegetable, Temptation, Potato, Hummus, Tabooli, and Good Puddin', in addition to bottled plain and honey-vanilla soymilk. The salads are dated for 7 days and the sandwiches for 1 although they stay fresh for 2 days.

“To service their Bay Area accounts, Wildwood employs four drivers who ply four different routes, which often take them further north to Santa Rosa or south to Santa Cruz. The limit to fresh sandwich distribution, Paul Orbuch explains, is simply how far they can be transported after production and before 12 noon, the cut-off period as the lunch hour business is crucial to retail sandwich sales.

“Wildwood's distribution system also handles local natural foods products such as Grain Dance seitan, Evolutionary Bean's Not Cheesecakes, and Solar Tacos (with soy protein). Wildwood's line, states Orbuch, is now moving into supermarkets, their Brown rice and Tofu sandwich accounts for 30% of total sandwich sales, and their products are handled by at least two area college lunch concession stands. Wildwood has been noted for their novel pedal-powered Tofumobile which they use in the summertime to bicycle sandwiches around to stores in trendy Marin County.”

1549. *Soyfoods*. 1983. The soyfoods industry on display [at Natural Foods Merchandiser Expo in Anaheim, California and Whole Life Times Expo in San Francisco]. Summer. p. 7.

• **Summary:** Sixteen soyfoods companies exhibited at Anaheim to 7,600 paying visitors. “Six soyfoods companies shared an official Soyfoods Association booth, where they retailed their own products and provided liberal tasting samples as well. Participants included Legume Inc. (tofu pizza, tofu lasagna), Farm Foods (Ice Bean, in cones), Quong Hop (tofu burgers, tofu canolli, soymilk), Sonoma Specialty Foods (tofu salads, tofu cheesecakes), Laughing Moon (vegetable tofu turnovers), and San-Jirushi International (samples of San-J Real Tamari). The Association booth, one of 10 food catering booths at the Expo, was ‘packed solid through the whole show,’ reports Farm Foods' Robert Tepper.”

“William Shurtleff gave a one hour speech and slide presentation on soyfoods to an enthusiastic audience.”

Other interesting companies include: Pacific Tempeh, Light Foods, Essential Foods, Garden of Eatin', Living Lightly, Kibun, Westbrae Natural Foods, Edward & Sons, Cedarlane Foods, Morinaga, Worthington Foods.

Interesting products: Light Links tofu “hotdogs,” Ravioli, Tofumale Tamale, Tempehroni Pizza, Chili Con Tempeh, Tempeh Enchilada.

Photos (without captions) show: (1) Danielle Lin of Laughing Moon. (2) Steve Snyder of Hinode. (3) The Morinaga booth, with Mr. Seishiro Ikegami.

**1550. Product Name:** Oregon Country Soysage (Meatless Okara-based Sausage).

**Manufacturer's Name:** Surata Soyfoods.

**Manufacturer's Address:** 302 Blair Blvd., Eugene, OR 97402. Phone: 503-343-8434.

**Date of Introduction:** 1983 June.

**Ingredients:** Okara, organic wheat flour, yeast, oil, tamari, honey, mustard, allspice, pepper, cayenne pepper, fennel, garlic powder, sea salt, oregano.

**Wt/Vol., Packaging, Price:** 8 oz tub.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label, undated. Circular. Green, brown, white, and blue. “100% natural. 100% meatless. Ready to eat, or as patties, pizza garnish, in pasta sauce, scrambled with eggs or tofu, in stuffed mushrooms or peppers.” This was formerly “Devi’s Country Soy Sausage,” made by another nearby company. Surata discontinued the product in Aug. 1989.

**1551. Product Name:** [Torigoe Gold Tempeh (Semi-Prepared Fingers, or Patties)].

**Foreign Name:** Goorudo Tenpe / Gold Tempe.

**Manufacturer's Name:** Torigoe Seifun (Torigoe Flour Milling Co.).

**Manufacturer's Address:** 6-5-2 Hakozaki-Futo, Higashi-ku, Fukuoka, Kyushu 812, Japan. Phone: 092-651-3269.

**Date of Introduction:** 1983 June.

**Ingredients:** -

**New Product–Documentation:** See next 2 pages. Talk with and Label from Kazuhiro Takamine, from the R&D Dept. of Torigoe Flour Milling Co. Ltd. 1984. Feb. 5. This was Japan’s first commercial tempeh product, launched by Torigoe in June 1983. The ‘tempeh fingers’ were dipped into a batter, dusted with bread crumbs, packed in a shallow tray, together with 2 packets of tartar sauce, and sold frozen. The consumer would then deep fry them to serve crisp and crunchy with the sauce. The patties were made by pressing the ground trimmings from the patties into patties, then proceeding as for the fingers.

Five-page color brochure (in Japanese) titled “Torigoe Tempe.” Brought by Kazuhiro Takamine. 1984. Feb. 4. New product. Beloved in the 21st century, born from soybeans, 100% fermented natural food. Shows tempeh fingers, patties, and cubes—with recipes.

Shurtleff & Aoyagi. 1985. History of Tempeh. p. 66-68. Soya Bluebook. 1987. p. 95.

**1552. Product Name:** Supreme-Bean Tempeh Burger.

**Manufacturer's Name:** Wildwood Natural Foods.

**Manufacturer's Address:** 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

**Date of Introduction:** 1983 June.

**Ingredients:** Tempeh, whole grain bread, lettuce, celery, cucumber, green pepper, onion, tofu dressing (UFO Tofu by Wildwood, safflower oil, mustard, apple cider vinegar, garlic, sea salt), tomato sauce, mustard, tamari, lemon juice, spices, sea salt.

**How Stored:** Refrigerated.

**New Product–Documentation:** Soyfoods. 1983. Summer. p. 42-43. Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. “Fresh Daily. Ready to eat Foods, Naturally. Perishable. Keep Refrigerated.”

**1553. Product Name:** Natural Touch Tofu Garden Patties.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1983 June.

**Ingredients:** Water, tofu, isolated soy protein, carrots, peas, soy oil, flavorings (HVP, onion powder), spices, garlic powder, yeast, natural flavor, essential oil of paprika, turmeric, carrageenan.

調理メーカーは中に入っています。

**Wt/Vol., Packaging, Price:** 10 oz box contains 4 white patties. Retail for \$1.95 to \$2.37.

**How Stored:** Frozen.

**Nutrition:** Per 70-gm. patty: 11 gm. protein.

**New Product–Documentation:** See next page. Talk with Craig Klatt of Seventh-day Adventist Bookstore in Pleasant Hill, California. 1983. Aug. 8. This product is now on the market, with 4 white / unfried patties per package, retailing for \$1.95. Craig does not know who is the man behind this new concept or who makes the tofu.

Interview with Frank Poston. 1983. Dec. 16. This is the start of a new line developed for the health foods market. The Tofu Garden Patties were introduced in June 1983. Worthington bought all of the tofu equipment from Rising Sun Soy Farms in Columbus, Ohio, and are now making the tofu for the product at the Worthington plant in Ohio. The product was developed for the health food market, and will be part of the larger new Natural Touch line of products. More new products will be out in April 1984. This is a big and important new trend for the company and they plan to put a lot of energy and money into promoting it. Some (but not all) of the new products will contain tofu.

Worthington news release. 1984. May 25. Gives launch date as March 1984. Spot in Soyfoods. Summer. 1984. p. 45. "Prepared Patty Pair." Label, 4 color box. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Ad (full page, color photo) in Natural Foods Merchandiser. 1985. May. "Natural Wonders. Discover Natural Touch for something new in natural foods taste!" Shows color labels/packages for each of four entrées, including Okara Patties and Tofu Garden Patties.

Talk with Worthington Foods. 1992. Feb. 10. This product has been discontinued.

1554. Iggers, Jeremy. 1983. Soy Plant struggles to keep its '60s ideals in '80s business world. *Detroit Free Press*. July 31. p. 6G.

• **Summary:** About The Soy Plant in Ann Arbor, Michigan. Includes discussions with Steve Fiering, Rick Whealey, Jane Southwell, Geof Beck (production co-ordinator), Carolyn Roi (marketing co-ordinator), and Steve Fiering (one of the founders). Hours and wages have been cut—wages from \$5/hour to \$3.50/hour last fall because the business was losing money. Difficulties include inefficient equipment, too little capital, and lack of professional management. Federal corporate taxes went unpaid for three years before anyone noticed; it then took years to pay both the taxes and the penalty.

The company got about \$20,000 in loans from members of the community. They paid interest in the form of one pound of tofu a week, but the \$18,000 they eventually paid in free tofu was a huge drain on the struggling enterprise. Last may the workers decided the tofu interest payments had to stop. Letters were sent to all lenders explaining the

financial difficulties and offering three choices: They could forgive the debt, take payment of the principal in tofu, or put their names on a list for eventual repayment. It was a hard choice for the company to make.

Now things are looking up. Several new products are selling well: Tempeh-filled tacos, Soysage, tempeh burgers, and spiced tofu.

1555. Brightsong Light Foods. 1983. Handmakers of these fine light foods: Premium Tofu, Marinated Tofu, Cottage Salad, Missing Egg Salad... (Leaflet). Petaluma, California. 3 panels each side. Each panel: 22 x 9.5 cm.

(details on back)

# New! Tofu Garden Patties.™

Food experts agree ... tofu could become the next "yogurt" in consumer demand. We've taken all natural, high-protein tofu and made it even better by adding fresh garden vegetables. The result: a deliciously unique, all-natural food.

Your customers just defrost Tofu Garden Patties and serve them in sandwiches. They're equally good lightly breaded and crispy fried. Or crumble them on salads or in soups and casseroles. Delicious!

For natural foods consumers who want convenience, all-natural **and taste** ... Tofu Garden Patties satisfy. You'll be satisfied, too, with the special introductory offer.

The taste nobody can touch.

• **Summary:** The front panel of this leaflet, printed blue on white, lists 14 soy products made by the company. They are: Premium Tofu, Marinated Tofu, Cottage Salad, Missing-Egg Salad, Bright-Burger, Soysage, Chocolate Lite Mousse, Amaretto-Almond Lite&Creamy, Almond Lite&Creamy, Strawberry Diet DeLite, Orange Sunshine protein drink, Fresh&Light soymilk, Honey-Nilla soymilk, Maple-Maple soymilk.

The logo is a flying bird with a white throat. The slogan: “Where good taste and nutrition come naturally.” The inside three panels discuss: About Brightsong (since 1978). What makes Brightsong Tofu so special. About the other Brightsong products.

Note 1. This particular leaflet, which was sent to Steve Fiering, c/o The Soy Plant,... Ann Arbor, Michigan 48104, is postmarked 21 Jul 1983.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “Bright Burger” (or “Bright Burgers”). Address: P.O. Box 2536, Petaluma, California 94953. Phone: 707-778-8638.

1556. **Product Name:** [Tofu Balls (Ganmo), Tofu Pizza, Seitan Burger].

**Manufacturer’s Name:** De Vuurdoop.

**Manufacturer’s Address:** Warder 108, 1473 PG Warder, Den Haag, Netherlands.

**Date of Introduction:** 1983 July.

**New Product–Documentation:** Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. “She started in July 1983. The pizza is baked with a layer of smooth tofu on top, with tomato, olive, green pepper. Sells for 1.40 guilders/slice. Makes 800 units of tofu balls and pizza a week.” Letter from Sjon Welters. 1989. July 24. Vuurdoop is the company name. Lita Hoogervorst is the name of the woman who founded it and still runs it. The company sells other products now too (seitan and a lentil-based product; maybe no soyfoods), and has moved to Groningen or Friesland in the north of Holland.

1557. Guo, Xiang-ao. 1983. Research on heat denaturation of soy protein after solvent extraction, and traditional Chinese soy foods. *INTSOY Series* No. 25. p. 64-66. B.J. Irwin, J.B. Sinclair, and Wang Jin-ling, eds. Soybean Research in China and the United States (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Solvent extracted soybean flakes and meals (moisture content 9.6%) were subjected to 80°C, 90°C, and 100-105°C temperatures for 15 or 20 minutes. The critical temperature for protein denaturation was 80°C. At higher temperatures, solvent-extracted soybean meal was denatured more rapidly than soy flakes. Preparation of the following traditional Chinese soyfoods was described briefly: Soy sprouts (*dou ya*), soybean jiang (*dou jiang*), fermented black soybeans (*dou chi*), soy sauce (*jiang you*), soy beverage (*dou*

*jiang*), tofu (regular and soft, *doufu*), firm tofu (*doufu gan*), pressed tofu sheets (*doufu yi*), vegetarian chicken (*su ji*), fried tofu (*you-doufu*), fermented tofu (*doufu-lu*), and yuba (*doufu pi*).

Note: This is the earliest English-language document seen (Oct. 2012) that uses the term *doufu pi* (spelled in pinyin) to refer to yuba, which he describes as follows: “Soy beverage is poured into a shallow pan and heated slowly. A protein film forms on the surface. This film is rolled and dried until it resembles bamboo. The taste and composition are similar to textured soy protein. It is a very nourishing food.” Address: Zhengzhou Grain College, China.

1558. **Product Name:** Heartsong’s Tofu Turkey (also called Baked Veggie Loaf).

**Manufacturer’s Name:** Heartsong Tofu.

**Manufacturer’s Address:** Miami, Florida.

**Date of Introduction:** 1983 July.

**New Product–Documentation:** Soyfoods. 1983. Summer. p. 38. 16 oz.

1559. Norin Suisan-sho, Nosan Engei Kyoku, Hatasaku Shinko-ka. 1983. Daizu ni kansuru shiryō [Statistics concerning soybeans]. Tokyo, Japan. 157 p. 26 cm. [Jap]

• **Summary:** This yearly report, published by Japan’s Ministry of Agriculture, Forestry, and Fisheries (MAFF), is packed with detailed statistics on soybean production, trade, and utilization in Japan. The table on p. 129 gives statistics on miso production, shipments, and use of raw materials by prefecture and for Japan as a whole. In 1981 Japan produced 575,782 tonnes of miso and shipped 578,610 tonnes. Raw materials used were 14,417 tonnes of domestically grown whole soybeans, 167,539 tonnes of imported whole soybeans, 103,611 tonnes of polished rice, 24,667 tonnes of polished barley, 476 tonnes of defatted soybean meal, 71,325 tonnes of salt, and 96 tonnes of cornmeal (used mainly in Nagano and Hyogo prefectures). The top 5 miso producing prefectures were Nagano (164,510 tonnes; 28.6% of Japan’s total), Aichi (54,529), Niigata (38,156), Aomori (28,602), and Hokkaido (25,908). The source of these statistics is: Shokuryō-cho, Kakō Shokuhin-ka, Kome Mugi Kakō Shokuhin Seisan Dotai, Tokei Chosa.

The table on p. 130 gives similar statistics on shoyu for 1981. In 1981 Japan produced 1,190,618 kiloliters (kl) of shoyu and shipped 1,118,799 kl. Raw materials used were 6,473 tonnes of whole soybeans, 175,205 tonnes of defatted processed soybean meal (*dashi kakō daizu*), 177,407 tonnes of wheat, 204,777 tonnes of salt, and 80,642 kl amino acid liquid (*amino-san*, either purchased or made on site). The top 7 shoyu producing prefectures were Chiba (424,498 kl; 35.7% of Japan’s total), Hyogo (203,374), Aichi (59,201 kl), Kagawa (45,430 kl), Fukuoka (36,575 kl), Oita (31,860 kl), Mie (30,354 kl). The source of these statistics is the same as for the miso statistics, above.

The table on p. 132-33 gives statistics on consumption of shoyu (in 100 ml), miso (100 gm), whole soybean foods (yen), tofu (cakes = *cho*), aburagé and ganmodoki (yen), natto (yen), and other soyfoods (yen) from 1963 (Showa 38) to 1981. Under shoyu, miso, and tofu is given the amount of money spent (*kingaku*), the quantity purchased (*sûryô*), and the price. Annual shoyu consumption per household has decreased from 30.5 liters in 1963 to 16.3 liters in 1981. Annual miso consumption per household has decreased from 18.4 kg in 1963 to 12.1 kg in 1981. Tofu consumption per household has remained about constant, with 87.3 cakes in 1963 and 86.9 cakes in 1981. A breakdown is also given for each food by annual household income, with 5 income levels. One grouping is for all households (including those with a retired head of household or on welfare) and the other is only households with at least one working member. In each case, the higher the household income, the greater the consumption. In the case of tofu, for example, households with an annual income of less than 2.65 million yen consumed 76.1 cakes of tofu, while households with an annual income of more than 5.8 million yen consumed 99.3 cakes. Next is a breakdown by age of head of household. Generally, the younger the head of household, the less the consumption. In the case of tofu, households whose head was 24 years or younger consumed 55.5 cakes/year, while households whose head was age 60-64 consumed 95.4 cakes. The source of these statistics is the *Kakei Chosa Nenpo (Sôri-fu, Tôkei-kyoku)*.

The table on pages 134-35 shows consumption per household by geographical area of the same foods as the previous table. Geographical areas include: all of Japan, all cities, cities with 50,000 or more population (broken down into large, medium, and small), cities with less than 50,000 population, towns and villages (*machi* and *mura*), 14 major regions, and large cities. Note: Statistics by prefecture are not given. In the case of tofu, the highest consumption is cities with less than 50,000 population (92.0 cakes), while the lowest is in medium-sized cities with more than 50,000 population (84.2 cakes). The regions with the highest tofu consumption are Tohoku (the northeast prefectures; 101.9 cakes) and Chugoku (southwest provinces; 98.1 cakes), while the lowest two are Hokkaido (58.3 cakes) and Okinawa (72.3 cakes). The cities with the highest annual tofu consumption per household are Toyama city (118.9 cakes), Morioka city (118.4), Yamaguchi city (107.9), Matsuyama city (102.9), Fukushima city (102.8), Tokushima city (102.0), Fukui city (100.7). The source of these statistics is the same as for the statistics on p. 132-33.

Tables on pages 136-39 give a detailed nutritional analysis of soybeans and each of 23 soyfoods made in Japan. The following minerals are listed: calcium, phosphorus, iron, sodium, and potassium. Vitamins: A (retinol, carotene, international units), B-1 (thiamine), B-2 (riboflavin), niacin, and C. Soybeans grown in Japan contain, on average, 35.3%

protein and 19.0% fat, compared with 33.0% protein and 21.7% fat for soybeans grown in the USA, and 32.8% protein and 19.5% fat for soybeans grown in the China. Address: Tokyo, Japan.

1560. **Product Name:** [Baked Tofu Roti (Sausage Flavor, or Bacon Flavor)].

**Foreign Name:** Baked Tofu Roti (Saveur de Saucisse, or Saveur de Bacon).

**Manufacturer's Name:** Regal Naturel (Marketer). Made in Quebec by Unisoya.

**Manufacturer's Address:** Montreal, QUE, Canada.

**Date of Introduction:** 1983 July.

**Wt/Vol., Packaging, Price:** 8 oz vacuum packed.

**How Stored:** Refrigerated.

**New Product-Documentation:** Talk with Richard Milon. 1987. Dec. 11. He bought the tofu in bulk from Unisoya. Both products were sold vacuum packed.

1561. **Product Name:** Tempeh Burgers.

**Manufacturer's Name:** Soy Plant Co-op Inc. (The).

**Manufacturer's Address:** 711 Airport Blvd., Ann Arbor, MI 48104. Phone: (313) 663-8638.

**Date of Introduction:** 1983 July.

**New Product-Documentation:** Iggers, Jeremy. 1983.

*Detroit Free Press*. July 31. p. 6G. "Soy Plant struggles to keep its '60s ideals in '80s business world." Several new products are selling well, including tempeh burgers.

Soyplant pickup distributor price list effective April 16, 1984. Lists Tempeh Burgers, sold 3 per package or in bulk (50 singles).

1562. Worthington Foods, Inc. 1983. Worthington product catalog: Putting good taste into nutrition. Worthington, Ohio. 2 panels each side. Each panel: 28 x 21.7 cm. Undated.

• **Summary:** See next 2 pages. Contents: Canned and dry products (lists 27 products, each with a color photo). At the bottom of the page is printed: "Sound Nutrition / Delicious Taste / Free of Meat and Preservatives." Frozen products (lists 22 products, each with a color photo). Kaffree beverages (lists 6 products, each with a color photo). Kaffree is a caffeine-free coffee substitute made from roasted malt barley, roasted barley, and roasted chicory. Kaffree Tea is also available. Address: Worthington, Ohio 43085.

1563. Klatt, Craig. 1983. Update on Worthington Foods and other Seventh-day Adventist companies making soyfoods (Interview). *SoyaScan Notes*. Aug. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Worthington Foods is now stronger than ever. They are expanding into new, more natural products, such as Tofu Garden Patties (their newest product), as part of their Natural Touch line. They plan to develop more new products in this line. Worthington bought back their company

## FROZEN PRODUCTS

### 1 Meatless "Chicken" Style

Like white meat of chicken. Delicious in sandwiches, casseroles, gravies, cream sauce, soups, salads and more.  
Packed: Slices, 8 oz. packages/12 packages per case; Roll, 4 lb. rolls/4 rolls per case; Diced, 5 lb. bags/4 bags per case.  
Stock No.: 8 oz. packages #26403; Roll #26419; Diced #26412.

### 2 Chic-Ketts®

A unique texture, delicious flavor. Serve breaded and deep fat or pan fried. Also ideal in casseroles, soups, chow mein and more.  
Packed: 1 lb. rolls/12 rolls per case; 56 oz. rolls/4 rolls per case.  
Stock No.: 1 lb. roll #26504; 56 oz. roll #26506.

### 3 "Chicken" Style Pie

Combines chicken-like cubes with fresh vegetables and creamy sauce inside a flaky crust.  
Packed: 8 oz. pie/24 pies per case.  
Stock No. #26503.

### 4 "Beef" Style Pie

Combines beef-like cubes with fresh vegetables and creamy sauce inside a flaky crust.  
Packed: 8 oz. pie/24 pies per case.  
Stock No. #26303.

### 5 Chik Stiks™

Golden brown outside, tender chewy inside... unique "drumstick" shape, delicious chicken-like flavor.  
Packed: 10 oz. cartons/12 cartons per case; 15 lb. carton.  
Stock No.: 10 oz. cartons #26441; 15 lb. #26448.

### 6 Wham™

A scrumptious ham-like flavor with fewer calories and much less fat. Delicious as cold cuts and fried or baked. Casseroles, too.  
Packed: Slices, 8 oz. packages/12 packages per case; Roll, 72 oz. rolls/4 rolls per case.  
Stock No.: 8 oz. packages #26603; Roll, #26619.

### 7 Stakelets®

Gourmet flavor, tender texture. Excellent main entrée or sandwich... great for cookouts. Just heat and serve.  
Packed: 10 oz. cartons/12 cartons per case; 20 lb. carton.  
Stock No.: 10 oz. carton #27704; 20 lb. #27705.

### 8 FriPats®

Flavor and texture make this a super meatless sandwich. Just heat and serve.  
Packed: 9 oz. cartons/12 cartons per case; 17 lb. carton.  
Stock No.: 9 oz. carton #27804; 17 lb. #27807.

### 9 Fillets™

Savory fish-like flavor and texture. Just heat and serve for a meal or a sandwich.  
Packed: 9 oz. cartons/12 cartons per case.  
Stock No.: #27604.

### 10 Tuno®

Tasty tuna-like flavor and tender texture. Great for a "Tuno-salad" sandwich or baked in your favorite casserole.  
Packed: 12 oz. rolls/12 rolls per case.  
Stock No.: #27903.

### 11 Meatless Salami

A great sandwich alone or a really good beginning for a "Super Sandwich."  
Packed: Slices, 8 oz. cartons/12 cartons per case; Roll 4½ lb. rolls/4 rolls per case.  
Stock No.: Slices #26924; Roll #26936.

### 12 Corned "Beef" Style

Serve in sandwiches (a delicious Reuben), salads, soups, casseroles, and hors d'oeuvres.  
Packed: Slices, 8 oz. packages/12 packages per case; Roll, 72 oz. roll/4 rolls per case.  
Stock No.: Slices, 8 oz. #26103; Rolls, #26116.

### 13 Smoked "Beef" Style

Adds savory flavor to sandwiches, soups, casseroles, salads, hors d'oeuvres.  
Packed: Slices, 8 oz. packages/12 packages per case; Roll, 72 oz. rolls/4 rolls per case.  
Stock No.: Slices #26203; Roll #26216.

### 14 Smoked "Turkey" Style

A turkey-like flavor that's sure to please. Serve plain and in casseroles, salads, soups, sandwiches.  
Packed: Slices, 8 oz. packages/12 packages per case; Roll, 4 lb. rolls/4 rolls per case.  
Stock No.: Slices #27103; Roll #27116.

### Prosage®

Scrumptious sausage-like flavor available in links, patties or roll.

### 15 Prosage® Patties

Packed: 8 oz. cartons/12 cartons per case.  
Stock No.: #26802  
1½ lb. bulk #26803.

### 16 Prosage® Links

Packed: 8 oz. cartons/12 cartons per case.  
Stock No.: #26804  
19½ lb. bulk #26815

### 17 Prosage® Rolls

Packed: 1 lb. rolls/12 rolls per case.  
Stock No.: #26806.

### 18 Stripples®

Crisp up in minutes. These bacon-like strips are great for breakfast, in sandwiches and as a flavor enhancer in casseroles and salads.

Packed: 5 oz. packages/12 packages per case.

**Foreign Name:** Vegemix Pyorykka Ainekset, Murekekastike, Spagettikastike.

**Manufacturer's Name:** Vegemix.

**Manufacturer's Address:** Finland.

**Date of Introduction:** 1983 September.

**Ingredients:** Meatball Mix: Soybeans, herbs, egg white, vegetable oils, salt.

**Wt/Vol., Packaging, Price:** Respective retail prices: 10.73, 10.88, and 8.36 Fmk.

**How Stored:** Shelf stable.

**New Product–Documentation:** Food Report (Lehmann). 1983. Sept.

1569. Leviton, Richard. 1983. Société Soy, France’s largest tofu manufacturer (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. Unpublished manuscript. See Oct. 16.

• **Summary:** This tofu plant in Cerny, the largest in France, is distinguished for its dairy style machinery innovations. Bernard Storup is the 4th generation of a cheesemaking family; his brother, a cheese specialist, went to cheese school. Societe Soy uses 6 workers two days a week to produce 5,000 lb/week of tofu and 10,000 Tofu Croques

(burgers) in 6 flavors. Burger sales are rising rapidly, and may hit 20,000 by Dec. 1983. Both products are vacuum packed for a 3 week shelf life, refrigerated. They use the “tofu” spelling and Soy not soja for the company name so they could trademark both in France. They plan to replace their Takai W30-C system with dairy style equipment. The new equipment has curd tanks on a raised platform; the curds flow into a 4x12 foot stainless steel shallow bed trough. One or two large pneumatic presses press the whole lot, then it gets cut all at once. The company reached break-even after 12 months. Their tofu wholesales for 14 French francs/kg which is \$0.80/lb. Breakeven is 2,000 lb/week of tofu. Bonneterre distributes 40% of their tofu. Bonneterre started in 1963 but in 1980 nearly went bankrupt and was acquired by a large dairy company [Triballat].

Societe Soy began production in Sept. 1982. France has at least 5 other tofu manufacturers, whose weekly output combined is about 3,500 lb. Paris, then the Marseilles, Mediterranean Coast, are the best markets in France for Tofu, and the typical customer is female, educated, age 25-35. The 13,000 Japanese and 200,000 Chinese in Paris can't get enough tofu. Paris has 3-5 small tofu producers, but sprouts are their main line. Societe Soy tofu has 12.3% protein, 24 day shelf life with hot packing at 60°C, no cooling tank involved, pasteurization after vacuum packing in vertical steam tank. The company is energetic, professional, and quite aware of sanitary procedures and the need for appropriate packaging. The future of tofu is believed to lie in mixing it with other foods, possibly meat or cheese, or to follow the Asiatic example of using strong spices. Tofu needs a strong, memorable flavor. Americans have been too strict in their essentially vegetarian approach to formulating soyfoods.

For financing, Bernard got 25,000 francs then 60,000 francs from banks for a novel business plan competition that he won twice. His total initial investment was 250,000 francs or US\$30,000; half of this came from the government. Address: Colrain, Massachusetts.

1570. Owen, David. 1983. Freezer shock. *CalToday*. Oct. 23. p. 13-16.

• **Summary:** About Rich Products' Freeze Flo, which allows (for example) frozen strawberries to be soft and sweet and firm at temperatures far below freezing. “When Bob Rich graduated from the University of Buffalo, his father gave him \$5,000. Bob used the money to make a down payment on a dairy. He disliked the milk business as intensely as his father did, but he wanted to assert his independence.

“During World War II, Rich worked for the War Production Board and was appointed milk administrator for the state of Michigan. His job was to divert excess milk supplies to thirsty American soldiers. One day he paid a visit to the George Washington Carver Laboratory, a research institution endowed by Henry Ford. The laboratory's

principal activity was supplying Detroit's Ford Hospital with a product Rich had never seen before: milk made from soybeans.

“In a certain sense, Henry Ford's career can be viewed as a plot to eradicate large domestic animals. Having rendered the horse obsolete with his automobile, he had now set out to eliminate the cow. Carver scientists spent their days striving to realize their benefactor's vision of a cattle-free society. Periodically Ford threw parties for journalists at which he served nothing but milk, ice cream, hamburgers, cheese and other foods made from soybeans. He even built a soybean car.

“Ford's antagonism toward cows struck a chord in Robert E. Rich. Bob Rich, after all, was a second-generation hater of the dairy business.

“I'd always said that the cow was the most inefficient manufacturing plant in America,' he explains. 'Its product is 87 percent water, and it's high in bacteria, and it has to be pasteurized...'

“In November 1944, he founded Rich Products Corp. to manufacture his invention, converting his dairy's garage into the production plant for the world's first non-dairy whipped topping. Its name: Whip Topping.

“At first, Rich distributed Whip Topping to the customers on his milk routes, billing it variously as ‘the Miracle Cream from the soybean’ and ‘Gold from the Soil.’ The early months were not a fabulous success. ‘We were not chemists,’ an employee later admitted. But gradually Rich refined his formula, and in 1946 he was invited to make a sales presentation to a refrigerated-food distributor on Long Island. He packed some samples in dry ice and newspaper and took the overnight train to New York.

“The following morning, while 50 salesmen looked on, Rich took out his samples and discovered with horror that they had frozen solid. He began to perspire. Cow's cream, he knew, would not whip after freezing. ‘I thought briefly about telling them I had brought them all together to unveil a great way to keep newspapers cold.’ He stalled for as long as he could, then borrowed a knife and hacked nervously at his frozen soybean cream until he could fit the pieces into a mixing bowl. He held his breath. ‘It whipped to perfection.’

“No one was more surprised than Bob Rich. But he had the presence of mind to realize that he had done more than escape from a potentially embarrassing situation: He had invented the world's first frozen non-dairy whipped topping. That meant that his market was no longer limited to Buffalo. Now he could sell Whip Topping anywhere in the world. Quite by accident, Rich Products Corp. had entered the age of frozen food.”

1571. **Product Name:** [Soja Tartex Ravioli {Canned}].

**Manufacturer's Name:** Dyna S.A.

**Manufacturer's Address:** Fribourg, Switzerland.

**Date of Introduction:** 1983 October

**Wt/Vol., Packaging, Price:** 500 gm can.

**New Product–Documentation:** R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 17. Product seen in a Reform House health food store in Zurich, Switzerland.

1572. Leviton, Richard. 1983. The soy deli case. *Whole Foods (Berkeley, California)*. Oct. p. 27-28.

• **Summary:** “The Hinode Tofu Company of Los Angeles recently propelled the industry years by running a series of full page, full color ads for their branded tofu in regional editions of *Good Housekeeping*, *Weight Watchers*, *Runner’s World*, *Bon Appetit*, and the *Los Angeles Times* (circulation: one million). Their ad included a 15¢ discount coupon (eight million were printed in total). Edward & Sons has been advertising its Miso-Cup instant soups and Miso+Plus Chive and Jalapeno dry miso dips in national trade and consumer publications. And Farm Foods, with their expanding line of Ice Bean soy ice creams (hard packed and soft-serve) recently launched a cooperative advertising and discount program in cooperation with retailers...”

The Real Food Store on Polk Street in San Francisco has introduced what is probably the first distinctly labeled soy case. It consists of a self-standing reach-in cooler filled with about 34 different soyfood products, from bulk and packaged tofu to soymilk and tempeh burgers.

“At press time, Bread & Circus, a leading natural foods retailer in Boston, was planning a week-long soy promotion in cooperation with a half dozen Bay State producers... Elsewhere, Tree of Life, Florida’s \$35 million distributor and manufacturer, designated August as Soyfoods Month and ran promotions in their 60-page monthly newsletter sent to their 2,000 accounts. Soyfoods were presented as that month’s ‘Super Specials’ with ‘deep pocket discount’ for retailers, reports Morris Shriftman, vice president.” Address: Colrain, Massachusetts.

1573. Leviton, Richard. 1983. Soyfoods in your kitchen: The variety is infinite! *Your Good Health: Review & Digest* 1(6):16-18. Oct.

• **Summary:** An introduction to tofu and tofu products, tofu main dishes, tofu desserts, tempeh, miso, soysage, “green soybean pods in plastic bags,” soynuts, natto, Hamanatto, and yuba.

Gives recipe names and ideas for each soyfood type, but no actual recipes. Concludes with the thought: “If you remember this diversity of applications of tofu and tempeh... never again will you comment, ‘Tofu is nice but it’s just a bland white block.’” Address: Colrain, Massachusetts 01340.

1574. Prescott, Helen. 1983. Okara: A meal for the asking. *Mother Earth News* No. 83. Sept/Oct. p. 36-38. [4 ref]

• **Summary:** Defines okara, tells how to use it and where to get it, and describes how to make 1 gallon of soymilk and ½

gallon of okara (with photos). Contains recipes for: Okara treats. Crunchy carobola. Apple anarchy. Soyburger supreme. Raisin-soy cookies. No-meat sausage rolls. Okara corn bread. Lists 3 books that contain additional information.

1575. *Kansan (The) (Kansas City, Kansas)*. 1983. Natural cooking aids KCK [Kansas City, Kansas] family in health. Nov. 9.

• **Summary:** David and Cindy Briscoe, who run the Macrobiotic East West Center [at 4321 Main St.] in Kansas City, Missouri, have been practicing macrobiotics for almost 5 years, with their two children Justin and Nora. They make Brown Rice–Tofu Burgers, and a recipe is given. A photo shows Cindy at a table with an all-natural meal including brown rice–tofu burgers.

Note: David published the first Soyfoods newsletter. He healed himself of a longtime severe schizophrenic problem and Thorazine dependency by changing to a macrobiotic diet. The story of his dramatic, almost miraculous recovery is told in his 1989 book “A Personal Peace: Macrobiotic Reflections on Mental and Emotional Recovery” (Japan Publications).

1576. Leviton, Richard. 1983. Long summary of trip to Europe sponsored by the American Soybean Association (Interview). *SoyaScan Notes*. Nov. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Discusses: Euvepro in Italy, ASA in Italy, Alpro / Vandemoortele, British Arkady, the confusion of mung beans and soybeans, tofu made from soy protein isolates that doesn’t develop a spongy texture when frozen, regulatory restrictions, Bernard Storup, tofu burgers, Prolait, Le Bol en Bois, ASA soybean program in England, desire in Eastern Europe for more meat, the many small private businesses in Hungary, Soyana’s excellent products (Daenzer makes 5,000 lb/week of tofu in Switzerland), the Reformhaus chain, Vietnamese tofu shop in Dornach, less refrigeration at the distribution and retail levels in Europe has led to new packaging, soyfoods have started to appear in the big international food trade shows in Europe (e.g. ANUGA). Witte Wonder opened in 1981, now makes 1,000 lb/week of seitan. Cauldron Foods (UK) makes mostly tofu burgers, and has a lot of good technical innovations such as control panels. Cauldron also makes a fermented tofu spread. Dragon & Phoenix (UK) makes several tons of tofu a day. In July Wolfgang Furth-Kuby and Lucas Kelterborn (Germany) published the first issue of a European soyfoods newsletter titled *Rundbrief*. Paul Jones (UK) has 2 plants and makes 5,000 lb/week of tofu. One man from Cauldron Foods was Paul Jones’ original partner. Full of Beans also makes miso.

Oct. 28. “I have an all morning meeting at ASA’s headquarters in Brussels, Belgium, with Dennis Blankenship, Rita Batens, Roger Leysen, and Michael Martin. It is proposed that I chair the 1984 First European Soyfoods

Conference to be held in late September, probably in Amsterdam. ASA agrees to be a sponsor and to help secure another 6 or so sponsors. ASA also agreed to finance the production and mailing of a bi-monthly European Soyfoods Newsletter.”  
Address: Colrain, Massachusetts.

**1577. Product Name:**

Fearn Tofu Mixes  
[Breakfast Patty Mix, Sesame Burger Mix, Brazil Nut Burger Mix, or Sunflower Burger Mix].

**Manufacturer's Name:** Fearn Natural Foods.

**Manufacturer's Address:** -

**Date of Introduction:** 1983 November.

**New Product–Documentation:** Spot with photo in Whole Foods. 1983. Nov. “Fearn Tofu Mixes.” “Four new Burger Mixes from Fearn Foods are low-calorie alternatives to meat burgers, are high in protein and fiber and easy to prepare... Mixes cup for cup with mashed tofu.”

**1578. Product Name:** Tofu Turkee (Meatless Turkey Made with Tofu).

**Manufacturer's Name:** Garden of Eatin' (Formulator and Distributor).

**Manufacturer's Address:** 5300 Santa Monica Blvd., Los Angeles, CA 90029.

**Date of Introduction:** 1983 November.

**Ingredients:** Tofu (coagulated with calcium-sulfate), soy sauce, soy oil, vinegar, honey, herbs, hickory smoke.

**Wt/Vol., Packaging, Price:** 9 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1983. 5.5 by 2.75 inches. Paper. Black on tan. “100% Vegetarian.” Soyfoods Newsletter. 1984. Jan. p. 1. A firm slab of the tofu is marinated then baked.

1579. Leviton, Richard. 1983. Brief history of Cauldron Foods Ltd. (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 26-27. Unpublished manuscript.

• **Summary:** Based on an interview with Philip Marshall and Peter Fagan. These two men started their partnership in Cauldron Foods in Sept. 1981. Philip was previously a partner with Paul Jones, and at the time he joined with Peter he was already a Bristol tofu maker selling some tofu in bulk to the converted. They spent 12 months searching for

premises. They now make 1,200–1,500 lb/week of tofu, all in one day. They started business doing burgers and tofu, handed out leaflets, and did recipe demos for shops. They prepared and served tofu quiche, cheesecake, mayo, and burgers.

The company was built on the burger. In 1982, selling 6,000 burgers a week, they reached plant capacity in their old 350 square foot plant and in Feb. 1983 they moved to their present location 1,200 square foot plant in Bristol. In 1981 there were 17 natural food stores in Bristol. Today (11/83) there are 24, more per capita than anywhere else in England. In Jan. 1984 Cauldron Foods and Bean Machine (from Wales) will host an all-day meeting in Bristol to form a Tofu & Soymilk Producers Association for England. The main item on the agenda is to take action on “burger” as a product name. Address: Colrain, Massachusetts.

1580. Leviton, Richard. 1983. Visit with Christian Daems and Philippe Vandemoortele at Alpro, Izegem, Belgium. Oct. 28 (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 21. Unpublished manuscript.

• **Summary:** Vandemoortele doesn't like soy protein isolates in soymilk because of their poor image. A good tasting plain soymilk is possible if it is properly made. Isolate-based foods don't have the old basic food Oriental image. They also don't like isolates because, if the product's sales become large, the dairy industry will jump on the isolates for fakery and low quality. If used in place of dairy, the product would be called 100% synthetic. So not using isolates is a defensive measure. Codex Alimentarius (in Feb. 1984) will look at this issue. They may allow the term “soymilk” if a product is made from whole soybeans, but “soy drink” if it is made from isolates.

Alpro is opening a new soymilk plant in Ghent in Feb. 1984—the biggest in the world. They will make a 100% natural product from liquid and powder. [Note: Alpro never

ended up making the powdered soymilk, says Philippe Vandemoortele 9/91.] This soymilk plant will have a sewage treatment system to recover all the water. The okara will be sold to the mixed feed industry. They will try to make soymilk powder at the same price as subsidized dairy milk and sell the powder for reconstitution. Alpro soymilk will be sold in supermarkets by Sept. 1984. They want high margins, will do promotions, and plan new products. Vandemoortele uses 50,000 tons of soybeans every 2 weeks [for all products, not just soymilk]. Alpro uses organically grown beans from France to make soymilk for Lima Foods in Belgium; these are 100% more expensive than regular soybeans. They will look to the USA and Asia for more markets for this output since the European market is too small. They will focus on areas that have a protein shortage or lactose intolerance. They have sold one turnkey soymilk plant to Madagascar. Alfa-Laval has not sold any soymilk plants recently due to currency problems.

Europe is such a bad market for soymilk, in part because of the many languages. With 10 European countries and languages, labeling requirements make it very complicated to market one food uniformly. Alpro sells more soymilk in north Belgium than in the south. There are more macrobiotics and more money in the north. This is typical for Europe as a whole with natural foods.

At ANUGA, British Arkady received lots of interest in their soymilk made from soy protein isolates, and health foods interest in their soy proteins. It is a Tetra Pack soymilk in raspberry, banana, and strawberry flavors. They exhibited meats and biscuits using isolates. A.E. Staley was pushing isolates for bakery uses.

Michael Martin of the American Soybean Assoc. explains European regulation problems. Soymilk is taxed at 17% when it is traded in the EC. This Value Added Tax (VAT) would be only 6% if soymilk were reclassified as a health food instead of a liquid, powder, or paste. The VAT varies by country but is usually higher on beverages. Dinner with Martin at Le Paradoxe, a natural foods restaurant in Brussels. They serve “croquettes de soja, tofu brochette, and Tofu Ganmo (2 burgers). There are 6 natural foods restaurants in Brussels and all use tofu. The Japanese wanted Alpro to do their soymilk in Europe. They started soymilk in 1975 with the idea of bringing alternative vegetable sources to developing countries.

Vandemoortele’s sales are now \$600 million/year. In 1936 Philippe’s grandfather imported Manchurian soybeans for crushing in Europe. Vandemoortele, which now competes with Unilever in margarine, has a high level of expertise in R&D.

“We sample Alpro soymilk. One tastes thin, metallic, then gives a fatty mouthfeel. Another with sugar and vanilla is too sweet. I’m not impressed with them.

“Philippe is about age 35 and macrobiotically oriented in diet. Very confident, perhaps overly.”

The tofu market is completely different from that of soymilk. Tofu is all education work and no comparison of products. With soymilk, there is comparison, but no education work needed. Philippe and Christian are concerned that most of the low-tech soyfoods industry and retailers in Europe are unskilled, small, and unprofessional. They don’t want the average public to associate their soymilk with this vegetarian style. They want it to be seen not as a special food, but for everyone.

The European vegetable protein industry made a classic blunder. They put soy steaks in German supermarkets in the 1970s using TVP from British Arkady and ADM. Address: Colrain, Massachusetts.

1581. Leviton, Richard. 1983. Brief history of Soyana and Walter Daenzer (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 19-20. Unpublished manuscript.

• **Summary:** Based on an interview with Walter Daenzer. Soyana is Switzerland’s largest tofu company. Soyana’s factory and office are at two very different locations in Zurich. Daenzer, who first became familiar with soy in New York City, has been a vegetarian for 15 years. He first saw soy as textured meats. The company began in 1980, when they started to re-package sell TVP in consumer-size in Zurich. He did 1-3 demos/week that year. “De Gustation” then published his first cookbook about soy protein.

In Sept. 1981 he started to plan tofu production, then on 1 Feb. 1982 he began to produce tofu, and now produces about 6,000 lb/week (2,727 kg/week) of very firm tofu with 13% protein. Of this, it sells about 40 kg/month in bulk to the University of Zurich. The company, which has 5 production and 3 office employees, makes tofu 3 days/week and burgers 1 day/week. They use a Takai W30C system. Daenzer didn’t want to use water-filled tubs for packing the tofu, so he uses a Tiromat form-fill-seal vacuum packer that gives tofu a 2-week shelf life (dated), but could actually go to 3 weeks.

Soyana also makes several shelf-stable tofu spreads and dips, packaged in tins, pasteurized, with a 6-month shelf life. “Zurich has the most innovative, dynamic people in Switzerland, I am told, with an international atmosphere; there is a widespread interest in trying new foods.” Soyana displays the Biona symbol (a “Y”) on its products in recognition of having passed the inspection by the federation of Swiss Reform Houses (about 400 shops). Biona is an association of Reform House stores, “VRSD,” with 400 members, called in Swiss the Assoc. of Swiss Reform & Diet Specialty Stores. It corresponds to West Germany’s Neufarm which has 2,500 members. Only one-half of these shops have refrigeration facilities. The Soyana brand is sold only in Biona stores, whereas Soyana’s Sojaquelle brand is sold elsewhere. The “*Bioladen*” stores are more like American natural foods stores. There are 60 of these in Switzerland; they are environmentally oriented, political, and holistic.

Soyana's director says that Migros, Switzerland's leading supermarket chain with about 2,000 stores and 70-80% of Swiss food sales, is likely to sell tofu, but under its own label and possibly manufactured in-house. Migros has a bad reputation among food manufacturers, because Migros often starts selling a company's product, then if it becomes successful they make their own product and drop the original manufacturer. Co-op is the second largest Swiss food chain. Meanwhile, Soyana is active presenting cooking classes on tofu, has published two tofu cookbooks (each has sold 10,000 copies), and have a third at the printers, *Tofu Kur* (actually it ended up being titled *Schlank mit Tofu*) in full color, a weight-loss book with 127 low-calorie tofu recipes. It should be out in Nov. 1983. Weight Watchers International contributed 30 recipes to the book.

In April 1982 Daenzer tested Tetra Pak soymilk using taste panels and got good reports. The milk was made using his Takai system and flavored with honey. The Swiss Milk Industry Assoc. protested, asking the Tetra Pak company to stop working with Soyana, and they did. 95% of all Swiss milk is in Tetra Pak cartons so if people see a soymilk in such a carton they assume it is dairy milk. Address: Colrain, Massachusetts.

1582. Leviton, Richard. 1983. Brief history of Sojalade (*Die Genossenschaftstofurei*) and Verena Krieger's work with soyfoods in Switzerland (Document part). In: R. Leviton. 1983. Report of Trip to Europe with American Soybean Assoc. 82 p. See p. 17-19. Unpublished manuscript.

• **Summary:** Based on talks with Verena Krieger. Sojalade in Ottenbach was renamed Genossenschaftstofurei in 1982. It is an 8-member cooperative that makes 400-500 kg/week of tofu and services the Zurich-Lucerne market. The company started in Aug. 1981 in a small laundry room in Zurich then moved downstairs to a butcher shop with a tile floor on the ground floor of a 300 year old home. Elsewhere in the building is a co-op cafe. They use a BMI Mini Mite disintegrator, double steam jacketed kettles, an Erme Verpackungen vacuum packer (2 chamber, 1 lid), and a ratchet press.

Zurich is the best and biggest market in Switzerland. The country's population is only 6 million. They even sell some tofu by mail-order. Their tofu is sold in some dairy stores (Molkerei/Laiterie), specialty produce stores, 10-12 Japanese or Chinese restaurants, 4 vegetarian restaurants, and health food outlets. The Reform Houses are a chain of 500 outlets in Switzerland stemming, at least in spirit, from the days of Dr. Bircher-Benner and his natural nutrition reform ideas. Tofu is strong in Switzerland because of this established health foods tradition and the country's general affluence. Sojalade works with local farmers to grow organic ("biological") soybeans, without herbicides. In 1982 some 2 tons of soybeans were produced biologically and another 4 tons by conventional means. Maple Arrow and Giesso (from

Germany) are the best suited varieties. Fiskeby gave low yields.

Soyana sells its tofu throughout Switzerland, while Marty Halsey services Geneva. Hans Opplinger in Cham is not a company. An English guy, Jean Spearing, is starting a shop named Tofurei Pfannenstiel in Maennedorf. In Bern, the macrobiotic group, Infinity, will start making tempeh and seitan mainly for use in their restaurant. [Note: This later became Berner Tofurei.] In Thuisis, someone makes 5 kg/week of tofu. Susan Gerber is converting a dairy into a tofu shop. [Note: It never was finished.] A friend of Verena's, Gauthier Loeffler, sells 200 tofu burgers one day a week in the Zurich open market.

Letters from Verena Krieger. 1990. July 5 and Aug. 10. In 1989 this company's name was changed from Genossenschaftstofurei to Tofurei Genossenschaft Engel, because the former name was not acceptable to Swiss trade regulations. The present manager is Peter Martmer. Mr. Hans Opplinger never owned a company making soyfoods in Switzerland, but he is still a member of Tofurei Genossenschaft Engel in Ottenbach. The company has never sold soymilk (despite a listing in Soya Bluebook, 1984, p. 63). Address: Colrain, Massachusetts.

1583. Shurtleff, William; Aoyagi, Akiko. 1983. Tofu & soymilk production. 2nd ed. Lafayette, California: Soyfoods Center. 344 p. Illust. by Akiko Aoyagi Shurtleff. Index. Nov. 28 cm. [223 ref]

• **Summary:** Some information in Chapter 1, Appendix A, and many advertisements have been changed. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1584. **Product Name:** [Tofu, Spring Rolls (with Meat, or Vegetables), Tofu Burger, Soya Cakes, Soy Sprouts].

**Foreign Name:** Tofu, Fruehlingsrollen (mit Fleisch oder Gemuese), Tofu Burger, Sojakuchen, Soya Sprouts.

**Manufacturer's Name:** Thieu's Soja Spezialitaet.

**Manufacturer's Address:** Kirchgartenweg 20, CH-4143 Dornach (near Basel), Switzerland. Phone: 06-172-8831.

**Date of Introduction:** 1983 November.

**New Product-Documentation:** Richard Leviton. 1983. Report on trip to Europe with American Soybean Assoc. p. 18. Thieu (or Tieu) The Van is a Vietnamese tofu maker in Dornach near Basel. According to a newspaper report dated 9 Sept. 1983 his was a "boat people" family that came from Saigon in 1979. He makes *Fruehlingsrollen* ("spring rolls" with meat or vegetables), tofu, tofu burgers, *Sojakuchen* [Soya Cakes], and Soya sprouts. Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Thieu's Soja Spezialitate, Kirschgartenweg 20.

Letter (fax) from Verena Krieger. 1990. May 31. This company cannot be located.

1585. **Product Name:** [Tofu, Marinated Tofu, Tofu Ice

Cream, Tofu Burgers].

**Manufacturer's Name:** Tofurei Ebner.

**Manufacturer's Address:** Obere Oedlitzerstr. 8A, A-2560 Berndorf, Austria. Phone: 026-723-507.

**Date of Introduction:** 1983 November.

**How Stored:** Frozen.

**New Product–Documentation:** Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Owner: Guenter Ebner.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. This company started in Nov. 1983. It merged with Erich Wallner's company, Soyarei, in 1984 in a new location in Baden, where the company is still located. Before the merger the company made tofu, marinated tofu, soy ice cream (a small amount), and tofu burgers.

1586. Poston, Frank. 1983. Worthington is now making tofu and Tofu Garden Patties as part of their new Natural Touch line (Interview). *SoyaScan Notes*. Dec. 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tofu Garden Patties is the start of a new line developed for the health foods market. The Patties were introduced in June 1983. Worthington bought all of the tofu equipment from Rising Sun Soy Farms in Columbus, Ohio, and are now making the tofu for the product at the Worthington plant in Ohio. The product was developed for the health food market, and will be part of the larger new Natural Touch line of products. More new products will be out in April 1984. This is a big and important new trend for the company and they plan to put a lot of energy and money into promoting it. Some (but not all) of the new products will contain tofu. Address: Director, Product Marketing, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

1587. *SoyaScan Notes*. 1983. Chronology of soybeans, soyfoods and natural foods in the United States 1983 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 16. Larry Needleman decides to sell Bean Machines. Looking for a buyer. Jan. 24. "Legume, Company Finds Niche Selling Frozen Foods Made with Tofu," published by The Wall Street Journal.

Feb. *Soyfoods* magazine No. 8 published by Richard Leviton. Blue cover, 5,000 copies

Feb. 6-8. Sixteen soyfoods companies exhibit at the Natural Foods Expo. in Anaheim, California. A new trade association named Soyfoods Association of America (SAA) is formed; it is basically a restructured version of the original Soyfoods Association of North America, which was founded in July 1978 and which now ceases to be active. SAA elects a new board of directors; Michael Austin is chosen new Executive Director and Gary Barat of Legume becomes new President. Fourteen companies pledge \$12,000. Headquarters

established in New York City.

Feb. 7. The First Great Tofu Burger, a dry mix, made in Oakland, introduced at Anaheim Natural Foods Expo.

Feb. 18. Wm. Shurtleff has idea for forming a Soy Sauce Council to help encourage soy sauce companies to join Soyfoods Association, develop soy sauce terminology and standards, and eliminate mislabeling.

Feb. Jack's Beanstalk, innovative tofu company in Salt Lake City, goes out of business.

March 10. *Soyfoods Industry and Market: Directory and Databook 1983* published by Soyfoods Center, accompanied by glossy flyer and catalog of professional publications and services.

March 10. *Tempeh Primer*, by Juel Andersen and Robin Clute, published.

March 14. Connecticut Agricultural Experiment Station, in Bulletin 810 "Quality of Tofu and Other Soy Products," reports high bacterial and coliform counts. A virtual expose, revealing the tofu industry's erratic quality control, it gets wide media coverage and hurts sales of New England and New York tofu companies.

March. Hinode Tofu Co. starts major tofu ad and coupon campaign, with full-page ads in four national magazines. Most extensive national publicity ever done for tofu. Triggers lawsuit from a rice company over the Hinode brand, with which Hinode Tofu Co. is subsequently forced to part.

April 27-30. Six soyfoods companies exhibit at Whole Life Expo in San Francisco, as part of Soyfoods Association's booth. Shurtleff presents a speech and color slide show.

April. Hartz Seed Co. is purchased by Monsanto.

May. *The Au Naturel Tofu Manual*, by Chloe & Abraham Fox self-published in Canada. Vol. 1 is *Tofu Recipes for Families*. Vol. 2 is *Modern Jewish Tofu Cooking*.

May 3. Michael Austin mails out Soyfoods Association Charter Member letter. By year's end \$18,000 in membership fees had been raised.

May 4. Richard Leviton decides to move to California.

May 8-11. Hinode Tofu Co. exhibits five flavors of Tofu Parfait at the prestigious and influential Food Marketing Institute convention in Chicago, a major national supermarket convention, attended by 20,000.

May 9. Dr. Hwa L. Wang of USDA NRRC speaks on "Tofu and Tempeh as Potential Protein Sources in the Western Diet" at the American Oil Chemists' Society symposium on "Potential New Protein Sources" in Chicago.

May 16. Quong Hop & Co. introduces the first Soy Deli cooler display case to Raley's supermarkets in Reno and Sacramento. In July they introduce the idea to Safeway supermarkets in California. By August there are Soy Delis in ten Safeway supermarkets in the San Francisco Bay Area.

May 18. The New York Times article on "Bacteria in Soy Products" as a follow-up on the Connecticut tofu contamination report.

May 24. Wm. Shurtleff leaves for China for three weeks to study soyfoods, sponsored by Danish Turnkey Dairies; the first trip for this purpose since Dr. A.K. Smith of the USDA went there in 1949. Shurtleff writes 75-page report on *Soybeans and Soyfoods in China: 1949-83*. After China, Wm. and Akiko Shurtleff spend 3 weeks studying the soy milk industry and market in Japan.

May 31. Leviton and Wang speak on the soyfoods industry at Iowa State University conference on grains and legumes.

June. Worthington Foods introduces Tofu Garden Patties, developed for the health food market as part of a larger new line of natural food products, all sold under the Natural Touch brand. This is a new trend for the company and they commit money to promoting it. In 1984 they launch Okara Patties (which contain okara as the 4th ingredient).

June. *Quantity Tofu Recipes for Institutions & Restaurants*, by Gary Landgrebe published by Soyfoods magazine and Fresh Press.

June. *The Magic of Tofu*, by Jane O'Brien of Ireland published by Thorsons in the UK.

June. *Tofu: Not Just for the Health of It*, by Jana H. Crutchfield self-published.

June. *Handbook of Indigenous Fermented Foods*, edited by Keith H. Steinkraus, published by Marcel Dekker. Extensive original material on traditional soyfoods. It soon becomes a classic.

June. *Soyfoods* magazine No. 9 published, 7,000 copies. *Soyfoods Newsletter* published in new typeset, 4-page format with new design.

June. Torigoe Seifun, Japan's fifth-largest flour miller, starts production of tempeh. This is the earliest known commercial tempeh ever made in Japan.

July 1. Quong Hop & Co. purchases Pacific Tempeh Co.

July. INTSOY publishes *Proceedings of the First China/USA Soybean Symposium*, held July 1982 at the University of Illinois.

July 3-Aug. 22. Richard Leviton in England, lectures on soyfoods in London and Leicester, and does some soyfoods research.

July 25. Soyfoods Association meeting in Denver. Tom Timmins, president of Tomsun Foods Inc. (one of the companies seriously affected by negative publicity on tofu quality) is asked to be head of the Soyfoods Association's Standards Committee, and to appoint people to work with him on the development of standards, especially tofu standards. In October he sends a 4-page survey letter concerning soyfoods standards to the 18-person Soyfoods Association Standards Committee that he has appointed.

July 28-Aug. 2. Second US/China Soybean Research Symposium, held in Jilin, China

July. NNFA show in Denver. Eden Foods surprises the natural foods industry by launching designed-for-America Edensoy in plain and carob flavors. Made in Japan by

Marusan-Ai and exported by Muso, it is packed in a 6-ounce retort pouch. San-J's To-Neu brand soy milk is also debuted in Tetra Brik cartons.

Eden Foods is the first Caucasian-American company to import soy milk, and their gamble soon pays off; sales skyrocket, sparked by an extensive magazine advertising campaign. Between Sept. and Dec. 1983 over 1 million packs are sold. A host of competitors rush to follow Eden's lead... and many of them go to Muso. Eden objects.

July 31. Fifth Anniversary of the founding of the Soyfoods Association of North America.

Late July. Hot, dry summer weather heats up the price of soybeans from \$6/bu to over \$9.50/bu in August and September, falling back to \$8 in December.

Aug. 15. *Time* magazine article on stylish ice creams has a paragraph on Tofutti soy ice cream.

Aug. 15. Delegation of four soyfoods experts from People's Republic of China spends 5 hours at The Soyfoods Center. First stop of the first Chinese soyfoods team to visit the USA.

Aug. 15. Soyfoods Center makes the first photocopy of the entire Log of the Dorsett-Morse Expedition to East Asia, 1929-31. 6,170 pages. The only original is owned by the American Soybean Assoc. in St. Louis.

Aug. Farm Foods serves Ice Bean soy milk ice cream at the American Soybean Association convention in Nashville, Tennessee.

Sept. Legume in New Jersey, in their second public stock offering in 15 months, raises an additional \$400,000 (\$300,000 net).

Sept. Continental Soyfoods, run by Pat Aylward in Minneapolis, goes out of business.

Sept. 9. Richard Leviton leaves Massachusetts, moves Soyfoods magazine to Encinitas, California. But he decides to leave there a week later.

Sept. 21. New Ten Speed Press edition of *The Book of Miso*, by Shurtleff and Aoyagi published. Extensively revised. Shows miso consumption in U.S. has increased 300% since 1975.

Sept. 25. Open House at new headquarters of Soyfoods Center for 30 people, including Nancy Dailey, who is writing a major story on soybeans for *National Geographic* magazine, and for Richard Leviton, newly arrived in California. Shurtleff shows color slides of soyfoods in China.

Sept. 26-Oct. 1. Symposium on "Soybean in Tropical and Subtropical Cropping Systems" held at Tsukuba, Japan. About 200 people attended. Proceedings were published in 1985.

Sept. 28. Soyfoods Center buys its first computer and begins computerization, which soon leads to development of the world's three largest computerized databases focusing on soyfoods and the soybean industry—from which this chronology is compiled.

1588. Daenzer, A. Walter. 1983. *Schlank mit Tofu: 177 Schlankheitsrezepte. Die Tofu-Kur: gesund und lecker* [Slender with tofu: 177 weight-loss recipes. The tofu cure: healthful and delicious]. Zurich, Switzerland: Verlag Bewusstes Dasein. 249 p. Illust. No index. 21 cm. [Ger]  
 • **Summary:** The 177 tofu diet recipes contain calorie counts. With contributions by Dr. Hecht (Chief physician at the Vita Sana Kurklinik, Lugano), Anita Zimmerman (Nutritional advisor to the city of Zurich), Indu Tamborini (Soyana test kitchen in Zurich), and Annelis Rickli (Test cook for Weight Watchers Organization in Geneva). Contains 42 Weight-Watchers recipes.

Note: Richard Leviton noted during a visit with the author in Nov. 1983 that this book was originally planned to be titled *Tofu Kur* and was scheduled to be published in one month.

Contents: 1. A book for becoming slim, healthy, and happy. With a photo of Dänzer. 2. Facts about tofu. 3. "It would be ideal to eat tofu 2-3 times a week." 4. Organic tofu in high-quality diet therapy. 5. Slender, fit, healthy, and happy. 6. The "tofu treatment & cure." 7. My favorite recipe (four cooks). 8. The production of organic tofu in the Zurich-based firm of Soyana "The Secret of Perfection Flames." 9. 127 diet recipes with tofu: Salads, soups, cutlets and steaks, toasts and burgers, omelets and scrambled eggs, vegetables stuffed with tofu, tofu with vegetables, tofu omelets, gratins and quiches, tofu sauces and dips, tofu cocktails and spreads, tofu dessert feasts (cremes, shakes, puddings, etc.; Schlemmerei). 10. 42 Weight Watchers diet recipes with tofu: Soup, pasta, burgers and snacks, sauces, main dishes, desserts and sweets, breads. Address: Soyana, CH-8039 Zurich, Switzerland.

1589. **Product Name:** Legume Light & Natural Tofu Entrees: Vegetable Lasagna.  
**Manufacturer's Name:** Legume, Inc.  
**Manufacturer's Address:** 91 Roseland Ave., Caldwell, New Jersey.  
**Date of Introduction:** 1983 December.  
**Wt/Vol., Packaging, Price:** 12 oz.  
**How Stored:** Frozen.  
**New Product–Documentation:** Label. 1983. 8.5 by 10.5 inches. Paper. Green, red and black on white. Color photo of Vegetable Lasagna surrounded by vegetables. Contents includes sauce. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Spot in *Soyfoods*. 1984. Summer. p. 42. Poster. 1987. "Forbidden Foods (aren't forbidden any more). Legume Frozen Entrees have less than 300 calories, are all natural—and have no cholesterol at all!" At some point this product was renamed Classic Lasagna. In March 1988 that 16 oz product retailed for about \$4.29 while Stouffer's Lean Cuisine veal lasagna (10 oz) sold for \$2.59 (equivalent to \$4.14 for 16 oz), and Celentano Lasagna (16 oz) cost \$2.49 (Record [Hackensack, New Jersey], March 7).

1590. **Product Name:** [Granix Nutrisoja Textured Soy Flour for Breaded & Fried Cutlets].

**Foreign Name:** Granix Nutrisoja para Milanesas.

**Manufacturer's Name:** Alimentos Granix.

**Manufacturer's Address:** Av. San Martin 4625 (C.P. 1602), Florida, Provincia de Buenos Aires, Argentina.

**Date of Introduction:** 1983.

**Ingredients:** Incl. Defatted soybeans.

**Wt/Vol., Packaging, Price:** 250 gm plastic bag.

**New Product–Documentation:** Manufacturer's brochure.

1989? "Granix por excelencia." A color photo shows the package label. On the front is a color photo of the foods on a plate. Letter and Label sent by Jorge Manrique of Alimentos Granix. 1990. July 13. This product was introduced in 1983. A small one-sided red and black leaflet is titled CEAPE: Nutrisoja para Milanesa. Above this is the logo of Colegio Adventista del Plata. It describes: How to prepare these breaded and fried cutlets. Other applications. Composition. "The Nutrisoja Milanesa is a texturized product with defatted soy flour and without additives (*agregados*). It contains more than 40% protein and a low percentage of fat (1.5%). It is made by the Adventist College of the Plata, Commercialization Dept., Marshall 99, 3103 Villa Libertador San Martin, Entre Rios."

Note: La Plata is the capital of Buenos Aires province in Argentina. Rio de la Plata, called the River Plate in English, is the estuary formed by the combination of the Uruguay River and the Paraná River. It is a funnel-shaped indentation on the southeastern coastline of South America, between Argentina and Uruguay. extending 290 kilometers (180 mi) from the rivers' confluence to the Atlantic Ocean.

1591. Amrit, The Oakland Siddha Meditation Ashram. 1983. A vegetarian restaurant (Leaflet). Oakland, California. 2 panels each side. Each panel: 21.5 x 9.5 cm. Undated.

• **Summary:** Printed with brownish-red ink on off-white paper. "The Ashram is connected to the Amrit Restaurant..." Soyfoods menu items include: Tofu burger. Tempeh burger. Weightwatcher (Tofu or tempeh burger). Tofu salad melt. Tofu salad.

On one panel is a quotation from Swami Muktananda: "Food is the essence of life. It is through food that a person is born. He lives by food too. Therefore, food should be treated with love and respect." Address: 1107 Stanford Ave. at San Pablo, Oakland, California 94608. Phone: 415-655-8677.

1592. **Product Name:** Soy Tempeh Burger.

**Manufacturer's Name:** Creative Soyfoods Inc.

**Manufacturer's Address:** 526 N. Clark St., River Falls, WI 54022.

**Date of Introduction:** 1983.

**Ingredients:** Tempeh, pure vegetable oil, garlic, sea salt, spices.

**Wt/Vol., Packaging, Price:** 5 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label. 1983, undated. 2.5 by 4.25 inches. Black on white. “Deep fried to a delicious golden brown. Ready to eat.”

1593. **Product Name:** Tempeh Burger.

**Manufacturer’s Name:** Cricklewood Soyfoods.

**Manufacturer’s Address:** Route 1, Mertztown, PA 19539.

**Date of Introduction:** 1983.

**New Product–Documentation:** Ad in CRC Reports. 1987. Fall. p. 15. Talk with Karl Krummenoehl. 1988. Jan. 4. This is soy tempeh with spices marinated in soy sauce. Launched in about 1983.

1594. **Product Name:** Soysage (Meatless Okara-based Sausage) [Regular, or Hot & Spicy].

**Manufacturer’s Name:** Golden Soy Foods Inc.

**Manufacturer’s Address:** P.O. Box 495, Athens, OH 45701.

**Date of Introduction:** 1983.

**Ingredients:** Regular: Okara (soy fiber from organic soybeans), whole wheat flour, wheat germ, corn oil, shoyu (water soybeans, wheat, salt), nutritional yeast, garlic powder, molasses, mustard, oregano, fennel seed, sage, salt. Hot & Spicy adds red cayenne as the last ingredient.

**Wt/Vol., Packaging, Price:** 1 lb plastic wrapped.

**How Stored:** Refrigerated.

**Nutrition:** Per 1.5 oz.: Calories 120, protein 5 gm, carbohydrates 14 gm, fat 5 gm, sodium 29 mg.

**New Product–Documentation:** News release. “A great protein alternative.” Domitz. 1986. Messenger (Athens, Ohio). June 1. “Soysage offers a healthful alternative.” Ellers. 1986. Plain Dealer (Cleveland, OH). Dec. 21. “Vegetarian’s work rooted in low-calorie soy products.”

Label. 1987. Self adhesive. 3.5 by 8.5 inches. Self adhesive. Blue, yellow, and white. Hot & Spicy: Blue, yellow, white and pink. “Vegetarian. All Natural. Very Low Sodium. Ready to Eat. Slice and fry for breakfast and sandwiches. Use in lasagne, spaghetti, chili, tacos, burritos & casseroles.”

1595. **Product Name:** Five-Grain Tempeh, Soy Rice Tempeh, and Tempeh Burgers.

**Manufacturer’s Name:** Imagine Foods, Inc.

**Manufacturer’s Address:** Moniteau Farm, Jamestown, MO 65046.

**Date of Introduction:** 1983.

**New Product–Documentation:** Talk with Robert Nissenbaum. 1988. Jan. 5. David Carlson and Ken Sloan were the early tempeh makers.

1596. **Product Name:** [Fried and Marinated Tempeh Burger (Round), Tempeh Cubes (¼ inch), Tempeh Spreads/Pâtés].

**Foreign Name:** Temmo, Fruutjes, Tarzan Tempeh Pâté.

**Manufacturer’s Name:** Jakso. Center for Agriculture & Craftsmanship. (Also/later called Yakso Farms).

**Manufacturer’s Address:** Voorn 13, 6624 KL Heerewarden, Netherlands. Phone: 088-772-189.

**Date of Introduction:** 1983.

**New Product–Documentation:** Letter from Sjon Welters. 1989. July 24. “Yakso started to produce tempeh in 1982,

as far as I can remember. The fried and marinated tempeh products were developed by themselves and introduced in early 1983, if I recall well. I developed their tempeh spreads in the summer of 1983 and they were introduced that fall. The sauces mentioned in the Soya Newsletter contained no tempeh.” Letter from Sjon Welters. 1989. Aug. 9. Describes the three products.

1597. **Product Name:** [Ganmo, Tofuburger].

**Foreign Name:** Ganmo, Tofuburger.

**Manufacturer’s Name:** La Soyarie.

**Manufacturer’s Address:** 25 rue St. Etienne, Hull, QUE, J8X 1H5, Canada.

**Date of Introduction:** 1983.

**Ingredients:** Ganmo: Tofu, carrots, onions, sunflower seeds, yam, sea salt. Deep-fried in sunflower oil. Tofuburger: Same + herbs and spices

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1983. 3 patties per package.

1598. **Product Name:** New World Tempeh Burger.

**Manufacturer’s Name:** New World Enterprises. Renamed New World Natural Foods in 1985.

**Manufacturer’s Address:** 226 Cypress St., Brookline, MA 02146. Phone: 617-232-5973.

**Date of Introduction:** 1983.

**New Product–Documentation:** Talk with Emily Merghart. 1989. Aug. 18. This product was introduced 6 years ago. The tempeh burger itself was made for her by 21st Century Foods. This product has been discontinued.

1599. **Product Name:** [Nutana Tofu Bolognese].

**Foreign Name:** Nutana Tofu Bolognese.

**Manufacturer’s Name:** Nutana Helsekost.

**Manufacturer’s Address:** Ringstedvej 531, DK-4632

Bjaeverskov, Denmark.

**Date of Introduction:** 1983.

**Ingredients:** Incl. Tomatoes, tofu, margarine, vegetable bouillon.

**Wt/Vol., Packaging, Price:** 440 gm can.

**How Stored:** Shelf stable.

**Nutrition:** Per 100 gm.: Calories 90, protein 4.5 gm, carbohydrate 6 gm, fat 5.5 gm.

**New Product–Documentation:** Manufacturer’s catalog.

1981. Nutana Helsekost. 19 p. Contains a photo of and

detailed information about every product. Label for cans.

1983. 9.5 by 4.25 inches. Paper. Red, yellow, green black and

white. Color photo of Tofu Bolognese on red background.

Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods

Center. Labels in Danish, Dutch, and Finnish.

1600. **Product Name:** [Nutana Tofu Kinagryde].

**Foreign Name:** Nutana Tofu Kinagryde.

**Manufacturer’s Name:** Nutana Helsekost.

**Manufacturer’s Address:** Ringstedvej 531, DK-4632

Bjaeverskov, Denmark.

**Date of Introduction:** 1983.

**Ingredients:** Tofu, vegetable bouillon, vegetable margarine.

**Wt/Vol., Packaging, Price:** 435 gm can.

**How Stored:** Shelf stable.

**Nutrition:** Per 100 gm.: Calories 60, protein 2.5 gm, carbohydrate 4 gm, fat 4 gm.

**New Product–Documentation:** Manufacturer’s catalog.

1981. Nutana Helsekost. 19 p. Contains a photo of and

detailed information about every product. Label for cans.

1983. 9.5 by 4.25 inches. Paper. Red, green, yellow, black

and white. Color photo of Tofu Kinagryde. Reprinted in

Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Labels in Danish, Dutch, and Finnish.

1601. **Product Name:** Pacific Soy Soysage (Mild Italian Style, Spicy Mexican Style).

**Manufacturer's Name:** Pacific Soyfoods.

**Manufacturer's Address:** 6644 Sexton Dr., N.W., Olympia, WA 98502-9551. Phone: 206-866-9661 or 206-866-9246.

**Date of Introduction:** 1983.

**Wt/Vol., Packaging, Price:** 8 oz. or 16 oz.

**New Product–Documentation:** Product with Label purchased in Berkeley, California. 1988. Aug. 30. Listed in Fowler Brothers' catalog. 1991. Jan. p. 64. 5 products in 3 flavors.

Talk with Peter Lesser of Northwest Natural. 1991. Feb. 8. These two flavors of Soysage were introduced in 1983.

1602. **Product Name:** Sanitarium Health Foods Swiss Rounds (Vegetarian).

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1983.

**Ingredients:** Textured vegetable protein, vegetable oil, rolled oats, onion, whey protein concentrate, thickeners, flavours, yeast extract, salt, sugars, herbs and spices, water added.

**Wt/Vol., Packaging, Price:** 430 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Letter and Label sent by Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1983.

1603. **Product Name:** Tempeh Burger, Hi-Pro Burger (Marinated Tempeh Burger), Tempeh-Tofu Burger.

**Manufacturer's Name:** Soy Power (Marketer/Distributor).

Made in South San Francisco by Quong Hop & Co.

**Manufacturer's Address:** 2811-A Ocean Park Blvd., Santa Monica, CA 90405.

**Date of Introduction:** 1983.

**Ingredients:** Hi-Pro Tempeh Burger: Soy tempeh from organically grown soy beans, shoyu, oleic safflower oil, lemon juice, natural hickory smoke, herbs and spices.

**Wt/Vol., Packaging, Price:** 7 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1983. 3 inch diameter. Self adhesive. Dark brown and white on lighter brown. "100% Natural. High in Protein. No Cholesterol. Hi-Pro Tempeh Burgers may be eaten fresh from the pack or steam 6 minutes in a covered pan with 5 tablespoons water sprinkled around burger. Serve in pocket bread, garnished with your favorite burger type trimmings (tomato, alfalfa sprouts, onion, etc.)." Talk with Kevin Cross. 1988. Sept. 22. Introduced in about 1983.

1604. **Product Name:** Tempeh-Taco.

**Manufacturer's Name:** Soyplant Co-op Inc. (The).

**Manufacturer's Address:** 211 East Ann St., Ann Arbor, MI 48104. Phone: (313) 663-8638.

**Date of Introduction:** 1983.

**Ingredients:** Tempeh, tomatoes, tomato sauce, soy sauce, peanut oil, sesame oil, garlic, molasses, spices.

**Wt/Vol., Packaging, Price:** 12 oz.

**New Product–Documentation:** Label in Soy Plant scrapbook from about 1983. 3 by 2 inches. Red on white. 12 oz.

1605. **Product Name:** Tempehroni.

**Manufacturer's Name:** Soyplant Co-op Inc. (The).

**Manufacturer's Address:** 211 East Ann St., Ann Arbor, MI 48104.

**Date of Introduction:** 1983.

**Ingredients:** Tempeh, tomatoes, tomato sauce, soy sauce, peanut oil, olive oil, garlic, molasses, spices.

**Wt/Vol., Packaging, Price:** 12 oz.

**New Product–Documentation:** Label in Soy Plant scrapbook from about 1983. 3 by 2 inches. Green on white. 12 oz.

1606. **Product Name:** Sweet Earth Fiesta Rice Vegeburger.

**Manufacturer's Name:** Sweet Earth Natural Foods.

**Manufacturer's Address:** 597 Lighthouse Ave., Pacific Grove, CA 93950. Phone: 408-375-8673.

**Date of Introduction:** 1983.

**Ingredients:** Incl. tofu.

**Wt/Vol., Packaging, Price:** 12 oz vacuum packed.

**New Product–Documentation:** Listed in Fowler Brothers' catalog. 1991. Jan. p. 74. Talk with Russel Hicks of Sweet Earth. This product was introduced in 1983.

1607. **Product Name:** Pasta Pals (Tofu-Gluten Meatballs).

**Manufacturer's Name:** Vegetable Protein Co.

**Manufacturer's Address:** 140 River St., Cambridge, Massachusetts.

**Date of Introduction:** 1983.

**Ingredients:** Proprietary.

**New Product–Documentation:** Letter from John Weissman. 1992. June 27. In 1983 John invented Pasta Pals, a tofu-gluten meatball (which contained no seitan). He discontinued it when Lipton Tea Inc. brought the trademark from him in late 1984. Lipton still owns the registered trademark.

1608. **Product Name:** Tempeh Burger.

**Manufacturer's Name:** White Wave.

**Manufacturer's Address:** 1990 North 57th Court, Boulder, CO 80301.

**Date of Introduction:** 1983.

**Ingredients:** Soy tempeh (made with cultured soybeans organically grown in accordance with the California Health

and Safety Code, section 26569.11), soy sauce, garlic, onion, spices.

**New Product–Documentation:** Spot in Soyfoods. 1984. Summer. p. 43. Shurtleff & Aoyagi. 1985. History of Tempeh. p. 54. By 1984 this was the company's best-selling tempeh product, followed by frozen soy tempeh, soy & rice tempeh, then 5-grain tempeh. In May 1988 the round Soyfoods Unlimited Meatless Burger was merged into this product, but using the Soyfoods Unlimited Label with the juicy glazed burger and the two onion rings floating above it. The full title of the new label now reads: White Wave Tempeh Burger. Marinated Soy Tempeh. All the Sizzle... None of the Steak. Ready to eat in 1 minute. Pareve.

1609. Azumaya Inc. 1983. Tofu! New way to serve the world's oldest meat substitute. Meet the bean that thinks it's meat. San Francisco, California 94124. 1 p. Undated. 21 x 43 cm.

• **Summary:** This two-color poster is printed yellow and white on brown. To the left is a yellow soybean cartoon character (registered trademark), whose two arms are held up in a gesture of joy, legs are short and feet are oval. His big smile comes up to the level of his eyes and eyebrows. Below him is written in white: "Hi! I'm li'l soy." In the lower right corner: "Write for recipes. Send self-addressed stamped envelope to: Consumer Services, Azumaya Inc." Beside the address is the Azumaya company logo: The letter "A" inside a sort of four-leaf clover with four arrows pointing at it. Address: 1575 Burke Ave., San Francisco, California 94124.

1610. Fujimori, Ikuo. 1983. Daizu. Shizen kindaabukku [Soybeans. Natural children's book]. Tokyo: Fureberu-kan K.K. 30 p. Illust. by Akira SETO. 26 cm. [Jap]

• **Summary:** A children's book with superb color illustrations. Shows how to make natto, tofu, and soy sprouts at home. A large color photo (p. 10-11; 2-page spread), titled "All made from soybeans," shows kinako, miso, shoyu, soymilk, yuba in a bowl of clear soup, ganmodoki, aburage, cooked whole soybeans (*nimamé*), okara sauteed with vegetables, dengaku (made with tofu and miso), and atsu-agé. Address: Daizu kairyo no dai-ichi ninsha [President, Takeya Miso Co., Nagano, Japan].

1611. Greenberg, Kathryn. 1983. Re: Okara. Letter to William Shurtleff at Soyfoods Center. 2 p. Handwritten, with signature.

• **Summary:** She enjoys making her own tofu and soymilk at home, starting with soybeans. These are usually just occasional winter projects when her goats are dry. On the odd occasions when she's shared the okara with lactating goats, it has made a fine increase in their milk production. She thanks us for the idea.

She recently met Suzanne and David Greenslade who put on a tempeh fest for her. Using tempeh, they made her

a delicious mock chicken salad, sloppy joes, deep-fried tempeh, etc.

1612. Harper, Cretia. 1983. Tofu, I love you: Recipes for a healthy heart. British Columbia, Canada: Wings Publications. 43 leaves. Illust. No index. 22 cm.

• **Summary:** At the top of the cover is written: "A beginner's guide to using and loving tofu." Contents: Dedication and acknowledgements. Forward: A love story. Did you know...? About these recipes. Before you begin. About marinades. About these recipes. Before you begin. About marinades. Basic blended tofu. Tofu dip variations. Tofu mayo and dressing. Shake 'n' broil coating mix. Basic scrambled tofu. Main dishes. Tofu burgers, hot dogs, sandwiches. Salads. Soups. Sweets. Beverages. A special note to parents. About the author.

Cretia and her family live on Vancouver Island, BC, Canada, where she is a natural foods consultant and educator—and a devout Christian. Address: 3053 Jenner Rd., Victoria, BC, Canada.

1613. Jaffrey, Madhur. 1983. Eastern vegetarian cookery. London: Jonathan Cape. xii + 531 p. Illust. by Susan Gaber. Index. 24 cm.

• **Summary:** This is an expanded version of *Madhur Jaffrey's World-of-the-East vegetarian cookery* (1981, New York). The author of this creative book, a woman, was born in British India on 13 Aug. 1933. She first became known as an actress in India, but later found fame as a food writer. She has lived in America for more than 20 years. She presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Soy-related recipes include: Aubergine slices with white miso (Japan, p. 4-5). Green beans with soy sauce (Japan, p. 20). Cabbage with miso (Japan, p. 29). Lotus root with soy-sauce dressing (Korea / Japan / Hong Kong, p. 46-47). Yellow pumpkin cooked with soy sauce (Japan, p. 74-75). Fresh soy beans, steamed (China, p. 76, with "fresh green soy beans in their pods"). Yien Koo's Spinach with fermented bean curd (China, p. 78-79). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; Indonesia, p. 87). Tempura (with tofu; Japan, p. 89-92). Soy bean sprouts (how to grow, p. 119). Soy-bean and mung-bean sprouts seasoned with sesame oil (Korea, p. 123-24). Tempeh, Fried tempeh, Fried, pre-seasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (Indonesia, p. 127-30). Thai fried rice (with red fermented tofu, p. 176).

Chapter 4 (p. 187-221), titled "Soy milk, bean curd, and wheat gluten," contains the following: Introduction to each ingredient. Soy milk (making your own at home). Making your own bean curd. Udofo (Yudofu, simmering bean curd with seasonings, Japan). Bean curd with watercress (Singapore Chinese). Bean curd with fresh coriander (Taiwan). Korean-style bean curd in a hot water bath. *Hiya-*

*yakko* (Chilled bean curd, Japan). Bean curd with broccoli (Hong Kong). Cabbage cooked with bean curd (Japan). Bean curd with a deliciously spicy sauce (China). Carrots and beans with a bean-curd dressing (Japan). Bean curd, mushrooms, and peanuts in hoisin sauce (Chinese style). Sautéed bean curd (Korea). Tofu dengaku (Toasted bean curd with a miso topping, Japan). Fried bean-curd cubes (Most of East Asia). Soy-bean sprouts sautéed with fried bean curd (China). Fried bean curd with a sweet-and-sour sauce (China). Fried bean curd cakes with a mustard surprise (Japan). Inari-zushi (“Bags” of fried bean curd stuffed with sushi rice, Japan). Pressed bean curd with cabbage (China). Salad of pressed bean curd, mung-bean sprouts, and agar-agar (China). How to make fried and baked wheat-gluten balls. Stew of baked wheat gluten, potato, turnip, carrot, and cabbage rolls (Japan, p. 215). Fried wheat gluten with broccoli, carrot, and mushrooms (China). Fried wheat gluten and potato stew (Indian style). Shredded wheat gluten and Cabbage with fennel seeds (Indian style). Buddha’s delight (A mixed Chinese stew, Hong Kong; with yuba, fried tofu, and fried wheat gluten balls).

Chawanmushi (Steamed savory custards, with tofu; Japan, p. 223-26). Omelette with bean curd (Japan, p. 230-31). Soy-sauce eggs (Thailand / China, p. 245). Paneer (Fresh cheese from cow’s milk; India, p. 277-78). Hot or cold noodles with a soy-sauce dressing (China, p. 288). Noodles with a hot-and-sour bean sauce (China, p. 290). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs; Thailand, p. 296-97). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 298-99). Hoppers (yeast pancakes; Sri Lanka, p. 315). Roti (Flat whole-wheat bread; India, p. 320). Delicious stock made with soy-bean sprouts (p. 340). Clear soup with mushrooms, bean curd skins [yuba], and spinach (Japan, p. 346). Clear soup with soft bean curd and Chinese leaves (p. 346). Miso soup with bean curd (Japan, p. 357). Miso soup with carrots and mushrooms (Japan, p. 358). Fried, munchable soy beans [soynuts] (China, p. 373). Potato and tempeh patties (Indonesia, p. 394). Dipping sauces (with soy sauce, p. 414-17, incl. *kochu chang*—Korean soy sauce). Kombu relish (with soy sauce; Japan, p. 435). Shoyu daikon (White radish pickled in soy sauce; Japan, p. 436). Ginger quick-pickled soy sauce (China, p. 436). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; Japan, p. 438-39). Chinese-style jellied bean-curd sweetmeat with a peanut topping (Singapore, p. 462-63).

General information [like a glossary] (p. 481-506): See: Bean curd (regular, fried, fermented {*fu-ju*, *nam-ye*, *tao-hoo-ye*, red bean curd}, pressed {*doufu kan*}, pressed seasoned {*pai doufu kan*}, dried bean-curd skin or yuba). Beans (azuki, soy). Bean sauce (made from fermented soy beans). Chilli paste with soy bean (and garlic). Hoisin sauce. Miso. Nam yee (see Bean curd, fermented). Nigari. Soy beans, fresh. Soy-bean sprouts. Soy milk. Soy sauce (incl. Japanese,

Chinese dark and light, Japanese usukuchi, Indonesian ketjap manis). Tao Hoo Yee (see Bean curd, fermented). Tempeh. Yuba. Sources (of ingredients; p. 507-10). Address: New York City, NY.

1614. Otsuka, Shigeru. 1983. Encyclopedia of Japan: Tōfu. San Francisco and Tokyo: Kodansha International. See vol. 8, p. 35. [Eng]

• **Summary:** (bean curd). Tofu is said to have been first made by the Chinese 2,000 years ago and introduced to Japan in the 7th century. Describes briefly how tofu is made and the different types of tofu. Aburaage and namaage are made by frying tofu from which excess water has been pressed. Gammodoki is made the same way, with bits of carrot and sesame seeds added. Koridofu is made by freezing and drying tofu. Okara, the substance left after extracting the liquid *tōnyū*, has a unique texture and flavor. Yakidofu is made by toasting squares of bean curd made firm by extracting excess water. The *Tofu Hyakuchin*, a cookbook written during the Edo period (1600-1868) lists 100 methods of cooking tofu. It can be used in soups or sukiyaki. As yudofu, it is kept warm in a pot of hot water and seasoned with a dipping sauce of soy sauce, minced scallion, and spices. As hiyayakko, it is eaten the same way but chilled. As dengaku tofu, it is covered with a miso mixture and broiled. Address: Japan.

1615. Soy Power Co. 1983. Everything you wanted to know about tofu—But were afraid to ask (Leaflet). Santa Monica, California. 2 panels each side. Each panel: 14 x 11 cm.

• **Summary:** Contains basic information about tofu, 6 recipes, and a list of Soy Power products: Silken tofu, Chinese tofu, Pressed tofu, Savory baked tofu, Whatta salad, Fiesta salad, Hi-Pro tempeh burger, and Non-dairy soymilk (Plain, Carob & honey). Printed with purple ink on light gray paper. Soy Power’s logo is a pyramid. Address: 2811-A Ocean Park Blvd., Santa Monica, California 90405.

1616. Spivack, Ellen Sue. 1983. Beginners guide to meatless casseroles. Berkeley, California: Ross Books. 43 p. \* Address: P.O. Box 4340, Berkeley, California 94704.

1617. Tofu Shop (The). 1983. The Tofu Shop: We make our own tofu fresh daily (Ad). Arcata, California.

• **Summary:** This black-and-white ad (3¼ by 6½ inches) was run in local papers. In a vertical panel to the left, in Japanese characters, is written: *Shinsen na tōfu* [“Fresh tofu”].

The ad text reads: “Hot tofuburgers. Salads. Desserts. Baked goods. Coffee, tea, juices. Open daily 8 to 8.

At the bottom an illustration by Bernice Kagan (left) shows a small tofu shop on stilts on a cliff by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead.

Note from Matthew Schmit. 2009. April 2. The Japanese

characters were written by a Japanese foreign exchange student at Humboldt State University. Address: 768 18th St., Arcata, California 95521. Phone: Take out: 822-7409.

1618. Tofu Shop Specialty Grocery & Deli (The). 1983. The Tofu Shop (Business card). Arcata, California. 4 by 2.37 inches. Single sided.

• **Summary:** Printed on front in blue on white: “Hot tofuburgers. Marinated cutlets. Tofu sausages. Baked goods. Juices. Tofu making supplies. We make our own fresh tofu daily.”

A green, blue and gold illustration (left) shows a small tofu shop on stilts on a cliff by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead. Address: 768 18th St., Arcata, California 95521. Phone: 707-822-7409.

1619. Tofu Shop Specialty Grocery & Deli (The). 1983. The Tofu Shop Delicatessen (Poster). Arcata, California. 8½ by 11 inches.

• **Summary:** Printed on front in blue on white with a gold border on glossy cardstock paper: “We make our own tofu: traditional methods for a sweet, delicate taste.

“Delicatessen: featuring fresh food to go. Tofu burgers. Sandwiches. Salads. Desserts with honey. Whole grain breads. Fresh juices. Fresh coffee. Herb teas. Marinated cutlets. Tofu sausages. Baked goods.

Specialty groceries: Fresh tofu. Tempeh. Miso (domestic & imported). Sea vegetables. Macrobiotic supplies. Cook book & recipes. Tofu making supplies.”

In the center is the company’s long-time logo of a blue dragon inside a thick green circle.

“Handmade tofu since 1977.”

A green, blue and gold illustration by Bernice Kagan (left) shows a small tofu shop on stilts on a cliff by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead.

Note from Matthew Schmit. 2009 April 2. “A rather gawdy 1st attempt with a marketing poster. The ‘Blue Dragon’ was phasing out and the ‘Shop on the cliff’ was

phasing in as our logo.” Address: 768 18th St., Arcata, California 95521. Phone: 707-822-7409.

1620. Women’s Auxiliary to the Alumni Association, Loma Linda University, School of Medicine. 1983. An apple a day: Vegetarian cookery by doctors’ wives. Vol. II. Loma Linda, California: WAAA. 240 p. Index. 23 cm. [8 ref]

• **Summary:** A Seventh-day Adventist lacto-ovo vegetarian cookbook. The Cookbook Committee editor is Mrs. Georgia E. Hodgkin, M.S., R.D., Asst. Professor, Dep. of Nutrition and Dietetics, School of Allied Health Professions, Loma Linda Univ. Soy-related recipes include: Soy milk shake (p. 11). Spring rolls (with FriChik Soyameat, p. 15). Soy chicken salad (with canned soy chicken, p. 33, 34). Soya chick fruit salad (p. 35). Soyannaise (p. 43). Tofu cornbread (p. 49). “Tuna” burgers (with canned chicken-style Soyameat, p. 60). Savory soybean burgers (with whole soybeans, p. 61). Chicken-style spread (with canned chicken-style Soyameat, p. 62). Mild sloppy Joes (with Vegeburger, p. 64). Soy chicken spread (with Worthington’s fried-style Soy chicken, p. 65). Tofu, peanut butter, and banana spread (p. 67). Whole wheat-soy waffles (with soy flour, p. 70). Crunchy granola (with soy flour, p. 74).

Many of the entrees (p. 77-143) call for canned, frozen, or dry soy-based meatlike products. McKay’s seasoning (chicken-style) and G. Washington broth, Vegex, Sovex, and Savita are also widely used. The following is but a sampler: Tofu roast (p. 81). Soy bean loaf (p. 82). Soy cheese loaf (with tofu, p. 82). Chicken loaf (with chicken-style soyameat, p. 85). Soyameat broccoli casserole (chicken-style, p. 86). Onion tofu (p. 93). Easy tofu casserole (p. 94). Tofu casserole (p. 94). Lasagne (with textured vegetable protein, p. 95). Soy bean patties (p. 110). Tofu balls (p. 113). Soy beans, southern style (p. 115). Delicious baked soybeans (p. 116). Stir fry vegetables with tofu (p. 127). Tofu quiche (p. 133). Soybean soufflé (p. 138).

Tofu fruit whip (p. 171). There is a chapter titled “Foods for Fifty” (p. 185-201) including: Curried rice with soyameat (p. 195). Address: Loma Linda Univ., School of Medicine, 11136-A Anderson St., Loma Linda, California 92354.

1621. **Product Name:** [GranoVita Meatless Meat Balls].

**Foreign Name:** GranoVita Soja-mignon.

**Manufacturer’s Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1983?

**Ingredients:** Soya protein, water, onions, rolled oats, non-hydrogenated vegetable fats, egg protein, spices.

**Wt/Vol., Packaging, Price:** 375 gm can retails for DM 4,56.

**How Stored:** Shelf stable.

**New Product–Documentation:** Manufacturer’s catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

1622. **Product Name:** [Soya Wieners].

**Foreign Name:** Soja-Wienerle.

**Manufacturer’s Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1983?

**Ingredients:** Vegetable oils and fats, water, soya protein, egg protein, onions, natural spices, wheat gluten, salt, glucose, yeast, rolled oats, bread crumbs.

**Wt/Vol., Packaging, Price:** 275 gm can retailed for DM 4,56.

**How Stored:** Shelf stable.

**New Product–Documentation:** Manufacturer’s catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

1623. **Product Name:** Soysage (Meatless Okara-based Sausage).

**Manufacturer’s Name:** Soy City Foods.

**Manufacturer’s Address:** 2849 Dundas St. W., Toronto, ONT, M6P 1Y6, Canada. Phone: (416) 762-1257.

**Date of Introduction:** 1983?

**New Product–Documentation:** Leaflet. About 1983, undated. Brown on yellow. 6 panels. Defines Soysage and contains recipes for: Soysage pizza sandwich. Sliced soysage sandwich. Soy burgers. Soyballs and Gravy with rice. Soysage casserole. Stuffed zucchini.

1624. Wildwood Natural Foods. 1983? Wildwood Natural Foods (Ad–Point of purchase cards). Fairfax, California. 2 p. Undated.

• **Summary:** Each of these two point-of-purchase (POP) cards is 4 by 6 inches, dark green on white, showing a silhouette of woods with birds. On the first card, under the words “Fresh daily,” are written the names of seven Wildwood products: BRT–Brown Rice & Tofu Sandwich, Curry BRT, Mustard BRT, Tofunofish Sandwich, Tofu Steak Sandwich, Avo–Steak Sandwich, and Supreme Bean Tempeh Burger.

On the other card, under the words “Ready-To-Eat Foods, Naturally,” are written the names of five more Wildwood products: Potato Salad, Tofu-Vegetable Salad (Curry-Tofu Salad, Tofu-Dill Salad), Hummus, Tabouli, and Good Puddin’. Under each product on this card is more information about that product. For example: “Good Puddin’. Couscous, apples and raisins cooked in apple juice with a creamy carob-tofu topping. Sweetened with apple

juice.” Address: 135 Bolinas Rd., Fairfax, California 94930. Phone: 415-459-3919.

1625. *Forbes*. 1984. McVeggie burgers? [vegetarian boycott of McDonald’s]. 133:16. Jan. 2.

• **Summary:** When Burger King added veal to its menu 3 years ago, vegetarians and animal lovers began picketing the chain, because veal is produced in a way that is cruel to calves. The picketers say Burger King dropped veal from 90% of its stores.

Now they have a new goal. They want McDonald’s to put “a vegetable burger on the menu.” But McDonalds does not intend to respond. A spokesman says “it is not feasible to have a nut, soy, or veggie burger on the menu.”

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “veggie burger” (or “veggie burgers”).

1626. **Product Name:** Homestyle Tempeh Burgers (Sesame Wheat Tempeh Burger).

**Manufacturer’s Name:** 21st Century Foods Inc.

**Manufacturer’s Address:** 30 Germania St., Jamaica Plain, MA 01230.

**Date of Introduction:** 1984 January.

**Ingredients:** Organic soy tempeh, San-J tamari, herbs, spices.

**Wt/Vol., Packaging, Price:** 7 oz 2 round burger patties, vacuum packed.

**How Stored:** Refrigerated, 30 day shelf life.

**New Product–Documentation:** Leaflet from Norbert C. Belanger, General Manager. 1984. Jan. 16. The company now makes and sells six tempeh products, including Tempeh Burger. Label. Undated. 3 inch diameter. Reddish brown on yellow. Leaflet. 1983. “Tempeh with a Difference.”

1627. Fantastic Foods. 1984. Tofu Burger: The most fantastic way to enjoy tofu (Ad). *Natural Foods Merchandiser*. Jan. p. 9 (unnumbered) of 12-page color advertising insert.

Soyfoods Pavilion ‘84. Marketing soyfoods in America.

• **Summary:** This 5 inch square black-and-white ad begins: “Fantastic Foods’ Tofu Burger Mix makes it so easy to enjoy tofu. Just mash one pound of tofu and combine with our mix, shape into patties, and cook. In just minutes you will be enjoying delicious and nutritious tofu burgers. We make our Tofu Burger Mix from the finest all natural, all vegetarian ingredients like brown rice, sesame seeds and miso.” An illustration shows the front of a package of Tofu Burger Mix. Address: 106 Galli Drive, Novato, California 94947. Phone: (415) 883-7718.

1628. **Product Name:** [Tonic Burger {Tofu Burger}].

**Manufacturer’s Name:** Gestion Resto France. Subsidiary of Comptoirs Modernes.

**Manufacturer’s Address:** 25 rue Quentin Bouchart, 75008

Paris, France.

**Date of Introduction:** 1984 January.

**New Product–Documentation:** Soya Foods. 1984. July. p. 4. Interview with Michel Minard, General Director of Comptoirs Modernes. The product was launched 6 months ago and is doing well.

1629. Nasoya Foods. 1984. Make the Nasoya Foods section a part of your store (Ad). *Natural Foods Merchandiser*. Jan. p. 11 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America. • **Summary:** A 7.75 by 10.5 inch black-and-white ad. An illustration show the following Nasoya products: Firm Style Tofu, Soft Style Tofu, Marinated and Broiled Tofu, Tofu Burgers, Tempeh, Tempeh Burgers, Fresh Noodles, Wonton Skins, Egg Roll Wrappers, Tofu Vegi Dip (Creamy Dill, Soyannaise, Onion, Creamy Garlic) and Corn Cakes (Blueberry, Cranberry, With Bran). "Nasoya Foods. A commitment to quality."

This ad also appeared in *Soyfoods* magazine (summer, p. 9). Address: P.O. Box 841, Leominster, Massachusetts 01453. Phone: 617-537-0713.

1630. **Product Name:** Soysage [Regular Dark, and Light Pineapple Smoked].

**Manufacturer's Name:** Soycraft.

**Manufacturer's Address:** P.O. Box 420, Woollahra (near Sydney), NSW 2025, Australia. Phone: (02) 32 0716.

**Date of Introduction:** 1984 January.

**Ingredients:** Cracked soybeans, wholewheat, wheatgerm, herbs, spices.

**Wt/Vol., Packaging, Price:** 375 gm.

**New Product–Documentation:** Letter and Label sent by Ralph and Volli Henderson, founders of Soycraft. 1984.

Jan. 17. "The two casing samples I'm enclosing show the two types of soysage we make: the dark color is regular, the sexy lighter color is for our Pineapple Smoked. You will never know the month or so of agony we went through to learn about the sausage business, the right casings, the right clippers, the right filler, the nights of torture as casing after casing burst at the high temperatures. The sausage people thought we were insane as few of them cook at the temperatures for the length of time we do, and our mix is so different from anything in the meat industry, although due to the high cost of meat many of the salami manufacturers are mixing in soy concentrate and persuading the public they are buying meat!"

1631. **Product Name:** Leandro's Meatless Lasagna (Tempeh Blended with Four Cheeses in Whole Wheat Pasta). **Manufacturer's Name:** Soyfoods Unlimited, Inc. **Manufacturer's Address:** 14670 Doolittle Dr., San Leandro, CA 94577.

**Date of Introduction:** 1984 January.

**Ingredients:** Sauce: Crushed tomatoes, tempeh, whole wheat lasagna noodles, onion, water, vegetable oil, white wine, honey, garlic soy sauce, black pepper, basil, oregano. Filling: Ricotta cheese, mozzarella cheese, Romano cheese, Parmesan cheese, egg white, parsley flakes, nutmeg.

**Wt/Vol., Packaging, Price:** 10 oz vacuum pack.

**How Stored:** Frozen.

**New Product–Documentation:** See next page. Label. 1984, undated. 2.5 by 4.5 inches. Red, green, and white. "Old fashioned goodness. Single serving." Poster. Two color, with ingredients. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Spot in *Soyfoods*. 1984. Summer. p. 43-44. Spot in *Whole Foods*. 1984. May. p. 63. Press release. 1984. 2 p. with photo. Shurtleff & Aoyagi. 1985. *History of Tempeh*. p. 54.

Letter (e-mail) from Valerie Robertson. 2011. Sept. 21. We had Alioto's restaurant in San Francisco make our tempeh lasagna. We took them tempeh that had been ground (in a meat mixer) and seasoned. They put it all together (with whole wheat lasagna noodles) and froze it. It was good.

1632. **Product Name:** Sproutburgers.

**Manufacturer's Name:** Sprout Delights.

**Manufacturer's Address:** 13090 N.W. 7th Ave., North Miami, FL 33168. Phone: 305-687-5880.

**Date of Introduction:** 1984 January.

**Ingredients:** Incl. sprouted wheat, tofu, carrots, okara, onions, walnuts, sunflower seeds, lemon-tamari, garlic.

**Wt/Vol., Packaging, Price:** 4 burgers in a 12 oz poly bag.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Steve Bern of Sprout Delights. 1992. July 11. Since 1982 he has run this bakery, which specializes in breads made of sprouts, like the early breads made by Essene, but also makes a host of

**How Stored:** Frozen or refrigerated.  
**New Product–Documentation:** Interview with Seth Tibbott of Turtle Island. 1984. Jan. 17. The burgers are sold vacuum packed.

Soya International. 1990. April/June. p. 24. Contact: Seth Tibbott. Address is now P.O. Box 218, Husum, Washington 98623.

Leaflet. 1992. "Discover Turtle Island." Turtle Island makes 3 types of burgers, with have the registered trademark "Big T Burgers." They are marinated, not fried, and vacuum packed in resealable bags, two patties per pack. "Eat one/ save one" and still have a handy "Ziploc" bag when all is done. Sold frozen or refrigerated—delicious, ready to eat. Tempeh Burgers are made from the company's own soy tempeh, simmered to perfection in their own herb soy sauce blend. Great as a quick meal. BarBQ Burgers are cooked through and through with Turtle Island's own special barbecue sauce to make them jut right for your grill or microwave.

• **Summary:** "David Mintz... used to close his kitchen at night by telling his employees, 'Its tofu time.' Little did they know what he meant. Mintz says he spent about ten years [i.e. from about 1974], from 10 p.m. to 4 a.m. experimenting with tofu. Today, Mintz is cashing in on the USA's tofu craze as president of Tofu Time Inc., a company that went public in December at 5 3/4 a share and now is priced between 10 and 11 1/4... His sales grew from \$23,847 in 1982, his first year of business, to \$329,171 in 1983 (a loss of \$33,370 the first year to a profit of \$92,634 the following year). What's next on the corporate drawing board? 'Franchises and tofu burgers, tofu sauces and dressings, tofu pies and tofu egg rolls,' Mintz says." Note: This is the earliest article on soy seen (Aug.

2002) in *USA Today*, the national newspaper.

**1636. Product Name:** Tempeh Burger.  
**Manufacturer's Name:** Cheribon Foods.  
**Manufacturer's Address:** 7223B–101 Ave., Edmonton, ALB, T6A 0H9, Canada. Phone: 403-462-1097.  
**Date of Introduction:** 1984 February.  
**New Product–Documentation:** Letter from Max Pieroelie, tempeh maker. 1985. July 4. They use 50 lb/day of soybeans.

**1637. Product Name:** Breaded Tempeh Cutlets.  
**Manufacturer's Name:** Finger Lakin' Good.  
**Manufacturer's Address:** 103 N. Aurora St., Ithaca, New York. Phone: 607-272-9177.  
**Date of Introduction:** 1984 February.  
**How Stored:** Refrigerated.

**New Product–Documentation:** Call from J.J. Schultz. 1992. Jan. 28. Bohdan's tempeh company was named Finger Lakin' Good, after the Finger Lakes region of New York. It was in business from 1982 to 1986, making 75 to 100 lb/ week of regular soy tempeh and breaded tempeh cutlets. Most of his products were sold fresh at the very large and old Greenstar Food Co-op in Ithaca.

Talk with Bob Bohdan and Joan Tregaskin. 1992. Jan. 31. They introduced these cutlets as a commercial product in early 1984. To make them: Cut fresh tempeh into fingers (sort of like fish sticks), dip them in either beaten egg or arrowroot powder, then bread with bread crumbs and pan fry. These were sold both in the restaurant and outside, mostly at Greenstar Cooperative Market in Ithaca.

1638. Loma Linda Foods. 1984. A lot more than meats the eye (Ad). *Natural Foods Merchandiser*. Feb. p. 113.

• **Summary:** See next page. Color photos show the following prepared dishes: Chicken Supreme, Vege-Scallops, Tastee Cuts, and Ocean Platter. The front panel of each can is also shown in color.

"Loma Linda Foods. Taste great." Address: 11503 Pierce St., Riverside, California 92515.

**1639. Product Name:** [La Vie Claire Tofu Burgers (Garlic & Fines Herbes, or Mushrooms)].  
**Foreign Name:** La Vie Claire Galettes de Tofu (Ail et Fines Herbes, Champignons).  
**Manufacturer's Name:** Société Française d'Alimentation Saine (SFAS) (Marketer). Made in France by Société Soy.  
**Manufacturer's Address:** B.P. 77, 70 Avenue de la République, 94703, Maisons-Alfort Cedex, France. Phone: 43.78.11.32.

**Date of Introduction:** 1984 February.  
**Ingredients:** Burgers with Garlic: Tofu (water, soybeans), oat flakes\*, tamari (soy sauce), sunflowerseed oil, garlic 3.8%, spices and aromatics. \* = Organically grown.  
**Wt/Vol., Packaging, Price:** 200 gm.

# A lot more than meats the eye.

Chicken Supreme

Vege-Scallops

Tastee Cuts

Ocean Platter

If you think you're looking at four delicious meat dishes, look again.

There's not an ounce of beef or chicken or fish anywhere.

Because you're looking at four delicious, new meatless family meals from Loma Linda: Chicken Supreme, Vege-Scallops, Tastee Cuts and Ocean Platter.

Like all our fine Loma Linda Foods, each is prepared from protein-rich soybeans and other vegetable sources. There are no animal fats, no cholesterol, and no added preservatives.

Just great taste, bite after bite.

Stock up now with these profitable meal makers while our special deal is on. Check with your distributor or Loma Linda Foods.

**LOMA LINDA FOODS®**

**Taste Great**

11503 Pierce Street, Riverside, CA 92515

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. Received from Bernard Storup of Société Soy. 1989. March. 2.5 by 5.5 inches. Self adhesive. Green and red (or brown for mushroom) on white. “A food preparation based on soya and cereals. Made without artificial colors or preservatives.” Logo of flying bird. Illustration of garlic (or mushrooms) with green herbs against cross-hatch background.

Letter (fax) from Bernard Storup. 1990. March 10. “We made the burgers for ‘La Vie Claire’ under their brand from Feb. 1984 to Oct. 1987. Since that date, they have sold all their burgers (same varieties) under our ‘Soy’ brand name.” The company name is Société Française d’Alimentation Saine (SFAS). They make no soyfoods. They sell those made by Société Soy and soymilk made by Cacoja. In the mushroom burgers, the ingredients are: Tofu (water, soybeans), oat flakes\*, mushrooms from Paris 14%, tamari (soy sauce), sunflowerseed oil, garlic 3.8%, spices and aromatics. \* = organically grown.

1640. Shurtleff, William; Aoyagi, Akiko. 1984. History of soy protein concentrates, isolates, and textured soy protein products. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 25 p. March 4. Unpublished typescript. Available online at [www.soyinfocenter.com](http://www.soyinfocenter.com).

• **Summary:** A comprehensive history of the subject.

Contents: Definition of types of products. Part I: History of modern soy protein products from origin to 1964. Soy protein isolate: Tofu, Nagel in New York 1903, Beltzer in 1911, Ajinomoto in 1919, Cone and Brown patent in 1928, Glidden (first plant in U.S. for production of industrial grade soy protein isolate) in 1935, first study of use of soy isolates in food (Woodruff at University of Illinois, 1938), Glidden first company in the West to produce a soy protein isolate for use in food (1939, enzyme-modified), Glidden first with large-scale production of non-enzyme modified isolates (1957), Worthington Foods introduced Soyamel in 1952 (first soymilk based on isolate). Soy protein concentrates: First developed and introduced in Germany in 1925, first commercial food-grade concentrates and first patent from Griffith Laboratories in 1959. Textured soy protein products: Developed in China 1,000 years ago, made from tofu or yuba, earliest Western meat analogs developed by John Harvey Kellogg about 1896 (without soy), first synthetic industrial protein fiber (Lanital, made from casein) introduced in Italy 1936, first industrial (non-food) soy protein fibers in 1938 from Robert Boyer of Ford Motor Co. (used for upholstery), Boyer got patent for use in food (1951), rights purchased by Worthington, Dr. Harry Miller’s soya loaf in 1939, Worthington first to produce a meat analog based on spun soy protein fibers in 1960, textured soy flour (TSP or TVP) introduced as food ingredient in U.S. in 1964.

Part II: History of modern soy protein products in the U.S. from 1965 to 1981. 1964 Belden report from

Harvard Business School *Protein Paradox*. Commercial Protein Foods Studies Program of the U.S. Agency for International Development (AID) encouraged U.S. firms to develop protein foods for the Third World in 1967. General Mills Bac-O’s test marketed 1966. Producers. February 1971 breakthrough when USDA authorized use of TVP in school lunch programs. 1972 *Soybeans. Chemistry and Technology*, edited by Smith and Circle, contained all the research on nutrition and processing up to that time. 1973 high beef prices led to beef-soy retail blends. Appearance of TSP cookbooks, starting in 1971. First World Soy Protein Conference held in Munich, Germany, in 1973. In 1974 Miles Laboratories/Worthington Foods introduced Morningstar Farms meat analogs, the first soy protein meat analog entrees marketed to mainstream America. Textured soy concentrates and other concentrate developments. New developments with isolates. New flavorings. New textured soy flour development. 1978 Keystone Conference on soy protein and human nutrition sponsored by Ralston Purina. Problems with government regulation.

Part III: History of modern soy protein products outside the U.S. and Europe (1960-1981): Japan. China. Other Asia: Philippines, India, Sri Lanka. Latin America: Colombia, Mexico. Address: Lafayette, California. Phone: 415-283-2991.

1641. Storup, Bernard. 1984. Re: New developments at Société Soy. Letter to William Shurtleff at Soyfoods Center, March 22. 3 p. Typed, with signature on letterhead (photocopy). [Eng]

• **Summary:** “A brief history of Société Soy: Oct. 1981–Sept. 1982. Search for a place to settle near Paris, choose and install equipment. The company’s first commercial production began in June 1982.

“Oct. 1982–May 1983. Production of tofu (firm for the natural food market and soft for the Japanese community–30,000 Japanese living in Paris); distribution by our own means in Paris only.

“From May 1983. Nationwide distribution of firm tofu–vacuum packed, 24 day shelf-life–and tofuburgers (called ‘Croque Tofou’) by Paris based distributors (actually, from Rungis, which is the biggest market of its kind in the world, and a key point for fresh products for western Europe).

“We carry 5 types of burgers (see labels), with 26 day shelf-life (we could put 2 months, according to a strict microbiological survey we ran, but prefer to shorten it in order to have a more regular rotation).

“This week have begun a nationwide advertising promotion for ‘tonic burgers’ (in Paris subway, on the national radio); it is run by a fast food chain that wants to promote a more dietetic way of eating. We make the burgers.

“We should double our production within the next 6 months; We don’t really have time to develop new products, at least for this year.

“We are presently making 2,500 kg/week of tofu, including 1,400 kg/week of burgers; one year ago we were making 1,000 kg/week.

“Some news from Europe: Several types of soymilk have recently been put on the market: Lima Soya Drink, Sojal, and Soyo.

“I think the biggest tofu manufacturer in Europe is Vanka-Kawat in Rijswijk, Holland. They sell about 30,000 pieces of tofu (250 gm and 450 gm) per week, mostly for the Asian (Indonesian) community. They also make sprouts and tempeh. They have an automatic plant with only European equipment; there is no way to visit it.

“The French dairy lobby (France is the world’s leader in cheese consumption) has recently clearly defined its new priorities: fight by all means against all kinds of substitutes for dairy products—above all soymilk.” Address: Société Soy, Plateau de l’Ardennais, 91590 Cerny, France. Phone: (6) 457 52 01.

1642. Krieger, Verena. 1984. *Die Tofu Kueche: Koestliches aus Soja* [Tofu cookery: Delicacies from soya]. Tanner + Staehelin Verlag, Wasserstrasse 16, CH-8029, Zurich, Switzerland. 171 p. Illust. No index. 18 cm. [Ger]  
 • **Summary:** Contents: Resume. Why tofu? List of 120 recipes. Explanation of recipe terms. Meeting with tofu. Into the tofu adventure. Tofu—a fresh product. Fresh plain tofu for experts and epicures. Scrambled & stir-fried tofu to add taste. Pressed tofu and tofu burgers. Fried tofu. Tofu in hot-pots and casseroles. Tofu in baked dishes. Frozen and dried-frozen tofu. Transforming tofu in a blender. Making tofu yourself and how to use the okara. The raw material—soybeans: From the Emperor’s table into the feed trough, the treasure of East Asia’s art of long-life is a hope for our time, soybean production in Europe, growing soybeans in your own garden. Tofu as the cornerstone of an environmentally sound and healthy diet. Natural ingredients from A to Z. Basic recipes for cooking with whole grains. Making soymilk from whole soybeans or soy flour. Tofu for special diets.

Many full-page black-and-white photos show tofu dishes. A small photo (p. 4) shows Verena Krieger. Note: Leviton (1983, p. 18) gives the publication date as Dec. 1983, but Krieger (7/90) says that is incorrect.

1643. Leviton, Richard. 1984. *Tempeh in America: Selling sizzle, not steak. Whole Foods*. March. p. 28-29.

• **Summary:** “Tempeh—the soyfood with culture, as one manufacturer puts it—has never enjoyed the unremitting publicity, the near celebrity status that has propelled its sister soyfood, tofu, into market prominence since 1976.”

According to new statistics compiled by researcher William Shurtleff, director of The Soyfoods Center, there are 53 commercial tempeh makers in the United States and tempeh was the fastest growing soyfood in the USA in 1983.

“Approximately 20 companies represent 90 percent of the total output of tempeh and the top four producers enjoy a 63 percent market share.” In 1983, some 1.998 million pounds of tempeh were made in the USA, almost double the amount made in 1981. “Moreover, it appears, the entire (visible) tempeh industry is controlled and staffed by non-Indonesians.”

While “tempeh has a strong presence in natural food stores (on the coasts) it is minimally represented in supermarkets.” “At least eight brands of pre-cooked brands of tempeh burgers” are available. Address: Editor, Soyfoods Magazine, P.O. Box 511, Encinitas, California 92024.

1644. **Product Name:** Tempté (Spicy Tempeh Spreads) [Hearty Chili, Hot Curry, or Garlicky Onion-Herb].

**Manufacturer’s Name:** Tempeh Works (The).

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302.

**Date of Introduction:** 1984 March.

**Ingredients:** Hearty Chili: Tempeh, spices, sea salt.

**Wt/Vol., Packaging, Price:** 7 oz deli container.

**How Stored:** Refrigerated.

**New Product—Documentation:** Label, undated. 3 inches diameter. Yellow and brown on white. Spot in Soyfoods. 1984. Summer. p. 44. “Tempting Tempeh.” Leaflet. Back to back. 8½ by 11 inches. 2 color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. “Tempte. The all natural spicy [tempeh] spreads.” In 7.5 oz deli containers, 12 to a case. Shurtleff & Aoyagi. 1985. *History of Tempeh*. p. 52.

1645. White Wave Inc. 1984. Order form and list of products. 1990 North 57th Court, Boulder, CO 80301. 1 p. March.

• **Summary:** Soyfoods include: Bulk tofu (hard or soft). Packaged tofu (hard or soft). Savory baked tofu. Soysage (1 lb. or ½ lb.). Tempeh burgers (bulk or packaged). Tempeh (soy, soy rice, or five grain). Polar Bean (soy ice cream, 1 pint; carob mint, strawberry, chocolate, vanilla, and mocha).

The company also makes various nut and seed butters. Address: Boulder, Colorado. Phone: (303) 443-3470 or 3485.

1646. **Product Name:** Natural Touch Okara Patties.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984 March.

**Ingredients:** Textured soy protein concentrate, wheat gluten, egg whites, okara (cooked soy pulp), soy oil, potatoes, yeast extract, skim milk, onion, sea salt, carrageenan, vegetable gum, spices, paprika, oil of celery, turmeric.

**Wt/Vol., Packaging, Price:** 9 oz box contains 4 patties. Retail for \$1.89-\$2.09.

**How Stored:** Frozen.

**New Product–Documentation:** Note that even though this product has “Okara” in the product name, okara is a relatively minor ingredient, the fourth most predominant after soy protein concentrate, egg whites, and wheat gluten.

Spot in Soyfoods. 1984. Summer. p. 45. “Prepared Patty Pair.” Product with Label purchased from Berkeley Natural Grocery Co., California. 1984. 8 by 4 by 1.25 inches. 4 color box. Reprinted in Soyfoods Marketing, Lafayette, CA: Soyfoods Center. “Golden Goodness. Nothing Artificial, Protein Rich/Natural Fiber.”

Ad (full page, color photo) in Natural Foods Merchandiser. 1985. May. “Natural Wonders. Discover Natural Touch for something new in natural foods taste!” Shows color labels/packages for each of four entrées, including Okara Patties and Tofu Garden Patties.

1647. Bates, Cynthia. 1984. Re: History of The Farm’s work with tempeh. Letter to William Shurtleff at Soyfoods Center, undated. 3 p. Typed, with signature on letterhead.

• **Summary:** Alexander [Lyon] and Dianne Darling began experimenting with tempeh in about 1972. Dr. Hesseltine had sent some literature and starter culture on the hunch we would be interested. I did not work at the [Soy] Dairy at this time, but I have been told about this time space by others who did work there then. Alexander was the Dairy straw boss and overview person; he set up the [soy] milk operation and ran it. Dianne mostly worked with the cultures and got into miso for the most part, I was told, but didn’t get into tempeh so much because she thought large scale production was not practical. Occasionally she and Alexander would make a small batch of tempeh, enough for the people who worked there to get a taste. Deborah Flowers started working at the Dairy and liked tempeh, and wanted to turn the Farm onto it. She made a couple of large batches, incubated in the boiler room at the Canning and Freezing plant, that were served for breakfast two different times at our community kitchen;

that was the first time I tasted it. Deborah was trying to figure out ways to produce enough spores, a limiting factor along with the lack of an incubator...

“In 1974 I was researching algae for alternative protein sources in human foods and wanted to start an algae farm. I joined the [Soy] Dairy because soy systems looked like a good intermediate step that would accomplish the same ends (i.e. feed more people with less waste). One day we (the Dairy [soy] milk crew, Mary Hubbard, Marsha Ellis, JoAnne Else, and I) made some soy pulp

[okara] sausages. Soon after I adopted the project and built an incubator out of an old refrigerator. JoAnne showed me the way the Dairy was currently making spores—inoculating petri dishes of chopped sweet potatoes (sterilized) with cultures in test tubes. Alexander taught me basis lab procedure: transferring cultures with a needle, making agar slants, doing serial dilutions.

“November 1974 is the first recorded batch of tempeh in the Tempeh Shop, but I was not keeping very good records at the time. I made 20-30 pound batches out of soy pulp [okara] for the rest of the year. Alexander [Lyon] scored us the Flour Mill’s old bean dryer for an incubator which we used into 1975. At that time Alexander was still the overall manager of the [Soy] Dairy and, although he didn’t actually work at the tempeh shop, he would come in and do a project sometimes, be encouraging, give advice. He was the Dairy expeditor and teacher. Deborah Heavens and Valerie Epstein both worked at the Tempeh Shop at different times in its first year.”

“So far I haven’t been able to come up with a documented date on the first printed instructions [for making tempeh]. They were most likely written in 1975 after *The Farm Vegetarian Cookbook* came out, but they may have been published in late 1975 or early 1976.”

For a history of The Farm’s pioneering work with tempeh to about 1984 see: *History of Tempeh, a Fermented Soyfood from Indonesia*, by William Shurtleff and Akiko Aoyagi (1985). Available on Google Books in full view. Address: The Tempeh Lab., P.O. Box 208, Summertown, Tennessee 38483. Phone: 615/964-2286.

1648. Leviton, Richard. 1984. Japanese soyfoods. In: Camille Cusumano. 1984. *Tofu, Tempeh, & Other Soy Delights*. Emmaus, Pennsylvania: Rodale Press. x + 261 p. See p. 144-49.

• **Summary:** Contents: Brief biography of Leviton and introduction. Deep-fried and grilled tofu treats: age,

atsuage, ganmo, yaki-dofu, doufu-gan. Tofu haute cuisine (at 280-year-old Sasa-no-Yuki in Tokyo, dried-frozen tofu, wine-fermented tofu). Delights of soy milk and yuba (incl. Yuba Han). Natto, miso, and savory soy condiments (incl. Hamanatto or “savory fermented black soybeans,” thua nao from Thailand, and natto miso). And still more: Cooked soybeans with wakame, “soy sprouts packed in a sausagelike clear tube, green soybeans in the pods, *kinako* powder (a flour made from dry roasted soybeans, used as a basis for confections or nut butters), freeze-dried instant miso soup powder, instant silken tofu powder (just add water and stir), and dry meat sauces for tofu.” Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

**1649. Product Name:** [Tempeh Burgers].

**Manufacturer’s Name:** Paul Stuart Zacharowicz. Renamed Vollwert und Wertvoll by June 1984. Later renamed Natuerliche Lebensmittel. Named “Von Anfang an Natur, Paul Stuart’s” by Dec. 1992.

**Manufacturer’s Address:** Staudgasse 70, A-1180 Vienna, Austria. Phone: 0222/48 50 03.

**Date of Introduction:** 1984 April.

**New Product–Documentation:** Letter (handwritten) from Paul Stuart. 1984. April 9. “I am in the process of expanding my already existing tempeh workshop. We’re planning more with soyfoods as well as a soy deli. Currently we supply kilo and half kilo tempeh cakes as well as tempeh burgers. The burgers are our best advertisement. Unfortunately they are labor intensive and costly and not very lucrative.” He then describes his production process in detail.

**1650. Product Name:** [Tofu & Vegetable Patty].

**Foreign Name:** Soja-Getreide-Laibchen.

**Manufacturer’s Name:** Sojarei Ebner-Prosl.

**Manufacturer’s Address:** Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.

**Date of Introduction:** 1984 April.

**Ingredients:** Soybeans, millet, rolled oats (from controlled cultivation), whole wheat flour, vegetables, herbal salt, herbs, spices.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 1.75 by 3.75 inches. Made purely from plants (rein pflanzlich), of high quality. Without chemical preservatives, artificial colorings or flavorings. Logo is a green soybean plant against a white circular background. Note that ingredients are the same as for the Tofu Burger.

Talk with woman at Austrian consulate. 1989. Nov. 6. Laibchen is a uniquely Austrian term that means “patty.” Most laibchen, called *Faschiertes Laibchen*, are made with ground beef, ground pork, fried onions and parsley, 1 egg, marjoram, thyme, salt and pepper. Add bread crumbs until firm, shape into a patty, score the top in a crisscross pattern

with a knife, and pan-fry in oil on both sides. Potato laibchen are also quite popular.

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. These patties are made with tofu. At the time they were introduced “tofu” was not a legitimate term to use in ingredient listings.

**1651. Soyplant (The).** 1984. Pickup distributor price list effective April 16, 1984 and subject to change. Ann Arbor, Michigan. 1 p. 28 cm.

• **Summary:** This typewritten sheet lists products made by the Soyplant and their prices: Tofu tubs in milk crates. Tofu tubs in cardboard cases. Spiced tofu tubs. Tempetaco tubs. Temperoni tubs. Tofu bulk. Spiced tofu bulk. Soymilk (plain or flavored). Tempeh (8 oz or 8 lb sheet). Soysage (8 oz, 1 lb). Tempeh burgers (3 per package). Tempeh burgers (bulk, 50 singles). Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313)-663-8638.

**1652. Soyplant (The).** 1984. Produce co-op price list–Delivered. Effective April 30, 1984 and subject to change. Ann Arbor, Michigan. 1 p. 28 cm.

• **Summary:** This typewritten sheet lists products made by the Soyplant and their prices: Tofu bulk. Spiced tofu bulk. Soymilk (plain or flavored). Dofu Gan savory baked [tofu]. Soysage (8 oz). Tempeh (8 oz). Tempeh burgers (3 per package). TempeTaco. Temperoni. Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313)-663-8638.

**1653. Worthington Foods, Inc.** 1984. Worthington: Yesterday and today. Worthington, Ohio. 12 p. April 3.

• **Summary:** Includes a concise history of the company. In March 1970 Worthington was acquired by Miles Laboratories. On 15 Oct. 1982 Worthington was repurchased from Miles Laboratories by a group of three Seventh-day Adventist investors.

During the 12 years under Miles, sales increased five-fold. Sales volume in 1983 was an all-time high. The company employs 250 people.

The section titled “Yesterday and today” (p. 4-9) contains an excellent history of Worthington Foods, accompanied by 18 photos (both black-and-white and color). “Worthington Foods got its start in vegetarian foods in 1939 with two peanut-based products, Proast and Numete. These were among the first items produced by the company then known as Special Foods, Inc. Operations began in Worthington, Ohio, inside a small two-story home.” [see

photo]

“Dr. George T. Harding, Sr. borrowed \$5,000, secured with a mortgage on his home, to launch Special Foods, Inc. and was soon joined by four other Seventh-day Adventist investors. Bill Robinson was appointed manager and the only salaried employee.”

“The company survived and grew. By the end of two years, annual sales had reached \$20,000.”

Note 1. This is the earliest document seen (Aug. 2002) containing statistics on the meat alternatives industry or market—by individual companies.

Note 2. A later (undated) revised edition of this booklet was published in about 1987. The cover title was “Worthington: Building for a healthier tomorrow.” Address: Ohio.

1654. **Product Name:** Soy Drink (Soymilk), and Soysage (Meatless Sausage).

**Manufacturer’s Name:** Green World, Inc.

**Manufacturer’s Address:** Mayfield Stage, Boise, ID 83706.

**Date of Introduction:** 1984 May.

**New Product–Documentation:** Interview with James Herrington. 1987. Dec. 30.

1655. Soyfoods Center. 1984. Tempeh (color slide show). P.O. Box 234, Lafayette, CA 94549. 75 slides. Narration with each set.

• **Summary:** Slide show (#4). 1. The Soyfoods Center Presents... 2. Tempeh is a delicious high-protein fermented or cultured soyfood. Sold in 3/4-inch thick cakes and usually deep or shallow-fried until crisp and golden brown, tempeh has a flavor and texture resembling those of southern-fried chicken or fish sticks. For centuries a backbone of the Indonesian diet, tempeh is prepared fresh each morning at some 41,000 shops on Java alone. 3. Tempeh is increasingly available at reasonable prices throughout the United States, especially at natural or health food stores, or at Indonesian specialty shops. Tempeh is an excellent source of nutrients, containing 50 percent more protein than hamburger and completely free of cholesterol; it is also the world’s richest known source of vegetarian vitamin B-12. Like all soyfoods, tempeh is rich in lysine, the essential amino acid in shortest supply in most cereal grains. Serving tempeh and grain at the same meal boosts the amount of usable protein by up to 40 percent. 4. Tempeh has many virtues. 5. It promises to be an important part of meatless diets and of the new emerging American cuisine.

6. A typical package of tempeh. 7. There are various types of tempeh. 8. Here is a kit for making tempeh at home; it contains everything you will need. 9. Tempeh at a market in Bali, Indonesia. 10. Different sized packages of tempeh in Indonesia; made and sold wrapped in banana leaves.

11. Tempeh sold in a market place in Java. On the left is

tofu simmered in turmeric, a natural preservative. 12. Now let’s learn how to make tempeh at home. The soybeans can be dehulled either wet or dry. We prefer wet dehulling. But this is how it is done dry. For best results with dry dehulling, preheat the soybeans at 250°F in an oven for 10 minutes, or just until the hulls split. 13. Tempeh is easily made at home. Begin by combining 2½ cups soybeans with 7½ cups water in a large pot. 14. Bring just to a boil. 15. Then remove from heat, cover, and allow to stand for 8 to 16 hours.

16. Carefully pour off water from pot then vigorously rub beans between the palms of both hands for 3 to 4 minutes to remove hulls. 17. Then pour off hulls into a strainer. Repeat this process several times until all the beans are dehulled. 18. To the drained beans in the pot add 10 cups (hot) water and 1½ tablespoons vinegar. 19. Bring to a boil and cook, uncovered, for 45 minutes, then pour contents of pot into a large colander and allow beans to drain well. 20. Then allow beans to dry for 20 to 30 minutes on a double layer of absorbent toweling.

21. To make the container for incubation you can use Ziploc bags, baking pans, pie tins, etc. We prefer Ziploc bags. Take two 7-by-8-inch polyethylene bags and, using an ice pick, make holes in a grid pattern every ½ inch. 22. When the soybeans have cooled to body temperature and are well dried, transfer them to a separate clean tray for inoculation. 23. Now we are ready to inoculate them. The inoculum, tempeh starter, is available from The Farm in Tennessee or from Organic Gardening magazine. Once you buy one small packet you can make more of your own, using illustrated instructions in our book of tempeh. To inoculate, simply take 1 teaspoon of starter, sprinkle it over the beans... 24. And mix well. 25. Then spoon half of the inoculated beans into each of the two perforated bags.

26. Flatten each bag to a thickness of ½ to ¾ inch. 27. Then place bags in an incubator. This incubator is made from a Styrofoam cooler or picnic basket heated by a 20-watt electric bulb regulated by an aquarium or chick brooder thermostat. A water heater room or any other place as warm as 86°F (30°C) can serve as an incubator. 28. Incubate the tempeh at 86 to 88°F for 22 to 26 hours. When done, the beans should be bound together firmly into fragrant white cakes. 29. A large cake of finished tempeh and tempeh in burger rounds made in yogurt containers. 30. Here is an incubator made from two cardboard boxes, the space between the larger and the smaller being filled with batting for insulation. Note the perforated rack on which the tempeh is placed.

31. Good tempeh looks like this when sliced. 32. Tempeh is as versatile and delicious as it is nutritious and inexpensive. Most of the tempeh in Indonesia is served deep-fried or shallow-fried to give it a crisp texture and savory flavor. Here tempeh is being shallow fried to make crisp tempeh chips. 33. Crisp tempeh chips with creamy tofu dip. 34. Tofu burger. 35. Tofu burgers (open faced) made with

round tempeh patties.

36. Some people like to grill their burgers first with a miso sauce. 37. Label of tempeh patties. 38. TLT; Tempeh, Lettuce & Tomato Sandwich. 39. Tempeh Sloppy Joe. 40. Canning Tempeh Sloppy Joe.

41. Tempeh burritos or tacos. 42. Tempeh in pita bread. 43. Tempeh Guacamole and Crisp Tempeh Bits on tortillas. 44. Breaded Tempeh Cutlets or Croquettes. 45. Tempeh Lumpia, a Filipino dish.

46. Tempeh Gyoza or Egg Rolls. 47. Tempeh Felafuls; Temptations. 48. Tempeh is delicious simmered in coconut milk with herbs and spices. The milk is easily made at home in a blender as described in *The Book of Tempeh*. 49. Simply pour the mixture of coconut pulverized with hot water into a strainer and press out the coconut milk with your fingertips. 50. Tempeh starter can also be made at home. Here is a method for growing it on soybeans and sifting off the spores. 50A. It can also be grown on pressure cooked white rice, cooked in a Mason jar.

51. Now to Indonesia. A sketch of a large Indonesian tempeh shop. 52. In a few areas, tempeh is incubated packed in bamboo halves. 53. Close-up. 54. Carrying the tempeh to market. 55. Indonesian tempeh wrapped in banana leaves and polyethylene bags.

56. Tempeh in small packets wrapped with banana leaves in the Yogyakarta market, May 1977. 57. Close-up. 58. Here is a wife cooking tempeh in a typical village kitchen. 59. Thin tempeh slices at the marketplace are dipped in a batter of spiced coconut milk and rice flour, then deep-fried to make tempeh chips. 60. Here are tempeh cutlets, seasonings, and chips.

61. Other ready-to-eat tempeh items in a West Javanese market. 62. Tempeh chips in a marketplace in Yogyakarta, Java. 63. Making grilled tempeh on skewers like shish kebab over a home barbecue. 64. Making Sate, a similar skewered delicacy with a wonderful dipping sauce, sold here by a street vendor. 65. Javanese markets are a festival of colors. Most tempeh cuisine includes a load of blazing hot chilies...

66... which are ground by hand in stone mortars for use in sauces. 67. Like most traditional societies, Indonesia has a grain-centered diet. The colors of natural grains and beans in the markets are a feast for the eyes. 68. In Indonesia the remarkable winged bean is also made into tempeh; or it can be made into tofu or deep-fried tofu. 69. A close relative of tempeh is onchom, which is usually made from peanut presscake or okara with a *Neurospora* mold. It is sold in cakes in the markets of West Java. 70... and may have a distinctive orange color from the mycelium.

71. To make onchom, steamed peanut presscake is packed into molds, 72. Inoculated with onchom from a previous fermentation, 73. Placed in an incubator where it generates its own heat from fermentation, 74. And looks like this when it is finished. Address: Lafayette, California.

1656. **Product Name:** Heraveg Vegetarian Main Meals [Beef Style, Mince, or Chicken Style].

**Manufacturer's Name:** Haldane Foods Ltd.

**Manufacturer's Address:** Units 16 & 20, Long Furrow Trading Estate, East Goscote, Leicester LE4 8XJ England.

**Date of Introduction:** 1984 June.

**How Stored:** Shelf stable.

**New Product–Documentation:** Food Report (Lehmann). 1984. June. Advertised in health food magazines. In dry form, packed in cartons, they are claimed to produce no soya aftertaste.

Note: This is the earliest known commercial soy product made by Haldane Foods Ltd.

1657. **Product Name:** [Tempeh Burgers (Marinated and Baked. No Oil)].

**Manufacturer's Name:** Noble Bean.

**Manufacturer's Address:** Toronto, ONT, Canada.

**Date of Introduction:** 1984 June.

**New Product–Documentation:** Letter from Allan Brown. 1985. Aug. 7. Ready to eat. 4 oz for \$1.65. Letter (fax) from Allan Brown. 1998. Jan. 21. Tempeh burgers were first sold in June 1984.

Label sent by Allan Brown. 1998. June 30. 5½ by 4½ inches. Plastic bag. In French and English. Orange and green on white. "Heat and serve. Refrigerate or freeze. 127 gm (4.5 oz). McDonalds Corners, Ontario K0G 1M0."

1658. **Product Name:** Soyboy Tofu Not Dogs: Natural Meatless Links.

**Manufacturer's Name:** Northern Soy.

**Manufacturer's Address:** 30 Somerton St., Rochester, NY 14607.

**Date of Introduction:** 1984 June.

**Ingredients:** Tofu, filtered water, isolated soy protein, cold pressed safflower oil and corn oil, herbs and spices, honey, sea salt, guar gum, carrageenan.

**Wt/Vol., Packaging, Price:** 12 oz vacuum packed.

**How Stored:** Refrigerated, 35 day shelf life. Or frozen.

**New Product–Documentation:** Label. 1986, undated. 4 by 8 inches. Green, orange, and black on yellow. "No nitrates. No cholesterol. Half the salt of regular hot dogs." Manufacturer's catalog. 1987. Lists ingredients. Talk with Andy Schecter. 1988. Oct. 10. This product was launched in June 1984. East West Journal. 1988. Oct. p. 72. "Special awards: Best fake not dog: SoyBoy Tofu Not Dogs by Northern Soy of Rochester, New York. Nice smoky flavor and smooth texture, almost as good as the real things."

Product with Label purchased at Open Sesame in Lafayette, California. 1992. May. The product is now named simply Not Dogs. 7 by 4.5 inches. Plastic film. Red, green, and black on yellow. Illustration of a dog in a circle with a diagonal line drawn through it. "America's best-tasting vegetarian hot dog. 50% less salt. 35% less fat than

regular hot dogs. No nitrates. No cholesterol.” “Ingredients: Organic tofu (filtered water, organically grown soybeans, natural calcium chloride nigari—a mineral coagulant, not a preservative), corn oil, isolated soy protein, tapioca flour, yeast extract, herb and spices, honey, natural flavoring, vegetable gum, sea salt. No preservatives and nothing artificial.” 12 oz. retails for \$3.39.

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Copyright 1991. New label. The product is now named Soyboy Not Dogs. 8.5 by 6.5 inches. Plastic film. Red, yellow, black, and green on white. The word “Dogs” is written in rounded red letters as if formed by bending a long hot dog. “America’s best-tasting vegetarian hot dog. All natural. No cholesterol. Wheat and dairy free. Made with organic tofu. No preservatives & nothing artificial.” The ingredients are basically unchanged. “Keep refrigerated or frozen. May be sold frozen for 1 year after date on package.” UPC indicia. 12 oz. retails for \$3.29.

1659. **Product Name:** SoyBoy Tofu Burger [Savoury, or Chili Flavour].

**Manufacturer’s Name:** Regular Tofu Company Ltd.

**Manufacturer’s Address:** 16 The Halcroft, Syston, Leicester, England LE7 8LD.

**Date of Introduction:** 1984 June.

**New Product–Documentation:** Ad in The Vegetarian (England). May/June. p. 12.

1660. **Product Name:** SoyBoy SoySage (Meatless Sausage).

**Manufacturer’s Name:** Regular Tofu Company Ltd.

**Manufacturer’s Address:** 16 The Halcroft, Syston, Leicester, England LE7 8LD.

**Date of Introduction:** 1984 June.

**New Product–Documentation:** Ad in The Vegetarian (England). May/June. p. 12. “High fibre protein slices.”

1661. **Product Name:** [Tofu Burger].

**Foreign Name:** Tofu-Burger.

**Manufacturer’s Name:** Sojvita Produktions GmbH.

**Manufacturer’s Address:** Hauptplatz 1, 2493 Lichtenwoerth, Austria. Phone: 02622/75494.

**Date of Introduction:** 1984 June.

**Ingredients:** Tofu, onions, spices (Gewuerze), salt.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Norbert Brunthaler. 1988. Jan. 4. Gives date of introduction as starting date of company, June 1984. Label. 1987. 3.5 by 1.5 inches. Self adhesive. Black typed letters on white.

1662. **Product Name:** Soygran.

**Manufacturer’s Name:** Soycraft Pty. Ltd.

**Manufacturer’s Address:** P.O. Box 420, Woollahra (near Sydney), NSW 2025, Australia. Phone: (02) 32 0716.

**Date of Introduction:** 1984 June.

**New Product–Documentation:** Form filled out by Volli and Ralph Henderson. 1984? (Undated). The company now produces Soysage, Soygran, Tofu Pate, Tofu Cottage Cheese, Missing Egg Salad, Pima, and Tempeh Chips.

1663. Watanabe, Tokuji; Kishi, Asako. 1984. The book of soybeans: Nature’s miracle protein. New York, NY: Japan Publications. 191 p. June. Illust. General index. Recipe index. 26 cm. [21 ref]

• **Summary:** Contents: Introduction. Part 1. General information: 1. Characteristic traits: Agronomic and other biological characteristics, physical properties, chemical properties, soybean protein, properties of soybeans as food material. 2. Current ways of using and processing soybeans: Throughout the world, traditional ways of using and processing, new soybean food products. 3. Tofu and other nonfermented soybean food products: Tofu (Cotton or regular tofu, silken tofu {*kinugoshi*} and soft tofu, packaged tofu, new equipment), deep-fried tofu, dried-frozen tofu (*Kôri-dôfu*), soy milk, yuba, roasted soy flour (*kinako*), soybean sprouts.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *Kôri-dôfu* to refer to dried-frozen tofu.

4. Miso and other fermented soybean products: Miso, natto, Hama-natto (tera-nattô), soy sauce, sufu, tempeh. 5. Other ways of eating soybeans—Simple traditional Japanese foods: Parched soybeans, boiled soybeans (*budo-mame*; *hitasahi mame*), beaten and mashed [or ground] soybeans (*go*, or (from edamamé) *zunda* or *jinda*), molded soybean mash (*jinta-dôfu*), molded mashed soybeans and rice flour (*shitogi*), soybean soybean-mash paste. 6. New soybean protein products.

Note 2. This is the earliest document seen (Nov. 2008) that mentions *zunda*. The text (p. 84) reads: “When fresh green soybeans (edamame) are used in cooking, they are boiled for from ten to twenty minutes; ground; and flavored with salt, sugar, and soy sauce. The resulting dish is called *zunda* or *jinda*.”

Note 3. *Zunda* is a healthy and tasty snack or treat made from mashed edamamé. It is sweet, rich in protein, high in fiber and emerald green. It is said to have originated hundreds of years ago in Japan in Miyagi prefecture. In and around Sendai (capital of Miyagi prefecture) one can find many shops and booths that sell *zunda* cakes, *zunda* mochi treats, and *zunda* shakes, all made from edamamé (green vegetable soybeans). One well-known company in Japan that markets delicious *zunda* products is Zunda Saryo.

Part 2. Cooking with soybean food products: Tofu, *yaki-dôfu* (toasted tofu), *kôri-dôfu* (dried-frozen tofu), *nama-agè*, *abura-agè*, *gammodoki*, yuba (soy-milk film), *nattô*, miso, soy milk, soybeans, bean sprouts. Afterword. Bibliography.

In the chapter on tofu, pages 43-44 discuss *okara* or

*unohana* (the residue remaining after soy milk production); a photo shows it in a glass bowl. “Though it formerly appeared on many Japanese tables seasoned and cooked with vegetables, today it is most often fed to animals. As the number of animals raised in urban and suburban areas decreases, however, tofu manufacturers are finding it harder to dispose of residue.”

Page 99 notes of tofu: “At a certain temple in Kyoto is a plaque bearing the following inscription, which, while comparing this food to religious faith, clearly shows the esteem in which the Japanese people hold tofu. ‘Religious faith should be like tofu: it is good under any circumstances. It is good boiled, grilled, or fried. Raw, chilled, served with soy sauce and other seasonings, it is good with steamed rice. Simmered in hot water and flavored, it is good with sake. Because it is soft, old people and sick people welcome it, but children and young people like it too. Men like it, women like it; poor and rich both like it. Though common, it has elegance enough to find a place in the upper class.

“It cuts clean and well for use in clear broths. It is good in the meatless diets of religious training. It can be crushed for use in miso soup. It is used all the time and in all seasons. It is inexpensive yet numbered among the delicious treats. It is welcomed everywhere, in mountains as well as in big cities. It is well received at dinners for dignitaries and guests yet is convenient enough for college students who do their own cooking. Women especially should be like tofu. The mature and cultivated person should be tender, yet firm, like tofu. Though apparently tasteless, it is delicious. Though apparently ordinary, it is extraordinary.”

Other ways of eating soybeans (p. 83-84): (1) Parched—“Parched gently in unglazed ceramic dishes made for the purpose,” then tossed by people at Setsubun in February around their houses as they chant “Demon out! Good luck in! Then they pick up the beans and eat them. Parched soybeans are included in some varieties of *mochi* (glutinous rice cake) and in *okoshi* a confection made of puffed rice bound together with sugar syrup. In the past they were eaten with salt, miso, or soy sauce.”

Note 4. In the USA, parched soybeans are called “dry roasted soynuts.”

Tables show: (1) World production of soybeans (1977-1982). (2) Price trends in dollars per ton for wheat, soybeans, and corn (1970-1981). (3) Soybean yields in the USA and Japan (1974-1981). (4) Chemical composition of soyfoods: Tofu, abura-agè, kôri-dôfu, yuba, kinako, soybean sprouts, nattô, miso (dark yellow), soy sauce (common), soybean (Japanese). (5) Statistics on production of modern soybean products in Japan (1975-1981). (6) Annual production and prices of modern soy protein products in the USA (May 1983).

Japan once produced a million tonnes (metric tons) of soybeans annually. This figure decreased dramatically during World War II. After the war, as soybean imports from

the United States steadily increased, Japan’s domestic crop gradually fell to the level of no more than 100,000 tonnes. In 1977 it was 111,000 tonnes, yet by 1982 it had jumped to 226,000 tonnes as rice acreage was reduced.

All photos are black and white. Figures show: (2) Line drawing of soybean plant with flowers and leaves. (2) Cross section of soybean seed-coat and cotyledon. (3) Graph of protein solubility (NSI) of defatted soybean meal at different pH values. (4) Graph of protein solubility (NSI) of defatted soybean meal at different concentrations of calcium chloride. (5) Graph of relationship between time and temperature of soaking soybeans in water (colder water temperature requires longer soak time). (6) Flow sheet for making regular tofu. (7) Photo of regular (*momen*) “cotton tofu.” (8) Line drawing of grinder (horizontal type) used with soaked soybeans when making tofu. (9) Photo of continuous filter for soy-milk preparation. (10) Photo of small-scale soy-milk processing plant. (11) Line drawing of molding box [forming boxes with lids] for making regular tofu. (12) Photo of yaki-dofu [grilled tofu]. (13) Photo of okara in a glass cup. (14) Line drawing of molding box [forming box] for silken tofu. (15) Photo of silken tofu. (16) Flow sheet for packaged tofu production [GDL]. (17) Photo of packaged tofu in package. (18) Flow diagram of large-scale process for making tofu and abura-agè with 26 pieces of equipment labeled. (20) Flow diagram of continuous process for making packaged tofu [GDL]. (21) Photo of 2 pieces of abura-agè. (22) Photo of deep fryer for making abura-agè. (23) Photo of nama-agè [deep fried tofu cutlet]. (24) Photo of two types of ganmodoki. (25) Line drawing for tofu kneader for ganmodoki production. (26) Photo of kôri-dôfu [dried frozen tofu]. (27) Flow sheet for making dried-frozen tofu. (28) Flow diagram of process for making large-scale dried-frozen tofu. (29) Photo of aseptic carton and glass of soy milk. (30) Flow sheet for making aseptically packaged soy milk. (31) Photo of 5 different forms of dried yuba. (32) Photo of kinako in two clear glass bowls. (33) Photo of soybean sprouts in a woven bamboo basket. (34) Flow sheet for making miso. (35) Three different types and colors of miso on 3 bamboo rice paddles (*shamoji*). (36) Line drawing of cut-away view of traditional pressure cooker (*koshiki*) for rice cooking. (37) Diagram of continuous rice cooker with 7 parts labeled. (38) Line drawing of *Aspergillus oryzae* with conidia (spores), sterigmata, and mycelium labeled. (39) Photo of pieces of koji. (40) Diagram of modern fermentation room for making koji. (41) Cut-away view of miso fermenting in a wooden vat with stone weights above vinyl film on top. (42) Line drawing of a mashing machine for miso. (43) Photo of natto in rice straw wrapper and polystyrene tray. (44) Cross sectional view of pressure cooker for soybeans. (45) Line drawing of rotating mixer to combine cooked soybeans with pure-cultured *Bacillus natto*. (46) Photo of soy sauce table dispenser. (47) Flow sheet for making Japanese soy sauce (shoyu). (48) Transparent view of crusher (roller) for roasted

wheat in making soy sauce. (49) Photo of modern stainless steel fermentation tanks / vats (indoors). (50) Photo of a jar and a cup of sufu [fermented tofu]. (51) Diagram showing relationships between modern soy protein foods.

Note 5. Surprisingly, edamamé, one of the most popular soyfoods in Japan, is mentioned only once, in passing (p. 84) in this book.

Photos on the rear cover show Tokuji Watanabe and Asako Kishi. A brief biography of each is given.

Tokuji Watanabe: Born in 1917 in Tokyo, he graduated from the Faculty of Agriculture of Tokyo University in 1941, with Doctor of Agriculture. In 1945 he entered the National Food Research Institute (NFRI), of which he became director in 1971. In 1977 he resigned that position and became a professor at the Kyoritsu Women's University, where he now teaches. Address: 1. D. Agr., Kyoritsu Women's Univ., Tokyo.

1664. Worthington Foods, Inc. 1984. Introducing all new, all natural, Natural Touch: The taste nobody can touch (Ad). *Natural Foods Merchandiser*. June. p. 18-19.

• **Summary:** This large-format, two-page color ad shows packages and prepared dishes for Natural Touch Tofu Garden Patties, Okara Patties, Harvest Bake Lentil Rice Loaf, and Kaffree Tea. Okara is described as "the protein-rich, high-fiber pulp from cooked soybeans."

This 2-page ad also ran in the July issue (p. 23-24). Address: Worthington, Ohio 43085.

1665. Reed, J.D. 1984. Its trendy, tasty and Tofutti: This summer's hot frozen dessert is no-cream ice cream. *Time* 124:81. July 9.

• **Summary:** This two-thirds page article represents the biggest print media coverage for Tofutti to date. "Americans are licking up 40,000 gal. a week of this chilly concoction. Production has nearly doubled in the past month. Move over Frusen Glädjé and frozen yogurt; this is the summer of Tofutti. A photo shows smiling "Tofu tycoon David Mintz and his chic chiller."

Mintz is experimenting with tofu-based drinks and a vegetable salad. His next obsession is a nonmeat burger... It is made of tofu and has the taste and smell of a beefburger. Says the tycoon of tofu: 'I am close to this tremendous breakthrough. It is made of tofu and has the taste and smell of a beefburger.' Given his marketing skills, it may not be long before Tofutti addicts sit down to the main course: a Big MacFutti."

1666. **Product Name:** Lite Chef Tofu Mixer [California Burger, Rancheros Fiesta, Mandarin Almond Stir-Fry, or Pasta Italiano].

**Manufacturer's Name:** Essential Foods, Inc.

**Manufacturer's Address:** P.O. 8462, Emeryville, California. Phone: 314-832-7575.

**Date of Introduction:** 1984 July.

**Wt/Vol., Packaging, Price:** 3.8 oz to 5.9 oz plastic laminated envelope. Retail for \$1.69 to \$2.09.

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot in Soyfoods. 1984. Summer. p. 45. "No Roly-Polies." In foil pouched versions. Talk with Craig Ramsell. 1989. March 14. Phone: 415-655-8662. John Beckley started Essential Foods in August 1982. Craig Ramsell and Gary Whitney joined as principals in 1983. When they developed the 4 products described above, the first product, The First Great Tofuburger Mix, was discontinued. In Oct. 1985 Essential Foods sold all 4 products to Sunfield. Now Craig has the rights back and is looking for a buyer.

Ad in Natural Food Merchandiser. 1984. "The tofu promise comes to light! Lite Chef tofu mixers."

1667. **Product Name:** Firm Nigari Tofu, Soymilk, and Soysage.

**Manufacturer's Name:** Maritime Soycraft.

**Manufacturer's Address:** R.R. 4, Antigonish Harbor, NS, B2G 2L2, Canada. Phone: 902-863-2903.

**Date of Introduction:** 1984 July.

**New Product–Documentation:** Form filled out by Sian McLean (a woman), ca. 1984. They started on 1 July 1984 and now make firm nigari tofu, soymilk, and soysage. The business has no name yet. "Small word-of-mouth operation so far." They use 60 lb/week of soybeans.

Letter from Sam Weinreb. 1988. Jan. 14. He just talked with Hugh and Sian McLean. Talk with Sian McLean. 1988. Feb. 15. They started making tofu July 1984. His company is now named Maritime Soycraft, R.R. 2, Heatherton, NS, B0H 1R0, Canada. Phone: 902-386-2474. Says he started making soysage in 1986, but it is shown on his 1984 form. Call from Sian. 1991. Nov. 18. They make mostly tofu, plus some soymilk. They no longer make soysage. They make about 500 lb/week of tofu. There is a nice little steady market and people really like Maritime tofu. Her first name is Welsh.

Letter from Sian McLean. 1994. July 16. Maritime Soycraft is now located at Keppoch Mountain, R.R. #1, Antigonish, Nova Scotia B2G 2K8, Canada. Phone: 902-863-3978. This is a new tofu shop she built. She presently makes only fresh bulk tofu. She left her former marriage with Hugh and has a new partner who wants to do tofu production.

Talk with lady who works with Sian. 1995. May 15. Sian now has a vacuum packaging machine for her tofu, and she can get a shelf life of two weeks before the product turns yellow. This vacuum-packed tofu is not yet on the market.

Talk with Rick Turner of Maritime Soycraft. 1999. Dec. 2. They moved 1½ to 2 years ago to R.R. #4, Antigonish, NS B2G 2L2. Their phone number has not changed. They are now a partnership with 3 partners, Sian, Rick, and one other full-time person. They make about 1,000 lb/week of tofu, but

have to expand to take on a new chain. So their business is growing and they are looking for new equipment.

In Oct. 2002 John Hardy of and his wife, Louise, Prince Edward Island bought Maritime Soycraft from Sian Newman Smith of Antigonish [Nova Scotia]. “We bought Sian’s equipment, recipes, and markets and moved it all over here” [to PEI] John says. “We hope to build on Sian’s success and eventually to expand the business.” Their business is now known as Soy Hardy. Source: [www.acornorganic.org/farmers](http://www.acornorganic.org/farmers) (Nov. 2013). A call to Acorn Organic reveals that the tofu maker on Prince Edward Island is no longer in business. However while they were still in business, they made a nice YouTube video about their tofu shop: “HBTv-5: SoyCraft Organic Tofu.”

1668. Marson, Alan. 1984. Tofu: A new health food from Japan. *Bakers’ Review (Watford, England)*. July. p. 31, 34.  
 • **Summary:** “Are bakers in this country missing out on potentially lucrative markets by ignoring some of the current trends in our eating habits?... The consumer is now looking for healthy ingredients in everything that he eats.”

“Whether we like it or not, it is a fact that in the U.K. we have a tendency to follow closely on the heels of the Americans when it comes to innovation. This time however, they have got it right, because they have latched on to an ingredient that fulfills many of the criteria for healthier bakery lines. It is called tofu... Tofu is extremely high in protein and yet low in calories. An ideal extender for the health-conscious.”

“In the US, the use of tofu is estimated to be growing at the rate of 25-35% per year. There are now 150 plants producing well over 45 million pounds of the food, which in monetary terms means about £25 million worth.”

“According to Paul Jones, managing director of Paul’s Tofu, suppliers of baked products to Holland & Barratt, he is successfully using tofu in the manufacture of quiches, savoury pasties and cheese cakes: ‘I also use it for icing and toppings,’ he said. ‘It is white, delicate and blends well.’”

“A domestic version of Tofu is already being sold in this country through Sunwheel Foods—part of the Holgran Group of companies. Roy Harris, the company’s sales and marketing director reports that sales last year were up over 35 per cent on the previous year.”

“We have already seen the rise of the Vegeburger, and following closely behind is the Tofuburger. Now is the time for bakers to be seeking ways of cashing in on this relatively new—but nevertheless enthusiastic—search by the British housewife to find foods that she knows will at least do her family no harm—if not a great deal of good.”

“As there would appear to be no cost differential between choosing eggs or tofu as an ingredient, perhaps it would be worthwhile to do a little experimenting on a limited scale, by producing something in the take-away snack line—which in itself is an expanding market and ripe for further

growth. Don’t be put off by its bland flavour for its is this very blandness which makes it usable for so many different types of dishes. There is no reason why tofu—although a basic food in itself—should not be utilised to a high degree of sophistication, even to gourmet levels.”

A large photo shows a package of Morinaga Ever-Fresh Silken Tofu. Address: Holgran Malt Products, England.

1669. **Product Name:** Tofu Burgers (Mushroom and Onion Flavored).

**Manufacturer’s Name:** Nasoya Foods.

**Manufacturer’s Address:** Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.

**Date of Introduction:** 1984 July.

**New Product—Documentation:** Ad in Soyfoods. 1984. Summer. p. 3. Vacuum packed. Letter from John Paino. 1989. Nov. 12. This product was never sold.

1670. Brisson, David. 1984. Natural foods go gourmet. *East West Journal*. Aug. p. 22, 24-27.

• **Summary:** Brother Ron Pickarski, a 34-year-old Franciscan friar from Miami, Florida, is a world class vegetarian chef, who won a bronze medal in the 1980 Culinary Olympics, and who likes to use tofu in his creations. At this year’s Olympics in October in Frankfurt, Germany, he will prepare Tofu Sushi with Mikado Sauce and Seitan Moutard Bitard (a vegetarian steak). A consultant for Legume, Inc. he has created such sumptuous dishes as Tofu Bourguignon and Tofu Tetrizzini for them. Contains an illustration and biography of Pickarski. An illustration shows Brother Ron. Address: Brookline, Massachusetts.

1671. House, S.L. 1984. Spotlight: Institutional foodservice. Alive Polarity, Murrieta, California. *Soyfoods*. Summer. p. 6.

• **Summary:** “Northeast of San Diego and southeast of Los Angeles lies a peaceful place where people can go for a day, a week, a month to experience spiritual renewal and better health practices. Among other diverse activities, Alive Polarity’s Murrieta Hot Springs offers mudbaths, marriage counseling and superb vegetarian cooking.”

“The lacto-vegetarian diet offered at Alive Polarity emphasizes purifying, health-building and gourmet dishes. Soyfoods make up a large part of the menu.

“More than 50 percent of our meals contain soy products,’ says Breese English, kitchen manager. Tofu is by far the soyfood used most often because it’s so receptive; it adds little flavor of its own yet takes on the flavor of ingredients used with it. ‘I’d say we consume at least 70 pounds a day.’”

“Alive Polarity’s restaurant serves breakfast, lunch and dinner buffet style, totaling about 1000 meals daily.”

“While tofu is a primary ingredient in many of the recipes, other soy products are used extensively as well. Bragg’s Liquid Aminos and tempeh are two products that

have found a place in Alive Polarity's kitchen.

"Bragg's is a liquid mineral soy bouillon often used instead of soy sauce or tamari. Its slightly less salty flavor had made it a popular item for the cooks as Mary Ann Beauchamp attests. 'I use it in almost everything, sauces, salad dressings, soups.' About 25 gallons of Bragg's Liquid Aminos are consumed weekly.

"Tempeh is the third most popular soy product used. Tempeh is a complete protein food with a texture that lends itself to hearty foods and entrees. Used in place of hamburger for summer barbecues, tempeh burgers are very popular. The kitchen staff estimates they use about 400 tempeh patties a week.

"Two soyfoods recently introduced at Alive Polarity include soymilk and Tofutti. Given that almost 20 gallons of soymilk are consumed weekly, it appears it's already gained acceptance among the clientele."

"Mary Ann Beauchamp, whose mother is Japanese explains, 'My mother is amazed with the things we do with tofu. The Japanese use tofu in traditional ways for specific purposes. I don't feel that they experiment or work with it as we do.' For example, Beauchamp explains a favorite recipe, Tofu Tidbits. 'You take cubes of tofu and bread them in a mixture of flour, nutritional yeast, herbs and spices. Then layer the cubes in a pan with a small amount of oil. Bake for an hour at 500°. Serve with tartar sauce and lemon wedges, it's fantastic. People just love it.'"

A photo shows the staff: Jane Buck, Breese English, Mary Ann Beauchamp, and Diane Luzzi. Contains a "favorite recipe" for Tofu french toast.

1672. Leviton, Richard. 1984. Soyfoods market: The top 15 prepared convenience soyfoods. *Soyfoods*. Summer. p. 42-43.

• **Summary:** "Since 1980 most of the innovation—and excitement—in the American soyfoods industry has centered around what are now called prepared convenience soyfoods." The top 15 are: (1) Legume Light & Natural Tofu Entrees. (2) Edward & Sons' Miso-Plus Jalapeno and Chive miso dips. (3) Farm Foods' Ice Bean and Ice Bean Sandwich. (4) Tofu Time's Tofutti. (5) Light Foods' Light Links (tofu hot dogs). (6) Brightsong Light Foods' Tofu Desserts and Dips. (7) Tomsun Foods' Spice and Herb Tofu. (8) Eden Foods' Edensoy. (9) Nasoya's Vegi Dips. (10) Sonoma Specialty Foods' Nutcracker Sweets. (11) Pacific Tempeh and Soyfoods Unlimited's Tempeh Burgers. (12) Soyfoods Unlimited's Leandro's Meatless Lasagna. (13) Fantastic Foods' Tofu Burger Mix. (14) Quong Hop's Soy Fresh. (15) Garden of Eatin's Nuclear Freeze (soymilk ice cream pops). A photo shows each product.

1673. **Product Name:** Tofu Bagel Link (A Tofu Hot Dog in a Whole Wheat Bagel).

**Manufacturer's Name:** Light Foods Inc.

**Manufacturer's Address:** St. Louis, MO 63017.

**Date of Introduction:** 1984 August.

**Ingredients:** Tofu Light Link, tofu, soy oil, water, dried egg white, textured soy protein, salt, barley flour, honey, tamari, spices, natural extracts of paprika, natural spice oils. Whole wheat bagel: High gluten flour, whole wheat flour, bran, honey, salt, yeast.

**Wt/Vol., Packaging, Price:** 5 oz.

**How Stored:** Frozen.

**New Product—Documentation:** Food Report (Lehmann). 1984. Aug. Friedman. 1985. Adweek East. Dec. 9; Poster. 5 oz. Frozen.

Spot in Natural Foods Merchandiser. 1986. Jan. Shows a photo of a Tofu Bagel Link.

Label. 1988. 6 by 2.5 inches. Blue, beige, and white. "Real tofu."

1674. **Product Name:** Checkerboard Farms TenderLean (Mixture of 25% Isolated Soy Protein and 75% Ground Beef).

**Manufacturer's Name:** Ralston Purina Co.

**Manufacturer's Address:** Checkerboard Square, St. Louis, MO 63164.

**Date of Introduction:** 1984 August.

**Ingredients:** 75% lean beef, 25% isolated soy protein.

**Wt/Vol., Packaging, Price:** 1.5 or 3 lb plastic, vacuum-sealed chub packs (sausage shaped).

**How Stored:** Refrigerated.

**Nutrition:** 4 oz. Tenderlean (vs. ground beef): Calories 240 (380), protein 21 gm (17.5 gm), fat 17 gm (34 gm), cholesterol 60 mg (80 mg), moisture 74 gm (61 gm).

**New Product—Documentation:** Register (Des Moines).

1984. Aug. 16. "Ralston hopes beef, soybeans mix."

Beefweek. 1984. Aug. 20. p. 17. Product contains 75% American lean beef and 25% soy protein, and has 50% less fat than the USDA standard for ground beef. The first fresh meat product to bear full nutritional labeling. The product is targeted at "Active Lifestyle" consumers who eschew fat and cholesterol in beef. Missouri Beef Cattleman (Kansas City, MO). 1984. Sept.

1675. Nordquist, Ted. 1984. Re: New developments with tofu at Aros in Sweden. Letter to William Shurtleff at Soyfoods Center, Sept. 6. 1 p. Typed, with signature on letterhead.

• **Summary:** "The company continues to expand, sales have doubled each year since we started in 1980. We now have steam injected cooking and pasteurization with a 30 day shelflife on all six products: Tofu (12% protein, made with nigari), tofu (8% protein, made with calcium sulfate), tofuburgers, tofulindstrom (red beets), Indian curry and marinated tofu. We will soon introduce tempeh, deep fried and marinated. We also plan to introduce a sandwich spread much like liverwurst in consistency before the end of this

year.

“We produce about 108 kg of tofu per hour now and between 1.5 and 2 tons of products per week. I will be attending the first European Soyfoods Workshop, Sept. 27-28 in Amsterdam...

“Would you please write a short resume about your work so I can submit it to the right people for the Alternative Nobel Prize” [Right Livelihood award].

Across the top of this handsome letterhead are three logos: (1) Left: aros sojaprodukter örsundsbro shows a little blue Viking with a horned helmet and big red heart. (2) Center: Aros. (3) Right: A Soyfoods Center, Sweden, with the California Soyfoods Center logo in all blue.

Enclosed with the letter: (1) Eight-panel brochure of “What is tofu?” and tofu recipes. (2) Aros mail order catalog (1 sheet, 8½ x 12 inches, blue on beige, 3 panels each side), with 8 books, a tofu kit, nigari, tempeh starter, and koji for making miso or amazake. Address: President, Aros Sojaprodukter, Bergsvagen 1, S-190 63 Orsundsbro, Sweden. Phone: 0171-604 56.

1676. **Product Name:** [Tempeh Burger–Deep-fried].

**Foreign Name:** Tempeh-Burger–Frittiert.

**Manufacturer’s Name:** Byodo Naturkost.

**Manufacturer’s Address:** Thalkirchenstr. 57, D-8000 Munich, West Germany. Phone: (089) 16 85 70.

**Date of Introduction:** 1984 September.

**Ingredients:** Soybeans, water, vegetables (Carrots, zucchini, soy sprouts) in varying proportions by weight, whole oats, whole wheat, brown rice, sesame seeds, sunflower seeds, spices, soy sauce (shoyu), sea salt, vinegar, beneficial mold culture (Edelpilzkultur) *Rhizopus oligosporus*. Ingredients predominantly organically grown.

**Wt/Vol., Packaging, Price:** 130 gm plastic bag.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Anthony Marrese. 1990. March 22. Based on a March 21 interview with Bernd Steyer, tempeh production manager and builder of their first tempeh incubator in 1984, when they started to make their own tempeh. Present production is said to be 50 kg/week of tempeh plus 500 burgers/week.

Bernd Drosihn. 1989. Tempeh: Ein traditionelles Nahrungsmittel mit Zukunft [Tempeh: A traditional food with a future]. p. 38. Says the company makes fresh tempeh from whole soybeans, tempeh burgers, and tempeh chips. A source of tempeh starter.

Letter (fax) from Harry Whitford. 1990. May 11. “We started making Tempeh Burgers (Tempehbürgers) later that fall (1984) after we realized we couldn’t keep the company going only on tempeh.”

Label sent by Anthony Marrese. 1990. April 15. 5 by 2.25 inches. Green on yellow, printed on front and back of plastic bag. “A nutritional soya specialty (Eine vollwertige Soja-Spezialität). Store at 4-8°C.”

1677. Dirar, Hamid A. 1984. Kalwal, meat substitute from fermented *Cassia obtusifolia* leaves. *Economic Botany* 38(3):342-49. Sept. [10 ref]

• **Summary:** In recent years there has been an increased interest in leaf protein as a potential source to “help alleviate the world shortage in protein.” The leaves of certain plants have been clearly shown to contain significant levels of protein.

In the Sudan, the green leaves of *Cassia obtusifolia* are fermented to produce a food product, kalwal, used by certain ethnic groups as a meat substitute. The fermentation takes about 2 weeks, then the product is sundried and used when needed. Kalwal contains about 20% protein on a dry weight basis. The two main microorganisms active in the fermentation are *Bacillus subtilis* and a species of *Rhizopus* fungus.

Note: Letter (e-mail) from Lorenz Schaller of Ojai, California, who sent this article to Soyinfo Center. 2012. Jan. 30. “*Cassia obtusifolia* has the common name ‘sickle-pod senna.’ I have grown the plant and have color transparencies of it.

“The seeds are roasted to make a medicinal tea (*habucha*) sold in packages in every Japanese grocery store. I once had a package on my exhibit table at a conference and Aveline Kushi walked by, stopped, pointed to the *habu* and said, “That’s my favorite tea. I have it every day.”

“The seeds (raw, unroasted) are used in place of yarrow stalks for casting the ancient oracle—*I Ching*. I keep a bottle of them in the cupboard for that use.” Address: Dep. of Agricultural Botany, Faculty of Agriculture, Univ. of Khartoum, Khartoum, Sudan.

1678. Mwangi, -. 1984. The Jamaica nutrition project. *Yard Roots Reports (Oakland, California)*. Sept. p. 4-5.

• **Summary:** The author is working to raise \$100,000 to develop a soy dairy in Jamaica to make tofu, soy-burgers, tempeh, soy milk, ice cream, mayonnaise and other products from soy beans. The Afrobean Foundation in Kingston is also interested in this idea. Two groups in Jamaica will find soy products useful in their diet. First, the more than 100,000 Rastafarians, most of whom are attempting to pursue a vegetarian diet. Second, Jamaicans of Chinese descent who have traditionally used soy products. “Most of the imported soybeans today are mainly used for making oil and for poultry and pig feed.” Readers are asked to send donations to Caribbean Media and Community Resources, Inc. in Oakland, California. Address: Caribbean Media and Community Resources, Inc., 314 17th Street #188, Oakland, California 94612. Phone: (415) 536-3031.

1679. **Product Name:** [Tofuburger].

**Foreign Name:** Tofuburger.

**Manufacturer’s Name:** Sojatopf. Renamed Soto in April

1989.

**Manufacturer's Address:** Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.

**Date of Introduction:** 1984 September.

**Ingredients:** Incl. tofu, vegetables, oatmeal, spices.

**Wt/Vol., Packaging, Price:** 100 gm vacuum pack.

**New Product–Documentation:** Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

1680. **Product Name:** Vegetable Feasts Chile Sin Carne.

**Manufacturer's Name:** Vegetarian Feasts.

**Manufacturer's Address:** 21 Carnwath Rd., Fulham, S.W. 6, London 3HR, England.

**Date of Introduction:** 1984 September.

**Ingredients:** Incl. textured soy flour (TVP, granulated), red kidney beans, tomato puree, onions, green and red peppers, mixed herbs, chili powder.

**Wt/Vol., Packaging, Price:** Microwaveable container with cellophane top.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Sonia Newhouse. 1988. Feb. 25. She founded this company and started to make vegetarian frozen entrees in March 1984, after having been cured of osteo-arthritis.

1681. **Product Name:** Vegetable Feasts Stroganoff.

**Manufacturer's Name:** Vegetarian Feasts.

**Manufacturer's Address:** 21 Carnwath Rd., Fulham, S.W. 6, London 3HR, England.

**Date of Introduction:** 1984 September.

**Ingredients:** Incl. textured soy flour (TVP, minced), mushrooms, peas, onions, sour cream, wine.

**Wt/Vol., Packaging, Price:** Microwaveable container with cellophane top.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Sonia Newhouse. 1988. Feb. 25. She founded this company and started to make vegetarian frozen entrees in March 1984, after having been cured of osteo-arthritis.

1682. Yoshimura, Sam. 1984. Re: Update on work with soyfoods. Letter to William Shurtleff at Soyfoods Center, Oct. 21–in reply to inquiry. 1 p.

• **Summary:** Shurtleff writes: "I just read a little blurb about you, written by your wife, that was in the *Madison Survey*. It indicated that you were now in Canada and again making soyfoods. Could I ask a few questions for use in the Adventist chapter of our history book?"

1. What is your present address and postal code. Ans: See above.

2. When did you leave Worthington Foods? Ans: Sept.

30, 1981 (Retired).

3. Could you please tell me a little about your new business? When did you start selling products? Are you working alone or with another company? What products do you make? Can you send me some descriptive or promotional literature on your products?

Ans: "Name of company: MGM Brans. I am a technical consultant of the above company. We started selling products in January 1982.

"Our main product is meat analogs—franks, sausages, sandwich slices, chicken nuggets & burgers. Currently we are developing tofu-based meat alternates [alternatives] & other products."

Note: Sam does not send any labels or descriptive literature. Address: Home: 19 Masedale Cres., Willowdale, ONT M2J 3A3 Canada; Plant: MGM Brans, 59-F Howden Rd., Scarborough, ONT M1R 3C7. Phone: 416-473-9254 or 416-752-6600.

1683. **Product Name:** [Soyastern Tofu-Burger].

**Foreign Name:** Soyastern Tofu-Burger.

**Manufacturer's Name:** Debrecini-Drosihn-Karas.

Renamed Soyastern Naturkost GmbH in Dec. 1985.

**Manufacturer's Address:** Roonstr. 38, D-5200 Siegburg, West Germany.

**Date of Introduction:** 1984 October.

**Ingredients:** Rice, Tofu (Water, soybeans\*), seasonal vegetables\* (carrots, celery, leeks, onions), sunflower seeds, sesame, vegetable oil, spices, sea salt. \* = Organically grown; Soyabohnen aus kontr. biologischer Anbau.

**Wt/Vol., Packaging, Price:** 6 x 8.5 inch plastic bag.

**New Product–Documentation:** Interview with Bernd Drosihn of Soyastern. 1987. Nov. 30. He is business manager at Soyastern. This deep-fried patty is the company's best seller among its ready to eat "Frischeprodukte." It is sold on the counter, and is not refrigerated. Label. 1987. 5.5 by 2 inches. Black on green. Printed on plastic bag.

Letter (fax) from Harry Whitford. 1990. May 11. Byodo started to fry Tofu Burgers in the fall of 1984. Lukas Kelterborn's last service to the company was to establish the tie to Soyastern, which was unable to fry burgers due to complaints by the neighbors. We started buying tofu from Soyastern in Cologne to make burgers for them—at a distance of 400 miles!

Note: This is the earliest document seen (Feb. 2003) concerning Bernd Drosihn, part-owner of Soyastern. A soyfoods pioneer in Germany, he founded Viana in 1989.

1684. **Product Name:** Natural Touch Dinner Entree (Resembles a Chopped Steak).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984 October.

**Ingredients:** Vegetable protein (wheat gluten, soy protein concentrate), soybean and/or corn oil, egg white solids, calcium caseinate (milk protein), soy isolate, natural flavor, yeast extract, carob, onion, sea salt, garlic, spice.

**Wt/Vol., Packaging, Price:** 9 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Food Report (Lehmann). 1984. Oct.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

1685. Chandler, Michele. 1984. Soybeans had an early friend in Henry Ford. *Detroit Free Press*. Nov. 22. p. 2A. Wayne Central.

• **Summary:** Four decades before Tofutti and other types of “soybean ice cream became the latest fashionable East Coast rage, auto magnate Henry Ford was dishing it up to his blue collar Rouge Plant workers. Ford, who rarely ate meat and had an interest in ways to promote more healthful foods, wasn’t just a wizard when it came to designing cars.

“During his experiments with soybeans in the 1940s, when he was in his 70s, he devised whole meals made with the beans, which still grow on 350 acres of Ford property on Dearborn, just north of the Ford Motor Co.’s World Headquarters. Lester Twork, a Dearborn resident who taught job skills to residents at Ford’s apprentice school after World War II, well remembers Ford’s soybean lunches. ‘Mr. Ford would make a point of saying we were having a soybean meal that day. Everything would be made out of soybeans—soybean milk, soybean whipped cream, soybean ice cream, soybean biscuits, a soybean mixture fried like hamburger,’ said Twork, now a volunteer at the Henry Ford Estate–Fair Lane.

“I remember that once, Henry Ford was in line just ahead of me when people were being served cafeteria-style, with large, stainless steel trays with many compartments. He picked up some of the biscuits and turned around and told me they were quite good. I just nodded...”

“Soybeans were planted on 350 acres of Ford Motor Land Development Co.–owned land near the intersection of Ford Road and the Southfield Expressway... The current soybean farmer is none other than Mickey Redmond, the former Detroit Red Wings hockey player who now broadcasts hockey games for the Canadian Broadcasting Co.”

1686. Bates, Cynthia. 1984. Re: History of The Farm’s work with tempeh. Letter to William Shurtleff at Soyfoods Center, undated. 3 p.

• **Summary:** “At long last, here are the last of the changes—none of them too radical.”

Note: For our complete history of The Farm’s pioneering work with tempeh please see: *History of Tempeh, a*

*Fermented Soyfood from Indonesia*, by Shurtleff and Aoyagi (1985, p. 42-46). Address: The Tempeh Lab., P.O. Box 208, Summertown, Tennessee 38483. Phone: 615/964-2286.

1687. **Product Name:** [Dry Casserole Mixes (Stroganoff Casserole, Chicken a la King, and Green Pepper Casserole)].

**Foreign Name:** Stroganoff Gryta, Chicken a la King, and Grönpeppar Gryta.

**Manufacturer’s Name:** Friggs Naturprodukter AB.

**Manufacturer’s Address:** P.O. Box 150, S-178 00 Ekerö, Sweden. Phone: 46 756 301 70.

**Date of Introduction:** 1984 November.

**Wt/Vol., Packaging, Price:** Cartons. About 14 Skr. retail.

**New Product–Documentation:** Food Report (Lehmann). 1984. Nov. Each pack yields three portions in 15-20 minutes.

D. Kundrum. 1986. *Foreign Agriculture*. Jan. p. 7. “ASA [American Soybean Assoc.] taps growth potential for soy protein products in Sweden.” “In 1984, the ASA started a major soy protein promotion campaign with Nordium AB, the market leader in health food sales in Sweden. Nordium has introduced three new soy protein-extended lunch products under the brand name of Friggs.” Photos show the labels of three products: Stroganoff Gryta, Chicken a la King, and Grönpeppar Gryta.

Letter (fax) from Peter F. Zeuthen of Food from Sweden USA. 1990. July 2. Gives address and phone number.

Talk with Ted Nordquist. 1990. Nov. 23. Friggs is owned by Procordia, which is the mother of a vast group of companies that sell dry goods mostly (90%) to food chains.

1688. **Product Name:** Lightlife Meatless Fakin’ Bacon (made from tempeh). Renamed Marinated Smoky Tempeh Strips by about April 1997.

**Manufacturer’s Name:** Tempehworks, Inc.

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302.

**Date of Introduction:** 1984 November.

**Wt/Vol., Packaging, Price:** 6 oz 170 gm in plastic bag.

**Nutrition:** Per 2 oz.: Calories 79.4, Protein 8.4 gm, carbohydrates 5.6 gm, fat 2.6 gm, sodium 233 mg.

**New Product–Documentation:** See next page. Food Report (Lehmann). 1984. Nov. Label. 1985, undated. 4 by 9.5 inches. Brown and orange on yellow. “100% Natural. Cholesterol free. Delicious and nutritious.” Package changed so that Fakin’ Bacon is one of three types of Meatless Deli Slices. Red and brown on white. “Ready to eat. Ready to heat. Delicious and Nutritious.” Layton. 1988. Greenfield Recorder. May 20. p. 25. Fakin’ Bacon retails for \$1.75 a pound, roughly the same as pork bacon.

1689. **Product Name:** Lightlife Meatless Deli Slices (Made from Tempeh) [New York Style ‘Strami, or Kansas City B.B.Q.].

**Manufacturer’s Name:** Tempehworks, Inc.

1984

best on the market... said Doris Flynn of New Jersey

## Lightlife line introduced by Tempehworks to rave reviews

ATLANTA, July 22 - Tempehworks, Inc. introduced its new product line at the NNFA show here. The new members of the Tempehworks troupe are Fakin' Bacon breakfast strips, New York 'Strami and Kansas City B•B•Q deli slices. Perfectly typecast to appear in breakfast, lunch and dinner performances, the entire Lightlife line boasts authentic texture and flavor while offering low calories, high protein, and absolutely no cholesterol. The new stars were only in town for a four day engagement, but left a trail of loyal fans from coast to coast.

Scientists praise nutritional value and of meatless

### Lightlife MEATLESS

Vacuum packed and pasteurized

40 day refrigerated shelf life

© 1984 TEMPEHWORKS, INC.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302.

**Date of Introduction:** 1984 November.

**Wt/Vol., Packaging, Price:** Vacuum packed in 6 oz poly bag. Retail for under \$2.00.

**How Stored:** Refrigerated, 40 day shelf life. Or frozen.

**Nutrition:** Per 2 oz.: Calories 79.4, protein 8.4 gm, carbohydrates 5.6 gm, fat 2.6 gm, sodium 152 mg.

**New Product–Documentation:** Label. 1985, undated. 4 by 9.5 inches. Red and brown on white. “Ready to eat. Ready to heat. Delicious and Nutritious.”

1690. *Sun (Baltimore, Maryland)*. 1984. Eating less meat (Editorial). Dec. 23. Sunday.

• **Summary:** There is growing alarm about over-use of farmland in the USA and concern over health-effects of too much cholesterol. Both problems arise from the same cause: “eating meat and dairy products.”

“Advocating outright vegetarianism for a majority of Americans would be foolish. But a decline in the amount of meat and dairy products in the U.S. diet seems inevitable. Entrepreneurs are successfully marketing products ranging from ice cream-like ‘Tofutti’ made from soybeans, to soyburgers.”

1691. Rosebrock’s Tofuburger Cafe. 1984. December. New soyfoods restaurant or deli. 1697 Pacific Ave., Venice, CA 90291.

• **Summary:** Linda Burum. 1987. Los Angeles Times. May 31. p. 95-96. Try the Pestoburger or Tofuburger. Address: Venice, California. Phone: 213-450-9169.

1692. **Product Name:** Chilli Style Tofu Burgers.

**Manufacturer’s Name:** Cauldron Foods Ltd.

**Manufacturer’s Address:** 4, Conduit Place, Lower Ashley Rd., St. Paul’s, Bristol BS2 9RL, England.

**Date of Introduction:** 1984.

**Ingredients:** Tofu (Soybean curd), brown rice, textured soy flour, tomato puree, shoyu (soybeans, wheat, water, salt), herbs, chilli [chili] spices, sea salt, soy oil, yeast extract, onion, extract, dried garlic. citric acid.

**Wt/Vol., Packaging, Price:** 150 gm poly bag, 2 burgers per bag.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm: Calories 209, protein 15.95 gm, fat 12.05 gm, carbohydrates 6.6 gm.

**New Product–Documentation:** Label. 1986, code dated. Red, yellow, brown and white. “Pre-Cooked–Eat cold or warm under grill. Contains no meat, dairy products or artificial additives.”

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1984. It is basically the same thing as the original Bristol Chilli Burger launched in 1982.

Label for “2 Chilli Flavour Tofu Burgers” sent by David

Greenslade. 1994. Oct.

1693. **Product Name:** Tofu Burgers [Savoury, Peanut, Nut, or Chilli].

**Manufacturer’s Name:** Cauldron Foods Ltd.

**Manufacturer’s Address:** 4, Conduit Place, Lower Ashley Rd., St. Paul’s, Bristol BS2 9RL, England.

**Date of Introduction:** 1984.

**Ingredients:** Savoury: Tofu (soya bean curd), brown rice, water, textured soy flour, tomato puree, shoyu (soya beans, wheat, salt, water), herbs, sea salt, soya oil, yeast extract, dried onion, dried garlic, citric acid.

**Wt/Vol., Packaging, Price:** 150 gm paperboard box, two vacuum packed burgers per box. Retail for 60 pence.

**How Stored:** Refrigerated or frozen. Do not refreeze.

**Nutrition:** Per 100 gm.: calories 200, protein 17 gm, fat 11 gm, carbohydrate 7 gm.

**New Product–Documentation:** Label. 1986, code dated. Paperboard box. Brown, green, red and black on white. “Just heat to eat. Contains no meat, dairy products, or artificial additives. Do not freeze.” New label. 1989, sent by Philip Marshall. Address is now 149 South Liberty Lane, Bristol BS3 2TL. Package bears the green “V” symbol “Suitable for vegetarians.”

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1984.

1694. **Product Name:** [Soy & Rice Tempeh Patty].

**Foreign Name:** Soja-Reis Laibchen.

**Manufacturer’s Name:** Natuerliche Lebensmittel. Paul Stuart Zacharowicz.

**Manufacturer’s Address:** Staudgasse 70, A-1180 Vienna, Austria. Phone: 0222/48 50 03.

**Date of Introduction:** 1984.

**Ingredients:** Tempeh (cultured fresh soy product), natural rice (organically grown; biologischer Landbau), vegetables, sea salt, spices/seasonings, sesame.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1987. 5.5 x 4 inches. Black, gold, and orange on white card stock. “Natur. Ready to serve, cold as a light meal or snack or warm as a main course. Contains no chemical colorings or preservatives.”

1695. **Product Name:** Tempeh, Soysage, and Soymilk.

**Manufacturer’s Name:** Oryana Soy Shop.

**Manufacturer’s Address:** 16591 Cherry Bend Rd., Traverse City, MI 49684. Phone: 616-941-0254.

**Date of Introduction:** 1984.

**New Product–Documentation:** Talk with Tom Slater (nicknamed Tom Tofu). 1988. Sept. 7. The company started making these three products in about 1984, as part of the Oryana Food Co-op, Inc. Today Oryana Soy Shop makes 35-50 lb/week of tempeh, and that is increasing. They make 2-3 gallons/week of soymilk, mostly by special request.

1696. **Product Name:** [Tivall Meat Analogs (Hamburger, Frankfurters, Schnitzel)].

**Manufacturer's Name:** Pedco Protein and Enzymes Development Ltd.

**Manufacturer's Address:** Kibbutz Lochamei Hagetaot, Mobile Post, Ashrat (Oshrat), 25220 Israel. Phone: 04-926-831.

**Date of Introduction:** 1984.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Michael Geringer. 1988. Jan. 15. The company started in about 1981. This meatless product line was originally developed for the industrial market but did not succeed. In 1984 Pedco was purchased by this kibbutz, which invested \$6 million in a food factory and converted the line to consumer products. In their first full year of business (1985) they did \$6 million in sales. The product is high quality, fairly high priced (it sells for about \$4/lb), and very successful.

Talk with Susan Ergas of Jerusalem Tofu. 1989. May 1. This company's meatlike products have been phenomenally successfully. They really simulate meat, being made from soya and other grains plus egg albumen. They are very expensive, professionally packaged and marketed (almost slick), and the company, located on a kibbutz, is quite large, and has made a fortune on the line. They made several million dollars in the first year after the products were introduced. They are exporting to many European countries and now to America. People in Israel are really looking for soy products. The companies and institutions want ready-made products, not things like tofu that require additional preparation/handling. Israeli Jews, even if they are not kosher, have a lot of resistance even to consuming non-dairy soy products with meat. To market through the supermarkets in Israel requires that you give them 90 day credit. During the inflationary period, many small food business went bankrupt because of this; by the time they were paid, it didn't even cover their expenses. But things are looking up for soyfoods now. Tivall once considered making their own tofu and decided not to.

Talk with Yoyam Getzler of Jerusalem Tofu. 1989. June 29. He thinks Tivall uses whole soybeans, not tofu, in their products. They are a very successful Kibbutz industry. A poll shows that one-third of the households in Israel use soyfoods. Tivall is THE name in soyfoods in Israel.

The company's letterhead in 1990 states: "Vegetarian food products grown with nature's goodness."

1697. **Product Name:** Sanitarium Health Foods B-B-Q Links (Vegetarian Hot Dogs).

**Manufacturer's Name:** Sanitarium Health Food Co.

**Manufacturer's Address:** 148 Fox Valley Rd., Wahroonga, Sydney 2076, NSW, Australia.

**Date of Introduction:** 1984.

**Ingredients:** Textured vegetable protein, vegetable oil, coconut oil, whey protein concentrate, egg albumin, torula yeast, modified starch, sauce, salt, dried autolysed yeast, onion powder, garlic powder, water added.

**Wt/Vol., Packaging, Price:** 430 gm.

**New Product–Documentation:** Letter with Label from Sanitarium Health Food Co. 1990. June 25. Gives product introduction date as 1984. Label is 10 by 4 inches. Red, yellow, black, and green on white. A color photo shows 3 links on a bed of scrambled eggs on a white plate with a half tomato and some small squash.

1698. **Product Name:** Tofu Tamales [Green Chili, or Red Chili].

**Manufacturer's Name:** Southwest Soy Foods.

**Manufacturer's Address:** 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.

**Date of Introduction:** 1984.

**Ingredients:** Corn, organic tofu (soybeans, water, calcium sulfate—a natural mineral), green or red chili, wheat berries, safflower oil, tamari (water, soybeans, salt), spices, salt, baking powder, lime.

**Wt/Vol., Packaging, Price:** 20 oz plastic vacuum pouch contains 6 tamales, 8 inches square. Retail for \$2.00 (9/90, New Mexico).

**How Stored:** Frozen or refrigerated.

**New Product–Documentation:** Talk with Richard Jennings. 1987. Dec. 28. Gave date of introduction. Labels brought by Richard Jennings. 1990. Sept. 20. 3.5 by 3 inches. Self adhesive. Green or red on yellow. Illustration of corn with leaves. “Real Fast Foods. Steam for 15 minutes. Bake covered for 12 minutes at 350°F. Microwave for 6 minutes.” Later version has a UPC indicia.

1699. **Product Name:** Tempeh Specialties [Soy/Rice, Italian Tempeh, Soy/Peanut, or Tempeh Burgers].

**Manufacturer’s Name:** Soy Shop.

**Manufacturer’s Address:** 1863 Memorial Dr. S.E., Atlanta, GA 30317.

**Date of Introduction:** 1984.

**Ingredients:** Burgers: Organically grown soybeans, natural apple cider vinegar, nutritional yeast, herbs & spices, organic whole wheat flour, tempeh cultures.

**Wt/Vol., Packaging, Price:** 8 oz. Retail for \$1.29.

**New Product–Documentation:** Label. 1985, dated. 4.5 inches square. Green and white on yellow. Four labels in one. Very creative and economical.

1700. **Product Name:** Tempeh Burger/Cutlet, Mild Italian Soysage.

**Manufacturer’s Name:** Swan Gardens, Inc.

**Manufacturer’s Address:** 1111 N.W. 22nd., Miami, FL 33127.

**Date of Introduction:** 1984.

**Ingredients:** Tempeh (cultured soybeans), purified water, soy sauce, herbs.

**Wt/Vol., Packaging, Price:** 8 oz. Burger/Cutlet retails for \$1.11. Soysage retails for \$0.79.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Labels. 1984, undated. 3 by 4 inches. Red, white, blue, yellow, and black. “Fast food. Easily cooked. No preservatives. All natural.”

1701. **Product Name:** Chicken (Meatless; Resembles White Meat) [Slices, or Diced].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984.

**How Stored:** Frozen.

**New Product–Documentation:** Manufacturer’s catalog. 1984, undated. Frozen Products.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

1702. **Product Name:** Vegetarian Pie [Chicken Style, or Beef Style].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984.

**New Product–Documentation:** Manufacturer’s catalog. 1984, undated. Frozen Products.

1703. **Product Name:** Salami (Meatless).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984.

**Ingredients:** Textured vegetable protein (Soy concentrate and isolate, wheat gluten, yeast), egg whites, soybean and/or corn oil, flavorings (artificial flavors, salt, garlic powder,

disodium guanylate, disodium inosinate, monosodium glutamate), carob bean and guar gums, artificial colors, sodium alginate, calcium sulfate, tetrasodium pyrophosphate,...

**New Product–Documentation:** Manufacturer’s catalog. 1984, undated. Frozen Products. Label reads: “Vegetable protein slices. Artificial salami flavor. Completely meatless. Rich in protein. No preservatives.” Black and white photocopy of label sent by Worthington Foods.

**1704. Product Name:** Bolono (Meatless Bologna Slices).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984.

**Ingredients:** Textured vegetable protein (soy protein concentrate and isolate, wheat gluten), egg whites, water, soybean and/or corn oil, potassium caseinate, etc.

**How Stored:** Frozen.

**New Product–Documentation:** Manufacturer’s catalog. 1984, undated. Frozen Products. Label reads: “Vegetable Protein Slices. Artificial Bologna Flavor.”

**1705. Product Name:** Chili (Meatless).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1984.

**Ingredients:** Water, wheat gluten, red beans, tomato paste, soybean and/or corn oil, flavorings (hydrolyzed vegetable protein, garlic powder, extractives of spices), modified corn starch, salt, sugar, monosodium glutamate, caramel color, yeast extract, dextrose, niacinamide, etc.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Worthington Yesterday and Today. 1984. p. 11.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

**1706. Product Name:** [Tofu Burger with Sprouts].

**Foreign Name:** Sprossen Tofuletten.

**Manufacturer’s Name:** Yamato Tofuhaus Sojaprodukte GmbH.

**Manufacturer’s Address:** Moessingerstr. 41, 7406 Moessingen 2-Belsen, West Germany. Phone: 07071-71094 or 95.

**Date of Introduction:** 1984.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Klaus Gaiser. 1990. March 12. This product was launched in about 1984. Letter from Klaus Gaiser. 1996. Oct. 8. This product was made with mung bean, sunflower, radish, alfalfa, and

mustard seed sprouts—no soy sprouts; these burgers were deep fried.

1707. Bloodroot Collective; Beaven, Betsey; Furie, Noel; Miriam, Selma. 1984. *The second seasonal political palate: A feminist vegetarian cookbook.* Bridgeport, Connecticut: Sanguinara Publishing. xli + 242 p. Illust. Index. 23 cm. [35 ref]

• **Summary:** An excellent book and cookbook with a crystal clear explanation of why feminists should also be ethical vegetarians. The “Prefatory material” includes sections on “Feminism in the eighties,” “Ethical vegetarianism,” “Soyfoods,” and “On collectivity and work.”

The glossary includes brown rice, hoisin, koji, queso blanco, shiro miso, shoyu (the correct name for tamari), tahini, and tofu.

The index contains 27 entries for tofu, 19 for miso, 10 for tempeh, 4 for soymilk, and 1 each for okara and soysage. Address: 85 Ferris St., Bridgeport, Connecticut 06605. Phone: 203-576-9168.

1708. Brassel, Helen. 1984. *The natural foods recipe book: 800 low-calorie dishes to help you loose weight.* New York, NY: Arco Publishing, Inc. xiii + 305 p. Foreword by William P. Castelli, M.D., Medical Director, Framingham Heart Study. Index. 27 cm. [7 ref]

• **Summary:** This non-vegetarian cookbook contains many soy-based recipes: Tofu tuna bites (p. 15). Soy spread Italian (with soybeans, p. 16). Tofu spread (p. 17). Tofu sour cream (p. 18). Soybean soup (p. 37). Tofu vegetable soup (p. 37). Soy bean salad (p. 51). Tofu sprout salad (with mung bean sprouts, p. 60). Tofu salad with tomatoes (p. 60). Soybean bake (p. 84). Soy muffins (with full fat soy flour, p. 103). Vegetable wheat casserole (with soybeans, p. 105). Soybean pie with sesame salt (p. 164). To cook soybeans. Soy spaghetti made with Soy pasta (with soy flour, p. 178). Soybean noodles (with full-fat soy flour, p. 179). Soybean casserole (p. 183). Chili soybeans (p. 184).

Chapter 11 is titled “Tofu” (p. 168-76). It contains recipes for homemade Tofu (from whole soybeans or soy flour). Tofu mayonnaise. “Egg” salad. Japanese omelet. Tofu stroganoff. Tofu with chicken. Lasagna. Broiled tofu. Okara croquettes. “Sausage” (from okara). Tofu meatloaf. Sauced tofu. Tofu shish kebabs. Low-calorie pancakes. Tuna tofu soufflé. Tofu tuna bake. Tofu with crabmeat. Tofu blintzes.

“Call it bean curd, call it soy cheese, or call it tofu... You can also call it an ideal meat substitute, a dieter’s dream, and a budget stretcher. What’s it made of? Soybeans, the best vegetable protein available, as it is the only bean containing all eight of the essential amino acids...

“Though bland, tofu takes on the flavor of foods and sauces it is combined with. Though smooth in texture, once frozen, it has a surprisingly chewy consistency. Though it has no real taste of its own, when broiled it is transformed into a

dish with a definite meatlike flavor. It can also replace cream cheese, sour cream, and eggs in most dishes, thus reducing cholesterol as well as calories. It can be used instead of meat in casserole dishes, instead of mayonnaise in salads, and instead of ricotta in lasagna. In fact, it can replace meats, fish, poultry, and cheese in virtually any treasured favorite recipe.”

1709. Heidenry, Carolyn. 1984. An introduction to macrobiotics: A beginner's guide to the natural way of health. Brookline, Massachusetts: Aladdin Press. Distributor (Brookline Village, Mass.): Redwing Book Co. xi + 95 p. Illust. No index. 22 cm. [13 + 40 endnotes]

• **Summary:** Content: Preface. Cause and effect. The basic principle. Disease as imbalance. The macrobiotic diet. Nature's designs. Foods to avoid. More about yin and yang. Defining macrobiotics. An overview of food. Origins. Recommended reading.

The section on “Soyfoods, beans and vegetable proteins” states (p. 29): “There are many tasty varieties of beans and legumes that add variety and hearty nutrition to grain dishes and vegetable or soup recipes. In addition, there are many new soyfoods which are now making inroads into American cuisine. These include tofu (soy cheese), miso (soup-flavoring) and tempeh (soy meat). Another popular food is a product known as ‘wheatmeat’ which is a wheat gluten protein. Many of these foods are easily fashioned into soy ‘burgers’, pot pies, ‘steaks’ and ‘cutlets’. They can be stewed, grilled or roasted just like meat. There is even tofu ‘cheesecake’, tofu ‘quiche’, soy ‘sausage’ and various kinds of dips and sandwich spreads. These traditional natural foods—tofu, wheatmeat, and tempeh—are the versatile new wonder foods just arriving on the American scene and destined to make it big as the natural eater’s protein.”

Tofu and soy milk are mentioned on page 48. Tofu and tempeh are also mentioned on page 95.

Note: This may be Carolyn Heidenry's first book. Address: Macrobiotic author, Massachusetts.

1710. Kagaku Gijutsu-cho, Shigen Chosa-kai (Science & Technology Bureau). 1984. Shitei shokuhin seibun hyō [Standard tables of food composition in Japan. 4th ed.]. Tokyo. 370 p. Introduction by R. Kagawa, Joshi Eiyo Daigaku. 28 cm. [Jap; Eng]

• **Summary:** Pages 76-80 gives a nutritional analysis of the following Japanese soyfoods: Soybeans: whole domestic (dry, or boiled), USA whole dry, Chinese whole dry. Green immature: raw, or boiled. Soybean sprouts: raw, or boiled. Defatted soybeans: whole, or dehulled. Kinako (roasted, ground soybeans). Budō-mame. Tofu: regular (momen), silken (kinugoshi), soft, packed, Okinawa tofu, grilled (yaki-dofu), nama-agé (deep-fried tofu cutlets), abura-agé (deep-fried tofu pouches), ganmodoki, kori-dofu, Tofu chikuwa (steamed, or roasted). Natto: Itohiki natto, goto-natto, tera-

natto (fermented black soybeans). Miso: Rice koji miso (ama miso, light yellow miso, dark yellow miso), barley koji miso, soybean koji miso, dried miso, kinzanji miso, hishio miso. Okara. Soymilk: regular, reconstituted, soft drinks. Yuba: Fresh, or dried.

Page 254 gives the amino acid composition of soybeans, tofu, dried frozen tofu, yuba, okara, natto, and 3 types of miso. Address: Japan.

1711. Klevin, Jill Ross. 1984. Miss perfect. New York, NY: Scholastic, Incorporated. 171 p. See p. 90. 18 cm. \*

1712. Photographs of the Arcata Tofu Shop in Arcata, California (1980-1984). 1984. Arcata, California.

• **Summary:** Twenty-two color photos (most 4 by 5 inches), numbered with captions, were sent to Soyfoods Center on 24 Sept. 2002 by Matthew Schmit, founder and owner of the Arcata Tofu Shop. They were taken in Arcata between 1980 and 1984. Nos. 3-12 were taken in Dec. 1980. They show: (1) Oct. 1980—Inside of building in Arcata during complete remodeling of previous insurance offices (1,000

square feet). (2) Oct. 1980—Outside of same building at 768 18th St. Lease just signed. Newspapers in windows in preparation for remodeling. (3) Open for business. Large wooden sign above door reads “The Tofu Shop: Soy Deli and Whole Grain Bakery.” (4) Putting up sign over door. All people standing on sidewalk or ladder have their backs to the camera. Bottom left (standing on sidewalk): Paul Kusterman, who loaned money to help shop open; a truck driver for United Naturals, he had been selling tempeh burgers at local fairs since 1978. On ladder: Matthew Schmit. Bottom right (standing on sidewalk): Jackson Hollomon and wife Valerie. Jackson gave Matthew Schmit his first taste of tofu in the winter of 1973-74. In 2001 Jackson finished 3-year Buddhist retreat. On roof holding sign—On left: Man who created the sign. On right: Daniel Schmit (Matthew’s brother). (5) Grocery section inside The Tofu Shop, with bottles of sauces, packages of Miso Cup, and an issue of *Soyfoods* magazine on wooden shelves, with a “What is Tofu?” pamphlet on the wall. (6) Suzanne Kosciolk Schmit stocking specialty grocery shelves. A Learning Tree Tofu Kit is now visible. (7) Suzanne Kosciolk Schmit holding The Tofu Shop’s tiled logo (a writhing blue dragon on four white tiles in a wooden frame) next to the first shipment from United Naturals: Soybeans (from Arrowhead Mills), nigari, barley malt, natto miso, sea vegetables, etc. (8) Looking in the front door of The Tofu Shop; six shelves of special groceries, tempeh kits, etc. (9) Matthew Schmit dressed in white apron with “first batch grin.” Deli store front counter area is in the background. (10) Back wall of shop with supplies and custom forming box table with adapted “load bar” presses (idea from *Soyfoods* magazine). (11) Cutting first batch of tofu in stainless steel sink. (12) Close-up of The Tofu Shop’s first printed tofu labels in Arcata atop a deli take-out carton. Color and design are similar to those from Telluride—Blue on white, with a dragon in a circle. (13) 1981—Steve Rhine setting presses on metal forming boxes. (14) 1981—Matthew Schmit ladling *gô* from cooking pots to hand-screw apple-cider press used as a soymilk press. (15) 1982—Workers sitting on brick bench in front of shop. Left to right: Matthew Schmit. Stephen Lyons, tofu maker. Amy Pujanawski, deli worker. Tom Nawrocki, maker of tofu and tempeh. Rob Earhardt, tofu maker. John Hendricks, tofu maker. (16) 1982—Matthew Schmit packing tofu in take-out boxes on shelf of shop’s back wall. (17) 1983—Linda Redfield behind Tofu Shop table, promoting soyfoods at Arcata Co-op event. (18) 1983—Deli worker Jeannie Penn behind Tofu Shop table World Food Day at Arcata Co-op. Jeannie was one of the few female tofu makers ever employed by the shop. (19) 1982—Tofu Shop booth at Gemini Distributors Food Show, Fortuna, California (in the middle of cow country), attended by Matthew Schmit and Linda Redfield. Prepared dishes with signs on red checkerboard tablecloth: Creamy herb & onion tofu dressing. Marinated and baked tofu cutlets. Most early labels were rubber stamped on pre-printed generic Tofu

Shop adhesive labels. (20) Soyfoods books and magazines on tablecloth at Gemini Food Show. Two signs: Introducing tofu, and The Tofu Shop. (21) Different view of table, with sign: “The Tofu Shop Specialty Foods, Arcata, CA. We specialize in freshmade soyfoods.” (22) 1984—Shawn White at food demo in a store. Address: Arcata, California.

1713. Shanghai Cultural Publishing House. 1984. Touring metropolitan Shanghai. Translated by Ou Yamei. Shanghai, China: Shanghai Cultural Publishing House. 291 p. Illust. (some color). No index. 19 cm.

• **Summary:** The chapter titled “Famous cuisine and snacks of local flavour” (p. 212-28) contains much information about restaurants.

Restaurants of the Jiangsu style in Shanghai have on their menus “braised pork in preserved bean-curd sauce” and “stewed bean-curd with shrimp and ginger sauce.” “The celebrated Yangzhou Restaurant of Huai-Yang style serves, among its best-known dishes, boiled dry bean-curd slices” (p. 216-17).

Vegetarian restaurants (p. 219-20). The names of famous vegetarian restaurants in Shanghai are given. “The Gong De Lin Restaurant specializes in preparing vegetarian food in the way meat dishes are cooked. The restaurant makes its own bean-curd, gluten and spongy bean-curd. Its famous dishes are spongy bean-curd in thick sauce, vegetarian ham, vegetarian shrimps and vegetarian eels. The vegetarian restaurant in the Jade Buddha Temple treats diners with famous dishes like bamboo shoots in the shape of Buddha’s fingers,... All these are distinctive in colour, smell, flavour, and appearance, and well received, especially by the elderly people.

Note: This is the earliest English-language document seen (April 2013) that contains the term “spongy bean-curd.” Could it be frozen tofu? Address: Shanghai, China.

1714. Soybeans and soybean products. Quick & easy nutritious Japanese cooking no. 1. 1984. Chiyoda-ku, Tokyo: Joie, Inc. 116 p. Illust. No index. 27 cm.

• **Summary:** A beautiful cookbook, in which every recipe is illustrated with a color photo. Contents: Preparation tips. Metric tables. Soybeans with meat. Soybeans with eggs. Soybeans with fish. Soybeans with vegetables. Soybeans with seaweed. Yuba. Unohana [okara]. Natto. Koya-dofu. Ganmodoki. Aburage. Atsuage. Grilled tofu. Tofu salads. Deep-fried tofu. Tofu with oysters or kelp. Tofu with shrimps. Tofu with fish. Tofu with meat. Tofu with vegetables. Tofu soups. Tofu. Preparatory techniques for tofu. Information: Glossary, basic recipes.

Note: The publisher is also listed as Japan Publications, Inc. Address: Joie, 1-8-3 Hirakawa-cho, Chiyoda-ku, Tokyo 102, Japan.

1715. Photograph of Seth Tibbott and Alexander Lyon

standing in front of Turtle Island Foods at the old Husum School, Husum, Washington state, ca. 1984. 1984? Husum, Washington Undated.

• **Summary:** This digital photo, with caption, was sent to Soyinfo Center by Seth Tibbott, founder and CEO of Turtle Island Foods. Address: Husum, Washington.

1716. **Product Name:** [Tofu Burger].

**Foreign Name:** Tofuburger.

**Manufacturer's Name:** Christian Nagel Tofumanufaktur.

**Manufacturer's Address:** Oelkersallee 14a, D-2000 Hamburg 50, West Germany. Phone: 040/89 49 37.

**Date of Introduction:** 1985 January.

**New Product–Documentation:** Form filled out by Christian Nagel. 1988. Product was introduced in Jan. 1985. They now make 280-320 kg/month.

1717. **Product Name:** Tofu, Tofu Cheesecake, Tofu Burger, and Soymilk.

**Manufacturer's Name:** Dragonfly.

**Manufacturer's Address:** 9, Moorashes, Totnes, South Devon, England. Phone: 86-4724.

**Date of Introduction:** 1985 January.

**Ingredients:** Tofu (11/91): Organically grown soya beans, filtered water, nigari.

**New Product–Documentation:** Owner: Sue Harker.

Note from Simon Bailey. 1988. Oct. 10. Not operating at present. Business for sale. Future uncertain. Talk with Philip Marshall. 1990. March 29. This company now makes a small amount of organic tofu.

Letter from I.J. Mohammed of Oasis Wholefoods. 1991. Oct. 13. He worked for a while in about 1986 at Dragonfly as a partner. Since 1986 Dragonfly has been sold four times.

Letter and Labels from Simon and Dawn Boreham of Dragonfly Foods. 1991. Nov. 1. They are now located at 19A Riverside Buildings, Staverton Bridge Mill, Totnes, Devon, TQ9 6AQ, UK. Phone: 0803 865667. They first wrote on 9 Feb. 1990 to order books on tofu. Then Simon and his wife “purchased in June 1990 a small tofu factory in Devon called Dragonfly Foods. Together we regularly produce each week up to 200 kg of handmade organic nigari tofu, and 2,000 x 100 gm tofu burgers, with 4 different recipes, distributed and sold throughout the southern part of England. We are certified organic by the Soil Association and our products are approved by the Vegetarian Society.” They are now developing a “business plan with a view to move to a larger site with greater production capacity.” Label for Handmade Dragonfly Organic Tofu. 4 by 3 inches. Self adhesive. Green on white. “Soya bean cholesterol-free protein. Store below 4°C. Once opened, refrigerate in a bowl of fresh water.” The company is listed as “Dragonfly Kitchen, Staverton Bridge Mill, Totnes, Devon TQ9 6AQ. Phone: Staverton 0803

865667.”

Handwritten letter from Simon Boreham in reply to typed questions from William Shurtleff. 1991. Dec. 2. Hard to read. “Dragonfly first began making tofu in 1984, with the organic status of tofu certified by the Soil Association in 1991. Dragonfly was founded by Sue Harker and Sarah Budd. Simon is trying to persuade the Polytechnic South West Plymouth Business School (Drake Circus, Plymouth, Devon PL4 8AA, UK) to conduct a market research project on tofu. He encloses a copy of a letter from this organization stating that they plan to conduct such a study to be completed by early December 1991.

Letter from I.J. Mohammed of Oasis Wholefoods in England. 1991. Dec. 16. Dragonfly (which was the company’s official name) was probably founded at about the end of 1984 as a partnership by Sue Harker and Sarah Child. Their private home address was 9, Moorashes, Totnes, Devon, England. They started selling soyfoods (mainly tofu, tofu cheesecake, and tofu burgers) in early 1985. In Feb. 1985 Mr. Mohammed started to work with Dragonfly. Soon the business changed to a partnership between Sue Harker and himself. While he was there, the company made tofu (which he had learned how to make in Japan) and miso. He left the company in Oct. 1985. The company was then owned by Mark, and then by Linsey, who sold it to Simon and Dawn Boreham. Dragonfly Foods now makes tofu and tofu burgers.

Talk with Simon Boreham. 1999. Dec. 7. On 1 Jan. 1994 the company moved to its present address: 2A Mardle Way, Buckfastleigh, Devon TQ11 0NR, England. Phone: +44 1364 642700. When Simon and Dawn bought Dragonfly, the turnover (sales) was £25,000/year. Today it is £325,000/year. The company, which is growing nicely, now makes three types of tofu (natural, smoked, and deep-fried), and ten types of beanies (veggie burgers containing 45% okara). Simon has just registered to web domain names: beany.com (which will be a fun site) and tofu.co.uk (which will be a serious site).

1718. *Toyo Shinpo (Soyfoods News)*. 1985. [Tofu sausage. Made from 100% whole soybeans (Ad)]. Feb. 1. p. 3. [Jap; eng+]

1719. Liberatore, Paul. 1985. The Lady finally goes to sleep [Sleeping Lady Cafe in Fairfax]. *San Francisco Chronicle*. Feb. 4. p. 16.

• **Summary:** Fresh from the psychedelic 1960s, Bill Bramblett and 20 or so other young musicians, writers, poets, and artists opened the Sleeping Lady on 24 March 1972 in Fairfax, California. They wrote the bylaws for their cooperative venture on a place mat from a pizza joint and took over a struggling coffee house on Bolinas Road.

The Sleeping Lady was well known in the counterculture during the 1970s, serving vegetarian meals, and presenting live music and dancing seven nights a

week. It may have been the only nightclub in world history to outlaw smoking, offering its customers “a completely smoke-free environment.” “Young waiters and waitresses served veggie burgers, scrambled tofu,... and concoctions with names like Avocado Flip Out and the Basket Case.”

It functioned as a cooperative, owned and operated by its employees. All decisions were group decisions and every worker, from the lowest to the highest, had a voice in company policy. But the Lady’s de-facto patriarch for most of its 13-year existence was Bill Bramblett; he left the club in the early 1980s and moved up the street where he is a principal in Wildwood Natural Foods, which makes tofu, organic sandwiches, and healthy foods that are sold throughout the greater Bay Area. He has gone from hippie to yuppie, for Wildwood now employs 47 workers and grossed more than \$1 million last year—something the Sleeping Lady never did. Bramblett adds that the Sleeping Lady was not for money. It was real and very beautiful, but the rewards were intangible. A large photo shows Bramblett, arms folded, standing at the door of the once-lively Sleeping Lady.

E-mail from Billy Bramblett in reply to question from Shurtleff: Did the Sleeping Lady Cafe serve only vegetarian food? “While planning this adventure, we had a few gatherings and everyone brought their favorite dish. We created an omnivore dinner menu, but had regular vegetarian options. We had music every night and lots in the daytime as well. This was a true worker co-op in function. Early 1975 we went smokeless and meatless. We used eggs and dairy, made our own yogurt. We served breakfast, lunch for a number of years, but by 1978 we doing breakfast til 1, then open at 5 for dinner, music at 9, closed at 1A [a.m. = in the morning].”

1720. Aldon, Don. 1985. Work with Swift & Co. and non-dairy frozen desserts (Interview). *SoyaScan Notes*. Feb. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don started with Swift & Co. in 1961 in the “Vegetable Protein Products Division,” a brand new division of the oil mill department. The oil was their main product and the protein-rich meal was a by-product. The president of the oil mill department started this department to turn the meal into food. Research on vegetable proteins started in about 1957-58.

Their first product, launched in early 1961, was brand-named SFP (Swift’s Protein Food), a water-extracted, granular soy protein concentrate, containing 70% protein. It was not an isoelectric concentrate, and it was not texturized. It was used mostly in ground beef products, but also in some breads. More was sold to other companies than used in Swift’s meat products.

The next product was Texgran, a textured soy flour (somewhat like today’s TVP), invented by Dean Wilding in about 1963-64. He invented a texturization process while trying to find a way to extrusion cook soy flour. He

visited Wenger and saw a variety of products they made. He recognized their value and bought a machine. Don worked for about 18 months developing the process, doing research, and generating information to be used in the patent. Swift started selling the product before they applied for the patent. "As soon as our competitors saw this product, they recognized its value because they had been extruding dog food. Ralston Purina slammed things together and got a patent application in first. Two weeks later ADM had one in. Then 3-4 weeks later Swift applied." Swift started selling Texgran in 1964-65. The patent was finally issued in about 1971-72. Litigation went on for years and years between the three companies. Finally Ralston got the basic patent since they had applied first. ADM and Swift got a royalty-free license. They did that just to settle the litigation. Note: The final key U.S. patent (No. 3,940,495) was issued to Ronald Flier of Ralston Purina in Feb. 1976, based on an application filed on 17 Jan. 1973, but based on an earlier application filed on 10 July 1964.

Texgran was used by Swift as a meat extender and sold to other companies as well. The first retail product in which Texgran was used was artificial bacon bits, the first such product on the market. Don developed this product, which was launched in about 1977-78. It was based on Texgran, with flavors added then smoked in a smokehouse. Right after that, General Mills introduced Bac\*O's.

Swift, which had a combined dairy and ice cream department (the main plant was in Holland, Michigan) was also involved in making soy ice creams, using soy protein isolates purchased from Central Soya. For years, Swift also made an artificial nonfat dried milk (NFDM) called Provide, based on soy flour and cheese whey. They introduced it in about 1973-74. It was used by bakeries in place of NFDM. But Swift never really got into using isolates commercially. They were preparing to do so when they sold the business.

Dean's Dairy in Arizona was the first to start selling Swift's artificial milk, which contained vegetable fat, nonfat dry milk, and soy isolates. The product didn't last very long; it was used to sort of test the market. For details, ask Tony Scaletto, who was Mr. Dipper Dan—head of Swift's ice cream operations. "We had those ice cream parlors nationwide at one time. He developed all the ice creams and novelties. He may not remember all that went on with soy; we were compartmentalized." Note: Talk with Tony Scaletto (Feb. 26): He is certain that Swift never had a frozen dessert containing soy protein on the market. He tried using soy protein in a soft-serve product but it was unsuccessful.

Swift got out of the soy protein business because it was driven by the vegetable oil business. They sold the whole oil business (3 crushing plants) to A.E. Staley in about 1979. The one making soy products was in Champaign, Illinois. He is not sure exactly why, but probably because sales and earnings fluctuated too much and could not be controlled. Also, most of the old-timers who really knew the business

had retired.

Staley kept Provide and had it custom made outside. Since Staley had its own textured soy protein product, it shut down the Swift protein plant; SFP lingered on, then died.

Concerning Swift's early history: They started as a meat packer. Then in the 1930s or 1940s they started making oil products from lard. In about 1938, to extend their business, they got into the oil extraction business and soybeans. Today their big products are processed meats and poultry. Swift bought Hunt-Wesson in late 1983 or 1984. Swift & Co. is now a division of Beatrice Meats, Inc. in Oak Brook, Illinois. All the old company records on soy have been discarded.

Dean Wilding is now in the Philippines building houses. He left Kraft several years ago. His son is a contractor. Address: Alberto Culver, 2525 Armitage, Melrose Park, Illinois. Phone: 312-450-3000.

1721. Boyer, Robert A. 1985. Reminiscences: Automotive design—Oral history project. Dearborn, Michigan: Henry Ford Museum and Greenfield Village. 130 p. Accession #1673.

• **Summary:** This is the transcript of an interviews conducted by Dave Crippen of the Henry Ford Museum on 7 Feb. 1985 at Mr. Boyer's home in Dunedin, Florida. It covers all aspects of Boyer's work with soybeans at the Ford Motor Co., including: Growing up in Royal Oak, Michigan; his father worked in the accounting department of the Ford Motor Co. at Highland Park, Michigan (p. 1). Boyer's first meeting with Frank Campsall (p. 2). Growing up at the Wayside Inn (the oldest hotel in America, in South Sudbury, Massachusetts, p. 1-6). Attending high school in Framingham, Massachusetts (p. 6). First meeting with Henry Ford when the two ice skated together on the mill pond behind the Wayside Inn (p. 7). Moving to Dearborn in Sept. 1927 to attend Ford's Trade School (p. 7-11). Early work at the chemical plant (quarter-size model of Iron Mountain plant) in Greenfield Village (p. 12-13). Ford's trip to Germany [Peace Ship to Europe, in 1915 during World War I?] crystallized a lot of his thinking. The Great Depression and the origins of his chemurgic thinking. In 1934 the first National Chemurgic Conference was held at Dearborn Inn; Boyer was in charge of the program. Mr. Irene DuPont attended and Mr. Ford spent a lot of time with him. Before that, the DuPonts and the big banks did not trust Ford. (p. 14). Opening of Greenfield Village in late 1929 on the 50th anniversary of Edison's first successful light bulb (p. 15). Chemical experiments on truckloads of farm crops using a retort; Frank Calvert (p. 16-19).

Experiments starting in about 1933 using hexane as a solvent to extract the oil from soybeans; the Ford Extractor (p. 20-23). Boyer's group wanted to get pure protein from soybeans. So "in the lab we developed our own process for extracting the oil... We used hexane solvent, like dry cleaning. We'd flake the beans and run them through a pipe

that was full of hexane on an angle with a screw in it.” Hexane solvent is “distilled out of petroleum. It has a very narrow boiling point—66° centigrade. The Ford extractor... got quite a lot of attention. We built it across the street from the chemical plant. It was about 150 feet away. Mounted it all by itself because everybody was afraid of fire.” A roof was built over it but no walls. It was probably built in about 1933.

In 1933 at the World’s Fair [sic, the Ford Exposition of Progress] in New York City, Boyer’s group had a glass model (on a table) of this extractor that used hexane solvent.

Note: Ford boycotted Chicago’s A Century of Progress Exposition which opened in 1933, in part to call attention to the company’s 30th anniversary; he held his own “industrial fair,” first in Detroit and then in New York, in late 1933.

*Business Week* described it as “the greatest industrial show ever held.” Some 2.3 million people attended the two-week show in New York.

A working model of the Ford extractor, using hexane solvent, was at the Chicago World’s Fair, starting in mid-1934, in the Ford Industrial Barn. “They would never let you do that today. Too dangerous.”

Research on purified soy protein and soy plastics with formaldehyde; Bakelite (p. 24-25). Use of soy oil for foundry core binders for casting the Ford V-8 engine block; thus, the soy experiments are now commercialized. Building a 50 ton/day extractor (p. 26-27). Spinning soy protein fiber like rayon, based on spinning milk protein in Italy. Using the fibers to make wrinkle resistant synthetic wool, a suit of clothes for Henry Ford and others, overcoats, neckties, felt hats. “We also found that these fibers blended in very well with rabbit fur for making men’s felt hats. So the Hat Corporation of America took all the fiber we could make. It wasn’t very much and they would blend it in with rabbit fur. And they actually had them [the men’s felt hats] on the market.” Rabbit fur is very expensive (p. 29-36). Ford’s suit of clothes contained 65% wool and 35% soy fiber. Boyer leaves Ford Motor Co. in 1943. Problem with fiber was tensile strength, especially wet strength. Ford’s interest in this fiber work, and his fitness at age 75 (p. 37-38). Ford “was not a true vegetarian but he was pretty close” (p. 38). Edsel Ruddiman’s work with foods (p. 39-47). Boyer and Ruddiman attend American Soybean Assoc. soybean conference in Washington, DC [in Sept. 1932] where they saw “leather-like products that the Chinese make” [yuba]. Boyer tried unsuccessfully to use the idea to make “synthetic leather.” USDA’s experimental farm in Holgate, Ohio, where many soybeans sent back by W.J. Morse were tested (p. 40-42). Work with soybean milk (p. 43-46). The executive dining room in the Engineering Laboratory. Henry Ford invited Boyer to lunch there about 6 times (p. 45). Development of soy ice cream; lipoxidase enzyme inactivation (p. 45-46).

Visits to Battle Creek, Michigan and Dr. John Harvey

Kellogg (p. 47). Boyer’s work was with industrial products; the plastic car and structural plastics with hemp, flax, and phenol formaldehyde (soya protein Bakelite resin) (p. 47-64, 70). Making trunk lids using a hydraulic press (p. 50). Ford’s famous axe demonstration on a trunk lid (p. 50-52). Lowell Overly and Joe Stewart (p. 53-56, 61, 78-79). Boyer drives the plastic car home (p. 63). Ford’s aim with the plastic car: to provide industrial markets for farmers (p. 65). World War II stops plastic car development (p. 65-66). Contract to build an airplane wing of plastic (p. 66-70). The plastic lid and car contain little or no soy (p. 70). Fiberglass and the Chevrolet Corvette (p. 71). Plexiglas and the B-24 bomber made at Willow Run (p. 72). Edsel Ford’s death of stomach cancer in the spring of 1943 and its effect on his father, Henry (p. 73-74). Ending work with soy fiber (p. 74).

Boyer leaves Ford in 1943 and goes to work for Drackett Co. in Cincinnati, Ohio. Wife needs to leave Detroit. After 1943 Boyer’s career really takes off. Dr. Gangloff (p. 75-77). Use of soy fiber by Drackett in felt hats. “We sold them a lot of fiber and we decided to build a bigger plant.” Building a protein plant and a fiber plant in Cincinnati big enough to supply the hat company’s demands and larger “than we needed just to supply our fiber operation.” They also had a big operation in Cincinnati for high-impact (not structural) plastic (p. 78-80). Drackett’s marketing people knew how to market Windex and Drano “but they had no feeling for the soybean operation. So when Mr. Drackett died, they sold the whole soybean plant to Archer-Daniels-Midland (ADM, p. 81-83). Before Mr. Drackett died, Boyer’s division had developed commercial soy products, and Drackett was making money on the plastic (phenol formaldehyde plus hemp) and the fiber (p. 81). Use of soy protein as a paper coating (p. 83). ADM finally closes the old Drackett protein plant and sells it to Central Soya, which used the million bushel elevator capacity for storage (p. 83-84).

Shortly after Mr. Drackett died, Boyer left Drackett to work on his edible soy fiber, where he owned patents. “If we can make a fiber from soy protein that resembles the outside of a sheep, why not make a fiber that will resemble the inside (p. 84-86). Idea of building an edible soy protein plant is in Cincinnati, with Mr. Drackett’s approval (p. 87). Boyer tries to find companies to license rights to his landmark patent: Virginia Carolina Chemical (Taftville, Connecticut, p. 88); Swift & Co. (p. 89-92); Unilever, which was interested in peanut protein in Africa and at Port Sunlight near Liverpool (p. 92-94, 112-13); General Foods and Nabisco (Fairmont, New Jersey research lab) (p. 94, 99). Unilever and Swift pay licensing fees of \$20,000 a year plus consulting fees. General Mills and Ralston Purina (p. 94-95). Why Swift dropped its interest (p. 95-96). General Mills and Bacos (p. 96). Patent expires in 1971 after 17 years (p. 96). Worthington Foods (p. 97). Ralston Purina was getting into protein. In about 1956-58 they “had bought Procter & Gamble’s protein plant in Louisville [Kentucky], which was making industrial

protein for paper coating” (p. 98). Worthington Foods was too small to make their own soy protein fibers, so Ralston Purina made it for them (p. 78-80). Ralston Purina’s great success with edible soy protein and their small conflict: pet food vs. human food (p. 100-01). From 1961 to 1971 Boyer was receiving licensing fees / patent royalties from Ralston Purina, Worthington, and General Mills (p. 102). General Mills and Bacos (p. 103-04). Ralston Purina’s patent lawsuit against Far-Mar-Co. Ralston won \$8 million. Boyer testified as an expert witness (p. 104-05).

Boyer remarries and retires in 1971 (p. 102, 105, 107). Subsequent work with Miles and Worthington; the Morningstar Farms line (p. 105-08). Companies now spinning soy protein fiber (two in the Netherlands, one in Japan, one in Australia). Ford Foundation was not interested in his work with soy protein for Third World nations (p. 110). Central Soya bought the ADM plant that was located in Chicago (p. 113-14). Kellogg’s Corn Soya breakfast cereal (p. 114-15). Worthington’s Soyloin Steaks; all early Kellogg and Worthington vegetarian products based on wheat gluten (p. 119). When Worthington bought Battle Creek they got their lady research director; she worked at Worthington until she was quite elderly. Boyer visited her in her lab at Battle Creek several times (p. 119-20. Note: Josephine F. Williams was in charge of the lab and product development at Battle Creek, where she worked closely with Dr. John H. Kellogg. She kept similar positions at Worthington Foods, according to Ron McDermott). Henry Ford as a soybean pioneer and visionary. The soybean is now America’s No. 2 cash crop and also our second largest earner of foreign exchange. “That really started from Ford. When we first started in 1931, hardly anybody ever heard of the soybean, and Henry Ford’s penchant for publicity publicized the soybean... He certainly made it popular and made people become aware of it. Today it’s darned important.” He should be remembered as the “Father of the Soybean.” “I always thought it would be nice if they would rebuild the [Soybean] laboratory [in Greenfield Village] or restore it like it was when we were doing the soybean work and give it the real credit that it deserves...” (p. 120). After Henry Ford died in 1947 his family wanted no part of any of his pet projects. They completely eradicated the old Ford company (p. 121). Henry Ford was deeply interested in the welfare of American farmers. His tractors and Model T were of great use to them (p. 121). Origins of Ford’s interest in chemurgy; William Hale and Dow Chemical Co. in Midland, Michigan; the first three chemurgic conferences in Dearborn, Michigan, in May 1935, 1936, and 1937 (p. 122-27). Ford and Ruddiman establish a complete canning line for good-tasting green soybeans on the outskirts of the Ford estate. The equipment was quite expensive. When World War II threatened, Ford gave it to Michigan State University to teach canning to students. (p. 129-30). Boyer’s personal impressions of Henry Ford (p. 128-30). Address: 632 Edgewater Dr. #731, Dunedin, Florida

33528.

1722. **Product Name:** Granose Soya-Franks: Vegetarian Soya-Sausages.

**Manufacturer’s Name:** Granose Foods Ltd. (Distributor). Made in West Germany by DE-VAU-GE.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1985 February.

**Ingredients:** Water, vegetable oils, onions, egg protein, wheat protein, soya protein, spices, seasonings, salt, gelling agent (guar gum, carob gum), wheat flour, glucose, apples, smoke flavour, oat-flakes, breadcrumbs, herbs, milk protein, soya sauce.

**Wt/Vol., Packaging, Price:** 200 gm cellophane wrapped pack. Retails for £1.06.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 100 gm.: Calories 272.

**New Product–Documentation:** Food Report (Lehmann). 1985. Feb. The company says that these are just the first of some 20 new products planned for introduction this year.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by DE-VAU-GE, was introduced in Feb. 1985.

Label sent by Granose. 1990. July 11. 2 by 5.5 inches. Red, brown, green, yellow, and black on white.

1723. **Product Name:** Granose Chicken Style Curry.

**Manufacturer’s Name:** Granose Foods Ltd.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1985 February.

**Wt/Vol., Packaging, Price:** 425 gm can for £0.89.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Food Report (Lehmann). 1985. Feb.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Granose, was introduced in Feb. 1985.

1724. MacDonald, Sandy. 1985. Designer beans: Soybeans aren’t stuck down on the farm anymore. High-protein, low-calorie soyfoods have gone gourmet. *New Age Journal (Boston, Massachusetts)*. Feb. p. 53-59. [2 ref]

• **Summary:** An excellent introduction to soyfoods and soyfoods companies in America today. Photos show Chandri and Gary Barat of Legume, Akiko Aoyagi and William Shurtleff “parents of the soy boom,” and Tom Timmins president of Tomsun Foods.

Note: This is the earliest document seen (April 2011) that contains the term “designer beans.” Though this interesting term is used in the title of this article, it does not appear in the body of the article itself. The author appears to mean that the soybean can be made into hundreds of

“ingenious” and imaginative (often delicious) foods from ice cream to lasagna, from burgers to creamy dips and dressings—and industrial products, including spun soy protein fibers invented by Robert Boyer, a Ford Motor Company employee, and first put to use in the upholstery of Ford cars; they were later used to make bacon bits and meat alternatives. Address: Brighton, Massachusetts.

**1725. Product Name:** Yves Tofu Wieners. Imitation Wiener (Meatless Hot Dogs).

**Manufacturer’s Name:** Yves Natural Foods.

**Manufacturer’s Address:** 1138 East George St., Vancouver, BC, V6A 2A8, Canada.

**Date of Introduction:** 1985 February.

**Ingredients:** Tofu, water, soybean oil, wheat gluten, egg albumen, wheat germ, nutritional yeast, sea salt, spices, hydrolyzed vegetable protein, natural hickory smoked flavor, beet powder, guar gum.

**Wt/Vol., Packaging, Price:** 8 wieners per 12 oz plastic pack. \$2.89 retail.

**How Stored:** Refrigerated.

**Nutrition:** Per 1.6 oz wiener. calories 91, protein 7.8 gm, fat 9.8 gm, carbohydrate 3.0 gm, sodium 254 mg, cholesterol 0.17% of protein RDA.

**New Product–Documentation:** Spot in Product Alert. 1986. March. Label. 1986, undated. “Soy product. Contains no meat.” Ad in Natural Foods Merchandiser. 1987. March. p. 99. “Positively the best tasting tofu wieners you’ve ever tried. Made from fresh tofu and a special blend of fine natural ingredients.” This ad (1/3 page, black and white) also appeared in East West Journal. 1987. June. p. 73. Leaflet. 1987. 8½ by 11 inches, color. Same title as ad. “Made from Fresh Tofu and a Special blend of Fine Natural Ingredients.”

Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.” 1998. March.

Talk with Tracy Wright, executive assistant to Yves Potvin. 1999. Nov. 24. This was the company’s first product, launched in Feb. 1985.

Note: This is the earliest known commercial soy product made or sold by Yves. It is also the earliest record seen (Jan. 2010) concerning Yves.

**1726. Product Name:** [Seitan].

**Foreign Name:** Seitan.

**Manufacturer’s Name:** Christian Nagel Tofumanufaktur.

**Manufacturer’s Address:** Oelkersallee 14a, D-2000 Hamburg 50, West Germany. Phone: 040/89 49 37.

**Date of Introduction:** 1985 March.

**Ingredients:** Organic wheat flour (*kontr. biolog.*), soy sauce, ginger (*ingwer*), kombu.

**Wt/Vol., Packaging, Price:** 250 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1988. 4 by 3 inches.

Black on brown. Handwritten. Illustration of a soybean plant with pods!

Label sent by Anthony Marrese after visit to Christian Nagel in Hamburg. 1989. Dec. Black on green. Handwritten. 250 gm.

**1727. Product Name:** [Tofu Tidbits {Tofu Burger Pieces}].

**Foreign Name:** Tofu Happen.

**Manufacturer’s Name:** Christian Nagel Tofumanufaktur.

**Manufacturer’s Address:** Oelkersallee 14a, D-2000 Hamburg 50, West Germany. Phone: 040/89 49 37.

**Date of Introduction:** 1985 March.

**Ingredients:** Tofu, rice, onions, carrots (*Moehren*), wheat groats (coarsely ground meal; *Weizenschrot*), soy sauce\* (*Sojasauce\**), arrowroot flour (*Pfeilwurzelmehl*), sea salt (*Meersalz*). \* = Not organically grown (*aus nicht biol. Anbau.*)

**Wt/Vol., Packaging, Price:** 70 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1988. 4 by 3 inches. Black on brown. Handwritten. The company also makes Seitan, for which a label was sent. 250 gm.

Label sent by Anthony Marrese after visit to Christian Nagel in Hamburg. 1989. Dec. Black on yellow. Handwritten. 70 gm.

**1728. Product Name:** Tofu Light Loney (Meatless Bologna).

**Manufacturer’s Name:** Light Foods Inc.

**Manufacturer’s Address:** St. Louis, MO 63017.

**Date of Introduction:** 1985 March.

**New Product–Documentation:** Poster. 1986. 6 oz. Refrigerated. “No cholesterol, no MSG, no meat, no preservatives, no nitrites or nitrate.”

**1729. Public Sector Consultants, Inc. 1985. The potential for expanding the Michigan soyfoods industry. In: 1985. The**

Potential of Food Processing for Economic Development in Michigan. PCS, Knapp's Centre, 300 S. Washington Square #401, Lansing, MI 48933. See p. III-45 to III-67. 28 cm. [47 ref]

• **Summary:** Michigan soyfoods manufacturers include Michigan Soy Products (Royal Oak; Tofu, soymilk; 1,650 lb/week of tofu), Oryana Soy Shop (Traverse City; Cooperative. Tofu, tempeh, soysage; 275 lb/week of tofu), The Soyplant (Ann Arbor; Cooperative. Tofu, tempeh, tempeh burgers, soymilk, dofugan, soysage; 7,500 to 10,000 lb/week of tofu), INARI Ltd. (Mason; Soynuts), Michigan Farm (Bitely; Miso), Hercules, Inc. (Harbor Beach; HVP), Eden Foods (soymilk importer, which hopes to build a soymilk plant in Michigan), and Midwest Natural Foods (Ann Arbor).

"Hercules produces nonfermented soy sauce [HVP] and sells its product to large final producers, such as La Choy and Beatrice Foods, located outside Michigan for sale under their labels." This report was prepared for the Michigan Dept. of Agriculture. March 15. Address: Lansing, Michigan.

1730. **Product Name:** [Tofu Burgers (Leek / Ginger, Basque Corn & Pepper, With Sea Vegetables)].

**Foreign Name:** Croque Tofou (Poireau / Gingembre, Basquaise, Océane).

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

**Date of Introduction:** 1985 March.

**Ingredients:** With Sea Vegetables: French-grown soybeans, rolled oats (organically grown), British sea vegetables, shrimps, soy sauce, sunflowerseed oil, spices.

**Wt/Vol., Packaging, Price:** 200 gm.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm: Protein 14.8%, lipids 11.9%, carbohydrates 4.8%, calories 185.

**New Product-Documentation:** Letter from Bernard Storup. 1989. March 3. These 3 varieties were launched in March 1985 and discontinued in Sept. 1988. Label for Océane. 3.25 by 6.5 inches. Red, yellow, blue, green, and brown. Written in French, German, and Italian. Impressionistic drawing of sea vegetables. Contains 2 croquettes. Address is still Cerny.

Product (Basque / *à la basquaise*) with new Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches.

1731. Soyfoods Association of America, Standards Committee. 1985. Tofu standards. 7th draft. Lafayette, California: Compiled by William Shurtleff of Soyfoods Center. 18 p. March. 28 cm. [11 ref]

• **Summary:** "VII. Naming second generation commercial food products containing tofu.

"Second generation commercial tofu products may be

divided into three types:

"A. Products in Which Tofu Is Used as an Ingredient. For the term "Tofu" (or "Tof...") to appear in the name of a commercial food product, in a form such as "tofu chocolate parfait," "tofu lasagna," or "Tofreezy," the product should contain at least the following percentages of tofu by weight (purchased or manufactured as tofu, as defined previously) for any given product category. The term "tofu" as used here refers to a product containing the equivalent of 8% protein. Thus, for example, if tofu containing 7% tofu were used in a tofu salad (see below), it would have to comprise 28.6% of the finished product by weight.

"25% Tofu salads, dips, or spreads; vegetarian meat or cheese analogs (tofu burgers, franks, etc.).

"20% Dressings, quiches, "cheesecakes," blended puddings or parfaits or mousses.

"15% Non-dairy frozen desserts, prepared entrees, sandwiches, baked goods, soups.

"Or, the tofu should be substituted for all of the product's typical protein source (e.g., for all of the cheese and/or meat in a lasagna). If less tofu is used, the name should be of the form 'chocolate parfait with tofu' or 'meatless lasagna with tofu.'" Address: Lafayette, California and Greenfield, Massachusetts.

1732. **Product Name:** The Gardenburger.

**Manufacturer's Name:** Wholesome & Hearty Foods.

**Manufacturer's Address:** 1416 S.E. 8th St., Portland, OR 97214. Phone: 503-796-0109.

**Date of Introduction:** 1985 March.

**Ingredients:** 1993/06: Mushrooms, onions, rolled oats, brown rice, lowfat mozzarella cheese (part skim milk, salt and vegetable rennet), cottage cheese (nonfat milk, enzymes and culture), egg white blend (egg whites, olive oil, tapioca starch, vegetable gum, natural flavoring), cheddar cheese (whole milk, cultures, salt, enzymes & vegetable color), bulgur wheat, natural seasonings & spices (no salt added).

**Wt/Vol., Packaging, Price:** 10 oz box.

**How Stored:** Frozen.

**Nutrition:** Per patty (2.5 oz = 71 gm): Calories 126, protein 6.67 gm, carbohydrate 19 gm, fat 2.6 gm (percent of calories from fat 18.5%, unsaturated 1 gm, saturated 1.6 gm), cholesterol 6 mg, sodium 191 mg, potassium 193 mg, fiber 2.3 gm.

**New Product-Documentation:** East West. 1987. June. p. 65. East West. 1988. Oct. p. L-3. Lundberg Rice Showcase. No added salt, and no soy. "Served in restaurants, airlines, hospitals, sports arenas, schools, and business cafeterias throughout the United States."

Time magazine. 1991. March 4. p. 65. To the roars of the roars of the herbivores: Entrepreneurs." Discusses the Gardenburger. Developed by Paul Wenner, the president of Portland's Wholesome & Hearty Foods Inc., this meatless competitor of the hamburger contains mushrooms, onions,

oats, brown rice, low-fat cheese, egg whites, bulgur wheat, walnuts, and seasonings pressed into a patty and baked. It contains only half the calories and one-fifth the fat of an ordinary hamburger. “Wenner expects to sell 8 million patties this year.”

Talk with Richard Gross. 1991. Sept. 3. This product is made in Portland. The flavor and texture are so-so, but the maker claims to have sold 10 million of them. It is sold baked and frozen. On his literature he writes “Soy free.” But the product contains saturated fat and cholesterol. It is meatless but it is not vegetarian since it contains cheese.

Dispatch (Columbus, Ohio). 1992. Sept. 1. “Worthington Foods sued over Veggie Burger name.” Paul Wenner, age 45, is a vegetarian who in 1984 “ran the Garden House restaurant in Gresham, Oregon, when his line of veggie burgers was born. He said he began making Gardenburgers commercially in March 1985 with a production run of 800 patties.”

Product with Label purchased at Lucky Foods supermarket in Lafayette, California. 1993. June 9. 7.5 by 6 by 1.5 inches. Paperboard box. Red, yellow, green, and brown on tan. Full color photo of a grilled patty resting on a lettuce leaf topped by 2 onion rings and 2 tomato slices. “Four gourmet meatless patties. No soy! No preservatives. No MSG.” Price: \$3.39. Company address is now 2422 S.E. Hawthorne, Portland, Oregon 97214. Phone: (503) 238-0109.

Product with Label (new design) purchased at Safeway supermarket in Lafayette, California. 1994. May 18. Price: \$2.99. Frozen. Note that the price for 10 oz of Gardenburger (4 patties) is the same as the price for 12.8 oz of Green Giant Harvest Burgers (4 burgers). The product name is now “The Original Gardenburger.” New label design shows a black outline sketch of a boy scout-like person in a yellow square. “It’s meatless, low fat, soy-free and tastes terrific.” Gardenchef Paul Wenner. Soyfoods Center Taste Test. 1994. May & June. We like the flavor, texture, and appearance of this product the best of all frozen meatless burgers sold today in supermarkets.

Note: This is the earliest commercial product seen (Sept. 2000) made by Wholesome and Hearty Foods.

1733. *Grocer (The) (England)*. 1985. Soya milk spearheads move into yogurt, ice cream. April 6. p. 23.

• **Summary:** Michael Cole, managing director of Soya Health Foods of Trafford Park, Manchester, reports that he is selling about £3 million worth of his new Sunrise soya milk each year, and producing 46,000 gallons a week in half-liter aseptic Tetra Pak cartons. Major grocery chains have shown great interest in the product. Most competing soya milks are imported to England. Cole imports only his soya beans—from Canada. His company’s biggest competitor is Granose, which is selling through Safeway and other outlets.

Cole presently has to feed his okara, a by-product of soymilk production, to pigs. “But in the next few weeks

we will be installing a vegetarian sausage and burger plant which will take care of that.”

Cole is a former health food shop owner who has all been involved in the marketing and manufacturing side of the trade, not only in England but also in India and America.

A large photo shows Cole standing next to stacked cartons of his Sunrise Soya Milk. The caption reads: “Soya yogurt possible—Michael Cole.”

Note: This was the article that led to the founding of Genice in Wales. Ray Pierce, who was with Classic Ices in Wales at the time read the article, learned that Michael Cole of Soya Health Foods Ltd. was planning to make a soy ice cream, then contacted Cole and offered to work with him in developing the product. It became Classic Ice’s first non-dairy ice cream. Seeing its potential, Ray and Irene Barclay left Classic Ices and started Genice. Address: Manchester, England.

1734. *Food Processing (Chicago)*. 1985. Tofu-based non-dairy frozen desserts: Reduced calories, no cholesterol, no lactose are health implications. 46(4):41-42. April.

• **Summary:** Discusses the introduction and composition of Barricini Tofulite. “The first introductions were made in New York during the early part of February.” The company also plans to introduce soy-based “cheesecake, frozen novelties, lasagna, frozen tofu burgers, frozen tofu enchiladas, soy-based yogurt, and soy milk.”

1735. **Product Name:** Soy Tempeh, and Tempeh Bits.

**Manufacturer’s Name:** Soy Feliz.

**Manufacturer’s Address:** 17802 N.E. 21st St., Gainesville, FL 32609. Phone: 904-485-1527.

**Date of Introduction:** 1985 April.

**New Product—Documentation:** Talk with Jose Caraballo. 1990. July 27. He started making these tempeh products at his home in May 1990 and selling them locally. In Spanish “Soy Feliz” means “I am happy.”

Talk with Jose Caraballo. 2001. July 23. In April 1982 he started making tempeh at home and selling it to his local friends. In April 1985 he started selling tempeh and tempeh bits to a local co-op distributor, who distributed them to retail co-ops.

1736. *Toyo Shinpo (Soyfoods News)*. 1985. Tônyû o beesu ni—shin seihin [Tofu and soymilk dessert shop opens in Osaka]. May 1. p. 7. [Jap; eng+]

• **Summary:** A tofu and soymilk dessert specialty restaurant will open in April in the Kintetsu department store in eastern Osaka at Fuse city. It will be named Tofeez. It is connected with Furuichian Enterprises which owns the Tofu Kan restaurant. It will serve about 30 soyfoods including tofu ice cream, soymilk bread, tofu burgers, tofu pies, soy yogurt, etc.

On 1 April 1985 a popular Western-style tofu restaurant opened in Nagoya. Named Tcha-na-Time, it is located in the

NBN Izumi Building, 1-23-36 Izumi, Higashi-ku, Nagoya, Japan, Phone: 052-951-1877. The owner is Ms. Ishiki. In addition to various soyfoods, they also serve meat and fish. Address: Kyoto.

**1737. Product Name:** Protoveg Savoury Bakes (Meatless Meatloaves) [Chicken Style, Beefy Style, Pork and Pepper Style].

**Manufacturer's Name:** Direct Foods Ltd.

**Manufacturer's Address:** Petersfield, Hampshire, England.

**Date of Introduction:** 1985 May.

**Wt/Vol., Packaging, Price:** Foil trays. Retail for £1.25.

**New Product–Documentation:** Food Report (Lehmann). 1985. May. The products require only the addition of water and can be baked in their own foil trays for just 20 minutes.

**1738. Product Name:** Loma Linda Golden Chik-Nuggets (Meatless).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1985 May.

**Ingredients:** Soy protein concentrate, soy protein isolate, corn oil, water, wheat gluten, egg whites, potato flakes, artificial flavors, whole wheat flour, salt, natural (vegetable) flavors, dried yeast, dextrose, onion powder, spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Breader:** Bleached wheat flour, salt, yeast, sugar, oleoresin paprika, leavening (sodium acid pyrophosphate, monocalcium phosphate, sodium bicarbonate), hydrogenated soy oil, mono and diglycerides, nonfat milk, whey. **Batter:** Water, corn flour, modified food starch, leavening (sodium acid pyrophosphate and sodium bicarbonate) and spice.

**Wt/Vol., Packaging, Price:** 12 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per approximately 5 pieces (3.0 oz–85 gm): Calories 230, protein 15 gm, carbohydrate 17 gm, fat 11 gm, cholesterol 0 mg, sodium 630 mg, potassium 200 mg.

**New Product–Documentation:** Food Report (Lehmann). 1986. Feb. The vegetarian product is chicken flavored.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1985.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

1739. Shurtleff, William; Aoyagi, Akiko. 1985. The Americanization of tempeh (1970 to 1980s) (Continued–Document part II). In: W. Shurtleff and A. Aoyagi, Akiko. 1985. *History of Tempeh: A Fermented Soyfood from Indonesia*. 2nd ed. Lafayette, California: Soyfoods Center. 91 p. See p. 43-46. May. [402 ref]

• **Summary:** Continued. “In 1974 Cynthia Bates joined the

Soy Dairy crew and learned the basic lab techniques for making tempeh starter from Alexander. She built a tempeh incubator out of an old refrigerator and by November 1974 was making 20-30 pound batches of okara tempeh, using the soy pulp (okara) left over after making soymilk. By January 1975 The Farm Tempeh Shop was making 80-200 pounds of tempeh a week. The incubator was expanded into a used bean dryer and sporulated okara tempeh (dried and ground) started to be used as a starter. In 1975, in order to share their discovery with people across America and around the world, the community (now having 1,100 members) featured a section on tempeh (written by Cynthia Bates) in their widely read *Farm Vegetarian Cookbook*, including the first tempeh recipes to be published in any European language (Farm 1975).

“In 1975, after Wang, Swain and Hesseltine at the NRRC published their paper on mass production of tempeh spores, Bates set up a little laboratory and began making tempeh starter for use on The Farm. The starter was grown on rice, using the syringe inoculation technique and a spore suspension of starter sent periodically and kindly by Dr. Wang. By 1976 powdered pure-culture tempeh starter, made by Bates at the Tempeh Lab, was being sent out or sold to interested people. Publications were now needed to explain how to use the starter to make tempeh, then how to cook the tempeh. In 1975 or early 1976 Alexander Lyon typed up a three-page flyer titled ‘Tempeh Instructions,’ which contained the first instructions in any European language for making tempeh at home, and listed The Farm as a source of tempeh starter. Bates wrote and The Farm printed a 2-page flyer titled ‘Tempe,’ which described how to make five pounds of tempeh and contained four recipes, including the world’s first Tempeh Burger recipe. This flyer was distributed with the starter, along with ‘Fermentation Funnies,’ cartoons introducing tempeh. In 1976 Bates and co-workers wrote a 20-page article titled ‘Beatnik Tempeh Making’ (later retitled ‘Utilization of Tempeh in North America’) for the Symposium on Indigenous Fermented Foods in Bangkok, Thailand.

By Sept. 1976 the Tennessee Farm community, with Suzie Jenkins as tempeh production manager, was making at least 60 pounds of tempeh a day, and they were using a centrifuge (Cynthia Bates’ idea) to dewater the soybeans after cooking and before inoculation—a technological breakthrough that soon caught on among commercial tempeh makers.

Also by 1976 The Farm’s satellite farms had established commercial tempeh shops in San Rafael, California, and Houma, Louisiana. A number of America’s early tempeh shops (such as The Tempeh Works in Massachusetts or Surata Soyfoods in Oregon) were started by people who learned the process on The Farm. America’s first soy deli, set up in August 1976 at the Farm Food Company’s storefront restaurant in San Rafael, featured tempeh in Tempeh

Burgers, Deep-fried Tempeh Cutlets, and Tempeh with Creamy Tofu Topping, the first tempeh dishes sold in an American-style restaurant.

“The media blitz for tempeh that began in 1977 created a booming little business on The Farm for tempeh ingredients. A January 1977 article in *Organic Gardening* listed The Farm as the only known source of split, hulled soybeans. Orders began to arrive. Soon Dr. Wang at the USDA in Peoria, flooded by orders for tempeh starter, was forwarding many of them to The Farm. Then articles by The Farm (Cynthia Bates and Deborah Flowers) about tempeh in *Mother Earth News* (Sept. 1977) and *East West Journal* (July 1978) led to a surge of orders for both starter and split soy beans.

“In 1977 Farm Foods was founded; it took over marketing of the tempeh starter, together with hulled soybeans and revised editions of the tempeh instructions (1977, 1978). The three items were sold nationwide as America’s first Tempeh Kit by mail order and in some natural food stores. The starter was also sold separately with the leaflet. During 1978 Farm Foods promoted its tempeh starter and tempeh kit by serving grilled tempeh at numerous natural foods trade shows. A large sidebar in the February 1978 issue of *Organic Gardening* magazine listing Farm Foods as the best source of tempeh starter and split beans, followed by letters of referral from Rodale Press thereafter, stimulated sales. Also in 1978 Hagler edited a revised edition of the *Farm Vegetarian Cookbook*; it contained 12 pages on tempeh, including many recipes. In 1982 Farm Foods began actively advertising and selling bulk, powdered tempeh starter to America’s growing number of tempeh shops, and by 1984 they had captured a majority of the market. Prior to 1979 tempeh had been available on The Farm only on special occasions. In that year, however, a Tempeh Trailer, developed in Louisiana by John and Charlotte Gabriel, was brought to The Farm. The tempeh incubator was moved out of the Canning and Freezing building and made into a walk-in incubation room in the trailer. John Pielasczyk became head tempeh maker, and thereafter any Farm member could go at almost any time to the Farm store, open the freezer, and take home tempeh. In 1981 Margaret Nofziger, Farm nutritionist, wrote an article on ‘Tempeh and Soy Yogurt,’ with five tempeh recipes, for *Vegetarian Times*.

“In late 1983 and early 1984 The Farm underwent a major financial restructuring. Farm Foods became financially independent from The Farm and in May 1984 the Tempeh Lab (under the directorship of Cynthia Bates) became independent of Farm Foods. Both became ‘for-profit’ companies. In March 1984 The Farm published *Tempeh Cookery*, America’s fourth popular book about tempeh and the first with full-page color photos (Pride 1984). To promote this book (and tempeh), in June 1984 Farm Foods and its sister company, The Book Publishing Company, served samples of deep-fried tempeh and several tofu dishes to

20,000 attendees of the American Booksellers Association Convention in Washington, D.C. Farm Foods was also planning to have one or more large tempeh companies (perhaps one on each coast of the USA) make private labeled tempeh, which would then be sold nationwide through the company’s extensive soymilk ice cream (Ice Bean) distribution channels. Farm Foods could then also use the tempeh, the starter, and the book to promote each other.” Continued. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1740. Shurtleff, William; Aoyagi, Akiko. 1985. The Americanization of tempeh (1970 to 1980s) (Continued—Document part III). In: W. Shurtleff and A. Aoyagi, Akiko. 1985. *History of Tempeh: A Fermented Soyfood from Indonesia*. 2nd ed. Lafayette, California: Soyfoods Center. 91 p. See p. 46-49. May. [402 ref]

• **Summary:** Continued. “William Shurtleff and Akiko Aoyagi of The Soyfoods Center in California were also active in helping to introduce tempeh to America. They first became aware of and interested in tempeh in March 1975 in Tokyo after reading *The Farm Vegetarian Cookbook*. In their *Book of Tofu* (1975), they included a recipe for homemade tempeh and seven Indonesian-style tempeh recipes (learned from an Indonesian tempeh maker in Tokyo), the first such recipes ever published in English. This whole section was published in *Mother Earth News* in May 1976. In late 1976, during a two-week visit to The Farm in Tennessee, they wrote (with Cynthia Bates) a 4-page pamphlet titled ‘What is Tempeh?’ which they enlarged and published in early 1977. In May 1977 they spent a month in Indonesia studying tempeh, and in June their article ‘Favorite Tempeh Recipes’ was published in *Organic Gardening* magazine. In January 1978 William Shurtleff presented a paper and demonstration on how to make tempeh from winged beans at an International Seminar on Winged Beans in the Philippines.

“In July 1979 Harper & Row published their *Book of Tempeh*, the first book in the world devoted entirely on tempeh. It contained the first sizeable collection of American-style and Indonesian tempeh recipes (130 in all), the first illustrated descriptions of making tempeh, tempeh starter, and onchom (ontjom / oncom) on various scales in Indonesian tempeh shops, the first history of tempeh, detailed discussion of tempeh in Indonesian culture and of the many varieties of Indonesian tempeh, and the first recommendations for commercial names for the more than 30 types of tempeh that could easily be made in the West. It also contained chapters and reviews of the literature on tempeh nutrition and the microbiology and biochemistry of tempeh fermentation, plus the largest bibliography on tempeh to date (including many new Indonesian references), an annotated listing of 61 people and organizations around the world connected with tempeh, and the first list of tempeh companies in the West. By early 1984 16,600 copies

of the paperback edition and 960 copies of the enlarged professional hardcover edition had been sold. Between 1976 and 1982 they wrote eight articles on tempeh for popular and trade magazines.

"In March 1980 The Soyfoods Center published *Tempeh Production*, the first book describing how to start and run a commercial tempeh plant in industrialized or Third World countries. In 1981 Shurtleff and Aoyagi wrote a book on tofu, miso, and tempeh that was published in Mexico in Spanish, and in 1982 they published books containing bulk tempeh recipes and tempeh labels. Starting in 1982 Shurtleff did extensive annual surveys of the tempeh industry and market in the USA, which were published yearly by The Soyfoods Center in *Soyfoods Industry and Market: Directory and Databook*. The Center also developed and sold color slide sets on "Tempeh," "Tempeh Production in the USA," and "Tempeh Production in Indonesia." In 1985 *The Book of Tempeh* will be published in German as *Das Tempeh Buch*.

"Another early pioneer of tempeh in America was Rodale Press in Emmaus, Pennsylvania, best known as the publisher of *Organic Gardening* and *Prevention* magazines. In the spring of 1975 Rodale's R&D department decided to follow up on the work with tempeh done by Hesseltine and Wang at Peoria. In early 1976 R&D food technologist Mark Schwartz began to work with Dr. Wang in Peoria to develop a simple, inexpensive way to make tempeh at home. They devised a tempeh kit including an incubator made from an inexpensive Styrofoam picnic cooler heated by a light bulb. For a Reader's Research Project, they sent the kit with instructions and a questionnaire to 60 readers across the country, and asked for feedback. The unanimous response was that people found the new food easy to make and delicious (Podems 1976). This R&D work led to five major articles in 1976 and 1977. In March 1976 Brenda Bortz in 'The Joys of Soy' introduced tempeh and Rodale's tempeh research to readers of *Organic Gardening* (OG). In January 1977 OG ran 'Tempeh Keeps 'em Coming for More Soybeans.' Jack Ruttle, a Rodale staffer, summarized the results of Rodale's research on tempeh to date and gave detailed instructions for making tempeh at home. This was the first major popular article on tempeh published in America. In June *Prevention*, the largest health-food magazine in America, ran a cover story and editorial by Robert Rodale titled 'Tempeh, a New Health Food Opportunity.' He visited America's first Caucasian-owned tempeh shop (run by Gale Randall), encouraged others to start tempeh shops and to 'get in on the ground floor of a new industry,' and predicted that tempeh might well become America's most popular way of using soybeans as part of the 'coming soy boom.' 'Tempeh is on its way up,' he wrote. 'Before long it will be eaten widely and lovingly across this land of ours.' Also in June OG published Shurtleff and Aoyagi's 'Favorite Tempeh Recipes' and Wang, Swain, and Hesseltine's 'Calling all Tempeh Lovers.' In addition

Rodale Press published books with extensive information on tempeh: *Home Soyfood Equipment* (Wolf 1981) and *Tofu, Tempeh, & Other Soy Delights* (Cusumano 1984). Wolf's book included a new method for making tempeh at home using unsalted soynuts, which took less time and cost only about 28% (10 cents) more per pound than the traditional method. Detailed plans for making a home tempeh incubator were given. *Organic Gardening* (March 1982) summarized Wolf's quick tempeh method.

"Starting in 1971, the American media first began to take an interest in tempeh, when Food Processing magazine, in its 'Foods of Tomorrow' section did an article on 'Specialty Fermented Foods,' discussing their potential acceptability in the American market. It concluded: 'But of all fermented foods, tempeh, with its high ratings in taste, nutritional benefits, and simple, low cost processing techniques, appears to be the most likely candidate for Americanization . . . Tempeh may be one of the next to appear in the US market place.' In May 1976 *Mother Earth News* (Issue #39) ran a long excerpt on tempeh from *The Book of Tofu* by Shurtleff and Aoyagi. Media coverage expanded significantly in 1977. First came the three major Rodale Press articles mentioned above. In September *Mother Earth News* featured 'How we Make and Eat Tempeh Down on the Farm,' and in November *Vegetarian Times* ran 'Tempeh,' In July 1978 *East West Journal* ran its first tempeh story, 'Make Your Own Soyburger' about the Farm's tempeh. These many articles contained recipes and detailed instructions for home preparation, and some gave the address of the NRRC in Peoria, Illinois as a source of free tempeh starter. In less than 18 months, over 25,000 people requested starter and began making tempeh at home. This early media coverage for tempeh was a veritable blitz for a largely unknown food, and most of the publications had large circulations. In addition descriptions of tempeh began to appear in popular books, such as Beatrice Hunter's *Fermented Foods and Beverages* (1973).

"The first commercial Caucasian American tempeh shop was started in the winter of 1975 by Mr. Gale Randall in Unadilla, Nebraska." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1741. Faris, Charlene. 1985. Bean curds and why. *Women's Sports and Fitness* 7:46-47. June. [2 ref]

• **Summary:** A brief, positive introduction with one recipe for Mariah's yummy tofu burgers. "The restaurant offering the most tofu dishes on its menu is the Oasis Buffet Dining Room at Alive Polarity's Murietta [sic, Murrieta] Hot Springs in (where else?) California."

1742. Kushi, Aveline; Jack, Alex. 1985. Aveline Kushi's complete guide to macrobiotic cooking: For health, harmony, and peace. New York, NY: Warner Books. xvii + 414 p. June. Illust. Index. 23 cm. [36 ref]

• **Summary:** Index entries include: Miso 61, Tofu 50, Tamari 19, Tempeh 17, Whole dry soybeans 6, Natto 3, Soymilk 3, Yuba 1. This book calls ganmodoki “Tofu Croquettes” and further states that “*Gan* means ‘crane’ and *modoki* means ‘looks like.’” Among the 31 chapters are ones titled Beans (incl. basic black soybeans, and brown rice with black soybeans); Tofu, Tempeh, and Natto (including yuba); Sea Vegetables; Condiments and Garnishes (incl. miso), and Fish and Seafood.

Under “Black Soybeans” (p. 257) we read: “These nice shiny beans are also called Japanese black beans. They have a strong, delicious taste. Their juice is said to make the voice clear and beautiful. Throughout Japan, mothers prepare their children for music tests and singing lessons with this dish. Black soybeans are also used medicinally to help discharge animal toxins from the body.” Note: This is the earliest macrobiotic cookbook seen that uses the term “Black soybeans” in a recipe title. All previous macrobiotic cookbooks called them “Black beans.”

Contains recipes for homemade tofu, tempeh, and natto. Address: Brookline, Massachusetts.

1743. **Product Name:** Tempeh Burgers, and Tofu Burgers.

**Manufacturer’s Name:** Sooke Soy Foods Ltd.

**Manufacturer’s Address:** 2625 Otter Point Rd., R.R. 2, Sooke, Vancouver Island, BC, V0S 1N0, Canada. Phone: 642-3263.

**Date of Introduction:** 1985 June.

**Ingredients:** Tofu (or tempeh), natural soy sauce, herbs and spices.

**Wt/Vol., Packaging, Price:** Tofu: 8 oz. Tempeh: 6 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels. 1985. 3 inch diameter. Self adhesive. Brown (Tofu) or Green (Tempeh) on beige. “Ready to serve, or steam for 5 minutes. Meatless.”

1744. Worthington Foods, Inc. 1985. Nothing tops Tofu Topper, on potatoes, sandwiches, canapes, vegetables... and on your shelf (Ad). *Natural Foods Merchandiser*. June. p. 47.

• **Summary:** See next page. This full page color ad shows three cans of tofu topper on a wooden cutting board surrounded by vegetables and crackers. On top of one can is a baked potato, on top of the 2nd some chips and dip, and atop the third a veggie burger with Tofu Topper inside.

Note: Worthington Foods has created the Natural Touch brand for introducing its products into natural- and health food stores; for supermarkets it generally uses the Morningstar Farms brand. Address: Worthington, Ohio 43085.

1745. Sheraton, Mimi. 1985. International pot luck: Variety spices the country’s rich culinary life. *Time* 126(1):98-99. July 8.

• **Summary:** This article is part of a special issue of *Time*

magazine about immigrants. It notes that as Americans learn about new ethnic cuisines, they are also “busy naturalizing foreign ingredients into native dishes: tofu, the cheeselike soybean curd, as the base for burgers and ice cream... Tempeh, the Oriental fermented soybean cake, is here formed and flavored to simulate bacon and pastrami.”

“How long can it be before Benihana is joined by chains with names such as Tacorama, the Piteria, Dim-summery and even Tofusion.”

A photo captioned “A sundae kind of love,” notes that “there is not one drop of dairy product in the tofu-based “Ice cream.” Developed for Jews who observe kosher laws and cannot combine dairy and meat products in the same meal, this creamy soybean-based frozen dessert also satisfies those on low-calorie diets.”

Note: This is the earliest known article in *Time* magazine that mentions tempeh.

1746. *Toyo Shinpo (Soyfoods News)*. 1985. Nyūjō kyaku 5,000 nin ni apuroochi [Nearly 5,000 people attended]. July 21. p. 8. [Jap; eng+]

• **Summary:** About the 1985 No-Salt Fermented Soybean Conference, July 15-16 at Tsukuba Research Center. Natto products were exhibited at a vegetable protein fair. It was sponsored by the Dep. of Agriculture and Forestry (*Nōsuisho*), from Aug. 26 to Sept. 7 at their building. Vegetable protein is a basic part of our daily life. At that time the Japanese Natto Association introduced tempeh, and they took a poll of 140 people. 4.9% of women were aware of tempeh. Mr. Kanasugi introduced tempeh foods to people. Samples of tekka miso, croquettes, fried tempeh, and tempeh burger were served. People like the flavor of these.

1747. *Grocer (The) (England)*. 1985. Sunrise hopes soya yogurt will follow milk success. July 27. p. 18.

• **Summary:** “Six months ago, Michael Cole, a strict vegetarian for most of his life, formed the Soya Health Foods company and opened the first soya milk factory of its kind in this country at Trafford Park, Manchester. In that time sales of his Sunrise no-added-sugar UHT soya milk have risen from 46,000 litres a week to 250,000.

“Recently he signed a two-year own-label contract for sweetened soya milk with Lancashire Dairies, and is now supplying Co-operative Retail Services, and supermarket chains.

Cole has now launched three more soya products under his brand: (1) Sunrise Soya yogurt in four flavors—strawberry, peach melba, black cherry and raspberry. Cole says there have never previously been any soya milk yogurts available in the UK or Ireland; (2) Sunrise Ice Dream (soya milk ice cream) in two flavors—hazelnut and vanilla. “This is a natural ice product, free from dairy produce, lactose and cholesterol and containing only sugar made from fruit.”; and Sunrise Vegetarian Burgers, each weighing ¼ pound; they

Address: Manchester, England.

1748. Collins, Alf. 1985. Fresh Today: Busy days at Island Spring. *Seattle Times*. July 31. p. C-7.

• **Summary:** Island Spring's tofu-based frozen dessert comes in vanilla-almond, black cherry-amaretto, chocolate, peanut butter, and coffee. Tofu burgers, tofu-based sauces and spreads will soon be introduced. "Luke Lukoskie, Island Spring president, figures the new products will boost the firm's annual sales from \$1 million to \$30 million in 3 years. Then he can concentrate on building a new plant somewhere between here and Tacoma. He's putting together about \$4.4 million in financing for the project." Address: Washington.

1749. Farah, Adelaide P. 1985. Food: Build a better burger. *Health (New York)* 17(7):36-38, 40-41. July.

• **Summary:** This article about making burgers from everything except red meat contains a recipe for "Bliss on a Bun" burger, made with tofu and mashed potatoes.

1750. **Product Name:** Pita Pocket Sandwiches (Filled with a Tofu Spread & Tomatoes & Alfalfa Sprouts) [Exotic Tofu Spice, Tuna Curry, Seafood Delight, Hummus Lite, or Mexican Lite].

**Manufacturer's Name:** Street Natural.

**Manufacturer's Address:** 1148 Liberty Bell Dr., Cherry Hill, NJ 08003.

**Date of Introduction:** 1985 July.

**Ingredients:** Seafood Delight: Pita bread, tomatoes, alfalfa sprouts, shrimp, crab, tofu mayonnaise (self-made), celery, cabbage.

**Wt/Vol., Packaging, Price:** 6 oz. Retail for \$2.85 to \$3.35. Assembled on the spot, wrapped in waxed paper.

**How Stored:** Unrefrigerated and perishable.

**Nutrition:** Avg. 300 calories per sandwich.

**New Product–Documentation:** Interview with Scott Gordon. 1987. Oct. 13. These products sold for 4 months in summer of 1985 from an upscale pushcart (stained wood & hanging plants) in Philadelphia. Vendors wore tuxedo jackets. Calorie counts were advertised under each sandwich.

1751. Tofu Shop Specialty Grocery & Deli (The). 1985. Thank you Humboldt County (Leaflet). Arcata, California. 1 p. Single sided.

• **Summary:** Contains a quotation from *Whole Life Times* magazine, New York, June 1985. "The Tofu Shop is the delicatessen of the future... The quality of the food... is about as high as you'll find anywhere... This is without a doubt the best (natural foods) take-out eatery in the country."

Also: "Delicatessen items: Hot tofuburgers. Sandwiches. Salads. Desserts. Fresh coffee. Herb teas. Specialty groceries: Fresh tofu. Wholegrain baked goods. Fresh juices. Local foods. Macrobiotic supplies.

"As the Tofu Shop approaches its sixth year, it continues to offer the highest quality foods available for your eating pleasure and good health."

An illustration (lower left) shows a little tofu shop on stilts by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead. Address: 768 18th St., Arcata, California 95521. Phone: Take out 822-7409.

1752. *Toyo Shinpo (Soyfoods News)*. 1985. Beikoku no tokkyo o shutoku "tôfu suteeki" seihô. Tôyû Shokuhin [Toyu Foods granted U.S. patent on method for making "tofu steak"]. Aug. 1. p. 1. [1 ref. Jap; eng+]

• **Summary:** The company was issued U.S. Patent 4,525,373, which is valid for 17 years.

1753. Altaner, David. 1985. His passion flavors the blandest of foods. *Courier-News (Bridgewater, New Jersey)*. Aug. 6. p. A8-A9.

• **Summary:** The company receptionist answers the phone "Tofutti-All-Rootie." "Thank God, I've been blessed with taste buds that like what the masses love." New products? "Next comes tofu jogger, an instant breakfast soy drink. In the future, consumers can expect to see soy-based chocolate and vanilla pudding, potato topping, onion dip, tofu cultured non-dairy yogurt, tofu whipped cream and pancakes... His personal Mount Everest is a tofu burger... To meet the competition Tofu Time is rolling out its first television commercial, which was unveiled last week. In it, the question, 'Has New York gone totally Tofutti?' causes a staid board of directors meeting to erupt into frenzied dancing to 'Tofutti-All-Rootie,' which sounds a lot like Little Richard's 1955 hit 'Tutti-Frutti.'"

A large photo shows David Mintz, behind many of his products, holding a Tofutti bar on a stick.

1754. Cloud, Jon. 1985. Work with okara and other soyfoods (Interview). Conducted by William Shurtleff of Soyfoods Center, Aug. 15. 1 p. transcript.

• **Summary:** Jon Cloud has done a great deal of work to develop a high-quality okara tempeh; it is now the best he has ever tasted—although Richard Jennings also makes excellent tempeh. He has added rice and other binders.

SoyPro is the name of his soy sausage and Soyettes are made from okara, using 50% okara. Soy City Foods also sells an okara granola, and falafels. He is required by the Canadian government to call okara "soy mash." They have prohibited use of the word "okara." He has also developed 2 flavors of ice cream sandwiches.

Soy City Foods—a corporation that is worker owned—now makes 4,000 lb/week of tofu and 144 kg/week of

tempeh. Address: Soy City Foods, Toronto, ONT, Canada.

1755. Eckett, Alison. 1985. Beating the protein crunch: A growing number of people are discovering the range of soyfoods, both traditional and modern, that can be made from this bean. *Food Processing (UK)* 54(8):25-28. Aug.  
 • **Summary:** “The term ‘soyfoods’ is a recent generic expression that has been used to describe the complete range of soy products prepared for human consumption. It covers both high technology, modern products such as soy [protein] fibres, concentrates and isolates which are mainly used as ingredients by food manufacturers... and includes the traditional low technology products of soymilk, soy sauce, miso, natto, tofu, tempeh and soy sprouts that have formed part of the staple diet in East Asia for thousands of years.”

Soyfoods are divided into non-fermented and fermented. Photos show: (1) Miso Dip (front of two packages). (2) Cubes of tofu under water. (3) Nasoya Tofu Vegi-Dip. (4) Sliced cakes of tempeh. (5) The front of four tempeh packages, made by The Tempeh Works. (5) White Wave tempeh, a tempeh burger, and a promotional piece. (6) A box of Tofu Lasagna, made by Legume, Inc. (7) The front of a package of “6 All Natural Vanilla Ice Bean Sandwiches,” made from Ice Bean by Farm Foods.

1756. **Product Name:** [Hera Soya Stroganoff].

**Foreign Name:** Hera Soja Stroganoff.

**Manufacturer’s Name:** Hafen-Muhlen-Werke.

**Manufacturer’s Address:** West Germany.

**Date of Introduction:** 1985 August.

**Wt/Vol., Packaging, Price:** 200 gm cartons retail for DM 5.60.

**How Stored:** Shelf stable.

**New Product–Documentation:** Food Report (Lehmann). 1985. Aug. “A classical Russian addition to the noodle or potato dishes based on soya.”

1757. Leneman, Leah. 1985. Tomorrow’s world [soyfoods]. *Vegetarian (The) (England)*. July/Aug. p. 21-24.

• **Summary:** There are now 8-9 brands of soya milk sold in Britain. “It is a shame that most people’s introduction to tofu is in the form of Morinaga silken tofu which... is now found in most health food stores. Silken tofu is pleasant and nutritious, but is much softer than regular tofu and is therefore much less versatile. Following recipes meant for firm tofu with it can be frustrating.

“Granose is the first big-name health food manufacturer to feature a line of tofu-based products (imported from Denmark). Two of the three tinned convenience meals seem to me less than ideal. The tofu adds nothing special to either the Tofu and Tomato Sauce nor to the Tofu in a Savoury Bean Sauce; they might just as well have used tvp. However, the Chinese-Style Tofu is really excellent, with a nice balance of tastes and textures, including the cubes of tofu–

just about the nicest tinned convenience meal around.

“The first national distributor of tofu (to the best of my knowledge) was *The Regular Tofu Company*... Like all other national distributors, their tofu is vacuum-packed, which considerably lengthens its shelf-life... *Paul’s Tofu* (The Old Brewery, Wheathampstead House, Wheathampstead, St. Albans, Herts.) produces another vacuum-packed firm tofu, which is available in London and South-East England...

“*Bean Machine* (Station Road, Crymch, Dyfed) produces not only tofu but also a range of ‘soysage’ foods made from okara... They also make ‘Soyannaize,’ a dairy-free dressing. *Duchesse All-Natural Tofu Dressing and Dip* (made by St. Giles Foods Ltd, St. Giles House, Sandhurst Road, Sidcup, Kent DA15 7HL) is another mayonnaise-type product...”

She is writing *The International Tofu Cookery Book* for Routledge & Kegan Paul. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

1758. *Soya Foods (ASA, Europe)*. 1985. The Soyfoods Interview: Mr. Wil Puik, Heuschen B.V., Netherlands. Aug. p. 7-8.

• **Summary:** Heuschen started their activities in 1958 selling Oriental foods, including tofu (tahoe). They began to make their own tofu in 1964. By 1968 they were making 2,000 cakes of tofu a day. The present plant at Deurne started in 1982. Its automatic production line presently makes 10,000 cakes of tofu a day. The company employs 9 people. They distribute their products via the wholesale trade, and export to West Germany and Belgium. They believe the soyfoods industry has an excellent future. They would like to launch several convenience soyfoods such as tofunaise, soyburgers, tofu dips, creams, and sauces. They sell to both the mainstream and Reform markets.

Note: Puik is pronounced “Powk”; the “Pow” rhymes with “How.” Address: Heuschen B.V., Dr. Huub van Doorneweg 16, 5753 PM Deurne, Netherlands.

1759. **Product Name:** Sunrise Vegetarian Quarterpound Burgers (Made from Tofu or Soya Proteins) [Tandoori, Herbs & Spices, Tofu, or Mexican Chili].

**Manufacturer’s Name:** Soya Health Foods, Ltd.

**Manufacturer’s Address:** Unit 4, Guinness Rd., Trafford Park, Manchester M17 1UA, England.

**Date of Introduction:** 1985 August.

**Ingredients:** Herbs & Spices: Okara (soya fibre and protein), textured soya flour, hydrogenated vegetable oil, wholewheat rusk, soya flour, modified starch, stabiliser (of vegetable origin), hydrolysed vegetable protein, mixed vegetables, mixed herbs, mixed spices, tamari.

**Wt/Vol., Packaging, Price:** 1 lb paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm: Protein 11 gm, fat 14 gm, carbohydrate 12.6 gm, dietary fibre 5.2 gm.

**New Product–Documentation:** Natural Food Trader (UK). 1985. Sept. p. 25. The burgers are quarter pounders that come 4 in a pack. Michael Cole is director of this company. Poster. Sunrise–Be good to yourself! A photo shows a burger box.

Label. 1988. Paperboard box. 9 by 4.5 by 1.5 inches. Full color in red, green, and brown. Photo on front of open-face burger. “Free from animal fats. No artificial colours. Low in salt and high in fibre. No animal has suffered in the making of this product.” Other products available from Soya Health Foods: Sunrise Soya Milk, Soya Milk Yogurt, Soya Ice Dream in 1 litre tubs.

1760. *Sunday Times (Singapore)*. 1985. Fowl play with the soya bean. Sept. 15.

• **Summary:** William Soh runs Kiat Lim vegetarian stall at #01-563 Blk 91, Whampoa Hawker Centre, Whampoa Drive, Singapore. He makes meatless entrees, such as goose, fish, chicken, and five spice roll from *tau kee* (bean curd skin [yuba]), which is molded and stuffed. He also uses gluten flour to make vegetarian pork. A photo shows Soh with his meatless meats.

1761. Archer Daniels Midland Co. 1985. Annual report 1985: We bring home America’s harvest. P.O. Box 1470, Decatur, IL 62525. 16 p.

• **Summary:** Part I describes ADM’s daily work. “ADM. Where the people who feed the world buy their groceries.” Pages 8-9 note: “We unlock the protein inside the soybean.” Contains color photos of many soy products including Protoveg Vegetable Goulash, and Betty Crocker Hamburger Helper (p. 1), Similac (p. 7), ProSobee, Rich’s Coffee Rich, Betty Crocker Bac\*O’s, and Protoveg Sizzles (p. 9), Tofutti (p. 15).

Part II, an insert in the portfolio, is the annual report financial data (34 pages). Net sales and operating income: \$4,738,767,000. Net earnings: 163,908,000. Total current assets: \$1,367,826,000. Total current liabilities: \$328,822,000. Address: Decatur, Illinois.

1762. **Product Name:** Soy Scream Ice Cream, Tofu, Soy Mayonnaise, Okara Burgers.

**Manufacturer’s Name:** Country Farmhouse Project. Renamed Country Farmhouse Lifeline by Fall 1987. Renamed Country Farmhouse Soya Products by 1989. Renamed Country Farmhouse Soya Products Co. Ltd. by Aug. 1997.

**Manufacturer’s Address:** Affiliate of the Country Farmhouse Lifeline, 12 Faulkner Ave., Duhaney Park, Kingston 20, Jamaica. Phone: 809-933-4617.

**Date of Introduction:** 1985 September.

**New Product–Documentation:** Plenty Bulletin (Summertown, Tennessee). 1986. Fall. p. 1-3. Jamaica Soy. The Country Farmhouse Project in Kingston, Jamaica

is run with the help of two Jamaican young people, Rasino D’Aguilar and his wife, Mohi. This small-scale cottage industry, which has been in business for 1 year on a shoestring budget, makes soy ice cream, tofu, soy mayonnaise, and a variety of okara burgers. Some of their products are sold at a weekly market sponsored by the Jamaica Vegetarian Society.

Plenty Bulletin. 1987. Fall. p. 4. Two full time and two part time staff, working out of a tiny 5 x 30 foot shed on the back of a house, produce 150 lb of tofu a week for sale to restaurants and health food stores in Kingston. First listing in Soya Bluebook. 1989. Country Farmhouse Soya Products. Affiliate of The Country Farmhouse Lifeline. Same address shown above. Phone: 809-92-281 10-9. Products: Salads Delight salad dressing, soymilk, frozen desserts, tofu & tofu products, soy burgers, high protein soy bread, tofu soysage.

Plenty International. 1994. Jan. A Guide to Growing and Using Soybeans for Food. p. 30. This company, which makes fresh soyfoods, is now named Country Farmhouse Soy Products, located at 12 Faulkner Ave., Duhaney Park, Kingston 20, Jamaica. Phone: 809-933-4617.

Talk with Marlon D’Aguilar, owner. 1996. May 20 (which see).

Talk with then letter from Marlon D’Aguilar. 1997. Aug. The letterhead states that the company is now named “Country Farmhouse Soya Products Co. Ltd. Directors: Marlon D’Aguilar, Elaine Lawson, Mrs. Winsome D’Aguilar, Keith Brown.”

1763. Groom, Jon; Groom, Sarah. 1985. Bean Machine story. *Point Soja–Soyfoods*. Autumn. p. 8. [Eng; Fre]

• **Summary:** Jon and Zorah Groom started a business in 1982 making tofu, soysage, and Soyanaize (vegan mayonnaise) from their kitchen. They learned how to make tofu and soymilk while living in Eire [Ireland] with some people from Stephen Gaskin’s Farm in Tennessee. With a co-op of 7 people (The Bean Machine Co-op Ltd.) they transformed an old car spares shop at Crymych into Wales’ first soy dairy. It began operation in January 1984. A new product was Tofu Pasties. They are now building a new plant in Cardigan. Address: Crymych, Wales.

1764. *Natural Food Trader (England)*. 1985. Soya yoghurt launched [by Soya Health Foods of Manchester, England]. Sept. p. 25.

• **Summary:** “And now we have a dairy product-free yoghurt! Sunrise soya yoghurt is the latest addition to the range offered by the new Soya Health Foods company... The yoghurt comes in four flavors–strawberry, peach melba, black cherry, and raspberry. Says Michael Cole: ‘This product is unique. There have never previously been any soya milk yoghurts available in the United Kingdom or Ireland. Being lactose and cholesterol free, this product will be very popular.’”

“These products are available from various distributors throughout Britain. For details and prices contact Soya Health Foods, Unit 4 Guinness Road, Trafford Park, Manchester M17 1AU. Phone: 061-872-0549.” A large photo shows Sunrise Soya Milk (2 types), Sunrise Yogurt (2 types), Sunrise Ice Dream, and Sunrise Vegetarian Burgers.

Note: This is the earliest document seen (Sept. 2012) that uses the term “soya yoghurt” to refer to soy yogurt. Address: Manchester, England.

**1765. Product Name:** Lightlife Meatless Tofu Pups (Meatless Hot Dogs).

**Manufacturer’s Name:** Tempehworks (Product Developer/Marketer).

**Manufacturer’s Address:** Greenfield, MA 01302.

**Date of Introduction:** 1985 September.

**Ingredients:** Tofu, water, soy oil, isolated soy protein, spices, nutritional yeast, sea salt, beet powder, paprika oil, natural liquid hickory smoke, guar gum. No nitrites.

**Wt/Vol., Packaging, Price:** 12 oz package.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per Pup: Calories 95, Protein 8.8 gm, sodium 204 mg, fat 7.5 gm carbohydrates 5 gm, cholesterol 0.

**New Product–Documentation:** Label. 1985, undated. 4.5 by 6 inches. Red and black on white. “Cholesterol free. The Uncommon Dog. No nitrates. Nothing artificial.” Leaflets. 1985 (dated). Front and back, 8½ by 11 inches. “Cholesterol free. Tofu pups: The uncommon dog.” Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. *Organica*. 1985. Autumn. p. 9. “Whatever happened to the American Hot Dog?” *USA Today*. 1985. Oct. 4. Life Section. Headline. “Hot dog! A new tofu treat called Tofu Pups. Tempehworks meatless hot dogs taste like the real thing and are high in protein, but have no cholesterol or nitrates. \$2.79 for 10.”

*American Health*. 1986. Feb. “Weenies of the New Age.” Leaflet. 1986. “If you love the thought of a delicious, juicy hot dog... but hate the thought of what’s in it, Read On! It has no cholesterol and no nitrates. It contains less than half the sodium of a meat frank and about half the fat.”

Ad (1/3 page, black and white) in *East West Journal*. 1987. July. p. 77. “Simply the best tasting completely vegetarian hot dog available anywhere! Cholesterol free. Tofu Pups.” *Soya Newsletter*. 1987. Sept/Oct. Party Pups and Tofu Pups Food Service Pack (three 40-pup vacuum packed packages per case) introduced. Ad in *Natural Foods Merchandiser*. 1987. Oct. p. 93. “The #1 Selling Tofu Hot Dog in America.” Richard Rose review. 1987. Oct. 28. “Still the best tofu hot dog.” Spot in *Natural Foods Merchandiser*. Feb. p. 58, and *East West*. 1988. March. “Fighting Hunger with Tofu Pups.” Lightlife Foods is donating 5 cents from the sale of each specially marked package of Tofu Pups to American non-profit hunger relief organizations. Fifty percent of the proceeds will go directly to local community meal programs in western Massachusetts. Layton. 1988.

*Greenfield Recorder*. May 20. p. 25. Tofu Pups cost more than their pork counterparts—\$2.49 to \$2.99 for a 16 oz package of 10 versus \$1.49 to \$2.39 for meat wieners.

**1766. Product Name:** Tomsun Tofu Burgers.

**Manufacturer’s Name:** Tomsun Foods Inc.

**Manufacturer’s Address:** 305 Wells St., Greenfield, MA 01301.

**Date of Introduction:** 1985 September.

1767. Tofu Shop Specialty Grocery and Deli (The). 1985. Try an authentic Humboldt Tofu Burger “Hot with all the fixin’s” (Ad). *Tri-City Weekly, Northern Humboldt edition*. Oct. 22. p. 19.

• **Summary:** This 5¼ inch square ad features a large illustration of the Specialty Grocery and Deli storefront done by Laurie Teske (a woman) in 1985. There is a bench by the front door, a planter in front of the windows, and a thatched roof. Hanging from the top of the doorway is a Japanese *noren* or composite cloth curtain with Japanese characters written vertically on each of the pieces of cloth.

“Just over the foot bridge from HSU” [Humboldt State University]. Buy 1 hot tofu burger and get the 2nd at ½ price with this ad. Plus—Hot turnovers. Unique salads. Delicious desserts. Specialty groceries, & more. Open daily 8-8.”

Note 1. Letter (e-mail) from Matthew Schmit. 2009.

April 6. The “cloth in the doorway did come from Japan. It was a gift from a neighbor who had been in the service in Japan and made regular trips back there. On one of these trips, I asked him to look for any appropriate tofu shop art, etc. He also brought back a jacket, of the style shown in your books worn by tofu makers, black with white logo on the back. For years, we used to display it at demos and fairs until a Japanese woman translated the figures as the name of a lawn service company! Anyway, I never found out what the figures in the doorway cloth translated as.”

The “thatched” roof is actually “artistic license.” The “roof” as shown is actually a canvas awning. The actual roof of the building is flat. The building is 1,000 square feet, 25 by 40 feet.

Note 2. Many shops (including tofu shops) in Japan have *noren* or curtains over their entrances. It generally bears the name and trademark of the shop in white on cotton cloth dyed in black, brown or grey. The *noren* is more than a sign; it symbolizes the reputation or standing of a shop. When a shop apprentice finished his long apprenticeship and became an expert in the trade, he was formally allowed to leave and start his own business, with permission to use the *noren* of his master-employer. This was called *noren-waké* or “dividing the noren.” “This privilege was not given unless the apprentice was found able to keep up the tradition and reputation of his master’s shop.” This may be seen as a self-regulating system of quality control (Source: *Things Japanese*, by Mock Joya; 1960, p. 85-86).

Note 3. Letter (e-mail) from Matthew Schmit. 2012. May 18. “Our Tofu Burger was baked. If I remember correctly, the ingredients were based on a recipe we found for deep-fried ‘Dragon Balls’ made with ganmo. Our Tofu Burger has always been baked. We still offer this burger today.” Address: 768 18th St., Arcata, California. Phone: Take out: 822-7409.

1768. Engel, Margaret. 1985. Relaxation and rice: Its mind over body at Natural Foods Expo. *Washington Post*. Oct. 27. p. G4.

• **Summary:** This Expo is a four-day gathering in Washington, DC, of 5,000 food manufacturers who are selling “everything from soy-burgers to no-sugar candy bars” and even “tofu hot dogs.”

1769. **Product Name:** Tofu Burgers.

**Manufacturer’s Name:** 21st Century Foods Inc.

**Manufacturer’s Address:** 30A Germania St., Jamaica Plain, MA 02130. Phone: 617-522-7595.

**Date of Introduction:** 1985 October.

**Ingredients:** Organic tofu, sourdough bread crumbs, vegetables, roasted sesame seeds, herbs, spices.

**Wt/Vol., Packaging, Price:** 5.5 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1987. 3 inches

diameter. Red, green, black, orange, and white. “All natural. Organic. Gourmet. Ready to eat. Pareve.” Howard Posner. 1987. 21st Century Whole Foods Cook Book. Inside rear cover. Talk with Rudy Canale. 1988. Sept. 13. The invoice for printing the labels for this product is dated Oct. 1985.

1770. *Organica*. 1985. What ever happened to the American hot dog? 4(5):9. Autumn.

• **Summary:** Praise for Lightlife Tofu Pups (meatless tofu-based hot dogs), seen at the Whole Life Expo in Boston, Massachusetts.

1771. **Product Name:** [Tofu Burgers].

**Foreign Name:** Tofu–Bratlinge.

**Manufacturer’s Name:** Tofuhaus Tiefenthal.

**Manufacturer’s Address:** Hauptstrasse, D-6719 Tiefenthal, West Germany. Phone: 06351-43718.

**Date of Introduction:** 1985 October.

**Ingredients:** Tofu, okara, brown rice, whole wheat flour, vegetables, sesame, flaxseeds, soy sauce, sea salt, and spices.

**Wt/Vol., Packaging, Price:** 2 pieces per 150 gm vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet. 1988. The ingredients are freshly prepared, fried, and packed after cooling. They make 5,000 to 7,000 pieces/month. Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in July 1986. Label. 1988, received. 5.5 by 4.25 inches. Black on tan.

Label brought by Albert Hess. 1995. March 11. 2.5 by 4 inches. White and green on orange. An illustration shows a large personified cake of tofu, with smiling face and arms held out. The product name is now simply “Tofu Bratlinge.”

1772. **Product Name:** Lamp-Lite Tofu Entrees [Stuffed Shells Florentine, Stuffed Cheese Shells, Carrot Pasta Manicotti, Carrot Pasta Lasagna, Lasagna Florentine, Manicotti Florentine].

**Manufacturer’s Name:** Virgo Foods.

**Manufacturer’s Address:** Burbank, California.

**Date of Introduction:** 1985 October.

**How Stored:** Frozen.

**New Product–Documentation:** Food Report (Lehmann). 1985. Oct.

1773. Francese, Peter. 1985. More will give thanks with tofu. *Detroit Free Press*. Nov. 17. [1 ref]

• **Summary:** This Thanksgiving, some imaginative vegetarian cooks will mold their tofu in the shape of a turkey. Since 1979, retail sales of tofu and other soy foods (including soy sauce) have increased nearly fivefold in the USA, from about \$41 million in that year to \$104 million in 1981, rising to about \$200 million in 1984—according to Business Trends Analysts (Commack, New York).

A graph from American Demographics shows “soy food sales” from 1979 to 1984. Address: Michigan.

**1774. Product Name:** Island Spring Tofu Burgers [Oriental Style, Italian Style, or Mexican Style].

**Manufacturer’s Name:** Island Spring, Inc.

**Manufacturer’s Address:** P.O. Box 747, Vashon, WA 98070.

**Date of Introduction:** 1985 November.

**Ingredients:** Oriental Style: Tofu (soybeans grown without chemical pesticides or fertilizers; water; bitter melon or nigari, an extract of seawater; natural calcium sulfate, traditional Chinese ingredient); highfiber tofu (as stated previously, plus soybean fiber); rolled oats; sesame seed; carrot; onion; green onion; soy sauce; ginger; corn oil.

**Wt/Vol., Packaging, Price:** Two 3-oz (170 gm) burgers per vacuum pack. 16 units per case.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 3 oz: Calories 210, protein 11 gm, fat 12 gm, carbohydrates 15 gm, sodium 300 mg.

**New Product–Documentation:** Product Alert. 1986.

March. Beachcomber (Vashon, Washington). 1986. Nov. 26.

Talk with Yvonne Kuperberg of Island Spring. 1988. June 2.

The product was introduced in November 1985 and vacuum packed. Label. 3.5 inches diameter. Self adhesive. Purple, black, yellow, red and green. Illustration of the moon rising over the hills behind a lake or sound. “A Fitness Food from the Pacific Northwest, USA.”

1775. Levoy, Gregg. 1985. Fast food for the rest of us [McDharma’s in Santa Cruz, California]. *New Age Journal* (Boston, Massachusetts). Nov. p. 8.

• **Summary:** Since 1982 restaurateur Clark Heinrich has been serving up Brahma Burgers (containing soy protein), Big Monks, Dharma Dogs (tofu), I’m Not Chicken (breaded tofu), and Nuclear Subs at his converted ‘50s style milkshake and burger joint in Santa Cruz, California. His walk-in vegetarian fast food relies heavily on tofu and beans. McDonald’s is suing McDharmas for infringement of trademark, their famed prefix “Mc.”

**1776. Product Name:** [Soy Burgers / Taifun Hop Sing Tofu & Okara Burgers].

**Foreign Name:** Sojaboerger / Taifun Hop Sing Gemuesebratling.

**Manufacturer’s Name:** Life Food.

**Manufacturer’s Address:** Wallstrasse 3, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.

**Date of Introduction:** 1985 November.

**New Product–Documentation:** Interview by Anthony Marrese. 1990. March. And price list. This was the company’s first product. The original variety was “Full of cracked kernels” (*Kernig, knackig*) with green corn and sunflowers, or soybeans and fresh vegetables; they now

make 600/week. In Dec. 1986 they introduced a cheese and paprika variety; they now make 350/week. In April 1989 they launched a hearty & spicy smoked tofu burger; they now make 400/week. These are also sold to restaurants in either fried or unfried form. Thus in early 1990 make they 1,250/week of three types.

The original name of the product was Sojabörger. But at the same time they used the name Hop Sing on special occasions when they went to present food in the marketplace or in pubs, or give it out at a rock concert. They have an ad with a cook and Hop Sing. It is a soy burger and most of it is okara.

**1777. Product Name:** Earthling Tofu Vegetable Burger.

**Manufacturer’s Name:** Pacific Soyfoods.

**Manufacturer’s Address:** 6644 Sexton Dr., N.W., Olympia, WA 98502-9551. Phone: 206-866-9661 or 206-866-9246.

**Date of Introduction:** 1985 November.

**Wt/Vol., Packaging, Price:** 8 oz. or 16 oz.

**New Product–Documentation:** Talk with Peter Lesser of Northwest Natural. 1991. Feb. 8. In about Nov. 1985. he introduced his first tofu burger, the Earthling Tofu Vegetable Burger. He bought the tofu for this burger from Boo Han.

1778. Friedman, Martin. 1985. New entries crowd health food market: Even more tofu desserts and frozen entrees. *Adweek East* (New York). Dec. 9.

• **Summary:** Discusses various new products. As “reports of weakening sales of frozen tofu desserts are filtering in, there were a half-dozen new tofu dessert items that were being confidently introduced to the health food market.”

“Tofu items are becoming so popular that they have a section of their own at health food shows. Legume’s success with frozen entrees is spawning such imitators as Walker & Wilks Tofoods (sweet and sour, Bar-B-Q and teriyaki) and Lamp Lite Natural Foods’ six Italian tofu entrees... Harvest Earth Foods offers Tempeh Delites, fully cooked cutlets and sticks that are made from cultured organic soybeans; and Light Foods sampled Light Links (tofu hot dogs) and Tofu Bagel Links. In the frozen dessert arena, Tofu Today presented Tofruzen, while Tofreezi was sampled by Melta [sic, Metta] Tofu Products. Other new low-calorie and low-cholesterol desserts promoted were Imagine Foods’ Rice Dream and Nouvelle Sorbet.”

1779. *SoyaScan Notes*. 1985. Chronology of soybeans, soyfoods and natural foods in the United States 1985 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 2. The soybean crushing industry begins a year of major restructuring as the big get bigger and two pioneers drop out. Ralston Purina announces that it has sold six of its soybean crushing plants to Cargill, Inc. A seventh at Memphis was closed. This removed the company from the

soybean commodity business. With this transaction Cargill passes ADM to become America's largest soybean crusher.

Jan. 3. "Myth or Miracle: Debunking the Tofutti Fad," by Mark Medoff published in *Whole Life Times*. The first exposé of Tofutti, which contains very little tofu. Jan. 13 Medoff appears on the Gary Null Show, Natural Living, to discuss his findings for 1 hour on prime time radio.

Jan. 12. A.E. Staley Manufacturing Co. announces that it is basically getting out of the soybean crushing business. It has sold five of its six soybean plants (having a combined crushing capacity of some 275,000 bushels daily) to Independent Soy Processors Co., which is closely affiliated with Archer Daniels Midland. Staley was unable to sell its Decatur facility, which ceased operations indefinitely in Jan. 1984. With this transaction ADM has probably regained a slight lead as America's largest soybean crusher.

Jan. 14-26. Soybean Utilization Workshop held at Soyfoods Research Center in Gannoruwa, Peradeniya, Sri Lanka, sponsored by the Sri Lanka Soybean Project and INTSOY. 24 representatives from 12 developing countries participate. The world's first event of its kind (*Soynews*, Dec. 1985).

Jan. 25-27. Natural Foods Expo at Anaheim. Soy ice creams steal the show. Tofu standards are debated heatedly at Soyfoods Association board of directors meeting on Jan. 28, especially by Ralston Purina attorney. Board decides funds are too limited to try to hire an executive director for SAA. Jan. 31. Paul Obis, founder and editor of *Vegetarian Times*, is seriously considering buying *Soyfoods* magazine from Doug Fiske. He makes a firm offer in late March.

Feb. "Designer Beans," an excellent overview of the U.S. soyfoods movement and its gourmet connections by Sandy MacDonald, published in *New Age* magazine.

Jan. American Soybean Association introduces SIS (Soybean Information Service), a computerized database focusing on soybean production and marketing, and oil and meal. The earliest record is 1958.

Feb. 21. *Tofutti and Other Soy Ice Creams: Non-Dairy Frozen Dessert Industry and Market*, by Shurtleff and Aoyagi published by The Soyfoods Center. Two volumes, 352 pages. This is the first study of the rapidly emerging soy ice cream market, and of Tofutti.

Feb. 27. "Tofu Products May Be In, but Its Fans Wonder if There's Tofu in the Products" by Trish Hall published in *The Wall Street Journal*. Second major exposé on so-called "tofu ice creams" (such as Tofutti and Gloria Vanderbilt Glace), which contain only a token amount of tofu, as a marketing gimmick.

March 13-14. The theme of the Feb. 27 *Wall Street Journal* article picked up by the NBC evening news and the Today Show. Very positive coverage for tofu. Gary Barat of Legume, David Mintz of Tofu Time, and Gloria Vanderbilt each speak about tofu.

March 22. *The Book of Tempeh*, extensively revised

second edition by Shurtleff and Aoyagi, published by Harper & Row. New bibliography (374 entries), history chapter, and list of tempeh producers.

March 26. Soyfoods Association's Tofu Standards (7th draft) presented to eight senior officials at the U.S. Food and Drug Administration's Center for Food Safety and Applied Nutrition, in Washington, DC, by Tom Timmins (Head of SAA Standards Committee), Gary Barat (President of SAA), Steve McNamara and Tom Donegan (SAA Food & Drug attorneys). The FDA group hears an hour long presentation on tofu, the standards, and the Soyfoods Association of America.

March. Soyarella (later renamed Soy Mozzarella), a tofu-based cheese, is introduced. It becomes an instant hit. Distributed by Neshaminy Valley Natural Foods of Huntingdon Valley, Pennsylvania, it is labeled as "non-dairy," yet it melts, and it tastes like cheese. Shrouded in secrecy, its manufacturer is unknown and the ingredients are questionable. It is sold in large blocks and labeled at individual stores.

March. American Soybean Assoc. launches a campaign among its members to write USAID and encourage them to cancel support for U.S. programs (such as INTSOY) aiding soybean production in Third World nations. The campaign is successful.

April 1. INTSOY signs a new cooperative agreement with USAID. Their work will henceforth focus on soybean utilization. The shift toward utilization began in 1983 and all work on soybean production and varietal development stopped in Aug. 1986.

April. *Tempe: An Annotated Bibliography*, compiled by Siagian and Sofia in Indonesia. Containing 273 references, it is the first bibliography to introduce the extensive Indonesian-language research on tempeh, the majority of which has been published since 1980.

April 15-16. International Symposium on Tempeh held in Jakarta, sponsored by the Indonesian Ministry of Health. 113 people attend.

April. Central Soya buys Griffith Laboratories' line of protein products.

May 31. Barricini Foods acquires Farm Foods, which then becomes a trade name for Barricini's natural / health foods line of non-dairy frozen desserts, including the pioneering product, Ice Bean, and Barricini Tofulite.

May. Morinaga, one of Japan's largest dairy companies, establishes Morinaga Nutritional Foods, Inc., a subsidiary with offices in Los Angeles, to focus on promoting their long-life silken tofu in America.

May. At the 6th Annual Natural Foods Merchandiser Merchandising Awards, soyfoods do well. Miso Mustard by American Natural Foods and Malted by Westbrae win gold medals. Ah Soy by Great Eastern Sun wins a silver.

May. Soft Tofu Cheese, a non-dairy cream cheese cultured in miso, launched by Simply Natural, Inc.

June. Tofu Topper launched by Worthington Foods.

June. Ralston Purina publishes its 1985 Consumer Attitudes Monitor. Soy Protein in Foods, based on a nationwide survey of 628 adults. Indicates positive attitudes toward soy protein and soyfoods.

July 19. Shamrock Capital, a private company headed by Roy Disney, buys Central Soya, a publicly owned corporation. Agreement to buy was announced April 2.

July. Soy Supreme, spray-dried tofu powder, launched by Oberg Foods Div. of St. Peter Creamery.

July. Asian Symposium on Non-Salted Soybean Fermentation held at Tsukuba, Japan.

July 31. Tofu Time's sales of Tofutti increased more than sevenfold last year to \$17,114,886 as compared with \$2,361,391 for the previous year. Net income increased nearly 100-fold to \$2,006,451.

July. New Gallup survey on vegetarianism of 1,033 Americans shows that millions are eating less meat and tens of millions agree with the move away from meat. 72% disagree with what used to be the standard notion: "The vegetarian diet is just a fad that will pass." A majority (52%) believe that "no one really needs to eat meat more than once or twice a week."

Aug. The DE-VAU-GE soymilk plant in West Germany starts production. Built by STS, with 4,000 liters/hour of soymilk capacity, they make Granose and GranoVita brands of soymilk.

Aug. Lightlife Meatless Tofu Pups (hot dogs) introduced by Tempehworks / Lightlife Foods of Greenfield, Massachusetts. The product sold nearly \$250,000 in the next 10 months.

Sept. Soyfoods Center introduces SOYA, a computerized bibliographic database on soybean utilization, history, nutrition, processing, marketing, and production. Contains 18,500 references from 1100 B.C. to the present.

Sept. 30. Fearn Natural Foods in Illinois is sold by Louis Richard to Modern Products, Inc. in Milwaukee, Wisconsin.

Sept. 30 to Oct. 4. Tropical Soybean Workshop held at the International Institute of Tropical Agriculture (IITA), Ibadan, Nigeria. Proceedings are published in 1987 as Soybeans for the Tropics. Also this year IITA established a soybean utilization unit.

Sept. Tofulicious, a tofu-based non-dairy ice cream launched by Eastern Food products of Minneapolis. It was developed in conjunction with the University of Minnesota and funded by the Minnesota Soybean Research and Promotion Council. By 1986 it has become the first soyfood product in recent times to be actively promoted by state soybean associations, who sell it at many state and county fairs... where it is a big hit. Through Tofulicious many soybean growers begin to warm up to soyfoods.

Oct. 8th Draft of the Tofu Standards finished, incorporating extensive suggestions from FDA. Compiled by William Shurtleff.

Oct. Mori-Nu brand aseptically packaged tofu introduced by Morinaga Nutritional Foods.

Oct. Cream of the Bean Soygurt, a cultured soymilk yogurt, launched by Cream of the Bean, Inc.

Nov. Kikkoman introduces a long-life tofu in a foil retort pouch, imported from Japan. Poor quality causes the product to be withdrawn. It was re-introduced later.

Dec. Tofu Time starts exporting Tofutti to Japan. The first order by Daiei (a large retailer) of tubs for their parlors, is \$350,000. This may be the first major export of a soyfood product (not including ingredients such as soy protein isolates) to Japan.

\* The International Institute of Tropical Agriculture (IITA) in Ibadan, Nigeria, starts a program to promote processing and utilization of soybeans in Nigeria and throughout Africa. Continued.

1780. *SoyaScan Notes*. 1985. Chronology of soybeans, soyfoods and natural foods in the United States 1985 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. 1985 New Trends:

Dramatic Rise of Tofutti and Other Soy Ice Creams. 1985 will go down in the soyfoods history books as the "Year of Tofutti." Never before in history of the United States has any soyfood product achieved such widespread and sudden popularity or notoriety.

During 1985 at least 50 brands of soy ice cream (many with "Tofu" on the label) were on the market worldwide, most in the USA. And many were made by America's biggest dairy companies. An estimated 2.5% of all frozen desserts except novelties (popsicles, bars, etc.) sold in supermarkets were soy-based nondairy. The result of all this was to introduce tofu and isolated soy proteins to millions of people in a very positive context.

But many of the companies that sold so-called "tofu ice creams," while emphasizing tofu in their product names and marketing programs, actually had surprisingly little (if any) tofu in their products. In fact they contain so little that this marketing gimmick might be misbranding and a deliberate deception of the consuming public.

Rise of Soyfoods in Europe. Thanks to the Belgian Office of the American Soybean Association (ASA), and specifically to the efforts of Michael Martin, Europe's growing soyfoods movement is starting to become organized and active. In March 1984 Martin launched Europe's earliest known soyfoods newsletter, *Soya Foods*, and in September organized the First European Soyfoods Workshop, for which bound proceedings were published. This is the first time in recent decades that ASA has promoted soyfoods (other than soy oil) in the Western World. The strong U.S. dollar has led to a recent dramatic decline in imports of soybeans and soybean meal to Europe for feed and oil use (European rapeseed and sunflowerseed are being substituted), so the

ASA is exploring new outlets where soy is unique.

The launching of tofu production and marketing by Switzerland's biggest supermarket chain, Migros, and by Galactina, a large and respected maker of dietetic and pharmaceutical products (including soymilk) is a landmark for tofu in Europe. In early January, *Tages Anzeiger*, one of Switzerland's biggest newspapers, had a special report on tofu, followed on Jan. 9 by a 30-minute TV feature on tofu.

The total number of soyfoods companies in Europe continues to show a steady increase. Many of these are being founded by people interested in macrobiotics. By Jan. 1985 there were 1,113 names on The Soyfoods Center's computerized mailing list of people actively involved with soyfoods in Europe.

At the 1984 ASA soyfoods workshop, Martin reported the following estimates of annual European soyfoods consumption: A table with three columns shows: Soyfood name, consumption, percentage of U.S. consumption.

Soy oil—1.7 million metric tons—38%

Modern soy protein products—40 million kg—28%

Soymilk—9 to 10 million liters—7%\*

Tofu—5 to 6 million kg—22%

Tempeh—400,000 to 500,000 kg—50%

Miso—250,000 to 300,000 kg—11%

\* U.S. figure includes soy based infant formulas.

European figure is not clear on this point.

Note that the population of the USA is about 234 million compared with 489 million for all of Europe (not including the USSR), but 237 million for Northern and Western Europe, where most of these products are consumed.

Rapid Growth of Second Generation Soyfoods. In the 1984 edition of this book, we stated that the three fastest growing soyfoods in the USA (in terms of production increases) were tempeh (33% a year compound annual growth rate), tofu (15%), and soy sauce (14%). But now the picture has changed. In 1984 the fastest growing category was second generation products, ready-to-eat, all-American preparations, especially those based on tofu. The leader in this group is clearly soy ice creams (led by Tofutti), with a production growth rate of roughly 600% a year for the past 1-2 years. Then comes convenience tofu-based entrees such as Legume's products, tofu burgers and tofu burger mixes, and the like. This is the number one way that soyfoods are now entering the mainstream American diet. And the biggest gains are being made by marketing companies, rather than manufacturers. The second fastest growing category may now be imported soymilks, growing at about 40-60% a year. Major New Capital Influx. The following is a brief summary of new capital influx to the soyfoods industry: A table with four columns shows: Company name, date of offering, \$ amount, equity or debt; use.

Legume—Oct. 1982—\$100,000 net—Equity. For tofu frozen entrees

Legume—Oct. 1982—\$100,000—Debt. For tofu frozen

entrees

Legume—Nov. 1983—\$400,000 net—\*Equity. For tofu frozen entrees

Legume—Nov. 1983—\$200,000—Debt. For tofu Frozen entrees

Hinode Tofu—Nov. 1983—\$2,500,000—Equity For general expansion

Tofu Time—Dec. 1983 \$2,760,000 net—Equity. For soy ice cream

Tempehworks—July 1984—\$265,000—Debt. For tempeh expansion

Legume—Feb. 1984—\$200,000—Debt. For tofu frozen entrees

Legume—Aug. 1984—\$1,248,000 net—Equity. For tofu frozen entrees

Brightsong—Dec. 1984—\$500,000—Equity. For tofu products

Legume—April 1985—Expecting lots more. For tofu frozen entrees

White Wave—Expecting.

Note: Equity = Sale of equity ownership in the company via stock in a public offering or in a private placement. Debt = Debt financing by taking out a private loan.

How have these companies fared? Tofu Time has done spectacularly well. The value of the company has increased more than five-fold since Dec. 1983, and profits are excellent. Legume, a marketer of low-calorie, cholesterol-free frozen entrees featuring tofu, has had the hardest sledding. A preliminary prospectus by Huberman Margaretten & Straus dated 5 June 1984 stated that from its inception through 31 March 1984, the company incurred aggregate losses of \$709,773, including a loss of \$18,465 in 1982, then \$225,302 in 1983, increasing again to roughly \$486,500 in 1984. Legume's common stock had a negative book value; 1984 sales were "a little less than \$1 million." Yet the company has excellent products and in early 1985 landed some foods big chains, which could help its bottom line considerably.

Growing International Interest in Tempeh. During 1983-84 Japan became a major tempeh producer. By May 1984 the world's largest tempeh producing company was Marusan-Ai (of Japan), which made 15,150 lb. a week. New marketing and production techniques were pioneered. The full story was described by Shurtleff and Aoyagi in *Tempeh Production* (1984).

Three Major International Symposia Featuring Tempeh were held: 15-16 April 1984 in Jakarta, Indonesia; 15-17 July 1984 in Tsukuba, Japan; and May 1986 in Honolulu, Hawaii. A special 13-day group study tour on Japanese Food Fermentations, led by Dr. Keith H. Steinkraus, has been organized by the Japanese-run, New York-based Technology Transfer Institute. Tempeh continues to be one of the fastest-growing soyfoods in the USA.

Growing Interest in Spray-Dried Tofu. Eleven articles

were published this year on a product that promises to revolutionize the tofu industry. The first and largest manufacturers (St. Peters Creamery and Clofine) are both dairy companies. Spray dried tofu should appeal to the food industry, since it is easy to ship, store, and process.

Dairy Magazines Publishing Many Positive Articles About Soy-Based Dairylike Products. Traditionally the dairy industry has seen dairy analogs as a threat and fought to oppose them. The decades-long struggle against margarine is a good example of this. But now, many small dairies, struggling to survive, are looking for new products. A number (such as St. Peter Creamery and Clofine) have gained a new lease on life by starting production of soyfoods.

Major Changes in the U.S. Soybean Crushing Industry. Narrow crushing margins, a depressed export market for U.S. soybean meal, and poor profitability have led two of America's biggest soybean crushers, the A.E. Staley Manufacturing Company and Ralston Purina, to decide to get out of the soybean crushing business in Jan. 1985. Clearly they view poor profitability as a long term problem, and plan to diversify away from unpredictable agricultural commodities toward the "value added," retail end of the nation's food supply. Staley, in effect, sold its plants to ADM and Ralston Purina sold its to Cargill. In Nov. 1984 Staley acquired CFS Continental, Inc., the nation's second largest supplier to the foodservice industry. Staley, previously the oldest existing soybean crusher in America (since 1922), now relinquishes that honor to ADM. ADM is now the largest soybean crusher in America, but Cargill (which has many overseas plants) is the biggest in the world. These changes have led to a concentration of control in the U.S. soybean crushing industry. Both Staley and Ralston Purina plan to keep their edible soy protein (isolates, concentrates, etc.) operations.

Biotechnology is Emerging as a Major, Promising Factor in future soybean breeding development. Some agricultural experts are predicting that it could usher in the latest agricultural revolution, following the agrichemical revolution of the 1940s and the Green Revolution of the 1960s and 1970s.

The "Calcium Craze" Starts in America, aiding sales of tofu (curded with calcium sulfate), which is one of the best non-dairy sources of calcium.

1781. Rosetree, Laura. 1985. Discover okara. *Bestways*. Dec. p. 50-51, 58.

• **Summary:** The subtitle continues: "When you make soymilk or bean curd (tofu) from soybeans, the left over part of the beans is okara. Frankly, the stuff doesn't look prepossessing but don't let appearances trick you. When you use the recipes given here, culinary magic will transform okara completely."

One cup of okara contains as much protein as one cup of milk. And okara is rich in fiber, while cow's milk contains

none. Contains 14 recipes including: Okara scrambled eggs. Okara quiche. Peggy's burgers. Maple nut cheesecake. Also contains a section on soy grits or granules—with cooking ideas but not recipes.

1782. **Product Name:** [Grinioc Grain and Tofu Burgers (Rice, Millet, or Bulgur)].

**Foreign Name:** Grinioc: Galettes de riz (millet, or blé) aux légumes.

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

**Date of Introduction:** 1985 December.

**Ingredients:** Rice: Whole grain rice\* (66%), legumes (15%): Peas, tomatoes, onions, hot red and green peppers, soya, sunflowerseed oil, spices and aromatics. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 200 gm.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm: Protein 3.3%, lipids 10.3%, carbohydrates 19.5%, calories 186.

**New Product—Documentation:** Leaflet. 1988. Front and back. 6 panels. "Grinioc fresh wholemeal burgers. The best way to eat wholemeal cereals (rice, millet, wheat), as an accompaniment to vegetables or as is when you are feeling a little peckish, Grinioc is actually a complete meal in itself."

Labels for all 3 products. About 1988. 3.5 by 7 inches. Self adhesive. Shows a color photo of one burger/croquette on a plate with garnishes such as shrimp, mushrooms, or sliced tomatoes. Refrigerate at 4°C.

Letter from Bernard Storup. 1989. March 3. These products were launched in Dec. 1985.

1783. Tofu Shop Specialty Foods (The). 1985. Price increase Jan. 1 (Leaflet). Arcata, California. 1 p. Single sided.

• **Summary:** Due to rising operating costs, the prices of all Tofu Shop products will go up approximately 5% starting January 1, 1986.

"Traditional tofu? Did you know that The Tofu Shop in Arcata is one of only a few such traditional-style tofu companies operating successfully in the United States today." They do not make "mass-produced" tofu.

"About The Tofu Shop: Founded in 1980, The Tofu Shop employees eight trained soyfoods workers who produce monthly: 6,000 pounds of fresh, traditional-style tofu, 2,500 tofuburgers, 50 quarts of soymilk, and thousands of tofu cutlets, sausages, salads and desserts. Almost all of our products are distributed right here in Humboldt County!"

The Tofu Shop also operates a retail delicatessen near Humboldt State University in Arcata (768 18th Street).

Illustrations show: The front of the deli. (2) The little house on stilts by the ocean, with an Oriental-style roof and a wind-blown tree arching overhead. Address: 768 18th St., Arcata, California 95521. Phone: (707) 822 7409.

1784. **Product Name:** Tree of Life Spaghetti Sauce with Tofu.

**Manufacturer's Name:** Tree of Life, Inc. (Distributor).

**Manufacturer's Address:** 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

**Date of Introduction:** 1985 December.

**New Product–Documentation:** Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in Dec. 1985.

1785. **Product Name:** Natural Touch Spicy Chili.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1985 December.

**Ingredients:** Water, wheat gluten, red beans, tomato paste, soybean oil, spices, food starch, yeast, garlic, onion, sea salt, fruit juice concentrate.

**Wt/Vol., Packaging, Price:** 20 oz can.

**How Stored:** Shelf stable.

**New Product–Documentation:** “Ready to heat and eat.”

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

1786. **Product Name:** Dynoburger (Meatless Patties with Textured Soy Protein).

**Manufacturer's Name:** All Right Foods Marketing.

**Manufacturer's Address:** -

**Date of Introduction:** 1985.

**Ingredients:** Incl. textured soy protein, sesame seeds, sunflower seeds, plus 50 herbs and spices.

**Wt/Vol., Packaging, Price:** 3 oz patties.

**New Product–Documentation:** Business Trend Analysts. 1986. *The Health and Natural Food Market.* p. 113.

1787. **Product Name:** Bean Supreme Soysage (Vegetarian Okara-Based Sausage).

**Manufacturer's Name:** Bean Supreme Soyfoods.

**Manufacturer's Address:** P.O. Box 78084, 1 Wallingford St., Grey Lynn, Auckland, New Zealand.

**Date of Introduction:** 1985.

**Wt/Vol., Packaging, Price:** 300 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Poster. 1986. Form filled out by Trevor Johnston, Marketing Director. 1989. April. This product was introduced in 1985. They now make 1,500 kg/month.

1788. **Product Name:** California Nhot Dog (With Tofu).

**Manufacturer's Name:** East Coast West.

**Manufacturer's Address:** Fashion Island Mall, California. Phone: 341-4133.

**Date of Introduction:** 1985.

**New Product–Documentation:** Talk with Paul Duchesne. 1989. July 31. This man and his wife have been around for 4-5 years. He ran a deli and bakery in a mall selling the Nhot-Dogs (his main product), knishes, bagels, muffins, cookies, cheesecakes, etc. Sold T-shirts and sold his products at fairs. Paul has a menu of his. He might be in San Francisco under California Nhot Dog. Paul has a menu from the place mat, but does not recall the persons name.

1789. **Product Name:** [Exitex Rice Marinara, Rice “Beef Flavor,” Neapolitan Macaroni, “Beef” and Noodle Soup, “Chicken” and Noodle Soup, Beef-Flavored Chunks in Sauce].

**Manufacturer's Name:** Exitex Mundial S.A. Subsidiary of Exitex Caribe Inc.

**Manufacturer's Address:** Apartado 475-1150, La Uruca, San Jose, Costa Rica. Phone: 31-41-16.

**Date of Introduction:** 1985.

**Ingredients:** Grains and textured soy flour.

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with Gil Harrison.

1989. April 17. Carla Weaver has set up a company in San Jose, Costa Rica named Exitex that imports soy products to Central America. She represents American manufacturers that are exporting those products.

Talk with Roy Beery, head of Exitex Caribe Inc. and brochure describing the company, its history and goals. 1990. Oct. 23. Mary Carla Weaver was originally from Houston, Texas, then in the early 1980s went to work as a missionary in San Jose, Costa Rica. In 1985 she founded Exitex in San Jose, Costa Rica. She imported textured soy protein plus some flavors from the U.S. to Costa Rica then blended them there with either pasta or rice plus spices, flavors, etc. The dry product, which is sold in cellophane bags, is boiled in water to provide a very low-cost, well-balanced, highly nutritious meal (plus employment) for the low-income people with whom Carla was working. A typical package serves 5-8 people. All contain textured soy protein. None contain any animal proteins. The products taste good and are well accepted in Central America. The problem is to get adults to change their personal eating habits. The foods are consumed more by adults than kids, often through feedings programs. In 1989 business was increasing, with about 15 employees. Then on 21 Oct. 1989 Carla (who was the heart and soul of the operation) was killed in a Sahasa Airlines crash in Tegucigalpa, Honduras, along with about 130 other people. Her family and friends in Houston who had been supporting her wanted to keep the food program going, so after 8 months they hired Roy (who lives in Houston) to restart the business and manage and promote operations. He works at Exitex Caribe Inc., 2200 Post Oak Blvd., Suite 607, Houston, TX 77056.

Fact Sheet. 1990, undated. Describes and gives a

nutritional analysis of each of the 6 products.

Note: This is an interesting product concept and one that has not yet been widely tested in Third World countries. It is basically a low-cost dry (shelf-stable) mixture of meat-flavored textured soy protein (usually textured soy flour) with a grain or pasta. Most products with a similar goal are mixtures of soy flour and a cereal flour. When prepared they have a consistency like porridge or mush.

Talk with Roy Beery of Exitex. 1991. Sept. 24. His company is still selling six entrees in Central America. They have just sent their first shipment, one container, to Kazakhstan, a Muslim area in the USSR.

**1790. Product Name:** GlobaLite Vegetarian Entrees [Sweet 'n Sour, Italian, Mexican, Stroganoff, Ala King, Chili, Vegetable Soup, "Chicken" Noodle Dinner, Spaghetti, Country Style Breakfast, Chunky Stew, Chicken Flavored Noodle Soup, Seafood Chowder, Sloppy Joe, Tetrizzini, Burgundy Tips, "Ham" & Potato Bake, Home Style Stew ("beef," or "chicken")].

**Manufacturer's Name:** Global Foods.

**Manufacturer's Address:** 2881 Parkway Dr., Decatur, IL 62526.

**Date of Introduction:** 1985.

**New Product-Documentation:** Ad (full page, color) in Vegetarian Times. 1987. Dec. p. 53. Announcing GlobaLite Instant Tofu and GlobaLite Vegetarian Entrees. "Quick—about ½ hour from package to table. Easy—just add water and cook. Delicious—only the finest ingredients are used. Nutritious—One serving contains 25% of the U.S. RDA of protein."

**1791. Product Name:** Hera Vegetable Savoury Mixes [Fibre-Rich Burgers, Meatballs, Meatloaf, Shawburger, or Soysage].

**Manufacturer's Name:** Haldane Foods Ltd.

**Manufacturer's Address:** Units 16 & 20, Long Furrow Trading Estate, East Goscote, Leicester LE4 8XJ England.

**Date of Introduction:** 1985.

**Ingredients:** Meatballs: Textured soya protein food, oatmeal, potato powder, vegetable fat, hydrolysed vegetable protein, oatbran and germ, vegetable oil, onion powder, guar gum, garlic powder, herbs, spices.

**Wt/Vol., Packaging, Price:** 200 gm (7 oz) in cellophane envelope in paperboard box.

**How Stored:** Shelf stable.

**Nutrition:** Meatballs: Per 33 gm: Calories 123, protein 9.3 gm, fat 4.7 gm, carbohydrate 11.7 gm, fibre 3 gm, minerals 2.6 gm.

**New Product-Documentation:** Labels. 1985, undated.

"Meatballs: A complete natural mix of Soya Protein, Herbs, and Spices. High fibre. Requires only water. Needs no eggs. No added salt."

**1792. Product Name:** Hera Vegetable Soup Mixes [Bran Paysanne, Farmhouse Vegetable, Tomato, or Vegetable Goulash].

**Manufacturer's Name:** Haldane Foods Ltd.

**Manufacturer's Address:** Units 16 & 20, Long Furrow Trading Estate, East Goscote, Leicester LE4 8XJ England.

**Date of Introduction:** 1985.

**Ingredients:** Goulash: Wholemeal wheat flour, dried onions, vegetable oils, cornflour, hydrolyzed vegetable proteins, textured vegetable protein food, tomato powder, paprika powder, sea salt, wheat germ, potato powder, caraway seeds, herbs, spices.

**Wt/Vol., Packaging, Price:** 125 gm (4.4 oz) plastic envelope.

**How Stored:** Shelf stable.

**Nutrition:** Per 100 gm Goulash: Calories 393, protein 16 gm, fat 13 gm, carbohydrate 53 gm.

**New Product-Documentation:** Label. 1985, undated.

"Goulash: Wholesome soup mix based upon natural ingredients and with added natural supplements." Soya Bluebook. 1987. p. 100.

**1793. Product Name:** Hera Vegetable Meals [Bolognese, Casserole, Chili, Curry, Goulash, or Stroganoff].

**Manufacturer's Name:** Haldane Foods Ltd.

**Manufacturer's Address:** Units 16 & 20, Long Furrow Trading Estate, East Goscote, Leicester LE4 8XJ England.

**Date of Introduction:** 1985.

**New Product-Documentation:** Label. 1985, undated. "A complete natural mix of Soya Protein..."

**1794. Product Name:** Miso Master Gold Label Spaghetti Sauce.

**Manufacturer's Name:** Just In Foods, Inc.

**Manufacturer's Address:** Box 541, Route 3, Rutherfordton, NC 28139.

**Date of Introduction:** 1985.

**New Product-Documentation:** Leaflet. Back to back, 8½ by 11 inch, 3 color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Introducing Miso Master. Gold Label Spaghetti Sauce. Its the perfect marriage of tomatoes and miso.

**1795. Product Name:** Magic Bean Tofu Jerky.

**Manufacturer's Name:** Larry's Magic Bean Tofu Jerky.

**Manufacturer's Address:** 1116 East Belmont, Fresno, CA 93701. Phone: 209-485-3759.

**Date of Introduction:** 1985.

**New Product-Documentation:** Talk with Larry Barber. 1988. April 4. He sold this product briefly in about 1985 in San Francisco (Rainbow Grocery) and Santa Cruz (Staff Life), but it took him 1 hour to make 1 pound. He is now trying to automate the process and capitalize the company. The product has been off the market for 3 years. He gets his

tofu from Brad Kubota of Fresno Tofu Co.

Note: This is the earliest known commercial tofu jerky product. It contained textured soy protein.

**1796. Product Name:** Millstone Vegeburger (Meatless Burger).

**Manufacturer's Name:** Loma Linda Foods Inc.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1985.

**Ingredients:** Wheat gluten, water, whole wheat flour, hydrolyzed vegetable protein, oat flour, soy flour, dried yeast extract, onion powder, caramel color, salt, garlic powder, thyme, celery powder.

**Wt/Vol., Packaging, Price:** 19 oz can.

**Nutrition:** Per 3.8 oz.: Calories 110, protein 20 gm, carbohydrate 3 gm, fat 2 gm, cholesterol 0 mg, sodium 450 mg, potassium 75 mg.

**New Product–Documentation:** Loma Linda took over the Millstone line from Millstone Foods Inc. (Box 323, Penryn, CA 95663. Phone: 916-663-3302) in 1985. Label sent by Loma Linda Foods. 1988. Oct. 5. 11 by 4.25 inches. Green, yellow, black, and white. A color photo of the ready-to-serve dish is on the front panel.

Bowles. 1987. Total Health. Aug. p. 24. Called Information. 1988. Sept. 22. No listing for Millstone in Penryn or Sacramento, California.

**1797. Product Name:** Millstone Burger-Like.

**Manufacturer's Name:** Loma Linda Foods Inc.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1985.

**Ingredients:** Water, textured soy protein, soy sauce, salt, onion powder, caramel color, garlic powder, cumin, sage, celery powder, thyme.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 4 oz.: Calories 90, protein 13 gm, carbohydrate 8 gm, fat less than 1 gm, cholesterol 0 mg, sodium 440 mg, potassium 430 mg.

**New Product–Documentation:** Loma Linda took over the Millstone line in 1985. Label sent by Loma Linda Foods. 1988. Oct. 5. 11 by 4.25 inches. Green, yellow, black, and white. A color photo of the ready-to-serve dish is on the front panel.

**1798. Product Name:** Millstone Burger Mix (Dry Mix).

**Manufacturer's Name:** Loma Linda Foods Inc.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1985.

**Ingredients:** Flavored textured soy protein (soy flour, natural [vegetable] flavors, salt, spices, caramel color), rolled oats, dehydrated onion, egg whites, garlic powder, spices (basil, parsley, dill weed).

**Wt/Vol., Packaging, Price:** 4.5 oz can.

**How Stored:** Shelf stable.

**Nutrition:** Per 1 oz.: Calories 90, protein 10 gm, carbohydrate 12 gm, fat less than 1 gm, cholesterol 0 mg, sodium 370 mg, potassium 35 mg.

**New Product–Documentation:** Loma Linda took over the Millstone line in 1985. Label sent by Loma Linda Foods. 1988. Oct. 5. 11 by 4.25 inches. Green, yellow, black, and white. A color photo of the ready-to-serve dish is on the front panel.

**1799. Product Name:** Millstone Bacon-Like Bits.

**Manufacturer's Name:** Loma Linda Foods Inc.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1985.

**Ingredients:** Soy flour, soy oil, salt, natural (vegetable) flavor, artificial colors.

**Wt/Vol., Packaging, Price:** 6.5 oz can.

**How Stored:** Shelf stable.

**New Product–Documentation:** Loma Linda took over the Millstone line in 1985. Label sent by Loma Linda Foods. 1988. Oct. 5. 11 by 4.25 inches. Green, yellow, black, and white. A color photo of the ready-to-serve dish is on the front panel.

**1800. Product Name:** Millstone Nut Meat.

**Manufacturer's Name:** Loma Linda Foods Inc.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1985.

**Ingredients:** Water, peanuts, soy flour, corn flour, onion powder, salt.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 71 gm.: Calories 150, protein 7 gm, carbohydrate 6 gm, fat 10 gm, cholesterol 0 mg, sodium 280 mg, potassium 260 mg.

**New Product–Documentation:** Loma Linda took over the Millstone line in 1985. Label sent by Loma Linda Foods. 1988. Oct. 5. 11 by 4.25 inches. Green, yellow, black, and white. A color photo of the ready-to-serve dish is on the front panel. Loma Linda also makes three Millstone products that contain no soy: Wheat Fries, Vege-Beans, and Breeding Meal.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

**1801. Product Name:** Quorn (Meat Alternative Made from Mycoprotein).

**Manufacturer's Name:** Marlow Foods.

**Manufacturer's Address:** Stokesley (a small market town), North Yorkshire, in northern England.

**Date of Introduction:** 1985.

**Ingredients:** Based on mycoprotein.

**New Product–Documentation:** Byrne, Maureen. 1988. "Whatever happened to new protein?" *Food Manufacture* (London) 63(10):51-52, 54, 57. Oct. "The most exciting new protein food to have emerged in recent years is undoubtedly mycoprotein, developed by RHM [Rank, Hovis, McDougall] in the UK, which is the result of nearly 20 years of research... Called Quorn, this protein-rich food, with a texture very similar to that of meat, is now produced and marketed by Marlow Foods (formerly New Era Foods), a company jointly owned by RHM and ICI." The ideal source material for Quorn is "a microscopic plant called *Fusarium graminearum*, which is similar to the mushroom and which was eventually discovered not far from RHM's development centre near Marlow, Bucks (hence the name Marlow Foods). Marlow has now been producing Quorn at its factory in Stokesley in the North East of England for two years."

**1802. Product Name:** Wheat Meat Balls.

**Manufacturer's Name:** Sheffield Seitan.

**Manufacturer's Address:** South Wheelock, Vermont.

**Date of Introduction:** 1985.

**Ingredients:** Seitan (wheat gluten cooked in a broth of soy sauce, garlic powder, and cayenne).

**Wt/Vol., Packaging, Price:** 1 lb+.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Leo Denby, owner of Sheffield Seitan. 1998. Feb. 3. This frozen product was introduced in 1985. The balls were about 1 inch in

diameter and weighed about ½ ounce each. But it was too labor intensive to try to roll all the little balls then cook them in broth—so they dropped the idea.

**1803. Product Name:** Solnuts, and Solnuts Bacon Bits.

**Manufacturer's Name:** Solnuts, Inc.

**Manufacturer's Address:** Highway 64 N. (Houlton), Route 1, Box 271, St. Joseph, Wisconsin 54082. Or Solnuts B.V., P.O. Box 5066, Swaardvenstraat 41, 5004 EB, Tilburg, Netherlands.

**Date of Introduction:** 1985.

**New Product–Documentation:** Manufacturer's Catalog. 1985. "Solutns, a Soy Specialty: A New Development in Processing of Soy Beans." 4 p. Soya Bluebook. 1986. p. 108. Address: 5780 Osgood Ave., North, Stillwater, MN 55082. James J. Becker; p. 110. "Solutns ice cream toppings, nut extenders, dry salad ingredients."

**1804. Product Name:** Soya Nova Tofu.

**Manufacturer's Name:** Soya Nova Tofu Shop.

**Manufacturer's Address:** R.R. #2 Rourke Road, C-28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.

**Date of Introduction:** 1985.

**New Product–Documentation:** Two early entries in the Soyfoods Center NAMES database: (1) Chris Kodaly, R.R. #1, Mayne, BC, V0N 2U0, Canada. for Debbie Lauzon and Chris Kodaly. 1987. June 4. Nova Food at R.R. #1, Isabella Point Rd., Fulford Harbour, Saltspring Island, BC, V0S 1C0, Canada, is making tofu. Phone: 604-653-9259.

Talk with Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Oct. 20. Soya Nova Tofu Shop makes tofu at R.R. #2 Rourke Rd., C-28, Ganges, Saltspring Island, British Columbia, V0S 1E0, Canada. Phone: 604-537-9651. The owners are Chris and Debbie Kodaly. Saltspring is one of the "Gulf Islands" in the Strait of Georgia between Vancouver Island and southern southwest tip of the mainland of BC. They have been in business for 5-7 years. They started the business themselves and they have been in the same location for at least the last 5 years. They make tofu, herb tofu, and many other soyfood products. They label their products. They make 700 lb/week of tofu (plain and herb), plus soysage, soysage pastries (made by a French pastry chef).

Letter from Deborah Lauzon. 1991. Feb. 6. They moved to Ganges in 1985.

Talk with Silverking. 1992. Sept. They have a new Takai pressure cooker and boiler. They used to make 900 to 1,000 lb/week of tofu, but now they hope to make that much in one day.

**1805. Product Name:** Meatless Burger. Marinated Soy Tempeh.

**Manufacturer's Name:** Soyfoods Unlimited, Inc.

**Manufacturer's Address:** 14670 Doolittle Dr., San Leandro, CA 94577.

**Date of Introduction:** 1985.

**Ingredients:** Soy tempeh (made with cultured soybeans organically grown in accordance with the California Health and Safety Code, Section 26569.11), soy sauce, garlic, onion, and spices.

**Wt/Vol., Packaging, Price:** 6 oz vacuum packed.

**How Stored:** Frozen or refrigerated.

**New Product–Documentation:** Label. Undated. “All the Sizzle... None of the steak. Ready to eat in 3 minutes.” This product, introduced in September 1981, was originally called “Tempeh Burgers.”

1806. **Product Name:** Tempeh Burgers (Marinated).

**Manufacturer's Name:** Western Soy Complements.

**Manufacturer's Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-479-05968.

**Date of Introduction:** 1985.

**New Product–Documentation:** Talk with Jeremiah Ridenour. 1988. Aug. 31. This product was launched in 1985.

1807. **Product Name:** Beanificial Buffet Entree (With Textured Soy Protein) [Lone Star Chili, Pepper Steak Provencal, Down East Sloppy Joe, Italian Sauce Milanese, Ukranian Stroganoff, Sweet-Sour Oriental, or Tijuana Taco Mix].

**Manufacturer's Name:** Yankee Enterprises, Inc.

**Manufacturer's Address:** 642 North Lake Rd., Oconomowoc, Wisconsin. Phone: 414-567-5416.

**Date of Introduction:** 1985.

**Ingredients:** Lone Star Chili: Soy flour, tomato powder, spices, dehydrated onion and celery, soy oil, natural flavorings, garlic powder.

**Wt/Vol., Packaging, Price:** Dried product in 1.0 to 1.75 oz, 1-2 serving white plastic package, which retails for about \$1.50.

**How Stored:** Shelf stable.

**Nutrition:** Per serving: 12.1 gm protein, 1.4 gm fat, 71 calories, 9.5 mg sodium.

**New Product–Documentation:** Labels (7). Text on package: “Tasty new dish. Low sodium, low fat. A vegetable protein entree. Low calories. No cholesterol. High nutrition; Connole. 1987. Business Journal (Milwaukee, Wisconsin). March. p. 1, 24. “The dried product comes in 1.5-ounce, two-serving packages, which retail for about \$1.50. 45-191 calories/serving.” Letter from Hinds. 1987. April 16. This line is the dehydrated, add-only-water type.” Taste test, April 1987. Lone Star Chili is Bill’s favorite flavor, but it doesn’t have much texture. The pieces are too small to give real texture. One packet contains two very small (not generous) servings. Pepper Steak has good texture.

1808. **Product Name:** [Soyburger, and Okara’s Croquette].

**Manufacturer's Name:** Zuaitzo.

**Manufacturer's Address:** Calle Diputacion 5\* Piso, Calle Correria 39 Bajo, 01001 Vitoria-Gasteiz, Spain. Phone: 945/28 86 30.

**Date of Introduction:** 1985.

**Ingredients:** Tofu, okara.

**New Product–Documentation:** Soya Bluebook. 1985. p. 83, 101. Letter from Javier Arocena. “I started to work with soy in 1982 on a family scale and in 1984 on an industrial level. I started to make hamburgers of tofu and seitan in about Nov. 1987, but they didn’t sell very well.”

Note: This is the earliest Spanish-language document seen (Nov. 2014) that mentions a meatless burger–Soyburger.

1809. Batt, Eva. 1985. Eva Batt’s vegan cooking.

Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 144 p. Illust. (55 line drawings) by Margaret Leaman. Index. 22 cm.

• **Summary:** Across the bottom of the front cover: “The classic vegan cookbook. Recommended by The Vegan Society.”

Contents: Acknowledgements. Introduction. Mueslis. Soups and small savouries. Salads and Salad dressings. Ways with vegetables. Main meals. Small savouries. Savoury sauces, stuffings and spreads. Desserts and ice cream. Bread, cakes and buns. Pastry, biscuits and cookies. Miscellaneous. Useful information.

Soy related: In the Introduction are sections on “Soya” (p. 13-14) and “Textured Vegetable Protein (TVP)” (p. 17; several brands are available. “Most come in flavoured and unflavoured varieties, in chunks and mince.” This nutritious food is low in fat, “high in protein, economical, easily stored, requires very little cooking, and no waste {bone, skin, gristle or fat} is involved”).

Recipes include: Beauty breakfast (with “3 tablespoons vegetable milk” [Plantmilk concentrated soymilk], p. 28). Fresh fruit muesli (with vegetable milk, p. 29). Cream of onion soup (with “2 teaspoons soya flour” and “¼ pint {140 ml} undiluted concentrated vegetable milk,” p. 34). Salad cream (with “1 tablespoon undiluted concentrated vegetable milk,” p. 41). Tofu mayonnaise (with “4 oz {120 gm} silken tofu,” p. 41). Basic nutmeat mixture (with “2 level teaspoons soya flour,” p. 54). Curried textured vegetable protein (with “1½ oz {45 gm} unflavoured textured vegetable protein, mince or chunks,” p. 55). Mushroom pie (with soya flour, p. 62). Fricassee with mushrooms (with “2 oz {55 gm} tvp mince,” p. 63). Savoury steak (with “tvp slices” and “soy sauce,” p. 66). Bengal curry (with “1 teaspoon soya sauce,” p. 68). Pizza (with “10 oz {285 gm} cooked tvp or tin of soya beans,” p. 75). Onion tart (with “Soya sauce,” p. 76). Soya fritters (with soya flour, p. 79). Soya burgers (with “2 oz. tvp mince,” p. 81). Soya crispie (with soya flour, p. 92). Junket (with “½ pint {285 ml} concentrated soya milk,” p. 96). Banana ice-cream (with “¼ pint soya milk,” p. 97).

Plamil ice-cream (with “7 fl oz {200 ml} concentrated soya milk,” p. 97). Fruit and nut loaf (with “7 fl oz {200 ml} soya milk,” p. 101). Tiger’s bread (with 1 oz {30 gm} soya flour,” p. 102). Small fruit cakes (with soya flour, p. 102). Soya ‘cheese’ (cream style) (with “4 oz soya flour,” p. 122). Soya ‘cheese’ (cheddar style) (with “3½ oz Soyolk or other heat-treated soya flour,” p. 122). Soya compote (with “2 oz. soya flakes”). Soya milk and/or soya flour are used in many baked goods (breads, cakes, and buns, etc., see p. 99-137).

Note: Eva has basically not yet realized how tofu, tempeh, miso and good-tasting soymilk can transform a vegan diet.

Previous edition published as *Eva Batt’s Vegan Cookery*, the first major vegan cookbook ever published, with over 300 recipes, plus practical advice and nutritional information. The “corporate author” is given on OCLC as the Vegan Society.

Plamil Foods put this at the top of its list of recommended vegan cookbooks. “This cookery book is most comprehensive and advises on preparing nutritious appetising meals without meat, fish, eggs or dairy products. Essential nutrients from vegetable sources, planning meals for best food value, savoury dishes, snacks, desserts, cakes, bread, biscuits, sauces, garnishes, etc.” Address: Vegan Society, UK.

1810. Hsiung, Deh-Ta. 1985. Chinese vegetarian cooking. London: The Apple Press; Secaucus, New Jersey: Chartwell Books. 128 p. Illust. (color). 29 cm.

• **Summary:** Every page of this excellent book is in full color on glossy paper, loaded with color photos. Contains over 70 recipes. Contents: Introduction: History of Chinese vegetarian cooking, essential tools and utensils, basic techniques and cooking methods, regional cooking styles (northern, eastern, western, and southern groups), special ingredients and seasonings (with a photo of each), how to plan your menu. Cold dishes. Soups. Quick stir-fried dishes. Braised & steamed dishes. Rice, noodles & sweets.

History (p. 8): “Vegetarian cooking has a long history in China,” and Chinese have traditionally been highly aware of it because of their deep interest in the connection “between food and health, whether physical or spiritual.” Chinese Buddhists are vegetarians because they abhor the killing of all living creatures.

“Until quite recently, many people believed that vegetarian cooking in China originated in the Buddhist temples, and that it was first introduced into China with Buddhism from India during the reign of the Han emperor Ming (AD 58-75).” However scholars in China have now found that the earliest known mention of vegetarianism on record was during the Zhou Dynasty (beginning ca 1028 B.C.). Other “references also exist in ancient texts all pre-dating the introduction of Buddhism into China by several hundred years.”

“It is generally agreed that the development of vegetarianism in China owed more to the introduction of many foreign fruits and vegetables during the Han Dynasty (206 BC–AD 222) than to Buddhism. Many Chinese vegetarians were influenced by the indigenous philosophy of Taoism, which developed the hygienic and nutritional science of food closely related to the basic yin-yang principles. The appearance of bean curd (tofu)—also during the Han dynasty—and many other soy bean products, together with the discovery of making gluten from dough, helped to enrich and further diversify the vegetarian diet.”

It is interesting and important to note “that despite their continual introduction, milk and dairy products are, to date, not prominent in Chinese cuisine. Therefore, unlike their counterparts in the West, Chinese vegetarians will not use butter, cheese, or milk in their cooking, and a true Buddhist will eat neither eggs nor fish.” However this book uses eggs (p. 33, 40, 64, 78 etc.).

“One of the best known poets of the Southern Song period, Lu You (1125-1210; W.-G. Lu Yu) was a noted vegetarian. He lived to the ripe old age of 86.

The section on ingredients (p. 13-14) includes concise descriptions of: Bean curd (tofu). Gluten. Red bean paste (also called “sweetened red bean paste,” p. 124) [azuki, sweet]. Salted black beans [fermented black soybeans]. Sesame seed oil. Soy sauce (“Use Light Soy Sauce which has more flavour and does not discolour the food as much as the Dark or Rich Soy Sauce”). Sweet bean paste or Hoi Sin sauce (Made from soy bean sauce...). Yellow bean sauce (“This thick sauce is made from crushed yellow [soy] beans, flour and salt”). Photos here show (p. 15, 19): (1) Dried bean curd skins [yuba]. (2) Six squares of tofu on a rectangular wooden cutting board, and many cubes of deep-fried tofu on a sieve [for deep frying]. A can of “Black beans with ginger” under the label Yang Jiang Preserved Beans with Ginger.” With very few exceptions, the Chinese drink neither water nor tea during the meal; they drink soup instead. A surprisingly large percentage of the recipes in this book call for “bean curd (tofu).”

Soy related recipes: Five spice bean curd (tofu) (with “4 cakes bean curd,” p. 34). Hot and sour coup (p. 42). Spinach and bean curd (tofu) soup (p. 43). Deep fried bean curd (tofu) and wood (tree) ear soup (with 50 gm / 2 oz deep-fried bean curd or 1 cake fresh bean curd (tofu), p. 48-49). Dried bean curd (tofu) skin and vermicelli soup (with 15 gm / ½ oz dried bean curd skin [yuba], p. 50-51). Bean curd (tofu) with mushrooms (quick stir fried, p. 68). Stir-fried spinach and bean curd (tofu) (p. 70). Vegetarian chop suey (with tofu, p. 81). Chinese cabbage casserole (with deep-fried or fresh tofu, p. 82, 84). ‘Buddha’s delight—Eight treasures of Chinese vegetables (with 15 gm / ½ oz dried bean curd (tofu) skin sticks [dried yuba sticks], p. 92-93). Fried gluten (Mianjin, homemade, starting with 2 lb flour, p. 95). Kao fu—Sewed gluten in sweet bean sauce (with 1 tablespoon sweet bean

paste or hoi sin sauce, p. 96). Casserole of vegetables (with 1 cake bean curd (tofu), p. 97). Fu-yung bean curd (tofu) (with 1 cake bean curd (tofu), 4 egg whites, and 50 ml / 2 fl oz milk, p. 98-99; Fu yang usually means omelette, but literally means scrambled eggs). Sichuan bean curd (tofu) (with 3 cakes bean curd and 1 teaspoon salted black beans, p. 100-01). San shian—'The tree delicacies' (with 275 gm / 10 oz fried gluten or deep-fried bean curd, p. 104-05). Braised 'three precious jewels' (with 2 cakes bean curd (tofu), p. 106-07). Vegetarian 'lion's head' casserole (with 4 cakes bean curd and 100 gm / 4 oz fried gluten, p. 108-09). Shanghai vegetable casserole (with 2 cakes bean curd (tofu) or 50 gm / 2 oz deep-fried bean curd, p. 110-11. "For some reason, the best vegetarian restaurants in China are found in Shanghai...").

"Rice and noodles provide the bulk of the Chinese meal. The best plain boiled rice is obtained by using only the long grain [white] rice known as patna." Photos show that many dishes are served with a small bowl of white rice. Chow mein—Fried noodles (with 25 gm / 1 oz dried bean curd skin sticks, p. 119). Vegetarian spring rolls (handmade using 1 pack of 20 frozen spring roll skins, p. 122-23).

Note: Many, if not most, recipes call for soy sauce—either light, dark, or both.

About the author (inside rear dust jacket): "Deh-ta Hsiung is a native Chinese who gained his knowledge of Chinese cooking directly from some of the great Chinese chefs. He has made several television and radio appearances in connection with his expertise on Chinese foods and now writes widely on the subject and teaches at Kenneth Lo's Chinese Cookery School [in London]."

From Gareth Jones' Food blog (posted 9 Feb. 2011) titled "'Kung Hay Fat Choy' Deh-Ta Hsiung." "Cooking Chinese food at home—complete with wok, steamer and all—took off in the early 1980s. Deh-Ta was at the spearhead of the movement, along with Ken Lo and Chef But from the Ken Lo Cook School. His Chinese Regional Cooking was published in 1979 and was out of print before it got to take off." "Eating Chinese home cooking, for me, is far superior to most restaurant food—dim-sum excluded."

1811. Hume, D.J.; Shanmugasundaram, S.; Beversdorf, W.D. 1985. Soyabean (*Glycine max* (L.) Merrill). In: R.J. Summerfield and E.H. Roberts, eds. 1985. Grain Legume Crops. London: Collins. xvi + 859 p. See p. 391-432. Illust. Index. 24 cm. [192 ref]

• **Summary:** Contents: Introduction: History, current status and future projections. Principal economic yield and uses of crop products. Principal farming systems. Botanical and agronomic features: Symbiotic nitrogen fixation potential. Principal limitations to production and yield: Developing countries, developed countries. Fertiliser requirements. Quality of seed constituents. Germplasm resources. Principal breeding strategies: Adaptation to new geographic areas,

breeding methodology, breeding objectives, seed quality, pest and disease tolerances, current trends in soyabean breeding. Avenues of communication among researchers (INTSOY, AVDRDC, IITA, FAO). Prospects for larger and more stable yields.

Tables: (1) Area (1000 ha), yield (kg per ha), and production (1000 tonnes) of soyabeans from 1969-71 to 1982. (2) Maturity durations and productivity potentials of soyabeans in selected countries. (3) *Glycine* species collections around the world. (4) Sources of resistance among soyabeans to selected insect pests. (5) Sources of resistance among soyabeans to selected diseases.

Table 9 shows that there are soybean germplasm collections in 15 countries. This table has 4 columns: Country, location (city), curator, and number of accessions. AVRDC in Taiwan has the largest germplasm collection in one location (10,400 accessions, Tainan), followed by USA (9,648, Illinois and Mississippi), India (4,000, Pantnagar; 1,800 Amravati), Japan (3,541, Tsukuba; 200, Morioka), USSR (3,000, Leningrad), China (3,000 Jilin; 3,000 Hubei; 2,930 Shadong [sic, Shandong {W.-G. Shantung}]; 2,500 Beijing; 960 Heilungjiang [Heilongjiang]). Also: Australia 400, France 500, Nigeria 1,300, Indonesia 600, South Korea 2,833, North Korea 300, South Africa 600, Sweden 1,200, and Thailand 1,686. Address: 1&3. Univ. of Guelph, Dep. of Crop Science, Guelph, Ontario N1G 2W1, Canada; 2. Asian Vegetable Research and Development Centre (AVRDC), PO Box 42, Shanhu, Tainan 741, Taiwan, Republic of China.

1812. Klein, Hermine. 1985. Die neuen Sojagerichte: Schnell und delikate—Natuerliche Rezept-sammlung No. 3 [The new soy recipes: Quick and delicate—Natural recipe collection No. 3]. Vienna, Austria: Fachverlag Gesundheit GmbH. 50 p. Illust. 24 x 15 cm. [Ger]

• **Summary:** An attractive cookbooklet. Contents: Introduction. Green seeded soybean recipes. Yellow soybean recipes. Making tofu at home. Tofu sweets. Soymilk recipes. Miso soups. Soy granule recipes. Soy granule sweets. TVP recipes. Soy burgers (*Sojastangerln*). Address: Vienna, Austria.

1813. Loma Linda Foods Inc. 1985. Millstone Foods product catalog. Riverside, California: Loma Linda Foods. 4 panels.

• **Summary:** See next page. In 1985 Loma Linda began making the following ten products under the Millstone label. A color photo shows each can: Tender cuts. Vegeburger. Burger-like. Wheat fries. Nut meat. Meatless loaf. Breeding meal. Bacon-like bits. Vege-beans. Burger mix. A description of each product is given as well as the weight and number of cans per case, but no prices. Address: 11503 Pierce St., Riverside, California 92515. Phone: 1-800-442-4917 or 1-800-932-5525.

1814. Patel, John. 1985. Re: Unisoy Milk and By Products

**M**illstone products - natural wholegrain goodness, are especially prepared with your health and well-being in mind.

No harsh spices, animal fats or preservatives are used. Millstone's rich and hearty flavors are a blend of nature's finest ingredients.

Millstone recipes are available by writing to:

Loma Linda Foods, Inc., 11503 Pierce Street, Riverside, CA 92515

### **BURGER-LIKE**

Burger-Like is a seasoned all soy product, juicy and tender. Excellent in chili, stuffed peppers, tacos, spaghetti sauces and more.

**Case pack - 12/19 oz.**

### **NUT MEAT**

A delicious nut-flavored, "meatless" loaf. Open both ends of can, loosen with a knife and push out of the can. Use cold in sandwiches, salads or as cold cuts. Serve hot in casseroles or with a variety of sauces.

**Case pack - 12/19 oz.**

### **TENDER CUTS**

Juicy, tender, whole wheat, gluten steaks in tasty broth. For easy entree, just bread, brown, and serve with gravy.

**Case pack - 12/19 oz., 12/50 oz.**

### **VEGE-BEANS**

Delicious white beans, cooked in its own homemade tomato sauce. Ready to serve, Vege-Beans can be heated or enjoyed right out of the can.

**Case pack - 12/19 oz.**

### **VEGEBURGER**

Delicately flavored, ground wheat gluten. Vegeburger has endless uses, sandwiches, loaves, casseroles, anywhere ground meat is called for.

**Case pack - 12/19 oz., 12/50 oz.**

### **WHEAT FRIES**

Tasty and tender chunks of gluten simmered in a savory broth. Wheat Fries is delectable in stews, kabobs, sweet and sour, and casseroles. Save broth for gravies, soups, or stews.

**Case pack - 12/19 oz., 12/50 oz.**

**Millstone Foods**

Ltd. Letter to William Shurtleff at Soyfoods Center. 1 p. Typed, with signature on letterhead. Undated.

• **Summary:** This company plans to make Gold Soy Ice Cream and “Burgers.” Note: Mr. Patel died on 5 Nov. 1985. He never became actively involved with the Unisoy company.

Note: This is the earliest document seen (Aug. 2013) concerning Unisoy in England. However the company’s first product was not launched until May 1986. Address: 24 Chorlton Dr., Cheadle, Cheshire SK8 2BG, England. Phone: (061) 428-9433.

1815. Richie, Donald. 1985. A taste of Japan: food fact and fable. What the people eat. Customs and etiquette. Tokyo, New York, San Francisco: Kodansha International. 112 p. Illust. (some color photos). Index. 27 cm.

• **Summary:** This book contains a nice chapter titled “Tofu” (p. 34-41) in which the different types are described including *momengoshi-dofu* (“cotton” tofu) and *kinugoshi-dofu* (“silk” tofu). It also discusses *okara*, noting: “Now mainly used as livestock feed, it once also nourished one of Japan’s greatest scholars. Arai Hakuseki, who lived during the Edo period (1615-1868), proudly related that in his impoverished student days he lived almost entirely on *okara* and that in gratitude he later, rich and famous, gave large sums of money to his charitable tofu maker.”

On pages 38-39 are color photos of: “(1) Atsu-age. (2) Koya-dofu. (3) Ganmodoki. (4) Unohana or *okara*. In Kyoto, this humble food is rounded into balls and sold. (5) *Yudofu* course in a Kyoto restaurant. The course includes *yuba* tempura, simmered *hiryozu* (known as *ganmodoki* in the Kanto [Tokyo] area) and *goma* (sesame) tofu. (6) *Aburage* (two sizes).

Even today, Chinese and Japanese view tofu in very different ways: “... Chinese cooking tends to regard tofu as an additive, as something which enhances something else. The Japanese, on the other hand, relish the taste of tofu itself...” for example as *Hiyayakko* [chilled tofu; summer] or *Yudofu* [simmering tofu; winter]. Each is seasoned with soy sauce or a soy-based dipping sauce. The names of various popular Japanese tofu recipes are given (p. 40).

“Freeze-dried tofu” is said to have originated one cold night in a temple at the summit of Mount Koya [*Kōya-san*] when a forgetful acolyte left the tofu offering of the day on the altar. The next morning it was found frozen. It was also found that this tofu had a completely different texture from ordinary tofu and it could be kept for a long dried since it contained very little water. This tofu has at least four different names: (1) Koya-dofu. (2) Misuzu-dofu. (3) Shimi-dofu. (4) Kori-dofu.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *shimi-dofu* to refer to dried-frozen tofu.

A large illustration (p. 40-41) shows tofu being made

from the *Kinsei Shokuhin Zukushi Ekotoba* (1805). The basic process has not changed to this day.

The copyright page notes: “The text of this book is based on a series of articles that appeared in *Winds* magazine, 1981-83.” “In this book, all twentieth-century Japanese names appear in Western order, and all earlier names appear in traditional order, surname first.”

Note 2. There are also chapters on sushi, *sukiyaki*, tempura, *menrui* (noodles), *onigiri*, *mochi*, *tsukemono* (pickles), *okashi* (Japanese sweets, confections). *Saké*. *Ocha* (tea). Address: Japan.

1816. Scott, David. 1985. Protein-balanced vegetarian cookery. London: Rider Books, Century Hutchinson Ltd. 183 p. Illust. (by Steve Hardstaff). Index. 24 cm. [31\* ref]

• **Summary:** This book was originally published in 1980, and the latest reference in the bibliography is 1978. A second edition was published in 1985, then a 1987 edition was published in the USA by CRCS Publications, P.O. Box 20850, Reno, Nevada 89515. The author has a poor knowledge of soyfoods, and makes little mention or use of them in this book. He refers to tofu as “beancurd,” has a recipe for “Beancurd Burgers,” mentions miso and a Miso-Tahini Spread, soy sauce, plus an Sunflower Seed, Soya Bean and Almond Casserole. Pages 160-61, information about soya beans, contains many errors.

1817. Christian Nagel. 1985? Tofu-Werkstatt [Tofu workplace (Leaflet)]. Hamburg, Germany. 2 panels each side. Each panel: 21 x 14.8 cm. Undated. [Ger]

• **Summary:** Printed black on golden-yellow paper. At top of front panel, logo of a soybean plant growing in a circle. Plus company address and phone number.

Contents: Introduction. The many benefits of tofu: Rich in high-quality protein, excellent for protein complementarity, low in calories, free of cholesterol, rich in vitamins and minerals, easily digestible, extremely versatile in the kitchen.

A table shows the nutritional composition of tofu, soymilk, fried tofu, grilled tofu, *okara*, and vegetable tofu (*ganmodoki*). Ideas for cooking with tofu (recipe ideas). Use of tofu as a medicine (tofu plaster). Tofu as a possible solution to the world food problem; the protein yield of different foods and animals from 1 hectare of land. Soybeans are #1 and meat gives the lowest yield. References (2).

Note: A subsequent edition of this leaflet was printed before Dec. 1989, with black ink on bluish-gray paper. The content is basically the same, however it is typeset rather than typewritten. The title is “Nagel’s Tofu,” by Tofu-Manufaktur Christian Nagel GmbH, Osdorfer Landstrasse 4, 2000 Hamburg 52, Germany. Phone: (040) 89 49 37. Address: Osdorfer Landstrasse 4, 2000 Hamburg 52, Germany. Phone: 89 49 37.

1818. **Product Name:** Tofeata Tofu Spicy Burgers.  
**Manufacturer's Name:** Haldane Foods Ltd.  
**Manufacturer's Address:** Unit 25, Hayhill Industrial Estate, Sileby Rd., Barrow-Upon-Soar, Leicester, England.  
**Date of Introduction:** 1985?  
**Ingredients:** Water, tofu (soybean curd), wheat germ, bulgur wheat, rolled oats, sesame seeds, tomatoes, sunflower seed oil, hydrolysed vegetable protein, sea salt, paprika, chili powder, spices.  
**Wt/Vol., Packaging, Price:** 2 burgers weigh 8 oz (227.2 gm).  
**How Stored:** Refrigerated.  
**New Product–Documentation:** Label. 1987, undated. 4 x 7.5 inch box. Color photo with red, yellow, and black design on white. "A blend of tofu (soybean curd) with wheat germ, cereals and spices. By Hera. A ready to eat vegetarian meal. Keep chilled." Soya Bluebook. 1987. p. 96. "Tofeata Tofu and Tofu Burgers."

1819. Photograph of Seth Tibbott on bridge at Husum Falls, Washington state, ca. 1985. 1985? Husum, Washington Undated.

• **Summary:** This digital photo, with caption, was sent to Soyinfo Center by Seth Tibbott, founder and CEO of Turtle Island Foods. Address: Husum, Washington.

1820. Lee, Susan Hem. 1986. Re: History of making and selling tofu in Trinidad. Letter to William Shurtleff at Soyfoods Center, Jan. 15. 2 p. Typed, with signature.

• **Summary:** "For two years or more I have been supplying tofu, single handedly, to various health food stores and individuals. On an average I have been producing 70-80 pounds per week. I have also been producing tofu burgers (approx. 10 doz. per week) as well as traditional Yuletide food known as pastels which is like the Mexican tamale.

"I have been making tofu in our laundry room at home, where counters and 2 large burners have been installed and I imported a one gallon Waring blender. I sell tofu at TT\$6.50/lb.

"I first became interested in making tofu as a vegetarian mother. I was first taught how to make tofu by a visiting English dietitian, then I read "The Book of Tofu" by William Shurtleff and Akiko Aoyagi, and the final chapter entitled "Sending Tofu to the Four Directions" convinced me I wanted to try to make tofu for a living.

"Through Rex Lassalle (macrobiotic teacher), who was opening his macrobiotic shop and consultancy at this same time, I was able to import organic soy beans from Oak Feeds, Miami, Florida, at about TT\$3.00/lb. Eventually I was able to purchase locally grown, government subsidized soy beans from the government agricultural station at approx. TT\$1.30/lb.

"At that time the TT\$ was valued at TT\$2.42 for US\$1.00. In December of 1985 the TT dollar was devalued to TT\$3.65 per US\$1.00.

"Buying soy beans through the agricultural station has been a profitable situation for me.

"However the government agricultural station's priority is to maintain seed stock to supply farmers and therefore only grow a small quantity of beans, the surplus of which I purchased, approx. 1,000 lbs. This supply lasted me about 4-5 months. (The government has attempted for years to interest local farmers to grow soy beans but have been unsuccessful.)

"I then attempted to import soybeans once again from Oak Feed through an import agency and by the time the US\$16, 50 lb. sacks of beans arrived in Trinidad the CIF price was TT\$177.00. That shipment was purchased before the devaluation. I now find it impossible to import soy beans in this way.

"At this point in time my husband (he works for a computer company) and I are considering the possibility of starting a soy food related business.

"We write to you to hear your point of view;"

"Our National Flour Mills will be importing soy beans for making oil in October of 1986 and there is the possibility

of buying beans from them.” Address: #5 Sunny Acres, off Sam Boucaud Rd., Santa Cruz, Trinidad, West Indies.

**1821. Product Name:** [Tofu Burger–Deep-fried].

**Foreign Name:** Tofu-Burger–Frittiert.

**Manufacturer’s Name:** Byodo Naturkost GmbH.

**Manufacturer’s Address:** Hirschbergstr. 9, D-8000 Munich 19, West Germany. Phone: (089) 16 85 70.

**Date of Introduction:** 1986 January.

**Ingredients:** Soybeans, water, vegetables (Carrots, zucchini, soy sprouts) in varying proportions by weight, whole oats, whole wheat, brown rice, sesame seeds, sunflower seeds, spices, soy sauce (shoyu), sea salt, nigari coagulant (traditional Japanese). Ingredients predominantly organically grown.

**Wt/Vol., Packaging, Price:** 130 gm plastic bag.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Anthony Marrese. 1990. March 22. Based on a March 21 interview with Bernd Steyer. The company started in 1984, when they started to make their own tempeh. Letter (fax) from Harry Whitford. 1990. May 11. “In the fall of 1985 we started making our own tofu after a scandal: We had been buying tofu from Sapia to make our burgers for the Munich market. But he bought conventionally grown beans and sold the tofu as bio [organic]!”

Label sent by Anthony Marrese. 1990. April 15. 5 by 2.25 inches. Green on yellow, printed on front and back of plastic bag. “A nutritional soya specialty (Eine vollwertige Soja-Spezialität). Store at 4-8°C.”

**1822.** Frentz, Jean-Claude. 1986. Le tofu [Tofu]. *Filiere Viande [The Meat Industry]* 9(85):49-50. Jan. [1 ref. Fre]

• **Summary:** This article, in a meat industry magazine, begins: This mysterious product, whose origin is lost in the mists of time, actually seems to be going through renewed interest. Already well known and appreciated in the United States, on the West coast in particular, it has appeared in Europe, and, more precisely, in France.

Discusses the composition of tofu and the processes used to make it. A table gives the nutritional composition of the following: Tofu, firm tofu, (*tofu ferme*), soft or silken tofu (or perhaps tofu cutlets *tofu “flanc”*—it’s water content is higher than that of regular tofu), tofu burger (fried), soymilk, grilled tofu, dried-frozen tofu, okara, dried yuba, pressed tofu, whole dry soybeans.

Concerning the journal title *Filière Viande*, the word *filière* normally means the thread, the path that leads to discovery. However here it is being translated as ‘meat industry.’ When advancing anti-meat arguments, one can speak of *la filière viande sur le grill* (“The meat industry on the grill”)—a sort of play on words. Address: Directeur technique, Soussana SA, France.

**1823. Product Name:** [Tofu, Smoked Tofu, Tempeh, and Tofuburger].

**Foreign Name:** Tofu, Tofu Fumé, Tempeh, Galette: Petit Roti Végétal.

**Manufacturer’s Name:** Gaec de La Lix: United Macrobiotic Company.

**Manufacturer’s Address:** 32260 Tachaires–Seissan, France. Phone: 62.65.35.04.

**Date of Introduction:** 1986 January.

**New Product–Documentation:** Form filled out for Anthony Marrese. 1989. Sept. These four products were introduced as follows with the amount presently produced shown in parentheses: Tofu (80 kg/week) and Soyaburger (800 pieces/week), Jan. 1986. Smoked Tofu (8 kg/week), June 1986. Tempeh (40 kg/week), Oct. 1986. Anthony visited the community in mid-Oct. 1989 and noted: “They are a small group similar to Terre Nouvelle, but doing more with soya. Very nice kitchen production (see color slide), which is growing. They sell through markets and through 10 stores, which helps them to educate people. They are all Germans who came to France about 5 years ago mainly because land prices were lower in France. They also make small quantities of miso (experimental stage) and 4 kg/week of koji for amazake and miso.

Labels for all 4 products. 1989. 4 by 2.75 inches. Each photocopied with black handwritten letters on pastel color paper, and each with the Nature et Progres logo indicating organically grown. Each label has a description of the food on the back.

For details and an update to 1989 see the letter from Gaec de La Lix: United Macrobiotic Company to Anthony Marrese, of Sept. 1989.

**1824.** Gavin, M. 1986. Fine-milling of full-fat soya.

*Diagram (Buehler-Miag, Uzwil, Switzerland)* No. 84. p. 7-8. Jan. [Eng]

• **Summary:** “Recently, a simple method has been developed to grind full-fat soya to such a fineness (on the average 20 microns) that the high-protein flour which is obtained becomes essentially soluble in water. The object of this development was to obtain a product which requires little energy to make and promises a high yield, and which can be used directly as a raw material for food production.”

“By dissolving soy flour in water and pasteurizing and homogenizing the product, soymilk is obtained, from which soy drinks can be made. The bean taste is virtually eliminated. By increasing the concentration of soy flour and adding flavorings and jellying agents, a jelly is obtained. If we add calcium or magnesium salts to the soymilk instead of the jellying agent, as is done in the Far East, and after incubation, we will get a kind of ‘silk tofu’ which, by slight pressure, can be changed into ‘cotton tofu.’ A large number of other products can be made at pleasure in this way, eg: sausages, fermented (yoghurt-like) products, cheese-like

products, instant foods, ice creams, 'tofu-burgers,' desserts.”

Photo micrographs show Micrographs of full-fat soy flour: (1) Milled on a hammer mill with 0.5 mm screen. (2) Milled on a pin mill with air classification. (3) Milled according to the Buhler process.”

Note the interesting term “Full-Fat Soya” in the title of this article used to mean either “Whole Soybeans” or “Full-Fat Soya Flour” or “Full-Fat Soya Powder.”

Note 2. Buhler recently patented this milling process.

Note 3. Zwicky is a flour milling company in northeast Switzerland. They made a joint venture with Bottighoffen (Dr. Unger’s) but it is not yet commercial.

Note 4. This flour sells for about \$2/kg in Switzerland. Address: PhD, Head, Analytical Lab., Buehler Brothers Ltd., CH-9240 Uzwil, Switzerland.

1825. **Product Name:** Chili Con Tempeh.

**Manufacturer’s Name:** Surata Soyfoods.

**Manufacturer’s Address:** Eugene, Oregon.

**Date of Introduction:** 1986 January.

**Ingredients:** Incl. Soy tempeh, spiced meatless chili, tomato sauce.

**How Stored:** Refrigerated.

**New Product–Documentation:** Food Report (Lehmann). 1986. Jan. Ready to eat.

1826. **Product Name:** Tofu-Vegie Burgers.

**Manufacturer’s Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer’s Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1986 January.

**Ingredients:** Wildwood Tofu (organic soybeans grown without synthetically compounded pesticides or fertilizers in accordance with Section 26569.11 of the California Health and Safety Code, filtered water and nigari), any of the following fresh vegetables (carrots, onions, celery, kale, or potato), garlic, pure expeller-pressed hi-oleic mono-unsaturated safflower oil, unrefined peanut oil, sea salt.

**Wt/Vol., Packaging, Price:** 6.5 oz vacuum pack.

**How Stored:** Refrigerated.

**Nutrition:** Per 3.25 oz.: Calories 205, protein 15.4 gm, fat 10.8 gm, carbohydrates 11.5 gm, Vitamin A 3396 I.U., calcium 115 mg, iron 3 mg, sodium 271 mg.

**New Product–Documentation:** Talk with Jeremiah Ridenour. 1988. Aug. 26. The company started making Tofu Burgers in January 1986. Label. 1986. 3.25 inches diameter. Red on yellow. Logo of birds flying over a forest silhouette. “Complete protein. 25% fresh vegetables. Great flavor. Cholesterol free. Easy to prepare: Heat in toaster, microwave, or on a barbecue. Serve hot or cold or as an appetizer or with your favorite burger garnishes and enjoy.”

Label sent by Billy Bramblett. 1990. Round. Red on yellow. Logo of birds flying over a forest silhouette.

“Complete protein.” “25% fresh vegetables.”

Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1986, and made at Wildwood’s plant in Fairfax.

1827. Amatos, Christopher A. 1986. No fat in sight at Worthington Foods: The new president’s goals—crack the mass market he sees developing for his company’s product lines of fatfree substitutes and double 1985 sales of \$30 million by 1990. *Dispatch (Columbus, Ohio)*. Feb. 16. p. C1. Business section.

• **Summary:** President Dale Twomley thinks that Worthington’s future lies in avoiding fat—both the corporate and the animal kind.”

“A fertile market can produce many opportunities, and Worthington Foods plans to pursue most, if not all, of them. The company plans to encourage grocers to put more of its products in the main food aisles vs. the specialty sections; supply products to the ever more health-conscious fast-food industry; license its protein production technology to overseas interests; develop its institutional sales operation, and complete at least one major acquisition this year...”

“The company has had three successful years under new ownership... Profits last year were slightly under \$1 million with per share results for the 265-employee firm growing to \$1.98 from \$1.43.

“Worthington Foods was started in 1939 by Dr. George T. Harding Sr. in the basement of a white Colonial house on Proprietors Rd. Harding, a Seventh Day Adventist, saw a business opportunity in supplying food for hospital patients and church members, many of whom adhere to a meat-free diet. At that time, the company developed the process of spinning soy protein...”

“In 1970, Worthington Foods was acquired by Miles, which at the time was interested in the health-related food market and introduced the Morningstar Farms brand to the product line. One of Morningstar’s most successful products is a cholesterol-free egg substitute now called Scramblers.

“Miles’ interest in the company waned, however, when it was bought [in late 1977] by Bayer A.G. Ltd., the German chemical concern. So, the company’s founders arranged a leveraged buyout, which was completed in October 1982...”

“While Worthington Foods still relies on the religious market for about 50 percent of its sales, that’s not where the company is putting its emphasis.”

A sidebar titled “Demographics, health concerns cook up ready market” notes that Worthington made the cover of *Time* magazine on 26 March 1984; the subject was cholesterol.

Photos show: (1) Dale E. Twomley (portrait). (2) Women packaging Morningstar Breakfast Patties in paper trays as they come out of automated fryer. (3) Employees operating food equipment. Address: Dispatch business reporter.

1828. Shurtleff, William. 1986. Estimate of commercial utilization of okara in the United States (Overview). *SoyaScan Notes*. Feb. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** 95% is used as livestock feed, mainly for dairy cows and pigs.

2% is used as compost, fertilizer, mulch.

1% is used as methane feedstock.

1% is used as human food. Of this latter 1%, an estimated 40% is made into Soysage (meatless sausage).

40% is added to breads, muffins, granola, and other baked goods.

10% is used to make tempeh.

10% finds other foods uses, such as added to Japanese-style recipes. Address: Founder and Director, Soyfoods Center, Lafayette, California 94549.

1829. *Eiyo to Ryori (Nutrition and Food, Tokyo)*. 1986. Daizu, daizu seihin: Mijika na tanpakushitsu-gen [Soybeans and soyfoods: A protein source which is close at hand]. Feb. p. 22-34. [Jap]

• **Summary:** A collection of recipes, each accompanied by a color photo, using tofu, deep-fried tofu pouches, tofu cutlets, dried-frozen tofu, boiled soybeans, tofu burgers (ganmodoki), okara, and yuba. Address: Japan.

1830. **Product Name:** Legume Meatless Pepper Steak with Kofu (fresh wheat gluten) and Noodles.

**Manufacturer’s Name:** Legume, Inc.

**Manufacturer’s Address:** 170 Change Bridge Road, A-4, Montville, NJ 07045. Phone: (201) 882-9190.

**Date of Introduction:** 1986 February.

**New Product–Documentation:** Talk with Gary Barat.

1986. March. Legume introduced this product at the Natural Products Expo at Anaheim in Feb. 1986. Ad in *Natural Foods Merchandiser*. 1986. Oct. p. 110. “A Break from Steak.” Spot in *East West*. 1986. Dec. p. 12. “Wheat meat market.” This all-natural frozen entree uses kofu (also known as seitan or wheat meat).

Talk with Lenny Jacobs of *East West Journal*. 1990. Sept. 10. Legume bought the wheat gluten for this product from Upcountry Seitan in Lenox, Massachusetts.

Talk with Sandy Chianfano of Upcountry Seitan. 1991. Nov. 16. Legume bought kofu (fresh wheat gluten) not seitan, from her company for this product. “I told Barat I didn’t think it was a good product to start with. You should put it in either your Mexican line or your Italian line. You’re mixing a grain with a grain, and it doesn’t even look good. He had Celentano’s make the finished product. He didn’t put the money into promoting it that he had planned to so it fizzled out.”

1831. Sims, Pat. 1986. “Tofu Pups.” *Weenies of the New Age. American Health*. Jan/Feb. p. 105.

• **Summary:** “Tofu Pups (launched in Sept. 1985) are totally vegetarian, contain no nitrates or cholesterol and have only half the fat and less than one-half the sodium of beef franks. Price: \$2.59 for an 8-pack.”

1832. **Product Name:** [Tofu Burger (With Sesame)].

**Foreign Name:** Tofu-Burger (Sesam).

**Manufacturer’s Name:** Sojarei Ebner-Prosl.

**Manufacturer’s Address:** Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.

**Date of Introduction:** 1986 February.

**Ingredients:** Soybeans, millet, rolled oats (from controlled cultivation), whole wheat flour, vegetables, herbal salt, herbs,

spices.

**How Stored:** Refrigerated.

**New Product–Documentation:** Brochure sent by Sojarei Ebner-Prosl. 1989. Oct. 12. “Fresh products.” “Tofu patties in various sizes and flavors” (Tofu-Laibchen in verschiedenen Grössen un vielen Geschmacksvarianten). Note: The tofu burger apparently has no added bread crumbs like a laibchen.

Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 1.75 by 3.75 inches. Made purely from plants (rein pflanzlich), of high quality. Without chemical preservatives, artificial colorings or flavorings. Logo is a green soybean plant against a white circular background. In the company’s Jan. 1989 catalog this product is called Tofu-Burger, is described as a crisp patty with basil and sesame, precooked. It sells retail in 75 gm weight.

1833. **Product Name:** Laufer’s Gourmet Tofu Red Chili.

**Manufacturer’s Name:** Tumaro’s Inc.

**Manufacturer’s Address:** 5300 Santa Monica Blvd., Los Angeles, CA 90029.

**Date of Introduction:** 1986 February.

**Ingredients:** Tomatoes, water, tofu, red beans, corn, onions, bell pepper, carrots, mushrooms, chili powder, celery, garlic, cumin, tamari, corn oil.

**Wt/Vol., Packaging, Price:** 11 oz.

**Nutrition:** Per 11 oz.: Calories 260, protein 18 gm, carbohydrates 24 gm, fat 11 gm, sodium 421 gm.

**New Product–Documentation:** Leaflet. 1986, undated. 8½ by 11 inches. Black on beige. “The complete line of homemade chili entrees. No meat. No preservatives. Nothing artificial.” Food Report (Lehmann). 1986. Feb.

1834. Jones, Paul. 1986. On Michael Cole and his many soyfoods successes in England (Interview). *SoyaScan Notes*. March 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cole started in late 1984. His partner, who has all the risk and 51% equity, is Mr. Arora, a Sikh from India. Cole has 30% equity and the finance company has 19%. Cole spent years in Los Angeles, and is a bit of a hype artist. He launched a soymilk ice cream for the Regular Tofu Co. He now has an inexpensive Japanese tofu plant with a continuous roller extractor. He tanks the milk to a spray drier or Tetra Pack machine. He has had big success with soymilk in the supermarkets. Before him all soymilk came from Vandemoortele/Alpro in Belgium. He produces private label Tetra Pak soymilks for 3-5 national supermarket chains. He is also doing an organic soymilk. His ice cream looks like it will be very successful. It is made under license for him by Bayvilles, a big company. He has made genuine inroads into the mainstream market. Last year his total sales were \$525,000. He also has okara burgers. He tried a soy yogurt made from thin soymilk but it fell flat on its face. Address:

Owner, Paul’s Tofu, England.

1835. **Product Name:** Tempeh Delites Breakfast Naturals (Meatless Breaded Tempeh Sausages).

**Manufacturer’s Name:** Harvest Earth Foods.

**Manufacturer’s Address:** 2789 Steamboat Springs, Rochester, MI 48063.

**Date of Introduction:** 1986 March.

**Wt/Vol., Packaging, Price:** 6 oz vacuum pack bags.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Food Report (Lehmann). 1986. March.

1836. **Product Name:** The Soy Deli Tofu-Tempeh Burgers.

**Manufacturer’s Name:** Quong Hop & Co.

**Manufacturer’s Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1986 March.

**Ingredients:** Organic tofu, organic tempeh, fresh carrots and onions, sesame seeds, sunflower seeds, currants, safflower oil, sea salt, garlic powder.

**Wt/Vol., Packaging, Price:** 7 oz (199 gm) vacuum pack.

**How Stored:** Refrigerated.

**Nutrition:** Per 3.5 oz.: Calories 268, protein 18.6 gm, carbohydrate 9.3 gm, fat 17.3 gm.

**New Product–Documentation:** Leaflet. 1986. 8½ by 11 inches, color. “There is Quality & Variety after 80!” Shows all products. Pre-cooked, they are quick and easy to prepare by toasting, broiling, frying, or microwaving. Labels (front and back). 1987. 5 inches square. Orange and brown on white film. “High in protein. No cholesterol, contains no meat. Pop ‘n serve.”

Product Alert (Naples, WY), 1986. March 17. “27. Misc. foods.” Soy Deli Tofu-Tempeh Burgers were spotted “at a recent health food show.”

1837. **Product Name:** The Soy Deli Pacific Tempeh Burger [Original, or Marinated].

**Manufacturer’s Name:** Quong Hop & Co.

**Manufacturer’s Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1986 March.

**Ingredients:** Marinated: Organic soy tempeh, water, shoyu (natural soy sauce), lemon juice, natural herbs and spices, safflower oil.

**Wt/Vol., Packaging, Price:** 7 oz (199 gm) vacuum pack.

**How Stored:** Refrigerated.

**Nutrition:** Marinated: Per 3.5 oz. Calories 247, protein 18 gm, carbohydrates 12.1 gm, fats 13.75 gm, sodium 13 gm, vitamin B-12 2.2 mg.

**New Product–Documentation:** Labels for both. 1987. 3.5 inches diameter. Front and back. Front is full color, with orange, yellow and red lettering. Photo of a round burger with onions rings on top, on mushrooms, lettuce and tomato.

“Pop ‘n Serve. Meatless. Delicious. High Protein. No Cholesterol. Good food in minutes.”

1838. **Product Name:** Sombrero Joe (Mexican Flavored Sloppy Joe with Tofu).

**Manufacturer’s Name:** Simple Soyman.

**Manufacturer’s Address:** 4877 North Green Bay, Milwaukee, WI 53209. Phone: 414-264-4133.

**Date of Introduction:** 1986 March.

**New Product–Documentation:** Talk with R. Jay and Barbara Gruenwald. 1989. June 12. This product was launched in March 1986. It is used as a filling for tacos, burritos, or enchiladas.

1839. **Product Name:** [Yves Tranches Deli Slices. Bologna Style].

**Foreign Name:** Style Saucisson de Bologne.

**Manufacturer’s Name:** Yves Natural Foods (Yves Fine Foods Inc.).

**Manufacturer’s Address:** 1138 East Georgia St., Vancouver, BC, V6A 2A8, Canada.

**Date of Introduction:** 1986 March.

**Ingredients:** Tofu (soybeans, nigari, water), pure vegetable oil, wheat gluten, dried [egg] albumen, wheat germ, nutritional yeast, spices, hydrolysed vegetable protein, natural hickory smoked flavor, natural color, beet powder, sea salt, guar gum.

**Wt/Vol., Packaging, Price:** 6 oz (165 gm) vacuum packed. 155 gm retails for \$2.29 (8/91).

**How Stored:** Refrigerated, 28 day shelf life. Or frozen.

**New Product–Documentation:** Label. 1987. 3.5 inch diameter. Self adhesive Yellow, red, and black. Self adhesive. A second self-adhesive label on the back lists ingredients, in black only. Company name is Yves Fine Foods Inc., Vancouver, Canada V6B 1G4. Soy Power Co. 1987. Catalog.

Label. 1991. Aug. new design. 4.5 by 5.5 inches. Plastic. Red, blue, white, and tan. “Yves Deli Slices do not contain any animal products and are prepared with fresh organic tofu.”

1840. Jones, Irmarié. 1986. Local firm finds joy in tofu. *Recorder (Greenfield, Massachusetts)*. April 2. p. 15.

• **Summary:** Tomsun has become the largest non-Oriental-owned tofu manufacturing company in the world, and it has expanded its product line accordingly to include Tomsun won-ton and egg roll wrappers, fresh noodles, ginger soy sauce, five spice powder, and tofu burgers. Tomsun also makes firm and soft tofu, herb tofu and spicy tofu, plus Jofu, the first chilled, spoonable blend of tofu and fruit. Tomsun now sells more than 3,000,000 lb/year of tofu. Gives a recipe for Sweet apple egg roll surprise. An illustration (line drawing) shows labels of the first 5 products listed above. Address: Staff reporter.

1841. *Compas (Le) (France)*. 1986. Des saucisses de soja [Soy sausages]. No. 26. p. 26-27. March/April. Interview with Eric Dewilde of De Hobbit. [Fre]

• **Summary:** About the tempeh and tempeh sausages made by De Hobbit in Belgium. Three photos show the company cooking and centrifuging the soybeans to make tempeh, adding the tempeh starter culture, and forming the tempeh sausages. De Hobbit is located at Waterstraat 4, B-9980 Sint Laureins, Belgium. Phone: 091/79.96.22. Their distributor in France is Traditions du Grain, 16 avenue Jean-Jaurès, 94200 Ivry, France. Phone: (1) 46.71.89.88. Address: France.

1842. **Product Name:** [Frika Vita].

**Manufacturer’s Name:** Pural.

**Manufacturer’s Address:** 15 rue Leon Blum, 92113 Clichy cedex, France.

**Date of Introduction:** 1986 April.

1847. Soppe, Fennie. 1986. Jonathan, Histoire d’un boucher reconverti. Interview de Jos Van De Ponselee [Jonathan. History of a reconverted butcher. Interview with Jos Van De Ponselee]. *Compas (Le) (France)* No. 26. p. 14–16. March/April. [Fre]

• **Summary:** It all started in 1974, when Jos’s wife experienced serious health problems. There were suspicions of lung cancer. She went to Switzerland for care, and had a fever of 38–40°C for 6 months without improvement. One day someone gave them a small book about natural

foods. She then began to eat macrobiotically and her fever disappeared after 3 months.

At the beginning, this diet was not at all attractive. The food was very poor, and Jos began to ask himself questions and to read books on the subject. He learned that it wasn’t a bad diet at all. Not wanting to have to prepare two types of food, he started to eat the same diet as his wife. His health did not improve much, but he found he had the capacity to work much more, and a need for less sleep. His days started at 6:00 A.M. and ended between 11:00 P.M. and midnight.

Upon seeing the results, he began to think and live

differently. In the long run, the work at the butcher shop worried him. He no longer ate meat, but he was still selling it. That wasn’t logical. He then decided to sell organic meat products at the butcher shop, and they sold very well. However that was a form of hypocrisy.

You must understand that at that time, macrobiotic people in the area were very fanatical. Meat was considered bad, in fact a poison. A more moderate viewpoint was needed; a bit of meat in itself is not bad, but its consumption in large quantities can present problems.

Jos opened two natural food shops in succession, and they were a success in part because he had experience in running a business. He tried to sell his butcher shop, which was very large. Through his new shops he met people who wanted to stop eating animal proteins, but they knew of no replacement. Back then, you could not find any tofu, or seitan, just beans. When a person decides to change her diet, she cannot fully benefit from the proteins in beans: the process is too slow. This made it hard for a person to change his or her diet.

Jos attended a seminar conducted by Michio Kushi at Drogen (Germany). They talked about these problems. Michio spoke to Jos about miso and tamari, and advised him to come to Boston, Massachusetts, where he could learn and see everything for himself. He did. Indeed miso and tamari were available, but they were made in a foreign country. He was somewhat deceived in the early days. Most of the products came from Japan. At the same time, he worked at the famous macrobiotic restaurant The Seventh Inn. He became friends with a Japanese person and they worked together making seitan. Finally, he started commercial

production with two Americans.

Tofu was very well known, but it was made in [Boston's] Chinatown. The Chinese did not want to show others how to make it, but they were allowed to look. This interested him very much.

Upon returning to Belgium, after his studies in Boston, Jos began commercial production of seitan. At the beginning people were very closed. They thought that one should consume only beans. Their fanaticism seemed very natural to them, but that made it very difficult for Jos to survive economically by making only seitan. He started by producing 500 gm a week of seitan for Souen, a macrobiotic restaurant in Gent [Gand]. He urged the restaurant to serve seitan to each customer so that it would become well known. That was successful. After several months, the natural food stores began to order seitan from him; that was his goal. Subsequently he began to make fresh organic tofu. He encountered new opposition when he suggesting sterilizing the tofu, which would cause loss of vitamin C, etc.

People got to know seitan but they were getting tired of it, so now he has the seitan burger between two buns, with onion and lettuce. They are also thinking about introducing seitan brochettes and seitan in sauces. The starch left over from making large quantities is used in making soups, spreads for bread, goulash, etc.

How did his customers react initially to all this? They thought he was crazy—in 3 ways. (1) They thought macrobiotics was folly; (2) Who but a fool would sell a butcher shop that was doing so well, employed 16 persons, and was the first to sell organic meat with great success. They thought that America had made him lose his head; (3) They thought artificial meat was absurd and would not sell. But these people have changed their opinions as things have developed.

His best invention is seitan sold sterilized in jars; it is now a very successful product. He is also very proud of his tofu burgers (*les beignets, les ganmos*; made from tofu, sesame seeds, onions, mushrooms, and arrowroot), his sauces, and his mushroom tarts. Neither his soy croquettes nor his carob products sell well. His basic products are seitan, tofu, and mochi (made according to a traditional Japanese recipe). The company will soon focus more on exporting its products, especially to Germany, followed by France (starting in 1987) and Austria. He has created a company in France named Jonathan France (La Comba 24620, Les Eyzies. Phone 53.06.94.68), directed by Frenchmen, because it is very difficult to export to France; he has been trying for 2 years.

Black-and-white photos show: (1) A portrait shows Jonathan, with a large beard, rimless glasses, and thinning hair. (2) Twenty-three of his sterilized products in jars, which have a shelf-life of 2 years. Among these are Sojapastei, Sojaboont Jes, Azukiboont [Azuki bean] Jes, Brown Rice Casserole with Seitan, and Tofu Salade. The company is

studying a tempeh spread for bread. The company now has 16 employees, including 3 in stores and a representative. Most of the employees like this food. Not all are macrobiotic but most have changed their diet, usually without fanaticism.

The company's name Jonathan comes from the name of the book *Jonathan Livingston Seagull* (Jonathan Le Goëland), about a seagull who wants to live differently. Jos believes that vegetable proteins can play an important role in world hunger. His dream, which he hopes to realize, is to establish small food companies in Zaire, Rwanda, and all of southern Africa. "For example, a small tofu machine can produce 800 to 1,000 cakes of tofu/day. I would like these people in poor countries to be able to make tofu themselves."

Jos is not a vegetarian. He still likes meat and eats it in small quantities, often fish or organic meat. He has 3 children. Address: Pays-Bas (Netherlands).

**1848. Product Name:** [Light Tofu Burgers {Low-fat, Cooked without Oil} (Italian-Style, Chinese-Style, and Breaded)].

**Foreign Name:** Croque Tofu Léger: Galettes Fraiches de Soja (Italienne, Chinoise, Gratinée).

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

**Date of Introduction:** 1986 April.

**Ingredients:** Garlic and Fines Herbs: Tofu (water and soybeans\*), rolled oats\*, soy sauce, garlic and fines herbs (3.4%), sunflowerseed oil, spices. \* = Organically grown (issus d'agriculture biologique).

**Wt/Vol., Packaging, Price:** 2 x 100 gm patties.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm: Protein 15.4 gm, lipids 9.6 gm, carbohydrates 7.8 gm, calories 179.

**New Product—Documentation:** Labels sent by Bernard.

April 1989. Croque Tofu Léger. 4 by 7.75 inches. Red, brown, and green on white. Printed on poly bag. Nature et Progres logo. Text in French and Dutch. Two burgers are vacuum packed side by side behind the one label. "Reheat at low heat without oil in an oven or frying pan." A simple illustration (line drawing) on front the panel shows vegetables.

Letter from Bernard Sturup of Société Soy. 1990. June 6. Tof'in was introduced first (in 1986) and Croque Tofu Léger came second (Feb. 1987). They are the same product but the packaging for each was different.

**1849. Product Name:** [Tof'in Tofu Burgers {Precooked without Oil} (Garlic and Fines Herbes, Provençale with Tomato & Onions, or Forest Mushrooms)].

**Foreign Name:** Tof'in (Ail/Fines Herbes, Provençale, Forestière).

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** 1 rue du Crêt de la Perdrix,

42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1986 April.

**Wt/Vol., Packaging, Price:** 2 x 100 gm cakes in vacuum pack.

**How Stored:** Refrigerated, 28 day shelf life at 4°C.

**Nutrition:** Per 100 gm.: Protein 11.6 gm, fat 8.8 gm, carbohydrates 8.1 gm, calories 158.

**New Product–Documentation:** Soyfoods (ESFA), 1987. Jan. “Launched at SIAL (Oct. 1986). Tofu cakes, precooked without oil, containing different vegetables, spices, and seasonings. Must be heated before serving, and can be included in snacks or the main meal instead of animal proteins. The three flavors are Garlic & Herbs, Provençale, and with Mushrooms.

Letter from Bernard Storup. 1989. March 3. Tof’in (low fat tofu burgers, cooked without fat) in 3 flavors (Garlic & Fines Herbes, Provençale, and Forestiere) were introduced in April 1986 and discontinued in March 1988. Three other flavors (Italienne, Chinoise, and Gratinée) were introduced in Sept. 1988, which see.

Letter from Bernard Storup of Société Soy. 1990. June 6. Tof’in was introduced first (in 1986) and Croque Tofu (deep-fried burgers) came second (Feb. 1987). They are the same product but the packaging for each was different.

Talk with Bernard Storup. 1990. June 13. Tof’in (pronounced toe-FEEN) was packaged for supermarkets. It was the same as Croque Tofou, but not the same as Croque Tofou Léger, which came in Italienne, Chinoise, and Gratinée flavors. Tof’in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Dorés de Soja, which is the same as Tof’in (i.e. deep-fried).

Letter from Bernard Storup. 1990. Dec. 26. This product was not deep-fried. It was prepared without fat.

**1850. Product Name:** Lite Chef Tofu Mixer [Pasta Italiano, Rancheros Fiesta, Mandarin Almond Stir-Fry, California Burger, or Shanghai Sweet ‘n Sour].

**Manufacturer’s Name:** Sunfield Foods (Distributor). A Sunmark Company.

**Manufacturer’s Address:** 8155 Hampshire St., St. Louis, MO 63123. Phone: 314-832-7575.

**Date of Introduction:** 1986 April.

**New Product–Documentation:** Ad in Whole Foods. 1986. April. p. 41. “Lite Chef Introduces a World of Taste to Tofu, and a World of Profit for You.” Ad in Natural Foods Merchandiser. 1986. Oct. p. 46. “Tofu. Traffic!” Leaflet. 8½ by 11 inches, color. “Tofu. Terrific!” Note: This line was first introduced by Essential Foods in 1984. Pasta Italiano 240 calories, Rancheros Fiesta 280, Mandarin Almond 310, California Burger 190 calories. Size: 3.8 to 5.5 oz. Retail: \$1.99. Soya Newsletter. 1987. Sept/Oct. p. 6. These are now called Life Chef Entrees (which see). The newest “quick and easy” dinner is Shanghai Sweet ‘n Sour. Talk with Craig

Ramsell. 1989. March 14. The Lite Chef line of products was discontinued in about Sept. 1988, after a large production run, shortly before Sunfield was acquired by Barbara’s Bakery. Barbara’s was not interested in buying the line.

**1851. Product Name:** Crispy Chik (Breaded) [Patties, or Chunks].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1986 April.

**Ingredients:** Chik pieces: Textured vegetable protein (soy protein isolate and concentrate), egg whites, soybean and/or corn oil, flavorings (hydrolyzed vegetable protein, onion powder, turmeric, spice extractives), monosodium glutamate, carrageenan, niacinamide, etc. Batter: Water, wheat flour, corn flour, salt, leavening (sodium acid pyrophosphate, sodium bicarbonate), monosodium glutamate, paprika, spices, corn starch, onion powder, dextrose, garlic powder, turmeric, yeast, nonfat dry milk, hydrolyzed plant protein, eggs. Breading: Bleached white flour, yeast, sugar, salt.

**Wt/Vol., Packaging, Price:** Patties: 10 oz (284 gm) paperboard box. Chunks: 12 oz (340 gm) box.

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet with coupon. 1986. “New! Crispy Chik.” Expires Dec. 31, 1986.

*Vegetarian Meal Plan. 7th ed. Appendix A.6-27.*

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 8 by 4 by 1¼ inches. Red, black, and golden brown on white. “A breaded vegetable protein product. Completely meatless. Microwaveable. Heat and serve convenience.” Package design is copyright 1987. The main ingredients are now: Patties: Textured vegetable protein (soy protein concentrate and isolate), egg whites, wheat flour, soybean oil, corn oil, corn flour, salt, whey, partially hydrogenated soybean oil, sugar, yeast leavening (sodium acid pyrophosphate, sodium bicarbonate), nonfat milk, natural and artificial flavors from non-meat sources, monosodium glutamate, spices, vegetable gum, celery, onion, garlic, niacin, iron, etc.

Soyfoods Center product evaluation. 1990. July 21. Too salty if served by itself. The photo on the package looks better than the actual product. When microwaved, they do not brown. When heated in an oven, they are too dry. Deep fried, they are good but still somewhat dry. Package design: Excellent.

**1852. Toyo Shinpo (Soyfoods News).** 1986. Faasuto Fuudo wa tōfu kara. Tomii Cheen. Gyōkai no sakigake mezasu [Fast foods from tofu. The Tomi Chain aims to be a pioneer in the industry]. May 21. p. 3. [Jap; eng+]

• **Summary:** Yoshiaki Saruda, president of the Tomi chain in Kyoto, is franchising the concept. He got the idea from McDonald’s. His shop sells tofu ice cream, tofu yogurt,

tofu hamburgers, tofu pies, Tomi crepes, Tomi pies, etc. These second generation products are all made by machines, produced by Saruda Shoten, which is pioneering such food equipment. Saruda Shoten is owned by Yoshiaki Saruda's father.

1853. *Toyo Shinpo (Soyfoods News)*. 1986. Tenpe ryôri no tokuchô reiji. Torigoe Goorudo. Torigoe Seifun ga PR [They demonstrate the special characteristics of tempeh cookery. Torigoe Flour Milling Co. does PR for its Tempeh Gold, with recipes]. May 21. p. 9. [Jap; eng+]

• **Summary:** Recipes include Gojiru, Takikomi Gohan, Tempeh Hamburger, Potato Croquettes, Kakiage, Banana Doughnuts. Address: Kyoto, Japan.

1854. **Product Name:** Tofu Burger.

**Manufacturer's Name:** Michigan Soy Products Co., Inc.

**Manufacturer's Address:** 1213 N. Main St., Royal Oak, MI 48067. Phone: 313-544-7742.

**Date of Introduction:** 1986 May.

**Ingredients:** Tofu, brown rice, whole wheat flour, onion, carrot, sesame seeds, oats, sunflower seeds, corn oil, safflower oil, arrowroots, salt, garlic, corn meal, seaweeds.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Blair. 1987. *Detroit News*. Nov. 4. p. 1E, 2E. Tofu. Talk with Dorothy Hwang. 1988. Feb. 18. This product sells very well. They will soon change the packaging from a tofu tray to a printed paper box. Label. 1987. Dot matrix printed on white gummed label.

1855. Domitz, Lynne. 1986. "Soysage" maker offers a healthful alternative. *Messenger (Athens, Ohio)*. June 1.

• **Summary:** A photo shows Nancy Hauber, founder and operator of Golden Soy Foods, 26½ East State St., Athens, Ohio. She is posing with equipment she uses to make "soysage, a soy-based, vegetarian sausage substitute."

A vegetarian since 1977, she graduated from Ohio University in 1978 (with a degree in elementary education) and started her company 2 years ago. She also makes a tofu-based dill salad dressing and a tofu sandwich spread; she says the latter is used just like mayonnaise.

Soysage is low in fat and high in protein, which is just what vegetarians need if they're not going to get their protein from meats.

"She said she got most of her business advice from Susan Spataro, director of the Athens Small Business Center, and some help from her father, who has been a businessman all his life."

1856. Forman, Gail. 1986. Where's the beef? Just substitute bean curd skin. *Washington Post*. June 15. p. K1, K6.

• **Summary:** Special to the Washington Post: Bean curd has a 2,000 year history [sic] as a dietary staple all over East

Asia and recently it has developed a following in the United States. Less well known is a relative of bean curd called "bean curd skins."

Before the coagulant is added to hot soy milk to make bean curd, "a thin skin forms on top, much like the skin that forms when cow's milk or cream is heated... This very thin skin, carefully lifted off and hung up to dry, is called tiem jook [sweet dried yuba] by the Chinese, yuba by the Japanese. In English it goes by the various names of bean curd skin or tofu skin, bean curd sheets and bean curd robes."

Note: This is the earliest English-language document seen (Oct. 2012) that uses the word "robes" or the term "bean curd robes" to refer to yuba.

The thinner the bean curd sheets, the better. Oriental groceries stock them in various dried forms: flat sheets, rolls, folded sticks, strips, circles, and small triangles. They are brittle and break easily, but last almost indefinitely without refrigeration. Some grocery stores now also sell fresh and frozen bean curd skins, which are easier to handle and more flavorful than dried.

Bean curd skins first became widely used millennia ago in Chinese Buddhist vegetarian cuisine, where they were used in place of meat—as in mock Peking duck. They are widely used as wrappers of almost any small packet of tasty ingredients. Steamed bean curd sticks [dried yuba sticks], made of rolled or folded sheets, add substance to a bowl of vegetable broth.

Contains the following recipes, from various restaurants, for using bean curd skins: China Harbor lobster roll (a good way to stretch a small amount of lobster). Meat stuffed bean curd skins (calls for "2½-inch square pressed bean curd"). Yellow birds (vegetarian). Mock Peking duck (vegetarian). Bean stick soup. Steamed fish with bean curd sticks (calls for "2 ounces bean curd sticks, broken into 2-inch sections"). Fukien stuffed shrimp in bean curd skins. Buddha's delight (vegetarian).

Note: This very creative article is the first to mention the word "yuba" in a major American newspaper. Address: Japan.

1857. **Product Name:** Light Tofu Browners, Sausage Style (Meatless Sausage).

**Manufacturer's Name:** Light Foods Inc.

**Manufacturer's Address:** St. Louis, MO 63017.

**Date of Introduction:** 1986 June.

**Ingredients:** Water, tofu, TVP (textured vegetable protein), soyoil, egg whites, salt, natural herbs and spices, honey, tamari, wheat gluten, malt powder.

**New Product–Documentation:** Poster. 1986. "No cholesterol, no MSG, no sugar, no meat." Spot in *Natural Foods Merchandiser*. 1987. March. p. 99. Adweek East. 1987. April 6. *Soya Newsletter*. 1988. Sept/Dec. A new smaller size, (8 links in a 12-oz. package) was introduced

in late 1988. Address is now 613c Broadmoor, St. Louis, Missouri 63107. Ingredients include water, tofu, TVP, soy oil, salt, honey, soy isolate, malt powder, and natural herbs and spices.

1858. **Product Name:** [Okara Burger].

**Foreign Name:** Okaraburger.

**Manufacturer's Name:** Sojatopf. Renamed Soto in April 1989.

**Manufacturer's Address:** Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.

**Date of Introduction:** 1986 June.

**Ingredients:** Incl. okara, tofu, hazelnuts, tamari.

**Wt/Vol., Packaging, Price:** 80 gm vacuum pack.

**New Product–Documentation:** Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

1859. Stein, Margery. 1986. The winning formula: Ten years of testing and tasting made David Mintz a millionaire. *Success!* June. p. 28-32. Cover story.

• **Summary:** In 1969 he opened Mintz's Buffet on Manhattan's trendy Upper East Side... "One day I read about tofu in a health food magazine. When I saw the words 'looks like cheese but its not,' I said, 'That's what I've been looking for.' My antenna went up." Mintz made a trip to Chinatown, bought several buckets of bean curd, and went into his kitchen to experiment. "Plans for franchises are proceeding—more than 800 would-be owners are already in Tofu Time's files... A tofu TV dinner is in the works, along with cookies, biscuits, pastas, breads, sauces, dips, drinks, yogurts, low-fat and sugarless Tofutti, and a tofu patty that tastes like a hamburger."

1860. **Product Name:** Natural Touch Taco Mix (Meatless Entrees Dry Mix).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1986 June.

**Ingredients:** Textured soy protein concentrate, tomato powder, natural flavors from vegetable sources, fructose, sea salt, onion and garlic powder, spices.

**Wt/Vol., Packaging, Price:** 3.25 oz paperboard box. Retail for \$1.50 (7/90, California).

**How Stored:** Shelf stable.

**New Product–Documentation:** Food Report (Lehmann). 1986. June. "Meatless main courses in minutes."

Ad (full page, color) in Natural Foods Merchandiser. 1986. Sept. "New! Natural Touch Entrée Mixes."

Poster. 1987. March (undated). "New! Natural Touch Entree Mixes. The taste nobody can touch. Purity Pledge."

1861. **Product Name:** Natural Touch Stroganoff Mix (Meatless Entrees Dry Mix).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1986 June.

**Ingredients:** Sour cream powder (sour cream solids, nonfat milk solids, citric acid), natural flavors from vegetable sources, textured soy concentrate, corn starch, wheat flour, corn oil, fructose, dextrose, onion, mushrooms, garlic powder, caramel.

**Wt/Vol., Packaging, Price:** 3.1 oz paperboard box. 3.2 oz retails for \$1.50 (7/90, California).

**How Stored:** Shelf stable.

**New Product–Documentation:** Ad (full page, color) in Natural Foods Merchandiser. 1986. Sept. "New! Natural Touch Entrée Mixes."

Poster. 1987. March (undated). "New! Natural Touch Entrée Mixes. The taste nobody can touch. Purity Pledge."

1862. Wilson, Abigail. 1986. Tempeh Works making money—but not a profit. *Recorder (Greenfield, Massachusetts)*. July 18.

• **Summary:** Tempeh Works had sales of \$550,000 in 1985 and Michael Cohen anticipates they will reach \$650,000 in 1986. "The company's potential is proven but money is scarce. Cohen has been able to secure \$325,000 in seven years in both state and federal loans. But while the money helped him buy property and move into a new facility, most of it could not be used to meet two critical needs of his business: marketing and working capital." He has found that money for R&D is impossible to find.

"The single financier who invested \$50,000 in Tempeh Works for a high-risk venture—Tofu Pups, a soybean hotdog with no cholesterol or nitrates—gave birth to a product that in one year has brought in 65 percent of the company's sales."

Cohen now plans to raise \$500,000 through a public stock offering. Half that sum will go to marketing.

1863. **Product Name:** Sesame-Wheat Tempeh (Sausage Shaped).

**Manufacturer's Name:** 21st Century Foods Inc.

**Manufacturer's Address:** 30A Germania St., Jamaica Plain, MA 02130. Phone: 617-522-7595.

**Date of Introduction:** 1986 July.

**Ingredients:** Organic soybeans, purified water, bulghur wheat, roasted sesame seeds, fresh *Rhizopus* culture.

**Wt/Vol., Packaging, Price:** 8 oz or 16 oz flat, or 8 oz roll.

**How Stored:** Refrigerated, 21 day shelf life.

**Nutrition:** Per 4 oz.: Calories 197, protein 23 gm, carbohydrate 15 gm, fat 5 gm, fiber 3.45%.

**New Product–Documentation:** Label. 1987. 6 by 8 inch plastic bag. Orange, blue, yellow, black, and white. "Whole

food for a healthy world. Low calories. Low sodium. No cholesterol. No preservatives. What is Tempeh? (Lengthy description on back). Dark areas may occur on our tempeh, which indicates ripeness, and are normal on foods naturally cultured.” Talk with Rudy Canale. 1988. Sept. 13. The invoice for printing the labels for this product is dated July 1986.

1864. Bean Supreme Soyfoods. 1986. Price list. P.O. Box 78 084, 1 Wallingford St., Grey Lynn, Auckland, New Zealand.  
**• Summary:** The company makes Tofu, Tempeh, Cottage Spread, Soymilk, Soysage, and Non-Dairy Frozen Dessert. Address: Grey Lynn, Auckland, New Zealand.

1865. **Product Name:** Tofu (Vacuum Packed), Tofu Sloppy Joe, and Tofu no-Egg Salad.

**Manufacturer’s Name:** Fresh Tofu Inc.

**Manufacturer’s Address:** 900 Line St. (P.O. Box 1125), Easton, PA 18042. Phone: 215-258-0883.

**Date of Introduction:** 1986 July.

**New Product–Documentation:** Talk with Gary Abramowitz. 1989. Aug. 21. The company bought a vacuum packaging machine in about July 1986 and added a 1 lb packaged tofu to their bulk tofu. At about the same time they launched a Tofu Sloppy Joe, the only product of theirs that has ever failed. In Sept. 1986 they introduced a Tofu No-Egg Salad.

1866. **Product Name:** [Kip Lumpia (Spring Rolls or Soya Croquettes with Chicken)].

**Foreign Name:** Kip Loempias.

**Manufacturer’s Name:** Mora.

**Manufacturer’s Address:** Belgium.

**Date of Introduction:** 1986 July.

**Wt/Vol., Packaging, Price:** Each 125 gm and packed in two to retail for 69 BF.

**New Product–Documentation:** Food Report (Lehmann). 1986. July.

1867. *Natural Foods Merchandiser*. 1986. 7th Annual Natural Foods Merchandiser merchandising awards. July. p. 42-43, 45.

**• Summary:** Soyfoods won the following awards: Gold: San-J Tamari (wheat-free soy sauce) and Shoyu; Silver: Fantastic Foods’ Tofu Scrambler & Tofu Burger, Westbrae Natural miso soups; Honorable mention: Walker & Wilks Tofoods frozen entrees, White Wave boxed tofu. Color photos show each.

1868. Realeat Company. 1986. Meat in decline. The 1986 Realeat Survey (News release). Gregory Sams, The Realeat Company, 2 Trevelyan Gardens, London NW10 3JY, England. 2 p. July. [2 ref]

**• Summary:** A three year look at Great Britain’s changing

attitudes to meat eating. A survey conducted for Realeat Co. by Gallup (Social Surveys) Ltd. polled 3,881 adults age 16 and over at 200 points across the British Isles. Realeat Co. is a natural foods firm that introduced the popular VegeBurger in 1983. The percentage of Britishers who are vegetarian grew to 2.7% in 1986 from 2.1% in 1984. An additional 3.1% avoided red meat in 1986, up from 1.9% in 1984. Students aged 16 and over are now 4 times as likely as the rest of the population to be vegetarian. In 1986, 18.2% of students ate no meat (11% ate no meat, fish or poultry), up from 9.8% and 4.8% respectively in 1985. 7.3% of all women eat no meat versus 4.2% of all men. Of those eating less meat, the upper classes are cutting back the most (mainly for health reasons) and the lower classes the least (if so, more for cost reasons). Address: Gregory Sams, London, England.

1869. Shurtleff, William; Aoyagi, Akiko. 1986. Tempeh production: A craft and technical manual. Lafayette, California: Soyfoods Center. 176 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [28 ref]

**• Summary:** The table of contents of this edition is basically the same as that of the original 1980 edition. Major changes have been made in the ads at the back of the book and small changes in several other parts of the book.

Print history: Pre-publication: 100 photocopy copies. 1980 March 15: 1,021 paperback and 150 hardcover. 1986 July: 330 paperback. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1870. Lundberg, Kirsten O. 1986. Move over high tech, here comes tofu: Or, can soybeans fuel Massachusetts’ economy into the 21st century? *Boston Globe*. Aug. 5. p. 25, 36. [1 ref]

**• Summary:** About Tomsun Foods Inc. and Nasoya Foods. John Paino says that Tomsun is focusing on products for the dairy section, whereas Nasoya has chosen to remain in the produce section. “Both companies have branched out into tofu-based ‘second-generation’ products”—in hopes of reaching a wider market. These include salad dressings, soy mayonnaise or Soyannaise, and tofu burgers.

“Nasoya has been more conscious of purity over the years because of their macrobiotic background. It gives them a philosophical attitude to water, coagulant and soybeans that translates into high quality, and they present their product that way,” says William Shurtleff, author of ‘The Book of Tofu’ and director of the Soyfoods Center in Lafayette, California.”

Tofu is made from soy milk, “mixed with the coagulant nigari—a residue of dried seawater imported from Japan—and compressed.”

Photos show Tom Timmins (age 40) with Jofu and John Paino with his tofu products. Address: Massachusetts.

1871. **Product Name:** Natural Prepared Entrees: Tofu Burger.

**Manufacturer's Name:** Natural, Inc.

**Manufacturer's Address:** 6650 Santa Barbara Ct., Elkrige, MD 21227. Phone: 301-796-3211 (Balt.); 301-621-5388 (DC).

**Date of Introduction:** 1986 August.

**Ingredients:** Nigari tofu, carrots, cabbage, onions, celery, okara, soymilk, sesame seeds, sunflower seeds, soybean oil, sea salt, spices.

**Wt/Vol., Packaging, Price:** 7 oz vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1986, undated. “Completely vegetarian. All natural. No preservatives.” Talk with Larry C. Betzler of American Soyfood Industries. 1988. April 1.

1872. **Product Name:** Tempeh Burger.

**Manufacturer's Name:** Nutrisoy Pty. Ltd.

**Manufacturer's Address:** 255 Forest Road, Arncliffe 2205, NSW, Australia.

**Date of Introduction:** 1986 August.

**Ingredients:** Organic soybeans, water, soy sauce, sunflower oil, cider vinegar, spices, herbs, and culture (*Rhizopus oligosporus*). “Black spots are normal sporulation and do not indicate spoilage.”

**Wt/Vol., Packaging, Price:** 200 gm in plastic bag.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label with date sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Aug. 1986. Orange, green, yellow, black and white on red. “Sandwich filling. Ready to serve, hot or cold.”

1873. Watanabe, Tokuji. 1986. Traditional foods: Their values, problems and research and development. In: V.H. Potty, et al. eds. 1986. Traditional Foods: Some Products and Technologies. 292 p. See p. 201-08. Aug. Presented at the UN University Workshop on “Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies.” Held June 1983 at CFTRI, Mysore, India. [7 ref]

• **Summary:** Contents: Introduction (ways of classifying traditional foods). Structural characteristics of traditional food industries in Japan. Traditional food processing technologies. Problems and reevaluation of traditional foods. New food processing technologies applied to traditional foods. Technologies applicable to traditional foods. Assessment in modernization of traditional food production. Some activities related to traditional foods. Conclusion.

Traditional foods can be classified as staple or non-staple, fresh or processed (processing technologies include fermentation [e.g. miso, soy sauce, natto], salting, acidifying, drying after freezing [kori-tofu], sun-drying, fractionation [tofu], fabrication [ganmodoki], simulation of animal foods [soy milk, ganmodoki, su-ho-tai made from yuba in

China]), animal or vegetable origin, and region or national production.

In Japan, rice consumption is decreasing year after year. It is thus not surprising that consumption of traditional foods closely associated with rice production are also decreasing. The reevaluation of traditional foods and their advantages and disadvantages are discussed. New food processing and packaging technologies are being applied to traditional foods, including tofu, miso, natto, and koji. Recently a method has been found to extend the shelf life of natto beyond the traditional 1-2 day period. Miso has been freeze-dried.

“Another application of a new process for the traditional foods is the emulsion curd which is a semi-solid mixture with definite proportion of soybean protein, oil and water. It keeps its form without flow. Even the dried or frozen product recovers its original texture by hydration or thawing. Therefore, it is used as a substitute in dried or frozen *Tofu*. Regular *Tofu* cannot recover its texture once it is frozen or dried...

Miso can be enriched with vitamin B-2 and calcium, and its salt content lowered. Since 1980 the Laboratory of Food Science at Kyoritsu Women's University has been conducting a research survey on traditional foods and dishes in Japan in cooperation with the Cooking Research Laboratory. “This project consists of three components: (a) survey of the present status of traditional foods on local basis at respective regions by visiting prefectural research organisations—universities and colleges; (b) sending questionnaires to students for seeking information on the position of the traditional foods in the dietary patterns of individual homes and also to obtain their comments on the future prospects of the local traditional foods; (c) and documentation regarding local traditional foods, followed by classification according to preparation or cooking method for analysis. On the basis of the collected data, the relationship between each local traditional food and its natural, cultural and historical background has been studied and published in the university's journals. More efforts are being made to identify the reasons as to why and how some traditional foods have survived in certain regions, while the others have disappeared or reached the verge of extinction.

“Another related activity is the one carried out by Ajinomoto Company, a major food manufacturer in Japan, which has got the modern audio-visual media, video-tapes and 36 mm-films. Their team has been documenting the processing of some selected traditional foods like *Tofu*, *Yuba*, *Fu* and such other foods as demonstrated by professionals by using the old traditional methods and facilities. This would help in the documentation of traditional technologies before they disappear in the event of modernisation of such foods. Such tapes and films have been made available by the company...

“Traditional foods, especially those of plant origin, are

prepared by such complex multi-step processes as to be called 'products of human wisdom.' Therefore there is so much to learn from such products if serious attention be paid. Indeed they have great potential for developing new food industries." Address: Kyoritsu Women's Univ., Tokyo, Japan.

1874. *Plenty Bulletin (Summertown, Tennessee)*. 1986. Jamaica soy. 2(3):1-3. Fall. [5 ref]

• **Summary:** "Recently, the Jamaican Government has launched an aggressive agricultural program (titled 'AGRO 21') which is designed to boost production of foods that can be grown locally, in order to decrease the need for precious foreign exchange... Consequently, soybean production has been conceived as one of the top priorities by the Ministry of Agriculture. Ironically the plan focuses on the use of soybeans to provide cooking oil and animal feed... With the participation of the Israelis and other foreign investors, soybeans are fast becoming one of the major field crops on the island..."

"In 1983, Plenty USA's sister organization, Plenty Canada, established an agricultural project on the north-central coast of Jamaica. Craig Bialick, an agronomist and soy foods technician who had worked 3 years with Plenty's soy projects in Guatemala in the late 1970's, was hired by Plenty Canada for the Jamaica project.

"Craig spent 15 months in Jamaica, June 1984-September 1985... He organized a school lunch program and set up a soy foods processing training center in Claremont, St. Ann. He also carried out numerous 'soy demonstrations' wherein local participants were taught how to prepare soy foods using only the facilities available in their home kitchens. 107 of these public demonstrations reached over 6,000 people from 4 different parishes on the island. Typical locations were schools, churches, clinics, youth clubs and weekly markets."

The Country Farmhouse Project in Kingston, Jamaica is run with the help of two Jamaican young people, Rasino D'Aguilar and his wife, Mohi. This small-scale cottage industry, which has been in business for 1 year on a shoestring budget, makes soy ice cream, tofu, soy mayonnaise, and a variety of okara burgers. Some of their products are sold at a weekly market sponsored by the Jamaica Vegetarian Society.

Photos show: (1) Jamaican kids making soy ice cream in Kingston. (2) Rasimo D'Aguilar preparing soymilk for making tofu at the Country Farmhouse kitchen in Kingston, Jamaica.

1875. **Product Name:** Spicy Tempeh Chili.

**Manufacturer's Name:** Hain Pure Foods.

**Manufacturer's Address:** Los Angeles, Calif.

**Date of Introduction:** 1986 October.

**Ingredients:** Incl. Tempeh, soy sauce.

**Wt/Vol., Packaging, Price:** 15 oz can. \$1.69.

**How Stored:** Shelf stable.

**New Product-Documentation:** Interview with Lonnie Stromnes. 1987. Sept. 3. He helped Hain develop the product. Hain was owned by Ogden for 4-5 years. Now it is owned by Pet of St. Louis, Missouri, a huge conglomerate.

1876. **Product Name:** Lemon Broil Tempeh.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 1990 North 57th Court, Boulder, CO 80301.

**Date of Introduction:** 1986 October.

**Ingredients:** Soy rice tempeh (cultured soybeans, water, brown rice), olive oil, soy oil, soy sauce, concentrated lemon juice, granulated garlic, onion powder.

**Wt/Vol., Packaging, Price:** 6 oz. Plastic wrapped.

**How Stored:** Refrigerated or frozen.

**New Product-Documentation:** Label. 1986. 3 inches square. Yellow and white on blue background. "Great on Sandwiches or Add to Stir Fry or Grill on Barbecue. Heat and serve. Pareve." Soyfoods Center product evaluation.

Delicious! Interview with Lonnie Stromnes. 1987. Aug. 31.

New Label. 1989. April. **Ingredients:** Soy Rice Tempeh, olive oil, soy oil, soy sauce, concentrated lemon juice, granulated garlic, onion powder.

By March 1996 this tempeh was classified by White Wave as a type of Veggie Burger.

1877. *Beachcomber (Vashon, Washington)*. 1986. Versatility is what sells tofu. Nov. 26.

• **Summary:** A large photo shows all Island Spring products, including soymilk, firm and extra firm tofu, Tofu Ranch House Dressing, Tofu Dessert (ice cream), Tofu Burgers, and Tofu Frozen Dessert Mix. Address: Vashon, Washington.

1878. Dawson, Barbara M. 1986. Vegetarian spa resorts to innovative purchasing. Murrieta Hot Spring's typical weekly grocery order might include 1,000 pounds of tofu. *Restaurants & Institutions (Des Plaines, Illinois)*. Nov. p. 172.

• **Summary:** In a 6-month period, Murrieta purchased 23,400 pounds of tofu, or 130 lb/day. The San Diego Soy Dairy sells 4,500 lb of tofu a week, 25% of it to Murrieta. Popular dishes include tofu links (hot dogs) marinated in almond oil, liquid aminos, ketchup and mustard, and grilled on the barbecue. Breakfast features a scrambled tofu dish blend in with almond oil.

Note: As of Aug. 1991 Murrieta Hot Springs is closed and a mess, with broken windows, no owner, and facing receivership.

1879. **Product Name:** Natural Prepared Entrees: Vegi Burger.

**Manufacturer's Name:** Natural, Inc.

**Manufacturer's Address:** 6650 Santa Barbara Ct.,

Elkridge, MD 21227. Phone: 301-796-3211 (Balt.); 301-621-5388 (DC).

**Date of Introduction:** 1986 November.

**Ingredients:** Nigari tofu, carrots, cabbage, onion, celery, potato, yam, okara, soymilk, sesame seeds, sunflower seeds, soybean oil, sea salt, spices.

**Wt/Vol., Packaging, Price:** 7 oz vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Larry C. Betzler of American Soyfood Industries. 1988. April 1. Eddie Tsai, the Taiwanese manager, makes Tofu Burgers and Veggie Burgers for Larry.

1880. *Soyfoods Report*. 1986. ProFiles: Golden Soy Foods, Inc. Fall. p. 11-12.

• **Summary:** Hauber, a vegetarian for 10 years, started the company in 1986 making Soysage in her kitchen.

1881. **Product Name:** Deep-Fried Tofu (Ganmodoki, Atsuage, or Namaage).

**Manufacturer's Name:** Tacoma Tofu.

**Manufacturer's Address:** 11018 Bridgeport Way S.W., Tacoma, WA 98499.

**Date of Introduction:** 1986 November.

**New Product–Documentation:** Talk with Ron Johnson, owner. 1987. Nov. 13. His wife is Japanese. Sells his tofu mostly to Japanese Americans under these names.

"This year. Save the bird & eat it, too!"

See similar, but more professional. leaflets from 1987, 1988, 1989, and 1990.

1884. Eilers, Richard. 1986. Vegetarian's work rooted in low-calorie soy products [Nancy Hauber of Golden Soy Foods]. *Plain Dealer (Cleveland, Ohio)*. Dec. 21.

• **Summary:** Hauber produces 400 lb of soysage and 1,600 pints of tofu spreads and dressings a week. A photo shows Nancy Hauber with her meatless Soysage, Tofu Dill Salad Dressing, and Tofu Sandwich Spread.

1885. *SoyaScan Notes*. 1986. Chronology of soybeans, soyfoods and natural foods in the United States 1986 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. Ron Ishida, an attorney with no previous knowledge of tofu, working for Azumaya Inc. (South San Francisco, California), rewrites the Tofu Standards without authorization. They have already gone through 8 drafts. This creates a crisis.

Jan. Soymage, the first casein-free soy cheese, is introduced by Soyco Foods.

Jan. *Soyfoods: The Journal of the European Soyfoods Association (ESFA)* begins publication from Paris. Philippe Vandemoortele of Alpro is president of the association and Guy Coudert is editor of the periodical. The association plans to organize a soyfoods conference every 2 years. But the journal is discontinued after 3 issues.

Jan. Tomsun Foods is reorganized, changing its name (for the fourth time) to Tomsun Foods International. The firm's new chairman is Juan Metzger, founder of Dannon

Yogurt. The company produces nearly 3 million lb. of tofu a year.

Jan. First Tofutti Shop opened in Japan by Daiei Co. Inc, Japan's largest retailer. Shop sells non-dairy soy-based ice cream and related snacks.

Feb. 7. Fire destroys Island Spring tofu plant in Vashon, Washington, with an estimated \$1 million loss.

Feb. Soya Kaas, an imitation cheese containing soymilk and casein, launched by American Natural Snacks, a marketer. The manufacturer is Swan Gardens of Georgia.

Feb. Jofu, a tofu-based, non-dairy, nonfermented, yogurt-like product, sweetened with fruits, launched by Tomsun Foods International of Greenfield, Massachusetts. The product is a hit, grossing nearly \$400,000 in its first 32 weeks on the market.

Feb. Barricini Foods has its first public stock offering. Raises \$1.5 million, gross to use in marketing Tofulite and Ice Bean soy ice creams.

Feb. Central Soya purchases Staley's protein line, including Mira-Tex, Procon [soy protein concentrate], and Textured Procon brands.

Feb. ASA hires Jim Guinn as technical director of soybean quality programs. Soybean quality is an area of growing interest, with two parts: 1. The traditional area of soybean condition, concerning grades, damage, foreign material, etc. 2. The newly emerging area of soybean composition and its relation to grades. New measurement technologies make it likely that soybeans may soon be sold based on their composition of oil and protein. Both effect exports and price.

March 5. Pesticide control now tops the Environmental Protection Agency's list of most pressing problems, announces *The New York Times* (and *Soybean Digest*, June/July). Stricter pesticide laws are enacted.

March 7. Richard E. Lyng of California becomes U.S. Secretary of Agriculture, replacing John R. Block. Policies remain unchanged.

April 18. Wm. Shurtleff, in charge of compiling the original tofu standards, submits a strong criticism of the illegitimate Ishida draft in the form of a detailed chronology of the development of the tofu standards.

April. Tofu cheesecake revolution in New York City profiled by *Whole Life*. Thirteen restaurants now offer them.

May. Tofutti Love Drops (chocolate covered graham cookie drops) launched by Tofutti Brands with much fanfare.

May. Nasoya's new million-dollar automatic tofu-making system, imported from Sato Shoji in Japan, begins operation.

June. Increasing consumer deception by "soy cheese" manufacturers. *Whole Life* publishes "Whole Frauds in the News: Will the Real Soy Mozzarella Please Stand Up (That is, If There is One)," an exposé of mislabeling involving Soyarella, Tofu Mozzarella, and Soya Kaas (though the latter brand is not at fault). Argues that it is deceptive for

health food stores to call a product "non-dairy" if it contains casein (milk protein), even though FDA rules allows such a designation. In Oct. *Whole Life* shows that "Independent lab tests prove Soyarella hoax; Large quantities of casein [19.6%] found in so-called soy cheese." Soyarella had previously been marketed as casein free.

July. Ralston Purina Co. starts publication of Nutrition Overview, a newsletter focusing on soy protein and fiber.

July. Soyfoods win big in 7th Annual Natural Foods Merchandiser merchandising awards: Gold: San-J tamari and shoyu. Silver: Fantastic Foods' Tofu Scrambler and Tofu Burger, Westbrae Natural miso soups. Honorable mention: Walker & Wilks frozen entrees, White Wave boxed tofu.

July. Vitasoy reintroduces its line of reformulated and repackaged soymilk products, originally launched in 1984. They contain more solids and nutrients, and are sweetened with barley malt instead of maple syrup.

July. A Roper poll in the U.S. finds that tofu is the "most hated" food. 35% of a sample of 2,000 adults checked it on a list of foods said to be disliked, ahead of liver (34%), yogurt (29%), Brussels sprouts (28%), and prunes (24%). Results do not vary significantly by age, but tofu dislike is somewhat less among those with higher incomes. The poll results are very widely publicized, and are even the subject of a question on the TV program *Jeopardy* (in early 1988)—and its rerun! These findings suggest both a widespread awareness of tofu and a split image: Some like it and others don't.

Aug. Kikkoman's new shoyu plant starts operation in Chitose, Hokkaido, in northern Japan. The first product was shipped on 30 Jan. 1987.

Sept. 9. American Soy Products Inc. plant dedicated in Clinton, Michigan. A \$10 million joint venture between Eden Foods and four Japanese companies (Kawasho, Marusan, Muso, Seikensha), construction on the plant began in Oct. 1985. It will make Edensoy soymilk in Tetra Brik cartons. The first products are shipped in November.

Sept. 19. Tofu standards passed by Tofu Standards Committee in San Francisco, after all committee members except Shurtleff agree to start with a blank slate in drafting new standards—thus erasing years of work by hundreds of people. Shurtleff resigns in protest, arguing that this is a violation due process. Shortly thereafter Barricini and Ralston Purina also refuse to give final approval. Tofu standards are stalled indefinitely after many years of hard work.

Sept. 24. First International Tofu Products Expo, Seminar, and Soyfoods Buffet, held in Munich, West Germany. Sponsored by Bernd Lehmann International Consultants. 100 people attend.

Oct. Supersoy brand soymilk introduced to America by Mitoku USA. It is made by Kibun Health Foods Co. in Japan.

Oct. Ralston Purina sells its domestic agricultural products business, Purina Mills. Total sales for 1986 were

\$5.5 billion.

Nov. Island Spring announces \$6.5 million investment from Edward Lynch Co. to finance an expansion plan. Construction of a new 30,000 square foot factory is now underway on Vashon Island.

Dec. 1. White Wave of Boulder, Colorado, acquires Soyfoods Unlimited, a tempeh manufacturer of San Leandro, California. This makes White Wave America's largest tempeh manufacturer.

Dec. 8. Central Soya purchases 7 of 9 Bunge processing plants. ADM is now estimated to control 30% of U.S. crushing capacity followed by Cargill (25%), Central Soya (20%), and other (25%).

Dec. Tomsun Foods International nets about \$3.45 million in its first public stock offering. Most of the funds will be used for sales and marketing of Jofu, and to repay \$800,000 in debts. Total Tomsun sales in 1986 were about \$3.1 million.

Dec. Haagen-Dazs will drop Tofutti and start distributing Barricini Tofulite, a non-dairy frozen dessert.

Dec. Brightsong Foods is named as one of the top ten food innovators for 1986 by Food & Beverage Marketing magazine. In fact, Brightsong is listed first!

Dec. Tofruzen Inc., a soy ice cream marketer from Englewood, Colorado, raises \$1.6 million in a public stock offering. Sales of Tofruzen in fiscal 1986 were \$91,000, rising to \$158,000 in 1987, and \$213,000 in the first quarter of 1988.

Dec. Edible Soy Products in Hudson Iowa is sold to Solnuts of Tilburg, The Netherlands, and renamed Solnuts, Inc. The Hudson and Tilburg plants are the only ones in the world that dry roast soybeans to make soynuts.

Dec. More than 60,000 Italian farmers harvested nearly 25,000 hectares (61,700 acres) of soybeans this year. Italy is now Europe's largest soybean producing country, followed by France. Five years ago, Italy produced virtually no soybeans. The Ferruzzi Group is the leading promoter, helped by hefty subsidies from the EEC.

#### 1986 New Trends:

So Called Tofu Cheeses. Eight new soy cheeses were launched during 1986, many with the term "Tofu" in the product name. Many have been shrouded in mystery, with the names of the manufacturer and ingredients often not disclosed. There has been much consumer deception, mislabeling, and several attempts to conceal the fact that they usually contain casein, the protein in cow's milk.

Soy Yogurts and Yogurt-Style Products. The leader in this exciting new category is Jofu from Tomsun Foods. The two basic types are fermented soymilk products (e.g. Cream of the Bean, Soy-O), and non-fermented tofu-fruit blends (e.g. Jofu).

Move to Manufacturing Soymilk in America. The rising cost of soymilk imports is making them unprofitable. Domestic production, which obviates shipping U.S. soybeans

to Japan, then shipping the beans and water back, will have major, beneficial long-term Edensoy, Ah Soy, and Westbrae Malted. Still imported are Vitasoy (from Hong Kong, whose exchange rate is tied to the dollar) and Sunsoy (from Belgium).

The declining value of the dollar against the yen starting in late 1985 led to a steady rise in soymilk prices. But the combination of domestic production and larger size packages (see below) has led to a drop in soymilk prices during 1986. For example, Edensoy, selling for 6 times the price of dairy milk per unit volume in early 1984, was selling for only 3.5 to 4.1 times as much in late 1986, a drop of about 37%.

Soymilk Switches to Tetra Brik Cartons and Liters or Quarts. Edensoy, Westsoy, and Ah Soy have all switched to Tetra Brik cartons this year. Lower total manufacturing and shipping cost is the main reason. The liter/quart size was pioneered in the U.S. by Alpro/Vamo Foods/Sunsoy, and followed by Edensoy, Ah Soy, and Vitasoy. These counterparts of dairy milk in quarts suit the needs of regular soymilk users by offering a more economical price per unit volume plus greater convenience. Soymilk may be the first liter-size Tetra Brik product to succeed in America.

INTSOY is doing outstanding, pioneering work with soyfoods and soybean utilization in the Third World and America. Research is focusing on extrusion cooking, extruder-exPELLER processing for small-scale oil expression, and fresh green soybeans. Since April 1987 the INTSOY Newsletter has become one of the best soy-related publications available.

Morinaga Long-life Silken Tofu becomes a major force in the U.S. tofu market. Traditional manufacturers consider the product a major threat to their markets. Azumaya has hired an attorney who spends considerable time causing troubles for Morinaga.

1886. Fukukara, Noriko. 1986. Shûdan kyûshoku ni okeru tenpe no riyô [Use of tempeh in group feeding or institutional foodservice programs]. In: Kô Aida, et al. eds. 1986. Proceedings of the Asian Symposium on Non-Salted Soybean Fermentation. Japan: Takeshima Shigeru. 319 p. See p. 291-97. Held July 1985 at Tsukuba, Japan. English-language summary in Symposium Abstracts, 80. [Jap]

• **Summary:** Contains seven tables showing how students and faculty rate the following tempeh dishes on odor/smell, overall appearance, texture, flavor, congeniality with other foods, overall impression: Karinto (sweet), tempeh sandwich, Tatsuda-age (fried), tempeh soup, tempeh dog (like hot dog), tempeh salad, tempeh on noodles (Katsudon-fu). For every dish, the faculty liked it better than the students, which were consistently on the "dislike" side of neutral. The faculty liked the tempeh dog and tempeh sandwich best, but not that much. Address: Teikoku Joshi Daigaku [Japan].

1887. Haytowitz, David B.; Matthews, Ruth H. 1986.

Composition of foods: Legumes and legume products. Raw, processed, prepared. *USDA Human Nutrition Information Service, Agriculture Handbook* No. 8-16. 156 p. Dec. See p. 126-152. By Nutrition Monitoring Division. [29 ref]

• **Summary:** Data are presented for 133 legumes and legume products. Of these, only 53 were included in *USDA Agriculture Handbook* No. 8, published in 1963. The following soy-based foods are included: Simulated meat products (bacon, meat extender, and sausage), raw soybeans, cooked boiled soybeans, roasted soybeans, dry-roasted soybeans, soybean products: miso, natto, tempeh, full-fat soy flour (raw, and roasted), defatted soy flour, low-fat soy flour, defatted raw soy meal, fluid soy milk, soy protein concentrate, soy protein isolate, soy sauce (shoyu, tamari, and HVP), raw tofu (firm {p. 147}, regular, dried-frozen/koyadofu, and fried) [Note 1. Tofu is called “tofu” and at “Soybean curd” it says, see “tofu.” Note 2. Footnote 2 states that the calcium content of tofu curd with calcium sulfate is 683 mg/100 gm, compared with 205 mg/100 gm for tofu curd with nigari. As of May 1997 Soyfoods Center believes that both these values are far too high; the two figures should be about 159 mg/100 gm (range 128-168) and 45 mg/100 gm respectively], okara, salted and fermented tofu (fuyu).

For each food the following information and number of values are given: Vertically: Proximate (7 values), Minerals (9), Vitamins (9), Lipids (Fatty Acids [Saturated (9), Monounsaturated (5), Polyunsaturated (7)], Cholesterol, Phytosterols), Amino acids (18). Horizontally: Amount in 100 gm edible portion (mean, standard error, number of samples), amount in edible portion of common measures of food (e.g. ½ cup or 1 cup), amount in edible portion of 1 lb of food as purchased.

Minerals include calcium, iron, magnesium, phosphorous, potassium, sodium, zinc, copper, and manganese (not aluminum).

Vitamins include ascorbic acid, thiamin, riboflavin, niacin, pantothenic acid, vitamin B-6, folacin, vitamin B-12, vitamin A.

Amino acids include tryptophan, threonine, isoleucine, leucine, lysine, methionine, cystine, phenylalanine, tyrosine, valine, arginine, histidine, alanine, aspartic acid, glutamic acid, glycine, proline, and serine.

For Adzuki beans (raw, cooked boiled, canned sweetened, and Yokan {yōkan–sugar-sweetened confection}) see p. 24-27.

For peanuts (all types raw, cooked boiled, oil-roasted, dry-roasted, Spanish raw, Spanish oil-roasted, Valencia raw, Valencia oil-roasted, Virginia raw, Valencia oil-roasted) see p. 109-18. For peanut butter (chunk style, smooth style), defatted peanut, and low-fat peanut flour, see p. 119-22. Address: USDA Human Nutrition Information Service.

1888. **Product Name:** Ganmodoki, Abura Age.

**Manufacturer’s Name:** Aloha Products.

**Manufacturer’s Address:** 4515 Centinela Ave., Los Angeles, CA 90066. Phone: 213-822-2939.

**Date of Introduction:** 1986.

**New Product–Documentation:** Visit to Yaohan supermarket in Los Angeles. 1988. Oct. 23. All tofu products stocked are made by this company and House Foods & Yamauchi. Talk with Tom Uyehara. 1988. Oct. 24. These products were launched in 1986.

1889. **Product Name:** ADM Veggie Burger (Dry Mix with Textured Soy Protein Concentrate) [Meat Style, Curry Style, Gyros Style, and Herbs & Spices Style].

**Manufacturer’s Name:** Archer Daniels Midland Company.

**Manufacturer’s Address:** Box 1470, Decatur, IL 62525.

**Date of Introduction:** 1986.

**Ingredients:** Meat Style: Textured soy protein concentrate, partially hydrogenated corn, and/or soybean and cottonseed oils, soy protein isolate, wheat gluten, methylcellulose, natural flavor, onion powder, salt, dehydrated worcestershire sauce (no anchovies), malt extract, beet powder, black pepper, zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (vitamin B1), pyridoxine hydrochloride (vitamin B6), riboflavin (vitamin B2), cyanocobalamin (vitamin B12).

**Wt/Vol., Packaging, Price:** 170 gm plastic or foil bag.

**How Stored:** Shelf stable.

**Nutrition:** Per 34 gm.: Calories 140, protein 16 gm, carbohydrates 7 gm, total dietary fiber 4 gm, fat 4.5 gm (Saturates 1.3, Monounsaturates 2.7, Polyunsaturates 0.5), cholesterol 0 mg, sodium 350 mg, potassium 425 mg.

**New Product–Documentation:** Talk with Clyde Boismenu of Basic Foods Co. 1990. Nov. 13. ADM’s Veggie Burger comes in 4 flavors in dry form: Meat Style, Curry Style, Gyros Style, and Herbs & Spices Style. They were introduced about 4 years ago. ADM also makes pre-cooked, frozen patties.

Labels sent by Clyde Boismenu. 1990. Nov. 18. 5 by 3 inches. Self adhesive. Black on white. Meat Style: “A delicious vegetarian entree that is based upon a savory blend of textured soy protein concentrate with natural flavorings. The veggie burger can be used in a multitude of recipes. In addition to a grilled patty, the veggie burger can be baked, steamed, poached, or cooked in a variety of ways. Cooking instructions: Empty the contents of the package [it is gray chunks and flour] into a bowl and add 1¼ cups (290 ml) cold water. Mix well and allow to stand 15 minutes. Form into desired shape and fry in vegetable oil until golden brown or bake in an oven at 375°F for 20-25 minutes. For best results, serve immediately after cooking... One packet make five 3.2 ounce burgers or about 1 pound of finished product.”

Soyfoods Center product evaluation of Meat Style. 1990 Dec. 4. CW: Beef flavor. Texture very much like ground

meat, both to feel and to eye. Fries up nicely; holds together, browns. Little taste except for slightly unpleasant aftertaste, so needs addition of spices. Excellent in flavorful sauces. Convenient for travel and backpacking. WS: Gyros flavor. When served as pan-fried patties the flavor is not very good (tastes slightly like dog-food), the texture is dry, not juicy, with some hard pieces reminiscent of gristle. It tastes much better when the patties served as chunks in a tomato or spaghetti sauce. AA: Easy and quick to make. CW: Curry. “I think people who are switching from a meat to a vegetarian diet would go for this. It has the right look and feel, and is easy to fix. The curry flavor was very mild (I added more curry powder); the flavor was a C+.”

1890. Bean Supreme. 1986. Tofu, tempeh, soysage: Quality vegetable protein (Poster). P.O. Box 78084, 1 Wallingford St., Grey Lynn, Auckland, New Zealand. 59 x 42 cm.

• **Summary:** See next page. This large, glossy poster, dark purple on white, shows a sliced chub of soysage, two packs of tempeh, add a cake of tofu plus a knife, some soybeans, and a prepared dish. At the lower left: “Bean Supreme—The protein source. All natural. Cholesterol and lactose free. Low sodium. Low calories. No preservatives.” Address: Auckland, New Zealand.

1891. Cole, Michael. 1986. Soya Health Foods Ltd. Company profile. Unit 4, Guinness Road, Trafford Park, Manchester M17 1AU, England. 4 p.

• **Summary:** Michael Cole is an entrepreneur, born in Manchester, England. The company was formed in 1984 in Manchester. The factory is sited in Trafford Park Industrial Estate and was the first to be built for the sole purpose of Soya Milk manufacture. The company is headed by Mr. M.S. Arora (Chairman), Mr. M.P. Cole (Managing Director), and Burns Anderson p.l.c. (Financial Controllers). Production of Soya Milk began in January 1985. The Sunrise brand is currently being sold throughout the 2,500 independent health food shops and in many supermarkets. The company has 5 products. Their soymilk is private labeled for 5 other companies. Soya Health Foods Ltd. has also been established in Australia and New Zealand, with its own private labels (milk in New Zealand and Burgers, Ice Cream, and Dessert in Australia). Address: Manchester, England.

1892. **Product Name:** Soysage Rolls.

**Manufacturer’s Name:** Dayspring Soyacraft Corporation.

**Manufacturer’s Address:** 626 Esquimalt Rd., No. 5., P.O. Box 7285, Station D., Victoria, BC, V9A 3L4, Canada.

**Date of Introduction:** 1986.

**New Product–Documentation:** Soya Bluebook. 1986. p. 111.

1893. **Product Name:** [Tempeh Sausage].

**Manufacturer’s Name:** De Hobbit.

**Manufacturer’s Address:** Waterstraat 4, B-9980 St. Laureins, Belgium.

**Date of Introduction:** 1986.

**New Product–Documentation:** Soya Bluebook. 1986. p. 92. *Le Compas*. 1986. March-April. No. 26. p. 26-27; Soya Bluebook. 1987. p. 73.

1894. **Product Name:** Protoveg Sizzles [Smokey Bacon Flavour].

**Manufacturer’s Name:** Direct Foods Ltd.

**Manufacturer’s Address:** Petersfield, Hampshire, England.

**Date of Introduction:** 1986.

**Wt/Vol., Packaging, Price:** 175 gm bag.

**New Product–Documentation:** Color photo of package in *Linda McCartney’s Home Cooking*. 1990. p. 18. Upright paper bag. Illustration shows two round patties sizzling in a skillet. “Contains no meat or animal fat.”

1895. **Product Name:** Protoveg 5 Grain Burgamix.

**Manufacturer’s Name:** Direct Foods Ltd.

**Manufacturer’s Address:** Petersfield, Hampshire, England.

**Date of Introduction:** 1986.

**Wt/Vol., Packaging, Price:** Bag.

**How Stored:** Shelf stable.

**New Product–Documentation:** Color photo of package in *Linda McCartney’s Home Cooking*. 1990. p. 18. Upright paper bag. Illustration shows two burger patties in buns. A vegetable mix with blended whole grains. Package is brown and gold on white.

1896. **Product Name:** [Fried Tofu, Tofu with Herbs, Tofu Burgers (With Sea Vegetables, With Seitan)].

**Manufacturer’s Name:** Fonte della Vita S.r.L. (La).

**Manufacturer’s Address:** Via Circonvallazione 87, 12049 Trinita (Cuneo), Italy.

**Date of Introduction:** 1986.

**New Product–Documentation:** Talk with Michael Brenger, production manager at Fonte della Vita. 1990. July 18. These products were introduced after the move to Trinita in April 1986. They are now located in the same place but the address has changed: Via Monviso 18, 12049 Trinita.

1897. **Product Name:** [Tofu Burger, Tofu Felafel, and Tofu Schnitzel].

**Manufacturer’s Name:** Jerusalem Tofu.

**Manufacturer’s Address:** Moshav Orah, Jerusalem 90880, Israel. Phone: 02-413-809.

**Date of Introduction:** 1986.

**New Product–Documentation:** Talk with Susan Ergas.

1989. May 1. The products were introduced in the order shown above. The Tofu Schnitzel was made from frozen tofu, but it was discontinued because she couldn’t get kosher soy sauce that satisfied the rabbi.

# TOFU

# TEMPEH

# SOYSAGE

QUALITY VEGETABLE PROTEIN

BEAN SUPREME • THE PROTEIN SOURCE  
ALL NATURAL

CHOLESTEROL AND LACTOSE FREE LOW SODIUM LOW CALORIES NO PRESERVATIVES

1898. **Product Name:** Soysage. A Spicy Vegetarian Soy Pate.

**Manufacturer's Name:** Local Tofu.

**Manufacturer's Address:** 307 Route 59, West Nyack, NY 10994. Phone: 914-358-2309.

**Date of Introduction:** 1986.

**Ingredients:** Soy pulp and soymilk from farm verified organically grown soybeans, whole cornmeal, whole wheat flour, nutritional yeast, wheat germ, safflower oil, tamari sauce, herbs and spices.

**Wt/Vol., Packaging, Price:** 16 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Sam Weinreb. 1987. Dec. 29. Label. 1987. 3.25 inch diameter. Orange or red and blue. “Mold into non-meat balls, scramble with eggs, slice-heat-eat, pre-cooked, refrigerate or freeze, spread on bread, use in lasagna, sprinkle on pizza.” Sam learned this from a Scotch tofu maker, Sian McLean, in Nova Scotia, Canada.

1899. **Product Name:** Loma Linda Chik-Patties (Meatless Chicken-like Patties).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1986.

**Ingredients:** Soy protein concentrate, soy protein isolate, corn oil, water, wheat gluten, egg whites, potato flakes, artificial flavors, whole wheat flour, salt, natural (vegetable) flavors, dried yeast, dextrose, onion powder, spices, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

Breader: Bleached wheat flour, salt, yeast, sugar, oleoresin paprika, leavening (sodium acid pyrophosphate, monocalcium phosphate, sodium bicarbonate), hydrogenated soy oil, mono & diglycerides, nonfat milk, whey. Batter: Water, corn flour, modified food starch, leavening (sodium acid pyrophosphate and sodium bicarbonate) and spice.

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 1 patty (2.5 oz–71 gm): Calories 190, protein 11 gm, carbohydrate 13 gm, fat 11 gm, cholesterol 0 mg, sodium 540 mg, potassium 150 mg.

**New Product–Documentation:** Bowles. 1987. Total Health. Aug. p. 25.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1986.

1900. **Product Name:** BLT with Fakin' Bacon (Tempeh).

**Manufacturer's Name:** Martha's Sandwiches.

**Manufacturer's Address:** Putney Rd. Brattleboro, VT 05301. Phone: 802-254-4778.

**Date of Introduction:** 1986.

**How Stored:** Unrefrigerated and perishable.

**New Product–Documentation:** Talk with Martha Brown. 1988. Aug. 31. This product was introduced in 1986. The Fakin' Bacon was purchased from Lightlife Foods. She sold the sandwiches only at Llama, Toucan & Crow in Brattleboro, Vermont.

1901. **Product Name:** Café Mexico 2 Shredded Beef & Bean Sanchos [Mild].

**Manufacturer's Name:** Multi-National Food Service.

**Manufacturer's Address:** Marshall, Minnesota 56258.

**Date of Introduction:** 1986.

**Ingredients:** Filling: Beef, refried beans, water, cheddar cheese, tomato paste, textured vegetable protein (soy flour, caramel color), salt, onion, soy protein concentrate, sodium stearoyl lactate, spices, garlic powder, sugar. Tortilla: Enriched flour, water,...

**Wt/Vol., Packaging, Price:** 11.6 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Package with Label sent by Dr. Wolf of Peoria, Illinois. 2000. Aug. 5. Package is copyrighted 1986. On the front panel is a color photo of two rolled tortillas filled with refried beans, cheddar cheese, and shredded beans. “Microwaveable. Keep frozen. Free sunglasses.”

1902. **Product Name:** Tofu Burger (Uncooked).

**Manufacturer's Name:** Natural Alternatives.

**Manufacturer's Address:** 721 T St., N.W., Washington, DC 20001.

**Date of Introduction:** 1986.

**New Product–Documentation:** Talk with Robert Ashton, owner of Natural Alternatives / Promart. 1992. Sept. 14. He introduced this product in 1986, after moving from Alexandria, Virginia, to Washington, DC. The product failed because people did not want a burger that they had to cook themselves; the market wanted a precooked convenience burger.

1903. **Product Name:** Noble Bean Tempeh Chili.

**Manufacturer's Name:** North Coast Tempeh Co.

**Manufacturer's Address:** 18320 Euclid Ave., Cleveland, OH 44112.

**Date of Introduction:** 1986.

**Ingredients:** Tempeh, tomato sauce, kidney beans, water, tomatoes, whole wheat flour, onion, green pepper, tamari, sesame oil, parsley, garlic, spices.

**Wt/Vol., Packaging, Price:** 16 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1987. 4.25 inches diameter, self adhesive. Blue, green, yellow, and red on white, with logo of Jack and the Beanstalk. “No Cholesterol.” Jeff Narten. 1987. “History of North Coast Tempeh and its Products.” 4 p. Dec. 7.

1904. **Product Name:** Tofeata Tofu Burgers, and Patties.  
**Manufacturer's Name:** Regular Tofu Company Ltd.  
**Manufacturer's Address:** Hayhill Industrial Estate, Unit 25, Barrow-Upon-Soar, Leicester, Leicestershire, England.  
**Date of Introduction:** 1986.  
**New Product–Documentation:** Soya Bluebook. 1986. p. 92. Letter from Simon Bailey. 1988. Sept. 28. This company is now owned by Haldane Foods.

1905. **Product Name:** Kokeyal (Imitation Shrimp and Scallops).  
**Manufacturer's Name:** Sopro Products, Inc.  
**Manufacturer's Address:** 111 West Ave., Albion, NY 14411.  
**Date of Introduction:** 1986.  
**New Product–Documentation:** Soya Bluebook. 1986. p. 110.

1906. **Product Name:** Sloppy Mo (Made with 4-Grain Tempeh; Later Renamed Tempeh Sloppy Joe).  
**Manufacturer's Name:** Southwest Soy Foods.  
**Manufacturer's Address:** 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.  
**Date of Introduction:** 1986.  
**Ingredients:** Tempeh (pulp [okara] from organically grown soybeans, rolled oats, bulghur, sunflower seeds, vinegar, *Rhizopus oligosporus* culture), water, wheat, onions, celery, green peppers, tomato paste, molasses, safflower oil, vinegar, herbs, spices, salt.  
**Wt/Vol., Packaging, Price:** 20 oz.  
**How Stored:** Frozen in tofu tubs.  
**New Product–Documentation:** Talk with Richard Jennings of Southwest Soyfoods. 1990. Aug. 2. This tempeh-based version of Sloppy Joe was launched in one flavor in about 1986. Made with the scraps from the tempeh burger, crumbled.

Label for “Tempeh Sloppy Joe” brought by Richard Jennings. 1990. Sept. 20. 3.5 by 3 inches. Self adhesive. Reddish brown on yellow. Illustration of burger-like product between two buns. “Real Fast Foods. All natural ingredients. Heat & serve.”

1907. **Product Name:** Bar-B-Q Tempeh Burgers.  
**Manufacturer's Name:** Southwest Soy Foods.  
**Manufacturer's Address:** 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.  
**Date of Introduction:** 1986.  
**Ingredients:** Tempeh (pulp [okara] from organically grown soybeans, rolled oats, bulghur, sunflower seeds, vinegar, *Rhizopus oligosporus* culture), water, tomato paste, molasses, tamari (water, soybeans, salt), vinegar, safflower oil, herbs, spices, natural smoke flavor.  
**Wt/Vol., Packaging, Price:** 10 oz.  
**How Stored:** Frozen or refrigerated.

**New Product–Documentation:** Talk with Richard Jennings of Southwest Soyfoods. 1990. Aug. 2. This was an unfried, square tempeh burger, launched in about 1986, and marinated in a barbecue sauce. The tempeh was fermented in trays. Richard made a roll with many spikes protruding (sort of like a lawn aerator), which he would roll across the tempeh to perforate it in many places to facilitate absorption of the thick marinade. After being marinated, it was baked, cut, packaged, and frozen. It was introduced at the same time as Sloppy Mo; the broken pieces and scrap tempeh from the burgers were used in the Sloppy Mo/Joe.

1908. **Product Name:** Tofu Savvy products: Boloney, Salsa, Curry, and Spice-Seed.  
**Manufacturer's Name:** VegPro Co.  
**Manufacturer's Address:** Brighton, Massachusetts.  
**Date of Introduction:** 1986.  
**Ingredients:** Incl. tofu.

**New Product–Documentation:** Talk with Johnny Weissman. 1992. March 31. In about 1986, based on the success of his Weissman's Original Tofu Sausage (6 oz), he introduced a new Tofu Savvy line of products (starting with a 3-lb Boloney), each in a 2-3 lb loaf shape like a meatloaf, and sold to delis. He buys his tofu from a tofu maker in Massachusetts. With names like Tofu Salsa Savvy (bulgur and tofu), Curry (with brown rice and veggies), Spice-Seed, and Boloney, these are offshoots of the tofu sausage, but they involve a highly proprietary process that John has developed. Delis sell the sliced loaves for use in sandwiches.

1909. Cross, Doris. 1986. Diet recipes from Doris' kitchen. Published by the author, 1111 West Eskridge, Stillwater, OK 74075. 139 p. Recipe index. 22 cm.

• **Summary:** Two years ago the author lost 100 pounds on Diet Center's Reducing Diet. Since then she has been working as a Diet Center Counselor in Stillwater. This cookbook (which is not vegetarian) contains Mori-Nu Tofu in more than half its recipes. Page 6 contains an endorsement for Mori-Nu Tofu. “All of the recipes in this cookbook were created and tested with Mori-Nu Tofu. I found it to be fresher and lighter in taste and texture than any other tofu I have used.” Tofu is a major ingredient in Non flour zucchini caraway bread, Banana bread, Strawberry cheesecake, Sour cream cake (with “5 oz. Mori-Nu Tofu”), Strawberry cake, Banana-Almond cake, Hawaiian delight, Lemon chiffon dessert, Sloppy Joe dip, Cinnamon apple dip, Taco chicken dip, Yasmine's Malaysian dip, Bacon and horseradish dip, Pineapple and curry dip, Chopped spinach dip, Tofu spread or dip, Tofu potato salad, Quiche, Tofu burgers, Chicken fruit salad, Chicken dumplings, Lemon pie, Strawberry pie, Polynesian pie, Blueberry pie, Raspberry pie, Mocha pie, Berry pie, Summer lemon chicken salad, Tofu pancakes, Tofu ice cream, Pimento spread, Cream of chicken soup, Trout chowder, Egnog. The eighth printing of this book was

April 1988.

Art Mio notes that Sibyl Ferguson, the founder of Diet Center, had a cookbook that contained some tofu recipes. Doris tried some of these and told Art (in her Oklahoman southern accent) that she “had to run to the sink and spit it out.” Address: Stillwater, Oklahoma.

1910. Durston, Diane. 1986. *Old Kyoto: a guide to traditional shops, restaurants, and inns*. Tokyo, San Francisco: Kodansha International. 240 p. Foreword by Donald Richie. Illust. (photos by Lucy Birmingham). Indexes (by type of shop; alphabetical list of shops). 19 cm. [17 ref]

• **Summary:** “A completely revised version of the classic guidebook to Kyoto, with a foreword by Donald Richie. Down the cobbled paths and behind the tranquil noren curtains of Kyoto, the old way of life goes on, nurtured in the restrained furnishings of the traditional inns and in the old shops where fine handmade items still add a touch of quality to life. Since the first edition appeared in 1986, this lovingly written travelogue-cum-guidebook has become de rigueur for knowledgeable travelers seeking to find ‘the real Kyoto.’ With 51 maps and over 120 photos of the living heart of this ancient capital—and a vanishing way of life. Each shop featured in the book is accompanied by a photo showing its front and a map showing its location” (from the publisher).

Tofu is mentioned on pages 9, 30, 53, 55, 116, 121 (Okutan), 123, 147, 158, 193, 201, 234, 239.

Miso is mentioned on pages 53, 100, 123 (dengaku), 147, 179, 213, and 233.

Yuba is mentioned on pages 30, 59, 61, 147, and 234. Natto is mentioned on pages 49, 183, 233, and 239.

*Shōjin ryōri*, the vegetarian [actually vegan] food served in Buddhist temples, was also developed in Kyoto from its prototype, *fucha ryōri*, brought from China by priests. Yuba, uncooked wheat gluten (*nama-fu*), and tofu are all part of *shojin ryori* (p. 30).

Fuka (p. 50-52) is a shop that specializes in making wheat gluten, including *nama-fu*, the chewy variety, that is made from half regular wheat gluten and half glutinous rice flour (*mochi-gome*). Wheat gluten is an important part of the vegetarian diet of Zen monks.

Iriyama Tofu (p. 53-55) makes tofu (*momen-dōfu*) in the traditional way, using nigari as a coagulant. The owners (Mr. and Mrs. Iriyama) are 9th generation tofu makers, working in a 120 year old building. Using a charcoal fire they make grilled tofu (*yaki-dōfu*). They also make deep-fried tofu pouches (*o-age*) and tofu balls (*hiryōzu*).

Note: This is the earliest English-language document seen (April 2013) that contains the term *hiryōzu*; it refers to Kyoto-style deep-fried tofu treasure balls.

Yubahan (p. 59-61) makes yuba in the traditional way using a wood fire and soybeans cooked over an old clay *kamado* stove. “No clocks or timers are involved.” Tomizo

Asana is the 9th generation yuba maker. “Yubahan started making yuba in 1716, but all family records were destroyed in the huge fire of 1864 that destroyed much of the city.”

Takasebune (p. 98-100) specializes in tempura, with a tempura dinner (*tempura teishoku*) including a “generous bowl of miso soup.”

Tamatomi (p. 116-17) offers *teppin-age* (a fry it yourself tempura meal) and oden stew (with tofu).

Okutan (p. 120-23), inside the north gate of famous Nanzen-ji temple, is famous for its tofu cookery. It has served *yudofu* (fresh tofu simmered in a big ceramic pot over a charcoal fire, with a *shoyu* dipping sauce) for 12 generations and 300 years. Side dishes include vegetable tempura and tofu *dengaku*.

Nakamura-ro (p. 136-38) is famous for its tofu *dengaku* (with miso).

Bunnosuke-jaya (p. 142-44) specializes in amazake.

Ikkyū-an (Ikkyū-an, p. 145-47) serves *fucha ryori* (Chinese-style vegetarian temple food, including sesame tofu, tofu *dengaku*). It is named after the famous Zen monk and priest Ikkyū Sōjun {Ikkyū Sojun}).

Takocho (p. 158), 100 years old with 15 seats at the counter, features oden stew with tofu.

Ichiwa (p. 178-80) which makes rice cakes (*mochi*) and *abura mochi* (cakes of glutinous rice flour dough that are charcoal grilled on green bamboo skewers then dipped into a sweet miso sauce).

Isoda (p. 181-83, 41 Shimomonzen-cho, Murasakino, Kita-ku, southeast of Daitoku-ji. Phone: 075-491-7617) is said to be the best and oldest maker of Daitokuji natto in Kyoto; their fermented black soybeans are sold in a small wooden box. After Daitoku-ji “was destroyed in the Onin Wars (1467-77), an eccentric Zen priest named Ikkyū supervised the reconstruction of the temple and became its 47th (and most celebrated) abbot. According to legend it was Ikkyū who introduced the Chinese Buddhist recipe for this compact, high-protein treat” for mendicant Zen monks. The original recipe, which is still used at Isoda, is described. Because warm weather and natural sunlight are necessary, Daitoku-ji natto can only be made during the summer months, most often in August after the rainy season has abated. Even Sen no Rikyu, the famous Japanese tea master, is said to have been an ardent fan of the salty morsels—which are still served with ceremonial tea. Chūgo Isoda, the present owner, is a 17th generation maker of Daitokuji natto. He and his wife work together during the hot summer making the fermented black soybeans. A full-page photo shows Mr. Isoda mixing a shallow tub of the dark fermenting beans. Daitoku-ji natto are also mentioned on page 49.

Nishiki (p. 197-99) is famous for its *kaiseki ryori*. “Every month the ingredients are completely changed to match the season.” One dish is *karashi-dōfu* (“mustard tofu”).

Sagano (p. 201-02) serves simmering tofu (*yudōfu*) in

the bamboo forest just south of Tenryu-ji temple.

The excellent “Glossary” (p. 230-32) includes entries for: Amazake, fu (wheat gluten), kaiseki, miso, mochi, nattô (fermented soybeans), oden, o-hagi, shôjin ryôri, sukiyaki, tofu, yuba, yûdofu. Address: Kyoto, Japan.

1911. Elliot, Rose. 1986. *The vegetarian mother and baby book*. New York, NY: Pantheon Books. vii + 261 p. Index. 24 cm.

• **Summary:** A complete guide to nutrition, health, and diet during pregnancy and after—with easy recipes for mother and baby to enjoy together. The author “is one of England’s most popular cookbook writers, a radio and TV commentator, and a columnist. A vegetarian since the age of three, she is also the author of *Vegetarian Dishes from Around the World* and *The Festive Vegetarian*.” She has also raised three children according to the principles described in this book. Contents: Part I: A vegetarian diet for healthy mothers and babies. Part II: Recipes. Appendix. A. Summary of Nutrients: Where they are and what they do. B. How it all adds up: Analysis of one day’s vegetarian menus. C. Recommended daily dietary allowances for women.

In Part I, the author recommends that if soy milk is used, it should be fortified with riboflavin (vitamin B-2), and calcium. Regular soymilk provides a little (0.5 mg/cup) of zinc. In Part II, soy-related recipes include: Miso pick-me-up (p. 99; with watercress). Tofu dressing (p. 110). Soybean salad (p. 127). Curried soybean and apple spread (p. 137). Soy sausages (p. 159; made with cooked whole soybeans). Soy and walnut loaf (p. 160; made with cooked whole soybeans). Mushroom and tofu quiche (p. 175). Tofu fritters with lemon (p. 186). Creamy tofu and almond topping (p. 203; for use like heavy cream with desserts). Whipped tofu topping (p. 204). Tofu ice cream (p. 218). Vegan yogurt (p. 219; made with soy milk; fermented).

In the Sept/Oct. 1994 issue of *Vegetarian Journal*, Reed Mangels, PhD, RD, an expert on vegetarian nutrition, says that this is her favorite book on pregnancy for vegetarian women.

Note: This is the earliest English-language document seen (Oct. 2013) that contains the term “Whip tofu topping” (regardless of capitalization). Address: England.

1912. Goddard, Susan. 1986. *Focus on soya*. Hove, E. Sussex, England: Wayland (Publishers) Ltd. 48 p. Illust. Index. 21 x 22 cm. Series: Focus on Resources. [3 ref]

• **Summary:** This is a brief introduction to the subject with many color photos. Contents: 1. The importance of soya. 2. The beginnings of soya. 3. Where soya beans are grown. 4. The beginnings of soya processing. 5. The soya plant. 6. Planting. 7. Harvesting. 8. Threshing and storage. 9. At the processing plant. 10. Extracting and refining the oil. 11. Making margarine. 12. Animal feed. 13. Soya protein products. 14. Textured vegetable protein. 15. Other soya

products. 16. The nutritional importance of soya. 18. Soya as a world commodity. 19. The future. Facts and figures. Glossary. Books to read. Sources of further information.

Numerous large color photos show commercial soya products. Page 23: Granny Ann High Fibre Cooked Soya-Bran, Bilsons Fibrefit, Nature’s Way Soya Flour. Page 24: Waitrose Soya Soft Margarine, Prewetts Pure Soya Bean Oil. Page 27: Life All Natural Salad Cream Style Dressing (egg free) [with soya oil].

Page 30: Mapletons Body Bulk (Malt flavoured milk & soya protein drink mix. Make with milk), Healthcrafts Soya Protein Powder (84% protein). Page 31: Cauldron Foods Vegetable Pâté (mushroom flavour), Cauldron Foods Tofu Burgers (nut style, chilli, or vegetable), Direct Foods Protoveg Menu 5 Grain Burgamix, Direct Foods Protoveg Menu Minced Soya & \_\_\_ Mix, Direct Foods Bean \_\_\_ st (Oriental Style), Direct Foods Protoveg Menu Sizzles, Direct Foods Protoveg Menu Sausmix, Direct Foods Protoveg Menu Burgamix, Sunrise 4 Vegetarian Quarterpound Burgers.

Page 33: Direct Foods Mr. Fritz Fry’s Soy Sausage Mix, Granose Vegetarian Goulash, Direct Foods Protoveg (textured soya protein food) Beef Flavour Chunks. Page 34: Duchesse All-Natural Tofu Dressing & Dip, Amoy Light Soya Sauce, Witte Wonder Organic Tofu Spread (with paprika), Morinaga Ever-Fresh Silken Tofu. Page 35: Plamil Soya Milk Rice Pudding, Provamel Soya Dessert (vanilla [made by Alpro in Belgium]), Sunrise Soya Milk (500 ml, sugar-free, or sweetened with raw cane sugar).

1913. Hunt, Janet. 1986. *The compassionate gourmet: The best of international vegan cuisine*. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 160 p. Illust. Index. 22 cm.

• **Summary:** An excellent vegan cookbook, written for animal lovers. Soy-related recipes include: Avocado tofu pâté (p. 31). Celery miso pâté (p. 36). French bean salad with tofu dressing (p. 66). Tofu curry (Thailand; p. 74). Tofu and vegetable pakora (p. 86). Tofu layered casserole (p. 96). Tomato flan with tofu (p. 104). Tofu Lemon flan (p. 137). Yogurt dessert (made with cultured soya milk, p. 140). Rhubarb fool (dessert in soya milk, p. 141). Maple pancakes (with soya flour, p. 149). Walnut tofu balls (p. 156).

At least one recipe uses Holbrook’s Worcester Sauce—a Worcestershire-type sauce without animal products. Many recipes call for soy sauce or soya milk, and some for canned soy or nut “sausage.” Page 9 lists a number of special ingredients including Direct Foods Protoveg (soya “meat”), Infinity Foods (distributors [in Brighton, at Sussex University]) Soya mayonnaise, Lotus Foods TVP (soya “meats” in a varieties of forms and flavors), Plamil concentrated soya milk (use diluted as a milk, undiluted as a cream), and Tomor Margarine (the author’s favorite of the many vegan margarines now available in the UK). In

all recipes, each ingredient is listed twice in side-by-side columns: once in its Imperial (metric) form and once in its American form, e.g. 385 ml soya milk, 1 1/3 cup soya milk. A number of recipes call for the use of alcohol (whiskey, brandy, etc.). The author has written at least 14 other books on vegetarian or wholefood cookery. Address: England.

1914. Kondo, Sonoko; Stoumen, Lou. 1986. The poetical pursuit of food: Japanese recipes for American cooks. New York, NY: Clarkson N. Potter. 296 p. Illust. by Etienne Delessert. Index. 25 cm.

• **Summary:** A very artistic, attractive, and authentic book with superb (imaginative and lyrical) illustrations. The section titled “Staple foods you will need” (p. 17-20) discusses soy sauce, konbu and nori seaweeds, sesame seed paste (*atari-goma*; “Most Americans may be more familiar with the Middle Eastern version called tahini paste... Used in making salad dressings and dips”), miso, and sesame seeds. Soy-related recipes include: Grilled tofu with miso (Dengaku; p. 37). Sesame tofu (p. 38; no soy). Tuna sashimi and green onions with miso (p. 40). Daikon radish with lemon miso (p. 42). Cauliflower florets with miso (p. 42). Basic miso soup (p. 51). Clam miso soup (p. 51). Daikon radish miso soup (p. 52). Vegetable and chicken miso soup (p. 52). Tofu and wakame seaweed suimono (p. 53). Fried rice with tofu and vegetables (p. 89).

Chapter 7, titled “Tofu & egg dishes” includes (p. 103-17): Tofu in Kamakura. Description of different types of tofu: Silken, firm, grilled, pouches, deep-fried, fritters (*ganmodoki*), freeze-dried (*koya-dofu*), how to press tofu. Chilled tofu with ginger sauce. Braised koya-dofu with pea pods. Cold-day tofu. Vegetarian “chicken” tofu (with frozen tofu). Dragon’s head (*hiryoze*). Tofu from the sea (*Kenchin-mushi*). Tofu gratinée. Stuffed tofu. Scrambled tofu. Tofu treasure bags. Vegetarian “burger.” Egg tofu delight (*tamago-dofu*; no soy).

Beans for breakfast (*natto*; p. 125). Braised konbu seaweed, soybeans, and konnyaku (p. 128). Hijiki seaweed with tofu (p. 129). Stuffed tofu sushi (*Inari-zushi*; p. 157). Snapper tempura with asparagus and miso (p. 174). Marinated cod in miso sauce (p. 179). Seaweed, chicken, and vegetables with creamy miso (p. 185). Steak miso (p. 190). Sukiyaki (p. 206). Shabu shabu (p. 208). Vegetarian nabe (with tofu, p. 211). Sea and mountain (with miso sauce, p. 212-23). Winter nabe (with tofu, p. 214). Udon-suki (with tofu, p. 216). Tofu apple cake (p. 244). Chapter 15 (p. 260-71) is menu plans, by season and time of day.

The glossary (p. 272-82) includes: Agar-agar, azuki beans, konbu seaweed, kuzu, miso paste, nori seaweed, rice cakes (*mochi*), sesame seed oil, sesame seeds, soybeans—fermented (*natto*), soy sauce, tofu, tonkatsu sauce (with dark soy sauce), wakame seaweed. Address: Los Angeles, California.

1915. Ludlow, Rose Budd. 1986. Total health and food power: Principles of healthful living and outstanding vegetarian recipes from Glendale Adventist Medical Center. Santa Barbara, California: Woodbridge Press. 239 p. Illust. Recipe index. 23 cm.

• **Summary:** Section 1 of this book consists of 18 chapters on Seventh-day Adventist principles of healthful living. Part 2 contains more than 200 vegetarian recipes from the Glendale Adventist Health and Medical Center. Soy-related recipes include: Soybean waffles (p. 118). Corn chowder with imitation Baco-Bits (p. 127). Lemon juice-soy mayonnaise (with soy milk powder, p. 149). Gado-gado salad (with fried tofu, p. 165). Tofu salad deluxe (p. 171). Chinese-style sautéed tofu (p. 185). Fried tofu patties with eggs and vegetables (p. 192). Leafy Chinese tofu (p. 196). Soy-cheese patties (with tofu, p. 206). Soy-cheese scallops (p. 207). Tofu balls or cutlets (p. 210). Tofu balls with tartar sauce (p. 210). Tofu with mushroom sauce (p. 211). Tofu and brown rice casserole (p. 212).

Many recipes also use meatlike products made by Seventh-day Adventist food companies; a list is given on p. 174. These include Soyameat (p. 162), Meatless Chicken (p. 167), Nuteena (p. 200, 213), Vege-Burger (p. 211, 214). Address: Consulting Dietitian, Formerly, Director of Dietary Service, Glendale Adventist Medical Center, Glendale, California.

1916. Madison College Alumni Association. 1986. A pictorial history of Madison College, a school of divine origin 1904-1964. Madison, Tennessee. viii + 269 p. Illust. 28 cm.

• **Summary:** Several articles about Madison from other publications (e.g. Hastings 1938; Holman 1941) are reprinted in this book. Pages 42 gives a history of “The Madison Food Factory.” There are photos of the outside and inside of the building on pages 43 and 46. “In a letter dated March 10, 1907, directed to the directors of the Nashville Sanitarium and Southern Union Conference Committee, Ellen G. White wrote: ‘It would be a great advantage to the school in Madison if a food factory were put into operation in connection with the work of the school.’

“About this same year a large flakefood factory was built at Edgefield, near what is now known as Edenwold. The people of the South had not yet become conditioned to the eating of health foods; so the factory became a white elephant on the hands of the owners. It passed from hand to hand without success. [One of the operators was Jethro Kloss.] After much discussion on the part of the school faculty a decision was made to purchase the plant, dismantle it and bring it to Madison. It was opened in 1918. The plan was to begin in a small way and to educate the workers, step by step, in the new industry. Mr. and Mrs. Andrew Wheeler were in charge of the work, under the direction of Mrs. Druillard, who had had years of experience in other

institutions.

“The purpose of the Food Factory was to produce foods that would be suitable substitutes for meat in the dietary of the vegetarian and others whose health required the elimination of animal products. Consequently most of the foods manufactured were rich in protein. The foods were made from such products as soy beans, peanuts, and gluten. Some of the trade names developed were Zoyburger, Yum, Mock Chicken, Nu-Steak, Not-Meat, Vigoroast, and Ches-O-Soy. A cereal substitute for coffee was Zoy-Koff.

“Some of the men who played an important part in the later growth and development of the food factory were Joe Hansen, C.H. Dye, T.A. McFarland, Captain Calvin Bush, Edwin Bisalski, George Norris, Leslie Brooks, John Brownlee, H.M. Mathews and Frank Holland. Of this group, H.M. Mathews and John Brownlee played a very important part in experimentation and development of the foods. Dr. P.A. Webber and Ulma Doyle Register did outstanding work in research to develop better texture, more palatability, and greater nutritional value. Mr. E.M. Bisalski was outstanding in the experimentation and development of the foods. During his term as manager of the Factory, great expansion took place. A practically new plant, with one section four stories in height was constructed in 1941. Car loads of products were shipped to jobbers in Chicago, Boston, New York, and other large distributing centers until Madison products were found in all states and Canada.

“In August of 1964 Madison Foods was sold to Worthington Foods, Inc. Worthington, Ohio. The same products that had been produced in the past were continued to be available under the Madison label and brand names used in the past. Mr. K.P. Stepanske was appointed manager. The food factory was operated on the Madison Campus until 1972 when it was moved to Worthington, Ohio (p. 42).

Elder Julius Gilbert White, a nationally-known health lecturer, came to Madison and delivered a 10-day series of lectures on health, with the use of illustrated slides. This led to the development of many health institutes and short courses at Madison from 1932-1940 (p. 44).

“Vegetarian Cafeterias: Another type of health work carried on by the Madison school was the operation of a treatment room and vegetarian cafeteria in Nashville. Workers drove back and forth each day from the school to Nashville. It was started in rented quarters in 1917. In 1922, because of advancing rents, a new building was constructed on a permanent location at 151 Sixth Ave. North. A successful work continued for over a decade. Advancing trend of business in the center of the city made the location undesirable and the business closed out and the building was sold. The Birmingham [Alabama] cafeteria was started in 1920. An eighty-seven acre farm purchased as a rural base supplied vegetables and farm produce.

“In 1920 the Louisville treatment rooms were making good progress and opened a cafeteria.

“In December of 1920 a group of workers opened a city cafeteria in the cities of Knoxville, Memphis, and Chattanooga. These were among the early beginnings of this type of work in our denomination.” A photo shows the Vegetarian Cafeteria and Treatment Rooms, 151 6th Ave., Nashville, Tennessee (p. 45).

There are photos of each graduating class. Pages 126-173 are biographical sketches, usually with a photo, of Madison “Personalities,” including E.A. Sutherland, Bessie DeGraw Sutherland, Percy Magan, Nellie Druillard, Frances L. Dittes (1891-1979) and her sister Florence, Dr. Ulma Doyle Register, Dorothy Mathews, William Cruzen Sandborn, and Mable H. Towery.

A sample student menu is given (p. 265). Breakfast includes “Fried Soyburger,” and dinner includes “Soyburger Patties.” “At the noon and evening meals toasted Soyburger sandwiches, chocolate soy milk, and soy buttermilk are always available.” Cow’s milk is also available at all 3 meals. Address: Madison, Tennessee.

1917. McDougall, Mary A. 1986. The McDougall health-supporting cookbook. Vol. 2. Piscataway, New Jersey: New Century Publishers. iii + 157 p. Index. 23 cm.

• **Summary:** This is a vegan cookbook whose 250 original recipes are designed to support The McDougall Plan, which is a diet low in fat and sodium, high in complex carbohydrates. Since soyfoods are relatively high in fat, they are used sparingly and the recipes are marked by a symbol of a crown. Low sodium soy sauce is used in many recipes. Soy-related recipes include: Scrambled tofu (p. 2-3). Tofu salad dressing (p. 7-8). Dijon tofu dip (p. 9). Onion soup dip (with tofu, p. 9). Dilly tofu dip (p. 9-10). Miso soup (p. 39). Creamed tofu soup (p. 41). Tempeh Creole (p. 62-63). Rice-tofu stuffing mix (p. 88). Tempeh and grain casserole (p. 91). Tofu loaf (p. 96-97). Baked tofu cubes (p. 97-98). Spinach-tofu burgers (p. 99-100). Where’s the meat loaf? (with tofu, p. 101-02). Oat burgers (with tofu, p. 102-03). TVP stuffing mix (p. 109). Okara cookies (p. 126). Tofu banana pudding (p. 132). The section titled “Update on ingredients” (p. 133-35) includes a description of: Worcestershire sauce (Sharwood’s—natural and without anchovies), umeboshi plum sauce, tamari or soy sauce, okara, tempeh, kombu, and tahini. A portrait photo on the rear cover shows Mary McDougall.

Note: Not long after this book was published, New Century Publishers changed its name to New Win Publishing, Inc. and moved to Clinton, New Jersey. As of 2000 this book is published by Putnam/Penguin. Address: P.O. 14039, Santa Rosa, California 95402.

1918. Satchidananda, Sri Swami. 1986. The healthy vegetarian. Yogaville, Virginia: Integral Yoga Publications. viii + 115 p. Foreword by Dean Ornish, M.D. No index. 22 cm. [48 ref]

• **Summary:** With a special section on getting started by

Sandra McLanahan and Swami Premananda Ma. Tofu appears in this book on 14 pages (p. 67, 68, 71, 75, 77, 83, 86, 87, 89, 91, 96, 100, 108-09), tamari on 7 pages (p. 83, 87, 90-92, 93, 100), tempeh on 4 pages (p. 67, 68, 71, 109), Soyarella on 3 pages (p. 68, 90, 101), soybeans on 2 pages (p. 70, 71), soy sauce on 1 page (p. 71), “soy ice cream” on 1 page (p. 82), “soy cheese” on 1 page (p. 71).

The section on “Helpful hints for vegetarians,” by Swami Premananda Ma, has two subsections, each containing a table with two columns: The 1st, which notes that many companies now make “imitation meat” products, has (1) Non-vegetarian. (2) Vegetarian alternative. For example: “sausage–soy links.

“bacon–soy strips.

“luncheon meats–tofu or tempeh in slices that are so similar in consistency, shape, flavor, and packaging to bologna, salami, etc.

“egg salad–tofu spreads.

“hamburgers–soy, nut and tempeh burgers either in mixes or frozen.

“chicken–tofu sliced, wrapped in cellophane and frozen.” Later defrost in a bowl of boiling water. Taste and texture are similar to chicken.

The 2nd titled “And if you’re trying to cut down on dairy, fats and cholesterol” (p. 68): (1) Dairy [product]. (2) Non-dairy alternative. For example. “cheese–soyarella cheese that melts like mozzarella.

“ice cream–tofu, soy or rice ‘ice creams’ that look and taste like the real thing.

“milk–soy milk (plain or flavored–malted is very nice).

“butter–soy margarine.

“ricotta cheese–tofu adapts as a perfect substitute in fillings for lasagne and casseroles.

“cream cheese–tofu blended until creamy works beautifully for cheesecake and other dessert recipes.”

On the rear cover an excellent photo shows Sri Swami Satchidananda, “a beautiful example of dynamic health. He is a lifelong vegetarian and a world renowned spiritual teacher...” He is now in his 70s.

1919. Stidham, Martin. 1986. The fragrant vegetable: Simple vegetarian delicacies from the Chinese. Los Angeles, California: Jeremy P. Tarcher, Inc. x + 224 p. Illust. Index. 24 cm.

• **Summary:** Chapter 3 (p. 57-84), titled “‘Meat without bones’–Tofu,” contains 3 preparatory techniques and 16 recipes. Chapter 4 (p. 85-98), titled “More ‘meat without bones’–Pressed tofu,” contains two basic recipes for pressed and spiced pressed tofu plus 9 additional recipes. “The highly odiferous ‘stinking’ tofu (*chou doufu*) is made by fermenting tofu or pressed tofu, or allowing it to grow moldy, then deep-frying it. Usually eaten with a hot sauce, this is available at movable carts...” (p. 58).

“The dense cakes are fermented to become tofu ‘cheese’

(see Chapter 1) as well as ‘stinking’ tofu...”

Chapter 5 (p. 99-126) titled “‘Duck,’ ‘chicken,’ and other specialties,” first discusses the basic ingredients in making these traditional meatlike products (Bean curd sheet [pressed tofu sheets], bean curd skin [yuba], and bean curd sheet noodles), then gives numerous recipes, many containing soy. Chapters on fried gluten, soups, and fruit and nut desserts follow. Soy sauce, “green soybeans” [green vegetable soybeans], soymilk, soy sprouts, and soy-pickled cucumbers are also mentioned.

The author, a graduate of Northwestern University, lived in East Asia for over 10 years, first as a student at National Taiwan Univ. in the Graduate Inst. of Chinese Literature, and later as a translator of short stories, poetry, and novels. “A long-standing interest in the cuisines of the region, especially vegetarian, has taken him into home, restaurant, and temple kitchens. He has studied privately with instructors from the area’s well-known cooking schools, including Wei-Chuan and Pei Mei’s, besides being tutored in special techniques by tofu makers and manufacturers of other Chinese specialty food items.”

1920. Takahashi, Kuwako. 1986. The joy of Japanese cooking. Tokyo: Shufunotomo Company, Ltd. 311 p. Illust. (some color photos). Index. 27 cm.

• **Summary:** An excellent book with especially good descriptions of Japanese ingredients. Contents: Dedication. Foreword. Introduction. Part I. Japanese ingredients. Seasonings in Japanese cooking. Utensils and equipment. Tableware. Measurements and equivalents. Basic techniques: Making soup stock (*dashi*), cooking rice, preparing fish, boning chicken, cutting vegetables, broiling, poaching, steaming.

Part II. Seafood. Chicken. Eggs. Beef. Pork. *Tofu* (bean curd). Vegetables, dried and manufactured foods.

Part III. Appetizers (*zensai*). Soups. Salads (*aemono*). Casseroles (*nabemono*). Rice. Pickles. Desserts and Japanese sweets.

Part IV. Menu planning. Sample menus with preparation schedules. Part V. Making tea. Serving sake.

A color photo (p. 15) shows six different soyfoods made from soymilk: 1. Deep-fried soybean puffs (*age* or *aburage*). 2. Fried tofu cutlet (*atsu-age* or *nama-age*). 3. Tofu patties (*ganmodoki*). 4. Soymilk film, dried (*yuba*). 5. Bean curd cake (*tofu*). 6. Freeze-dried tofu (*Kôya dofu*).

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *Kôya dofu* to refer to dried-frozen tofu.

The section titled “Japanese ingredients” (a superb glossary, with many entries accompanied by an illustration {line drawing}, p. 17-32) includes: Bean curd cake (*tofu*), incl. regular tofu (*momen dofu*), soft tofu (*kinugoshi dofu*), Ever-Fresh Silken Tofu (aseptically packaged), instant tofu, firm tofu (Chinese style). Tofu products: Deep-fried soybean

puffs (*agé* or *aburage*), fried tofu cutlet (*atsu agé* or *name agé*), freeze-dried tofu (*Kôya dofu*), grilled tofu (*yaki dofu*), tofu patties (*ganmodoki*). Beans: Red beans, dried (*azuki*), soybeans, dried (*daizu*), soybeans, fresh (*eda mamé*). Bean pastes: Bean paste, fermented (*miso*), sweet bean paste (*azuki an*). Soymilk film, dried (*yuba*). Soy sauce (*shoyu*).

The glossary also discusses: Horseradish, Japanese (*wasabi*), konnyaku, kombu, umeboshi, kabocha, daikon (4 forms), glutinous rice (*mochi gome*), red bean rice (*sekihan*), pounded rice cake (*mochi*), rice wine lees (*sakekasu*), rice wine lees pickles (*narazuke*), perilla (*shiso*), seaweeds (*hijiki*, *nori*, *yakinori*, *small sized nori*, *wakame*, *ao nori*), sesame seeds (*goma*), sweet rice wine for cooking (*mirin*), wheat gluten cake (*fu*, incl. *nama fu*, *yaki fu*, and *matsutake fu*).

The section titled “Seasonings in Japanese cooking (another superb glossary, p. 33-37) discusses: Soy sauce, incl. Regular soy sauce (*koikuchi shôyu*), light soy sauce (*usukuchi shôyu*), tamari soy sauce (darker and thicker, made from fermented soybean and brine in the Nagoya area. “It is not saltier than regular soy sauce but has a richer flavor, thicker taste, and some people prefer tamari as the dipping sauce for sashimi... Note 2. In the USA the name ‘tamari’ is mistakenly used for natural soy sauce which is not tamari”), white soy sauce (*shiro shôyu*), milder soy sauce (contains less salt). A table showing the nutritional composition of five different types of Japanese soy sauce is given. Combinations of soy sauce and mirin: Teriyaki. Miso (incl. *kome miso*, *mugi miso*, *mame miso*, mixing of miso types).

Use the good index to see how each of the ingredients mentioned above are used in recipes.

A good biography of the author is appears in the Foreword and on the inside rear dust jacket (with portrait photo). The author was also very active in introducing ikebana (Japanese flower arranging) to the Bay Area and the USA. Address: Japan and Berkeley, California.

1921. Tofu Shop Specialty Foods Company (The). 1986. Price list. Arcata, California. 1 p. Single sided.

• **Summary:** At the top left is an illustration of a dragon in a circle. At the top right is an illustration of a tofu shop on stilts on a cliff by the ocean, with a tree arching over the top—all in a diamond. “Fresh prepared natural foods since 1977.”

The Tofu Shop now makes 39 products in seven categories: (1) Tofu, organic nigari: 14 oz water-pac, bulk pounds, bucket deposit. (2) Soymilk, organic: Natural unflavored (pint, quart, half gallon, or gallon), vanilla-maple (1/3 quart or quart), carob-barley (1/3 quart or quart). (3) Cold cuts, pre-baked: Tofu-vegie patty tray (3), 10 oz, tofu-vegie patty bulk (12 minimum). Marinated tofu cutlet tray (5), 8 oz, marinated tofu cutlet bulk (12 min). Tofu sausage patty tray (6), 8 oz tofu sausage patty bulk (12 min). (4) Combo’s: Tofu-cutlets ‘n rice, 8 oz. Tofu-sausage ‘n pasta, 8 oz.

(5) Deli salads: Eggless-tofu (5 oz or 2 quart). Potato-

tofu (5 oz or 2 quart). Tahini-tofu (5 oz or 2 quart). Corn pasta primavera (4 oz or 2 quart). Brown rice ‘n vegies (4 oz or 2 quart). Sea palm & bean sprout (4 oz or 2 quart). Tabouli (4 oz or 2 qt).

(6) Desserts: Cocoa-carob mousse, 5 oz. Maple-almond charlotte, 5 oz. Pina colada pie (6 oz or 9 inch). Pumpkin pie (6 oz or 9 inch). Address: 768 18th St., Arcata, California 95521. Phone: (707) 822 7409.

1922. Tsuji, Shizuo; Hata, Koichiro. 1986. Practical Japanese cooking: Easy and elegant. Tokyo, New York & San Francisco: Kodansha International. 151 p. Illust. (color photos by Yoshikatsu Saeki). Index. 31 cm.

• **Summary:** A beautiful, elegant book. M.F.K. Fisher says of this book (rear dust jacket): “The recipes are clear and easy to follow, and the illustrations are especially delightful, truly top high-style Japanese simplicity. Messrs. Tsuji and Hata have given us the best of the old and the new.”

The Preface, by Shizuo Tsuji (born in 1948) notes that the many-faceted Japanese “cooking tradition relies heavily on two primary ingredients—delicate bonito stock (*dashi*) and, not unexpectedly, soy sauce. Most, if not all, dishes call for one or both.” The recipes generally call for either “dark soy sauce” [*koikuchi*] or “light soy sauce” [*usukuchi*].

Soy related: Squid and asparagus with mustard miso sauce (... *karashi su miso ae*, with “5 Tbsps nonsweet white miso paste,” p. 19). Tofu, pork, and vegetable soup (*Kenchin jiru*, with “1 block regular {‘cotton’} tofu, about 10 oz {300 gm}, p. 24). Pureed corn soup (with “2 Tbsps nonsweet white miso paste,” p. 24). Miso soup with pork and vegetables (*Buta jiru*, p. 25). Yellowtail teriyaki (*Buri teriyaki*, p. 35). Simmered mackerel in miso (*Saba miso-ni*, p. 37). Tofu as a possible ingredient (p. 38). Deep-fried trout in vegetable sauce (Tofu can be added to the sauce to give the dish more volume, or tofu can easily be substituted for the trout, p. 39). Stuffed spiny lobster (“In place of egg, softened miso can be used in the filling,” p. 40-41). Squid teriyaki (*Ika teriyaki*; the teriyaki sauce includes mirin, sake, dark soy sauce, and tamari soy sauce, p. 44). Shrimp and leeks with mustard-miso sauce (... *karashi-su-miso kake*, p. 48). Grilled beef (with tamari soy sauce in Lemon-soy dipping sauce {Ponzu}, and dark soy sauce in sesame dipping sauce, p. 50-51). Grilled beef with miso (*Gyuniku miso-yaki*, with “4 Tbsps Red Miso Sauce {p. 85},” p. 54). Nagasaki-style braised pork (*Buta kaku-ni*, with “1 cup {250 gm} unpacked okara {tofu pulp} or milk, optional,” p. 58).

The section titled “Tofu” includes: Simmered tofu (*Yudofu*, with “2 blocks tofu, about 20 oz {600 gm} total,” p. 71). Night-dried tofu with chicken sauce (*Ichiya-dofu tori soboro ankake*; regular tofu is allowed to freeze overnight to give it a different texture, p. 72). Simmered tofu dumplings (*Ganmodoki uma-ni*, p. 73-74). Deep-fried tofu (*Agedashi-dofu*, p. 75). Scrambled tofu (*Iri-dofu*, p. 76). White salad (*Shira-ae*, p. 77). Tofu sandwiches (*Tofu hakata-ni*, p. 78-

79). Tofu hamburger steak (with miso, p. 80). Freeze-dried tofu with egg (*Koya-dofu tama-jime*, p. 81).

Grilled eggplant (*Taki-nasu*, with Soy-ginger sauce, p. 84). Deep-fried eggplant with miso sauce (*Nasu dengaku*, with Red Miso Sauce, p. 85). Turnip with ginger-miso sauce (*Furo-fuki kabura*, with 1 cup Red Miso Sauce, p. 88). Chinese cabbage and deep-fried tofu (*Hakusai usuage uma-ni*, with “4 pieces thin deep-fried tofu {*usuage*}, about 3 oz (80 gm) total,” p. 90). Deep-fried and simmered acorn squash (*Eikon sukasshu no age-ni*, with “2 blocks thick deep-fried tofu {*atsuage*}, about 5 oz {150 gm} total,” p. 93). Simmered soybeans (*Nimame*, with “1 cup {120 gm} dried soybeans;” “The real secret... is to allow the beans a long pre-soak before beginning to cook,” p. 94). Vegetables with white sesame dressing (*Goshiki yasai gomashirasu-ae*, with 1 block regular tofu, p. 96). Mixed rice (*Kayaku gohan*, has “thin deep-fried tofu” as an alternative ingredient, p. 100). Scattered sushi (*Bara sushi*, with “1 cake freeze-dried tofu {*Koya-dofu*}, about ½ oz {15 gm},” and “2 Tbsp dark soy sauce,” p. 106-07). Thick roll sushi (*Futo-maki-zushi*, with “2 cakes freeze-dried tofu {*Koya-dofu*}, about 1 oz {30 gm} total,” p. 113). Inari sushi (*Inari-zushi*, with “10 pieces thin deep-fried tofu {*usuage*}, each about 3 inches {8 cm} square, p. 114-15). Udon noodles with deep-fried tofu (*Kitsune udon*, with 4 pieces thin deep-fried tofu, p. 120). Sukiyaki (“... actually only appeared on the horizon of Japanese cuisine some one hundred years ago,” with “½ block regular {‘cotton’} tofu,” p. 122-23). Oden stew (*Oden nabe*, with “4 blocks thick deep-fried tofu,” p. 124-25). Seafood pot (*Yose nabe*, with 1 block regular tofu,” p. 126-27). Deep-fried mixed kebabs (*Kushi-katsu*, with 1/3 cup Worcestershire sauce in the Dipping sauce, p. 132-33).

The section titled “Ingredients” (p. 144-49) has a photo and excellent description for each entry, including: Ginger (fresh). Ginger (red vinegared). Ginger (sweet vinegared). Green seaweed flakes (*ao-nori*). Hot yellow mustard (*karashi*). Kelp (*konbu*). Kelp (salted) (*shio-konbu*). Mirin. Miso paste (Sweet white miso, nonsweet white miso, red miso). Nori seaweed. Pickled plums (*umeboshi*). Rice cakes (*mochi*). Rice vinegar. Saké. Sesame seeds (white, black, or brown). Seven-spice pepper. Shiitake mushrooms. Shiso leaves. Soba noodles. Somen noodles. Soybeans (fresh young) (*edamame*). Soy sauce (dark, light, tamari). Tofu (freeze-dried) (*Koya-dofu*, *kori-dofu*, or *shimi-dofu*). Tofu (fresh). Tofu (thick deep-fried). Tofu (thin deep-fried). Udon noodles. Wakame seaweed. Wasabi horseradish (“has a tingling hotness that goes straight to the nose”).

About the authors (inside rear dust jacket, with small color portrait photos of each): “Shizuo Tsuji is president of the Ecole Technique Hôtelière Tsuji, the largest culinary school in Japan. It comprises three divisions, whose total enrollment currently exceeds three thousand. At the main school, which offers intensive courses in Japanese, French, Italian, and Chinese cooking, aspiring chefs receive the

training necessary to become professionals. At the Ecole Supérieure de Pâtisserie Tsuji students may perfect their confectionery techniques. The Centre de Perfectionnement in Liergues, France, accepts those desirous of completing their education with firsthand experience in Europe.” All classes are conducted in Japanese. He is author of the classic book *Japanese Cooking: A Simple Art* (1980, in English). Address: Tsuji Professional Culinary Inst., Osaka, Japan.

1923. **Product Name:** BPH Foods Soya Mixes (Biryani, Chicken Mutton, Curry, or Qormah).

**Manufacturer’s Name:** Bangalore Pickle House.

**Manufacturer’s Address:** P.O. Box 3219, Bangalore 560 032, India.

**Date of Introduction:** 1986?

**New Product–Documentation:** On back of label for Soya Bean Soup: “Try our other Soya products.”

1924. **Product Name:** [Meatless Tempeh Meatballs].

**Foreign Name:** Tempeh-Bulletten.

**Manufacturer’s Name:** Morgenland Pflanzenkost.

**Manufacturer’s Address:** Kurze Strasse 1, D-3406 Lengler, West Germany.

**Date of Introduction:** 1986?

**New Product–Documentation:** Manufacturer’s catalog. 1987. Kleine Warenkunde. Yellow. 4 pages. Describes each of the 13 soyfood products. “Tempeh is an Indonesian specialty soyfood that is fermented with a special mold culture. Easily digested and rich in protein and vitamin B, tempeh enables you to conjure up the most interesting recipes. Tempeh Buletten are made with rice, whole wheat flour, vegetables, sunflowerseeds, and exotic seasonings. Sold 2 per pack.”

1925. **Product Name:** [Tofu Meatballs].

**Foreign Name:** Tofuletten.

**Manufacturer’s Name:** Morgenland Pflanzenkost.

**Manufacturer’s Address:** Kurze Strasse 1, D-3406 Lengler, West Germany.

**Date of Introduction:** 1986?

**New Product–Documentation:** Manufacturer’s catalog. 1987. Kleine Warenkunde. Yellow. 4 pages. Describes each of the 13 soyfood products. In German a “Bulette” is a meatball, or rissole. These are made from tofu, soy bran (okara?), rice, whole wheat grits, vegetables, herbs, and seasonings. Sold in packs of 6.

1926. **Product Name:** Firm Tofu, Tofuburger, Tofu Pasty, Okara Bread.

**Manufacturer’s Name:** Soyfoods Ltd.

**Manufacturer’s Address:** Wheathampstead House, The Old Brewery, St. Albans, Herts. AL4 8DS, England. Phone: 0664-60572.

**Date of Introduction:** 1986?

**New Product–Documentation:** Letter from Simon Bailey. 1988. Oct. 10. Paul Jones has moved from his Wheathampstead House address to 66 Snow Hill, Melton Mowbray, Leicestershire, LE13 1PD, England. Same phone. He doesn't make tempeh. But he now makes Firm & Soft Tofu, Tofuburger, Tofu Pasty, and Okara Bread.

Talk with David de Korsak. 1990. Jan. 31. David, a Frenchman, worked for this company in England from Oct-Dec. 1987 and May-June 1989. The first time he made tofu and the second time he made okara bread and burgers. They also made a seasonal Christmas Cake with tofu. The company moved to Melton Mowbray in about 1985. It sells to about 80-85 retail outlets in London. The company is very small. Paul and his wife and one driver are the only full-time employees.

1927. **Product Name:** [Tofu Burgers].

**Foreign Name:** Tofuburgers.

**Manufacturer's Name:** Svadesha R. Urban.

**Manufacturer's Address:** Ostpreussenstr. 22, D-8000 Munich 81, West Germany. Phone: 089 / 93 90 05.

**Date of Introduction:** 1986?

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Svadesha R. Urban. 1990. June 13. This product was introduced after he moved to Ostpreussenstr. 22.

1928. **Product Name:** Vegetarian Nature's Patties Burger with Tofu [Original, or BBQ].

**Manufacturer's Name:** Nature's Path.

**Manufacturer's Address:** 9451 Van Horne Way, Richmond, BC, V6X 1W2 Canada. Phone: 604-278-4584.

**Date of Introduction:** 1987 January.

**Ingredients:** Tofu (organic soybeans, nigari, water), soya protein, sunflower seeds, brown rice, potato, rolled oats, sesame seeds, walnuts, gluten, tomato, onion, pimento, carrots, peppers, celery, sunflower oil, Engevita nutritional yeast, herbs and spices, tamari soy sauce, psyllium seed, molasses, dijon mustard.

**Wt/Vol., Packaging, Price:** Family size 10 x 3.3 oz patties, or 4 x 3 oz patties. Each is a plastic bag.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm: Calories 236, protein 17.4 gm, carbohydrate 22.9 gm, fat 12.0 gm, sodium 185 mg, potassium 185 mg, fiber 1.5 gm.

**New Product–Documentation:** See next page. Leaflet. 1987, undated. 8½ by 11 inches, color. "Nature's Path Vegetarian Nature's Patties with Tofu. Contains no animal fats, eggs, dairy products, nitrates, or cholesterol. Succulent non-meat patties. 17% protein."

Spot in Soya Newsletter. 1987. 1(4):6. "Made with tofu (17%) and a wide selection of grains and vegetables. Contains no egg or dairy products."

Label. 1988. 10 by 5.5 inches. Plastic bag. Red, black,

and blue on white with color photo of burger and vegetables.

Letter from Rick Furdal, manager. 1988. April 4. They have moved to #170-2540 Simpson Rd., Richmond, BC V6X 2P9. Their restaurant, Woodlands Natural Foods, 2582 West Broadway, Vancouver, BC V6K 2G1 (Phone: 604-733-5411) makes over 100 fresh soyfoods recipes on a rotational basis.

1929. **Product Name:** Organic Tofu Burgers.

**Manufacturer's Name:** Oasis Wholefoods.

**Manufacturer's Address:** Unit 3C, Dart Complex, Steamer Quay Rd., Totnes, South Devon, England.

**Date of Introduction:** 1987 January.

**Ingredients:** Organic brown rice, tofu, carrots, onions, sunflower seeds, okara, garlic, shoyu, sea salt, vegetable oil, spices.

**Wt/Vol., Packaging, Price:** 160 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Simon Bailey. 1988. Oct. 10. Company name is now Oasis Wholefoods. Phone: 0803-863167. They now make Organic Tofu (plain & smoked), Tofuburger, and Organic Tempeh. In Dec. 1987 Francis Checkley sold the company to I.J. Mohammed.

Letter from I.J. Mohammed. 1991. Sept. 30. This product was introduced in Jan. 1987. There is only one type/ flavor. Label sent by I.J. Mohammed. 1991. Sept. 30. 2.5 inches diameter. Pea green on yellow. Illustration of palm trees. "Ready for eating hot or cold."

1930. Elmer, Vickie. 1987. Loma Linda Foods Inc. consolidates for growth. *Daily Commerce (Los Angeles, California)*. Feb. 2. Also in *Press-Enterprise (Riverside, CA)*. Jan. 26.

• **Summary:** Loma Linda Foods was founded in October 1906. Company sales now top \$20 million a year, growing at 7% annually. Worthington sales top \$30 million, and grew last year by 13%. Loma Linda Foods plans to shut down its plant in Mount Vernon, Ohio, and move it to Riverside in late 1987. Mr. Alejo Pizzaro is now company president. Address: Riverside, California.

1931. *Toyo Shinpo (Soyfoods News)*. 1987. Kôji-kin baiyô okara aji, kaori, shokkan ryôkô. Okara shori ni idomu. Okara hanbaagu tanpaku na aji de katasa yoshi (ryo) [Culturing okara with koji molds. The taste, fragrance, and texture are good. Processing okara by chilling. Okara hamburger–light taste and good firmness]. Feb. 2. p. 2. [Jap; eng+]

• **Summary:** In this experiment, raw okara, white rice, bran, and konnyaku powder were cultured with koji molds (*Aspergillus oryzae*), *Rhizopus* molds (*kumonosu kabi*), and one other type. Afterwards, the mixture was used in deep-fried tofu burgers (*ganmo*), croquettes, and hamburgers. The best results occurred when ground pork was mixed in to make a hamburger. The end product had a light taste and a nice firm texture.

9451 VAN HORNE WAY, RICHMOND, B.C. V6X 1W2 (CALIFORNIA SALES OFFICE (619) 259-2720)

1932. *Irish Times (Dublin)*. 1987. Plenty of products on the boil. Feb. 17. p. 17.

• **Summary:** “The Food Technology Business Unit in the Food Centre at Raheen is a place where people can come and try out their food ideas, while at the same time receiving basic business training.” About 20 people are presently working on projects.

Lin Thakker, who trained as a nurse in England before coming to Limerick with her husband six years ago, is supplying the public in Limerick with foods she ate growing up in Japan. “Her first product was tofu, a fermented bean curd [sic], which has a mild flavor and which can be used instead of cheese.” She first had the idea when she saw the high price of imported tofu. Now she also makes fresh soya milk, vegetarian pizzas and vegetarian burgers.” She sells all of these to hotels and fastfood outlets as well as to wholefood shops.

Note: Tofu is also occasionally called “soybean curd.” It is not fermented, and is very different from “fermented tofu,” which is rarely found in Japan.

1933. Lease, Carol Ann. 1987. Firm’s bread and butter comes from meatless foods. *Dispatch (Columbus, Ohio)*. Feb. 18. p. 2. Neighbor news section.

• **Summary:** “The inside of the Worthington Foods plant at 900 Proprietors Rd. looks like any meat packing plant... The only difference is, there’s no meat at Worthington Foods,” now in its 48th year with about 270 employees. Discusses the company’s history and 3 product lines. “Meat rationing during World War II gave the company a shot in the arm as people turned to Choplets when they couldn’t get pork chops.

“Worthington Foods still makes some peanut-based products, but most of its no-meat meats today are made from soy protein. The work of Robert Boyer, a Michigan researcher, enabled the company to spin soy into a substance resembling muscle fiber.”

David Schwantes, manager of marketing communications, said the Morningstar Farms line is in about 70% of U.S. Supermarkets. James Remer, director of manufacturing, said Scramblers, which are made from egg whites, also is the company’s fastest-growing product. Schwantes said that “a 1985 Gallup poll turned up 6 million vegetarians in the United States. That’s a five-fold increase since the last time they asked the question in 1979.

“According to the National Institutes of Health, he added, one in four households has someone on a low-cholesterol diet, whether self-imposed or recommended by a doctor...

“The company also is to break ground this spring on a 80,000-square-foot storage facility on Sinclair Rd. and is expanding manufacturing activities into second-floor areas of its Proprietors Rd. plant that now are being used for

storage. All this growth is not happening without problems. The sanitary sewer line serving the plant, for example, is at capacity. Last year, a clog in the line caused sewage to back up in the basements of homes on E. Stafford Ave. The city has suggested that Worthington Foods put in a pumping station to pump the sewage to another line or that a new sewer line be built on Proprietors Rd. to serve Worthington Foods exclusively. The latter would cost an estimated \$525,000.”

1934. Golden Soy Foods, Inc. 1987. Soy for all seasons. *Whole Life*. Jan/Feb. p. 37. [1 ref]

• **Summary:** Each of these recipes calls for Hot & Spicy Soysage or Soysage Tofu Sandwich Spread (both vegetarian), made by Golden Soy Foods of Athens, Ohio. Soyballs with gravy and rice. Stuffed zucchini. Sliced soysage sandwich. Soysage pizza sandwich. Soy burgers. Soysage casserole. Address: Athens, Ohio.

1935. Kijima, Hiromachi. 1987. Tōfu gyōkai no genjō to atarashii ugoki [The Japanese tofu industry and market: Current status and recent trends]. *Daizu Geppo (Soybean Monthly News)*. Feb. p. 24-30. [Jap]

• **Summary:** Nationwide, 28.2% of all tofu sales is from regular (momen) tofu, 22.5% is from deep-fried tofu pouches (aburaage), 19.9% is from lactone silken tofu, 13.8% is from regular silken tofu, 4.7% is from grilled tofu, and 10.9% is from other types (mainly deep-fried tofu cutlets and burgers).

Among large manufacturers, 24.8% of all tofu sales is from regular (momen) tofu, 18.3% is from tofu pouches (aburaage), 24.8% is from lactone silken tofu, 15.1% is from regular silken tofu, 4.1% is from grilled tofu, 7.1% is from tofu cutlets (nama-age), and 5.8% is from other types (mainly deep-fried tofu burgers). Address: Zenkoku Hoso Tofu Kyokai, Senmu Riji.

1936. **Product Name:** Soyboy Tofu Burgers.

**Manufacturer’s Name:** Northern Soy, Inc.

**Manufacturer’s Address:** 30 Somerton St., Rochester, NY 14607. Phone: 716-442-1213.

**Date of Introduction:** 1987 February.

**Ingredients:** Harvest Light Tofu (filtered water, organically-grown soybeans, natural calcium chloride nigari—a natural mineral coagulant, not a preservative), red miso (water, rice, soybeans, salt), carrots, dried onion, sesame seeds, sunflower seeds, spices, guar gum, carrageenan.

**Wt/Vol., Packaging, Price:** 6.25 oz 2 burgers per package.

**How Stored:** Refrigerated, 45 day shelf life. Or frozen.

**Nutrition:** Per burger (3.125 oz.): Calories 180, protein 14 gm, carbohydrate 4.3 gm, fat 12.5 gm, sodium 350 mg.

**New Product–Documentation:** Manufacturer’s catalog.

1987. Oct. Gives ingredients. Talk with Andy Schechter. 1988.

Feb. 17. Launched in Feb. 1987. Label. 1987. 3.25 inches

diameter. Red, green, and black on yellow. “All natural

meatless entrees. Cholesterol-free. No preservatives and nothing artificial. Precooked for your convenience.”

1937. **Product Name:** Tofu Lasagna, and Tofu Pizza [Super Veggie, Soy Cheese, or Spinocli].

**Manufacturer’s Name:** San Diego Soy Dairy.

**Manufacturer’s Address:** 1330 Hill St., Suite B., El Cajon, CA 92020. Phone: 619-447-8638.

**Date of Introduction:** 1987 February.

**New Product–Documentation:** Talk with Gary Stein. 1989. Feb. 17. He recalls that these products were launched in about Feb. 1987.

1938. *Soya Newsletter (Bar Harbor, Maine)*. 1987. Tomsun Foods International nets \$3.46 million from public offering. Jan/Feb. p. 5.

• **Summary:** In mid-December 1986, Tomsun grossed \$4.25 million in its first public stock offering. It expects to net \$3.46 million. Total sales have grown from \$1.25 million in 1981 to \$3.1 million in 1986. For the 32 weeks ending 9 Aug. 1986, 58% of sales were from tofu, 21% from Jofu (yoghurt-style product), 18% from Oriental pasta and condiments, and 3% from tofu burgers. Projected uses of the new funds are 43% for sales and marketing, 23% for repayment of \$800,000 debt, 8.7% for expansion of Jofu, 7.2% for R&D, and 18% for working capital.

1939. *Soya Newsletter (Bar Harbor, Maine)*. 1987. Sales of Tofu Pups sizzle. Jan/Feb. p. 6.

• **Summary:** First introduced in Aug. 1985, Tofu Pups (like hot dogs) sold nearly \$250,000 in the next 10 months. A 12 ounce package retails for \$2.49. Michael Cohen’s company is now called Lightlife Foods, formerly Tempehworks.

1940. Worthington Foods. 1987. Health Wise (Portfolio). Worthington, Ohio. 22 inserts. March 18. 30 cm.

• **Summary:** See next page. The inserts (each 8½ x 11 inches, glossy) are: (1) New! Crispy Chik (leaflet, front and back). (2) Worthington and Natural Touch product catalog (4 p.). (3) Sodium content per serving. (4) Less than 500 mg sodium per serving. (5) Less than 50, 100, and 150 Kcal [calories] per serving. (6) Less than 200, 300, and 450 Kcal [calories] per serving. ## FROZEN FOODS

### SIZZLE BURGER

Pre-cooked frozen patties with an outstanding flavor and texture. They make quick, easy and great tasting burgers.

Code #0/004/0	Packed: 12/30 oz. (1 lb. 14 oz.)
Code #0/005/0	Packed: 6/75 oz. (4 lb. 11 oz.) (Institutional)
Code #0/007/0	Packed: 12/10 oz.

### MEATLESS BOLOGNA

Flavor and texture make this a perfect meatless sandwich. Ready-to-serve luncheon also tastes great with a savory gravy served over mashed potatoes.

Code #0/008/0	Packed: 12/8 oz. (Deli Slices)
Code #0/012/0	Packed: 4/64 oz. (4 lb. Roll)

### SAVORY MEATBALLS

Vegetable Protein Savory Meatballs are pre-cooked, ready to heat and serve. This versatile product makes meal planning quick, easy and delicious.

Code #0/016/0	Packed: 12/10 oz.
Code #0/019/0	Packed: 6/80 oz. (5 lb.) (Institutional)

### CHIK - NUGGETS

Tasty chunks of chicken-flavored goodness are great as a hot hors d'oeuvre or an easy-to-fix entree. Try them for school lunches and picnics with tangy barbeque or sweet & sour sauce.

Code #0/022/0	Packed: 12/12 oz.
Code #0/025/0	Packed: 6/4 lbs.

### CHIK - PATTIES

Discover the golden goodness of tasty Chik-Patties. These thick chicken-tasting patties are generously coated with crispy-crunchy breading. Serve Chik-Patties in the sauce of your choice, or serve crisp in bun with lettuce and tomato.

Code #0/024/0	Packed: 12/10 oz.
Code #0/029/0	Packed: 6/75 oz. (4 lb. 11 oz.)

### MEATLESS FRIED CHICKEN

This frozen fried chicken-like entree can be heated in a pan or the oven, and served with a variety of savory sauces. It is also delicious cubed in salads or in sandwiches.

Code #0/023/0	Packed: 12/8 oz.
Code #0/026/0	Packed: 6/80 oz. (5 lb.) (Institutional)

### MEATLESS CHICKEN

These ready-to-eat, all vegetable protein slices are mild and deliciously flavored to your taste. A new idea for chicken salads and soups.

Code #0/031/0	Packed: 12/8 oz. (Deli Slices)
Code #0/033/0	Packed: 4/64 oz. (4 lb. roll)

### MEATLESS ROAST BEEF

Hearty roast beef flavor without the animal fat makes these not just good-tasting, but good for you, too! A healthy alternative that works great in grinders and sandwiches.

Code #0/036/0	Packed: 12/8 oz. (Deli Slices)
Code #0/038/0	Packed: 4/64 oz. (4 lb. roll)

### MEATLESS SALAMI

These spicy, cholesterol-free slices are perfect for any meal. Try them with scrambled eggs or hash browns, in luncheon salads, or in your favorite casserole recipe.

Code #0/041/0	Packed: 12/8 oz. (Deli Slices)
Code #0/043/0	Packed: 4/64 oz. (4 lb. roll)

### MEATLESS TURKEY

A soy protein delicacy with mild turkey flavoring. A must for your Christmas and Thanksgiving holiday recipes.

Code #0/046/0	Packed: 12/8 oz. (Deli Slices)
Code #0/048/0	Packed: 4/64 oz. (4 lb. roll)

### GRIDDLE STEAKS

Rich and hearty in a tasty, tender, meatless steak. It's pre-cooked, so just heat and serve. Great fried or barbecued, too.

Code #0/051/0	Packed: 12/10 oz.
Code #0/055/0	Packed: 6/80 oz. (5 lb.) (Institutional)

### OCEAN FILLETS

Fillets with a mild white fish flavor and texture. They're ideal for main entrees, sandwiches and salads.

Code #0/061/0	Packed: 12/10 oz.
Code #0/065/0	Packed: 6/80 oz. (5 lb.) (Institutional)

### MEATLESS CORN DOGS

Drenched with a delicious corn bread batter, these Big Franks can be served hot with relishes or dips. Kids love 'em.

Code #0/070/0	Packed: 12/10 oz.
Code #0/072/0	Packed: 6/50 oz. (3 lb. 2 oz.)
Code #0/075/0	Packed: 1/90 oz. (5 lb. 3 oz.) (Institutional)

Loma Linda Foods' commitment to quality, health and customer satisfaction began in 1906 and continues as we develop new recipes, modify existing ones, and explore new processes in technology; all in search of excellence.

At Loma Linda Foods our mission goes beyond the marketing of textured vegetable proteins and infant formulas. Instead, we consider ourselves to be in the healthful living business. Equal with this mission is the responsibility to educate the public in healthful and economical living and to provide the health foods and beverages needed for this quality lifestyle. We trust that Loma Linda's extensive product range will continue to be your #1 choice whenever the occasion calls for a delicious meatless adventure.

Tastes Great . . . Naturally!

• **Summary:** See next page. A 2-page full color ad for Loma Linda's soy-based sausage analogs: Little Links, Big Franks, Sizzle Franks, Linkettes, Meatless Corn Dogs.

Note: A 4-page version, available from the company and titled "Make big money imitating a sausage," also lists the company's 42 U.S. distributors. Address: Riverside, California.

1948. **Product Name:** [Tofu-Burger (In a Roll)].

**Foreign Name:** Tofu-Burger, in einer Rolle.

**Manufacturer's Name:** Tofukost-Werk TKW GmbH.

**Manufacturer's Address:** Siemensweg 1, D-4724

Wadersloh-Diestedde, West Germany. Phone: 02520-1300.

**Date of Introduction:** 1987 March.

**Ingredients:** Tofu, soybeans, rice, wheatgerm, flaxseeds (linseeds), starch, seasonings, sea salt.

**Wt/Vol., Packaging, Price:** 500 gm sausage-shaped rolls, 7 rolls per carton.

**How Stored:** Refrigerated, 60 day shelf life at 8°C.

**Nutrition:** Protein 10.3%, water 65.7%, fat 5.1%, pH 6.0, ash 2.1%, carbohydrate 10.7%, energy 130 calories/100 gm.

**New Product-Documentation:** Form filled out by Hermann Berief, owner. 1988. Jan. Lists 4 products. TKW color products catalog. 1988. April. Shows Labels. Black on orange-yellow. Rolls are red.

1949. Barricini Foods Inc. 1987. Baseball and Barricini, Part II: Tofulite served to N.Y. Yankees' fans (News release). 123 South St., Oyster Bay, New York 11771. 1 p. April 30.

• **Summary:** "Milton Namiot, Chairman of the Board of Barricini Foods, Inc., announced that Canteen Corp., concessionaires of Yankee Stadium, had authorized the product's introduction as of opening day... This is the second step in a national sports stadium marketing plan, the first being the extremely successful introduction of Tofulite to New York Mets' fans at Shea [pronounced SHAY] Stadium last year [spring 1986]. The Mets have doubled their commitment to Tofulite in 1987."

Talk with Robert Tepper of Barricini. 2001. Oct. 3. Tofulite was a soy-based, non-dairy ice cream closely related to Ice Bean, developed by the Farm Food Company in California and launched in August 1976. Robert had a free pass to Yankees' and Mets' baseball games to monitor their ice cream, which was always sold from soft serve machines (like frozen yogurt) at two locations in each ballpark. ARA was probably the foodservice distributor. He took his son, who was just 6 years old, to watch many games. Tofulite lasted for about two seasons at the Mets' stadium (1986-1987) and one year at Yankee Stadium (1987). This was 2-3 years before any veggie hot dogs were sold at major league ballparks. In 1988 Robert left Barricini and went to Natural Nectar. Address: Oyster Bay, New York.

1950. **Product Name:** Burgers (With Okara, Fried).

**Manufacturer's Name:** Bean Machine.

**Manufacturer's Address:** Grymych, Wales, UK.

**Date of Introduction:** 1987 April.

**Ingredients:** Incl. Okara, rice, nuts, vegetables, spices.

**Wt/Vol., Packaging, Price:** Vacuum packed.

**How Stored:** Refrigerated.

**New Product-Documentation:** Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story." The main ingredient in burgers is okara. No tofu is used. "The burgers are relatively new products to us... At the moment we make only one flavor, which is the nut one, but we hope to do a regular one and a chili in the near future. When we first

# SOY, SOY, SOY.

**LOMA LINDA FOODS.**

Quality Foods Since 1906.

11503 Pierce Street, Riverside, CA 92515

introduced it, they were fried, 11 at a time in a frying pan, and all the mixes were made manually.” Now they are deep fried.

1951. **Product Name:** Soysage Burgers.

**Manufacturer’s Name:** Bean Machine.

**Manufacturer’s Address:** Grymych, Wales, UK.

**Date of Introduction:** 1987 April.

**Ingredients:** Soysage, pepper, onion.

**New Product–Documentation:** Carolyn Rees. 1987. April. Soyfoods (ESFA). “The Bean Machine story.” “Soysage burgers have the same basic recipe as the soysage, but with added pepper and onion. They are put into the same packaging and cooked in the same way as the soysage. They are then formed into a burger shape and covered with the same mixture of flour and spices as for the Tofu bites. They can be cooked either by frying, grilling, or in a microwave.”

1952. **Product Name:** Tofu Franks.

**Manufacturer’s Name:** MGM Brands.

**Manufacturer’s Address:** 59 Howden Rd, Unit H., Scarborough, ONT, M1R 3C7, Canada. Phone: 416-752-6600.

**Date of Introduction:** 1987 April.

**New Product–Documentation:** Talk with company. 1988. March 2. He says Stephen Yu of Victor Foods is out of business! Tofu Masters was an interim company name.

1953. Rees, Carolyn. 1987. The Bean Machine story. *Soyfoods (ESFA)* 1(2):8-10. April.

• **Summary:** “In the bad winter of 1981, the founders of Bean Machine were cut off by snow with only a jar of soybean and little else. They had a soybean recipe book written by a community farm [The Farm] in Tennessee and decided to have a go at making Tofu.

“They found others who believed in the same ideas and started the Bean Machine in their kitchen, at home. From there the business expanded in a little Welsh village. As demand grew more people came to work, and it became a full fledged cooperative.

“In 1984, our founders had to leave us, sadly, because of illness, but their example and courage was and is now an inspiration to us all...

We are now 9 full time members. The first two years of existence were very difficult; breaking down resistance to the product, finding a market, and solving distribution problems used up most of the Bean Machine scanty resources.” The company decided to focus on second generation tofu products. They obtained a Regional Aid grant to help fund an expansion program. Tofu is sold vacuum packed in 227 and 454 gm sizes. They produce 60 lb/tofu every 2 hours. The company’s product range includes Soysage, Soyanaise, Burgers (with okara and rice), Pasties (with tofu filling), Somozas (pouches filled with tofu), Tofu Bites (deep-fried

marinated tofu cubes), and Soysage Burgers. “We hope to do an iced bean [soy ice cream] when the grant comes through. Then we will get the facilities and soon we shall be expanding to a bigger premises, in Grymych, where the Bean Machine is now, which is ideal for us.

“A third of the Bean Machine profit will go towards a third world organization.” Address: A principal of The Bean Machine, Crymych, Wales.

1954. Rose, Richard. 1987. Rose International: Special services bulletin. Santa Rosa, California. 4 p. 28 cm.

• **Summary:** The earliest description seen of the services and activities of Rose International.

Contents: Summary. Background (Brightsong Foods was recognized as one of the ten leading innovators of 1986 by *Food and Beverage Marketing* magazine). Product and services available. Contact. Services: Research and development, marketing, manufacturing, management. Products: Frozen desserts, cultured products, dry instant tofu, soymilk or yogurt mixes, spreads, dips, salad dressings / mayonnaise, soups, desserts, beverages, entrees, burgers, tofu, other concepts.

Attached to the main document is Richard Rose’s business card. Both are printed with blue ink on white paper. Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

1955. Burum, Linda. 1987. Rosebrock’s tofuburgers. *Los Angeles Times*. May 31. p. 95-96.

• **Summary:** If you think the words tofu and burger don’t belong in the same sentence, sample Rosebrock’s tofuburgers before making your decision final. These subtly seasoned, meatless patties are good by themselves and even more delightful in various presentations. Try the pestoburger. (Rosebrock’s has hosted numerous pesto contests with renowned local chefs, and they do know their pesto.) Or sample the knock-your-socks-off garlic sauce on the Maliburger. The whole-wheat rolls are substantial yet not too heavy. And should you show up with someone for whom meaty meals are required, Rosebrock’s does a mean chickenburger. Rosebrock’s Tofuburger Cafe, 1697 Pacific Ave., Venice, California, (213) 450-9169. Open daily.

1956. **Product Name:** Pate, and Chili (Both Made with Seitan), and Mochi.

**Manufacturer’s Name:** Great Lakes Grainfoods.

**Manufacturer’s Address:** 225 Parsons St., Kalamazoo, MI 49007. Phone: 616-382-0830.

**Date of Introduction:** 1987 May.

**How Stored:** Refrigerated.

**New Product–Documentation:** Colby Wingate. 1988. *Seitan Ethnic Recipes*. p. 2. By Sept. 1987 Great Lakes Grainfoods was making “(seitan) pate, (seitan) chili, and mochi.”

Talk with Crick Haltom. 1991 Nov. 23. He started making these three products about a year after the company opened, so in about May 1987. The word “Pate” was spelled without accents. Since the seitan grew slowly, it wasn’t long before he could see that he would need new products to boost sales and pay the rent.

1957. Hesser, J.M. 1987. Uses and functionality of wheat gluten. In: R. Lásztity and F. Békés, eds. 1987. Proceedings of the 3rd International Workshop on Gluten Proteins. xvi + 618 p. See p. 441-55. [4 ref]

• **Summary:** Contents: Introduction. Processing (how commercial wheat gluten, gum gluten, and vital wheat gluten is made and dried). Milling and flour fortification. Bakery products. Breakfast cereals. Meat, fish and poultry products (incl. meatlike products or meat analogs and soy/wheat gluten textured meat extender). Pasta. Cheese analogs and pizza. Nutritional snacks (incl. gluten balls in Europe, vegetarian items in the U.S., Yachi-fu and Yachiyo-fu in Japan, fried gluten items in China, and wafers of 30-45% wheat gluten content in Australia). Breadings, batter mixes, coatings and flavorings (incl. gluten-based HVP). Pet food. Aquaculture. Non-food applications. Modified glutens. Acknowledgement.

“Wheat gluten is the water insoluble complex protein fraction separated from wheat flours. It is, primarily, a mixture of two types of protein from the wheat kernel—glutenin and gliadin. Gliadin is highly extensible, less elastic, soluble in alcohols, low molecular weight (less than 100,000), and has intramolecular bonds. Glutenin is less extensible, highly elastic, insoluble in alcohols, high molecular weight (greater than 100,000), and has intra and intermolecular bonds. These two major protein components of wheat gluten interact in an aqueous system to produce a unique property known as viscoelasticity... The major use of wheat gluten has traditionally been and continues to be in bakery products.”

The International Wheat Gluten Association, chartered in 1979, consists of 18 members in 11 countries. The primary objective of the IWGA is to promote the common interests of its members and the general welfare of the international wheat gluten industry. Address: Executive Director, International Wheat Gluten Assoc., 4510 West 89th St., Prairie Village, Kansas 66207. Phone: 913-341-1155.

1958. Lumen Food Corp. 1987. Lumen: The ‘meatless’ solution for the 21st century. Today (Leaflet). Lake Charles, Louisiana. 4 panels each side. Each panel: 22 x 9 cm. [1 ref]

• **Summary:** “Lumen is the term we use to describe a whole range of products that have the ‘look, taste, and texture of real meat products.’” It is sold in poly bags. Flavors currently in stock include beef, Mexican beef, pepperoni, chicken, unflavored, ground beef, teriyaki beef, smoked ham, and Italian sausage. Address: 409 Scott St., Lake Charles,

Louisiana 70602.

1959. *Technocrat (India)*. 1987. Great Shake: Soya milk success. May.

• **Summary:** “On the 27th of April, Noble Soya, a company promoted by Godrej, launched its premium Milk Shake—Great Shake, in Bombay. After promising feedback from both Delhi and Pune markets, Dr. A.S. Alyar, the brain behind the concept, is very hopeful that it will be a hit in this market, too.” Great Shake is soya milk that is flavoured. The soyamilk is processed using Kibun’s special deodorizing process. Soymilk can be used whenever dairy milk is used and has a wide range of applications. It can also be processed into products such as tofu, a soft cheese. Tofu provides a base for a variety of snack foods such as tofu burger, tofu scramble, tofu ice-cream and others. Soyamilk can be used to make desserts and puddings.

1960. Pozel, Lynda. 1987. Local products: Unique to the north coast. *Tri-City Weekly, Northern Humboldt edition*. June 9.

• **Summary:** Matthew Schmit started making tofu in Colorado in 1977 after tasting it for the first time when he was in Arcata visiting his sister. Later when he moved to this area planned to leave tofu-making behind him. But being unable to find work, he evaluated his skills and turned, once again, to tofu making—a decision he seems pleased he made. He puts in 50-60 hours a week. And he *does* make tofu, turning over a ton of organic soybeans into 7,000 pounds of tofu each and every month. About 2,000 pounds of the tofu produced is turned into salads, dessert, sausage, patties, and cutlets. Most of the 7,000 pounds of tofu produced each month is sold in Arcata and Eureka. Tofu lovers all have their favorite ways to use tofu, Matthew’s personal favorites are baked, marinated cutlets and tofu burgers. Address: [Nutritionist, Arcata Co-op].

1961. Daum, Peggy. 1987. Stable staple: LA firm touts tofu that stays fresh on the supermarket shelf. *Journal (Milwaukee, Wisconsin)*. June 10.

• **Summary:** Julia Weinberg [sic, Steinberg], who runs a food styling business, is traveling on behalf of Morinaga Nutritional Foods of Los Angeles. Generally people first think of using tofu in stir-fry recipes. But she has developed recipes for Creamy Tofu Tarragon Salad Dressing or Dip, Eggless Salad, and Tofu Burgers. A photo shows Steinberg, who visited Milwaukee to talk about tofu.

1962. Kennedy, Shawn G. 1987. A soy-based business flourishes in Brooklyn [Appropriate Foods]. *New York Times*. June 24. p. C6.

• **Summary:** Robert Werz, a carpenter, started making tempeh patties in a corner of the kitchen of a friend’s catering business. After 6 months he set up in Nassau County. Today,

with 6 employees, he produces about 10,000 lb/month of tempeh. Half is sold to health food distributors and half delivered to 100 stores in Metro New York. The company also makes soymilk and tofu products (quiches, tortellini, and salads). In March the company moved from Franklin Square, Long Island, to an East Brooklyn Industrial Park; there was more space at lower rent.

When Mr. Wertz became a vegetarian more than 14 years ago [i.e., before 1970], the only place he could buy tofu was in Chinatown. Appropriate Foods is owned by Robert Werz and Shelley Martin.

1963. Propper, Jonathan. 1987. The soybean eaters: Everybody is a suspect. *New York Times*. June 24. p. C1, C6. Living section.

• **Summary:** Central Soya has \$1,370 million annual sales. L.D. Williams, head of the chemurgy division, recalled the early 1970s. "Positioning textured soy protein as an extender was a mistake which set the industry back. The cost saving image just didn't fly." Dan Reuwee of the American Soybean Assoc. notes: "We haven't done much in this country on promoting soy foods, because the livestock industry is our biggest customer. We don't want to promote meat substitutes."

Worthington Foods Inc. (of Worthington, Ohio) has yearly sales of \$34 million. The Morningstar Farms line accounts for 55-60% of total sales, has grown at 15-18% over the past 4 years, and is sold in 80% of U.S. supermarkets. Their market is divided between those age 50 and over having cholesterol concerns and those age 25 to 40 who don't eat meat.

William Shurtleff is director of Soyfoods Center, a "clearinghouse for information on soy products" in Lafayette, California. He believes that tofu will follow the same growth pattern that yogurt did in the USA, building slowly then growing rapidly when larger food companies begin to apply their marketing clout. Tofu is a \$75-\$100 million/year industry growing at about 15% a year, according to Shurtleff.

1964. Jahnke, Pamela. 1987. It's not burger, its Betsy's Tempeh—and its new on mid-Michigan market. No cholesterol, high in protein, say producers. *State Journal (Lansing, Michigan)*. June 29.

• **Summary:** Betsy Shipley and her husband Gunter Pfaff are both vegetarians. She is a library clerk at MSU [Michigan State University] and he is a retired MSU employee. They hope to produce 500 lb/month of vegetarian hamburger. Added barley gives tempeh a nuttier flavor. Address: Michigan.

1965. Ariyaratne, K.G.S. (Mrs.). 1987. Tempeh—The soya health food. *Soyanews (Sri Lanka)* 9(1):6-8. Jan/June. [1 ref]

• **Summary:** Discusses: Tempeh nutrition, how to make

tempeh, how to store or preserve tempeh, preparation of foods with soy tempeh. The favorite preparation is to prepare tempeh like dry fish with tomatoes and other condiments. Address: Agricultural instructress, Sri Lanka.

1966. Johnson, Kirk. 1987. Hidden fats in whole foods diets. *East West*. June. p. 62-68.

• **Summary:** A full-page table (p. 65) titled "How the substitutes stack up" shows total fat and serving size for the following categories: Dairy products. Substitute dairy products. Meat. Substitute meat products. Frozen dinners. Miscellaneous. The substitute dairy products include: Tofu Cream Chie (21st Century). Soya Kaas (soy cheese from American Natural Snacks). Tofutti (Tofu Time). Le Tofu (Brightsong Foods). Ice Bean (Farm Foods). Tofu, silken (Nasoya). Tofu, soft (Nasoya). Tofu, firm (Nasoya). Soybean margarine (Willow Run). Soymilk (Edensoy). Soymilk (Health Valley). Soymilk (Vitasoy).

Substitute meat products include: Fakin' Bacon (Tempehworks). Tofu Wieners (Yves). Tofu Pups (Tempehworks). Vegie Burger (Bud, Inc.). Tofu Burger (Bud, Inc.). Gardenburger (Wholesome & Hearty). Tofu Sausage (Vegetable Protein Co.). Tempeh, 3-grain (Tempehworks). Seitan ("wheat meat").

Meatless frozen dinners include: Tofu Lasagna (Legume). Meatless Pepper Steak with Kofu & Noodles (Legume). Sweet and Sour Tofu (Legume).

Miscellaneous products include: Nasoyannaise (Nasoya Foods). Salad dressing, Creamy Tofu (Nasoya). Miso.

1967. **Product Name:** Cajun Jerky (Meatless. Based on Textured Soy Protein) [Beef Style, Spicy Italian Style, Hot Pepperoni Style, or Smoked Ham Style].

**Manufacturer's Name:** Lumen Food Corporation.

**Manufacturer's Address:** 409 Scott Street, Lake Charles, LA 70601.

**Date of Introduction:** 1987 June.

**Ingredients:** 1995 Smoked Ham Style: Soy protein, water, soybean oil, yeast extract, cayenne, salt, potassium sorbate.

**Wt/Vol., Packaging, Price:** 1.5 oz poly bag. Retail for \$0.89 (1987).

**How Stored:** Shelf stable.

**Nutrition:** Per ½ oz.: Calories 50, protein 6 gm, carbohydrates 1 gm, fat 3 gm, sodium 185 mg, fiber 1 gm.

**New Product—Documentation:** Distributor Price List.

1987. Aug. 1. Label. 1987. "A Vegetable Protein Product. Made with Pride in the Heart of Cajun Country." Brochure. 1987. "Cajun Jerky! The Jerky Snack That's Good for You." Spot in Natural Foods Merchandiser. 1987. June. p. 56. Spot in Soya Newsletter. 1987. 1(4):4. Letter from Greg Caton, CEO. 1987. Nov. 3. "Our product is double extruded using a Wenger and starting with defatted soy flour. We use no concentrates or isolates. We pride ourselves as the world's foremost authorities on industrial applications if extruded

soy flour products in the non-refrigerated IM (Intermediate Moisture) mode. All of our products use these technologies.” M. Friedman. 1987. Adweek East. Nov. 16. “The most interesting new [soy-based] food is Lumen... a surprisingly close analog to meat.”

Label for Cajun Jerky–Smoked Ham Style from about 1990. 4.75 x 5.24 inches. Dark brown and pink on beige. A brown pelican is sitting on the horizontal leg of a pink map of the state of Louisiana; in its beak it holds a bamboo rod with “Smoked Ham Flavor attached to one end.

Product with Label purchased by mail order from Lumen Foods. 1995. Dec. 22. Smoked Ham Style. 4 by 5 inches. Plastic bag. Red and green on yellow. Illustration of an alligator in a vest standing upright. “A vegetable protein product. No cholesterol. Low in calories. Low in fat. High in protein. Eats good!”

1968. **Product Name:** Betsy’s Tempeh. Vegetarian Patties (Meatless Burgers).

**Manufacturer’s Name:** S&P Farm.

**Manufacturer’s Address:** 14780 Beardslee Rd., Perry, MI 48872. Phone: 517-675-5213.

**Date of Introduction:** 1987 June.

**New Product–Documentation:** Label. 1986, dated. 4 by 5 inches. Red and green on yellow background. “Cultured soybeans with barley. 12 easy-to-use, pre-cooked patties. Cholesterol free. Preservative free.” Plant opened 21 June 1987.

Letter from Betsy Shipley. 1988. March 3. “Enclosed are

two articles from the local papers (Towne Courier, 24 June 1987, p. 5) from our open house and an article from the New Alchemy Institute (Journal, spring 1987, p. 7). Sales to date are slow. I have the product in two food co-ops and a local Krogers store;... My next step is to set up demonstrations in people’s homes with interested people. When giving out samples of the tempeh in a pasta sauce, people like it and usually buy a package; unfortunately there doesn’t seem to be a lot of repeat business. We will continue to plug away at it.”

Talk with Gunter Pfaff. 1990. Sept. 11. The soy and barley patties sell better than the grated tempeh, and the barley aids the production process. His company hopes to take the burger national, and expand their plant or build a new one. They are starting a research project with state funding in cooperation with a local university.

Recipe cards (photocopied on beige paper with black ink) for Tempeh Patties sent by Betsy and Gunter. 1991. Aug. 19. Sweet & sour tempeh (with 4 x 2 oz). Tempeh Patties, cubed. Tempeh stew. Betsy’s Tempeh Patties are easy to use: Marinade, burgers, fastest pattie. On the back of each card is a different interesting message.

1969. **Product Name:** [Breaded Tofu for Frying (Cutlets with Bread Crumbs, or Grated Coconut; Little Slices, or Burger Patties)].

**Foreign Name:** TK–Tofu -Bratscheibe, paniert mit Paniermehl/Kokosraspeln; Staebchen, Paniert; Burger, Paniert.

**Manufacturer’s Name:** Tofukost-Werk TKW GmbH.

**Manufacturer’s Address:** Siemensweg 1, D-4724 Wadersloh-Diestedde, West Germany. Phone: 02520-1300.

**Date of Introduction:** 1987 June.

**Ingredients:** Cutlets: Tofu, moist breading, dry breading.

**Wt/Vol., Packaging, Price:** Cutlets: 50 pieces, each 115 (or 110) gm in plastic bag in a carton. Each piece is 150 x 15 x 15 mm.

**How Stored:** Refrigerated, 6 months shelf life at 18°C. Or frozen.

**Nutrition:** Bread crumb type: Protein 9.8%, water 69.0%, fat 3.1%, pH 5.8, ash 1.4%, carbohydrate 13.2%, energy 120 calories/100 gm.

**New Product–Documentation:** TKW color products catalog. 1988. April. Photo of each item on a silver plate.

These are ready for frying by a foodservice organization. The Little Slices are 25 gm each, 200 per 5 kg carton, and contain 11.3% protein. The burgers are 60 gm each, 96 pieces per 5.76 kg carton. Burger ingredients are tofu, soybeans, rice, wheatgerm, linseeds, starch, seasonings, seasalt, moist breading, dry breading. They contain 9.8% protein.

1970. **Product Name:** Homestyle Tempeh Vegetarian Sandwiches [Tempeh “No Chicken,” or Tempeh “No Chicken” Sub].

**Manufacturer's Name:** Homestyle Foods (Formerly Sonoma Specialty Foods).

**Manufacturer's Address:** Santa Rosa, CA 95403.

**Date of Introduction:** 1987 July.

**Ingredients:** Sandwich: Wholewheat bread, Homestyle Tempeh "No Chicken" Salad, sprouts, eggless mayonnaise. Note: Sub adds lettuce.

**Wt/Vol., Packaging, Price:** 7.5 oz (sandwich) or 6 oz (sub).

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels. 1987. 2 by 3 inches. Black or red on white.

1971. Moore, Waveney Ann. 1987. Tofu, the food people love to hate. Plain tofu is now being dressed for success, making appearances in hot dogs, sausages, lasagne and frozen desserts. *Food Distributors Magazine*. July. p. 52, 54, 56, 58. [1 ref]

• **Summary:** Largely an interview with Peter Golbitz, based on information published in *Soya Newsletter*. Sales of tofu prepared foods totalled about \$4-5 million retail. Soymilk retail sales grew from \$3 million in 1983 to \$12 million in 1985. "From 1983 to 1986 about 80% of the soymilk was imported from Japan. The other 20% came from Belgium and Hong Kong." The price was about \$18 a gallon, expected to fall to \$3 a gallon.

1972. *Soybean Digest*. 1987. Tofu: Ancient protein for modern times. June/July. Supplement. p. 4.

• **Summary:** New tofu makers are popping up from coast to coast in the USA. More than 150 companies are making \$100 million worth of tofu a year. In supermarkets, tofu can be found in everything from burgers to hot dogs, from entrees to desserts. A "designer line" of tofu-based frozen desserts sports the name "Gloria Vanderbilt" on the label.

1973. **Product Name:** Tofu-Sausage 'n Pasta (Also called Sausage 'n Pasta Combo).

**Manufacturer's Name:** Tofu Shop (The).

**Manufacturer's Address:** 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

**Date of Introduction:** 1987 July.

**Ingredients:** Baked sausage made with tofu, tamari, spices and sunflower oil; pasta salad made with corn macaroni, fresh vegetables, olive oil, red wine vinegar, tamari, spices, and salt.

**Wt/Vol., Packaging, Price:** 8 oz (226.8 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1987. 3.5 x 1.5 inches. Self adhesive. Red on yellow. "A simple meal from the Tofu Shop. Ready to eat or reheat." Illustration of the shop on stilts on a cliff over the ocean.

1974. **Product Name:** Natural Touch Mexican Entrees: Vegetarian "Beef" & Cheese Burritos, Bean & Cheese

Burritos, Cheese Enchiladas.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1987 July.

**Ingredients:** Vegetarian "Beef" & Cheese Burritos: Vegetable protein (wheat gluten, soy protein concentrate), soybeans and/or corn oil, egg white solids, calcium caseinate (milk protein), soy isolate, natural flavors (from vegetable sources), carob, onion, sea salt, garlic, spice, mild cheddar cheese, white colby cheese, flour tortillas (flour, water, vegetable shortening, sea salt, baking powder). Includes Hot Green Chili Sauce and Mild Red Chili Sauce.

**Wt/Vol., Packaging, Price:** 15 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Ad in *Vegetarian Times*.

1987. Aug. Inside front cover. Full-page color. "Olé! Finally true south of the border flavor in all-natural entrees! Try new Mexican Entrees from Natural Touch—four savory combinations made with real cheeses, whole pinto beans and vegetable protein. They're meat-free, but sizzling with more natural flavor than you can shake a sombrero at. You'll find them in your store's frozen-food section." Across the bottom is a 25¢ coupon on any Natural Touch Mexican Entree.

Leaflet. 1987. New Mexican Entrees. Lists ingredients.

1975. **Product Name:** Natural Touch Mexican Entrees: Bean, Vegetarian "Beef" & Cheese Burritos.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1987 July.

**Ingredients:** Beans (water, pinto beans, butter, onion, sea salt), vegetable protein (wheat gluten, soy protein concentrate), soybean and/or corn oil, egg white solids, calcium caseinate (milk protein), soy isolate, natural flavors (from vegetable sources), carob, onion, sea salt, garlic, spice, mild cheddar cheese, white colby cheese, corn flour tortillas (flour, water, vegetable shortening, sea salt, baking powder). Includes Hot Green Chile Sauce and Mild Red Chile Sauce.

**Wt/Vol., Packaging, Price:** 19.5 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Ad in *Vegetarian Times*.

1987. Aug. Inside front cover. Full-page color. "Ole. Finally true south of the border flavor in all-natural entrees." Leaflet. 1987. New Mexican Entrees. Lists ingredients.

1976. **Product Name:** Homestyle Tempeh "No-Chicken" Salad.

**Manufacturer's Name:** Homestyle Foods (Formerly Sonoma Specialty Foods).

**Manufacturer's Address:** 2317 Bluebell Dr., Santa Rosa, CA 95403.

**Date of Introduction:** 1987 August.

# OLÉ!

Finally, true south-of-the-border flavor in all-natural entrees!

Try new Mexican Entrees from Natural Touch®—four savory combinations made with real cheeses, whole pinto beans and vegetable protein. They're meat-free, but sizzling with more natural flavor than you can shake a sombrero at.

You'll find them in your store's frozen-food section. Just heat and serve with your choice of mild tomato or zesty green chile sauces (both included). Try all four, amigos!

1977. **Product Name:** Accras (A Small, Deep-Fried Meatless Okara Burger).

**Manufacturer’s Name:** Plenty Canada Soya Utilization Project.

**Manufacturer’s Address:** 88A Kotugodella Vidiya (Postal Box 95), Kandy, Sri Lanka.

**Date of Introduction:** 1987 August.

**Ingredients:** Soya milk residue, carrots, leeks, spices, curry leaves, white wheat flour.

**Wt/Vol., Packaging, Price:** Each patty, 2 inches in diameter, sells for Rs. 1/50.

**New Product–Documentation:** Form filled out by Jane Gleason. On 23 March 1988 she visited the Plenty Canada Soya Food Centre. For details see Chocolate Milk (Aug. 1987). Adapted from a local recipe for a deep-fried food.

1978. **Product Name:** [Tofu Patties (Vegetable, Cauliflower, Grain)].

**Foreign Name:** Tofu Roestling (Gemuese, Blumenkohl, Getreide).

**Manufacturer’s Name:** Tofukost-Werk TKW GmbH.

**Manufacturer’s Address:** Siemensweg 1, D-4724 Wadersloh-Diestedde, West Germany. Phone: 02520-1300.

**Date of Introduction:** 1987 August.

**Ingredients:** Cauliflower: Tofu (water, soybeans), cauliflower, wheat grits, vegetables, lemon juice, plant protein extract.

**Wt/Vol., Packaging, Price:** 250 gm or 500 gm.

**How Stored:** Refrigerated.

**Nutrition:** Per 121 gm: 8.5 gm protein, 5.7 gm fat, 9.9 gm carbohydrates, 124.9 calories.

**New Product–Documentation:** Labels. 1987. The 500

gm size is 4 by 3 inches. Dark green on yellow. “Made purely from plants (Rein pflanzlich). Röstling in Scheiben, schneiden und braten.” The 500 gm size was introduced in Aug. 1987 and the 250 gm size in Nov. 1987.

1979. Thompson, Sharon. 1987. Tofu is gaining acceptance as a healthful meat substitute. *Herald-Leader (Lexington, Kentucky)*. Sept. 2.

• **Summary:** Martin Downer had had sinus problems and four surgeries. He used to be a McDonald’s fan; he craved fast food. But friends convinced him that a change of diet would be beneficial to his health.

First he gave up soft drinks and sugar. Two years he stopped eating meat and dairy products. Today his sinus problems are gone. “I can breathe through my nose,” he proclaims. Address: Food writer.

1980. Shurtleff, William. 1987. History of Appropriate Foods Inc. and The Soy Source. Lafayette, California: Soyfoods Center. 3 p. Unpublished manuscript, based on interviews with Robert Werz, Sept. 9.

• **Summary:** “Appropriate Foods was founded by Robert Werz in the fall of 1980 as a tempeh manufacturer. Born on 29 Dec. 1952, he had been a vegetarian since about 1970. Quite early he developed an affinity for soyfoods. He had been enjoying tofu since the early 1970s, when it was only available from Chinatown. He first heard about tempeh in 1975 from a friend in California, then first tasted it in about 1977. In 1979 he began to make tempeh part time at home in Sea Cliff, New York, for himself and a few friends while working as a carpenter and a boat builder. He also sold some of this tempeh to one store, Rising Tide, as a test market.

“In 1980 Werz decided to try making tempeh as a part time business. So in October 1980 he founded Appropriate Foods, Inc. He rented a small kitchen (down 2 long flights of stairs in the Bayside Jewish Center) from a friend who was a kosher caterer in Bayside, New York. Commercial production of Tempeh Brothers Tempeh started there in Nov. 1980. When Werz first made tempeh at home and at the temple, he had a partner, David Sibek; friends called them “tempeh brothers.” Hence the product name. The only other tempeh sold in the area was that made by The Tempeh Works in Greenfield, Massachusetts.

“In the spring of 1981 Werz and Sibek decided to make tempeh a full-time business. They were distributing their products to about 10 health food stores and making about 20 pounds of tempeh each batch, 200 pounds a week. So they rented an old meal packing plant, complete with tile walls and floor drains, at 137 New Hyde Park Rd., Franklin Square, Long Island, New York.

In Feb. 1982 tempeh production started at the new location, and soon the company had two small distributors in New York. But now there were 12 tempeh brands on the market. In about June the distributors dropped ‘Appropriate

Foods' products. So they built an insulated box in the back of a pickup truck and began to deliver their own products. From this painful experience Werz learned a key lesson: "In the food business, distribution is everything." If a company does not have control over the distribution of its products, it is extremely vulnerable.

Werz and Sibek quickly realized that they had to expand their product line, so in June 1982 they started making three new products: (1) Tempeh Brothers brand Soyfurters, a cake of tempeh sliced lengthwise into 4 sticks, marinated, and seasoned with liquid smoke, to sort of resemble hot dogs; (2) No Cow brand Soymilk (the soybeans were ground in a motor-driven Corona mill) in plain, cinnamon-honey, and carob-honey flavors; and (3) Tempeh Brothers brand Tempehburgers.

In the summer of 1982 the company added Tempeh Brothers brand Super Tempeh and Soy-Rice-Sesame Tempeh, and dropped the Soyfurters. Dave Sibek left in early 1983."

"In Feb. 1984 Werz and a partner, Shelley Martin, started a second business, The Soy Source, to allow Appropriate Foods to start selling their products, under The Soy Source Brand, to supermarkets. Their first products were shoyu (Japanese-style soy sauce) and tamari (wheat-free soy sauce). The first new tofu product in the new line (launched in Feb. 1985) was Perfect Pasta brand Tofu Tortellini (frozen). The tofu was purchased from Nasoya and the product made by the pasta maker. In Sept. 1985 Vegetarian Gourmet Traditional Pot Pie with Tempeh and Tofu Quiche, both frozen, were added to the new line."

"On 1 Dec. 1986 Appropriate Foods completed its move to a larger building in the East Brooklyn Industrial Park at 292 Liberty Ave., Brooklyn, New York. Production began there in March 1987. In mid-March four new tempehs were launched as gourmet items, with silver and gold labels, under the Emperor's Best Brand: Garbanzo Tempeh (with no soy), Soy & Amaranth Tempeh, Rye-Caraway-Soy Tempeh, and Brown Rice Tempeh (with no soy). A nice article in the *New York Times* (24 June 1987) noted: "Today, with six employees, the company produces about 10,000 pounds of tempeh a month. About half is sold to health food distributors and the rest is delivered to about a hundred stores and restaurants in the metropolitan area."

"As of September 1987 products made under the Appropriate Foods brand include Soy Tempeh, Super Tempeh, Soy-Rice-Sesame Tempeh, Tempeh Burgers, Soymilk, and Tofu Salads. Garbanzo Tempeh and Amaranth Tempeh are sold under the Soy Source gourmet brand. Soy Source is still an independent company with its own books. The distribution arm of the company, called Appropriate Foods Distributing, is trying to broaden its line. The future seems to lie in 'crossover products,' sold in supermarkets."

The company is now one of America's largest tempeh manufacturers. They have developed many innovative

tempeh and tofu second generation products. Address: Lafayette, California.

1981. *Toyo Shinpo (Soyfoods News)*. 1987. 61 nendo no tōfu shōhi tōkei [Tofu consumption figure in 1986 is 5.29% lower than last year. Natto consumption is up]. Sept. 11. p. 4. [Jap; eng+]

• **Summary:** This is the first time in 23 years that tofu consumption per family per year has gone down 2 years in a row. In 1987, the Japanese people bought the least amount of tofu in 10 years. Naha (Okinawa, Japan) was first in the amount of household income spent on tofu, while Morioka was the top in the number of cakes sold per family (118 cho). The top selling location for deep-fried tofu pouches and burgers (*aburage* and *ganmo*) was Fukui while sales dropped in Kobe.

Natto, on the other hand, reached the highest number of packets bought per family in history. In Mito, families spent an average of ¥5700 on natto in 1987—a new record. Included in the article are two graphs giving figures of how much tofu per family per year was bought in the period 1977-1987, and how much tofu was bought per family per month in the period 1985-1987.

1982. Rahman, Majeedah. 1987. The Belize soyfoods and nutrition education project (Interview). *SoyaScan Notes*. Sept. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Majeedah got interested in nutrition in about 1969, when she started working with the Breakfast for Children Program run by the Black Panthers in Oakland. She then went to work for a community program called Akbar that fed breakfast, lunch, and dinner to 350 children.

Majeedah, who started the project, was first introduced to soyfoods in about 1970 by two black American twins, who had become Rastafarians. They were making and selling tofu burgers and tofu enchiladas in the San Francisco Bay area, mainly at flea markets. They went to Belize and made a little soymilk and soynuts for children at one of the primary schools. To start their program, they received a little financial help from REACH, an organization in Stancreek, south of Belmopan, Belize.

During the 1970s Majeedah became a Black Muslim. Elijah Muhammad believed that his followers should not eat soybeans because they were fit only for animals. That has changed recently. "Your Black Muslim Bakery" on San Pablo Ave. in Oakland now makes tofu burgers at its restaurant and bakery. In 1980 Majeedah transferred to U.C. Berkeley from College of Alameda and studied health and law, focusing on how law affected health. She got an undergraduate degree in social science and law. In 1981 she started an MPH program and also started to work at the U.C. Cooperative Extension, Expanded Food and Nutrition, Education Program.

In 1985 Majeedah attended the Women's Conference in Kenya. Right after that, in December 1985, she went to Belize (formerly British Honduras) to show some films. While there, because she was interested in nutrition, she noticed deficiencies of protein and vitamin A. She returned in January 1986, paying her own way, to study the nutritional situation further. She fell in love with the country, the blend of ethnic groups, the lovely scenery. She had been a vegetarian for about 15 years (partly because she is a Muslim and doesn't eat pork) and began using soyfoods about 8 years ago. So she noticed that a few farmers were growing soybeans for animal feed. She met with the minister of health, the nutritionist, and got permission to do some further studies at the hospital. In February 1987, after 8 trips to Belize, the project mentioned above was finally approved by the Belize government.

The project, which will run from June 1986 to June 1987, has 3 components: 1. Nutrition education, the most important, directed at the general public and health centers. Will train 1 person from each of 7 districts to be a nutrition education assistant. They will train others. 2. Get young farmers to form a cooperative and grow soybeans on the 25 acres of land. There is a trend away from farming in Belize. Presently (she thinks) all of Belize's soybeans are grown domestically; none are imported. The Mennonites in Belize grow most of the soybeans. They came from the U.S. (during the Civil War) and from Germany, and they own a lot of farm land. 3. A breakfast and lunch program from some schools in Belmopan, the capital. They are renting a 3-bedroom house in Belmopan and they have turned it into a nutrition education center plus a soy dairy to make soymilk for two schools, 2 times a week. They hope the Minister of Education will expand the program. The soymilk will be served to kids at school as a snack. Address: Project Director (nutritionist), 526 44th St., Oakland, California 94609.

1983. Karas, Thomas. 1987. Tofu in Germany, Soyastern, and Heuschen (Interview). *SoyaScan Notes*. Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Soyastern started making tofu in about December 1983, and is now the largest tofu manufacturer in West Germany. They now make 4,000 kg/week and sell it for DM 5/kg. Their other tofu products include Tofu & Herbs, Smoked Tofu, Paprika Spiced Tofu, Tofu Burgers. A Tofu Mayonnaise will be launched soon. Company is growing at 40% a year. Second largest in Germany is Yamato Tofuhaus GmbH. Heuschen in the Netherlands in the largest in Europe. They use Sermi, a new coagulant, which may be lactic acid, for their tofu is sour but inexpensive, DM2/kg. All other Dutch tofu companies except Morgenstond have quit; they can't compete with Heuschen's prices. DE-VAU-GE now makes their own soymilk. They used to buy from Alpro. But they buy tofu from Heuschen. Address: Soyastern Naturkost GmbH, Osterather Str. 26, 5000 Cologne/Koeln 60, West

Germany.

1984. *Plenty Bulletin (Summertown, Tennessee)*. 1987. Business school grads help build soy dairy in the Caribbean. 3(3):1-4. Sept.

• **Summary:** A food processing kitchen and soy cafe was constructed on the northeast coast of Dominica on the Carib Indian Reserve by locals with help from 8 MBA volunteers from the Wharton School of Business [at the Univ. of Pennsylvania in Philadelphia]. Carib farmers are now selling soybeans to the Plenty Soy Center in Roseau, Dominica's capital. Each week the Center produces 100 lb of tofu, 25 lb of soysage, 20 lb of tempeh, 30-50 gallons of soy ice cream, and 30-40 gallons of soymilk. Most of these soyfoods are sold through two co-ops that are managed by Plenty-trained Dominican staffs: the Ebenezer Women's Co-op in Marigot and the Kairi Soy Co-op on the outskirts of Roseau.

At the Soy Development Center in Roseau, Plenty Canada offers 2 six-week classes each year in home, village, or small industrial scale soyfoods processing. The staff also conducts two 16-hour training courses on other parts of the island mainly for home preparation of soyfoods. Fifteen farmers are growing ¼ acre each of soybeans. In Jamaica, Country Farmhouse Lifeline, a soyfoods production center in Kingston, makes 150 lb/week of tofu.

1985. **Product Name:** Vegetarian Wheat Cutlets (Seitan) [Garlic, Ginger, or Plain]. Renamed Wheatlets.

**Manufacturer's Name:** Sooke Soy Foods Ltd.

**Manufacturer's Address:** 2625 Otter Pt. Rd., R.R. 2, Sooke, BC, Canada V0S 1N0. Phone: 604-642-3263.

**Date of Introduction:** 1987 September.

**Ingredients:** Ginger: Gluten from organic wheat, water, shoyu (soybeans, wheat, salt), herbs and spices, kombu sea vegetables.

**Wt/Vol., Packaging, Price:** 225 gm (7.9 oz).

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Calories 124, protein 15 gm, carbohydrates 6 gm, fat 1 gm.

**New Product-Documentation:** Leviton. 1982. In a Small Bright Building. Talk with and letter from Wayne Fatt. 1988. Sept. 28-29. The business was started in 1980 in a small building in Sooke, a community on the outskirts of Victoria. It has since relocated twice. In May 1988 Wayne Fatt purchased the company from Wayne Jolley, and in July 1988 moved from 2625 Otter Point Rd., R.R. 2, Sooke, BC, V0S 1N0 to a much larger facility at 4247 Dieppe, in Victoria. The company name is unchanged. They now make Wheatlets (seitan, formerly called Vegetarian Wheat Cutlets, launched in Sept. 1987), available in garlic, ginger, or plain flavors.

Label for Wheat Cutlets sent by Wayne Fatt. 1988. Sept. 6 by 4 inches. Self adhesive. Dark brown and white on orange-yellow. The product is now named "Grainwave Vegetarian Wheat Cutlets," Made by Grainwave, Sooke,

“The soy milk ice cream was only made for the staff and patients at our institutions, the Shanghai Sanitarium and Hospital, and the Shanghai Sanitarium Clinic down town. It wasn’t for sale, and wasn’t

B.C. VOS 1N0.

1986. **Product Name:** Tofu-Veggie Treasure Balls.

**Manufacturer’s Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer’s Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1987 September.

**Ingredients:** Wildwood Tofu (organic soybeans grown in accordance with Sec. 26569.11 of the Calif. health and safety code, filtered water and nigari), any of the following vegetables (carrots, onions, celery, mushrooms, kale or potato), garlic, pure expeller-pressed hi-oleic mono-unsaturated safflower oil, unrefined peanut oil, and sea salt.

**Wt/Vol., Packaging, Price:** 6.8 oz vacuum packed. Retail for \$1.95 (8/88, Berkeley, CA).

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Jeremiah Ridenour. 1988. Aug. 26. The company started making Treasure Balls in Sept. 1987. These are also sold to restaurants. Product with Label purchased at Berkeley Natural Grocery Co., California. 1988. 3.5 by 2 inches. Gold and red. Silhouette of a wild wood with birds. “Serve hot or cold, in a sauce or as an appetizer.” Six balls, each 1.5 inches in diameter. Curry flavor. Soyfoods Center organoleptic test: 7.

1987. Miller, Harry, Jr. 1987. Early work with soyfoods in China. Current work with Miller Farms Food Co. and Solait (Interview). Conducted by William Shurtleff of Soyfoods Center, Oct. 15. 2 p. transcript. [1 ref]

• **Summary:** He is now writing a book on his lifelong work with soyfoods around the world. Note: Unfortunately (as of Aug. 2013), that book was never published and apparently even the location of the manuscript is unknown.

“The Shanghai company was named Vetose Nutritional Laboratories. Its main products were soy milk, called ‘Vetose Soya Milk.’ On the bottle the name was printed only on the tops. Glass blowers blew the milk bottles in Shanghai. The tops were a wide mouth Crown closure that went on a milk bottle. The only flavor we had was the ‘Acidophilus Vetose.’

advertised; we just called it ‘Soy Ice Cream.’ We just had it for parties etc. at the hospital. The Henningsen Produce Co. in Shanghai had a big ice cream plant; they used to make it for us at that time. Now they are in White Plains, New York (Phone 914-694-1000). They have an R&D plant in Omaha, Nebraska. Their biggest business was frozen egg whites and dried eggs. Now they are affiliated with a Chinese company in Shanghai.

“At first we made some meat analogs for our missionaries all over China. We went down to the Buddhist restaurant (I spent an awful lot of time down there) and we made gluten steaks that also contained tofu. Product name was ‘Min-Jing.’ My mother came back to the US for a vacation. While she was at the Washington Sanitarium and Hospital, the business manager asked her if she could help them make a new meat analog. They served it at the hospital. They had a little food processing plant there, and they started to make them there and can them. She showed them how to make the tofu. This happened in 1934-35. Ed Meisler or Misler (pron. MAI-zler) came out and specialized in making meat analogs. We also had a pure gluten analog with no tofu. By adding tofu we got a better grain and elasticity and it was a better vehicle for certain flavors.

“Also we took yuba, rolled it, added flavoring (duck, chicken, 2 or 3 flavors), cooked it in HVP. We were not selling these as products. They were mostly for Sanitarium use. Diet is the biggest problem that any hospital had in East Asia. My father brought out two top chefs to develop a dietary for our hospitals. We finally had 16 hospitals in China.

“We also made Nut-Mete (Dark or Light) from peanuts and starch, adopted from Battle Creek. That’s about it for Shanghai meat analogs.

“I used to know Jethro Kloss. I used to play with his boys. I am not sure whether or not he ever had a company making commercial soy products. But I think in Pennsylvania some place he did have. Not on a big scale. Maybe kitchen type. I think his products were not commercial. I know he did not have a food processing plant in Takoma. He had a couple of kids in Washington Missionary College.

"I don't like the name Willis. The kids at school used to pronounce it like 'Will Ass.' Now everybody calls me 'Harry Junior.' My son is Harry III." Willis always calls his father Dr. Miller. I promise to do it this way.

"I'm working with a woman writer. We're going to bring out a book like *China Doctor*. I've started to work on it. Dad and the older folks would go to restaurants, but the chefs were guarded and would not reveal their recipes. The next day I'd go down, a kid of just 12 years old. They called me *Hsiao Mi Lai* meaning 'small rice.' My father's name in Chinese meant 'Rice.'" Willis is dictating it. He has now got stuff down on paper. Ivan is doing the work. "It will probably be out early summer next year. Its mainly about my work with soy."

"You see what happened, Bill. Most of Dad's time was spent with his medical work. But he was so interested in this that when I finished my pre-medical work he said, 'Son, I think you better stay on foods.' That's what I followed. I was at SDA colleges: EMC = Andrews Univ. for 1 year then Washington Missionary College for 1 year then La Sierra College. I finished at Atlantic Union College. All undergraduate. Did some mechanical drawing and engineering too. Dad would tell me what he wanted. I worked out the formulas, made the machinery to do it, and his work was primarily gathering information in the field. I followed up and did the detailed work.

"I have a 4-foot long box of papers of our correspondence, on all these little plants he put in. He would ask me to design it. I would, and send him the designs.

"I'm now living in Cedar Falls." Note: In an apartment? Where is the 4-foot file?

"We've had a marvelous reception for Solait. It is powdered only. Just the natural flavor. We demoed it to Worthington Foods and Loma Linda Foods. Sold lots at Adventist Camp Meetings. We're working on an ice cream dry mix, but it's not perfect yet. We make Solait from soybean, corn oil, rice syrup, and a touch of sea salt. No stabilizers or artificial flavors.

Willis will send Soyfoods Center Solait and a label. "Its been on the market now for about 4 months. It's a Miller Farm Foods product."

Follow-up: Call Bob Fisher. Encourage the book. Please send a label. What was the introduction date of Solait. Ask him: Where is the 4 foot file of papers? Address: c/o Miller Farms Food Co., Cedar Falls, Iowa.

1988. Golbitz, Peter. 1987. Is it time for Tofuggets [Tofu Nuggets like Chicken McNuggets]. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Oct. p. 2.

• **Summary:** Chicken McNuggets have been so successful that they have transformed the broiler industry. Why not introduce the same concept, using tofu instead of chicken? Address: Soyatech, Bar Harbor, Maine.

1989. **Product Name:** New Tofu Link Specials (Meatless Hot Dogs with Soy Cheese).

**Manufacturer's Name:** Light Foods Inc.

**Manufacturer's Address:** St. Louis, MO 63303.

**Date of Introduction:** 1987 October.

**Ingredients:** Water, real Tofu, isolated soy protein, non-hydrogenated vegetable oil, cheddar style soy cheese (fresh soy milk, soy oil, calcium caseinate, fresh tofu, natural flavor, salt, lecithin. citric acid, guar gum, annatto (natural color)), rice syrup, natural spices, salt, beet powder, tamari (natural soy sauce), barley flour, locust bean gum, natural flavors, onion powder, garlic powder, natural spice oils.

**New Product-Documentation:** Poster. 1986. Sept. "Tofu 'n Cheese Links. Made with Real Tofu and cholesterol free soy cheese. No cholesterol, no MSG, no sugar, no meat." Poster. 1987, undated. "Higher Still... With natural imitation soy cheddar cheese." Talk with Bob Davis. 1988. March 26. These feature soy cheese, sort of like Oscar Meyer's meat counterpart. Talk with Lauraine Davis. 1988. Aug. 28. These are made with Richard Rose's soy cheese. Leaflet. 1988. April. 8½ by 11 inches. Black on light blue. "On the rise... Now you want a link with no animal ingredients, non-hydrogenated oil, less fat, maybe a rice syrup sweetener instead of honey, and an even better flavor. Introducing the New Tofu Light Links, and New Tofu Light Link Specials, with natural imitation soy cheddar cheese." Leaflet. 1988. April. 8½ by 11 inches. Blue and red on beige. "Higher still..." Gives ingredients for New Tofu Light Links, and New Tofu Light Link Specials.

1990. **Product Name:** Lightlife Party Pups (Meatless Frankfurters. Cocktail Size Tofu Pups). Renamed Tofu Party Pups by Feb. 1988.

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302.

**Date of Introduction:** 1987 October.

**Ingredients:** Same as Tofu Pups.

**Wt/Vol., Packaging, Price:** Approximately 24 per 12-oz. package. Retail for \$2.99-\$3.19.

**How Stored:** Refrigerated, 45 day shelf life.

**Nutrition:** Per 1 oz.: Calories 62, protein 6.2 gm, carbohydrates 1.1 gm, fat 3.6 gm, sodium 104 mg.

**New Product-Documentation:** Ad in Natural Foods Merchandiser. 1987. Oct. p. 93. *Soya Newsletter*. 1987. Sept/Oct. p. 6. Spot in Natural Foods Merchandiser. 1987. Dec. p. 49. Label reads: "Reduced sodium. No nitrates. No cholesterol. Cholesterol free. All natural. Made with real tofu." New Label. 1988. 3.5 by 4.5 inches. Red on yellow. "Cholesterol free. All natural. No nitrates. Lower in fat. Lower in sodium."

Talk with Michael Cohen. 1991. Sept. 17. This product died rather soon after being launched.

1991. Mozzer, Patricia. 1987. Vegetarian cooking for diabetics. Summertown, Tennessee: The Book Publishing Co. 144 p. Illust. Index. 23 cm. [28 ref]

• **Summary:** Containing over 100 vegetarian dishes and many color photos of recipes, this vegan cookbook features many based on tofu, tempeh, and soybeans. These foods are introduced in a section on legumes (p. 20-21). Soy-related recipes include: Tofu salad I and II (p. 71). Tofu potato salad (p. 72). Tofu vegetable soup (p. 76). Tofu tomato soup (p. 78). Tofu sandwiches (p. 80-81). Tofu pita pizzas (p. 81).

In the recipe section on Main Dishes, a section titled "Tofu, tempeh, and soybeans" (p. 84-99) contains: Cashew-carrot Parmesan (with tofu). Far East fried rice (with tofu or tempeh). Savory tofu casserole. Tofu-vegie pie. Oriental tofu. Tofu-mushroom pot pies. Tofu quiche. Tofu pizza. Tempeh stuffed eggplant. Soybean-mushroom pilaf. Soyburgers with mushroom stuffing. Tempeh Parmesan. Tofu lasagne. Tofu macaroni and cheese. Sesame tofu. Crepes with tofumatouille filling (p. 112).

Diabetes mellitus affects about 11 million Americans. There is no known cure. "Proper diet is the cornerstone for any successful diabetes management plan. Generous intakes of starchy foods rich in fiber are essential to good diabetes control."

1992. Naik, D.M.; Joshi, J.M.; Tichagwa, J.S. 1987. Expanding production of soybeans in Southern Africa. In: S.R. Singh, K.O. Rachie, and K.E. Dashiell. eds. 1987. Soybeans for the Tropics. New York: John Wiley & Sons. xx + 230 p. See p. 87-92.

• **Summary:** Discusses the production and utilization of soybeans (mostly for oil and meal) in Zimbabwe, Zambia, Mozambique, Malawi, Angola, and Swaziland. The demand for edible oils is increasing in Southern Africa as is that for livestock feed, stimulating the production of soybean throughout the region. Zimbabwe (formerly Rhodesia) is the leading producer with 90,000 tonnes/year, followed by Zambia, with 10,000 tonnes/year. Malawi and Mozambique produce about 1,000 tonnes/year. During the early 1980s, nine Southern African nations formed the Southern African Development Coordination Conference (SADCC) to work together for regional improvements. In the region, 12 scientists are working on soybeans, including 5 each in Zimbabwe and Zambia. At present the bulk of soybeans is produced by large-scale growers who rotate the crop with dry-season (May-Oct.) irrigated wheat. In Zambia, soybeans are now being incorporated in flour (5% soy flour with 95% wheat flour), for breadmaking, in sausages (5-10% soy), breakfast foods, baby foods, and high protein biscuits. They are also being used in baby foods and to supplement flour in Swaziland and Zambia.

Tables show: (1) Soybean research personnel in the five SADCC countries (Malawi, Mozambique, Swaziland, Zambia, Zimbabwe). (2) Production and yield of soybeans in

Zambia and Zimbabwe (1981-1984). In Zambia production increased from 4,100 tonnes (metric tons) in 1981 to 10,500 tonnes in 1984. In Zimbabwe production increased from 65,800 tonnes in 1981 to 90,000 tonnes in 1984.

(3) Performance and characteristics of soybean cultivars grown in Zambia and Zimbabwe. In Zambia, the highest yield (1.91 tonnes/ha) came from the varieties Santa Rosa and Caleyia (both of which originated in Brazil). In Zimbabwe, the highest yield (3.47 tonnes/ha) came from the variety Duiker (which originated in Zimbabwe).

(4) Production of soybeans by the small-scale sector in Zimbabwe, 1981-84. Production peaked at 600 tonnes in 1983.

(5) Soybeans purchased by expressers [for oil] in Zimbabwe, 1980-84. They purchased 71,900 to 84,300 tonnes per year, accounting for 40-44% of the total oilseeds purchased.

(6) Uses of soybeans in five SADCC countries (Malawi, Mozambique, Swaziland, Zambia, and Zimbabwe). The uses are for cooking oil, animal feed, baby foods, and supplement flour. Address: 1&3. Dep. of Research and Specialist Services, Causeway, Harare, Zimbabwe; 2. AID, Magoye Regional Research Station, Magoye, Zambia.

1993. **Product Name:** Soyboy Tofu No Baloney.

**Manufacturer's Name:** Northern Soy, Inc.

**Manufacturer's Address:** 30 Somerton St., Rochester, NY 14607.

**Date of Introduction:** 1987 October.

**Ingredients:** Real tofu (filtered water, organically-grown soybeans, natural calcium chloride nigari—a natural mineral coagulant, not a preservative), isolated soy protein, herbs & spices, natural flavorings, onion powder, garlic powder, sea salt, vegetable gums, liquid smoke.

**Wt/Vol., Packaging, Price:** 8 oz vacuum packed.

**How Stored:** Refrigerated, 35 day shelf life. Or frozen.

**New Product—Documentation:** Manufacturer's catalog.

1987. Oct. But not yet launched. Label. 1987. 3.5 inches diameter. Red, green, and black on yellow. "All natural meatless entrees. Cholesterol free. No preservatives and nothing artificial." Talk with Andy Schecter. 1988. Feb. 17. Launched in Oct. 1987.

Talk with Andy Schecter. 1991. Feb. 5. This product was discontinued for a while then re-launched in 1990.

1994. Shurtleff, William. 1987. History of White Wave, Inc. Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** A detailed history of this pioneering, very creative, and rapidly growing company. Contains production and sales statistics at each major phase of growth. Early days: White Wave was founded and started making tofu in September 1977 by Steve Demos in Boulder, Colorado.

Born on 24 April 1949 in Philadelphia, Pennsylvania, Demos attended Bowling Green State University in Bowling Green, Ohio, majoring in political science and philosophy and graduating in the fall of 1970. He was introduced to tofu in the summer of 1970, when he was traveling in a van in northern California with a friend, who bought some at an Oriental food store. Demos found it to be a good source of protein, and liked the flavor.

Right after graduation Demos took two trips to India. During the first in 1971, with Pat Calhoun, he became a vegetarian after witnessing the meat bazaar in Afghanistan. In early 1972 he took a longer trip to India, again with Pat Calhoun. It included 10-day Buddhist meditation course with a teacher from Burma, Goenka, who became his spiritual teacher. He also lived for 1-3 months in a cave near Rishikesh (in the foothills of the Himalayas in northern India), doing Hatha Yoga and meditation. There were monkeys in the forest trees, tame peacocks, a stream 10 yards in front of the cave that dropped into a bathing pool, and many sadhus (Indian holy men) practicing in other caves nearby. Then in 1974 he started a health food store [named Touch the Earth] in La Haska, Pennsylvania, where he grew acquainted with many new foods such as miso, sea vegetables, and *gomashio* (sesame salt). After 9 months he sold the store and returned to India again. He was now actively involved in meditation.

After that trip, Demos started living on the East Coast in New Hampshire. By 1974 he began buying tofu in Boston, Massachusetts, then made it a few times in the kitchen and used it in cooking for a yoga studies group, which had purchased a farm. He was in charge of food and he had learned how to make tofu from the *Ten Talents* cookbook. In March 1976, after a trip to India, he was in Santa Barbara, California, at a 76-day meditation retreat with teacher Robert Hover. He made tofu, starting at 4:00 each morning in a commercial kitchen, for 100-150 people, using *The Book of Tofu*. During this retreat Demos conceived of and developed the idea of starting a tofu company, including the name and logo. Three months later he found himself, a hippie with long hair, in Boulder, Colorado. He had an idea but no capital, and was living on food stamps. By good fortune he met a man named Anton Rogers (a talented architect and builder), who loaned him \$2,000 startup capital, after having known him less than a month. So in the summer of 1977 Steve began buying equipment for making tofu. His new company was not yet officially established or registered—though he probably opened a checking account at a local bank.

Demos started making tofu at White Wave on 27 September 1977. “At 11:30 a.m. I sold my first block. I’m staring at the astrological chart which sits next to my desk. That was when I translated the effort to a dollar.” The company began as a sole proprietorship, located in very small (300 square foot) rented quarters at 1738 Pearl Street in Boulder, Colorado. The front one-third of the

shop was used for a retail deli and the back two-thirds for food production. From day one, the tofu was made from organically-grown soybeans. Each 14-ounce block of tofu was sold, floating in water, in Chinese food take-out cartons. For details on White Wave’s early use of organically grown soybeans, see SoyaScan interview with Steve Demos (Aug. 1998). The first batch of tofu was used to feed the participants in a ten-day meditation retreat in Boulder.

One direct competitor was the Spinning Kitchen, which had started 9 months earlier, in about January 1977. They had the Boulder market locked up when White Wave started.

White Wave had three products from the opening day: Nigari Tofu, Black Walnut Mushroom tofu, and Lemon Herb tofu. The latter two innovative flavored tofus were made by mixing the natural flavorings into curds at a specific point before pressing. Shortly White Wave expanded into making sandwiches, which led to salads, drinks, pies, cakes, and muffins. One of the first stores in Boulder to sell Steve’s tofu was Green Mountain Grainery, owned and run by Bruce Macdonald. Pat Calhoun (formerly Demo’s wife), arrived in December from the Pacific Coast Bakery in California, bringing all their recipes. Recipes for baked goods (such as cinnamon rolls and cookies) were adapted.

By early 1978 soymilk (plain, honey-sweetened, or carob-maple) was introduced, sold out of a jet spray juice cooler or in quarts, and also used to make Coconut Cream Pie and Tofu-Agar Pies filled with various fruits (apples or whole strawberries, peaches, or blueberries). At about the same time the okara from the tofu started to be used to make one of America’s earliest brands of Soysage. This spicy Vegetarian Soysage (shaped like a sausage) was distributed with the tofu. Before long White Wave was making a host of delicious and innovative tofu deli products which were sold only at the Pearl Street deli. These included Macro Pizza with Tofu, Mexican Entrees, Okara Granola, and Tofu Dogs and Sauerkraut (very firm tofu cut into long rectangles and marinated broth). Soy Sannies (Miso-tahini Sandwiches) were also sold at nearby health food stores.

To help attract customers, the deli also sold an assortment of then largely unknown food products: 10-15 varieties of Japanese and American miso, many sea vegetables, shoyu, kudzu, umeboshi plums, and the like, many of the same products Demos had sold 4 years earlier at his health food store in Pennsylvania. Most of these were of great interest to macrobiotic devotees, though Steve had little personal interest in that subject.

Tofu was quickly recognized as a tremendously versatile, all-American ingredient. Now new people started coming into the company. Some were cooks and they helped to develop new products. In 1978 White Wave began to distribute a number of its most popular deli-type products to other retailers. These were among America’s earliest commercial second generation tofu products: Missing Egg Salad (America’s first, named by Trudy Stuart), Tofuna Salad

(Vegetarian Tuna Salad), and Tofu Turnovers (with spinach and feta cheese filling). Other innovative second generation products sold or used only at the Pearl Street deli included Tofu Treats or Creamies (in banana-coconut, peanut-carob, or carob mint flavors), Miso Salad Dressings (hearty or mellow), and Tofu Mayo (eggless mayonnaise used in the Missing Egg Salad). Address: Lafayette, California.

1995. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part II). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: At the same time White Wave started making nut and seed products in the same little shop, starting with gomashio (sesame salt), tamari-coated sunflower seeds and almonds, and nut butters.

Just a year after opening, White Wave was forced to expand out of the tiny Pearl Street shop by the demand for its deli products from outside retailers, such as Arati and other natural food stores in Boulder. Demos recalls:

“We acted with very little foresight. It was more like ‘What do you want to do today? Let’s make something new.’ Finally we couldn’t get out the front door. We had to step over the top of buckets of tofu, presses, and boxes used to deliver our little Chinese fish cartons of tofu, stacked up so high we couldn’t see out the window. It was chaotic. We were making money and business was booming, but we were only paying ourselves \$1.42 an hour.”

On 28-30 July 1978 a meeting of tofu manufacturers from across the USA was held in Ann Arbor, Michigan. The meeting was organized by Steve Fiering, Jerry MacKinnon (plus coworkers at The Soy Plant) and Bill Shurtleff, and hosted by The Soy Plant. Steve attended this historic meeting, and ended up rooming with Tom Timmins, head of the New England Soy Dairy. “I thought I was rooming with one of the idols of the industry. Just by virtue of association, I was going to do well.” At this meeting the Soycrafters Association of North America (SANA) was established, with Larry Needleman as executive director of the new trade association. Steve was elected to be one of six members of SANA’s steering committee. Various photos of the meeting show Steve, with long hair and mustache, leading and participating in the discussions. A yellow lined sheet titled “Tofu Sales” was circulated to all attendees; Steve wrote that White Wave was making medium-firm bulk and packaged tofu, which wholesaled for \$0.65 and \$0.74 per pound, f.o.b. plant. Several days after the Ann Arbor meeting, William Shurtleff and Wataru Takai visited Demos, and saw how he made tofu at his tiny shop on Pearl St. in Boulder. They sampled and enjoyed the various creative offerings in the deli, and Shurtleff took home a label from each product.

At Walnut Street: In September 1978, after just a year at Pearl Street, the tofu company had long since outgrown its minuscule ‘back room’ space. So manufacturing operations

were moved to a 3,000 square feet converted warehouse at 3869 Walnut Street. It felt like they had moved into a castle, with ten times as much space. Now there was great pressure to expand the business to use up the extra space. The company began to make new products (such as tempeh, ice cream, and new deli foods) and look for new markets.

The deli remained at Pearl Street, and was given a new name, The Cow of China (a term from *The Book of Tofu*). The name “White Wave” was reserved for the tofu manufacturing company. But there was only one set of books, under White Wave. The company now changed to a partnership, with seven equal partners, all active. Demos was president and Pat Calhoun did the bookkeeping, and only these two were interested in meditation.

Right after the move, to announce The Cow of China as a retail outlet and its vegetarian deli products, Demos did his first real advertising, using three charming posters. The first read: “White Wave Through the Cow of China Offers Food from The Kingdom of Plants. We make it all here in Boulder. 100% Dairyless.” It then listed 14 soyfoods plus some non-soy desserts, almond-, cashew-, and peanut butters, and tahini. A second poster showed a soybean, with head, tail, and legs like a cow and dotted lines to delineate the choice butcher cuts. But instead of rump roasts and flank steaks were Soysage, Miso Dressings and the like. A third showed Jack, standing under a giant beanstalk, about to trade in his cow for the magical beans at which he is gazing in wonder. The caption: “We’ve got an alternative. White Wave Soy Dairy.” The latter two posters were used as catalog advertisements with a growing number of natural food distributors.

The tofu plant now consisted of an open kettle, VCM grinder, and hand press for the curds on the end of a swinging levered bar. White Wave started to deliver product to some Denver health food stores and in late 1978, not long after the move to Walnut Street, they landed their first supermarket chain, King Soopers supermarket chains, which began to order 100 cases. As business expanded, so did the need to improve packaging and marketing, and to control costs.

New packaging: White Wave couldn’t get its tofu into supermarkets unless it was sold in water-packed film-sealed plastic tubs (trays); the Chinese carry-out food/fish cartons were not acceptable. So Demos bought a little hand-packing machine that allowed one person to pack one block of tofu at a time in water in a plastic tray, then seal the tray with a film lid. Steve remembers first using this machine at the Walnut St. plant. Initially, he would seal the tofu tray with clear, unprinted film, then run one of their oval labels (the one with a hint of green color in it, used previously on the Chinese cartons) through a gluing machine (which was less expensive than buying pre-glued labels), and slap the label on the clear plastic film. This was White Wave’s “first true commercial mass market package.” The new marketable package led

to many new accounts. After King Soopers the company got into the City Markets chain, then about a year later into Safeway, followed by a host of other chains in outlying areas. As business expanded, White Wave could afford pre-printed film labels for its tofu in plastic trays. The label design, though rectangular, was basically the same as the old oval. The ingredients new read: "High protein soybean cake contains: Soybeans grown without the use of herbicides or pesticides, filtered water, and nigari (salt bitterns). No more no less!" Soon a variety of textures were available: Extra firm press, firm organic, extra firm, and sift.

New sources of soybeans: White Wave had made its tofu from organic soybeans from day one. When the company first moved into Walnut Street, they were still buying these soybeans from Green Mountain Grainery in Boulder. But in the fall of 1978 Steve drove to a meeting of the Organic Growers Association in Iowa. He spoke about the demand for organic soybeans and met Marvin Kurpkeweight, who was already growing soybeans organically in eastern Nebraska. Steve visited Marvin's farm and contracted with him to buy organic soybeans direct from the farmer. Address: Lafayette, California.

1996. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part III). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: White Wave's tofu production was growing nicely. It rose from 120,000 lb. in 1978 (2,308 lb/week), to 179,000 lb. in 1979 (3,442 lb/week, up 49%), to 279,000 lb. in 1980 (5,365 lb/week, up 56% over 1979).

In February 1979 a major new product line was started: tempeh. Chip McIntosh was the first tempeh maker, followed by Chris O'Riley. An old kitchen refrigerator, warmed by light bulbs, was used as the incubator. The first two products were Soy Tempeh and Soya Rice Tempeh, the latter being America's first multi-ingredient, soy-and-grain tempeh.

At about the same time, a third new product was launched: Polar Bean. It was a soymilk based non-dairy frozen dessert, made in a soft serve machine but sold in hard-pack pints. The first flavor was Banana-carob. Later strawberry, chocolate, carob mint, and orange flavors were added. In about 1984 a soft serve version called Polar Softie was introduced but did not prove successful.

Also in 1979 Richard Leviton visited White wave and the Cow of China, and did an in-depth study of their operations and products, published in the 1979 issue of *Soycraft* magazine. Soyfoods sold both at "The Cow" and for wholesale distribution to other retailers included: Organic Nigari Tofu, Soymilk (Honey-Vanilla or Carob-Maple), Soysage, Tempeh, Missing Egg Salad, Tofu Mayo, Baked Savory Tofu Cutlets, Sweet Bean Tofu Pie, Miso Salad Dressings (Mellow or Hearty), and Tofu Treats or Creamies (Banana-Coconut, Peanut Carob, or Carob-Mint; squares of

creamy baked tofu blend on a healthful oats-coconut-flour crust).

Other ready-to-eat items sold only at "The Cow" included Soysage Pate, "Macro" Pizza (with tofu), Tofu Spinach Dill Turnovers, Tofu Cinnamon Rolls, Hot Tofu Meatballs and Meatball Sandwiches, Sloppy Joe Sandwich (made with TVP), Tofu Cream Cheese & Black Olive Sandwich, Tofuna Sandwich (like tunafish), Strawberry Tofu Pie, Soy Sesame Bars, and Tofu Butternut Squash Pie. In mid-1979 bulk recipes for about ten of these products were published, with permission, in *Tofu & Soymilk Production* by Shurtleff and Aoyagi.

Leviton noted: "The Cow of China is surely one of the nation's most ambitious and energetic soyfoods companies." It was just about breaking even with weekly gross retail sales of \$1,000, three-fourths of which came from soyfoods. Concerning the growth of the still totally unmechanized little company Demos, now the self-styled "beneficent dictator," always frank and candid, added:

"It was a hell of a struggle, especially for an undercapitalized small business. But I certainly wouldn't discourage anybody because we started with nothing, and we've been going since then, and we've been able to make it all meet. We've just rigged, we've improvised, we've done everything imaginable, as I'm sure many other people in this industry have. We cut our salaries back, we did without a lot, but its own momentum kicked in. I suppose we consider ourselves alchemists in turning sweat into money. So, let me express my gratitude to everybody and everything, seen and unseen, who have helped us pull this together."

In August 1979 Gary and Chandri Barat arrived in Boulder and spent several days studying the Cow of China. They had met Demos at the Second Annual Soyfoods Conference in Amherst, Massachusetts (July 26-29, 1979). They were driving around the country, studying tofu and developing a business plan in preparation for starting a soyfoods company, which later became Nature's Inn, then Legume. As they studied The Cow of China and Demos invited them for dinner several times. He and his wife, Ginny, served a tofu spinach feta pie and mushroom caps stuffed with tofu. Later Barat told Demos more than once how much this visit has influenced him in starting a company based on tofu entrees. The lineage of Legume's early products (Tofu Cream Pies, Tofu Spinach Pies) can be traced back to The Cow of China.

Barat encouraged White Wave to do a feasibility study on converting The Cow of China into a fast food restaurant named The Family Diner and moving into a vacated A & W root beer stand three blocks from The Cow in a very attractive location. The study was done, a potential menu was developed, but financial backing did not come through.

A White Wave catalog published in December 1979 included several new products: Doufu (extra firm Chinese style tofu), Savory Baked Tofu, and Tamarind Nuts and

Seeds (Almonds, Cashews, Spanish Peanuts, Sunflower Seeds, Nut Mix).

The Cow of China deli was doing well. By February 1980 sales were \$1,700 to \$2,000 a week and there were often lines out the door. By the summer of 1980, according to *Soyfoods* magazine, the Cow of China had been renamed the Good Belly Deli, with the slogan “Real Food, Real Fast” and White Wave was producing 7,500 pounds of tofu and tofu products a week. The new deli, an expanded and Americanized version of “The Cow,” continued to serve as an excellent showcase for the White Wave’s innovative ready-to-eat soyfood products. Working with a friend who was an advertising agent, Demos had dropped the line of assorted health foods (miso, sea vegetables, etc.), expanded the deli items, and installed a stand-up counter bar to eat at and a few tables and chairs. Formerly it had been all takeout. Hot and cold fast food was served. The deli attracted lots of business (there was still usually a line out the door), the products were very innovative and they were praised by the natural foods community in Boulder. Address: Lafayette, California.

1997. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part IV). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: But White Wave was growing by leaps and bounds, as were sales of tempeh and Polar Bean soy ice cream. White Wave was doing all its own delivery in its own trucks to Boulder and Denver. And the business had not been capitalized, except for one new \$3,000 loan that brought in a silent partner. A loan of \$4-5,000 was outstanding from the IRS, in unpaid taxes

The Good Belly Deli lasted only 5-6 months. Though it was doing well and was probably making money (though the financial records were poor), it increasingly became a thorn in Demos’ side, for it was getting out of control. It was a drain on his time and energy, more than he could handle, and it seemed to be less important than the manufacturing end of things. So one day in the spring of 1981 he walked in and announced that he was closing a business that had lines around the corner. He wanted to focus on his main goal: to become the largest tofu manufacturer in his region. In retrospect it was a good decision, but he adds, “We were operating on a lot of idealism in those days, and not much practical business sense.” In October 1980 White Wave changed from a partnership to a corporation, with 5 active and one silent stockholders.

After closing the deli, the first real money came into the company. With a bank loan, they paid off the IRS, then soon paid back that loan. Then in the fall of 1981 Demos landed a \$69,900 SBA loan (SBA approved a bank loan) to buy new equipment and \$100,000 worth of equipment from Mountain High, a public company which made ice cream and yogurt,

and needed to get out of their Boulder ice cream plant at North 57th Court.

At North 57th Court: In September 1981 White Wave moved again, this time to Mountain High’s former ice cream plant in an industrial park at 1990 North 57th Court. *Soyfoods* magazine reported that Demos threw a huge “factory-warming” party for several hundred friends and customers, serving Polar Bean and many favorite tofu and tempeh recipes. This represented a huge, key expansion. The square footage increased six to seven-fold, initially to 6,000 square feet including 22,000 cubic feet of walk-in cold storage space. Big new equipment was purchased with the SBA Loan. The number of stockholders was now reduced to three: Demos, Pat Calhoun, and Chip McIntosh. The business was able to survive because of loans. Demos cut his hair.

The percentage of sales generated by the various product lines was tofu 50% or more, ice cream 10-15%, tempeh 20-25%, and nut butters 10-15%.

For several years Demos had been urging King Soopers to move his product out of the produce section into the dairy section. In mid-1982, after studying a report on “The Tofu Market: Overview of a High-Potential Industry,” published in May 1981, King Soopers made the move, in part due to customer demand. Initially sales were unchanged, since customers couldn’t find the product. But there was a big advantage to King Soopers: no shrinkage from spoilage because of the lower temperature. The margin initially went down to 15%, the same as for dairy products. This brought the price down. Later they got smart and raised the margins for tofu. Not it’s higher than milk but still less than produce. “I’m glad to see them making lots of money on our products,” noted Demos.

In May 1983 White Wave made a major decision: to vacuum package their firm tofu. They bought a used Tiromat vacuum packager from a beef-jerky company in Los Angeles. Thereafter everything went wrong, so much that that one machine “almost broke the company’s back.” Demos later called it “the curse of the devil,” and his production manager would often ask only half in jest, “Do you think we are sitting in vacuum packaging hell?” They found that tofu is a very difficult product to vacuum pack, though firm tofu is easier than soft. They concluded that 30% of the problems were caused by the machine, 30% by the product, and 30% by the operator, “and the rest was absolute karma.” The process was very unforgiving, as was the machine’s maker, which gave White Wave almost no support. They tried to disown the fact that Demos got stuck with a lemon. So White Wave had to solve all the problems by themselves.

Tempeh was now doing very well. In about 1982 White Wave began to make its own starter culture in order to get better quality control and save money: Alexander Lyon, who happened to be in town, spent a week teaching them

the intricate process for \$100. They also began to sell all tempeh frozen, after steaming. The product line was steadily expanded. By 1983 the company had introduced a Tempeh Burger and 5 Grain Tempeh (with soybeans, millet, wheat, oats, and barley). By 1984 the burgers were the company's best-selling tempeh product (48% of tempeh sales), followed by frozen soy tempeh (28%), soy & rice tempeh, then 5-grain tempeh. Accounting for one-fourth of White Wave's sales in 1984, tempeh was now the company's most profitable line of products. Making 5,850 pounds a week, White Wave had become America's second largest tempeh producer (after Quong Hop & Co.) and distribution had reached California. In fact, tempeh had now passed tofu as White Wave's most important product.

Polar Bean was also doing well. In 1984 it won a silver award in the annual Natural Foods Merchandiser contest, and that summer a Polar Pal ice cream sandwich was introduced.

"By 1983-84 White Wave broke the 10,000 pounds-of-tofu a week barrier and became a regional company, shipping tofu via many distributors throughout the midwest: Chicago [Illinois], Detroit [Michigan], Dallas [Texas], Salt Lake City [Utah], and Phoenix [Arizona].

Financial Crisis and Recovery: For most of its history, White Wave had been profitable, with plenty of cash and good financial records. Though the move to North 57th Court quadrupled their overhead, the company continued to make money for the first 2 years there, running a very tight ship. Then they started to encounter major equipment problems: a compressor breakdown and major non-stop vacuum packager nightmares. A maintenance team had to be hired. White Wave was growing into a company that needed management, but the sales volume could not support that. Sales were good, profits were small, and overhead was skyrocketing. This led to a slow tailspin, losing \$1,000 a month during 1983-84. These were not considered major losses but the upward trend had been reversed.

By August 1984 White Wave was \$40,000 in debt and people were burned out. Decisive action was needed. In September Demos hired Lester Karplus to take charge of daily operations while he started to do a business plan to raise equity. But in the following months losses increased dramatically, to \$10-\$15,000 a month. White Wave lost a total of \$60,000 during the next 6 months. Finally in February 1985, amidst his first real crisis, Demos fired Karplus and McIntosh, and took over the whole company himself. His four-part strategy was cut overhead to the bone, bring in new cash quickly, hold creditors at bay as long as possible, and implement a system of data collection (which Karplus had helped develop) to generate better production and financial reports. Address: Lafayette, California.

1998. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part V). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based

on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: First, he laid off all managers (who were not producing day-to-day results). Future plans were put on hold.

In October 1984 Jason Bois, who had been around the health food business for many years, approached White Wave to discuss having White Wave make him a soft serve soy ice cream. Demos advised against soft serve, but when Bois persisted, Demos developed a new soft serve formula for him, containing tofu and spray dried soymilk. Launched in January 1985 and marketed under the name Tofruzen, they failed within four months, for lack of a market. Bois quickly returned to Demos and beseeched him to develop Tofruzen in hard pack pints so that Bois could use these products to raise equity capital in a public stock offering. Demos had all the hard-pack formulas for Tofruzen developed in 30 days, using an improved version of his Polar Bean as the base mix but with totally new flavors (chocolate, strawberry, vanilla-almond). After Tofruzen launched the new products mid-1985, they realized that they didn't really own anything. So Demos, with some unexpected luck and seeing a way to bring in new cash quickly, proposed Tofruzen buy the title to the formulas for \$25,000 cash, plus \$25,000 in 6 months, plus interest. And White Wave would have an extensive supply contract. Tofruzen agreed.

In December 1985 Tofruzen, Inc. raised \$1.6 million net in a public stock offering, and at that time paid White Wave its first cash. Tofruzen Bars followed in May 1987 and low-calorie Tofruzen Light in August. Once Demos saw that Tofruzen would be a successful product, he downplayed marketing of his Polar Bean. Tofruzen sales rose from \$91,000 in fiscal 1986 to \$158,000 in 1987.

Shortly after Karplus left, White Wave started selling its tofu in a colorful box. Karplus served as an agent to negotiate with advertisers and designers. The new package helped sales.

In mid-1985, to consolidate its business focus and bring in more cash, Demos sold White Wave's nut butter business to an employee for \$35,000. White Wave retained 5% interest in the company, which is now called Naturally Nuts.

To turn the tide of losing money and get some badly needed breathing space, Pat Calhoun came up with a plan where she and Demos would call all the creditors and say, "Either we file bankruptcy or you allow us to pay off our debts to you over a one year period." All creditors agreed to this plan.

In July 1985, the moment of truth, the turning point, arrived. The company was \$100,000 overextended (60 days behind in payments) and could not borrow money. Everyone was disheartened. Demos and Calhoun started regular sitting meditation again, recommitting himself to spiritual practice as central and profitability as essential. He recalls, "Once I got my priorities straight, things started to go well." Within 90 days White Wave had started to generate a positive cash

flow. By mid-1986 the \$100,000 debt had been paid off, and White Wave was once again accumulating cash and savings.

Demos decided to try his approach on another company, Soyfoods Unlimited Inc., a major tempeh manufacturer, which he had been offered an opportunity to buy. Having started tempeh production in February 1981 in San Leandro, California, Soyfoods Unlimited had grown to be America's third largest tempeh manufacturer by 1984, Soyfoods Unlimited was now heavily in debt. White Wave didn't have any extra money, but the offer made sense as a way to get distribution for White Wave products in California and the West Coast, and to increase production volume. So on 1 December 1986 White Wave made its first acquisition. The buyout took place over a period of time, with some cash down. By mid-1987 Soyfoods Unlimited had been turned around and was a profitable, wholly owned subsidiary. White Wave owned all the stock and had signed a supply agreement with Soyfoods Unlimited to supply them with everything. This acquisition, with all tempeh production for both brands done at White Wave in Boulder, helped boost weekly output to 17,000 lbs. a week by the fall of 1987, making White Wave the biggest tempeh manufacturer in the USA. Growth of tempeh was strong and its future looked very promising.

White Wave has long been one of America's most innovative tempeh companies, in part because of its faith in the potential and future of tempeh. Tempeh continued to be the company's most profitable product. During 1985-88 the tempeh line was expanded with a number of original and delicious varieties: Quinoa (6/85), Lemon Broil (10/86), Amaranth and Sea Veggie (both 3/87), Peanut Sesame (3/88), and Teriyaki Burger (8/88). These also gave his product line more shelf space, a key consideration.

At King Soopers and Safeway, White Wave now had three shelves with tofu and tempeh right in the middle of the dairy section.

Tofu production was also strong, averaging 15,000 lbs. a week in mid-1987. A future high priority was the plan to pasteurize their tofu to give longer shelf life. After several years of selling tofu vacuum packed in a box, White Wave introduced a water pack without the box for the Asian-American market and some Caucasians since they are not used to the vacuum pack, and they prefer softer tofu, which cannot be vacuum packed.

By mid-1987 White Wave was back into high gear and growing nicely. Their space grew from 6,000 to 20,000 square feet. White Wave was one of the few Caucasian-run soyfoods companies that has been able to grow without selling most of the company. Demos' family has supported him to a large degree. He had borrowed roughly \$25,000 from friends and family. The company still owed one-third on its SBA and Mountain High loans, and some to family. Assets were now about \$300,000 and liabilities are \$200,000. Since May 1987 White Wave had money in the bank and a growth rate above 30%. The 1987 sales projection was \$2

million, of which 8-14% was expected to be profit.

In December, projected revenues for 1988 were \$3 million. The company was in the midst of a private placement offering for \$500,000 and the banks had approved equipment loans for \$600,000. They have put in a bid to purchase an old (built in 1978) meat processing house on 2.4 acres in Boulder.

The Future: New products to be launched in 1989 include several meat analogs (tofu hot dogs/franks, due in March, aimed at the mainstream market concerned with cholesterol) and a soy yogurt.

Demos has set a number of goals for White Wave. First, to become the major primary soyfoods ingredient manufacturer in the region, and to maintain a profit margin of at least 10%.

Second, to make the concept of a clearly delineated and identified "Soyfoods Section" in the dairy case, succeed at King Soopers and Safeway. Set off with plastic dividers between yogurt and milk products, the section would be filled out with second generation soy products. This new concept would allow him to compete with larger tofu manufacturers (such as Azumaya and Hinode) who are lower priced but sold in the produce section. Address: Lafayette, California.

1999. *SoyaScan Notes*. 1987. New Trend: Many of the new soyfoods are being developed and marketed as all-American and fun: Tofu and tempeh burgers, tofu hot dogs, soymilk shakes, soy ice creams, tofu chocolate bars (Overview). Oct. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** This is part of the larger trend of the Americanization of soyfoods.

2000. **Product Name:** Lite Chef Entrees. Casual Meals (Dry Mixes) [Chili Rio Grande, Country Barbecue, or California Burger].

**Manufacturer's Name:** Sunfield Foods (Distributor). A Sunmark Company.

**Manufacturer's Address:** 8155 Hampshire St., St. Louis, MO 63123. Phone: 314-832-7575.

**Date of Introduction:** 1987 October.

**New Product-Documentation:** These dry mixes require the addition of firm tofu and water. The California Burger was formerly one of the Lite Chef Tofu Mixes. *Soya Newsletter*. 1987. Sept/Oct. p. 6.

2001. Blair, Betty J. 1987. Tofu. In casseroles, chili, and desserts, this amiable food fits into all tastes. *Detroit News*. Nov. 4. p. 1E, 2E. [1 ref]

• **Summary:** Dorothy Hwang, owner of Michigan Soy Products in Royal Oak, has a doctorate in chemistry from the University of Kansas and was a research associate in chemistry for 14 years at Wayne State University. She opened her tofu business 5 years ago. Since then sales have

tripled; she now makes 2,000 lb/week of tofu. She uses some of this to make tofu burgers, salads, and a frozen manicotti entree. She is marketing a tofu coconut pudding, which she may soon make herself. She also takes special orders for tofu cheesecake, cakes with tofu frosting, and tofu cream pies, including pumpkin.

2002. **Product Name:** Tofu, Tofu Burgers.

**Manufacturer's Name:** Diane Froggatt Tofu.

**Manufacturer's Address:** Post Restante, Anjuna, Bardez, Goa 403 509, India.

**Date of Introduction:** 1987 November.

**New Product–Documentation:** Letter from Om Shanti, c/o Lambert, Los Angeles. 1992. Nov. 16. A friend of Om Shanti's named Diane Froggatt [of Australian origin] runs a tofu shop in Goa, India. "For the last 5 years she has been making tofu and tofu burgers out of her home, and selling them to an international community at the flea market, and as a private business... She started to make tofu publicly because of its high demand and its unavailability. It is a small-scale business. She started by using *The Book of Tofu* (1975, Autumn Press)."

Letter (e-mail) from Lisa Camps of Goa. 2005. May 17. In 1982, while in Goa, Lisa met an Australian woman, Diane [Froggatt], who was making her own tofu, because it was not available, and all were tired of Dal (lentils). "I asked her to teach me, and she did... I happily made it for myself..." Diane's story is very sad. She was sick for about 18 months before she died, leaving twin boys (age 8), and another son (age 14) behind. She passed through Goa in the last stages of her illness on her way to Australia, where she died. The boys were looked after by friends and relatives. Diane's tofu shop, which she ran for about 2 years, is still there, run by a local family, making tofu, buying their tofu from us, and open for lunch.

Note: Goa is a former Portuguese possession on the west coast of India about 250 miles south of Bombay. It was annexed by India in 1962, and became a state of India in 1987. The capital is Panaji. It is a small state (1,404 square miles) with a population of about 650,000.

2003. **Product Name:** Tofu Classics: Mandarin Chow Mein, Creamy Stroganoff, or Shells 'n Curry (Pasta and Sauce Mixes).

**Manufacturer's Name:** Fantastic Foods.

**Manufacturer's Address:** 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.

**Date of Introduction:** 1987 November.

**Ingredients:** Mandarin Chow Mein: Whole wheat Oriental noodles, dehydrated vegetables (onions, carrots, peas, red pepper, green onions, garlic, parsley), corn oil, powdered yellow miso (soybeans, rice, salt), hydrolyzed vegetable protein, whole wheat flour, dried yeast (molasses grown), toasted sesame oil, powdered soy sauce (soybeans, wheat,

salt), spices, rice syrup powder, vinegar powder.

**Wt/Vol., Packaging, Price:** 4 oz (113 gm) paperboard box. Retail for \$1.65 (5/90, California).

**How Stored:** Shelf stable.

**New Product–Documentation:** Note: This product does not contain any tofu; it must be added. Ad in *Natural Foods Merchandiser*. 1987. Nov. p. 50. "Introducing... Tofu Classics. One pot cooking. Ready in less than 20 minutes." Dec. p. 16. "New Tofu Classics Take You Out of the Kitchen and Around the World." Also run in 1988. Jan. p. 40. Ad in *Vegetarian Times*. 1988. May. p. 11.

Label sent by Claire Wickens. 1990. May 30. 4.5 by 6.5 by 1.25 paperboard box. Tan, green, orange and red on beige. On the front panel is a photo of a white plate containing the finished tofu and pasta, plus a small insert photo of a package of water-packed tofu. "Add ½ pound firm tofu. All vegetarian. All natural." On the back is a pastel drawing of a Chinese person carrying two baskets on a shoulder pole by a lake. "One pot cooking. Ready in 7 minutes. Fantastic Foods' *Tofu Classics* are adaptations of favorite dishes from around the world, designed to enhance tofu cookery. We provide wholegrain pasta and a delicious sauce—you add tofu." Inside is a poly bag with short lengths of pasta and dried peas, diced carrots, etc.

Tofu Classics product with Label purchased at Open Sesame in Lafayette, California. 1998. Jan. 10. Mandarin Chow Mein, design copyright 1994. Price: \$1.89. Shells 'n Curry, design copyright 1994. Price: \$1.89.

2004. Goldbeck, Nikki; Goldbeck, David. 1987. *The Goldbeck's guide to good food*. New York, NY: New American Library. xi + 563 p. Illust. Index. 24 cm.

• **Summary:** The all-new version of their *Supermarket Handbook*, which originally sold 850,000 copies. Chapter 12 (p. 143-51), titled "Soyfoods: World Class Protein," discusses tofu, frozen tofu, tempeh, soy flour and grits, high-tech soy (soy concentrates and isolates), textured soy protein products. There is also considerable information on soyfoods in other chapters throughout the book: Soy flour (p. 79). Soy nuts (p. 159, 163). Soy milk (p. 184-85). Soy yogurt (p. 190-91, 195). Soy cheese (212, 217-18). Soy protein concentrates or isolates (p. 233, 451, 483, 527). Soy oil (p. 144, 264, 288, 292-93). Meatless burgers and soy sausages (p. 394). Soy ice cream (p. 452-53, 455). Soy sauce (510-11, 515). Miso (p. 511-12, 515). Worcestershire sauce (p. 512).

The section titled "Soy Yogurt" gives a nutritional analysis of cultured Soygurt, made by Cream of the Bean; per 8 oz. it contains 255 calories, 6.7 gm protein, 45.2 gm carbohydrates, 5.3 gm fat, no cholesterol, 20 mg sodium, and 7% of the US RDA for calcium. The text reads: "Those who must avoid milk will be interested in nondairy soy yogurt. A new arrival in natural food stores, this yogurt is made from soymilk and bacterial cultures. Gelatin is added to some brands to maintain the typical yogurt consistency. There is

no need, however, for the quality to be compromised by the addition of high fructose corn syrup, isolated soy protein, salt, and several thickening agents, as has been done in at least one brand we have encountered.”

The section titled “Soy Cheese” states: “Cheese based on soy milk has recently added a new category of cheese products to the market. In terms of calories, protein, and overall fat content soy cheese competes quite favorably with animal cheeses... It is both lactose- and cholesterol-free and the sodium content is about average for cheese. Note, however, that soy cheese is held together with vegetable gums and will contain either the milk derivative calcium caseinate (in which case it is not dairy free) or isolated soy protein.” Page 218 gives a nutritional analysis of Soya Kaas (soy cheese). Per 1 oz. it contains 78 calories, 6.7 gm protein, 5.6 gm fat, no cholesterol, and 168 mg sodium. Address: R.D. 1, Box 495, Woodstock, New York 12498 914-679-8561.

2005. Tofu Shop (The). 1987. This holiday season, make it Tofu Turkey (Leaflet). Arcata, California. 1 p. 28 cm. Single sided.

• **Summary:** Handwritten, with four illustrations: (1) The Tofu Shop, on pillars and with a tree growing overhead, at the edge of the ocean (lower left). (2) A clip-art illustration of a large turkey with tail fanned and near-side wing extended (upper left). (3) Corn plants growing in a field (upper right). (4) Santa Claus in traditional costume.

“- mmm delicious. \* Stuffed, basted, baked. \* Ready to eat or reheat. \* Great leftovers.

“That’s right folks! This year you can save the bird and eat it too! No bones about it. Special order one of our delicious Tofu Turkeys. They’re made 100% from our own traditional-style tofu, stuffed with our own secret family stuffing. And basted and baked to a golden brown. M’good!

“This year special order a Tofu Turkey from The Tofu Shop or stop by our deli for a ‘hot slice’ with all the fixin’s!”

The bottom half of the leaflet gives products, prices and order deadline dates. Address: 768 18th St., Arcata, California.

2006. *Toyo Shinpo (Soyfoods News)*. 1987. Ooshû demo tōfu buumu. Pari no kenkō shokuhin ten o mite [After a health foods exposition in Paris, will there be a tofu boom in Europe?]. Dec. 1. p. 5. [Jap; eng+]

• **Summary:** The expo was held in Paris from Nov. 7-9. Tofu and second generation tofu products were creating a lot of interest among people who came to the expo. Two French companies producing soymilk are Cacoja and Lima Foods. Their products are labelled Soja and Soya, respectively. Both companies plan to start marketing soymilk ice creams before summer, 1988. Lima Foods is making an effort to produce other soyfoods besides their soymilk such as soy hamburgers, desserts, salads, paté, and terine.

2007. Caton, Greg. 1987. Lumen and its future (Interview). *SoyaScan Notes*. Dec. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Lumen was founded in Feb. 1986 and started production in October. Presently the company’s sales are about \$50,000 a month and production is about 15,000 lb. The best seller is Cajun Jerky (\$30,000/month). The company is growing rapidly since he just got three big new distributors: Tree of Life, Akin, and Balanced Foods. Lumen is doing a joint venture with MJ Exports in Bombay to build a Lumen plant in India. MJ will own 51%. Greg worked for years with ADM. He also owned Richland Foods in Fairland, Iowa, which sold flavored TVP that was flavored before being extruded. This greatly lowered the quality of the flavors. He found that it is much better to flavor after extrusion. This was a major innovation, giving improved flavor and texture.

He also reduces stachyose and raffinose by extracting them using a centrifuge from the flour or the already extruded piece. Galactosidase is the only enzyme that will hydrolyze both raffinose and stachyose. Coating and flavoring are his specialties. He makes the jerky for Al Jacobson’s Garden of Eatin’. It used to be made by a company in Los Angeles. Address: Louisiana.

2008. Whitford, Harry M., III.; Karas, Thomas. 1987. Re: Soyastern Naturkost GmbH. Letter to William Shurtleff at Soyfoods Center, Dec. 14. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** The company has two equal owners: Bernd Drosihn handles buying, packaging, distribution to the natural foods market, and personnel. Thomas Karas handles marketing, distribution to the supermarket and commercial kitchen (foodservice) sectors, and production system development. Thomas’s wife, Yin Yin, is the bookkeeper, and his sister, Sabine, is the secretary. They have 8 full time employees, and 23 employees in all. Harry Whitford, a third member of the management staff is in charge of R&D, sanitation, and foreign correspondence. The company got buried under an avalanche of orders after the last Anuga food show. Harry Whitford continues: “We make four kinds of tofu—natural, smoked, smoked with bell peppers and spices, and with herbs de provence. All four are coagulated with cleaned nigari, and we use exclusively controlled organic soybeans. Then we have our fresh products—tofu burgers, lentil croquettes (with tofu), spring rolls, and tofu cutlets filled with sauerkraut. My new products are mayo-type eggless tofu dressing, and tomato dressing. They both have only 23% soy oil, so they’re much lighter than Nasoya’s. We have several new things underway; I’ll tell you about them later.

“I’m enclosing the labels you requested, and an article from the natural foods magazine *Schrot und Korn* which

gives you a brief history of Soyastern.” Address: Osterrather Strasse 26, 5000 Koeln 60, West Germany. Phone: 0221-170-1581 (or 2097).

2009. Robertson, Gary. 1987. Soyfoods Unlimited’s most important tempeh innovations (Interview). *SoyaScan Notes*. Dec. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** First, applying Hananya Kronenberg’s ideas for an in-house laboratory making tempeh starter culture so that they work in a commercial tempeh company. His consulting cost a little less than \$2,000 plus about \$5,000 in lab equipment, including a \$25,000 autoclave. The method for making silica gel crystals (the heart of Kronenberg’s PhD thesis, he adapted from Columbia Univ. project) was very important. The mother culture tempeh spores were stored on these crystals to keep them dry and viable until they were later grown out on petri dishes. Kronenberg’s starter produced better tempeh than did the NRRL culture.

Second, the design of the incubation room. It went up to an inverted V at the top so the hot air would collect there and be blown out into a plenum on top by fans. The room was also surrounded by a plenum. Cool air came in from below and entered the room through cracks in the walls when the fan blew hot air out.

Third, the dry dehulling was that developed by the University of Illinois. It was all gravity feed and very clean and efficient. Fourth, the method of making burgers using plastic rounds. Fifth, a moveable, portable pump that pumped the beans out of the kettle after cooking. Concerning White Wave, Gary feels that their tempeh is no longer as good as SUL’s was. Steve Demos did not take the time to learn the starter or tempeh process properly and he will be in a real bind when he runs out of crystals and Kronenberg’s culture. Address: Soyfoods Unlimited, San Leandro, California.

2010. *SoyaScan Notes*. 1987. Chronology of soybeans, soyfoods and natural foods in the United States 1987 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. Westbrae moves the production of Malted to California from Japan.

Jan. The Soy Plant, a tofu cooperative in Ann Arbor, Michigan, files for Chapter 7 bankruptcy. It is soon purchased by Bruce Rose of Rosewood Products, Inc.

Feb. *Soya Newsletter*, a 12-page, bimonthly publication costing \$96/year, is launched by Soyatech of Bar Harbor, Maine. Publishers are Peter Golbitz and Sharyn Kingma, former owners of Island Tofu Works. The publication quickly proves itself to be the world’s best English-language publication on soyfoods. By October, paid circulation tops 900 in 20 countries.

Feb. American Soybean Association petitions the U.S. Food and Drug Administration to require food manufacturers

to be more specific in labeling food products that contain highly saturated imported tropical fats (palm, palm kernel, and coconut oils). The petition includes results of a supermarket survey of 1,555 foods containing vegetable oils. 43% of the labels list multiple choice or generic vegetable oil ingredients which hides from the consumer the fact that the products contain highly saturated tropical fats. Imported tropical fats displace the equivalent of oil derived from 171 million bushels of soybeans. Herewith begin the great “Fat Wars” of 1987-88.

Feb. Lite Lite Tofutti introduced by Tofutti Brands, Inc. This non-dairy frozen dessert contains only 90 calories per 4-ounce serving. It soon becomes a big hit.

Feb. Ah Soy in Tetra Brik cartons launched by great Eastern Sun.

Feb. Options trading on futures for soybean oil and meal opened on Chicago Board of Trade.

March 4. The Federal Grain Inspection Service rules that soybean oil may be used to control grain dust in elevators. This voids the Barnham patent and opens up a large potential new market for soy oil, which is in surplus.

March. Great Shake soymilk launched by Noble Soya in India. Sold in Tetra Brik cartons in mango, strawberry, and chocolate flavors, it is the country’s most heavily promoted soymilk to date, but gets off to a slow start.

March 16-18. First International Congress on Vegetarian Nutrition held in Washington, D.C., sponsored by eight Seventh-day Adventist universities and health care organizations, and three SDA food companies, plus S.E. Rykoff/Sexton.

March. *Vitasoy Vitabrations*, a newsletter, starts being published by Vitasoy USA.

March 31. Hong Kong Soya Bean Products Co. Ltd., makers of Vitasoy, move into a large new plant (370,000 square feet costing \$20 million) in the New Territories. Sales of Vitasoy in 1987 is projected to be 126 million packs.

April 1. Tempehworks, Inc., America’s first major tempeh producer from Greenfield, Massachusetts, changes its name to Lightlife Foods, Inc. In recent years, Tofu Pups have become the company’s bestselling product.

April. Stir Fruity, a non-dairy, nonfermented, soy-based yogurt, is introduced by Azumaya Inc. of San Francisco. Shelf life problems cause the product to be withdrawn, causing Azumaya to set aside plans for an \$800,000 radio ad campaign in northern California. The product is soon back on the market, but in limited distribution and with little promotion. Yet during this year, Azumaya probably passed House Foods & Yamauchi to become America’s largest tofu producer.

April. *Healthy Times*, a bimonthly newsletter, starts being published by Morinaga Nutritional Foods of Los Angeles, makers of Mori-Nu long-life silken tofu, for members of the Mori-Nu Health for Life Club. By Aug. 1988 circulation is up to 10,000; A subscription costs \$3 a year.

May 26. Tofutti Brands Inc. and Coca-Cola launch Cheater's Delite, a major joint promotion featuring a 90-calorie scoop of Lite Lite Tofutti and a 1-calorie glass of Diet Coke, special labeling and couponing on 3 million bottles of Diet Coke, 5 weeks of heavy advertising in New York, New Jersey and Connecticut, and a Caribbean cruise sweepstakes.

June. Dr. Jane Gleason of the University of Illinois goes to Sri Lanka to spend a year studying its soybean and soyfoods industries.

July 1. Ralston Purina Co. of St. Louis, Missouri, establishes Protein Technologies International as a wholly-owned subsidiary to focus on sales of soy protein for food uses. The company's sales of soy protein products were \$139.8 million in 1986.

July. Victor Food Products in Toronto, Canada's largest tofu manufacturer, declares bankruptcy. The main cause: Overexpansion, trying to grow too fast.

Aug. The Barat Bar, an upscale chocolate bar containing spray-dried tofu instead of dairy products, is launched by Legume Inc. and extensively promoted. It soon becomes a big hit.

Aug. Brightsong Foods of Petaluma, California, ceases operations. Richard and Sharon Rose resign to found a new company, Rose International, which will be a tofu development, marketing, and consulting company, rather than a manufacturer.

Sept. 24. San-J International of Richmond, Virginia, dedicates the first tamari brewery ever built outside of Japan. The 40,000 square foot facility with a capacity of 1 million gallons a year is located in Varina, Virginia. San-J tamari was first imported to America in 1979.

Sept. 28. Plenty Soya Centre, run by Plenty Canada, opens in Kandy, Sri Lanka. They will sell as many soyfood products as possible at a reasonable cost.

Oct. 6. Anti-cholesterol campaign starts. The U.S. Federal Government and more than 20 health organizations issue the nation's first detailed guidelines for identifying and treating people whose blood cholesterol levels are more than 200 mg per deciliter. The guidelines signal the beginning of a nationwide health promotion campaign designed to reduce blood cholesterol to safer levels. This signals exciting new opportunities to market cholesterol-free soy-based alternatives to meat.

Nov. *Kikkoman Taste*, a stylish full-color "quarterly intercultural forum for the exchange of ideas on food," published by Kikkoman Corp. in Tokyo. Its focus is on shoyu in international cuisine.

\* During this year of the great vegetable oil wars, the ASA launched an all-out no-holds-barred campaign to educate Americans of the health dangers of tropical fats (palm and coconut oil; which succeeded) and to require such products to be clearly labeled (which failed).

\* This year the world's population passed 5 billion. It is

increasing by a record 80 million people a year, so that every 3 years the equivalent of one United States' full of people is added to the population of planet Earth. Continued.

2011. *SoyaScan Notes*. 1987. Chronology of soybeans, soyfoods and natural foods in the United States 1987 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. 1987 New Trends:

Rapid Rise in the Number of New Products in America. During 1987 more than 735 new soyfood products were launched worldwide, including at least 380 in the USA. Many of the most successful products are all-American and fun to eat: Ice creams, meatless burgers, vegetarian hot dogs, salad dressings, chocolate bars. This is part of the larger trend of the Americanization of soyfoods. Most of the growth has been in the traditional low-tech sector, including tofu, tempeh, soymilk, miso, soy sauce, soynuts, plus modern dairylike products such as soy ice creams, soy yogurts, and soy cheeses, all developed by the soyfoods movement. A growing percentage of these products are second generation products, which could also be called convenience prepared or value added products.

Growth of Consumer Awareness of Soyfoods in America. Ten years ago, perhaps 1% of Americans had heard of tofu, soymilk, tempeh, or miso. Today, probably 50% of Americans are aware of these foods. In 1987, for example, the Soyfoods Assoc. clipping service received a total of 1,587 clips on soyfoods. That is 132 articles a month, way up from 5 years ago.

Increasingly Positive Image of Soyfoods in the Western World. Generally speaking, from about 1945 through the 1960s, soy had a negative image in foods. It became neutral during the early 1970s. During the late 1970s and early 1980s, with the rise of the soyfoods movement and the growing sophistication of modern soy protein products (isolates, concentrates) soyfoods gradually developed a positive image. The Gallup Poll of 1977 was an early indicator of this. By the mid-1980s tofu had become a "hot ingredient." Companies deliberately added it to a product (or at least to the label) to help sell the product. Yet the Roper poll of late 1986, which found tofu to be America's most hated food, may indicate a tarnishing of this image.

Growing Interest of Larger Food Companies in Soyfoods. One indication of this trend is that *Soya Newsletter*, targeted at these companies and selling for \$96/year, has over 900 paid subscribers.

Continued Decline of Red Meat. This year consumption of poultry in America passed that of beef for the first time in history. Beef had been king for 3 decades. Before that, pork was king. A pound of chicken has one-fourth as much saturated fat as beef and takes much less grain, water, and energy to produce.

INTSOY Becomes a Major Force Worldwide

Developing and Promoting Soyfoods. Working with other international (IITA, AVRDC) and national soybean programs, and doing pioneering research on fresh green soybeans, extrusion cooking, and use of expellers for small-scale oil expression etc., INTSOY has become as effective in its new role (since 1985) of focusing on soybean utilization as it was before that when its major emphasis was on variety development and production.

The Competitive Position of the U.S. Soybean Industry is Slipping. Farmers in Brazil and Argentina can now produce soybeans at much lower cost than their American counterparts. This plus extensive subsidies have led to a dramatic drop in U.S. exports of soybeans and products since their peak in 1981. A major part of the problem is linked to the Latin American debt crisis, which surfaced in the early 1980s and forced debtor nations to export at all costs. This debt crisis (especially by Brazil, Argentina, Mexico, and Venezuela) is now being called the most serious problem facing U.S. agriculture.

Soybean Research Increasingly Shifts from Production to Utilization. Traditionally research focused on increasing production and yields. New efforts are designed to develop new markets instead of larger surpluses.

Big Increase in Breeding Soybeans for Food Uses. This is part of a larger trend toward value added products and toward finding new market niches for American soybeans, especially for foods in Japan.

Revival of Interest in Industrial Uses of Soybeans. The main interest is in new ways to use soy oil, of which there is a large surplus that depresses soybean prices. Promising applications include soy oil for printing inks, dust suppressants, and diesel fuels. The largest interest in industrial uses occurred during 1932-42, when the Chemurgic movement and Henry Ford sought to find industrial uses for all farm crops. Hence, there is a rebirth of interest in Henry Ford's work with soy.

Major Growth of Interest in Soybeans and Soyfoods in Africa. Excellent work by IITA in Nigeria and various national soybean programs (as in Egypt, Zimbabwe, and Zambia) have allowed this relatively new crop to reach the takeoff stage. Decreasing per capita food supplies and growing understanding of the nutritional benefits of soyfoods are sparking new interest.

Continued Rise of Soybean Production in Europe. The largest producer, Italy, which produced almost no soybeans as recently as 1983, harvested a record 1.3 million tons in 1987. France is the second largest soybean producer. All production is heavily subsidized.

Omega-3 Fatty Acids Hit the Headlines. Soy oil is a rich vegetable source of these fatty acids which are thought to have a beneficial effect on the cardiovascular system.

Nutritional Spotlight Increasingly Shifted onto Fats, Away from Proteins. During the past few years fats (and especially cholesterol and saturated fats) have come to

be seen as the leading problem nutrient, the bad guy, in the American diet. There is a new respect for complex carbohydrates (especially whole grains), which used to be called "starches" and were considered fattening.

New, More Complex View of Oils and Fats Becomes Popular. High cholesterol levels are considered more dangerous than ever, but equally important are the various cholesterol-carrying proteins in the blood. Two kinds (low and very low density lipoproteins) promote cholesterol deposits in the blood, while high density lipoproteins (HDLs) cleanse the blood vessels of fatty deposits. Moreover, saturated fats are considered at least as much of a problem as cholesterol.

So-Called Antinutritional Factors in Soybeans are Increasingly Seen as Having Benefits as Well. Trypsin has been shown to help prevent cancer. Saponins help reduce serum cholesterol. Isoflavones have antioxidant activity that may suppress breast cancer. This indicates that we may need a new term to categorize these substances that offer both benefits and disadvantages.

The Link Between Diet and Health Continues to Grow Stronger, among both scientists and the general public.

Interest in Exercise and Health Still Strong. Several years ago some experts saw this trend waning, but it now seems to be rebounding. For example, there were 21,244 finishers in the New York Marathon (including 3,689 women). Compare this with 12,512 finishers (1,621 women) in 1980 and 55 finishers (no women) in 1970.

Books on Tofu. Since 1974, at least 60 books on tofu (having the term "tofu" in the title) have been published in North America and Europe. Peak publication years were 1981 and 1982. By language, 46 of the books were in English, 7 in French, 4 in German, and 1 each in Italian, Portuguese, and Swedish.

Inactivity of the Soyfoods Association of America now becoming a major constraint on growth of soyfoods in the USA, at a time when interest is at an all-time high. Leadership is needed.

Rise of Canola (Rapeseed) Oil. It looks as if soy oil may have another serious competitor (in addition to palm oil) in future years. Canola contains less saturated fat than any other popular vegetable oil. Only 6%, versus 9% for safflower oil and 15% for soy oil. Lard has 41%, palm oil 51%, and butterfat 66%.

2012. Archer Daniels Midland Co. 1987. Annual report. P.O. Box 1470, Decatur, IL 62525. 33 p.

• **Summary:** Net sales for 1987 were \$5,775 million, up 8% from 1986, and up 310% from 1978. Earnings for 1987 were \$265 million, up 10.8% from 1986. Assets totalled \$3,862 million, up 16.5% from 1986. "With the world population growing to over 5,000 million during 1987, and estimated to increase by 80 million a year for the near future, the global food business will continue to grow... In ADM's

Oilseed Processing Division, greater use of soy protein isolates in the production of commercial and retail seafood products was the leading contributor to continued growth for protein products. ADM continues to be the largest producer of specialty soy products. R&D facilities for soy protein products were relocated to Decatur [from Chicago] during the year.

“The British Arkady Co. Ltd. (in Manchester, England)... expanded its marketing of ingredients and prepared mixes to the baking industry. Direct Foods Ltd., a prime supplier of vegetarian foods throughout the UK, had a significant sales increase during the year, mainly due to new soy-related products having a high textured vegetable protein content using TVP. Vegetarian Feasts Ltd., a market leader in oven-ready frozen meals... added new burger forming machines. This company is participating in the growth and demand for vegetarian and health foods. In June, British Arkady purchased Societe Industrielle des Oléagineux, better known as S.I.O. This long established French company has a factory in Aras and offices in Paris. Its principal activities include the milling of full-fat and defatted soy flours, and the manufacture of specialty oils for the food industry.” Address: Decatur, Illinois.

2013. Brown, Judy. 1987. Tempeh sales plateau in natural foods market. Marketers looking at new varieties and product areas for growth. *Soya Newsletter (Bar Harbor, Maine)*. Nov/Dec. p. 1, 8-9. [2 ref]

• **Summary:** White Wave (Boulder, Colorado), which projects sales of \$2 million for all products in 1987, produces 15-20,000 lb/week of tempeh, making the company America’s largest tempeh producer. Tempeh products under the White Wave label include Soy, Soy-Rice, 5 Grain, Quinoa, Amaranth, Lemon Broil, Tempeh Burgers (two styles) and Sea Vegetable Tempeh. The Soyfoods Unlimited line includes Soy, 3 Grain, 5 Grain, Burgers, and Cutlets. Lightlife Foods (Greenfield, Massachusetts) is the second largest, producing 7,690 lb/week [up 40% over Jan. 1984]. The company’s line has diversified from standard Soy Tempeh and 3-Grain Tempeh to Soy with Caraway, Quinoa, Sesame, Garden Vegetable, Macro Power, Fakin’ Bacon, and Tempeh Burgers. Lightlife’s sales of all products was \$800,000 for 1987, projected to rise to \$1.2 million for 1988. The decision to diversify from tempeh only products was made after the company’s tempeh sales plateaued in 1983. Competition became severe and supply outgrew demand.

Appropriate Foods (Brooklyn, New York) notes that “sales surged between 1980 and 1984, but have since flattened out.” Brown estimates that “approximately 2 million lb of tempeh will be produced in the U.S. in 1987, with manufacturers’ sales pegged at \$2.7 million and retail sales at around \$5 million.” These sales and production figures show no growth in the industry since Soyfoods Center did its survey of manufacturers in early 1984. Average

retail prices for an 8-oz package of plain soy tempeh ranged from \$1.00 to \$1.30; for multi-grain varieties from \$1.10 to \$1.40; and for burgers and newer exotic products from \$1.30 to \$1.70... The top two tempeh producers are confident of the marketplace and believe strongly in the potential of tempeh.

2014. Morinaga Nutritional Foods, Inc. 1987. Mori-Nu Tofu recipe cards. 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040.

• **Summary:** Morinaga has four cards, each 3 by 5 inches, each with one recipe on the front and another on the back. They are printed in a color ink on a pastel background, and were found displayed in a small plastic rack near the Yves meat alternatives at Safeway supermarket in Lafayette, California.

The recipes are: BBQ burger kebabs. Mushroom caps. Mexican burritos. Shepherd’s pie. Veggie lasagna. Veggie sloppy joes. Address: Los Angeles, California.

2015. **Product Name:** Organic Tofu [Plain, or Smoked], Tofuburger, and Organic Tempeh.

**Manufacturer’s Name:** Oasis Wholefoods.

**Manufacturer’s Address:** Unit 3C, Dart Units, Steamer Quay Rd., Totnes, South Devon TQ9 5AL, England. Phone: 0803 863167.

**Date of Introduction:** 1987 December.

**New Product–Documentation:** Note from Simon Bailey. 1988. Oct. 10. Formerly Lifestream Wholefoods, owned by Francis Checkley, this business was sold in Dec. 1987 to Mr. I.J. Mohammed.

Letter from I.J. Mohammed. 1991. Sept. 9. He makes tofu, tofu burgers, tempeh, miso, breads and cakes on a community scale. He has been making these foods for the last 5 years, all by hand.

2016. **Product Name:** No Chicken Salad (With Tempeh in a Pita Pocket), Tofu Salad (in a Pita Pocket), and Nori Rolls (With Tofu Filling).

**Manufacturer’s Name:** Terra’s Specialty Foods.

**Manufacturer’s Address:** R.D. 1, Box 317, Vernon, VT 05354. Phone: 802-254-5242.

**Date of Introduction:** 1987 December.

**New Product–Documentation:** Talk with Bari Madwin. June 29 and Aug. 28. Susan Quinn sells tofu and tempeh sandwiches in Brattleboro. She bought an existing company in 1988. She uses about 12 lb/week of tofu.

Talk with Susan Quinn. 1988. Aug. 30. She bought this company from Martha Brown in Aug. 1987. It was named Martha’s Sandwiches, but she renamed it Terra’s Specialty Foods in Feb. 1988. At the time, Martha had a line of sandwiches, including Eggless Tofu Salad (in a sandwich, 8 oz) and BLT with Fakin’ Bacon (made from tempeh). Susan introduced her three products in December 1987. The tofu salad in a pita pocket weighs 4 oz. The tofu in the nori rolls

is marinated, broiled, then put in with the veggies. She buys her tofu from the food co-op. It is a part-time business.

2017. **Product Name:** Sesame Wheat Tempeh Burgers.

**Manufacturer's Name:** 21st Century Foods Inc.

**Manufacturer's Address:** 30A Germania St., Jamaica Plain, MA 02130.

**Date of Introduction:** 1987.

**Ingredients:** Organic soy tempeh, bulghur wheat, roasted sesame seeds, tamari, natural hickory smoke, lemon juice, herbs, spices.

**Wt/Vol., Packaging, Price:** 5.5 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label. 1987. 3 inch diameter. Black and red on yellow. “New! All natural. Gourmet.”

2018. **Product Name:** [Soya Bolognaise, and Soya Burger (With Textured Soy Flour)].

**Manufacturer's Name:** Biotrek S.A. (Formerly named Biotrophes Ltd.).

**Manufacturer's Address:** 45 Alopekis St., Athens 10676, Greece. Phone: 301-724-9525.

**Date of Introduction:** 1987.

**New Product–Documentation:** Soya Bluebook. 1987. p. 73. Letter from John Lewis. 1987. Dec. Soya Bluebook. 1991. p. 68. Biotrek S.A. is now located at: 52 Pondou St., Athens 11527. Phone: 30/1/770-8625. John Lewis is president.

2019. **Product Name:** Okara Burgers [Plain, and Mexican Chili].

**Manufacturer's Name:** Birchwood Health Products.

**Manufacturer's Address:** Unit 1D, Alyn Industrial Estate, Llay Hall, Wrexham, Clwyd, Wales, UK.

**Date of Introduction:** 1987.

**Wt/Vol., Packaging, Price:** Two soya-based burgers per box.

**New Product–Documentation:** Ad in The Vegan. 1988. Spring. p. 21. “TrueHealth Soya Products... No animal contents. High in protein. Low in carbohydrates. All essential amino acids.” Ad shows Label on box. Heat and serve.

2020. **Product Name:** Soy Flour Mixes, Vegetarian Burger Mixes, and Arcadian Meal Makers.

**Manufacturer's Name:** British Arkady Co. Ltd. Affiliate of Archer Daniels Midland Co., USA.

**Manufacturer's Address:** Skerton Rd., Old Trafford, Manchester, M16 0NJ, England.

**Date of Introduction:** 1987.

**New Product–Documentation:** Soya Bluebook. 1987. p. 100.

2021. **Product Name:** [Takaramame Soy Flour, Fujinik

Ace, Fujipur SP, Apex {Simulated Meat Products}, Ganmo {Wild Goose Meat Analog}, and New Soyees {3 Textured Soy Flours}].

**Manufacturer's Name:** Fuji Oil Co. Ltd.

**Manufacturer's Address:** Nissei Midouji Hachimancho Building, 6-1 Hachimancho, Minami-ku, Osaka 542, Japan.

**Date of Introduction:** 1987.

**New Product–Documentation:** Soya Bluebook. 1987. p. 74, 78.

2022. **Product Name:** [Windmill Tofu, Smoked Tofu, Tofu Burgers, Satem Tofu {Packed in Foil}].

**Manufacturer's Name:** Heuschen-Schrouff B.V.

**Manufacturer's Address:** Reeweg 137, 6381 BW Ubach over Worms, Netherlands.

**Date of Introduction:** 1987.

**New Product–Documentation:** Soya Bluebook. 1987. p. 96. This company is the largest tofu manufacturer in Europe. Letter from Harry Whitford of Soyastern. 1987. Dec. 14. Holland, once the company with the most tofu producers, is now dominated by this one company. Only the company Morgenstond still produces tofu themselves. All others have concentrated on tofu based products, buying their raw materials from H-S. We estimate the latter's total production to be at the very least 20,000 kg/week. It could run as high as 50,000 kg/week. They sell huge amounts at dumping prices on the Asian-shop market, and claim to make organic tofu for the bio-shops, but seeing that they refuse to allow any control organization to check their records on bean purchases, nobody believes that their tofu is organic.

2023. **Product Name:** [Seitan Stew].

**Foreign Name:** Seitaneintopf.

**Manufacturer's Name:** Jonathan P.V.B.A.

**Manufacturer's Address:** Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

**Date of Introduction:** 1987.

**Ingredients:** Seitan (wheat proteins)\*, marrows\*, tomatoes\*, aubergines\* [eggplants], onions\*, olive oil, garlic\*, provence spices, sea-weed. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 300 gm.

**How Stored:** Frozen.

**Nutrition:** Minerals 0.92%, vegetable proteins 2.3%, vegetable fats 0.12%, carbohydrates 6.93%. 37.3 calories (Kcal) per 100 gm.

**New Product–Documentation:** See next page. Label sent by Jos van de Pongseele. 1988. 6.25 by 10.5 inches. Card stock. This card-stock sleeve fits over the product. Color photo of seitan with various vegetables with item name in white on orange. “Vegetable product.”

2024. **Product Name:** Loma Linda Vegetein Taco Mix (Textured Wheat and Soy Protein).

**Manufacturer's Name:** Loma Linda Foods.

**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515. Phone: 800-442-4917 or 714-687-7800.

**Date of Introduction:** 1987.

**Ingredients:** Soy protein concentrate, wheat gluten, partially hydrogenated vegetable oil (cottonseed, soybean), natural (vegetable) flavors, whole wheat flour, artificial color.

**Wt/Vol., Packaging, Price:** 7 oz paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with Iris Ram. 1988. Sept. 27. This product was introduced in 1987. This is a Mexican taco filling like chorizo.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1987.

**2025. Product Name:** Loma Linda Chorizo Flavor Vegetein (Textured Wheat and Soy Protein).

**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515. Phone: 800-442-4917 or 714-687-7800.

**Date of Introduction:** 1987.

**Ingredients:** Soy protein concentrate, wheat gluten, vegetable shortening, natural (vegetable) flavors, whole wheat flour, spice, artificial color.

**Wt/Vol., Packaging, Price:** 7 oz paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1987.

“Basic preparation instructions: Add ½ cup water to 1 cup Chorizo Flavored Vegetein and allow to set for 10 minutes.”

**2026. Product Name:** Loma Linda Chicken Flavor Vegetein (Textured Wheat and Soy Protein).

**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515. Phone: 800-442-4917 or 714-687-7800.

**Date of Introduction:** 1987.

**Ingredients:** Soy protein concentrate, wheat gluten, natural (vegetable) flavors, vegetable shortening, whole wheat flour, artificial flavors, spices, artificial color.

**Wt/Vol., Packaging, Price:** 7 oz paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1987.

**2027. Product Name:** Loma Linda Spicy-Chik Mini-Drums (Meatless).

**Manufacturer's Name:** Loma Linda Foods.  
**Manufacturer's Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1987.

**Ingredients:** Mini-Drums: Soy protein concentrate, soy protein isolate, water, corn oil, wheat gluten, egg whites, potato flakes, spices, artificial flavors, salt, whole wheat flour, natural (vegetable) flavors, dextrose, dried yeast, onion powder, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). Breader: Bleached wheat flour, salt, yeast, sugar, oleoresin paprika, leavening (sodium

acid pyrophosphate, monocalcium phosphate, sodium bicarbonate), hydrogenated soy oil, mono and diglycerides, nonfat milk, whey. Batter: Water, corn flour, modified food starch, leavening (sodium acid pyrophosphate, sodium bicarbonate), spice.

**Wt/Vol., Packaging, Price:** 4-oz. packet contains 20 pieces.

**How Stored:** Frozen.

**Nutrition:** Per approximately 5 pieces (3.0 oz–85 gm): Calories 230, protein 14 gm, carbohydrate 15 gm, fat 13 gm, cholesterol 0 mg, sodium 640 mg, potassium 180 mg.

**New Product–Documentation:** Chicken flavored.

Label sent by Loma Linda Foods. 1988. Oct. 5. This product was introduced in 1987.

2028. **Product Name:** Soysage.

**Manufacturer's Name:** Plenty Canada Soya Shop.

Renamed Soy Development Center by 1987.

**Manufacturer's Address:** Roseau, Dominica.

**Date of Introduction:** 1987.

**New Product–Documentation:** Plenty Bulletin. 1987. Fall. p. 4.

2029. **Product Name:** The Soy Deli Gourmet Fresh Tofu Salads/Dips/Spreads [No Tuna Salad, Curry Salad, Dilly Salad, Garlic Salad / Dip, Mild Jalapeno Sesame Spread / Dip, Salada Sin Carne, Curry Savory Salad].

**Manufacturer's Name:** Quong Hop & Co.

**Manufacturer's Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1987.

**Ingredients:** No Tuna Salad: Organic tofu (water, organic\* soybeans, nigari), safflower oil, sunflower seeds, shoyu (water, whole soybeans, whole wheat, sea salt), water chestnuts and/or jicama, cider vinegar, scallions, sesame oil, spices. \* Grown in accordance with Calif. Health & Safety Code 26569.11.

**New Product–Documentation:** Talk with Ben Lee. 1988. Sept. 30. Introduced in 1987, this was a local line of fresh products. Not a lot is happening with this line, just a small local market. He is revamping a lot of the labels. Labels. 1987. 3.5 inch diameter. One color plus black on white. "Master Tofu-Makers Since 1906."

2030. **Product Name:** The Soy Deli Gourmet Fresh No Tuna Salad San (Tofu Sandwich).

**Manufacturer's Name:** Quong Hop & Co.

**Manufacturer's Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1987.

**Ingredients:** Organic tofu (water, organic\* soybeans, nigari), safflower oil, sunflower seeds, shoyu (water, whole soybeans, whole wheat, sea salt), water chestnuts and/or jicama and/or celery, cider vinegar, scallions, sesame oil, spices, whole wheat bread, (and/or lettuce, sprouts, bell peppers). \* Grown in accordance with Calif. Health & Safety Code 26569.11.

**New Product–Documentation:** Talk with Ben Lee. 1988. Sept. 30. Introduced in 1987, this was a local line of fresh

products. Label. 1987. 3.5 inch diameter. Black and blue on white. "The original."

2031. **Product Name:** The Soy Deli Gourmet Fresh BBQ Tofu Burger.

**Manufacturer's Name:** Quong Hop & Co.

**Manufacturer's Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1987.

**Ingredients:** Organic tofu (water, organic\* soybeans, nigari), fresh carrots and onions, sesame seeds, sunflower seeds, currants, safflower oil, sea salt and spices, sesame whole wheat bun, (and or bell peppers, avocado, lettuce, parsley, squash, sprouts), BBQ sauce, mild jalapeno, sesame tofu spread. \* Grown in accordance with Calif. Health & Safety Code 26569.11.

**Nutrition:** Per 3.5 oz.: Calories 212, protein 17 gm, carbohydrate 8 gm, fat 13 gm.

**New Product–Documentation:** Label. 1987. 3.5 inch diameter. Red and black on white. "The Original. Master Tofu-Makers Since 1906."

2032. **Product Name:** VegeBurger, and VegeBanger (Frozen Meatless Burger and Sausage).

**Manufacturer's Name:** Realeat Company Ltd.

**Manufacturer's Address:** 2 Trevelyan Gardens, London NW10 3JY, England. Phone: 01-459-3401.

**Date of Introduction:** 1987.

**Wt/Vol., Packaging, Price:** Retail: 4 x 2 oz burger, or 10 x 1 oz banger (sausage). Catering: Various sizes and packs.

**How Stored:** Frozen.

**New Product–Documentation:** Letter from Gregory Sams. 1988. March 30. Leaflet, undated. "A Recipe for success." The frozen range (line) is marketed by Adams Marketing, 31 Bell St., Shaftesbury, Dorset, England. Phone: 0747-51561.

Talk with Kees Touw of ADM. 1991. Sept. 4. In the UK, British Arkady produces the Veggie Burger for a doctor, who is in his late '70s. The doctor developed the product based on TVP during the 1970s, he owns the name, and he licensed the rights to make the product to British Arkady, which pays him a royalty. The product is still made with TVP. Peter Fitch knows the whole story. It is not clear whether that product is different from the VegeBurger developed by Greg Sams.

2033. **Product Name:** [Tofu Burgers].

**Foreign Name:** Palets au Tofu.

**Manufacturer's Name:** Sojalpe.

**Manufacturer's Address:** Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.

**Date of Introduction:** 1987.

**New Product–Documentation:** Letter from Bernard Storup. 1989. March 3. Martial Gonin also marketed "palets au tofu," a kind of tofuburgers.

2034. **Product Name:** [Canned Tofu Entrees {Like Quenelles, Midway Between a Sausage and a Souffle}].

**Foreign Name:** Royales au Tofu.

**Manufacturer's Name:** Sojalpe.

**Manufacturer's Address:** Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.

**Date of Introduction:** 1987.

**Ingredients:** 67% tofu\*, whole egg\*, palm oil (not hydrogenated), flour (mehl)\*, salt\*, vegetables. \* = Guaranteed organically grown.

**Wt/Vol., Packaging, Price:** Can.

**New Product–Documentation:** Letter from Harry M.

Whitford of Soyastern. 1987. Dec. 14. "I found these entrees much better than similar Dutch products."

Manufacturer's brochure. 1987? In German. "Die Royales: Das Know-how der Kuechenchefs." The joy of eating... without putting on weight. We have developed Tofu-Royales with the aid of traditional recipes from Prosper Montagné (Chef: New Gastronomique Larousse) with constant care to present an excellent dietetic dish. Preparation: Bake Royales for 10 minutes in an oven with sauce, mushrooms, and green olives. Recipes for the following sauces are given: Tomato sauce, mushroom sauce, or fish or shellfish sauce. The company logo is a steeped building with 5 soy-shaped leaves growing out of the steeple, set in front of towering mountains. A photo on the front shows the Royales to be about the size and shape of small potatoes. Two dishes in sauces are shown. At the top is an illustration (line drawing) of a laughing male chef in a white top hat.

Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. In the center of the label is a laughing male chef with a white top hat. Tan, yellow, white, red, and dark green.

2035. **Product Name:** [Soyana Soyani Tofu Sausage].

**Foreign Name:** Soyana Soyani.

**Manufacturer's Name:** Soyana.

**Manufacturer's Address:** Friedensgasse 3, Postfach 8039, CH-8002 Zurich, Switzerland. Phone: 01-202-8997.

**Date of Introduction:** 1987.

**New Product–Documentation:** Talk with Walter Dänzer of Soyana. 1990. May 30. Tofu sausages were launched in about 1987. Letter (fax) from Verena Krieger. 1990. May 31. Soyoni (Tofu Sausage) is one of Soyana's best-selling products.

Label sent by Verena Krieger. 1990. July 5. Biona certification symbol.

2036. **Product Name:** [Tofu Patty with Dehulled Wheat and Rye].

**Foreign Name:** Tofulaib. mit gekeim. Weizen und Roggen.

**Manufacturer's Name:** Tofurei Wels. Renamed Schoen Tofurei in 1987.

**Manufacturer's Address:** Prinz Eugen Strasse 1, A-4600 Wels, Austria. Phone: 07242/834222, 78073.

**Date of Introduction:** 1987.

**Wt/Vol., Packaging, Price:** 160 gm for 21 currency units.

**New Product–Documentation:** Price List sent by Walter Schoen. 1988. With dates products were introduced.

2037. **Product Name:** Westico Soya Sausage.

**Manufacturer's Name:** Westico Foods.

**Manufacturer's Address:** West Indies College, Mandeville, Jamaica.

**Date of Introduction:** 1987.

**Ingredients:** Gluten, soya pulp (okara), soya flour, vegetable oil, salt, onion powder, garlic powder, sausage flavoring, soya sauce.

**Wt/Vol., Packaging, Price:** 19 oz can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Form filled out and Label sent by Westico. 1990. June 28. Westico Foods is a Seventh-day Adventist institution. This product was introduced in 1987.

2038. **Product Name:** Traditional Nama Agé. Renamed Pineapple Teriyaki Tofu Cutlets.

**Manufacturer's Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer's Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1987.

**Ingredients:** 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), hi oleic acid safflower oil, unsweetened pineapple juice, soy sauce, pineapple concentrate, ginger, garlic powder, ginger powder, onion powder.

**Wt/Vol., Packaging, Price:** 6.5 oz vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1987, originally called Traditional Nama Agé, and made at Wildwood's plant in Santa Cruz.

2039. **Product Name:** Yves Tofu Chili Dogs (Meatless Hot Dogs Made with Tofu).

**Manufacturer's Name:** Yves Natural Foods.

**Manufacturer's Address:** 1138 East Georgia St.,

Vancouver, BC, V6A 2A8, Canada. Phone: 604-251-1345.

**Date of Introduction:** 1987.

**Wt/Vol., Packaging, Price:** 12 oz per package of 9. Vacuum packed.

**How Stored:** Refrigerated, 38 day shelf life.

**New Product–Documentation:** Talk with Michael Weiner. 1987. Dec. 16. “Made from a special blend of authentic Mexican Style spices and seasonings,” they come 8 to a pack and can be refrigerated for up to 35 days. Leaflet. 1988. April. “Introducing Yves Tofu Chili Dogs.”

Spot in SoyaFoods. 1990. Dec. Yves’ tofu delicatessen line is now available in the UK. The meatless products include tofu wieners, Mexican style tofu chili dogs, and tofu deli slices.

2040. Downer, Lesley. 1987. Japanese vegetarian cooking. New York, NY: Pantheon Books. ix + 374 p. Illust. Index. 21 cm.

• **Summary:** An excellent, authentic and very well written book—much more than a cookbook. Part II, titled “Beans, soybean products, and eggs” contains chapters on: Beans, p. 223+ (including recipes for whole soybeans, such as: Soybean rice {served at the beginning of February, incl. “¼ cup dried soybeans”}). Five-color soybeans. Sweet simmered soybeans. Plus many recipes for azuki beans). Tofu, p. 232+ (incl. cotton tofu, kinugoshi, koya-dofu). Deep-fried tofu, p. 252+. Yuba, p. 259+ (“In Chinese vegetarian cuisine, a much thicker, chewier yuba, sold in Chinese shops as ‘bean curd skin’ or ‘bean curd sheets’ is actually used as a meat substitute, and vegetarian restaurants in Hong Kong and China abound with such dishes as Vegetarian Fish and Vegetarian Chicken, which even look similar to the real thing”). Okara, p. 273+. Miso, p. 276+. Natto, p. 289-97.

Born in London [her mother was Chinese-Canadian, her father Canadian and a professor of Chinese at the University of London] the author was not born a vegetarian; she became one by choice. In 1978 she went to Japan to live for four years in Gifu, a small provincial town near Kyoto. By this time her main interest was in food and cooking, so she had a marvelous and very interesting time.

Her Japanese friends expected her, a Westerner, to be a “meat-eating, coffee-drinking blue-eyed giant... They had all been prepared to cook up steaks and hamburgers to suit my supposed Western tastes.” But they soon “realized that the traditional Japanese dishes that they had enjoyed before the advent of Western fast foods were largely vegetarian. Indeed it is only since the end of World War II that meat has become at all common in Japan and most older people still prefer a largely meat-free diet... Before the Meiji restoration in the last century [starting in 1868] the Japanese ate no meat at all and were shocked and disgusted when Western newcomers demanded beef” (p. 6).

“I was also a teacher, the most highly honored profession in Japan.” “There can be few countries in the

world—maybe none—where it is easier and more pleasurable to be a vegetarian than Japan” (p. 11) “The Japanese have explored and developed the possibilities of a meat-free cuisine, perhaps more than any other people in the world” (p. 13). Sea vegetables (such as kombu, wakame, and nori) are an important part of that cuisine. “The range of tofus and tofu products is seemingly endless.” Address: Author and cooking teacher, London.

2041. Panati, Charles. 1987. Extraordinary origins of everyday things. New York, NY: Harper & Row. xi + 463 p. Illust. Index. 24 cm. [150+\* ref]

• **Summary:** Includes discussions of: Blender (electric kitchen appliance) (1922, Racine, Wisconsin, initially known as a “vibrator”). Plastic (1900, USA, incl. Celluloid, Bakelite, Cellophane, Acetate, Vinyl, Plexiglas, Acrylics, Melmac, Styrene, Formica, Polyester, Nylon, Tupperware {made of polyethylene}). Peanuts (1800s, USA, incl. P.T. Barnum, peanut butter, Planters Peanuts). Cracker Jack (1893, Chicago, Illinois {“Candied Popcorn and Peanuts”}). Hot dog (1500 B.C., Babylonia [today’s Iraq], incl. frankfurter, American hot dogs, Nathan’s franks). Hamburger (Middle Ages, Asia). Sandwich (1760, England). Melba Toast (1892, London). Worcestershire Sauce (mid-1800s, Britain). Graham Crackers (1830s, New England).

Note: This book is very well written, but some or all of the information in some of the entries (such as the blender, peanut butter and Worcestershire sauce) comes from secondary sources and is incorrect. The book would be much better (but much longer) if the sources for each statement or entry were cited.

2042. Weber, Marlis. 1987. The single vegetarian: Healthy recipes for one. Translated from the German by Linda Sonntag. Hammersmith, London, England: Thorsons—An imprint of HarperCollins Publishers. 144 p. Illust. by Juliet Breese. Index. 21 cm.

• **Summary:** This attractively illustrated and designed lacto-ovo-vegetarian wholefoods cookbook (first published in Germany in 1985 as *Vollwertkueche für 1 Person*) opens with a nice section on soya beans and tofu (p. 17). Contains more than 50 line drawings, used mostly to fill spaces that would otherwise be empty. Soy-related recipes include: Chicory and bean sprouts in curried cream (with soya bean sprouts, p. 56). Soya bean hotpot (with cooked soya beans, p. 76). In the chapter titled “Milk, Quark and Tofu” (p. 121-24) we find recipes for: Tofu dessert. Savoury Tofu. and Tofu Burgers.

2043. Galactina AG. 1987? Der Tofu bekommt Geschmack! [Tofu gets flavor! (Leaflet)]. Belp, Switzerland. 2 panels each side. Each panel: 28.6 x 21 cm. Undated. [Ger]

• **Summary:** See next 2 pages. Leaflet (glossy color). Undated. Sent by Peter Speck of Galactina. 1990. On the front panel: The new tofu generation from Galactina wins

over even the most die-hard skeptics. A photo shows a handsome, seasoned Tofu Gourmet sausage lying on a wooden table, surrounded by cubed tofu and vegetables.

A photo (panel 2) shows the new packaging for large-scale users (*Grossverbraucher-Packung*). The five flavors (each sausage-shaped package weighs 1 kg) are: (1) Tofu Gourmet (with soy sauce, natural aromas, and a special mixture of spices). (2) Tofu Jardinière (with carrots, leeks, celery, sea salt and spices). (3) Tofu Provençale (with herbs from Provence, soy sauce, plus spices and salt to make it a bit piquant). (4) Tofu Gastro (Nature) (let your fantasy wander from use in sweet to piquant dishes). (5) Tofu Burger (with vegetables, onions, spices, herbs and sea salt).

Panel 3 begins: Tofu belongs in the new, light and healthy cuisine of hotels, hospitals, restaurants, and hostels. We are glad to support you with tofu recipes, tofu menu-cards or with a personal, obligation-free consultation with our tofu specialist. A photo shows the cover of a book titled "Tofu—The new food culture" (*Tofu—die neue Esskultur*).

On the rear panel is the same classy photo as on panel 2. Address: 3123 Belp, Switzerland.

2044. H.J.G. Inc. 1987? Price list. Baltimore, Maryland. 1 p. Undated.

• **Summary:** Sprucetree Baking Co. makes five lines of products: Breads (14 varieties, including Sesame Soy "High" Pro in 1 lb and 2 lb sizes), pastries (6 types incl. babka), cookies (sweet rice, oatmeal, and carob), pies and tarts (incl. "tofu-blueberry pie" and "tofu-blueberry tart"), and rolls and sandwiches (incl. samburger sandwich).

Also listed are Erika's Choice Products.

Note 1. H.J.G. stands for "Howard G. Grundland," who assures the quality of all products sold.

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term "samburger" (or "samburgers").

Note 3. A label for Rice Bread, sent separately by Howard (Oct. 1994) shows the ingredients were organic whole wheat flour, filtered water, organic brown rice, organic sweet brown rice, and sea salt. Address: 4200 Mortimer Ave., Baltimore, Maryland 21215. Phone: (301) 358-8040.

2045. Worthington Foods, Inc. 1987? Worthington: Building for a healthier tomorrow. Worthington, Ohio. 12 p. Undated.

• **Summary:** Includes a concise history of the company (p. 4-5): "Worthington Foods began operations in 1939 with the introduction of two peanut-based products to meet a growing demand for convenient, flavorful vegetarian foods.

"Today Worthington Foods is recognized worldwide as a leader in the development and production of foods and beverages for health-conscious consumers.

"Launched under the name of Special Foods, Inc. by Dr. George T. Harding, Sr., the company grew within two years to annual sales of \$20,000.

"Dr. Harding hired current Worthington Foods chairman James L. Hagle in 1941 to manage the fledgling vegetable protein business. Sales jumped to \$80,000 during the 29-year-old manager's first year.

"Choplets, one of the company's early products, was so much in demand during the meat rationing of World War II that shipments were made to customers even before cans had a chance to cool after production.

"By the end of the war, annual sales neared \$500,000, and Special Foods had become Worthington Foods, Inc. Production facilities were moved from a small two-story, wooden house (see photo) to a new concrete block building across the street.

"Allan R. Buller, now president, came to Worthington Foods in 1945 after completing a tour of military duty. He soon became general manager.

"A short time later, Warren E. Hartman joined Buller

and Hagle to expand the company's product development and quality control. The Worthington line was broadened, and sales continued to climb.

"In the early 1950s, Worthington Foods accomplished a major technological breakthrough which revolutionized the manufacture of vegetable protein products. Robert Boyer, a former researcher for the Ford Motor Company, introduced Hartman, Hagle and Buller to the process of spinning soy protein fibers.

"Actually Boyer had been trying to produce a synthetic fiber resembling wool. Although he was not able to develop a suitable synthetic wool, Boyer did produce a vegetable protein substance similar to muscle fiber. His work resulted in the development of meat-like products resembling lamb, beef and chicken.

"Boyer's new materials did not lend themselves to processing under high temperatures normally used in canning. This led to the manufacture of frozen vegetarian products.

"Since many of the small health food stores selling Worthington products were not equipped with freezers, the company provided these stores with frozen food cabinets. This bold marketing stroke vaulted Worthington Foods years ahead of its competitors to become the first company offering frozen meat analogs.

"Worthington Foods also grew during the 1950s and '60s through the acquisition of other food companies. First came the wheat protein products of Dr. Harry Miller. Miller's Cutlets later became known as Vegetarian Cutlets.

"Worthington Foods next purchased the Battle Creek

Food Company founded in 1869 by world-famous Dr. John Harvey Kellogg. This acquisition—including its line of Kaffree Teas—pushed Worthington’s sales over \$1 million in 1960. Four years later, Worthington took over the Madison Foods plant in Madison, Tennessee.

“By the late 1960s, interest in soy protein products heightened as the nation faced a meat shortage and meat prices spiraled upward. Recognition of Worthington Foods as a leader in the development of meat analogs led to take-over inquiries from a number of major companies.

“Company directors decided in early 1970 that Miles Laboratories offered the best blend of financial resources and management philosophy. After the merger, Worthington Foods became the center of protein research, development and production for the parent company’s worldwide operations.

“Under Miles Laboratories, the Morningstar Farms brand of cholesterol-free foods was introduced. This marked the first time textured vegetable protein products had been marketed nationally through supermarkets.

“During its 12 years as a division of Miles Laboratories, Worthington Foods doubled the size of its research and development facilities; and construction of a new plant tripled production capacity.

“On October 15, 1982, Worthington Foods once again became an independent operation. The company was repurchased from Miles Laboratories by a group of Seventh-day Adventist investors, including its founder, Dr. George T. Harding, Sr.

“The reacquisition and financial restructuring of Worthington Foods was organized primarily by three men who had been instrumental in the early years of the company—James Hagle, Allan Buller and Dr. George Harding, Jr.

“Worthington Foods continues to emphasize the process technology and product innovation that has distinguished it from its competitors for nearly half a century. In recent years, the company has broadened its base to encompass a variety of health-oriented food and beverage products.

“In 1983 Worthington Foods launched its third brand line, Natural Touch. Developed to be free of any artificial additives, preservatives or colors, the Natural Touch line represents a major thrust into the all-natural foods market.

“Food science and technology have advanced remarkably over the past four decades to allow even more convenient, healthful and flavorful products. Capitalizing upon these advances, Worthington Foods has remained steadfast in its heritage of promoting good health through better nutrition.”

Photos show: (1) The 2-story home which became the first Worthington Foods factory in 1939. (2) Ground-level view of the front of Worthington Foods factory in 1950. (3) One can each of Choplets, Instant Soyamel, and Worthington Burger. (4) An inside view of part of the Worthington factory.

Two pages (p. 6-7) show various Worthington products and their packages. One page each is devoted to: New management (with photos). Photo of operating staff. Brief bios of operating staff. Directors and officers (portrait photos and bios).

Note 1. An earlier edition of this booklet was published in 1984. The cover title was “Worthington: Building for a healthier tomorrow.”

Note 2. This is the earliest English-language document seen (Nov. 2014) that contains the term “Worthington Burger” (or “Worthington Burgers”). Address: Ohio.

2046. Brunthaler, Norbert. 1988. Re: Soyfoods made and sold by Sojvita. Letter to William Shurtleff at Soyfoods Center, Jan. 4. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** “Thank you for your letter of Dec. 10.” He gives the year and month that his company started to make and sell the following products: Tofu, Tofu marinated and baked, Tempeh, Sojanaise, Tofuburger, Tempeh vacuum packed and stable, Tofu spread (4 kinds), Sojella (enriched soymilk), Soyoghurt with fruits, Natto.

“These are only our soy-products which we sell by ourselves or through distributors in Austria. (Furthermore we produce rice-wafers, seitan, gomasio {sic, gomashio, sesame salt}, mochi.) We cannot say, which company is the largest in Austria, but we have the most different kinds of soyproducts. Our next competitor is: Sojarei in Baden and a smaller one is Tofurei in Wels. Furthermore there is only one Tempeh-producer in Vienna who sells tempeh and different cookies. These are all soy-producers in Austria. We hope we could help you with this information. With best regards. N.S.: Red miso and barley miso is in development since 1984.” Address: Sojvita Produktions GmbH, Hauptplatz 1, Lichtenwoerth, Austria. Phone: 02622 / 75494.

2047. Margulis, Marlyn L. 1988. Specialty of the house: Tempting palates with tempeh and tofu. *Courier-Post (Camden, New Jersey)*. Jan. 10.

• **Summary:** Richard’s Natural Foods Restaurant in Voorhees (NJ) caters to the tastes of vegetarians and people on macrobiotic diets in South Jersey, says owner Richard Wessel. Tempeh burgers and stir-fried tofu are two of the nutritious items he sells.

2048. **Product Name:** TVP Curry.

**Manufacturer’s Name:** Delmege Forsyth & Co, Ltd. (Marketer). Made in Sri Lanka by Safcol Lanka (Pvt) Ltd. **Manufacturer’s Address:** Delemge: 101, Vinayalankara Mawatha, Colombo 10, Sri Lanka. Safcol: Beruwela, Sri Lanka.

**Date of Introduction:** 1988 January.

**Ingredients:** Textured vegetable protein, mixed vegetables, chillie [chili], pepper, salt, monosodium glutamate, tomato sauce.

**Wt/Vol., Packaging, Price:** 400 gm tin can with label. Retailers for Rs. 24/50.  
**How Stored:** Shelf stable, 12 month shelf life.  
**New Product–Documentation:** Label. 1988. Jan. 10.5 by 4 inches. Full color with brown, red, green, and orange on yellow. Photo shows a dish of curry flanked by dishes of white rice and topping. “Vegetarian. Heat ‘n Eat.” Form filled out by Jane Gleason. She called Delmunge on 14 March 1988. The TVP is imported in bulk by Delmunge from the USA and England, then packaged in Sri Lanka. Also importing TVP are Forbes & Walker, and McSoy Lanka.

2049. **Product Name:** Solar Taco Fiesta, Solar Burrito Fiesta, or Solar Burger [Jalapeno or Lite / Spicy Mexican] (With TofuRella Soy Cheese).  
**Manufacturer’s Name:** Rademacher–Worley Farms of Sonoma County.  
**Manufacturer’s Address:** 7800 Old Redwood Highway, Cotati, CA 94928. Phone: 707-792-2208.  
**Date of Introduction:** 1988 January.  
**Ingredients:** Incl. soy cheese.  
**New Product–Documentation:** See next page. Talk with Peter Worley, sales manager at R.W. Farms. 1988. Feb. 15. Test marketing was from mid- to late 1987. Real sales began Jan. 1988. They buy the soy cheese from broker Richard Rose. Company owners are Rademacher & Peter Worley. They feel TofuRella is the best soy cheese, but it does contain casein.

Leaflet (8½ by 11, black and white). Undated. Solar Tacos and Solar Burritos are 100% natural and vegetarian. The burritos are made with organic sprouted tortillas. They are now available in four flavors: Colorado, Fiesta, Verde, and Lite. The Fiesta and the Lite are both made with “100% cholesterol-free soy cheese.” The company is now at P.O.

Box 5184, Santa Rosa, California 95401-5184. Phone: 707-792-2208.

2050. *Recorder (Greenfield, Massachusetts)*. 1988. ABC films Greenfield firm [Lightlife Foods]. Feb. 18.  
 • **Summary:** Lightlife makes tempeh and tofu hot dogs, using tofu bought from nearby Tomsun Foods. The company will appear on ABC’s “World News Tonight” with Peter Jennings, featured in a series “Health Food of the Future.” Michael Cohen will be shown making tempeh dishes.

2051. Newhouse, Sonia. 1988. Vegetarian Feasts, Direct Foods, soy ice cream, and the tofu industry in England (Interview). *SoyaScan Notes*. Feb. 25 and March 13. Conducted by William Shurtleff of Soyfoods Center.  
 • **Summary:** In 1974 she was crippled with osteo-arthritis and was told by her doctor she would be in a wheel chair in a few years and spend the rest of her life there. She was a hearty meat eater. She visited Dr. Gordon Latto, a specialist in nutrition and president of the Vegetarian Society (now in his 70s and living at 4 Darby Rd., Caversham, Berkshire). He put her on a vegetarian diet, with no refined foods, stimulants, or additives, plus cold showers each morning. “After about 3 days I began to feel better. And amazingly after about 10 days I was able to stand up straight without pain or stiffness in my joints.” She sold her guesthouse and started a firm in London named Vegetarian Feasts Ltd. specializing in vegetarian frozen meals without additives. The first products went on the market in March 1984. The media took up her story in a big way. In September 1984 she introduced two entrees with TVP as the major ingredient: Chile Sin Carne and Stroganoff. “We stole so much freezer space that all the big boys decided to jump into the vegetarian field, but they didn’t do it with whole foods.” Her

SOLAR BURGERS

pioneering products did so well in supermarkets that many health food shops in their “frozen food cabinets” first began to carry them. By June 1986 (see *Financial Guardian*, June 20; *Family Circle*, UK ed., Jan. 1986) she had an annual turnover in excess of £500,000 and a staff of 25, producing 6,000 microwaveable units a day and selling in major food chains (Safeways, Co-op supermarkets, Holland & Barrett health food stores, Europe, etc.).

It is well known that 30% of British university students are vegetarian, so the catering side of the vegetarian industry is enormous. But in 1986 about 75% of her products were sold through retail outlets. The majority were sold in supermarkets rather than health food shops. Realeat came out with a set of meals after hers, but they were discontinued in the supermarkets. It is not clear whether or not they contained soy protein.

In February 1986 she sold the company to British Arkady (owned by ADM), which wanted to get into the frozen foods business; about a year before they had purchased Direct Foods (in Petersfield, Hampshire), which made all dry foods, including some soy products. Direct Foods was started by a husband and wife who were farmers and who didn't like selling their animals to slaughter. They bought TVP from a manufacturer and sold it direct to health food shops. One of their products was Sosmix; you add water and make a sort of spaghetti sauce.

About 20 years ago Sonia developed a tofu ice cream (no isolates) for her daughter who was allergic to cow's milk protein. She still feels this product has commercial potential.

She thinks the four largest tofu manufacturers in England, in descending order of size, are Paul's Tofu, Dragon & Phoenix, Regular Tofu Co., and Cauldron Foods. Cauldron might be biggest; they put out the most finished products. Dragon and Phoenix, serves mostly the Chinese quarter of London. Sonia has been in their plant. They breed fish in tanks in their tofu plant, which is walled with red tile.

Update: Letter from Sonia Newhouse. 1989. April 3. She is now at the Ultimate Life Center, Inc., 3760 Sports Arena Boulevard, Suite 10, San Diego, California 92110. Phone (619) 224-0608. She and her friend, Rosemary Feldd, are in the process of opening “a metaphysical / new age bookstore here.” “Long term we both have the same plans to open a residential holistic center where alternative therapies will be available.” Address: 27 Carlton Rd., East Sheen, London SW14 7RJ. Phone: 01-392-1852.

2052. *Grocer (The) (England)*. 1988. 4.3m [million] consumers are avoiding red meat. Feb. 27. p. 64.

• **Summary:** The 1987 Realeat survey of meat and vegetarianism revealed that 4.3 million of the UK population are vegetarian or are consciously avoiding red meat. Almost one third of these are aged under 16. Perhaps more surprisingly, 18 million consumers claim to be eating less red meat, with health most commonly cited as the principal

reason. Greg Sams opened Britain's first macrobiotic healthfood restaurant in London in swinging 1967. The Vegeburger dates from 1982. The frozen ready formed burgers have been better received in the grocery trade than the dry mix. Realeat's frozen lines are marketed by Vincent Adams of Adams Marketing. He says: “Vegeburgers are now the fastest selling meat free burgers. I estimate the frozen meat free burger market to be around £3 million to £4 million in value and the frozen Vegeburger has nearly half of this figure.” There are also Cheese Vegeburgers and a soup which retails for around 20p per sachet.

2053. **Product Name:** Sloppy Joe Tempeh, and Meatless Country Stew.

**Manufacturer's Name:** Turtle Island Soy Dairy.

**Manufacturer's Address:** P.O. Box 218, Main St., Husum Falls, WA 98623. Phone: 509-493-2004.

**Date of Introduction:** 1988 February.

**Wt/Vol., Packaging, Price:** 15 oz recyclable plastic tubs.

**How Stored:** Refrigerated, 60 day shelf life.

**New Product–Documentation:** Spot in *Natural Foods Merchandiser*. 1989. Feb. p. 14. And April. p. 48. Fully microwavable. *Voice of the Turtle* 1989. Feb. p. 3. These products were introduced on 25 Feb. 1988. Products listed in *Fowler Brothers catalog*. 1991. Jan. Each in 9 oz and 15 oz.

2054. Chollet, Laurence. 1988. Magic beans: Soy foods multiplying. *Record (Hackensack, New Jersey)*. March 7. p. B-3, B-4.

• **Summary:** This story is based on a news release from Soyfoods Center showing the number of new soyfoods products introduced each year. According to Bill Shurtleff, who compiled the report: “In 1976, 78 new products were introduced; last year, 330 products were introduced, making it by far the biggest year for soy food products,....”

Bonnie Liebman, director of nutrition for the Center for Science in the Public Interest, says that “all fats have been implicated in breast and colon cancer.” Soy foods are free of cholesterol and generally low in saturated fats, but they are often high in unsaturated fats.

“Soy foods tend to be a little more expensive than their meat and dairy counterparts”—whether hot dogs, entrees, ice cream, or cheesecake. Mentions: Tofu Entrees from Legume, Inc, Lite Lite Tofutti, Tofutti's Better than Cheesecake. A large photo shows packages of Tomsun Tofu, Jofu, Ice Bean, Legume Classic Lasagne, and five Worthington meatless products: Luncheon Slices, Prosaige Links, Vegetarian Pie, Wham (meatless ham), and Meatless Chicken.

2055. Davis, Bob. 1988. Light Foods and the tofu hot dog market in America (Interview). *SoyaScan Notes*. March 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** There are three major companies making tofu hot dogs for the U.S. market (not including Loma Linda

and Worthington, which use isolates rather than tofu): Light Foods, Bob's company which originated the idea, has about 40% of the market, especially the West Coast. Lightlife Foods (formerly Tempehworks) has about 40%, especially East Coast, and Yves (from Canada) has about 20% nationwide.

Bob still has bad feelings about the way Lightlife Foods took away his East Coast market. Originally, Tempehworks was Light Foods' master distributor for tofu hot dogs on the East Coast. Then for about 6 months Tempehworks stopped paying for the product they were receiving. (They eventually paid later). Suddenly they dropped the Light Foods tofu hot dogs and came out with a competing product of their own, named Tofu Pups. It was quite similar except that it was free of egg whites. Tempehworks told many distributors and retailers that Light Foods was going or had gone out of business, as a way of getting them to switch products. Davis received letters from 35-40 stores and many customers asking why he went out of business or why he started making Tofu Pups. Shortly thereafter Tempehworks changed its company name to Lightlife Foods, not much different from Light Foods. This combination of events destroyed the market for Light Foods' tofu hot dogs on the East Coast. They had no East Coast distribution for 6 months. Light Foods considered litigation, but didn't have the money. Now Light Foods is coming out with a new meatless hot dog containing no egg whites. Address: 12125 East Brookview Dr., Grass Valley, California 95945. Phone: 916-273-2218.

2056. Cilensek, Cynthia. 1988. Soybeans and soldiers. Davis' Souter working in war-torn Nicaragua. *Daily Democrat (Chico, California)*. March 27.

• **Summary:** To help alleviate malnutrition, Souter initiated a soybean project. "We bought \$800 worth of soybeans, an economical source of protein. We then taught the students how to plant them and how to cook them." The students were mostly men who generally didn't know how to cook. They learned how to prepare soybean milk, soybean enchiladas, and soybean burgers. Campesinos for the month already trained in the use of soybeans were scheduled to train other campesinos in the war zone. To update the training of the graduates, Souter and others in her project gathered at a cooperative near Matagalpa. They practice cooking soybean burgers on a traditional Nicaraguan wood burning rock stove.

2057. **Product Name:** [Tofu Burgers (Provençale, and Indian Style)].

**Foreign Name:** Tofou burger (à la provençale, à l'indienne).

**Manufacturer's Name:** Ferme de Jas.

**Manufacturer's Address:** Eourres, 26560 Séderon, France. Phone: 92-65-10-95.

**Date of Introduction:** 1988 March.

**Ingredients:** Provençale: Tofu, carrots, flaked oats, olives, palm oil, salt, herbes provençales, garlic.

**Wt/Vol., Packaging, Price:** 90 gm vacuum pack, 2 burgers per pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Jean-Marie Braun and Joël Pichon of Eourres, 26560 Sederon, France. 1988. Jan. 2. They are members of an intentional international community in Provence, France and are creating a "tofu burger" business as one of their new activities. They have begun participating in Whole Life Expos and Health Food fairs to get their product known.

Letter and Labels from Anthony Marrese. 1989. June 7. The company launched these products in March 1988 and presently makes 125 packs/week, 2 burgers per pack, of each of the two flavors. Label. 2.75 inches diameter. Self adhesive. Black on orange and purple on white, respectively. Illustration of a sun rising over a farm, and 3 soybean leaves. "Préparation alimentaire à base de soja."

2058. Lubbe, James. comp. 1988. Abbreviated history of the Bountiful Bean Plant, Madison, Wisconsin. Bountiful Bean, 2049½ Atwood Ave., Madison, WI 53704. 23 p. Unpublished manuscript. [4 ref]

• **Summary:** The company was founded in 1978. 1. History table by year showing accounts, products, equipment, number of people, wages, other. 2. Newsletter and newspaper ads and articles. 3. Brochures, product announcements & job application descriptions. 4. Product labels.

Ad. circa 1983-84. Bountiful Bean Soyfood Deli. Macrobiotic dietary principles. Offers: fresh tofu, tofu pies, tabooli, toasted tofu, nori rolls, 4 soymilk flavors, 4 varieties of bulk miso, millet / tofu pudding, nutburger sandwiches, tempeh books, mini-tours of plant, spicy tofu, more! And: lowest soyfood prices in town, free samples and recipe sheets, managed by the workers. low-cost carry-out foods. 903 Williamson St. 251-0595. from: 7-6 Sun-Fri.; 7-4 Mon.; 10-4 Sat.

Update talk with Deborah Bachmann and Elizabeth Hanson. 1991. Nov. 1 and 11. In March 1990 Bountiful Bean Soyfoods moved from Madison, Wisconsin, to 620 Main St., Ridgeway, Wisconsin. Richard Kraemer and Elizabeth Hanson began to produce soyfoods during the last week in June, renting from the cooperative, then they purchased the business on 21 Aug. 1991. Richard and Elizabeth are married with a son, are in their late 40s, and come from Oseola, Wisconsin; he is a carpenter (and was a pastor) and she a nutritionist. They are both very enthusiastic about tofu and the business. The co-op has now been changed to a private business. They work full time and they have three employees—1 full time and 2 part time. They are thinking of re-launching tempeh and soy yogurt. The cooperative got what they felt was a good price for the business. People who worked more than 6,000 hours (Chris Burant [8 years], Deborah [almost 10 years], and a woman named Solie) each got a large chunk. Another 11 people who had worked in the

past were also given part of the money. The smallest amount of money distributed was \$250.00. Deborah and James Lubbe are no longer with the company. Bountiful Bean Soyfoods now makes tofu, Herb Tofu, plain or vanilla soy milk, Tasty Tofu, Hummus with Tofu (and garbanzo beans), and Taboolie with Tofu (salad, which also contains bulgar). They have discontinued tempeh and soy yogurt.

Update: Talk with Roger Bindl. 1993. April 15. Richard Kraemer would like to sell Bountiful Bean in Ridgeway and Roger is considering buying it. 85% of the company's sales are in Madison, Wisconsin. Address: Madison, Wisconsin.

2059. *Daily Camera (Boulder, Colorado)*. 1988. Soy sensation: White Wave introduces new products for 1988. April 5.

• **Summary:** Coming this year from White Wave are sesame-peanut tempeh, teriyaki tempeh burger, sloppy joe tempeh, and a soy-based hot dog. Last year, White Wave reached \$2 million in revenue.

2060. Vansickle, Janice. 1988. Soys take root in organic market. *Windsor Star (Essex County, Ontario, Canada)*. April 9.

• **Summary:** Jon Cloud is a transplanted "dirt farmer" from mountainous Vermont and now the production manager for Soy City Foods. Their products include soymilk, tofu, tempeh, falafels, burgers, and granola. Cloud became a [Vietnam] war protestor while in college, and opted into being a 60's back-to-the-land disciple after burning out in the urban jungle. The Organic Crop Improvement Association in Ontario has attracted 300 members during its five years of existence and 50 now have their farms certified as organic. A photo shows Jon Cloud with company products such as Soyettes, Grain Tempeh, and Falafels. Address: Star Agricultural Reporter, Ontario, Canada.

2061. Gillard, Colleen. 1988. McDonald's calls McDharma's bad karma. *San Francisco Chronicle*. April 15.

• **Summary:** McDonald's is taking on a pair of tofu-peddling restaurant owners in Santa Cruz who call their vegetarian, fast-food eatery McDharma's. Bernard Shapiro owns McDharma's with his partner, Daniel Prather. Fourteen months ago, McDharma's agreed in an out-of-court settlement to drop the "Mc" prefix. They make 'chicken burgers' from tofu, and a special, soy Brahma Burger.

2062. Hiestand, Michael. 1988. From hot dogs to pasta, tofu enters mainstream. *Adweek's Marketing Week*. April 18.

• **Summary:** Based in part on a January news release by Soyfoods Center and interviews with Legume, Soyfoods Center, and Lumen Food Corp. Address: New York.

2063. Ragovin, Helene. 1988. An Olympian task: Preparing for competitions keeps Disney chefs cooking. *News-Journal*

(Daytona Beach, Florida). April 21.

• **Summary:** The Disney chefs are preparing for this year's Culinary Olympics in Frankfurt, West Germany. For a side dish, the team created a vegetable "sausage" that combined apples and braised red cabbage. They bound the apples and cabbage with tofu and stuffed it in sausage casing.

2064. **Product Name:** Tofu Burger, Tofu Sandwiches, and Tofu Pocket.

**Manufacturer's Name:** Cactus Flower Foods.

**Manufacturer's Address:** Tucson, Arizona. Phone: 602-742-3392.

**Date of Introduction:** 1988 April.

**New Product-Documentation:** Janet Wooddancer. 1988. April 1. *Territorial (Oro Valley, Arizona)*. "Cactus Flower Foods distributes tasty tidbits of nutrition." This small wholesale health food distributorship, run by Elsa Mesko and her daughter, makes about 300 sandwiches a week.

2065. DiStasio, Daniel. 1988. Spotlight on David Mintz. *Spotlight on Rockland/Bergen (Mamaroneck, New York)*. April. p. 72-73.

• **Summary:** The quest for the perfect dessert began in 1972. Mintz's career in the food industry had begun in the Catskills with a small business called Mintz's Knishes. He attracted help with a sign which read, "Grandmothers Wanted." Thus began the catering business that finally brought him to Manhattan. "I was reading a health food magazine," Mr. Mintz recalls, "when I read that tofu looks like cheese but is not." From 1972 until 1981, Mr. Mintz was like a man possessed. In May 1982, he hand-delivered five gallons of Tofutti ice cream to a Manhattan health-food store.

Even the strict USSR State Committee for Inventions and Discoveries allowed Tofutti to be registered, a coup of sorts in that the Russians usually eschew any "frilly products." The Japanese went crazy: Every month, 100,000 gallons are delivered there, that's 3.2 million four-ounce servings. "Some people call me a kosher ham," quips Mintz. Though his enthusiasm for the spotlight takes up much of his time, workaholic Mintz enjoys his home in Alpine, New Jersey. He is also a talented painter. What's next on the list? Burgers, sausages, hot dogs, more main course foods.

2066. Lang, Kerri-Sue. 1988. A growth market for organic foods. *Country Guide (Winnipeg)*. April. p. 20-22.

• **Summary:** In 1980, the USDA defined organic farming as "a production system that avoids, or largely excludes, the use of synthetically compounded fertilizers, pesticides, growth regulators and livestock feed additives to the maximum extent feasible. Organic farming systems rely upon crop rotations, animal manures, legumes, green manures, off-farm organic wastes, mechanical cultivation, mineral bearing rocks, and aspects of biological pest control to maintain soil productivity and tilth, to supply plant nutrients, and to

control insects, weeds and other pests. The Organic Foods Production Association of North America (OFPANA) was founded in 1985. About 25 farmers contract organically-grown soybeans with Toronto-based Soy City Foods.

Organic food producers feel strongly that organic foods are healthier and more nutritious than conventionally grown foods, but scientific data does not yet support this claim. Ontario farmers requesting organic certification must have abstained from using prohibited fertilizers for at least one year and pesticides for 3 years. Prohibited fertilizers include anhydrous ammonia, ammonium nitrate, diammonium phosphate, most sewage sludge, triple superphosphate, muriate of potash, and potassium chloride. Prohibited soil additives include quick lime and slaked or hydrated lime.

Certified organic growers are inspected annually at their own expense (\$150). They also sign a licensing agreement and pay a fee to use the Ontario association's logo. The logo fee is based on gross sales. Organic soybean yields last year were about 20% below the normal provincial average. Jon Cloud, part-owner of Soy City Foods in Toronto, says most of his contract growers experience a 25% yield reduction in their first 3 years of organic production. But a premium for the beans, along with reduced input costs, brings net returns to at least the level that could be expected under conventional crop management.

Last year, about 25 farmers grew organic soybeans on about 320 acres under contract with Soy City Foods. Highest yield was 45 bushels per acre; average was 32 bushels. Right now, says Cloud, the company could use 2,000 acres of organically-grown soybeans. Premium prices for organic beans are \$8.50 a bushel. The firm produces several soy-based foods for human consumption. These include soy burgers, falafel (spicy patties traditional in some parts of the Middle East), a base for soy pate, tempeh, tofu, and soy milk. Contract growers are supplied with seed because Soy City wants beans with high protein and low oil content. Organic farmers don't spend \$40 an acre on herbicides. Nor do they put tonnes of commercial fertilizer on their fields. And they sell their crops at a 15% to 20% premium. Weeds, he adds, are controlled by non-chemical procedures such as crop rotation and cultivation, which cost little.

Hugh Martin, a soils and crops specialist with the Ontario Ministry of Agriculture and Food says organic farming will be a significant part of agriculture in the future. Most organic growers he works with have an ingrained stewardship ethic and are concerned about soil conservation. He says, "After about 5 years of organic farming, the organic matter content of soil increases. Improved porosity allows water to penetrate quickly. There's less runoff."

Color photos show the storefront of Soy City Foods "Soy Food Information Centre" and 3 of the company's products: Soyettes, Tempeh, and Falafels. Address: Winnipeg, Manitoba, Canada.

2067. **Product Name:** New Tofu Light Links (Meatless Hot Dogs). Renamed in 1988 Vegan Tofu Light Links.

**Manufacturer's Name:** Light Foods Inc.

**Manufacturer's Address:** 613 C Broadmoor, St. Louis, MO 63017. Phone: 314-878-8915.

**Date of Introduction:** 1988 April.

**Ingredients:** Water, Real Tofu, isolated soy protein, non-hydrogenated vegetable oil, rice syrup, natural spices, salt, beet powder, tamari (natural soy sauce), barley flour, locust bean gum, natural flavors, onion powder, garlic powder, natural spice oils.

**New Product-Documentation:** Poster. 1987. March. "Tofu Light Links. Now with absolutely no animal products. Made with Real Tofu and non hydrogenated vegetable oil." Note: This name was later changed to New Tofu Light Links than Vegan Tofu Light Links. Leaflet. 1987. Contains no animal ingredients. Uses non-hydrogenated vegetable oil. Sweetened with rice syrup. Talk with Bob Davis, president of Light Foods. 1988. March 26. These tofu hot dogs are not yet out. Unlike the original Light Links, they will contain no egg whites. Talk with Lauraine Davis. 1988. Aug. 28. This new product was launched in April 1988. They still have the original Light Links containing egg whites. These will eventually be labeled Vegan Tofu Light Links. Leaflet. 1988. April. 8½ by 11 inches. Black on light blue. "On the rise... Now you want a link with no animal ingredients, non-hydrogenated oil, less fat, maybe a rice syrup sweetener instead of honey, and an even better flavor. Introducing the New Tofu Light Links, and New Tofu Light Link Specials, with natural imitation soy cheddar cheese." Leaflet. 1988. April. 8½ by 11 inches. Blue and red on beige. "Higher still..." Gives ingredients for New Tofu Light Links, and New Tofu Light Link Specials.

2068. Lightlife Foods, Inc. 1988. Product list. Greenfield, Massachusetts. 2 p. 28 cm.

• **Summary:** "These delicious products are available from Lightlife Foods: Lightlife Tofu Pups. Lightlife Party Pups. Fakin' Bacon. Tempeh Burgers. Organic Soy Tempeh. Caraway Soy Tempeh. 3-Grain & Soy Tempeh. Quinoa Sesame Tempeh. Macro Power Tempeh. Garden Vegetable Tempeh.

"All Lightlife Foods / Tempehworks products are 100% natural, 100% vegetable, and cholesterol free. All of our products have a 45-day refrigerated shelf life or may be frozen."

A description of each product is given. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: (413) 772-0991.

2069. Lumen Food Corporation. 1988. Our meats are so real... some vegetarians won't eat them! (Ad). *Bestways*. April. p. 19; May. p. 59.

• **Summary:** On this full-page color ad, a half page color

photo shows two shish-kebab skewers with meatlike chunks and veggies. A hand is pulling one chunk off the end of one skewer. "Lumen is sold under two brand names: Cajun Jerky (snacks), and Heartline Meatless Meats (for cooking)." A sampler of five 8-oz. packets costs \$18.95.

This ad also appeared in the May 1988 issue (p. 59) of this magazine. Slightly modified, it also appeared in *Vegetarian Gourmet* (Summer 1994, p. 7). Address: 409 Scott Dr., Lake Charles, Louisiana 70601. Phone: 318-436-6748.

2070. Phillippy, B.Q.; Johnston, M.R.; Tsao, S.-H.; Fox, M.R.S. 1988. Inositol phosphates in processed foods. *J. of Food Science* 53(2):496-99. March/April. [35 ref]

• **Summary:** Myo-inositol bis-, tris-, tetrakis-, pentakis- and hexakisphosphates (IP2-6) were quantified in 9 thermally processed or fermented food products (including bran, canned [mung] bean sprouts, canned kidney beans, fried soy burger, infant formula concentrate and powder, soy isolate, tofu and white bread). Total inositol phosphate content (millimoles/kg dry weight) ranged from 1.35 in white bread to 23.26 in tofu and 26.05 in soy isolate. In all foods analyzed, inositol hexakisphosphate (phytic acid) accounted for greater than 40% of the total inositol phosphates on a molar basis.

Note: Supro 610K soy isolate was obtained from Ralston Purina Co. (St. Louis, Missouri). Address: 1-2. Div. of Food Chemistry and Technology; 3-4. Div. of Nutrition. All: Food and Drug Administration (FDA), Washington, DC 20204. Phillippy's present address: Southern Regional Research Center, USDA, New Orleans, Louisiana 70124.

2071. Ruchi Soya Industries Ltd. 1988. Display ad: We add Nutrela to our food every day. *Times of India (The Bombay)*. May 9. p. 4.

• **Summary:** "Nutrela is so easy to prepare: I just soak Nutrela chunks in water for 10 minutes, squeeze them completely and simply add gravy or curry just like paneer, pakodas [pakoras] and vadis. Taste my cooking. It's delicious. And Nutrela makes it even more nutritious. Ideal for health and figure conscious people. Besides, by substituting a part of expensive proteinaceous foods with Nutrela, I can easily cut down the cost of our meals.

"Nutrela gives a variety of tastes: Thanks to Nutrela I get to eat a lot of yummy dishes. And not just tasty meals but also delightful snacks like cutlets, samosas, pulao, burgers.

"Nutrela adds high-protein nutrition: Protein is very essential for building up the body, in making it active and healthy. And Nutrela is full of it. It is made from golden soyabean which is nature's richest source of high-quality protein. Plus Nutrela is fat free, almost cholesterol-free and very easy to digest.

A large photo shows a young family of three on a long tandem bicycle. The father, in front, is smiling and waving

with one hand. The one child in the middle is also smiling and waving. The mother, on the rear seat, dressed in a traditional Indian dress, is smiling but with both hands on the handlebars.

Below the photo is a 2nd photo of the front of three boxes of Ruchi's Nutrela, which is available in tasty granules, soft juicy chunks, and versatile flakes. "Available in 100 gm. and 250 gm. cartons. Also in 250 gm and 1000 gm polypacks." Address: 214, Tulsiani Chambers, Backbay Reclamation, Nariman Point, Bombay 400 021.

2072. Layton, Lyndsey. 1988. Pass the mustard: Meatless franks spice of life for Greenfield firm. *Recorder (Greenfield, Massachusetts)*. May 20. p. 21, 25.

• **Summary:** Introduced in 1985, Tofu Pups are meatless frankfurters made from tofu without nitrates, preservatives or cholesterol. Owners of Lightlife Foods Inc., formerly known as Tempeh Works, believe the soybean creation is on the verge of becoming a national hit. "It's an alternative to red meat that is low-calorie, low-sodium, has no cholesterol or preservatives, which is what more and more people in this country are looking for," says Michael Cohen, founder of Tempeh Works. Lightlife's sales figures confirm Cohen's optimism. The first year on the market, sales of Tofu Pups were \$230,000. The next year, sales jumped to \$405,000—a 76% increase. Executives expect 1988 to be the first year combined tofu and tempeh sales top \$1 million, at an annual growth rate of about 40%. To keep pace with an expanding market, Lightlife wants to double the size of its 6000-square-foot Fairview Street factory in an ambitious \$730,000 expansion plan.

In 1983, the operation moved from an old gas station on French King Highway to its current Fairview Street plant. To finance this transition and buy some new machinery, the company borrowed heavily from Shawmut Bank and fell into the red for the next three years. "We went from having \$3000 in interest payments to \$35,000," says Cohen. In the Northeast the tofu franks are also sold in supermarket chains such as Stop & Shop, Purity Supreme, Finast and Big Y. The firm now has 15 full-time employees.

At present Lightlife produces the flavoring, which Cohen calls the Tofu Pups "soul". The other food processor blends the flavoring with tofu and stuffs it into casings. If things go as planned, Lightlife will make its own Tofu Pups from scratch once the company expands its plant. But the Tofu Pups cost more than their traditional counterparts—\$2.49 to \$2.99 for a 16-ounce package of 10 tofu franks. Meat wieners typically cost \$1.49 to \$2.39. A photo shows Chia Collins and Michael Cohen of Lightlife.

Tomsun International recently declared bankruptcy. They tried to grow too quickly and couldn't keep up with demand for Jofu [a yogurt alternative made from tofu]. Address: Recorder staff.

2073. Arocena, Javier. 1988. [Re: Brief history of soyfoods manufacturing company Zuaitzo]. Letter to William Shurtleff at Soyfoods Center, May 27. 2 p. Typed, with signature on letterhead. [Spa; eng+]

• **Summary:** “In 1982, we started working on a family production level and in 1984 on an industrial one. We started selling tofu and seitan in March of 1984 and tempeh in Nov. of 1987. We also produced tofu and Seitan Burgers and tempeh pâté, both in Nov. of 1987, though not as much was sold. A brief history: We opened a store in Vitoria-Gasteiz and manufactured a great variety of products, including tofu and seitan. I learned how to make tofu in France with Dominique Lagadec and how to make seitan in Barcelona. A key moment in my story was in beginning to use vacuum packaging, as before products were sealed in sanitary, plastic water containers, 15 cm wide, 30 cm long, and 20 cm tall. With the vacuum packaging and further pasteurization, I was able to respond to the challenge of increasing the life of the product and expand the radius of my commercial activities.

“It is important to point out, looking ahead, that manufacturers with an investment of 250,000 pesetas can compete in the market with the advantage that you work unhampered by bank charges. You make a pan of 180 liters with a 2 meter by 1 meter stainless steel plate, fired with domestic butane gas and heat diffusers, a second hand deep sink, and as a mill, one used for cereal groats to which you adapt a motor using a washing machine pulley. Last and most expensive, a second hand vacuum machine from the many companies who reject them in exchange for newer technologies.

“Since I have always worked alone with my wife and daughter, I set the price of tofu and seitan at 860 pesetas per kilogram in the beginning. Later on, with more sales and no competition in all of Spain, I lowered the price to 700 pesetas per kilogram—its current price—offering paid freight in next day deliveries, gathering and crediting any old material (month and a half old or spoiled by any other cause). The successful introduction of the products was due to the fact that the work was done in the same location from which it was sold. But above all, it has been a success with those who are ill; one local doctor here in Vitoria is prescribing it! I have also given cooking classes over the past several years. At the same time, I personally do all the deliveries in the city and its surroundings. In other big cities, I have distributors who carry other products besides mine. In the long run I have been successful and today I ask myself if I should lower the prices, especially with the tofu. Tempeh had a better price from the beginning; everything going very smoothly. I set the price at 220 pesetas for a 275 gm jar of tempeh.

“Nonetheless, the social commitment is large and with the profits I have purchased a shop that carries chemical-free products. My cooking classes are free and I am encouraging soy agriculture in the region.”

Note: The original of this letter is typewritten in Spanish

with Javier’s signature. Someone has done a three page handwritten translation, which is included. Address: Zuaitzo, Correria, 39–01001 Vitoria-Gasteiz, Spain. Phone: 945/28 86 30.

2074. *Spectator (Carmi, Illinois)*. 1988. Californian would like to buy local soybeans. May 28.

• **Summary:** Jerry Ridenour, a Californian who wants White County to think about producing soybeans without chemical fertilizers or pesticides so that he can purchase the organically-grown beans for his natural foods business. While visiting Crossville, Illinois, he intends to talk with some farmers about the proposal. Ridenour’s company, “Wildwood Natural Foods,” makes meat-like products from tofu, soymilk, and wheat gluten, such as tofuburgers, meatless meatballs, and lactose-free soymilk. Other items made from tofu include tofu hot dogs, tofu jerky, soymilk yogurt, lactose-free tofu chocolate, etc. The business currently uses about 48-50,000 pounds of soybeans per month.

2075. **Product Name:** [Tofu Patties (Carrot, Mushroom, Tomato, and Garlic & Fines Herbes)].

**Foreign Name:** Médaille de Soja (Aux Carottes, Aux Champignons, Aux Tomates, à l’Ail et aux Fines Herbes).

**Manufacturer’s Name:** Cacoja. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).

**Manufacturer’s Address:** 8 rue Merxheim, 68500 Issenheim, France.

**Date of Introduction:** 1988 May.

**Wt/Vol., Packaging, Price:** 2 x 125 gm vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Tjomb. 1990. Revue des Industries Agro-Alimentaires. 14 May to June 5.

Letter from Sylvain Stievenard of Sojinal (named Cacoja prior to Aug. 1990). 1990. Sept. 24. “Médaille de soja” was introduced in May 1988.

2076. **Product Name:** [Tofinelle Tofu Sausages {Soya Mousseline with Capers} (Boletus Mushrooms, Paprika, Emmenthal, Smoked Salmon)].

**Foreign Name:** Tofinelle: Saucisses/Quenelles au Tofou (Cèpes, Paprika, Emmenthal, Saumon).

**Manufacturer’s Name:** SOY (Société Soy).

**Manufacturer’s Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1988 May.

**Ingredients:** Smoked salmon: Tofu (water, soybeans\*) 72%, smoked salmon 15%, sunflowerseed oil, egg white, wheat flour, spices, salt. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 2 x 100 gm in vacuum pack.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 14.4 gm, fat 11.7 gm, carbohydrates 3.6 gm, calories 100.

**New Product–Documentation:** Leaflet. 1988. Front and back. 6 panels. “These savory and light Tofinelles have a texture like and are eaten like “quenelles,” reheated in the frying pan or oven, accompanied by a sauce of your choice.”

Note: Cassell’s French-English Dictionary defines quenelle as “forcemeat or fish ball.” Letter from Bernard Storup. 1989. March 3. These products were all launched in 1988, the Boletus mushrooms in May, the Paprika and Emmenthal in July, and the Salmon in Dec. Two other flavors were launched in early 1989.

Labels sent by Bernard. 1989. April. Smoked Salmon. 3.75 by 7.75 inches. Blue, red, green, and gold on white. Background illustration of a jumping blue salmon. “Remove the protective film at the level of the clip. Reheat the Tofinelle for 7-8 minutes in a skillet or oven. Serve with or without a sauce, accompanied by vegetables and whole grains for a delicious meal.” Nature et Progres logo.

2077. *White Wave News*. 1988–. Serial/periodical. Boulder, Colorado: White Wave, Inc. Vol. 1, No. 1. April/May 1988. Bimonthly.

• **Summary:** Issue No. 1. shows the new White Wave Soyfoods logo. It describes the change in packaging and brands in phasing out the Soyfoods Unlimited brand and replacing it by the White Wave brand. There is an in-store deli recipe for Tempeh Mock Chicken Salad and a consumer recipe for Tofu Sandwich Steaks. There is a brief discussion of tempeh, which is called “The Cultured Vegetarian.” Address: 1990 N. 57th Ct., Boulder, Colorado 80301. Phone: 303-443-3470.

2078. Reynaud, A. 1988. Re: Brief history of Innoval / Sojalpe, an affiliate of Coopérative Agricole Silos de Valence. Letter to William Shurtleff at Soyfoods Center, June 6—in reply to letter of March 1988. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** “Dear Sir, Sorry not to have answered sooner your letter of March 1988 sent to Sojalpe.

“At this time Sojalpe has been bought by Silos de Valence (cooperative enterprise). We are working to raise up production and sales. Sojalpe’s new address is: les Auréats, 26014 Valence cédex.

“Now Sojalpe is specializing in organic and diet soyfoods which are selling in natural food stores.

“In November 1987, we made a new enterprise, Innoval, whose aim is to sell soyfoods not nature but diet in supermarkets.

“Answers to your questions:

“1. Soja started in December 1986.

“2. One label for each of our products is enclosed in this letter. “3. New soyfoods will first sell commercially this summer [of 1988] (drinks, desserts, etc.).

Ten leaflets (very attractive and professional) are enclosed. Each is glossy color, printed on both sides, 29.5 x 21 cm. Six of the leaflets were created by Sojalpe, have the attractive Sojalpe logo at the bottom of the front panel over a green stripe, and have an illustration of a laughing chef in a tall white chef’s hat (toque) against a broad green stripe (8 cm tall). Centered against this strip (but behind the chef’s hat) is written: “Les plaisirs de la table—Sans les kilos! [The pleasures of the table—without the kilos of weight gain!] in bold red capital letters against a horizontal yellow band, 1 cm tall. Below that is the name of the product in bold black letters against a white stripe and below that a large photo of a prepared dish, ready to eat. On every photo is the word “Bio” written in bold red letters against a yellow background. On the back of each sheet (in black ink on glossy white paper) are descriptions of soya, of tofu, and of the specific product. At the bottom of the page is the Sojalpe logo and address. The address has been crossed out with blank ink (it is illegible) and its place is written: “Les Auréats 26014 Valence. None of the leaflets is dated. The various products are: (1) Les Royales: le savoir-faire des grandes chefs. (2) Les Sorbets: la gourmandise—sans la pêche! [Sorbet—without the sin]. (3) Le Soja-Milk: un milk végétal léger, léger, léger [Soya Milk: A vegetal milk that is light, light, light]. The photo shows the milk in a bowl of cereal. (4) Le Tofu Nature: tous les goûts sont dans la nature [Natural Tofu: all the taste is in nature]. The photo shows many thin squares of tofu in hors d’oeuvres or in a salad. (5) Les Palets au Tofu: des plats (finement) cuisines. [Thin sheets of deep-fried tofu]. (6) Le Tofu Burger: le steak de soja—gastronomique. The photo shows two tofu burgers on a plate with a sauce.

The other four leaflets are the same size, glossy color, but have a somewhat different format. Across the top is a light blue and light green band, the two colors separated by thin wave of white. To the left is standing an all-white lovely French woman in a scanty bathing suit. Across the blue band is written (in this red letters): Cuisine saveur Cuisine minceur [Tasty slimming cuisine]. Across the green band is written the name of the product in bold red letters, above a sub-title in black. The color photos are the same size and quality as

before, but in place of the word “Bio” is the word “Soja.” The “logo” at the bottom, written in black on a yellow oval is: Four stars. Degustation. Basses calories (God taste but low in calories). The products are: (1) Tofu cube: menu a la carte. (2) Royales au tofu: pour varier les plaisirs. (3) Palets au Tofu: gastronomie et dietetique. (4) Tofu Burger: Pour les connaisseurs.

One more Sojalpe leaflet is enclosed (green and red on white, 3 panels each side, each panel 21 x 10 cm). On the front panel is the same chef with his tall hat described above. The word “Tofu” is written 5 times in little clouds. On the inner three panels are descriptions of the benefits of tofu and recipe suggestions. On the back panel is the word “Sojalpe” and the address: “Saint Quentin sur Isère, 38210 Tullins. Tél. 76.93.60.21.” Address: Allée Joule, ZI des Auréats, BP 1418, 26014 Valence Cedex, France.

2079. Bland, Aura. 1988. County agrees to lobby for Tofu Pup loan. *Recorder (Greenfield, Massachusetts)*. June 15. p. 2.

• **Summary:** Franklin County Commissioners agreed Tuesday to help the founders of Tofu Pups—a hot dog alternative—secure a state loan to expand their business. Lightlife Foods Inc. on Fairview Street needs \$730,000 in loans and refinancing to nearly double the size of its 6,000-square-foot factory. Cohen asked commissioners to express support for a \$180,000 loan from the state’s Economic Development Set Aside program. Lightlife employs 15 full-time and part-time employees. He also hopes the expansion will enable the company to develop new products—such as sausages and burgers—in the Tofu Pup line. Lightlife ended its budget year with just more than \$1 million in sales. In the past two years, Lightlife has increased sales 40%. Lightlife is seeking \$40,000 from Franklin County Community Development Corp.; \$272,000 from Shawmut Bank; and \$238,000 from the Massachusetts Business Development Corp.

2080. Madwin, Bari F. 1988. Re: Tomsun Foods’ future plans. Letter to and talks with William Shurtleff at Soyfoods Center, June 29, July 5, and Aug. 2. 1 p. Typed, with signature.

• **Summary:** Tomsun will auction off all its office and plant equipment except the actual tofu-making equipment on June 30. Tom Timmins is planning to have Panda Foods (Henry Creces) in New York manufacture about 20,000 lb/week of tofu for Tomsun. He still owns the recipes for Jofu and Tofu Pups and will continue to promote and organize their production. He is also involved with another company (Stow Mills) that produces Chesoya. His interests clearly remain in this industry and he seems optimistic about promoting other second generation products.

He has sold the old tofu plant building to a car renovation company, and plans to run the company out of an

office nearby. Note: The letter is dated July 5. Address: RD3, Box 212, Putney, Vermont 05346. Phone: 802-387-5788.

2081. **Product Name:** [Soja Hamburger Patty Mix].

**Foreign Name:** Soja Mix Biff-färs.

**Manufacturer’s Name:** AB Svenska Bioforce (Importer-Marketer). Made in Switzerland by Bioforce AG.

**Manufacturer’s Address:** Box 147, S-221 00 Lund, Sweden. Phone: 46 578 10.

**Date of Introduction:** 1988 June

**New Product–Documentation:** Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. A color photo of the front of the box shows a white plate against a tan background. On the plate are brown soy patties with macaroni, sliced tomatoes, onion rings, and a green vegetable. In the lower left in a downward-pointing red triangle is a logo reading something like “Bioforce.” Letter (fax) from Peter F. Zuethen of Food from Sweden USA. 1990. Aug. 2. Gives name and address of marketer.

2082. Fearn Natural Foods. Div. of Modern Products, Inc. 1988. Good nutrition, great taste! Fearn burger and patty mixes and America’s favorite natural seasoners (Ad). *Vegetarian Times*. June. p. 6.

• **Summary:** This half-page color ad shows the following Fearn consumer products in boxes: Breakfast patty mix. Sesame burger mix. Sunflower burger mix. Falafel mix. Brazil nut burger mix. In shakers are Spike and Vegit. “Quality and Wholesome Goodness for Over 60 Years.” Address: Milwaukee, Wisconsin 53209.

2083. Kemp, Mark. 1988. Invasion of the bean curd: While chickens continue to lay eggs chock-full of cholesterol, one man roosts at his New Jersey tofu plant, brooding over ways to outsmart nature. *Discover (New York, NY)* 9:42-43. June.

• **Summary:** David Mintz sits in his office at Tofutti Brands’ headquarters in Rahway, New Jersey, 100 volumes on ethics written in Hebrew on a nearby bookshelf. He speaks with a native Brooklyn accent, and atop his head, slightly askew, is a small yarmulke. He is thinking of ways to get cholesterol out of American diets once and for all with a tofu based egg. Al Kniper, head of the company’s 3000-square-foot research and development laboratory talks about what goes into this soybean-based egg.

Tofutti Brands’ Egg Watchers, he says, is much like other simulated-egg products such as Egg Beaters, Egg Scramblers, and the various powdered substitutes. All blend together egg whites, certain gums, vegetable oils, emulsifiers, stabilizers, and coloring to try to reproduce the perfect egg consistency. But Egg Watchers is the first—and so far the only—substitute in the protein food tofu has been incorporated.

But researchers still differ over whether dietary cholesterol significantly affects blood levels of cholesterol.

In 1945 Americans ate an average of 402 eggs per capita annually. Today that number has dropped to only 262. Mintz said, “You know, my dream is to make a hot dog out of tofu.”

2084. *Soya Newsletter (Bar Harbor, Maine)*. 1988. Tomsun Foods files for chapter 11. May/June. p. 1, 7.

• **Summary:** On April 8, 1988, Tomsun Foods International filed for protection under Chapter 11 of the Federal Bankruptcy Act. They did so to recover from a loss of approximately \$2 million last year on overall sales of \$3.6 million. Tomsun, just a year and a half ago, had successfully netted \$3.46 million from its first public stock offering. Armed with a new product line, Jofu, a silken tofu and fruit, yogurt-like product, the company had high hopes of doing for tofu what Dannon had done for yogurt—popularize it by adding fruit and making it a convenient, ready-to-eat snack. The company expanded too fast reports Tom Timmins, company founder. “We went from 3,000 cases a week to 20,000, but could only produce 12,000. It was too much, too soon for a small plant. By the time we got it under control, it was too late—we had run out of money.”

The new vision is that Tomsun will use its strength in distribution to become a marketing company. The company will be having their tofu made in a new plant in the New York City area, their Jofu made in a yogurt plant in Vermont, and their tofu burgers produced in upstate New York. Timmins also reports that the company will reorient its focus back on to the natural foods and other specialty foods markets. Timmins hopes the company will be out of Chapter 11 by this fall. “Essentially what happened was that the cost of financing necessary to reduce our costs was not available to us.”

2085. *Health Foods Business*. 1988. Tofu: The proteus of soyfoods. 34(7):78, 108-09. July.

• **Summary:** Tofu is like a real-life shmoo, one of the characters in the comic strip *Li'l Abner*. Shmoos were lovable, obliging little creatures that turned themselves into whatever kind of meal anyone desired. Tofu can be served up as almost anything—burgers, ice cream, pasta, you name it.

Tofu was the only soyfood to be included as a primary ingredient in every category of soy-based products introduced in 1987, according to the Bar Harbor, Maine based research company Soyatech, and it is tofu that may be readily found in many mainstream supermarkets. A key reason for tofu's popularity is its versatility. But it was not until the introduction of “second-generation” tofu products in the 1980s that the American public began to catch on.

Note: Proteus was an ancient sea god of Greek mythology, capable of assuming different forms. He herded flocks of sea creatures for Poseidon (the Greek god of the sea, and counterpart of Neptune, the Roman god of the sea). Possessed of the gift of prophecy, Proteus was constantly hounded by those seeking his knowledge; he eluded them by

assuming a variety of shapes. Whether used by scientists or nonspecialist writers, *protean* typically suggests adaptability or mutability.

2086. Lumen Foods. 1988. “Tell James Garner this isn't beef!” (Ad). *Whole Foods*. July. p. 97. Sept. p. 10.

• **Summary:** A full-page black-and-white ad. Lumen Foods... introduces Heartline Meatless Meats and Cajun Jerky Snacks. Address: 409 Scott Dr., Lake Charles, Louisiana 70601. Phone: 318-436-6748.

2087. *Vegan (The) (England)*. 1988. Pass it on! Haldane Foods. Summer. p. 17.

• **Summary:** “Haldane Foods' Tofeata Tofu—one of the best around in my opinion—is currently being sold with an excellent free recipe leaflet. With the exception of honey in a few cases, all 20 recipes are vegan. If you're a regular user of this brand, keep any spare copies and pass them on to friends.

“The same company has a new range of ready-to-mix meals called ‘Easy Cuisine’ comprising: Vegetable Curry & Brown Rice Mix, Vegetable Goulash & Potato Mix, Spaghetti Vegetable Bolognese Mix, Vegetable Ragout & Dumpling Mix, Vegetable Cottage Pie Mix, and Vegetable Burger & Couscous Mix. All are quick and easy to prepare and very useful to have in the larder. They provide enough for one generous serving, but by using some of the recipe ideas on the back of the packets would easily stretch to two.”

Note: A new Vegetable & Tofu Burger from Cauldron Foods is also mentioned.

2088. **Product Name:** Holy Cow! Veg-Cuisine (Made with Seitan).

**Manufacturer's Name:** W.H. Et Inc.

**Manufacturer's Address:** P.O. Box 37250, Honolulu, Oahu, HI 96837. Phone: 808-737-6339.

**Date of Introduction:** 1988 July.

**Ingredients:** Incl. wheat protein, soy protein, and other vegetable proteins.

**Nutrition:** Per 3 oz.: 135 calories, 22 gm protein, 4 gm fat, 3 gm complex carbohydrate, 1.4 gm fiber, 1.5 gm ash.

**New Product—Documentation:** Leaflet. 1988, April. Black and red on white. 6.5 by 8.5 inches. Shows a cow with a halo over its head in a triangle. On the three sides is written: No cholesterol. No unsaturated fats. All natural ingredients. Below is written: A delicious, nutritious alternative to meat. Contact John Moore. Made with seitan.

2089. Stoetzer-Taylor, Nancy. 1988. The all American tofu burger. *Capital-Journal (Topeka, Kansas)*. Aug. 11. p. 1C-2C.

it, Cooley has organized a tofu cooking contest the last two years in conjunction with the Douglas County Fair. Includes 7 tofu recipes.

2090. Cloud, Jon. 1988. Re: Product introduction dates. Cloud Mountain. Letter to William Shurtleff at Soyfoods Center, Aug.—in reply to inquiry. 1 p. Handwritten, with signature on letterhead.

• **Summary:** “Bill, The falafel was started in the spring of 1984.

“The grain tempeh was started in the fall of 1984. Cloud Mountain no longer exists. You can take it off the computer. The Soysage Cookbook rights are held by my wife Maxine.

“The other products made at Soy City you already have on file.

“Jon Cloud.” Address: Soy City Foods, 2847 Dundas St. West, Toronto, ONT, M6P 1Y6, Canada. Phone: 416-762-1257.

2091. Rosebrock, Bob. 1988. Brief history of Rosebrock’s Tofu Burger Cafe (Interview). *SoyaScan Notes*. Aug. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob first tasted soy (not tofu) burgers in 1973 in Hawaii. He opened his first restaurant selling tofu burgers in Malibu, California, in December 1984. It was called Rosebrock’s Garden Cafe. In early 1987 he changed the name to Rosebrock’s Tofuburger Cafe. The store sold an average of 50-70 tofu burgers a day, hitting 100 on some weekends. Many stars were among his clients. He buys his burgers from a manufacturer, marinates them in a garlic & dill sauce, heats them, then dresses them up by brushing on one of several special sauces, such as garlic-herb, pesto, etc. A menu shows that the burgers are sold on whole wheat buns with various combinations of trimmings: Classic Tofuburger California Style (mayonnaise, lettuce, sprouts, tomatoes, onion, dill pickle), Pestoburger (with zesty pesto sauce), Maliburger (with garlic herb sauce), Ultraburger (with both pesto and garlic-herb sauces), Avocado Burgers (avocado sauce), and Veggie Burger (fresh from the garden). He also sells a Chicken Burger. Prices average \$3.75. A leaflet for Rosebrock’s Tofuburger Cafe announces: Specialty tofuburgers, salads and sandwiches, buckwheat waffles, high energy protein shakes, blueberry bran muffins, fresh fruit smoothies, fresh juices, and wheatgrass juice.

His Malibu store was closed to make way for a shopping mall. He now has one store in Venice. Eventually he hopes to have stores in Brentwood, Pacific Palisades, and Malibu.

The Malibu one may be a drive-thru. Competition is the Garden Burger (no soy and well marketed), and Jeremiah Ridenour’s tofu burger, which is sort of generic. He hopes to start making his own burgers pretty soon. Address: Venice, California.

2092. Ridenour, Jeremiah. 1988. Monterey Bay Soyfoods, Western Soy Complements, and Wildwood Natural Foods (Interview). *SoyaScan Notes*. Aug. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jeremiah got interested in soyfoods in June 1977 because of his interest in vegetarianism and because his parents grew soybeans on their farm. In July 1979 he established Monterey Bay Soyfoods, a sole proprietorship, in Santa Cruz, California. Initially it was a company that allowed him to do research. Then he began to making tempeh, which was first sold commercially in February 1980. But for about 9 months he produced tempeh out of his garage and sold it out of the house in ½ and 1 pound quantities without a label or a brand name. This was the first commercial tempeh made in Santa Cruz.

At about this time (late 1979 or early 1980) Buddy Hamel started a company named Clearway Soyfoods on 17th Ave. in Santa Cruz, making tofu. In Feb. 1981, Jeremiah wrote an article on transforming a dead refrigerator into a tempeh incubator, and in July 1981 another article about using a honey extractor for dewatering soybeans for tempeh; both were published in Soyfoods magazine.

In April 1981 a new company was formed named Western Soy Complements (WSC). A corporation with four stockholders, including Jeremiah, it was located in Jeremiah’s garage at 335 Pennsylvania Ave. and made tempeh brand-named Santa Cruz Tempeh. “We grew the best tempeh ever in my garage. It has never been quite as good.” Then in Nov. 1981 WSC moved into the back of the Well Bean Deli, where they cooked and incubated the tempeh. Tempeh of the Sea (with nori) was launched in about 1982. After about 18 months, in June 1984, WSC was moved to 1560 Mansfield Dr., Suite D in Santa Cruz. Then marinated tempeh burgers came in about 1985. In March 1987 they brought out the Tempeh Temptations (fried and marinated) and Three Seed Tempeh, and in June Curried Rice Salad with Tempeh (and carrots), which in September started to be private labeled for Wildwood. WSC has always made only tempeh.

In Sept. 1985 Jeremiah began a joint venture in Santa Cruz with Wildwood Natural Foods. Monterey Bay Soyfoods

sort of became part of Wildwood. Wildwood had distributed WSC's tempeh in northern California. Buddy Hamel and Clearway, a tofu manufacturer, had just gone out of business. Wildwood wanted to make tofu in Santa Cruz. The first product (tofu) was sold in June 1986. Jeremiah now owns some of the stock in Wildwood Natural Foods of Santa Cruz. Wildwood has outgrown its space, so they are planning to find a new location for WSC (maybe one building away) and let Wildwood fill its space. Jeremiah is working on adding vitamin B-12 to his tempeh. Address: Santa Cruz, California. Phone: 408-476-4448.

**2093. Product Name:** Organic Nigari Tofu, Organic Smoked Tofu, Tofu Mayonnaise, Tofu Burger.  
**Manufacturer's Name:** Kaiora Natural Ltd.  
**Manufacturer's Address:** CPO Box 3007 (180 Victoria St. West), Auckland 1, New Zealand. Phone: (09) 370 454.  
**Date of Introduction:** 1988 August.  
**New Product–Documentation:** Letter from Austin Holden. 1988. Dec. This August they began to produce a wider range of soy products. They use locally grown organically certified soybeans ("Biogro" certified by IFOAM), Japanese nigari, Artesian well water. The organic smoked tofu is solidified with calcium sulfate. The standard block is sliced in two in the horizontal plane and then woodsmoked with Manuka, a variety of native tree wood. This is the wood traditionally used to smoke fish in New Zealand.

Tofu Mayonnaise contains unrefined rapeseed (Canola) oil, organic tofu, organic rice malt, organic lemon juice, organic brown rice vinegar, sea salt, spices, and vegetable gums. It is packed in glass. Tofu is sold in bulk and vacuum packed trays. Smoked tofu is vacuum packed. Burgers are sold only through the company's retail store at present.

**2094. Product Name:** Fakin' Bacon, Lettuce & Tomato Sandwich (With Tempeh).  
**Manufacturer's Name:** Rademacher–Worley Farms of Sonoma County.  
**Manufacturer's Address:** Box 5184, Santa Rosa, CA 95402. Phone: 707-792-2208.  
**Date of Introduction:** 1988 August.  
**New Product–Documentation:** On sale in Berkeley. 1988. Aug. 30. Talk with Peter Worley of RW Farms. 1988. Aug. 30. The product was introduced 3 weeks ago, in early August, and was an instant hit. He is already selling 700 sandwiches/week.

**2095. Product Name:** Teriyaki Burger (Made with Tempeh). Renamed Teriyaki Tempeh Burger by March 1996.  
**Manufacturer's Name:** White Wave.  
**Manufacturer's Address:** 1990 North 57th Court., Boulder, CO 80301. Phone: 303-443-3470.  
**Date of Introduction:** 1988 August.  
**Ingredients:** Tempeh (made with soybeans organically

grown in accordance with section 26569.11 of the California Health and Safety Code and brown rice), natural soy sauce, garlic, onion, spices.

**Wt/Vol., Packaging, Price:** 6 oz (170 gm). Vacuum packed in poly pouch.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

**New Product–Documentation:** Talk with Steve Demos. 1988. Dec. 20. The product was introduced in Aug. 1988. Label. 1989. April. 4 by 4.5 inches. Yellow, white, and black on red. Large photo of a tempeh, lettuce & tomato sandwich, with a slice of tomato and 2 slices of dill pickles on top, cheese slices and lettuce below. "All the sizzle... none of the steak. Ready to eat in 1 minute. Makes a delicious sandwich or entree—just brown in a lightly oiled pan or microwave 1 minute high power." Leaflet. 1989. April. "Make your sales sizzle with White Wave."

**2096. Mecklenburg Gazette (Davidson, North Carolina).** 1988. High fat and sodium content give hot dogs a bad name. Sept. 7.

• **Summary:** Hot dogs are preserved with nitrates or nitrites, cancer-causing substances that give hot dogs their characteristic pinkish color. The lowest fat hot dogs around contain no meat at all and have considerably more protein, less sodium and much less fat than regular hot dogs. One of the most popular varieties of these meatless hot dogs is Tofu Pups, with its primary ingredient being tofu. At 53% fat they still do not qualify as a particularly healthy food, but they contain no saturated fat, no cholesterol and no nitrates and they are better nutritionally than "the real thing."

**2097. Cross, Kevin.** 1988. Brief history of Soy Power Company, Inc. of Santa Monica (Interview). *SoyaScan Notes*. Sept. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company started business in Santa Monica, California, in April 1981, with Tom Binder and Kevin Cross as partners. They distributed tofu and soymilk made by Wy Ky in Los Angeles. They first started distributing other people's products in about July 1982, starting with Vegetable Jerky from Maple Meadows. When Edensoy was launched in 1983, it started to hurt their sales so they decided to get in on the action. They soon became America's leading seller of Edensoy. In April 1986 they moved the company to Marina del Rey, then in September 1988 back to Santa Monica. Today they market and distribute about 11 soyfoods products under their own brand (all made by other companies), and they distribute another 350 products from other companies. Address: 1602 Stanford St., Santa Monica, California 90404. Phone: 213-829-2331.

**2098. Atencion San Miguel (San Miguel de Allende, Gto.,**

Mexico). 1988. Tofu comes to town. Sept. 30. p. 6. [Eng]

• **Summary:** Nicole Black has built a factory which will soon make this inexpensive and nutritious food—tofu—available to all. Already soy “chorizo” (a spicy sausage) is successfully being turned out, made from the fibrous part of the bean. Outside of a small tofu factory in Mexico City which supplies Japanese restaurants and a few special markets, the San Miguel factory is the first in Mexico. Mrs. Black’s book containing more than 200 recipes for tofu, many of them designed for the Mexican taste, is soon to be published.

2099. **Product Name:** Earth Dance Vegetarian Jerki (Made with Tofu) [Original, or Hot-n-Spicy].

**Manufacturer’s Name:** Earth Dance Vegetarian Foods.

**Manufacturer’s Address:** 209 Commerce Drive #2 (or 305 West Magnolia #133), Fort Collins, CO 80524. Phone: 303-482-9213.

**Date of Introduction:** 1988 September.

**Ingredients:** Both: Organic soybeans, soy sauce (water, wheat, soybeans, salt), vinegar, liquid smoke, nigari (magnesium chloride from seawater) and spices.

**Wt/Vol., Packaging, Price:** 4 oz Ziploc plastic bag. Retail for about \$4.35 (7/89, Colorado). Bulk: \$0.27 per 0.38-oz piece.

**How Stored:** Shelf stable.

**New Product–Documentation:** Letter and leaflet (copyright 1988) from Jerry Manning, Sales/Marketing Director. 1989. June 20. Letter, Labels, articles, and samples from Jerry Manning. 1989. July 7. Label is 5 by 4.5 inches. Blue-green and orange on beige. Stylized illustration, based on an Australian rock painting, of 3 dancers in front of the sun on the horizon. “All vegetable. Made in Colorado. Created in the spirit of a love for life and respect for all of nature’s creatures, Vegetarian Jerki is a spicy, chewy and nutritious all vegetable snack which contains no residual drugs or chemicals. Preserved naturally, Vegetarian Jerki has no cholesterol. Convenient food for conscientious people.” Articles (with no year, date, or page) about the product from *The Coloradoan* (by Sally Norman), *Denver Post*, and *Rocky Mountain News*. It was created by Fran Rikhoff, age 31, a part-time housecleaner and full-time vegetarian. Soyfoods Center product evaluation. 1989. July 15. Delicious! Chewy texture and smoke-cured taste.

2100. **Product Name:** [Tempeh Burgers].

**Manufacturer’s Name:** La Sojeria, S.C.

**Manufacturer’s Address:** Carretera de Vic Km. 30, 08180 Moia (near Barcelona), Spain. Phone: (93) 830 1123.

**Date of Introduction:** 1988 September.

**Wt/Vol., Packaging, Price:** Vacuum packed in plastic bags.

**New Product–Documentation:**

Letter from Javier Arocena of Zuaizto, Spain. 1992. Dec. 14. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

Form filled out by Laura Cami and Mario Rimoldi of La Sojeria. 1993. Feb. 13. Their company introduced these products in Sept. 1988. They now make about 150 lb/month. The burgers are sold in vacuum-packed plastic bags.

2101. Obafemi Awolowo University, Institute of Agricultural Research and Training. 1988. Soyabean recipes: Integrated farming systems programme. Ibadan, Nigeria: Obafemi Awolowo University. ii + 30 leaves. Sept. 25 cm.

• **Summary:** Contents: Processing of soyabean for recipes utilization. Pre-preparation of soyabean (wet base for soyabean

paste, or soya milk and residue [okara], or dry base for

**Earth Dance**  
**VEGETARIAN JERKI**  
All Vegetable <sup>TM</sup>

**Made In Colorado**

Created in the spirit of a love for life and respect for all of nature's creatures, **Vegetarian Jerki** is a spicy, chewy and nutritious all vegetable snack which contains no residual drugs or chemicals. Preserved naturally, **Vegetarian Jerki** has no cholesterol.

**CONVENIENT FOOD FOR CONSCIENTIOUS PEOPLE**

**Ingredients:** Organic soybeans, soy sauce (water, wheat, soybeans, salt), vinegar, liquid smoke, nigari (magnesium chloride from seawater) and spices.

**305 West Magnolia, #133, Fort Collins, CO 80521**

full-fat flour). Soya milk (homemade). Soyabean vegetable soup (with whole ground soybeans). Soya ewedu soup (with soyabean flour or okara). Soya gbegiri soup. Soya iru [dawa-dawa]. Soya ogi. Soya eko. Soya akara. Soya moinmoin. Soya pudding (with okara or soya flour). Soya ikokore (with soyabean paste). Soya amala (with soya flour). Pounded yam with soyabean paste. Soyabean meat bytes (with soyabean flour). Soya burgers (with soyabean paste). Soya meat (with soyabean paste). Soya snack (with whole dry soybeans). Plantain soya pancake (with soya flour). Soya banana fritters (with soyabean flour). Soyabean candies (with dehulled whole soybeans). Soyabean flour Queen cakes. High protein soyabean flour biscuits. Soyabean bread. Soya pancake. Soya puff-puff. Soya ojojo. Soya aadun. Guidelines for growing soyabean. Address: Inst. of Agricultural Research and Training, Obafemi Awolowo Univ., P.M.B. 5029, Moor-Plantation, Ibadan, Nigeria.

**2102. Product Name:** [Little Baden Grilling Sausage].  
**Foreign Name:** Badener Grillwurstchen.  
**Manufacturer's Name:** Sojarei Ebner-Prosl.  
**Manufacturer's Address:** Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.  
**Date of Introduction:** 1988 September.  
**Ingredients:** Tofu, wheat gluten, cornstarch, yeast flakes, green rye (Gruenkern), vegetable fats and oils, salts, spices.  
**Wt/Vol., Packaging, Price:** 150 gm.  
**How Stored:** Refrigerated.  
**New Product–Documentation:** Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 3.5 by 3 inches. Self adhesive. Logo is a green soybean plant against a white circular background. “Fry or grill until crisp in a little oil. Before use, remove the skin! Free of cholesterol. No flesh. Pure and from plants.”

Note: Also in Sept. 1988, the company introduced a Badener Bratwurstchen (Baden Bratwurst type meatless sausage). It has similar ingredients, except that the main ingredient is wheat gluten and it contains no tofu or other soy products. The two labels are almost identical.

**2103. Product Name:** [Tof'in Tofu Burgers {Not Fried} (Italian-Style, Chinese-Style, au Gratin, Provençale with Tomato & Onions, or Forest Mushrooms)].  
**Foreign Name:** Tof'in (Italienne, Chinoise, Gratinée).  
**Manufacturer's Name:** SOY (Société Soy).  
**Manufacturer's Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.  
**Date of Introduction:** 1988 September.  
**Wt/Vol., Packaging, Price:** 2 x 100 gm in vacuum pack.  
**How Stored:** Refrigerated.  
**Nutrition:** Per 100 gm.: Protein 11.6 gm, fat 8.8 gm, carbohydrates 8.1 gm, calories 158.  
**New Product–Documentation:** Letter from Bernard Storup. 1989. March 3. Tof'in (low fat tofu burgers, cooked

without fat) in 3 flavors (Garlic & Fines Herbes, Provençale, and Forestiere) were introduced in April 1986 and discontinued in March 1988. Three other flavors (Italienne, Chinoise, and Gratinée) were introduced in Sept. 1988.

Letter from Bernard Storup of Société Soy. 1990. June 6. Tof'in was introduced first (in 1986) and Croque Tofu (deep-fried burgers) came second (Feb. 1987). They are the same product but the packaging for each was different.

Talk with Bernard Storup. 1990. June 13. Tof'in (pronounced toe-FEEN) was packaged for supermarkets. It was the same as Croque Tofou (both were deep-fried), but not the same as Croque Tofou Léger (which was not deep-fried, and which came in Italienne, Chinoise, and Gratinée flavors). Tof'in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Doré de Soja, which is the same as Tof'in (i.e. deep-fried).

**2104. Soyaneews (Sri Lanka).** 1988. Harnessing the sun for better nutrition. 10(3):1. July/Sept.

• **Summary:** “Tempeh, produced in Indonesia for hundreds of years, has recently found favour in Sri Lanka as a high quality substitute for dried fish. It has also proven popular in dishes calling for eggplant, baby jack and chicken.”  
 When dried to a moisture content of 12%, it has a long shelf life without refrigeration. Now Plenty Canada, working in cooperation with the Intermediate Technology Development Group (I.T.D.G.) and Sarvodaya, have developed a low cost solar powered cabinet dryer, which dries tempeh in less than half the time of traditional techniques with no losses to birds or insects. Plenty Canada hopes to introduce their new solar powered dryers to village and farm groups interested in the production of commercial quantities of dried tempeh.

**2105. Product Name:** [Sra. Soya Soyrisa (Like a Mildly Spicy Chorizo Sausage but Made with Okara)].

**Foreign Name:** Sra. Soya Soyrisa.

**Manufacturer's Name:** Sra. Soya.

**Manufacturer's Address:** Huertas 17, San Miguel de Allende, Guanajuato 37700, Mexico. Phone: 465-20255.

**Date of Introduction:** 1988 September.

**Ingredients:** Okara, whole wheat flour, vinegar, soy sauce, eggs, mustard, garlic, chili & other spices.

**Wt/Vol., Packaging, Price:** 300 gm and 450 gm vacuum packed.

**How Stored:** Shelf stable, 3 week shelf life.

**New Product–Documentation:** Letter from Nicole Black, owner. 1988. Sept. 18. “Fried in oil this tastes like a good Mexican sausage, or mashed with a little mayonnaise it makes a wonderful paté that is very meaty in flavor. Everybody loves it. I think it should sell as well as or better than the tofu. Thus, what is ordinarily waste, ironically enough, will help to save my business.”

2106. Bailey, Simon. 1988. Re: New developments with soyfoods in the UK: British Arkady, Haldane, Realeat, and The Regular Tofu Co. Letter to William Shurtleff at Soyfoods Center, Oct. 10. 2 p.

• **Summary:** In Feb. 1988 Haldane was acquired by British Arkady's Health Food Division. Brian Welsby and Peter Fitch are joint managing directors. Haldane brings in the Hera, Realeat, and Direct Foods lines. Brian Welsby is the key man at Haldane.

The Realeat Company, maker of the VegeBurger and Vegebanger, formerly owned by Gregory Sams, no longer exists. In the summer of 1988 Haldane acquired the Realeat brand. Greg Sams retains interest in the company, but purely as a consultant, without controlling interest. The Regular Tofu Co. is now also part of Haldane Foods. John Holt, the founder of RTC, is no longer involved. Address: 138 Randolph Ave., London W9 1PG, England. Phone: 01-289-7364.

2107. Tofu House, Inc. 1988. New trademarks: Better than chicken. *Official Gazette Trademarks (Washington, DC)*. Oct. 18.

• **Summary:** Filed 5-6-1988. For soybean-based chicken substitute (U.S. Cl. 46). First use 9-1-1986. In commerce 9-1-1986. Address: Huntington Station, New York.

2108. Byrne, Maureen. 1988. Whatever happened to new protein? *Food Manufacture (London)* 63(10):51-52, 54, 57. Oct.

• **Summary:** According to Interfood, 3,000 tonnes of soy protein isolate and 6,000 tonnes of concentrate are used in the UK every year. In the UK, British Arkady was the first company to manufacture TVP after its takeover by ADM. Lucas Ingredients is another large manufacturer in the UK. A smaller maker is GMB Proteins, which is part of Bush Boake Allen. Also discusses Bontrae, Kesp, Beanfeast, and Quorn.

"The most exciting new protein food to have emerged in recent years is undoubtedly mycoprotein, developed by RHM [Rank, Hovis, McDougall] in the UK, which is the result of nearly 20 years of research... Called Quorn, this protein-rich food, with a texture very similar to that of meat, is now produced and marketed by Marlow Foods (formerly New Era Foods), a company jointly owned by RHM and ICI." The ideal source material for Quorn is "a microscopic plant called *Fusarium graminearum*, which is similar to the mushroom and which was eventually discovered not far from RHM's development centre near Marlow, Bucks (hence the name Marlow Foods). Marlow has now been producing Quorn at its factory in Stokesley in the North East of England for two years." They are grown in a sterile fermenter on liquid glucose produced by hydrolysing cereal starch. Nitrogen in the form of ammonia is added for protein development, with essential minerals and oxygen. Quorn is discussed in detail, and a large photo (p. 57) shows a chicken

analogue made from Quorn.

Note 1. This is the earliest document seen (Oct. 2014) that mentions Quorn, a meat alternative made from mycoprotein (*Fusarium graminearum*) by Marlow Foods in Stokesley (a small market town), North Yorkshire, in northern England.

Note 2. This is the earliest document seen (Jan. 2010) that mentions RHM in connection with Quorn or as the company that developed Quorn. Address: England.

2109. *East West*. 1988. East West presents: Best & worst awards. 3rd annual. 100% natural. Oct. p. 65-72.

• **Summary:** Best Natural Soy Sauce: Lima Nama Shoyu from Ohsawa-Japan, imported by Ohsawa America of Chico, California. Twice brewed, lower in salt, and aged four years. "It is unique among shoyus, with exceptional smoothness and flavor."

Better Than It Sounds Award: "Tofu chocolate? Yes, Barat Bars by Legume Inc. of Montville, New Jersey, use tofu instead of dairy and no hydrogenated or fractionated palm kernel oil. Carob candies move over!"

Best Tasting Flavored Soy Drinks: "The Westbrae Malted won this contest going away. Creamy, thick, and delicious, they are more of a dessert than a drink. Some devotees eat them frozen."

Least Healthful Line of Soy Drinks: "The Westbrae Malted. The flip side of their great taste is their almost 400 calories and 15 grams of fat per 8 ounces."

Most Healthful Line of Soy Drinks: Edensoy. They are the only producers making a totally oil-free drink.

Worst Tasting Flavored Soy Drinks: "Vitasoy from San Francisco, Calif., seem to have few fans and finished last in our blind taste test."

Most Questionable Beverage Label Claim: "3 grams of fat per 6 ounces of Carob and Chocolate Ah Soy, by Great Eastern Sun of Enka, North Carolina. These soymilks are rich and creamy, yet 3 grams is a lower fat content than even Edensoys, made without oil. How is that possible guys?"

That's Progress? Award: "Mori-Nu Tofu by Morinaga Nutritional Foods of Los Angeles. Aseptic Tetrapacked tofu that has indefinite shelf life and can be shipped anywhere. Good for backpackers maybe but can't compare to fresh and local."

Best Fake Hot Dog: SoyBoy Tofu Not Dogs by Northern Soy of Rochester, N.Y. "Nice smoky flavor and smooth texture, almost as good as the real thing."

Worst Fake Hot Dog: Tofu Pups of Lightlife Foods of Greenfield, Massachusetts. "Dry and crumbly on the inside, with a lack of distinctive flavor. Won't fool anybody at the neighborhood cookout."

Best Tamari: San-J Traditionally Brewed Tamari from San-J International of Colonial Heights, Virginia. "No one else even came close. Question: Will they be able to retain their appeal when the first U.S.-brewed batch hits the

shelves?”

2110. Liebman, Bonnie. 1988. Vegieburgers: Stalking the perfect VLT. *Nutrition Action Healthletter*. Oct. p. 10-11.

• **Summary:** A rating of meatless burgers based on taste and fat content. A table shows product, maker, serving size, calories, fat (% calories, uncooked), sodium, and taste. “If the first ingredient is tofu, the fat content is high—probably around 55% of calories (compared with 58-66% for beef)... None of the burgers made with tempeh as a major ingredient supplied nutrition information. But tempeh gets only 35% of its calories from fat—an advantage, at least nutritionally. But palate pleasers they’re not. Our testers quickly learned to identify the tempeh burgers by their ‘sour’ or ‘glutenous’ taste, and invariably tossed them into the ‘bad’ category. They come across as poor imitations of the imitation meat-burgers.

The five best rated products were: 1. Gardenburger (Wholesome & Hearty Foods, Portland, Oregon). 2. Nature’s Burger, Original (Fantastic Foods, Novato, California). 3. Nature’s Burger, Pizza (Fantastic Foods). 4. Nature’s Burger, Barbecue (FF). 5. Tofu Burger (FF; the cook supplies the tofu). Soy products by White Wave, Quong Hop, Natural, Inc. and Bud, Inc. are listed in the table.

2111. **Product Name:** Loma Linda Nuteena (Meatless Luncheon Loaf or Cold Cuts Prepared from Raw, Ground Peanut Butter and Soy Flour).

**Manufacturer’s Name:** Loma Linda Foods.

**Manufacturer’s Address:** 11503 Pierce St., Riverside, CA 92515.

**Date of Introduction:** 1988 October.

**Ingredients:** Water, raw peanut butter, soy flour, rice flour, corn flour, natural (vegetable) flavors, salt, onion powder, L-lysine, DL-methionine, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin).

**Wt/Vol., Packaging, Price:** 19 oz (538 gm) can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** 1988: Per ½ inch slice (2.4 oz–67 gm): Calories 160, protein 8 gm, carbohydrate 5 gm, fat 12 gm, cholesterol 0 mg, sodium 120 mg, potassium 200 mg.

**New Product–Documentation:** Label sent by Loma Linda Foods. 1988. Oct. 5. The ingredients are now: Water, raw peanut butter, soy flour, rice flour, corn flour, natural (vegetable) flavors, salt, onion powder, L-lysine, DL-methionine, vitamins (niacinamide, D-calcium pantothenate, thiamine mononitrate, pyridoxine hydrochloride, riboflavin, cyanocobalamin). This product was introduced in 1963. But note that a canned product named Nuteena was also available in June 1934. It is not clear whether or not it contained soy in 1934.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix

A.6-27. The ingredients are the same as those shown above. The soy flour is probably textured.

Note: This product was first introduced in 1949, but did not contain textured soy protein at that time.

2112. **Product Name:** [Wheat & Soy Patties, Rice & Soy Patties, Green Rye & Soy Patties].

**Foreign Name:** Dinkel-Laibchen, Reis-Laibchen, Gruenkern-Laibchen.

**Manufacturer’s Name:** Sojarei Ebner-Prosl.

**Manufacturer’s Address:** Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.

**Date of Introduction:** 1988 October.

**Ingredients:** Wheat & Soy: German wheat (spelt, Dinkel), soybeans [okara], sunflower seeds (all organically grown), wheat protein, tamari, onions, yeast flakes, salt, herbs, and spices.

**Wt/Vol., Packaging, Price:** 2 patties, 200 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 3.5 by 3 inches. Self adhesive. Logo is a green soybean plant against a white circular background. “Just warm and serve. Free of cholesterol. No flesh. Pure and from plants.”

Ingredients for the Rice & Soy Patties are: Brown rice, soybeans, and whole wheat flour (all organically grown), rolled oats, barley miso, tamari, yeast flakes, salt, herbs, spices.

Ingredients for the Green Rye & Soy Patties are: Green rye and soybeans (both organically grown), tamari, onions, yeast flakes, salt, herbs, spices (curry).

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. The soy ingredient in these is okara.

2113. Stromnes, Lonnie. 1988. White Wave to launch soy cheeses, meat analogs. Will hold private offering (Interview). *SoyaScan Notes*. Nov. 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The line of soy cheeses, introduced last week at the Baltimore Natural Foods Expo but without labels, are called Soy A Melt, in Monterey Jack, Mozzarella, and Jalapeno flavors. Made by one of the three large manufacturers (not by Soya Kaas), they contain casein. By April 1989 White Wave plans to have a line of tofu-based meat analogs (hot dogs, sliced bologna, and sausages), and later in 1989 a soy yogurt. Roughly \$300-400,000 is coming into the company from a private offering soon. White Wave does some private labeling other than ice cream.

At the Baltimore show, Soya Kaas and Soyco each launched a cream cheese and sour cream. Address: San Leandro, California.

2114. *Dispatch (Columbus, Ohio)*. 1988. Worthington Foods to build Zanesville unit. Nov. 12. p. 9D. Business section.

• **Summary:** “Worthington Foods Inc. will construct a frozen foods manufacturing plant in Zanesville, Ohio, early next year. The Worthington-based company has signed a letter of intent to purchase 12 acres in the Zanesville Industrial Park, where it will build a 50,000-square-foot plant. The project will cost about \$10 million, said Dale E. Twomley, president and chief executive officer at Worthington Foods. Twomley said the company... plans to begin production in the fourth quarter of next year. Initially, the plant will employ 40 to 50 people and manufacture Scramblers, the company’s frozen egg product. ‘But we may do some future expansion there later,’ Twomley said.”

**2115. Product Name:** Grand Life Seitan “Wheat-Meat.”  
**Manufacturer’s Name:** Grand Life Natural Foods.  
**Manufacturer’s Address:** P.O. Box 403, Pacific Grove, CA 93950 [c/o Sweet Earth, 207 16th St.]. Phone: 408-375-8673.

**Date of Introduction:** 1988 November.

**Ingredients:** Whole wheat flour, filtered water, natural tamari (soybeans, wheat, seasalt), kombu, ginger, garlic.

**Wt/Vol., Packaging, Price:** 8 oz (226 gm) vacuum pack in plastic bag. Retail for \$2.98 (11/91).

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Paul Duchesne of Fairfax, California. 1991. Nov. 19. Two women from Austria (to whom Paul talked—they were returning to Austria) just sold their seitan company to two guys who still are making seitan. It was located in Pacific Grove, or near there, down the California coast. This seitan is sold in health food stores. It is sold sliced thin, in flat plastic bags, more like a cutlet than like Ron Harris’ old seitan chunks.

Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 3 by 4.5 inches on a 6.5 by 9-inch plastic vacuum-pack bag. Black, white, and yellow on brownish-gold. “100% vegetable protein. Seasoned wheat gluten. Ready to eat. No cholesterol. Low in fat.” On rear panel: “Seitan was first developed by Zen Buddhist cooks in China and Japan, and used in place of meat. Grand Life seitan has a full-bodied, rich taste and a juicy, tender texture. It’s nutritional value and hearty, yet light taste and texture is pleasing to vegetarians and people attempting to reduce or eliminate meat from their diet. Grand Life seitan is superb in sandwiches, soups, salads, stews, and casseroles. Please try it deep-fried, sauteed, broiled, and even barbecued in your favorite recipes.”

Talk with Russel Hicks, owner of Sweet Earth Natural Foods in Pacific Grove. 1991. Nov. 26. Grand Life was started in late 1988 by Edmund and Angela Reininger (he was a trained chef and knowledgeable macrobiotic; they were married), and by a woman named Terry Navaille (whose brother is Russel’s brother-in-law). From the outset they rented space at Sweet Earth (soon they were trading product for rent), where they made seitan 1 day a week

for about 2 years. Edmund developed this sliced form of the product. Then in about April 1989 Edmund and Russel developed the Grand Life Sandwich (based on breaded seitan). In early 1991 Edmund and Angela felt guided to return to Austria; also their visas were running out and they were having trouble getting work permits. Terry was having a baby, so she went her own way in Pacific Grove. So in May 1981 the 3 founders sold their recipe and the name to Sweet Earth. Current seitan production is 250-300 lb/week. It is made from vital wheat gluten, not from whole wheat. Product sales are now growing nicely and are about to grow a lot more. Now it is sold vacuum packed and refrigerated, with a very limiting 2-week shelf life. Soon Sweet Life will be installing big freezers and it will be sold frozen and promoted much more. Many distributors want to carry it as soon as it is available frozen.

Soyfoods Center product evaluation. 1991. Nov. 26. Excellent texture, good flavor, poor label design. We feel product has expanded potential sold in a meatless gravy, or as breaded deep-fried cutlets.

**2116. Product Name:** Soyboy Tofu Breakfast Links. Renamed SoyBoy Vegetarian Breakfast Links by 1992.

**Manufacturer’s Name:** Northern Soy, Inc.

**Manufacturer’s Address:** 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.

**Date of Introduction:** 1988 November.

**Ingredients:** Organic tofu (filtered water, organically grown soybeans, natural calcium chloride nigari—a naturally occurring mineral coagulant, not a preservative or artificial ingredient), isolated soy protein, corn oil, tapioca flour, yeast extract, molasses, natural flavoring, onion powder, garlic powder, herbs and spices, vegetable gum, sea salt.

**Wt/Vol., Packaging, Price:** 8 oz package, 12 per case. Retail for \$2.65 (7/92, Maryland).

**How Stored:** Refrigerated, 35 day shelf life. Or frozen.

**Nutrition:** 7/92. Per 2 oz. or 2 links: Calories 120, protein 10 gm, carbohydrates 5 gm, fat 7 gm (incl. saturated 1 gm and polyunsaturated 3 gm), cholesterol 0 mg, sodium 270 mg.

**New Product–Documentation:** Leaflet. 1988. Nov.

“SoyBoy all natural meatless entrees. The finest tofu products begin with the best tofu. Since 1977 nutritionally superior and delicious foods made from organic soybeans & quality ingredients.”

Product (Vegetarian Breakfast Links) with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Copyright 1991. Label is 7.5 by 3.5 inches. Self adhesive on vacuum pack. Red, green, black, brown, and yellow on white. Illustration of 2 links next to waffles on a plate. “All natural. No cholesterol. Made with organic tofu. Keep refrigerated or frozen. May be sold frozen for one year after date on package.” Copyright 1991.

2117. **Product Name:** Simply Better Tofu, Tofu Burgers, Marinated Tofu Pouches, Tofu Paté, Tofu Cottage Cheese, Tofu Dressing [Curry, or Garlic & Dill], Tofu Mayonnaise.

**Manufacturer's Name:** Progressive Foods Pty. Ltd.

**Manufacturer's Address:** 24-B Braeside Dr., Braeside, VIC 3195, Australia. Phone: 613-580-8688.

**Date of Introduction:** 1988 November.

**New Product–Documentation:** Form filled out by Lindsay Kotzman, owner. 1989. Jan. She purchased the business in Nov. 1988. Monthly production is as follows: Tofu (375 gm and 750 gm): 7,000 kg. Tofu burgers: 1,000 kg. Marinated tofu pouches: 1,000 kg. Tofu cottage cheese: 100 kg. Tofu paté: 80 kg. Tofu dressings: 30 kg each flavor. Tofu mayonnaise: 30 kg.

2118. **Product Name:** Simply Better Soy Sausages.

**Manufacturer's Name:** Progressive Foods Pty. Ltd.

**Manufacturer's Address:** 24-B Braeside Dr., Braeside, VIC 3195, Australia. Phone: 613-580-8688.

**Date of Introduction:** 1988 November.

**New Product–Documentation:** Form filled out by Lindsay Kotzman, owner. 1989. Jan. She purchased the business in Nov. 1988. Monthly production of soy sausages for grilling and boiling (broiling?) is 300 kg.

2119. **Product Name:** [Tofu Burgers {Deep-Fried} (Garlic and Fines Herbes, Provençale with Tomato & Onions, or Forest Mushrooms)].

**Foreign Name:** Doré de Soja (Ail/Fines Herbes, Provençale, Forestière).

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1988 November.

**Wt/Vol., Packaging, Price:** 2 x 100 gm in vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Bernard Storup. 1990. June 13. Tof'in is the same as Croque Tofou, but not the same as Croque Tofou Léger. Tof'in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Doré de Soja, which are the same as Tof'in. The packaging is very nice.

Letter from Bernard Storup. 1990. Dec. 26. "All the confusion between deep-fried and not deep-fried Croque Tofou comes from the fact that our first labels all said "Léger," even for the deep-fried products. Croque Tofou Léger (not deep-fried) was the continuation of our former Tof'in (not deep-fried). Since Jan. 1990 we have stopped using the term "Léger" on our deep-fried products. Our Croque Tofou Léger have new labels since Jan. 1990. They are now called Doré de Soja, with 2 in each package."

2120. Tofu Shop Deli and Specialty Foods Co. 1988. This holiday season, make it Tofu Turkey (Leaflet). Arcata,

California. 1 p. Front and back. 22 x 14 cm.

• **Summary:** Typeset, black ink on yellow paper, with four illustrations: (1) The Tofu Shop, on pillars and with a tree growing overhead, at the edge of the ocean (lower left). (2) A clip-art illustration of a large turkey with tail fanned and near-side wing extended (upper left). (3) Corn plants growing in a field (upper right). (4) Santa Claus in traditional costume, holding a large white box.

"- mmm delicious. \* Stuffed, basted, baked. \* Ready to eat or reheat. \* Great leftovers.

"That's right folks! This year you can save the bird and eat it too! No bones about it. Special order one of our delicious Tofu Turkeys. They're made 100% from our own traditional-style tofu, stuffed with our own secret family stuffing. And basted and baked to a golden brown. M' good!

"This year special order a Tofu Turkey from The Tofu Shop or stop by our deli for a 'hot slice' with all the fixin's!"

"Order information: Order your Tofu-Turkey and all the fixins from the: Tofu Shop-768 18th St., Arcata, California 95521. (707) 822-7409. All orders must be prepaid." Gives sizes, servings, and prices for Tofu Turkeys, Tofu-Turkey Stuffing, and Fresh Baked Pumpkin Tofu Pies. Order deadlines for Thanksgiving and Christmas. "Let's talk organic turkey."

On the back are "Tofu-Turkey directions." Ingredients for tofu, stuffing, and basting. Serving instructions. Wholewheat gravy. Homemade cranberry sauce. Address: 768 18th St., Arcata, California. Phone: 822-7409.

2121. *Vegetarian Times*. 1988. The main event [Recipe contest winners]. Nov. p. 40-42, 80-83.

• **Summary:** "More than 300 of you responded to our call for favorite recipes... First Place Vegan Winner was an Olive Patè and Tofu Quiche. Honorable Mention went to Tofu Croquettes. Third Place was Savory Tofu Pie. Honorable Mention went to Tofu 'Ham' and Cheese Bake."

2122. **Product Name:** Tofu Burger [BBQ Style, or Cajun Style].

**Manufacturer's Name:** Dae Han, Inc.

**Manufacturer's Address:** 737 S.E. Alder St., Portland, OR 97214. Phone: 503-233-8638.

**Date of Introduction:** 1988 December.

**Ingredients:** No ingredients given on labels.

**Wt/Vol., Packaging, Price:** 7 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Paul Moss, who has worked with Dae Han for 7 years. 1990. March 28. The company now makes these 2 burgers, which were introduced in Dec. 1988.

Labels sent by Paul Moss. 1990. May 10. 4.5 by 3 inches, oval. Self adhesive. Dark brown, light brown, red, black, and white. On each label is written "High protein. Low calorie. Cholesterol free. No preservatives. (Keep

Refrigerated).”

Leaflet from Dae Han, Inc. 1991. July. Quality and unique. A photo shows all of the products, and their names are listed. The company also makes kim chee (mild or spicy).

2123. **Product Name:** New York “Doggie” (Tofu Hot Dog & Brown Rice Rolled in a Tortilla).

**Manufacturer’s Name:** Paul’s Organic Food Works.

**Manufacturer’s Address:** P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

**Date of Introduction:** 1988 December.

**Ingredients:** Short grain brown rice\*, spring water, sprouted wheat tortilla\*, tofu hot dog\*, sauerkraut\*, mustard, onions\*, tomatoes\*, hot peppers\*, sesame oil\*, shoyu\*, leeks\* or scallions\*, mizuni\* or arugula\*, lettuce\*. \* = Organically grown per Cal. Health Code Sec. 26569.11.

**Wt/Vol., Packaging, Price:** 12 oz. Retail for \$4.25 (8/89, northern California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on yellow paper. “Brown rice sandwich. Sauerkraut–Mustard–Hot Pepper. 12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down.” Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back is the statement, “Resistance is the most subtle form of cooperation.” The statement is changed weekly. The tofu hot dog is made by Light Foods.

Note: Arugula or arrugula (pronounced uh-RUE-guh-luh, an Italian term), an ingredient in this product, is a plant of the mustard family resembling a fancy, slightly bitter lettuce grown in Salinas, California. It is expensive and can be replaced with parsley. It is also called “rocket” or “garden rocket” after the French word *roquette*. Mizuni (pronounced mi-ZU-ni) is a mustard green, which is grown in California. It is not listed in any Webster’s Dictionary.

2124. **Product Name:** Garden Gourmet Meatless Entrees [Vege-Puffs in Pastry, Vege-Links in Pastry, Vege-Patties, or Vege-Cutlets].

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** 24 Spielman Rd., Fairfield, NJ 07006. Phone: 201-277-7060.

**Date of Introduction:** 1988 December.

**Ingredients:** Filling: Rehydrated soy protein concentrate, wheat gluten, soy oil, egg whites, spices, and tamari. Pastry shell for first 2 products: Wheat flour, soybean oil, salt.

**How Stored:** Frozen.

**New Product–Documentation:** Soya Newsletter. 1988. Nov/Dec. p. 10.

2125. **Product Name:** Tofu Burger Mix (Sold Together with Tofu).

**Manufacturer’s Name:** American Pride Soyfoods Inc.

**Manufacturer’s Address:** 612 W. Kirkwood, Fairfield, IA 52556.

**Date of Introduction:** 1988.

**New Product–Documentation:** Talk with Alex Green.

1988. Sept. 9. This product is just now being introduced to counter Nasoya’s thrust into the Midwest, which has hurt American Pride’s market. During demos, 25% of those who sampled the product, purchased it on the spot, and 50% of these had either never tasted tofu before or did not like tofu.

Talk with Rick Desmond, partner in American Pride. 1990. Aug. 2. This product never made it past the test market phase. It was never really launched.

2126. **Product Name:** Vegetable Burgers with Tofu.

**Manufacturer’s Name:** Cauldron Foods Ltd.

**Manufacturer’s Address:** 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.

**Date of Introduction:** 1988.

**Ingredients:** Reconstituted mixed vegetables (peas, carrots, onion, potato, leek, green and red peppers), tofu (water, soya beans, calcium sulphate), ground soya beans, oats, textured soya flour, soy sauce (water, soya beans, wheat, salt), yeast, hydrolysed vegetable protein, salt, yeast extract.

**Wt/Vol., Packaging, Price:** 300 gm paperboard box.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: calories 187, protein 12.92 gm, fat 10.45 gm, carbohydrate 11.15 gm.

**New Product–Documentation:** Label. 1989, sent by Philip Marshall. Paperboard box. Green, red and black on white. Color photo of oval burger-like product on front. Contains 4 burgers. “Just heat to eat. Contains no artificial flavourings or colourings. Keep chilled at 4°C.” Package bears the green “V” symbol “Suitable for vegetarians.”

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1988.

2127. **Product Name:** [GranoVita Organic Tofu Sausage (Seasoned, or with Vegetables)].

**Foreign Name:** GranoVita Bio-Tofu (Gewuerzrolle, or Gemueserolle).

**Manufacturer’s Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1988.

**Ingredients:** Seasoned: Organic tofu (water, organically grown soybeans, calcium chloride), water, vegetable oil, egg protein, paprika, seasonings, spices.

**Wt/Vol., Packaging, Price:** 200 gm poly sausage chub, inside a cellophane bag.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 10.1 gm, fat 5.8 gm, usable

carbohydrates 20.3 gm, calories 173. 1 BE (Broteinheit, or diabetic exchange) = ca. 60 gm.

**New Product–Documentation:** Manufacturer’s brochure. 1989? “Bio-Tofu for the High Quality Kitchen.” p. 4-5. A color photo shows the Labels of both flavors. Form filled out and Labels sent by DE-VAU-GE. 1990. June 11. These products were introduced in 1988. Labels. 2 by 4.75 inches. Self adhesive. Red, green, yellow, black, and peach (or greenish yellow) on white. Each contains an illustration of a pagoda on the front. “Practically cholesterol free. Gluten free. Contains no flesh. To prepare, pan fry or grill.” Neufarm certification symbol.

2128. **Product Name:** [GranoVita Organic Tofu Vegetable Patties {Meatless}].

**Foreign Name:** GranoVita Bio-Tofu Gemuese Bratling.

**Manufacturer’s Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1988.

**Ingredients:** Organic tofu (water, organically grown soybeans, calcium chloride), whole soybean product, vegetable oils and fats in changing amounts, fine bread

crumbs (*Paniermehl*), mushrooms, paprika, carrots, leeks, wheat protein [gluten], sunflowerseeds, wheat grits, oat flakes, soy sauce, onions, egg protein, herbs, seasonings (*Wuerzmittel*), spices (*Gewuerze*).

**Wt/Vol., Packaging, Price:** 125 gm vacuum pack poly bag, 3 pieces per bag. Retail for DM 2.98.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 13.1 gm, fat 10.2 gm, usable carbohydrates 19.5 gm, calories 222. 1 BE (Broteinheit, or diabetic exchange) = 61.5 gm.

**New Product–Documentation:** Label sent by Anthony Marrese. 2.75 by 5 inches. Red, green, white, and black on yellow. “Contains no flesh. Simply fry on both sides in a pan.” A photo shows three ready-to-eat patties on a plate with green peas, potatoes, a tomato, and parsley. Exklusiv Neufarm certification symbol.

Label sent by DE-VAU-GE. 1990. June 11. Date for GranoVita Tofu-Gemuesebratling given as 1988.

2129. **Product Name:** [GranoVita Green Rye & Cheese Patties].

**Foreign Name:** GranoVita Gruenkern Kaese-Bratling.

**Manufacturer’s Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer’s Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1988.

**Ingredients:** Water, vegetable oils and fats in changing proportions by weight, green rye, cheese, fine bread crumbs, onions, egg protein, seasonings (*Wuerzmittel*), soy sauce, sea salt, spices (*Gewuerze*).

**Wt/Vol., Packaging, Price:** 3 patties weigh 125 gm.

**Nutrition:** Per 100 gm.: Protein 10.9 gm, fat 11.6 gm, usable carbohydrates 29.3 gm, calories 265. 1 BE (Broteinheit, or diabetic exchange) = 41 gm.

**New Product–Documentation:** Form filled out and Label sent by DE-VAU-GE. 1990. June 11. This product was introduced in 1988. Label: 2.75 by 5 inches. Red, blue, green, white, black and yellow-beige. “Contains no flesh. Simply fry on both sides in a pan.” A photo shows three ready-to-eat patties on a plate with Brussels sprouts, potatoes, and parsley. Exklusiv Neufarm certification symbol. A new version of this, probably introduced in 1990, is named GranoVita Gruenkern Käsebratling in Champignonsauce mit Gemuese-Reis; the patties come in a mushroom sauce with vegetables and rice.

2130. **Product Name:** [Tofu (Water Packed, or Vacuum Packed), Tofu Burgers, Marinated Tofu, Dried Tofu, Smoked

Tofu].

**Foreign Name:** Natur-Tofu (Lose, oder Vakuumverpackt), Tofu-Burger, Marinierter Tofu, Getrockneter Tofu, Raeucher-Tofu.

**Manufacturer's Name:** Detlef Dorow–Erster Berliner Tofurei. Later renamed Berliner Tofurei.

**Manufacturer's Address:** Luebbenerstr. 4, D-1000 Berlin 30, West Germany. Phone: 030/612-7931.

**Date of Introduction:** 1988.

**New Product–Documentation:** Dave Lawder. 1989. Milwaukee Business Journal. Jan. 15. p. 1, 21.

2143. **Product Name:** Mexican Tofu-Vegie Burgers: 25% Fresh Vegetables.

**Manufacturer’s Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer’s Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1988.

**Ingredients:** 1996: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride} or calcium sulfate {natural firming agents}), onions, carrots, kale, potato or rice flour, sea salt, herbs and spices, garlic crushed chilies, hi oleic safflower oil.

**Wt/Vol., Packaging, Price:** 6.5 oz vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** See next page. Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1988, and made at Wildwood’s plant in Santa Cruz.

2144. **Product Name:** Morningstar Farms Country Breakfast: Scrambled Egg Product, Buttermilk Pancakes, and Vegetable Protein Links.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
 Worthington, OH 43085.

**Date of Introduction:** 1988.

**Ingredients:** Breakfast Links: Textured vegetable protein (wheat gluten, soy isolate and concentrate), egg whites, soybean and/or corn oil, partially hydrogenated soybean and cottonseed oil,...

**Wt/Vol., Packaging, Price:** 6.8 oz (191 gm) tray with plastic wrap.

**How Stored:** Frozen.

**New Product–Documentation:** Package with Label sent by Dr. Walter Wolf. 2000. Aug. 5. Copyright date is 1988. "Ready in just 3 min. Microwavable."

2145. Perry, Rick. 1988. Hurricane kitchen: how to cook healthy foods for large groups and institutions. Augusta, Maine: Lance Tapley. 172 p. Illust. (by Douglas Alvord). 29 cm. [10 ref]

• **Summary:** "Dedication: to those cooks who have realized the need to change the American diet." This is largely a vegetarian cookbook—but not completely (see p. 117).

From April to October Rick is found on Hurricane Island, off the coast of Rockland, Maine, where he has been the food service director for the Hurricane Island Outward Bound School since 1975.

Chapter 3, "Real foods" (p. 32-45) includes whole grains (incl. whole wheat, brown rice, corn, millet, quinoa). The section on "The amazing soybean" begins: "The versatile soybean is truly the food of the future." It discusses miso, tamari, tempeh, and tofu. The section on "Oil" mentions soy oil. The section on "seaweeds" begins: "I prefer to call them sea vegetables..."

Chapter 5, "Ordering staples and setting up a grain room" has a large table for various foods showing the quantity in pounds and barrel size in gallons. Foods include: Aduki beans (azuki). Brown rice, shortgrain. Brown rice, sweet. Sesame seeds. Soybeans.

Soy related recipes: Tofu dill bread (p. 83). Basic miso soup. Miso soup for 30 (p. 106). Cooking legumes (cook 4 parts water with 1 part whole soybeans for 9 hours, p. 111). Pressure cooked beans (cook 3 parts water with 1 part whole soybeans for 2 hours, after coming to pressure, at 15 psi, p. 112). Seitan (p. 113, 122). Seaweeds (p. 115). How to make tofu (and okara) in an institutional kitchen—makes 8 lbs (p. 125). Tofu—Baked, sautéed, or fried (p. 124). Soysage burgers (p. 124). Tofu salad or mock egg salad. Tempeh—Baked or sautéed (p. 125). Tofu salad dressing (p. 138). Soy mayonnaise (with 2 cups soy milk, p. 140). Soy milk (homemade, from 10 cups soybeans, p. 153). Hot carob drink (with milk or soy milk, p. 153). Soy frosting for desserts (p. 155). Address: Portland and Rockland, Maine.

2146. Société Soy. 1988. Soy: L'équilibre complet! [Soy: Complete balance (Brochure)]. 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. 6 panels. 21 x 10 cm each. [Fre; Eng; Ger]

• **Summary:** See next page. This attractive full-color brochure, published in French-, English-, and German-language editions, shows the company's line of tofu products, with a color photo and description of each. They are: Tofou, Tofumé (smoked tofu), Croque Tofou (Fresh tofu burgers), Grinioc (Fresh wholemeal burgers), Tofast Soya Paste (Spread), Tofinelle (Soya mousseline with capers, eaten like quenelles), and Soyeux (dessert). "The whole range of SOY products come from biologically grown soya!" Address: Saint-Chamond, France. Phone: 77 31 23 66.

tofo

SOYA - EASY TO COOK WITH

This is a traditional soja based product from biological agriculture. It has amazing dietetic qualities, rich in proteins of vegetables origin (13 per cent minimum), low in fats and calories (less than 100 kcal/100g). It blends very well with your every day recipes, as a salad or accompaniment to vegetables and cereals.

tofumé®

All the Tofou quality with a delicious flavour of spices and that smoked taste. There are thousands of ways of associating it with your every day dishes and it will represent a high quality biological protein.

Croque TOFOU

FRESH TOFU BURGERS

Elaborately prepared Tofou, ready-to-eat in the form of a snack or accompanying a salad, cereals or vegetables. The CROQUE-TOFOU constitute a considerable portion of protein in your meal.

7 varieties are available : olive, Emmenthal, garlic and fine herbs, provencale, basquaise, leek with ginger.

SOY

COMPLETE BALANCE

2147. Thompson, Patricia J.; Jax, Judy Annette. 1988. *Teens in action*. St. Paul, Minnesota: Changing Times Education Service / EMC Publishing. 311 + 91 p. 25 cm. Copyright 1989.

• **Summary:** This home economics textbook, which comes in both a students' and a teachers' edition, includes tofu in the curriculum—a first. Information and recipes (Golden Goddess Parfait, Tofu Smoothie, and Chocolate Pudding) were supplied by Linda Barber Pike. Tofu is listed as a protein source. A tofu burger is included as an example in a lunch menu. Address: 1. Assoc. Prof., Program Coordinator, Family and Consumer Studies, Herbert H. Lehman College, The City Univ. of New York; 2. Prof. and Administrator, Dep. of Human Development, Family Living, and Community Educational Services, Univ. of Wisconsin–Stout, Menomonie.

2148. Walton, L.R.; Walton, J.E.; Scharffenberg, J.A. 1988. *How you can live six extra years*. Santa Barbara, California: Woodbridge Press Publishing Co. 121 p. No index. 22 cm. [93 endnotes]

• **Summary:** Health and longevity secrets enjoyed by the Seventh-day Adventists for a century could add six to twelve years or more to your own life. Based on university research. You can use these health practices to reduce your risk from killer diseases. Contains recipes and tables.

This is an unusual book, in that Chapter 1 (for example) contains page after page of statistics about the superiority of the diet and lifestyle of Seventh-day Adventists without citing the sources for these statistics. Moreover the contents of the 1988 edition appears to be the same as that of the 1981 edition.

Figure 2 is titled “Coronary death rate for Adventist men with various dietary habits compared with the general population.” Total vegetarian Adventists (vegans) have only 14% the general coronary death rate, lacto-ovo vegetarians have 39% the general rate, and Adventists who eat meat have 56% the general rate.”

Table 1 shows that Adventist men have a life expectancy of 77 years versus 71 years for California men. Adventist women have a life expectancy of 80 years versus 77 years for California women. Table 24 summarizes the Adventist lifestyle: No tobacco or alcohol. Vegetarian diet (which may include milk and eggs). No pork or pork products. Avoid caffeine, spices and spicy foods, hot condiments. Emphasize: Whole grains, fruits, nuts, vegetables, as fresh and naturally served as possible. Fresh air. Exercise. Enjoyment of nature. Trust in divine power.

Recipes include Scrambled tofu (p. 97). Chicken-style Soyameat with gravy sauce (p. 97). Soyannaise (with Soyagen powder, 107). Tofu salad dressing (p. 112). Address: 1. Attorney at Law, Bakersfield, California; 3. Bakersfield, California—M.D., Assoc. Prof. of Applied Nutrition, Loma Linda Univ., Loma Linda, California.

2149. **Product Name:** [Nutana Tofu Stew].

**Foreign Name:** Nutana Kinesisk Tofugryde.

**Manufacturer's Name:** Nutana Helsekost.

**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

**Date of Introduction:** 1988?

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Alfa-Laval. 1988, June.

Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. Yellow and white on a red background.

2150. **Product Name:** [Nutana Tofu with Chili Beans].

**Foreign Name:** Nutana Tofu Chili Boennegryde.

**Manufacturer's Name:** Nutana Helsekost.

**Manufacturer's Address:** Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

**Date of Introduction:** 1988?

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Alfa-Laval. 1988, June.

Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. Yellow and white on a red background.

2151. Tofu Shop Specialty Foods Co. (The). 1988?

Traditional tofu by the sea (Leaflet). Arcata, California. 1 p. Single sided. 19 x 12 cm. Undated.

• **Summary:** This marketing flyer is printed with black ink on white paper. A photo shows two people making tofu by the sea, one cooking in an iron cauldron, the other pouring nigari into a wooden barrel.

The text below the photo: “Traditional tofu by the sea. Distributed exclusively on the North Coast [of California]. The following is written in one of four equal-sized rectangular boxes (2 rows of two each): (1) Handmade tofu & soymilk. Traditional method—sweet, delicate taste. Tofu: Firm nigari, 14 oz tub or 20 lb bucket. Joy of Soy soymilk. Original, unflavored, pint, quart, ½ gallon. (2) Baked tofu cold-cuts: Ready to eat or reheat. Veggie patty tray. Marinated cutlet tray. Tofu sausage tray. (3) Delicious tofu desserts: Pumpkin pie with whole wheat crust. Cocoa carob mousse. Maple almond charlotte. (4) Light tofu salads: Old fashioned potato salad, eggless salad, tahini.

Since 1980. Address: 768 18th St., Arcata, California 95521. Phone: (707) 822 7409.

2152. Lawder, Dave. 1989. Tofu-maker keeps local vegetarians well fed: Simple Soyman products appeal to the healthy set. *Business Journal (Milwaukee, Wisconsin)*. Jan. 15. p. 1, 21.

• **Summary:** R. Jay Gruenwald (age 35) and his wife Barbara

established The Simple Soyman in 1985. It is located at 4877 N. Green Bay Ave. They buy fresh tofu from Mu Tofu Shop in Chicago, Illinois, and use it to make a variety of products such as Saucy Jo (a kind of sloppy joe mixture of spices and tomato sauce with tofu and brown rice substituted for ground beef), herb pate cracker spread, “eggless” egg salad, tofu turkey, and tofu pumpkin pie. They do many supermarket taste test promotions. Sales are expected to top \$85,000 for 1988, up from about \$66,000 in 1987. Milwaukee’s other tofu business, the Magic Bean, an employee-owned firm (co-op) went out of business in 1985 after running into cash-flow problems. Mary Zdroik, former manager of The Magic Bean, said the firm’s failure was due mainly to poor management and lack of capital to invest in new equipment.

2153. Business Communications Co., Inc. 1989. Engineered foods: New directions, trends. 25 Van Zant St., Norwalk, CT 06855-1781. Jan. 2 figures. 66 tables. \$2,250.00.

• **Summary:** Currently sales of engineered foods covered in this market analysis are expected to total almost \$6.5 billion in 1988. This market is expected to grow at 9.6% a year. Product segments include surimi (capacity in the U.S. reached an estimated 77 million lb in 1988) and surimi-based seafoods, soy protein products, engineered dairy products and substitutes, infant formulas and nutritional beverages, engineered fats, high-intensity sweeteners, and fabricated/restructured meat and poultry products.

The chapter titled Soy Protein Products includes: Summary and market outlook for engineered soy protein ingredients. The soy protein market: Market outlook for soy protein ingredients. Suppliers of soy protein ingredients. Consumer attitudes toward foods containing soy protein. The retail market for meat analogs, meat extenders, nondairy frozen desserts, and other foods containing soy ingredients. Patent review. Address: Norwalk, Connecticut. Phone: 203-853-4266.

2154. Cauldron Foods Ltd. 1989. Cooking with tofu. 149 South Liberty Lane, Bedminster, Bristol BS3 2TL, England.

• **Summary:** This accordion-folded booklet of tofu recipes, 3.25 x 4.5 inches, with 12 panels, contains 16 recipes, with a pastel color illustration accompanying many of them. They are divided into starters, main course, and desserts. All call for the use of Cauldron Tofu. One panel explains: What is tofu? Why eat tofu? The Cauldron Foods range: Fresh tofu, original and smoked. Tofu burgers: savoury, peanut, chili, and vegetable with tofu. Vegetarian Pâtés: Vegetable, Mushroom, Tomato and red pepper, and savoury vegetable. Address: Bristol, England. Phone: 0272 632835.

2155. Sojarei Ebner-Prosl. 1989. Preisliste [Price list]. Augasse 2, A-2500 Baden bei Wien, Austria. 10 p. Manufacturer’s catalog. [Ger]

• **Summary:** The company has two catalog/price lists: one

(green) for food processors and one (yellow) for retail stores. Products made by the company have been marked by the author with an “S.” In the front of each catalog is an organic certificate. The retail catalog contains 20 fresh products, 3 books, and 30 non-fresh products. Fresh products made by the company include Tofu Natur, Tofu Mariniert, Tofu Geräuchert, Tofu Pastete Siddhartha, Tofu Pastete Toscana, Tofu-Burger, Soja-Getreide-Laibchen, Gruenkern Laibchen, Dinkel Laibchen, Reis-Laibchen, Weizengluten Laibchen, Weizengluten, Badener Bratwuerstchen, Badener Grillwuerstchen, Brotaufstrich “Rusticana”, Brotaufstrich “Holzknecht.” Fresh products sold but not made by the company include soy tempeh, marinated tempeh, and soy sprouts. The company sells 3 recipe books: (1) Their own recipe book *Wichtig für Ernährungsbewusste* (Important for understanding of nutrition); (2) *Tofu: Essen mit Zukunft* (Tofu: Eating with the future) by Brigitte Vogenreiter and Clemens Kuby, and (3) *Schlank mit Tofu* (Slim with tofu; 117 recipes) by A.W. Dänzer.

The company also sells many non-fresh products including yellow soybeans (organically grown), soya flakes (*Sojaflocken*, not defatted), whole soy flour, tamari, shoyu, barley miso, Hatcho miso, brown rice miso, soba (buckwheat) miso, nigari, Bonsoy soyadrink (natural and cacao), Pinoccio Soybean coffee, and soynuts.

In the catalog for food processors, for example, the regular tofu, marinated tofu, and smoked tofu are each sold in 1 kg, 30 kg, 60 kg, 100 kg, and 200 kg amounts. Address: Baden (near Vienna), Austria.

2156. **Product Name:** [Tofinelle Tofu Sausages {Soya Mousseline with Capers} (Carrot, or Celery)].

**Foreign Name:** Tofinelle: Saucisses/Quenelles au Tofou (Carottes, Céleri).

**Manufacturer’s Name:** SOY (Société Soy).

**Manufacturer’s Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1989 January.

**Ingredients:** Carrot: Tofu (water, soya\*) 75%, carrot (10%), sunflowerseed oil, egg white, wheat flour, spices, parsley, aromatics, salt. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 2 x 100 gm = 200 gm poly bag.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Calories 176, protein 14.3 gm, carbohydrate 3.7 gm, fat 11.7 gm.

**New Product–Documentation:** Leaflet. 1988. Front and back. 6 panels. “These savory and light Tofinelles are eaten like “quenelles,” reheated in the frying pan or oven, accompanied by a sauce of your choice.” Cassell’s French-English Dictionary defines quenelle as “forcemeat or fish ball.” Letter from Bernard Storup. 1989. March 3. These products were all launched in Jan. 1989.

Label. 1989. In French and Dutch. 3.75 by 7.5 inches. Green, red, and yellow on white. Large background

illustration of a carrot. Shows Nature et Progres logo for organically grown.

2157. Worthington Foods, Inc. 1989. History of Worthington Foods: 50th anniversary banquet, 22 Jan. 1989 (Color videotape). 900 Proprietors Rd., Worthington, OH 43085-3194. 45:10 minutes. VHS.

• **Summary:** A fascinating and professionally-done story of this pioneering company's first half century.

Note: This is based on a 12-minute video into which historical slides and live speeches were integrated. The banquet was held in Worthington, with all the company's employees. Don Davenport's company in Southern California did most of the video production, in conjunction with the Adventist Media Center in Thousand Oaks, California. The latter has a TV program titled *Lifestyles Magazine*, which showed the video as a feature on Worthington. All shared the cost, with Worthington paying about \$17,000, plus an additional \$10,000 to get the expanded version. Address: Worthington, Ohio. Phone: 614-885-9511.

2158. Delcuratolo, Raymond. 1989. Société Soy-France's largest tofu manufacturer—thinking of starting operations in America (Interview). *SoyaScan Notes*. Feb. 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Societe Soy, located in St.-Chamond, is thinking of starting a branch in America, perhaps in the Los Angeles area. Their main products might be: 1. Tofu Burgers (*Croque Tofu*) sold in 4 flavors and eaten in France with a sauce, not between buns like a typical U.S. burger. 2. Tofu Sausages (*Roulades de Tofu, Tofinelle*) with Sauce and mushrooms or smoked salmon. These sausages, larger than a U.S. hot dog, are sold 2 in a package with the sauce. 3. Soy yogurt-like or parfait-like dessert (*Soyeux*), sold in 6 flavors. They now market these products (plus Tofast Soya Paste, Tofumé smoked tofu, and Granioc (wholegrain & tofu meatless burgers)) in England, and have a nice brochure to advertise them.

Raymond hopes to run the company in America, with Jean commuting. He is paying for this exploratory trip out of his own funds.

Note: Letter from Bernard Storup, president of Société Soy. 1989. March 3. "I was rather surprised that Raymond met with you in Lafayette. He has been a friend of Jean Preneuf's for years and has just sold his—well—business. He is thinking of doing something with us, surely in the U.S. We talked together of the opportunity to start a new tofu business over there, but I must say I'm not convinced that it is really a good idea. There is a French expression that says, 'You cannot run after two rabbits at the same time.'"

Note: As of Jan. 1995 this project has never happened. Address: France.

2159. Ritterband, Vicki. 1989. Lightlife Foods receives loan for expansion projects. *Recorder (Greenfield, Massachusetts)*. Feb. 20. p. 2.

• **Summary:** The \$756,000 loan package, which came from four sources (including the state and a local bank) will be used to double the size of Lightlife Foods' 6,000-square-foot plant, expand its product line and buy new equipment. The 10-year-old Fairview Street company, best known for its "Tofu Pups," has grown 35% annually for the past two years. The expansion will allow the company to make Tofu Pups in Greenfield.

2160. Stanus, Joan C. 1989. Tofu a tasty surprise to students. *Virginian Pilot (Norfolk, Virginia)*. Feb. 23. p. 10-11.

• **Summary:** "Ann Wols admits it. Like millions of other Americans, she had her doubts about tofu at first. It looked pale and slimy, tasted bland and was of little importance except as a filler in Oriental stir-fried dishes..."

"I used to be a tofu cynic," Wols explained... Then I read a cookbook my mother brought home and decided to try some things in it. We made Swiss steak from tofu and it was really good. So I've changed my mind about it."

"About a year ago, I became a vegetarian and found tofu is a good way to get your protein," added her mother, Glenna Wols, who is also taking the class [at Tarrallton Community Center]. "We found out that it's delicious because it's so versatile. It picks up the taste of whatever you put with it."

2161. Medoff, Marc. 1989. Rockland tofu lover making mark on local soy scene. *Whole Life*. Jan/Feb. p. 85.

• **Summary:** Ex-Brooklynite the loveable and feisty former graphic artist "Soy Man" Sam Weinreb is the 62 years young founder of Local Tofu of West Nyack, New York. Nearly 8 years ago he started making tofu commercially in Haverstraw, and about 4 years ago he moved to 307 Route 59, West Nyack. The company now makes more than 1,500 lb/week of bulk tofu as well as hundreds of pounds of fresh soymilk, tofu salad, and soysage, distributed to health foods stores over a 50 mile radius. Organic soybeans are used in all products.

A large photo shows Sam, wearing a baseball cap and holding a paddle in his left hand, as he finishes making a fresh batch of tofu at Local Tofu in West Nyack, New York.

2162. **Product Name:** New World Tofu Burger.

**Manufacturer's Name:** New World Natural Foods.

**Manufacturer's Address:** 157 Sutherland Rd., Brookline, MA 02146. Phone: 617-232-5973.

**Date of Introduction:** 1989 February.

**New Product-Documentation:** Talk with Emily Merghart. 1989. Aug. 18. This product was introduced in Feb. 1989. The tofu burger itself is made for her by 21st Century Foods.

2163. Packaged Facts. Subsidiary of FIND/SVP. 1989. The Oriental foods market. 625 Avenue of the Americas, New York, NY 10011. 225 p. Feb. [1 ref]

• **Summary:** Contents (main divisions): I. Introduction. II. The overall market, including a brief history in America. The market leaders, in descending order, are La Choy, Stouffer, Chun King, Nissin, Kikkoman, Budget Gourmet, JFC. III. The frozen segment. IV. The canned/packaged segment: Sauce sales now over \$100 million and soy sauce nearly 3/4 of all sauce sales. V. The tofu segment (detailed below). VI. The dry soup segment: Nissin number one. Appendix: Company profiles: BCI Holdings Corp., Nestlé S.A., Nissin Foods Co., Kikkoman International (in American since 1956). ConAgra, Sanwa Foods, Others (Kraft, Benihana, JFC International).

Section V is “The Tofu Segment” (p. 153-178).

Contents: I. The products: Brief history. A protein staple in the Orient. The Miracle food. Tofu high in protein. Calcium content can be high. How it is made. Raw tofu the most common form. Other forms found in specialty stores. How tofu is used.

II. The market: Tofu sales reach \$71 million in 1988 (Gives dollar volume in millions from 1984 [\$57] to 1988 [\$71]. Source: Packaged Facts). III. Factors in future growth: Popularity of Oriental cuisine. Tofu adopted by dieters and health conscious. Consumers attracted by low price. Dinners and entrees being introduced. Tofu helpers (Betty Crocker’s Oriental Classics Dinners [General Mills] call for the addition of tofu, chicken, or meat). Tofu substitutes are proliferating (value-added tofu based ice creams, puddings, burgers, cheese, hot dogs, salad dressings, etc.). Interest by corporate giants (Pillsbury and Carnation). Tofu used in U.S. National School Lunch Program (it is estimated that 50 million lb of soy proteins are used each year in school lunches). IV. Projected sales: \$119 million market by 1995 (7-8% dollar increase annually). V. Market composition: Raw tofu over half of sales. Supermarkets account for 60% of sales. V. The Marketers: Field narrowed to 150 or fewer marketers. Four major marketers (Hinoichi, Azumaya, Morinaga, Nasoya; produce 100,000+ weekly). The second echelon (Northern Soy, Quong Hop, White Wave, Island Spring; produce 15,000–30,000 lb/week). VI. The competitive situation: Precise market shares unavailable. Hinoichi, Azumaya, Nasoya, and Morinaga lead. Tomsun, failing with Jofu [tofu yogurt], files for Chapter 11. Watch out for Kikkoman. VII. Advertising and promotion: No measurable expenditures (except by Tofutti). VIII. Packaging: Plastic and foil. IX. Distribution and retail: Distribution. 60% of raw tofu sold in supermarkets. Pricing includes higher margins. Assortment. Most tofu shelved with produce. Pricing data at the retail level: In its *Key Price Book*, Marketing Services Corporation publishes detailed information on tofu products sold in California supermarkets. This includes data on package sizes, case sizes, competitive

pricing, margins, and promotional discounts. Figures for Kikkoman Kinugoshi, and two textures of Morinaga were compiled on 1 Feb. 1989. X. The consumer: Size of user base unknown. Roper poll reveals a dislike of tofu. Those most likely to use. Address: New York. Phone: 212-645-4500.

2164. **Product Name:** [Smoked Tofu, and Tofu Burger].

**Manufacturer’s Name:** Tofurei Jutta Schoenemann.

**Manufacturer’s Address:** Doerflaser Weg 22, D-8521 Aurachtal, West Germany. Phone: (09132) 60143.

**Date of Introduction:** 1989 February.

**New Product–Documentation:** Form filled out by Jutta Schoenemann, owner. 1989. Feb. 1. The smoked tofu was launched in Jan. 1989 and the tofu burger in Feb. 1989.

2165. Tanasychuk, John. 1989. Student project: Make tofu taste good. *Detroit Free Press*. March 1.

• **Summary:** Sixth-grade science students at Larson Middle School in Troy, Michigan, were recently asked to evaluate their classmates’ tofu recipes. “As part of science teacher Gail Ziegler’s unit on protein alternatives, more than 60 students in three classes were asked to come up with original recipes using four ounces of an ingredient many of them couldn’t stomach. Some of them still can’t.

“Even though Dragana Bjelobrk, 11, was lucky enough to walk away with a mechanical pencil and a Nancy Drew mystery for her Tofu Italian Meatballs, the white stuff will always be what she calls ‘yucky.’

‘I thought it was disgusting,’ says Bjelobrk, who had the help of her parents in dreaming up her recipe. ‘It looks like some kind of cheese and it doesn’t really have any kind of taste.’ ...

“Jason Chan, who won a prize for his Tofu Turkey Taters, figures his familiarity with bean curd may have given him the edge... Tisha Hausmann, who still doesn’t like tofu, didn’t win a prize with her Hamburger Pie. ‘I thought it was gross looking,’ she says.” Address: Free Press Food Writer, Michigan.

2166. Storup, Bernard. 1989. Re: History of Société Soy–France’s largest tofu manufacturer. Letter to William Shurtleff at Soyfoods Center, March 3. 3 p. See p. 1-3. [Eng]

• **Summary:** Soy (also called Société Soy or Soy S.A.R.L.) was founded in Feb. 1982 by Bernard Storup and Jean de Preneuf. (Note that “Société” means simply “company” and S.A.R.L. means “Société a Responsabilite Limitée,” like GmbH in German). S.A.R.L. is the legal type of company, and it is compulsory to have this term on all official papers in France. Bernard came from a family of dairy product manufacturers. In the minds of customers and other companies this company’s name is “Soy,” a term which in French has no particular connection with soybeans.

Bernard and his wife Françoise came to America in

Nov. 1980 to study tofu and soymilk around the country; they stayed until July 1981, attending the Soycrafters' Conference at Colorado State University. Jean de Preneuf did the same thing from Sept. 1980 to July 1981. Most U.S. tofu companies were still small and inexperienced at the time, but those which Bernard and Jean found most interesting were Island Spring, Nasoya, New England Soy Dairy, White Wave, and Swan Gardens (Miami, Florida). Jean and Françoise also visited with William and Akiko Shurtleff in California.

Upon returning to France, Bernard and Jean set up a soy dairy (600 square meters) in Cerny, a small village located (35 km or 22 miles) due south of Paris, near places named La-Ferté-Alais and Torfu. They started to make tofu commercially in June 1982. By 1983-84 they were making 2,500 kg/week (5,500 lb/week) of tofu.

In December 1986 the company stopped production at Cerny and moved to a larger (1,400 square meters) and more rationally designed plant located 500 km (310 miles) south of Paris in the foothills (elevation 600 meters) in St.-Chamond, near St.-Etienne, a little southwest of Lyon. Situated on the border of the Pilat Natural Regional Park (Parc Naturel Regional du Pilat, 65,000 ha or 161,000 acres) they had a nice view of the mountains. They moved to this location for two main reasons: (1) Because it has some of the best French water (of the same phreatic groundwater origin as most French mineral water such as Badoit, Evian, Vittel, etc.); (2) Because of the geographic location, being at the center of France, only 2 hours by road from Switzerland and Italy, 4 hours from Germany, less than 4 hours from Paris, and 5 hours from Spain. Production at Saint-Chamond began in Jan. 1987.

“Throughout the years we have developed our own technology and equipment, and have now a rather good quality soymilk and tofu. At present, we carry different families of products on 3 different markets.

“(1) The health-food market. Up to now it has been our main market, and we are now distributing to nearly all health-food stores equipped with a cooler (about 1,500 out of a total of 2,500 in France). The distribution itself is all done through specialized distributors in this field in France (about 20). We are the leader in this market (being practically alone), but this field is nearly saturated for our products. We should see a maximum increase of 20–30% in the next 3 years, as these traditional health-food stores are getting more and more competition from supermarkets. We are presently in the same type of market in Switzerland through a distributor, and directly in Germany and Belgium.

“(2) The food industry. They are looking for a ‘soy-base’ to lower fats in cooked pork meats (sausages, pâtés, etc.), or to use in prepared cooked foods (‘plats cuisinés’, or to fill pastas, etc.). We sell them bulk vacuum-packed tofu pieces of 3–4 kg each. In terms of volume, this market should be the more important in the future, but not in terms of sales,

as prices are of course rather low. We began (January 1989) to sell soymilk in bulk (by 25,000 liters tank) to distributors interested in having their own brand-names, and dealing with supermarkets or the health-food market. This soymilk is packaged in Tetra-Brick cartons by another company. Up to now we haven't carried our own brand. There will be such competition (in price) with soymilk in Europe in the forthcoming months that it may be better to stay as a simple supplier. Anyway our position can change rapidly. We should produce about 2 million liters of soymilk this year, having contracts already for more than 1 million, on a market estimated at 7 to 10 million liters in France in 1988. The soymilk market is estimated to increase at 20 to 30% a year for the coming years, and most supermarkets are now considering having their own brands. Prices to final consumers have been rather high up to now (9 to 12 French francs [FF] per liter), and should drop clearly in the future. The leader in Europe, Vandemoortele (with Provamel, etc., brands), lowered his prices twice last year in France. Anyway, these figures are and will remain extremely weak compared to the traditional milk market (plus the dairy lobby takes a strong position against these substitutes in the E.C.C.).

“(3) The super and hypermarkets. These represent actually 54-55% of total food sales in France (1.5% for health-food stores, 5% for co-ops and direct from factory sales, the rest for traditional grocery stores). We will introduce 4 complete lines of products with complete new packaging in April 1989, on a new brand, ‘Jean de Preneuf’ (remember ‘pre’ means field, and ‘neuf’ new), ‘SOY’ being our brand-name for health-food markets. We do actually 2 or 3% of our total sales in this market, and hope to be at 35% at the end of 1989.

“Last year we sold about 550 tonnes of tofu, most of it under a prepared form (burgers, sausages, desserts, etc); sales of plain tofu represent about 23% in tonnage, but only 10% in turnover. We had a total sales in 1988 of about 13,000,000 FF, and nearly no profit (35,000 FF). This can be explained by the fact that we had very heavy investments, mainly to automate the production, and because we have a policy of very reasonable prices (all those who tried to enter the health-food market became aware of this). For 1989, we should have total sales of 18 to 19,000,000 FF (introduction in supermarkets, soymilk sales, sales development in Germany, etc.). This should represent 750-800 tonnes of tofu plus about 2,000 tonnes = 2,000,000 liters of soymilk. We actually use only organic French soybeans, and have the ‘Nature et Progres’ organic certification symbol/slogan for all of our products, which is the best one you can have for organic products.

“There are 27 people working in the company, half of them being technicians with a strong professional background (from the dairy industry, agricultural engineers, automaticians, etc). Jean and I have 90% of the shares, 10%

belonging to people working in the company.”

The company presently has about \$2 million (12 million francs) annual sales. Bernard is the owner and head; Jean is in PR and sales. Their main products are: 1. Tofu Burgers (Croque Tofu) sold in 4 flavors and eaten in France with a sauce, not between buns like a typical U.S. burger. 2. Tofu Sausages (Roulades de Tofu, Tofinelle) with Sauce and mushrooms or smoked salmon. These sausages, larger than a U.S. hot dog, are sold 2 in a package with the sauce. 3. Soy yogurt-like or parfait-like dessert (Soyeux), sold in 6 flavors. They now market these products plus Tofast Soya Paste, Tofumé smoked tofu, and Granioc (wholegrain & tofu meatless burgers) in England, and have a nice brochure to advertise them.

In April 1989 the company changed its legal status from Soy S.A.R.L. to Soy S.A. (Société Anonyme), and added 400 square meters of extra cooler and storage space.

In a form filled out for Anthony Marrese in Nov. 1989, Bernard noted the following production figures: Tofu & Tofu Fumé 3 tonnes/week. Tofu Burgers (Croque Tofou) 2 tonnes/week. Soy dessert (Soyeux [pudding]) 2 tonnes/week. Tofinelle sausage 2 tonnes/week. Soymilk 30,000 liters/day (Maximum capacity 3,000 liters/hour). Société Soy is under a confidentiality agreement with APV of England and Alfa-Laval of Sweden, both of whom are supplying equipment to them. Anthony notes that all Société Soy products are professionally done and very good.

Update 1990 March 10. In Oct. 1989 a new syndicate of 7 large French soyfoods manufacturers was formed. Société Soy is one of the members. In Nov. 1989 a new partner and investor came into the company. He now owns 20% of the stock. He is the brother-in-law of the leader of the most powerful food group in France. Société Soy now employs about 30 people, an excellent team. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.23.66.

2167. Storup, Bernard. 1989. Re: Brief history of Innoval / Sojalpe, an affiliate of Coopérative Agricole Silos de Valence. Letter to William Shurtleff at Soyfoods Center, March 3. 1 p. See p. 6. [Eng]

• **Summary:** Sojalpe was started as a traditional tofu shop by a very dynamic and inventive guy named Martial Gonin in about 1986 or 1987 [sic, Dec. 1986]. He was definitely in business by late 1987 and located at Saint Quentin sur Isere, 38210 Tullins (near Valence), France. This is in southeast France. he first made and sold plain tofu, then his “Royales au Tofu,” which were kind of quenelles (specialties of that part of France, between a sausage and a souffle, usually prepared with a sauce, and made from wheat flour and animal fat). In these he used tofu instead of the fat, and packed the product in cans with a shelf life of at least 1 year. He also made and sold “Palets au Tofu,” which were kind of tofuburgers.

In early 1988 he made a big deal with an agricultural cooperative named Coopérative Agricole Silos de Valence (441 bis Avenue Victor Hugo, 26000 Valence, France. Phone: 75.44.01.61). This co-op created a company named Innoval at the end of 1987. Innoval purchased 50% of the Sojalpe shares of stock, then dismissed Martial Gonin from the company by the end of 1988. Innoval had a brand new factory built, and equipped with an Alfa-Laval system (to be installed in early 1989), plus a 5 million French franc Buhler-Miag cleaning and dehulling system; all this for a total investment of nearly 20 million French francs. Sojalpe was the only way that they could enter the health food market, so they kept that as their brand for this market. Sojalpe presently sells their products directly to shops and co-ops in France, as no distributors want to work with them (the distributors are already distributing Société Soy products). As Sojalpe has low prices and large transportation expenses, with low sales, it is quite certain that they are losing money. They make an estimated 300 to 400 kg/week of tofu. Innoval also carries a line of yogurt-like products named Innovy.

In fact it is too early to know exactly what this company intends to do, and it seems that they themselves don't know exactly—which is not so rare among co-ops.

Update from Bernard: 1990 March 10. “Innoval does not seem to be doing very well, but I don't have details. They seem to sell only some soymilk in health food stores. It is very expensive but one of the best I've ever tasted. I have never seen even 1 pack of their Innoval tofu.” Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France.

2168. Hughes, Beth. 1989. Tofu gets a toehold in U.S. diet: Its in hot dogs, ice cream, chocolate—but disguised. *San Francisco Examiner*. March 15. p. D1, D9. Business section. [1 ref]

• **Summary:** A discussion of the work of the Soyfoods Center and of William and Akiko Shurtleff, with a photo of them holding books they have written. Contains industry statistics, first published in the last issue of Soya Newsletter, provided by Soyatech.

This article was published in the *Press Democrat* (Marin County, California) on 1 April 1989, as “Mainstream U.S. takes to tofu: Wiggly white stuff becoming big business.” Address: Staff writer.

2169. Mallia, Joseph. 1989. ‘Tofu pups’ project clears another hurdle. *Recorder (Greenfield, Massachusetts)*. March 15.

• **Summary:** “The town's acceptance of a preliminary environmental report means Lightlife Foods Inc. is another step closer to manufacturing its vegetarian frankfurters—'tofu pups'—in Greenfield... The 10-year-old company will more than double its 6,000-square-foot plant to begin making its soybean curd hot dogs and to add new products, said

company President Michael Cohen...

"In January, Lightlife Foods received a \$756,000 loan package from four sources, including the state, the federal government and Heritage Bank."

2170. *Pacific Union Recorder (Westlake Village, California)*. 1989. Loma Linda Foods sells infant formula division. Continued availability of meat analogs assured while company seeks new manufacturing site. March 20. p. 5. [1 ref]

• **Summary:** "The company was turned over to N.V. Verenigde Bedrijven Nutricia (United Nutrition Cos.) of Amsterdam in early February. Most of the 100 workers who served at the plant will continue working under an agreement which allows for conditions similar to those that they already had. The company will not operate on Saturdays. Including sales representatives and staff at Mr. Vernon, Loma Linda Foods had employed about 170 people."

"Loma Linda Foods was one of Riverside's largest private companies, according to the *Riverside Press-Enterprise*. It was established in 1906 in Loma Linda and moved to Riverside in 1938."

A large photo shows the outside of the large Loma Linda Foods building.

2171. *Breathed, Berke*. 1989. Bloom County (Cartoon). *Washington Post Co.*—*Syndicated*. March 21.

• **Summary:** This 4-part cartoon begins with Opus (the cartoon's penguin) watching a kid who is struggling to push a lawn mower. Opus: "Oliver said that 'the Big Crunch' is coming."

The kid stops and faces Opus, who continues: "He said the universe will fall back in on itself someday. Stars... planets... tofu hot dogs... Everything will squash together."

In big, bold letters: "And then explode again in fiery cataclysmic destruction."

In the last frame, the kid walks up to his dad who is sitting in an easy chair with a newspaper on his lap. Kid: "\*#@\* The lawn pop."

2172. **Product Name:** Heart & Soul Texas BBQ 'Whibs': Wheat Ribs Alternative [Regular, or Hot].

**Manufacturer's Name:** Common Objective Co. (Marketer-Distributor).

**Manufacturer's Address:** P.O. Box 261, Hermosa Beach,

CA 90254. Phone: 213-373-5826.

**Date of Introduction:** 1989 March.

**Ingredients:** Regular: Water, vital wheat gluten, canola oil, raw sesame tahini, dried yeast (nutritional), onion, spices BBQ Sauce (tomato paste, water, Barbados molasses, pear and apple juice, apple cider vinegar, herbs and spices).

**Wt/Vol., Packaging, Price:** 4 oz (113 gm) paperboard box with see-through window. Retail for \$1.85 (California, 11/91).

**How Stored:** Refrigerated.

**Nutrition:** Per 4 oz.: Calories 210, protein 29 gm, carbohydrate 18 gm, fat 3 gm, cholesterol 0 mg, sodium 375 mg.

**New Product—Documentation:** Products with Labels purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 4.5 by 5 by 5/8-inch paperboard box. Brown, black, orange, red, yellow, and blue on tan. Illustration of a pair of long-horn steer horns with one end of a rope wrapped around their middle; the rope spells out "Texas." Label text: "97% fat free. All natural. No cholesterol. Meatless. High protein. 97% fat free. Whibs are cholesterol-free and taste terrific cold, right out of the package! Add sliced strips of Whibs into your favorite veggie stir-fry or with home-fried

potatoes, onions, mushrooms and garlic. Best of all, Whibs are cruelty-free.” A logo of a cow in a red circle with a red line diagonally across the cow reads: “No meat. Just wheat.”

Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. This product was introduced in March 1989; it was made by 4 different co-packers. John Moore at Gourmet Naturally (5890 Black Welder St., Culver City, California 90232) started making it in about Feb. 1990. Andrew owns the company named Gourmet Naturally, which manufactures only Heart & Soul Products, including this product. Legally, Gourmet Naturally is separate from Heart & Soul, but the two will soon be merging. He has a patented process for making fresh wheat gluten, starting with vital wheat gluten. He feels that the terms “gluten” and “seitan” are both unattractive; to many mainstream Americans, the first sounds like glue and the second like the devil (Satan).

Soyfoods Center Product Evaluation. 1991. Dec. 2. Package design: Excellent, very creative. Taste Test: Excellent flavor and texture; moist, not too spicy.

2173. **Product Name:** Barbeque Chili with Tempeh.

**Manufacturer’s Name:** Homestyle Foods (Formerly Sonoma Specialty Foods).

**Manufacturer’s Address:** 2317 Bluebell Dr., Santa Rosa, CA 95401. Phone: 707-525-8822.

**Date of Introduction:** 1989 March.

**Ingredients:** Tempeh (organic soybeans\*, culture), tomatoes, onions, soy oil, mustard, lemon juice, molasses, tamari, apple cider vinegar, natural herbs and spices. \* Made in accordance with California H&S Code 26569.11.

**Wt/Vol., Packaging, Price:** 8 oz plastic tub.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label. 1989. 4.5 inches diameter. Plastic lid. Red and black on white. Illustration of a cottage. “Microwaveable. New! Non-dairy. Cholesterol free. Heat or ready to eat in sandwiches & salads as an entree. Natural. No preservatives. Nutritious. Delicious. Kosher.”

Talk with Benjamin Hills. 1989. June 6. The product was launched in March. He is now working on a Tropical Pudding. The company seems to be going downhill.

Product served at World Vegetarian Day in San Francisco. 1990. Oct. 6. Note that Homestyle’s products are now made by White Wave in their plant at 1990 N. 57th Ct., Boulder, Colorado.

2174. **Product Name:** [Chinese-Style Tofu Burger].

**Foreign Name:** Chinaburger.

**Manufacturer’s Name:** Sojatopf. Renamed Soto in April 1989.

**Manufacturer’s Address:** Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.

**Date of Introduction:** 1989 March.

**Ingredients:** Incl. tofu, seaweed, mung bean sprouts, and

Chinese spices.

**Wt/Vol., Packaging, Price:** 100 gm.

**New Product–Documentation:** Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

2175. Thompson, Jay. 1989. Early work with tofu at Rochester Zen Center (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** “The Zen Center of Rochester was founded by Kapleau roshi in 1966. In about 1974 we started by importing tofu from Toronto. I would go to a Korean [Chinese?] shop named Yet Sing at #11 Baldwin Street. It looked like a normal residential home near a popular dress store named Morningstar. But when you descended to the basement it looked like a scene out of Dante’s inferno. Everybody had hip boots on. There was ankle deep water, steam everywhere, and you could just see these laboring bodies through the mist. It seemed like there were 20-30 people in the basement working very hard. You had to clamber over huge bags of soybeans on pallets. No one spoke English. You used fingers with the front man to say how much you wanted. They only had one product as far as I could tell. I carried the tofu away in about eight number 10 cans filled with water. I would take the bus back across the Canadian border and many a time I was given a hard time by the customs officials. I hauled tofu down from Toronto once or twice a month for several years. When Zen students from Toronto came down for sesshin, we always asked them to bring tofu. One reason we wanted to start making our own tofu was that this trip was so difficult.”

Jay first got in touch with William Shurtleff when he read a small letter Shurtleff had written to the *East West Journal* (15 June 1975, p. 3). In about August 1975 he wrote Shurtleff in Japan and got back a typed sheet describing how to make tofu on a home scale. In a second letter he requested instructions for making tofu on a larger scale.

“We made tofu in the kitchen a few times, realized we couldn’t make enough at that scale, then used the instructions to build a small shop in the basement of Zen Center. We got a beam with a weight on it for pressing, installed a candy stove and a big pot. Greg Mello built the shop. Being in charge of the kitchen, and since this was a kitchen project, I was actively involved. Mello and Greg Weaver eventually took that small shop to a larger shop on North Goodman Street. The basement shop existed for several years. Once the commercial shop began, our kitchen bought tofu from them rather than making it ourselves. Mello left the Zen Center staff when the tofu shop went commercial. Andy Schecter and Norman Holland soon joined the shop.

“There were two favorite ways of serving tofu at the Zen Center: Tofu with Tahini Sauce, and Tofu Sticks, which were

somewhat like fish sticks, make by baking breaded tofu, then serving it with tartare sauce.” Address: Rochester, New York. Phone: 716-275-6779 Office.

2176. Rose, Richard. 1989. Re: Personal observations on soyfoods at Natural Foods Expo in Anaheim, California. Letter to William Shurtleff at Soyfoods Center, April 19. 1 p. Typed, with signature on letterhead.

• **Summary:** “Nothing was especially noteworthy this year. Mandarin Soyfoods and Turtle Island had booths for the first time and were moderately well-received. Luke Lukoskie of Island Spring shared a booth with Kathryn Bennett and her Mexican food. White Wave had 2 booths and an expanded product line, including dressings, hot dogs, and cheese.

“Did you know that Yves tofu hot dogs are being served this year at Candlestick Park! Health Valley is the U.S. distributor of the hot dogs.

“Golden Soy Foods, Nasoya, Quong Hop and Sonoma Specialty Foods had no booth this year. Tomsun Foods shared a booth with their Los Angeles distributor. Jofu is back, but still needs improvement.

“Soymage sour cream was shown. It has no casein but does have soy protein isolates along with tofu. It was mediocre. However, Soya Kaas cream cheese with casein was absolutely awful, with poor flavor and mouthfeel. Cholesterol and organic was very big at the show. The Soyfoods Pavilion was indistinguishable, with only a banner up high at one end. Within the ‘pavilion’ was The Book Publishing Co. and Kashi (no soy), and about 1 or 2 other non-soy exhibitors.

“Gordon Bennett said the SAA board hired a part-time secretary to handle its affairs. She has an office next door to Golbitz. SAA will have more money this year and more programs. Ask the new secretary for a copy of the minutes.” Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

2177. Brown, Judy; Bates, Dorothy R. 1989. Judy Brown’s guide to natural foods cooking. Summertown, Tennessee: The Book Publishing Co. 160 p. Index. With 8 pages of color photos. 23 cm.

• **Summary:** This natural foods, vegan cookbook, which does not require the use of dairy products or eggs, includes more than 200 recipes, many of which contain soyfoods. In the chapter titled “The Natural Foods Pantry” is a sub-chapter titled “Soy Foods,” which gives brief introductions to tofu, tempeh, miso, soy milk, soy cheeses, soy yogurt, soy flour,

and soy pulp or okara. There are also sub-chapters on sea vegetables, sprouts (including soy sprouts), organic foods, macrobiotics (which is “heavily emphasized in this book”), more natural foods ingredients (which, under soy sauce, discusses the differences between shoyu and tamari).

The number of recipes featuring various soyfoods are: Tofu (15), tempeh (5), miso (4), soymilk (1), shoyu (1), and okara (1; soysage).

The author, a specialist in consumer education, presently organizes culinary carnivals and natural foods tasting fairs. She has written extensively on natural foods and holds a Master’s degree in Consumer Economics from the Univ. of Maryland. She is president of Judy Brown Enterprises, a public relations company for natural foods products. Address: 9 Dovetree Court, Indian Head, Maryland 20640. Phone: 301-753-6548.

2178. **Product Name:** Mandarin Soyfoods Tofu Patties, Tofu Patties with Cheese, or Garden Patties.

**Manufacturer’s Name:** Mandarin Enterprises Ltd.

**Manufacturer’s Address:** 11031 Bridgeport Rd. #107, Richmond, BC, V6X 3A2, Canada.

**Date of Introduction:** 1989 April.

**Ingredients:** Garden Patties: Tofu (organically grown soybeans, water, magnesium chloride [purified nigari]), soybean fibre [probably okara], soy grits, fresh onions, fresh carrots, fresh celery, fresh green peppers, whole wheat flour, sunflower oil, crushed tomatoes, sesame seeds, hydrolysed plant protein, seasoning, sea salt, spices.

**Wt/Vol., Packaging, Price:** 2 patties. 170 gm (6 oz). Pinched ends box.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Garden Patties: Per 100 gm.: Calories 173, protein 22.5 gm, carbohydrates 17.6 gm, fat 2.2 gm, dietary fiber 3 gm, sodium 650 mg, potassium 300 mg.

**New Product–Documentation:** Leaflet. 1989. April. “New. Introducing... Mandarin patties. Three savory varieties. Prepared with tofu and garden-fresh vegetables, Mandarin Patties are ready to eat in just 5 minutes. So easy to prepare: bake, broil or fry, pop in a pita, bagel, burrito, baste or bar-b-que... Mandarin Enterprises has been making quality soyfoods in Canada since 1976.” Shows color illustrations of a patty in burger buns, and each of the three packages. Each package contains 2 patties and has the name in French along the bottom.

Soya Newsletter. 1989. May/June. p. 8.

Leaflet (8½ by 11 inch, glossy color, front and back) sent by Richard Rose from Natural Products Expo East. 1989. Sept. “Introducing Mandarin Patties Three savory varieties: Tofu Patties. Tofu Patties with Cheese. Garden Patties.” A color illustration shows the front panel of each package.

Labels for all 3 products sent by Gerry Blanchard. 1992. Jan. 22. 7 by 5.5 inches. Paperboard sleeve. Illustration of a tofu burger with trimmings between buns, surrounded by a tomato, green pepper, celery stalk, and sliced onion. “Ready in 5 minutes. Prepared with tofu, savoury herbs & vegetables. Cholesterol free. Microwaveable. Heat and serve.” Called “Pâtés Jardinières” in French.

Two leaflets for all 6 Mandarin patties also sent. One shows a huge illustration of a burger with the 6 packages below it. The other shows the six packages lined up in a typical produce case.

2179. Rose, Richard. 1989. White Wave is now a hot company (Interview). *SoyaScan Notes*. April. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** White Wave’s meatless hot dogs are made at a meat packing plant that specializes in sausages in Denver, Colorado. White Wave make Rose’s cottage salad and Rose makes White Wave’s Soy A Melt (a soy cheese that melts).

The San Francisco Giants are now selling a veggie hot dog—probably made by Yves of Canada. Address: P.O. Box 5020, Santa Rosa, California, 95402-5020. Phone: 707-576-7050.

2180. **Product Name:** [Jean de Preneuf Tofu Sausages (With Boletus Mushrooms, Comté Cheese, Smoked Salmon)].

**Foreign Name:** Jean de Preneuf Roulades de Tofu (Aux Cèpes, Au Compté, Saumon).

**Manufacturer’s Name:** SOY (Société Soy).

**Manufacturer’s Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1989 April.

**Ingredients:** Mushroom: Fresh tofu (water, soybeans\*),

boletus mushrooms (3%), sunflowerseed oil, egg white, wheat flour, spices, aromatics, salt. \* = Organically grown (Issu de l’agriculture biologique). Sauce: Tomato juice, rapeseed oil, carrots, onions, white wine, spices and aromatics, vinegar, starch, salt.

**Wt/Vol., Packaging, Price:** 225 gm packet containing 4 sausages plus two 12-gm sachets of sauce.

**How Stored:** Refrigerated, 28 day shelf life.

**Nutrition:** Mushroom: Per 100 gm.: Protein 13.5%, lipids 10%, carbohydrates 2.8%, calories 648 Kj.

**New Product–Documentation:** See next page. Leaflet.

1988. Front and back. 4 color with photo of mushroom sausage on front. This line of 9 sausage products contains 3 groups: those containing vegetables (13.5% protein), cheese (14% protein), or seafoods (fruits de mer; 15% protein). Label. 1988, undated. 2.5 by 8 inches long by 2 inches deep. Glossy card stock, with 4-color printing. Photos on front and back of the sausages with mushrooms or salmon. “New. With 2 packets of sauce. Gourmet foods for your fitness (Le traiteur de votre forme).” A very innovative concept with excellent packaging and promotion. Letter from Bernard Storup. 1989. March 3. These products are the same as Tofinelle but under a different name for a different market. There are only three varieties, and they will be launched in April 1989, at the same time as three other lines (same products with other names and packaging to come).

Note: In French, the term “traiteur” combines the English terms “caterer” and “delicatessen,” but with more of a gourmet, high class, and expensive feeling. It is very prestigious to be a “traiteur.” However in this case there is also the allusion to the French verb “traiter,” which means “to treat or take care of.” The company is thus trying to say, “We will take good care of your fitness with gourmet food.”

Spot in SoyaFoods. 1991. Spring. p. 5. “Tofu Roulades.” They are packed in a barrier package that can “breathe” to ensure natural preservation of the product. The company name is given as “Jean de Preneuf.”

2181. **Product Name:** Garden Gourmet Vege-Patties.

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** Kibbutz Lochamei Hageaot, Mobile Post, Ashrat (Oshrat), 25220 Israel.

**Date of Introduction:** 1989 April.

**Ingredients:** Rehydrated soy protein concentrate and wheat gluten, vegetable oil (soybean, cottonseed), egg whites, spices, salt, onion, garlic, tamari sauce, hydrolyzed vegetable protein, caramel color, guar gum (natural vegetable gum), natural flavoring, lecithin, vitamin A, thiamine (vitamin B-1), riboflavin (vitamin B-2), pyridoxine hydrochloride (vitamin B-6), vitamin B-12, nicotinamide, vitamin C, calcium pantothenate.

**Wt/Vol., Packaging, Price:** Retail: 10.6 oz package. Foodservice: 2.65 oz.

**How Stored:** Frozen.

### **LES ROULADES DE TOFU**

**Les roulades sont une nouvelle idée de plat principal.**

**Le Tofu (filtrat de soja coagulé) est une spécialité asiatique à base de soja dont il a toutes les qualités ; riche en protéines, faible en lipides et en calories.**

**Légères et fondantes, elles se consomment accompagnées de riz, de pâtes, de légumes ou d'une salade.**

**Alliance de protéines végétales et animales, les roulades de Tofu sont un aliment équilibré, complet.**

**Présentées avec 2 doses de sauce à la tomate, vous les trouverez au rayon "traiteur, produits frais."**

**Nutrition:** Per 1 patty (75 gm): Calories 170, protein 12 gm, fat 11 gm, carbohydrate 6 gm, cholesterol 0 mg, sodium 353 mg.

**New Product–Documentation:** See next page. Leaflet (6 by 8.25 inches, color photos). 1989. April. Obtained at Natural Foods Expo, Anaheim. “Congratulations. You have just completed the first exercise to a healthier you. Food this good for you never tasted this good.” Shows 4 packages and 4 entrees served on plates. Soy is not mentioned. “We’d like you to try Garden Gourmet entrees, the tasty and healthy alternative to red meat. Each delicious dish is made from a unique blending of farm-fresh legumes, whole grains and a dash of natural herbs and spices.” Note: Vege-Cutlets, Vege-Links in Pastry, and Vege-Puffs are presently based on wheat flour and contain no soy.

Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. “Garden Gourmet Vege-Patties is an entrée that combines a rich, savory taste with the versatility of a hamburger. Marvelous alone or topped with sauce and/or cheese for international flavor.”

2182. **Product Name:** Garden Gourmet Vege-Schnitzel.

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** 24 Spielman Road, Fairfield, NJ 07006. Phone: 201-227-7060.

**Date of Introduction:** 1989 April.

**Ingredients:** Rehydrated soy protein concentrate, wheat gluten, soybean oil, egg whites, carrots, peas, corn, potato starch, spices, salt, onion, garlic, hydrolyzed vegetable protein, lecithin, vitamins. Breading: Wheat flour, corn starch, dried vegetables (parsley, celery, red pepper), soybean oil.

**Wt/Vol., Packaging, Price:** 7 oz package. Retail for \$2.49 (7/90).

**How Stored:** Frozen.

**Nutrition:** Per 1 schnitzel (100 gm): Calories 230, protein 11 gm, carbohydrate 14 gm, fat 15 gm, cholesterol 0 mg, sodium 700 mg.

**New Product–Documentation:** See page after next. Talk with Tivall USA. 1989. April. The Tivall line is made at Kibbutz Lochamei Hageaot, Mobile Post, Ashrat (Oshrat), 25220 Israel. Soya International. 1990. April/June. p. 22-23. Contact: John Nobile.

Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. Tivall USA address is now: 9633 E. Bexhill Dr., Kensington, Maryland 20895. Phone: 301-946-8855.

Package with Label brought by Bob Gerner of Berkeley Natural Grocer. 1997. July 2. The product is now named “Garden Gourmet 4 Vegetarian Schnitzels.” 11.6 oz. It is made by Tivall in Israel and distributed in the USA by The Hain Food Group, Inc., Uniondale, New York 11553. For details call 1-800-434-4246. The main ingredients are: Water, soy protein concentrate, wheat gluten, egg white, pea fiber,

autolized yeast. Other products in the line now include: Char Grilled Vegetarian Burgers, Vegetarian Veggie-Patties, and Vegetarian Drumsticks.

2183. **Product Name:** Sloppy Joe Tempeh, and Tempeh Chili. Renamed Vegetarian Sloppy Joe, and Vegetarian Chili in about June 1990 (Both still made with Tempeh).

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 1990 North 57th Court, Boulder, CO 80301.

**Date of Introduction:** 1989 April.

**Ingredients:** Soy rice tempeh (cultured soybeans, water, brown rice), tomato paste, textured vegetable protein (soy flour), green pepper, soy oil, dehydrated onion, soy sauce, water, honey, apple cider vinegar, molasses, spices, garlic powder, salt.

**Wt/Vol., Packaging, Price:** 15 oz tub. Changed to 10 oz tub. Retail for \$2.89 to \$3.19 each.

**New Product–Documentation:** Talk with Steve Demos. 1989. May 13. Sloppy Joe Tempeh, and Tempeh Chili were introduced in April 1989 in 15 oz. tubs. Talk with Lon Stromnes. 1989. May 15. Clarifies names. The White Wave booth, with all its new products and T-shirts, was the hit of the NFM show at Anaheim last April. Soya Newsletter. 1989. May/June. p. 8.

White Wave News. 1991. Vol. 4, No. 1. June. “White Wave debuts new size Vegetarian Sloppy Joe and Vegetarian Chili.” The new size is a 10 oz. reclosable plastic tub. The products are made with diced White Wave Soy Rice Tempeh. Recommended retail price: \$1.69 to \$2.19.

Letter from Lon Stromnes. 1991. July 30. The new 10 oz package was launched in June 1991. White Wave color postcard. 1992. Aug. “Think fast. For no-meat heat & eat, we serve the All-American favorites. Vegetarian Sloppy Joe. Vegetarian Chili. All the sizzle... None of the steak.” The product, which appears to be sold in a red plastic tub, like tofu, is now named “Vegetarian Sloppy Joe: Savory Sandwich Filling.”

Leaflets (1 each) for “White Wave Vegetarian Sloppy Joe” and “White Wave Vegetarian Chili” sent by White Wave. 1993. June 22. Each leaflet contains: (1) Detailed list of product ingredients. The main ingredient in each product is Soy Rice Tempeh. (2) “Our soybeans are organically-grown in accordance with Section 26569.11 of the California Health and Safety Code.” (2) Nutritional information. Serving size: 5 oz. Servings per container: 3. (3) Percentage of U.S. Recommended Daily Allowance (U.S. RDA) for protein (20%), vitamin A (50%), vitamin C, thiamine, riboflavin, niacin, calcium, and iron.

2184. Worthington Foods, Inc. 1989. The tradition of healthy choices. 900 Proprietors Rd., Worthington, OH 43085. 29 p. 29 cm. Undated.

• **Summary:** This document was published to celebrate

# Congratulations. You've just completed the first exercise to a healthier you.

We'd like you to try Garden Gourmet™ entrées, the tasty and healthy alternative to red meat.

Each delicious dish is made from a unique blending of farm-fresh legumes, whole grains and a dash of natural herbs and spices. Not only will they fill you up, but you'll love every bite. There's none of that unsatisfying "spongy" or "over-seasoned" aftertaste that so many other natural health foods leave you with.

And, of course, Garden Gourmet™ is

good for you. Each savory entrée is a complete protein, like meat, but with *no cholesterol or preservatives*. We add nothing artificial or harmful.

Garden Gourmet™ entrées are just right for today's health-minded person on-the-go. Just pop them in the oven and, soon after, they're ready to eat.

**Food this good for you  
never tasted this good.**

**Garden Gourmet™**  
hearty, healthy entrées.

# Garden Gourmet™

hearty, healthy entrées.

## Garden Vege-Schnitzel

Lightly breaded cutlets of vegetable and grain protein product mixed with a medley of tender garden vegetables.

One of Tivall's Family of Naturally Delicious Frozen Entrées

Worthington Foods' 50th anniversary. It contains the best history of the company seen to date.

Contents: Mission statement. A tradition of excellence. Mainstream America eats healthier. Southern fried flavor... zero cholesterol: The story of Morningstar Farms Country Crisps from soybeans to shoppers. The "heart-wise" choice. Good taste plus good nutrition (A graph shows that the number of vegetarians in the USA has increased from 1 million in 1978 to 6.2 million in 1986 a six-fold increase). The good taste of natural living (the Natural Touch line, launched in 1984). Directors and officers. A history of Worthington Foods (p. 13-27). For more color photos, see next pages.

Black-and-white photos show the following early Worthington canned products: Proast, Choplets, Choplet Burger, Worthington Veja-Links (Vegetarian, Smoke Flavor, Skinless), Miller's MC Vegetarian Main Course, Worthington Soyamel.

"The breakthrough" Spun soy fiber (p. 21): Perhaps the single most innovative development in the history of the company started the day Robert Boyer paid an unannounced visit to Worthington Foods. He walked into Buller's office, introduced himself and opened an attache case full of samples wrapped in tinfoil. Buller almost jumped out of his chair. Remembering that day, he says, 'I imagine my eyes got pretty big, because he had several products there that looked very much like meat, and I realized they weren't meat.' One looked like ham, one like beef and one like lamb. When he tore one apart, it looked like the fibers of meat. Then he put it in his mouth and chewed it. Although it had the texture of meat, it tasted 'horrible.' But Buller got excited about the possibilities of what he was seeing and called Hagle in to have a look. After chewing a piece, Hagle asked Boyer, 'Can you make it taste like anything?' Boyer assured them that he could and that it was the alcohol used to extract the protein that had given it the horrible taste. A different extraction method could produce a different product."

"Boyer was invited to work in the Worthington laboratory with Kelly Hartman, and Worthington eventually licensed his patents and hired Boyer as a consultant. Out of this relationship, a whole new line of products developed. Worthington was too small to go into the business of crushing soybeans and disposing of the oil, or of purchasing the protein extrusion or spinning equipment. So Boyer negotiated with Ralston-Purina to set up a pilot plant to make the protein for Worthington. As it turned out, Ralston-Purina made the protein, did the spinning, and Worthington bought the output and put it into new products.

"When the new Ralston-Purina plant was operational, it had the capacity of 10,000 pounds a day. Worthington was not ready for this kind of volume, but working out these difficulties involved Jim Hagle in further negotiations with executives of a large corporation. Finally, Worthington agreed to take all the production, and sales took off. The

*James L. Hagle*

*Allan R. Buller*

products—White Chik, Beeflike, Prosage, Stripples, and Holiday Roast (with a plastic wishbone)—were all hits.

"Hartman remembers those days as his most exciting and challenging with the company. It was a delicate problem getting other companies, like Ralston-Purina, to do a part of the research and production cycle without stealing Worthington's thunder. Many corporations got involved and took a license because they wanted to be on the cutting edge of technology. Hartman says, 'We had vice presidents sticking out our ears, coming here trying either to buy us or get in on the know-how.'

"Almost every major university in the country was interested in what was going on. Hartman says the experimental products were called a lot of good things and a lot of bad things, too.

The products were called 'phony-bologna,' 'fake steaks' and 'sham ham.' Government agencies also became interested, including the Agency for International Development and the United Children's Fund."

"The first to offer frozen meat analogs." One of Worthington's new products that contained spun soy fiber was named Wham. The company that manufactured a meat product named Spam sued Worthington for infringing on their product name. A skillful presentation by Jim Hagle before the company's officers and attorneys at their headquarters in Chicago, Illinois, led to the withdrawal of the lawsuit. "Another problem with the new line of products was that they did not can well. The products deteriorated in flavor and texture under high temperatures. Freezing was the obvious answer, but this required big changes. The company had to purchase trucks for frozen delivery. In addition, at that time many stores were not equipped for frozen foods, so Worthington supplied these stores with food freezers. It was a costly but profitable venture because it increased sales volume tremendously. Thus Worthington Foods became the first company to offer frozen meat analogs. And in October, 1963, a series of television, radio and newspaper

# The Tradition of Healthy Choices

# A History of Worthington Foods

**W**orthington Foods, Inc. began production in a burned out two-story house in 1939. Although the hole in the center of the roof had been repaired, the blackened beams still showed. The front room on the first floor had been replastered, but in the other rooms the lath remained exposed. The tangle of pipes overhead in the basement made the 7-foot clearance even more unmanageable. Under foot, the floors were uneven.

*Special Foods turned a burned-out, two-story house into its first manufacturing site.*

Whoever happened to be handy lugged 125-pound bags of peanuts up and down stairs

of that house. The boiler in the basement and the roaster on the second floor exposed workers to debilitating heat. Gluten was rinsed with a garden hose and gluten steaks were ladled out of kettles by hand. Cans were packed and labels brushed on one can at a time, by hand.

## MORE THAN JUST A FOOD COMPANY

**T**he company's founder, Dr. George T. Harding III, then 34, was a psychiatrist, and medical director of the Harding Sanitarium in the central Ohio community of Worthington. Why would he start a food company? It was not primarily to make a profit. He had two other concerns in mind.

The first was nutrition. At the sanitarium—opened by Seventh-day Adventist George T. Harding II in 1919 to provide total care of the body, mind and spirit—nutrition was emphasized and vegetarianism encouraged. The kitchen baked and sold whole wheat bread to the community. The sanitarium also purchased “health foods” from Battle Creek Foods in Michigan and Madison Foods in Tennessee. These included soy and peanut-based meat substitutes, called “nut meats,” developed originally by Dr. John Harvey Kellogg, brother of the Battle Creek cereal magnate, to provide a completely balanced non-meat diet. But these foods were expensive for the sanitarium to provide for its patients. Harding also believed they could be made more appealing to non-vegetarians.

His second concern was the growth of the Seventh-day Adventist community in Worthington. Since most of the employees of the sanitarium were unmarried nurses, the church-operated elementary school had only eight students. Harding and other parents wanted to attract young families to the community so that the church school, in particular, would flourish.

Returning from a visit to Madison Foods in 1938, Harding said, “There is no reason we can't have a food company here in Worthington.” And in 1939 when the company had begun to operate, he and his wife, Mary Virginia, “felt like we had really accomplished something. Finally, we had young families moving to the community and enlarging the church and the school. At that time, these were bigger goals than making money. We thought if we could just make the company exist, we would be doing real missionary work.”

advertisements featuring the new frozen foods was introduced. All these developments caught the attention of a number of major food companies.” Address: 900 Proprietors Road, Worthington, Ohio 43085. Phone: (614) 885-9511.

2185. Worthington Foods, Inc. 1989. 50 award-winning recipes. 50 years in good nutrition. 900 Proprietors Rd., Worthington, OH 43085. 97 p. Illust. Index. 18 x 26 cm. Spiral bound.

• **Summary:** This book was published to commemorate Worthington’s 50th anniversary. The first 10 pages contain nutritional information. The rest of the book is meatless recipes, most from the individual homemakers (whose names, city, and state are given), some from the kitchens of Morningstar Farms. Each recipe uses at least one product made by Worthington Foods. The most widely used product is Scramblers (cholesterol-free egg substitute based on egg whites, 18 recipes), followed by Vegetarian Burger (7 recipes), and Chic-Ketts (5 recipes). A nutrition analysis is given with each recipe, and many recipes are accompanied by a color photo of the finished dish. Other products used in the book are Choplets, Crispy Chik Patties, Diced Chik, Fri-Chik, FriPats, GranBurger, Meatless “Beef” Style, Meatless

“Chicken” Style, Meatless Corned “Beef” Slices, Meatless Smoked “Turkey” Slices, Numete, Prime Stakes, Prosage, Stakelets, Super-Links, Tuno, Vegetable Skallops, Vegetable Steaks, Veja-Links, Wham (like ham), Natural Touch Spicy Chili, Breakfast Links, Breakfast Strips, and Grillers. Address: Worthington, Ohio.

2186. **Product Name:** Tofu Crumbles (Vegetarian Hamburger).

**Manufacturer’s Name:** Marjon Specialty Foods.

**Manufacturer’s Address:** 3508 Sydney Rd., Plant City, FL 33566. Phone: 813-752-3482.

**Date of Introduction:** 1989 May.

**Ingredients:** Tofu, seasoning, caramel coloring, potassium sorbate and lactic acid to maintain freshness.

**Wt/Vol., Packaging, Price:** 10 oz. paperboard box.

**How Stored:** Refrigerated.

**Nutrition:** Per 4 oz.: Calories 82, protein 9 gm, carbohydrate less than 1, fat 5 gm, cholesterol 0 mg, sodium 8 mg, calcium 145 mg.

**New Product–Documentation:** Sarah V. Cherin. 1992.

*Produce Business*. June. p. 50. “Tofu Takes on Produce Flavors.” “Marjon Specialty Foods carries a product called

Tofu Crumbles that is a vegetarian substitute for meat.” It is merchandised in the produce department and sometimes demonstrated as Tofu Crumbles tacos, and tofu chili. There are 6 recipes on the box.

Talk with Marcia Miller of Marjon. 1993. April 28. This product was introduced on 16 May 1989. It is made entirely at their plant and sold in boxed form. Today they got a patty maker and are planning to make the crumbles into a vegetarian burger.

Label sent by Marcia Miller. 1993. April 28. Paperboard box is 3¼ by 4½ by 2¼ inches. Dark brown, green, and red on yellow. “Seasoned. Ready to use. Pre-cooked. Textured. Easy time saving lite recipes on sides. Cholesterol free. Very low sodium.” Recipes are given for: Tofu chili. Tofu sloppy joes. Tofu spaghetti. Tofu stuffed green peppers. Tofu tacos and burritos. Tofu pizza. A color photo of each prepared dish appears on the back of the box.

2187. **Product Name:** Tempeh Lasagna, and Herbal Garden Tofu (With 6 Herbs & Spices in the Curds).

**Manufacturer’s Name:** San Diego Soy Dairy.

**Manufacturer’s Address:** 1330 Hill St., Suite B., El Cajon, CA 92020. Phone: 619-447-8638.

**Date of Introduction:** 1989 May.

**New Product–Documentation:** Talk with Gary Stein. 1989. Feb. 17. He expects that these products will be launched in about Aug. 1989. Talk with Gary Stein. 1989. Oct. 25. Tempeh Lasagna was introduced in May, 1989. It contains Pizsoy soy cheese (\$1.60/lb). He also distributes the cheese. He also does a private labelled version for Heart & Soul, as well as own label. Herbal Tofu is expected out by the end of November, 1989. He will soon be putting out an iced herbal tea (non-soy).

2188. Mann, Oscar. 1989. Re: Problems in trying to introduce tofu to Kenya. Letter to William Shurtleff at Soyfoods Center, June 7. 2 p. Typed, with signature on letterhead.

• **Summary:** “I was making my own tofu for a while, then supplying friends and now a main deli/grocery in town. It’s little known here but sales are steadily growing and are now at around 20 kg/week. I’m also producing soysage and have just begun okara Tempeh.”

The main problems are: 1. Very strict government health regulations; all products must undergo strict government testing. 2. Poor quality soybeans and concern with aflatoxins on soybeans. “I have one person whose job it is to sit and sort soaked beans—particularly any that look moldy or infected in any way. We actually discard 20-30% of our raw stock... For some reason Kenya is having a hard time producing soy beans. The market has been low but their main problem is that the beans rot as soon as they are ready, necessitating 2 or even 3 pickings per day! Beans on the market currently come from Uganda or Tanzania and are

old. I buy what I can (at around \$0.50/lb) and there are never two loads the same which makes control and scientific methodology difficult.” 3. Local coagulants are expensive. Lab grade calcium sulfate, the least expensive, costs \$1.66/lb. So the cost of producing tofu is about \$0.95/lb (with labor costing only \$0.50/hour); it wholesales for \$1.25 and retails for \$1.66/lb. 4. Tofu and other soyfoods are not well known.

“I am holding a tofu-making class this coming week end and will have samples of tempeh and soysage to try. Next is a tofu cooking class, a small recipe book and a soya festival with one of the largest restaurants.”

“My analysis of the situation soy-wise here is that probably the most accepted products will be flavored soy milk in tetra bricks, burgers, soysage, and dried frozen tofu for the various hunger and famine-relief projects. (I actually thought I had invented this stuff before finding it in your books. I use it as my main staple on safari and have given samples to trekking companies.) I would like to see a full-scale soy dairy in operation.” Address: Kenya Natural Products Development Co., P.O. Box 20360, Nairobi, Kenya. Phone: 60099.

2189. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten [Catalog and price list. April-June]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** Akwarius is a larger importer and distributor of natural food products. They have worked in this field since 1971, and have a strong interest in macrobiotic and anthroposophical foods. Contents (p. 2). Philosophy and function (p. 3). Beverages (p. 7): Sojamelk naturel and Bonsoy, Provamel Sojadrink (4 flavors in 500 ml and 4 flavors in 1 liter sizes), Provamel Soja dessert (puddings; 5 flavors in 525 gm and 1 flavor in 1050 gm).

Manna sweeteners (p. 12): Amasake drink in 350 and 700 gm sizes, and rice koji. Note that Akwarius imports and distributes large line of Manna-brand macrobiotic products from Muso in Japan. Manna vegetable protein products (p. 21): Dried tofu (non-organic). Bonsoy soymilk, Seitan, and three types of dried wheat gluten (fu). Manna Soy Sauces (Sojasausen, p. 21): shoyu (B = biological or organically grown, and NB = not biological, i.e. non-organic), and tamari (non-organic).

Witte Wonder (p. 22): Seitan, Tofu Spread (in paprika, garlic, celery, dill, mushroom, and pepper flavors, 220 gm sizes, all organic), Tofu in Sauces (peanut, curry-pineapple, and tomato flavors, 340 gm, organic), Tofunaise (plain and lemon flavors), Tofu Dressing (Italian, garden herbs, Mexican, and plain flavors).

Yakso (p. 23): Seitan, Tempeh Spreads (in Indonesian poesta and doeloe flavors), Temmo (round tempeh burger, deep fried then marinated, ¼ inch thick, sold 5 in a glass jar), Soyaroma (tempeh spread like butter), Sweet Indonesian-style soy sauce (Ketjap manis), Tofu Spreads (cream cheese

consistency, in salsa, dill, green, shallot, and pommodore [apple?] flavors), Tofu Mayonnaise (Sojanaise), Smoked tofu (paprika, mushroom, and celery flavors in 170 gm wide mouth glass jars).

Akwarius soybeans and soybean meal/flour (p. 27-28, 35, organic). Manna Pasta (p. 28): Soya macaroni. Manna black soybeans from Hokkaido (p. 35; 350 gm, non-organic). Manna Tekka Condiment (p. 44), Manna soynuts (*Sojanootjes*, p. 45, 3 flavors). Lima soyadrink (p. 47).

Manna Miso (Sojapasta; p. 48): Brown rice miso (organic and non-organic), young rice miso (non-organic), barley miso (organic and non-organic), natto miso (non-organic), soybean miso (non-organic), instant miso soup (with and without fish, non-organic), instant miso soup with tofu. Manna sea vegetables (p. 49).

Note 1. This is the earliest Dutch-language document seen that mentions soynuts, which it calls *Sojanootjes*.

Note 2. This is the earliest Dutch-language document seen (Sept. 2013) that mentions soy cream cheese. Address: Almere, Netherlands. Phone: 03240-20800.

2190. **Product Name:** Meatless Healthy Franks (Tofu Hot Dogs).

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1989 June.

**Ingredients:** Organic tofu (water, organic soybeans, calcium sulfate and nigari [magnesium chloride]), soy oil, wheat gluten, egg white, tapioca starch, wheat germ, soy sauce (water, soybeans, whole wheat, salt), dried yeast, natural liquid hickory smoke, garlic powder, spices, natural flavor, beet powder, oleoresin paprika for color.

**Wt/Vol., Packaging, Price:** 12 oz package, 12 per case, retails for about \$3.09 (7/89).

**How Stored:** Refrigerated, 60 day shelf life.

**New Product–Documentation:** Talk with Steve Demos. 1989. May 13. This product will be officially launched in June, but they have been in interstate sales to protect their trademark. The use of the word “franks” was approved in writing by the FDA. They have enormous advanced sales, and they have done a lot of test marketing and sold a little to health food stores. Leaflet. 1989. April. “Introducing: Meatless Healthy Franks.” Shows label. Both retail and food-service packs are available. Shelf life is 60 days at 38-40°F.

White Wave News. 1990. 3(3):1. June. “Healthy Frank meets nefarious Mr. Puppette.” A humorous portrayal of the product and its competition. Healthy Franks are packaged in state-of-the-art six color packaging. “Special Note: White Wave will not use Carmine, a coloring agent used to achieve a heat-stable red hot dog. Carmine appears on labels as ‘Natural Color’ and is made from cochineal (a small red insect similar to a mealybug). Don’t be misled by the red. Challenge any suppliers of heat-stable-red hot dogs about their coloring.”

Talk with Lon Stromnes. 1993. April 14. This product is coming out in an improved formulation with much better texture.

2191. **Product Name:** [Tofu Burger with Sea Vegetables].

**Foreign Name:** Galette de Tofou aux Algues Marines.

**Manufacturer's Name:** Ferme de Jas.

**Manufacturer's Address:** Eourres, 26560 Séderon, France. Phone: 92.65.10.95.

**Date of Introduction:** 1989 July.

**Ingredients:** Tofu, rice, sea vegetables, shoyu, sunflowerseed oil, spices, salt, flour.

**Wt/Vol., Packaging, Price:** 90 gm vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter and Labels from Anthony Marrese. 1989. June 7. This product was introduced in July 1989. Label. 2.75 inches diameter. Paper. Black on blue. Illustration of a sun rising over a farm, and 3 soybean leaves. “Préparation alimentaire à base de soja. Nature et

Progres logo. 50% tofu and 40% rice.” Organically grown (Produits de culture biologique).

2192. Lightlife Foods, Inc. 1989. Living the Lightlife: Tofu Pups—The uncommon dog (Ad). *Vegetarian Times*. July. p. 25.

• **Summary:** A full-page, black-and-white ad resembling a comic strip. This is a “nutritious and tasty meat alternative.” “It has no cholesterol and no nitrates. It contains 70% less sodium than a meat frank and 50% less fat. Its made from wonderful tofu and with only 95 calories it’s got the nutritional profile you want in the food you eat. And best of all, it tastes great!” Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: (413) 772-0991.

2193. Natufood B.V. 1989. Prijs-bestelboek [Natufood price list and catalog, July-Sept. 1989]. Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands. 73+ p. [Dut]

• **Summary:** This catalog of a Dutch natural foods distributor lists the farming method (organic or not), wholesale and retail prices for each product: Page 8: Witte Wonder tofu spreads (mushroom, chili, green peppercorn, garlic, paprika, celery), Lima Limapast contains sunflower seeds, miso, and soy flour. Page 30. Joannusmolen roasted soy flour.

Note. This is the earliest English-language document seen (Nov. 2012) that contains the term “roasted soy flour.”

Page 31. Natufood defatted soy flour (sifted). Ad for the Vetara line of ready-to-eat foods, many of which contain TVP. Page 33. Avita soybeans (Avita Natufood’s organic food line). Natufood soybeans. Ad from Nutricia for canned powdered infant foods. Nutri-Soja complete infant food based on soy. Nutri-Soja Plus based on soy for infants that have been weaned. Page 34. Nutricia infant formulas: Nutrisoja in 400 gm or 1000 gm and Nutrisoja-Plus in 900 gm. Page 35. Avita little soybeans (regular and large, organic).

Page 36. Witte Wonder soybeans in tomato sauce. Ad for Vetara organic tofu, which is produced by Heuschen-Schrouff B.V. in a completely new facility under extremely sanitary conditions. It is made with organic soybeans with a natural coagulant (Serempi) in the traditional way. “Best quality, lowest price.” The product label (250 gm) is shown. Page 37. Refrigerated miso products made in Europe. Lima barley miso and rice miso, both unpasteurized. Page 38. Meat replacers. Seitan is sold by Vetara, Witte Wonder, Yakso, and Manna. Vetara herb tofu, Napolitan tofu, rice tofu, bali tofu, rames tofu, rames tempeh, Tjap Tjopy. Witte Wonder tofu in curry/pineapple sauce, and in peanut sauce. Ad for Vetara vegetarian burgers, frankfurters, and schnitzels.

Cenovis and Huegli bouillon tablets (14 types, probably contain miso). [Sjon Welters adds that Huegli, a multi-million dollar Swiss food company, owns a major part of Natufood B.V.]. Western bouillons (Miso): Lima barley and rice misos. Heiwa Hatcho miso and instant miso soup. Huegli ad.

Page 42. Vegetarian refrigerated products: Vetara smoked tofu, natural tofu (EKO mark), saté tofu, vetaburgers with pineapple, with cheese & onion, natuburgers. Soyadrinks and desserts: Provamel (8 drinks and 6 desserts [puddings]). Lima (3 drinks).

Page 43. Seasonings: Vetara sweet soy sauce (Ketjap zoet). Yakso sweet soy sauce (Ketjap manis). Soy sauce. Lima shoyu (orange label) and tamari (blue label). Heiwa shoyu and tamari. Vetara shoyu. Page 44. Witte Wonder organic tofu dressings (Italian, Mexican, Garden herbs, or Natural). Mayonnaise and Tofunaise: Witte Wonder organic tofunaise (regular or with lemon).

Page 52. A. Vogel products: Vogel Sojaforce. Page 67. Natufood non-organic soynuts (natural, paprika, curry, or onion). A photo of the soynuts is given at the bottom of the page. Page 69. Non-organic soynuts in bulk (same 4 flavors as page 67). Page 73. Bulk defatted soy flour, and soybeans (organic or non-organic). Ad for Vetara Vegetable Bouillon, which probably contains soy. Address: Harderwijk, Netherlands. Phone: 03410-23240.

2194. **Product Name:** [Vetara Vegetarian Refrigerated Products: Vetara Smoked Tofu, Natural Tofu (organic EKO mark, or non-organic), Saté Tofu, Vetaburgers (Plain, With Pineapple, With Cheese & Onion), Natuburgers, Frankfurter Sausages, Wiener Sausages, Saté (Without Sauce), and Schnitzel].

**Foreign Name:** Vetara Vegetarische Koelprodukten: Vetara Tofu Gerookt, Tofu Naturel (EKO mark, or non-organic), Saté Tofu, Vetaburgers (Plain, Ananas, Kaas-Ui), Natuburgers, Frankfurter Worstjes, Wiener Worstjes, Saté (Zonder Saus), Schnitzel.

**Manufacturer’s Name:** Natufood B.V.

**Manufacturer’s Address:** Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands.

**Date of Introduction:** 1989 July.

**How Stored:** Refrigerated.

**New Product–Documentation:** Natufood Catalog. 1989. July/Sept. p. 42.

2195. **Product Name:** Soy Deli Tofu Burgers [Barbecue Style, Cajun Spice, Curry Spice, Garden Style, Italian Spice, Original, Taco Spice, Tofu-Tempeh, or Teriyaki].

**Manufacturer’s Name:** Quong Hop & Co.

**Manufacturer’s Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1989 July.

**Wt/Vol., Packaging, Price:** 6.1 oz.

**How Stored:** Refrigerated.

**New Product–Documentation:** Ad, quarter page black-and-white, in Whole Foods. 1989. Sept. p. 132. “Make a healthy choice. New! From Soy Deli. The original organic tofu burger. Nine organic meals in a minute. Strengthen your health food line with the nine new international flavors of Soy Deli organic tofu burgers. All natural ingredients, no preservatives, made from the finest nigari tofu. Pre-cooked with a delicious blend of natural spices. Simply heat and serve, or add to your favorite recipes in place of meat. Good shelf life. High protein, low sodium, no cholesterol, meat or dairy products. Refrigerated or frozen.” A photo shows the label. Note: Quong Hop & Co. first introduced a tofu burger in Jan. 1979.

Talk with Ben Lee of Quong Hop. 1989. Sept. 1. These products were launched in July 1979. The full-color label is printed using a 6-color process. The company hopes the new product will make the transition to the typical deli case in delis; they are not shooting for the deli case in supermarkets. Soyfoods Center product evaluation. 1989. Sept. 9. So-so. Quite dry and crumbly, not juicy. Poor cohesiveness. No instructions for cooking in microwave oven. Flavors are okay, but what is the need for so many? It is not clear whether or not the product is fried.

Spot in Whole Foods. 1989. Nov. p. 83. Available in 9 international flavors. “The burgers are pre-cooked in high-oleic safflower [oil]... contain no meat or dairy products.” Ad (5 by 7 inches, black and white) in Whole Foods. 1990. Feb. p. 36. “Make a healthy choice. New! From Soy Deli. Nine organic meals in a minute.” Lists the 9 flavors.

2196. Stanton, Russ. 1989. Adventists seek buyer for La Loma Foods. *Press-Enterprise (Riverside, California)*. Aug. 1, Tuesday. [1 ref]

• **Summary:** “The owner of La Loma Foods Inc. [The General Conference of Seventh-day Adventist] has decided to sell the Riverside [California]-based maker of meat substitutes and other health food products after receiving an unsolicited offer for the company from its largest competitor... The move comes about 2 months after Ohio-based Worthington Foods Inc. made an undisclosed offer for La Loma. Worthington, which sells its products under the Morningstar Farms and Worthington labels, is the nation’s largest maker of meat substitutes and other health food products.”

“La Loma, which has about 70 employees, has seen sales improve 15 to 20% this year, [company president Alejo] Pizarro said. The non-meat business had 1988 revenue of about \$9 million. Pizarro said the church was hoping La Loma will fetch around \$10 million.”

“The church sold La Loma’s parent, Loma Linda Foods Inc., to a Dutch company last Feb. In the interim, N.V. Verenigde Bedrijven Nutricia (United Nutrition Cos.) has allowed La Loma to continue making its more than 70 non-

meat products at the La Sierra area plant. Nutricia purchased Loma Linda Foods for its soybean-based infant formula operations.”

2197. Rivera, Esther. 1989. La Loma Foods, formerly Loma Linda Foods, purchased by Dr. Lin Martin (Interview). *SoyaScan Notes*. Aug. 21 and 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** On August 10 the board of directors of La Loma Foods announced that Dr. Martin, a dentist from Riverside, a Seventh-day Adventist, and an owner of Health Food Express (a direct mail company in Fresno, California), won the bidding with an offer of \$9 million to purchase La Loma Foods. He must make a down payment \$1 million by Oct. 1 at which time the final transition period should end. He beat out Worthington Foods (which came in third) in the bidding. The deal should be finalized by the end of September. He intends to proceed with the company’s former plans to stay in the Riverside-San Bernardino area and to move into a 60,000 square foot food processing plant there. With this sale, La Loma has become a private company with no connection to the Seventh-day Adventist (SDA) church. The SDA General Conference had decided to sell the company. Address: La Loma Foods, Riverside, California.

2198. Duchesne, Paul. 1989. History of Wildwood Tofu (Germany), Auenland Tofu, Peter Wiegand, and Wildwood Natural Foods (California) (Interview). *SoyaScan Notes*. Aug. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** According to Soyfoods Center records, Peter Wiegand started one of the earliest known tofu manufacturing companies in West Germany. Duchesne recalls that Wiegand came to America in the spring of 1981 to learn about tofu. He had heard about Wildwood Natural Foods in Fairfax, so he went there and he and Duchesne quickly became good friends. Duchesne showed him the whole operation and spent a great deal of time teaching him how to make tofu and tofu products. After six months of work and study, in the fall of 1981, Peter and his family returned to Germany. Before Peter left, Duchesne encouraged him to make secondary tofu products, such as tofu sausages. After returning to Germany, Wiegand started his company in a small dairy barn. That winter (early 1982) Michael Pierce, who was once Wildwood’s best tofu maker and art designer in Fairfax and who now lives in Georgia (Phone: 912-752-8070), went to Germany and lived and worked with Wiegand. There he made tofu and designed the colorful Auenland label showing a sunrise over a rural village.

Wiegand’s first company failed; it was too small and too labor intensive. So he raised a lot of money and built a larger company and plant. Wiegand returned to America and asked Duchesne (who had just left Wildwood Natural Foods)

to return with him to Germany to help get the new Auenland started. Duchesne declined (since funds were too limited) but his son, Paul Jr., went and worked there for 6 months. In 1983 Auenland introduced a line of second generation tofu products: Pizza, cake, tofunafish salad, mayonnaise, and burgers, many of which were inspired by Wildwood products. Most of his products were sold in Munich, and some in Austria—where Peter was born. In the end, a sausage maker who worked for Wiegand started a tofu sausage business, bought his tofu from Auenland, and ended making most of the money. Wiegand was not a good businessman, not a very practical person. His father in law was putting a lot of money into the company but in the end Wiegand lost most if not all of it... and the shop. Address: Fairfax, California. Phone: 415-453-2360.

2199. Brown, Peter J. 1989. From bean to bun: The saga of the soy dog. *Soya Newsletter (Bar Harbor, Maine)*. July/Aug. p. 1, 12-15.

• **Summary:** A look at the tofu hot dog market in America—but with no statistics on the market size or individual products. The major players are Light Foods Inc., White wave Inc., Lightlife Foods Inc., and Northern Soy. An estimated \$2 billion worth of meat- or poultry-based hot

dogs (1.5 billion lb in 1987) are sold in America. America's first tofu hot dog, Tofu Light Links, was introduced in 1983 by Robert Davis of Light Foods in St. Louis, Missouri. White Wave, which sells Healthy Franks made by a co-packer and aimed at the mainstream market, has just moved into a 24,000 [actually 23,000] square foot plant with almost 50 employees. Company sales are expected to top \$3 million in 1989. Lightlife sells to the kosher/pareve market. Last fall East West Journal picked Northern Soy's Not Dog as the best meatless hot dog in America. The keys to success are flavoring, use of vegetable gums, retention of juiciness, and pricing.

Worthington Foods, with more than 350 employees and \$75 million in sales, has been marketing meatless meatlike products for decades. They now have 120 such products and the basic goal is to be as close as possible to the real thing. Earlier this summer the *New Bedford Standard-Times* conducted a taste test among young children at a summer camp. The soy hot dog was the second most expensive of the entrants and the kids disliked it, describing it with terms such as "sooooo gross." Address: Contributing editor.

2200. **Product Name:** Lightlife Foney Baloney. **Manufacturer's Name:** Lightlife Foods, Inc. **Manufacturer's Address:** 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.

**Date of Introduction:** 1989 August.

**Ingredients:** 7/92: Tofu (soybeans, water, calcium sulfate), water, isolated soy protein, soy oil, spices, sea salt, beet powder, oleoresin of paprika, vegetable gums.

**Wt/Vol., Packaging, Price:** 10 oz (238 gm) vacuum pack. Retail for \$2.79 (6/90, California). 6 oz (170 gm) vacuum pack retails for \$1.99 (7/92, Maryland).

**How Stored:** Refrigerated.

**Nutrition:** 7/92: Per 2 oz.: Calories 59, protein 5.9 gm, carbohydrates 74 gm, fat 3.5 gm, cholesterol 0 mg.

**New Product—Documentation:** Leaflet (8½ by 11 inches, single sided) sent by Richard Rose from Natural Products Expo East at Philadelphia. 1989. Sept. On the top two-thirds of this leaflet is a cartoon in which three boys are talking. "I don't take any baloney from my mom." "Me neither! My mom gives me Foney Baloney. It's the best." The text reads: "Foney Baloney tastes just like traditional baloney but has 75% less fat, half the sodium, and no cholesterol or nitrates. Foney Baloney's number one ingredient is organic tofu." A photo shows the Label (red and white on blue).

Talk with Richard McKelvey, sales manager of Lightlife Foods. 1990. June 20. This tofu-based product was launched in Aug. 1989. It contains no cholesterol or nitrates.

Talk with Michael Cohen. 1991. Sept. 17. The name of this product was created to appeal to children. But now the name is getting in the way of a product with good unrealized potential for adults, so that may rename it.

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July. 20. Label is 3.75 inches in diameter. Self adhesive. Red, white, and yellow on dark blue. "Kids love it! Zero cholesterol. 100% vegetarian. Zero nitrates. Meatless. For a real treat, try it grilled. A delicious, healthful alternative to cold cuts."

2201. **Product Name:** Lightlife Lemon Grill (Tempeh Burger).

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.

**Date of Introduction:** 1989 August.

**Ingredients:** Organic soy-rice tempeh (organically grown soybeans, brown rice, water, tempeh culture), fresh lemon juice, soy sauce, canola oil, olive oil, granulated garlic, onion powder.

**Wt/Vol., Packaging, Price:** 5.5 oz (155 gm) vacuum pack.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** See next page. Talk with Richard McKelvey, sales manager of Lightlife Foods. 1990. June 20. This round tempeh burger was launched in Nov. 1989. It is marinated in pure lemon juice as a opposed to lemon concentrate. The product is doing very well and growing. "If you try the Lemon Grill, you'll love it. So the company is working to get people to try it."

Label sent by Richard McKelvey. 1990. July 20. 4.25 by 5 inches. Green, yellow, and white on black. "Meatless. All natural. Two tempeh cutlets. Delicious as an entree or in a sandwich. Just grill in a lightly oiled pan, under the broiler or on a grill. Microwavable: 1-2 minutes."

2202. **Product Name:** Tempeh [Sari Ayam–Chicken Flavour].

**Manufacturer's Name:** Nutrisoy Pty. Ltd.

**Manufacturer's Address:** 255 Forest Road, Arncliffe 2205, NSW, Australia.

**Date of Introduction:** 1989 August.

**Ingredients:** Organic soybeans, water, cider vinegar, chicken flavour (salt, maltodextrin, flavour enhancer {621}, wheat starch, chicken fat, chicken meat, beef fat, yeast extract, onion powder, spices), and culture (*Rhizopus oligosporus*).

**Wt/Vol., Packaging, Price:** 250 gm in plastic bag.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label with date sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Aug. 1988. Red, green and white on yellow. Front panel: "Delicious. Nutritious. Fitness food. Fry, bake, grill or steam for a quick & easy meal. Fitness food. Bermutu Tinggi."

2203. **Product Name:** [Viana Seitan, Seitan Meatballs {Meatless}, Skewered Seitan Kabobs].

**Foreign Name:** Viana Seitan, Seitan-Klopse, Seitan Spiesse.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.

**Date of Introduction:** 1989 August.

**Ingredients:** Seitan: Wheat\*, wheat flour\*, shoyu\*, wheat gluten, ginger\*, kombu sea vegetable. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 250 gm in a 350 gm jar. Or 80 gm.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Talk with Bernd Drosihn, founder of Viana. 1990. April 7. He makes seitan; started in Aug. 1989.

Label sent by Bernd Drosihn. 1990. April 8. 4.75 by 2.75 inches. Reddish purple, black, tan, and gold. The company address is now 5030 Huerth 6, West Germany.

Leaflet (3 panels each side. Each panel: 27 x 10 cm. Front and back), Black and brown on white. The front panel reads: "Sometimes when all is quiet, someone says 'Seitan.'" A shadowy cartoon figure with turned up collar and mobster-type hat with the brim turned down is shown. Gives an explanation of seitan and 5 recipes.

Brochure. 1990. "Pasteten und Brotaufstriche im Pfandglas" The back panel states that Viana now makes Seitan, Seitan-Klopse, and Seitan Spiesse.

Letter with new Labels from Bernd Drosihn. 1992. July 16. The company address is now: Viana Naturkost GmbH,

Willi Graf Str. 88, 5350 Euskirchen-Kuchenheim, Germany. They still make these 3 seitan products, however the Seitan Klopse is now called Seitan Burger. Klopse is an old East German word for meatballs. Spiess is a skewered product like a kabob. All three products were first sold in Aug. 1989.

Labels brought by Bernd Drosihn of Viana. 1995. March 11. Dark red, black, and white on red. Self adhesive. 160 gm.

2204. *SoyaScan Notes*. 1989. Checklist for making and selling premium quality, fresh (unpasteurized) tofu in America (Overview). Sept. 15. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Premium tofu has two basic components: Flavor and freshness. It must be based on a comprehensive “quality first” program company and generally retails for a higher price than tofu which is produced on a large scale and distributed over a wide area, and which is usually pasteurized.

A. To get best flavor: 1. Use the best ingredients: Quality water (ideally spring or well water with a low bacterial count rather than municipal tap water), a variety of soybeans carefully tested against at least 10-20 others to give both the best tofu flavor and yield, organically grown soybeans, and a nigari-type coagulant (ideally one such as calcium chloride nigari that adds substantial calcium to the tofu). 2. Follow strict sanitation procedures in the plant to produce a bacteriologically clean tofu with a low plate count and a long shelf life. Set bacterial standards for your tofu at the time it reaches your walk-in cooler and have a program of regular plate-count sampling: For example, standard plate count less than 100, pH greater than 7.0, coliforms per gram less than 5. Have an in-house lab (or work closely with a nearby food testing lab which typically charges \$12 for a plate count) to monitor bacterial levels. 3. Chill your tofu rapidly (in a water-filled stainless steel tank with a recycling standpipe overflow) in water below 35°F (2°C) as soon as it comes out of the forming trays to draw the core temperature of the tofu down to the water temperature as fast as possible. Use a powerful refrigeration system with a large plate heat exchanger (containing food grade glycol), a condenser, a strong pump, two coarse filters for tofu particles, and a two fine bacterial filters, pressure gauges on both sides of each filter to tell when clogged filters should be changed. 4. Package the tofu as soon as it is chilled to the core to avoid prolonged contact with water, which slowly leeches out the tofu’s subtle nigari flavor and sweetness. If possible, vacuum pack, which has numerous advantages other than preserving good flavor: it presents tofu in the same type of familiar container used for cheeses, extends shelf life, and saves space and weight in shipping. Chamber-bag batch-type vacuum packagers are relatively easy to operate and free of problems, but high-volume continuous rollstock machines are extremely complex, tricky and unpredictable. Do not pasteurize the tofu; some people feel this process subtly

harms the flavor and makes the texture slightly rubbery. 5. Rush the packaged tofu into a powerful walk-in cooler below 35°F; 34°F is ideal. Fans, air circulation and recycling, and proper stacking should help pull any remaining heat out of the tofu. 6. Date each package with a clear and realistic “Use By” date based on bacteriological tests under typical circumstances. Some price guns put a price and date on one sticker.

B. For optimum freshness after the tofu leaves the plant: 1. Own your own fleet of delivery trucks, each with a powerful and fairly large refrigeration unit that will keep the tofu below 40°F in the summer. 2. Try to deliver fresh to each retail store at least 3-4 days a week, early in the day. 3. Train your driver/salesmen on how to monitor tofu temperature at key points (each should carry a top-quality pocket thermometer) and to avoid temperature abuse. 4. Do NOT allow your tofu to be sold in the produce section of a store (where the temperature is typically about 50-60°F). Insist on an space (as in the dairy department) where the ambient temperature is below 40°F, ideally below 35°F. 5. Have your drivers remove from the store shelves any tofu that is past the pull date, puffed up or blown up on shelf, mashed, or returned by a customer. 6. In close connection with this, have each driver fill out a “Product Loss and Temperature Report” which is a checklist that tells why products are coming back. Aim for a return rate of less than 1%. Have your driver tell the store manager about any in-store tofu temperature problems. 4. Limit your distribution to a certain region, ideally having a radius of about 75-100 miles from your plant.

U.S. tofu companies that position themselves as makers of premium tofu include Wildwood Natural Foods (Fairfax, California), Northern Soy (Rochester, New York), The Tofu Shop (Arcata, California), and many others.

The above information is based, in part on talks with Jeremiah Ridenour, President of Wildwood Natural Foods of Santa Cruz, Inc., a leading maker of premium fresh tofu. Wildwood has a unique system that includes distributing a wide line of natural food products together with their tofu and offering full-service to stores. The latter includes free direct store delivery (which, in bypassing warehouses, gets fresh product on the shelves faster than a chain can), no labor costs for the store (but the store now makes 25-28% on a product rather than 35%), free shelf stocking, pricing, code dating, rotating, and fronting up shelves. This system has allowed Wildwood to get their line into the dairy case of many Northern California supermarkets. They invite buyers to taste test their braised tofu, baked tofu, or tofu burgers.

2205. *SoyaScan Notes*. 1989. Update on Tomsun Foods International, Inc. (Interview). Sept. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company was in Chapter 11 bankruptcy and William Holmes, the new president, purchased it on 9

Feb. 1989. Holmes now owns 80% of the outstanding stock. The corporation moved to this new address from Greenfield, Massachusetts, 3 weeks ago. It is now basically just a marketing company. Tom Timmins is no longer associated with the company and no longer owns any stock in it. Jofu is now being made in Boston by a dairy. It is in honey and sugar flavored lines. The product is doing well. Tomsun also still sells tofu burgers and soy sauce. They no longer sell regular Tomsun Tofu, but they are looking for another company to make it for them. They were not happy with the company in New York that made it for them. They do not have a catalog of products. Address: 44 South Bayles Ave. Suite #200, Port Washington, New York 11050. Phone: 516-883-4900.

2206. Gaec de La Lix: United Macrobiotic Company. 1989. Re: Work with soyfoods and seitan in France. Letter from Ben of Gaex to Anthony Marrese, Sept. 25. 1 p. Typed, with signature on letterhead. [Fre]

• **Summary:** “Since October 1985 we have been building up our project. We are 20 adults and meanwhile three children. Four years ago we bought a very nice farm in the beautiful landscape of the Pre-Pyrenees 80 kilometers southwest of Toulouse. Today we work on more than 90 hectares of land.

“At the beginning we started by establishing a common macrobiotic kitchen. We worked mainly in the garden and in the fields, trying ideas of permaculture and those of Masanobu Fukuoka. In this behalf we were assisted by Thomas Nelissen, who lived for some time at Fukuoka’s farm in Japan, and Declan Kennedy, the most important teacher of permaculture in Europe...

“This is our fourth year growing soybeans. We have a garden of one and a half hectares, mostly for self-sufficiency.

“With a status as ‘transformateurs’ we set up a stand on the organic market (“marche bio”) at Toulouse, shortly after we started to make tofu for ourselves. In time we began to make tempeh, natto... certain types of soyaburgers, sushis and vegetable rolls. Today we deliver our products to more than 40 biological [organic] health stores in the surrounding 100 kilometers...

“We teach the making of tofu and seitan, amasake, mochi and tempeh as well as giving macrobiotic cooking classes and agricultural seminars.”

A 1989 leaflet titled “What are Tofu, Tempeh, Seitan, Kombu?” in French (4 panels) is included with the letter. A color slide showing five people from the company waving is taped to the letter. Address: 32260 Tachaires-Seissan, France. Phone: 62.65.35.04.

2207. Franklin, Peter D. 1989. Worthington Foods chooses New York ad agency. *Dispatch (Columbus, Ohio)*. Sept. 26. p. 6C. Business section.

• **Summary:** Out of 25 agencies that sought the company’s advertising account, Worthington Foods has selected Partners

& Shevack, Inc. (of New York), which has total billings in the \$150 million range. Since 1986 Worthington’s \$2.5 million account has been with Fahlgren & Swink.

“Partners will begin work Sunday on new consumer, trade and professional advertising campaigns that will concentrate on the print media, particularly magazines.”

2208. Paino, John. 1989. Vacuum packaging tofu (Interview). *SoyaScan Notes*. Sept. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** For the first month after Nasoya started making tofu, they packaged it in pails in bulk. Then they switched to water packing in tubs, starting with a small Monkey Packer with a foot pedal that packed once cake at a time. Under ideal conditions, this tofu had a 2-week shelf life. For the next 4 years they sold only water packed tofu. Then Tomsun, their main competitor, started pasteurizing their water packed tofu, which gave it a longer shelf life, and gave them a competitive advantage in supermarkets. Nasoya did not have enough space in their plant to install a pasteurization unit (the plant’s maximum output was 5,000 to 6,000 lb/day of tofu), nor the inclination to pasteurize. So they made a bold move, and in 1981 started vacuum packaging, using a \$55,000 Tiromat film machine. Their first tofu was vacuum packed in a clear film package, but within a month everyone told them to either change the film or take the product out of the produce case, because it looked terrible; it got beat up very badly. So they changed to a bottom film that was opaque white and a top film that was printed. Now you couldn’t see the product at all. They continued with this package for 5 years. But their were constant problems of every time with the machine, especially maintenance problems. There were forming problems and sealing problems. The machine was not designed to suck water through the vacuum pump, which it had to do. The vacuum squeezed the tofu, so that a 16 oz. cake was reduced to 15 oz. This was the biggest problem. The 1 oz shrinkage ate up all the company’s profit and led to many fines from underweight products in stores. Food inspectors would drain off the water and weigh only the tofu. Other disadvantages: You can’t make a soft tofu with vacuum packing. The lack of a rigid package to protect the product led to extensive damage during shipping. The shelf life (95% got 3 weeks if packaged cold) was not as long as Tiromat had said it would. The yellow whey gradually leeches out around the tofu and makes it look like a used condom (as produce buyers used to like to joke). If you make a lot of tofu, there is no time or space to soak the tofu overnight in water to preempt this yellow whey problem. If vacuum packaged tofu spoils or sours, it does not necessarily puff or swell like water pack (the spoilage bacteria are different), so there is no easy way to tell it is spoiled. The vacuum packing worked better on the marinated broiled tofu and tofu burgers, but there were still problems with sealing. Nasoya ended up buying the machine

and they still have it—and would be glad to sell it.

When Nasoya installed its large, new Sato system from Japan (Feb. 1986), it also stopped vacuum packing and returned entirely to water packing. They still have the Tiromat machine and would be glad to sell it. Even if all of the technical problems of vacuum packaging were solved, John would still definitely prefer to sell water-packed tofu, for the reasons cited above. Address: President, Nasoya Foods, Leominster, Massachusetts. Phone: 508-537-0713.

2209. *Adventist Review (Hagerstown, Maryland)*. 1989. Granose Foods opens new factory: Growth from bakery to Britain's major health food manufacturer. Sept. 28. p. 20-21 (p. 1036-37).

• **Summary:** The brand new factory is at Newport Pagnell, Buckinghamshire, England—30 miles away from its former location at Stanborough Park, on the outskirts of London, near Watford, Hertfordshire. The founder is said to be J. Heide, who, a hundred years ago, came to London from Germany to start a new life. With help from his uncle, he became a master baker. He soon joined the small group of members of the Seventh-day Adventist Church. “In 1899 John Hyde (as he soon became known) was living over his bakery at 332 Portbellow Road in east London with his wife” and four children. He worked hard to make bread that tasted better and was fresher than anyone else. He and his brother delivered their loaves late at night or early in the morning.

“John soon learned about health foods and the church's teaching that God is honored in a healthy body as well as in a healthy mind and spirit. Samples from the Sanitarium Health Food Company in Battle Creek, Michigan, found their way to Britain, and in 1899, with the blessing of the church, John went to the United States to learn how to make the foods. He spent six months with Dr. John Harvey Kellogg, who was president of the medical college in Battle Creek, superintendent of the Battle Creek Sanitarium (with its health food company) and member of more than a dozen medical societies and associations,...

“Kellogg created the formula for a gluten biscuit. The Battle Creek Sanitarium Health Food Company also produced Granola, a cooked preparation of wheat and oats to be used as a breakfast food. Granose flakes, Granose biscuits, Protose, and Bromose were among their strangely named products.

“Imported know-how: John Hyde took the production know-how back to Britain, where he put it into operation. Adventists purchased a flour mill at Salford, near Redhill, Surrey, and formed the International Health Association Ltd. Hyde imported used plant equipment from Battle Creek and purchased other items locally.

“But the road to success was not to be easy. Before the advent of electricity, candles were used for lighting. This practice led to a fire that burned down the factory in 1900.

“In 1907 the association moved to Stanborough Park,

an idyllic 75-acre estate on the outskirts of London, near Watford, Hertfordshire. In 1926 it became Granose Foods Ltd.”

John Hyde, the baker, worked many years for Granose Foods. He eventually had 13 children—a baker's dozen. The name of each is given. “Almost all his children became employees of the Adventist Church.”

Why did the factory move? Over the years, the SDA church leadership sold off portions of the valuable estate surrounding the Granose food factory; as new houses were built, the factory became a “nonconforming user” in a residential zone. Income from a recent sale of 10 more acres at Stanborough Park helped to pay for the new plant and the 3 acres of land on which it was built.

A photo shows the ribbon-cutting ceremony on July 9. Present were: (1) “Eric Fehlburg, who coordinates the activities of 52 Adventist health food companies worldwide, with \$300 million in receipts, from church headquarters in Washington, D.C.” He believes that Granose has a bright future but believes that, since the 3 acres is already too small, Granose should purchase 20 acres somewhere else. Note: Why did they not buy more land on which to build the new factory? Apparently for lack of money. (2) Peter J. Archer, age 50, who left school at age 16 and got a job sweeping the yard for Granose. He has been the manager of Granose since 1984, and he and his team have turned the company around (after years of indifferent sales) and appear to be on a path of continuing growth. “Granose is my life,” says Archer. A small photo shows Archer and Fehlberg shaking hands.

Granose products include “Ravioli, Nuttolene, Vegecuts, Mock Duck, Burger Mix, Sausfry, Soya Wieners, a variety of soymilks, and more than 100 other products. The latest, Sweet Sensation, is a soy ice cream. With the assistance of De-Vau-Ge in Germany, Granose supplies a tremendous demand for nondairy products. The company sells 656,000 gallons (2.5 million liters) of soymilk a year. From the Nutana factory in Denmark, Granose imports and distributes five different packs of nondairy margarine containing oils, but no whey. Tue Westing and marketing manager Inge Kjeldal of Nutana were present at the opening.”

2210. Archer Daniels Midland Co. 1989. Annual report. P.O. Box 1470, Decatur, IL 62525. 33 p.

• **Summary:** Net sales for 1989 were \$7,929 million, up 16.6% over 1988. Net earnings for 1989 were \$424 million, up 20.1% over 1988. A full-page color photo (p. 6) shows soy sausages and soyburgers. A caption notes: “The soy foods operations of British Arkady last year sold enough frozen soyburgers, soy sausages and mixes to provide over 50 million servings.” Address: Decatur, Illinois.

2211. **Product Name:** [Tofu Line Chili Con Tofu].

**Foreign Name:** Tofu Line Chili Con Tofu.

**Manufacturer's Name:** Aros Sojaprodukter KB.

Distributed in Sweden exclusively by Nutana.

**Manufacturer's Address:** Bergsvägen 1, 190 63 Orsundsbro, Sweden. Phone: 0171-604-56.

**Date of Introduction:** 1989 September.

**Ingredients:** Incl. tofu & chili.

**Wt/Vol., Packaging, Price:** 500 gm.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Ted Nordquist of Aros in Sweden. 1990. May 18. This product was introduced in Sept. 1990. Starting about 2 years ago, all the company's products are sold under the "Tofu Line" brand.

Manufacturer's leaflet. 1990. At gott och må bra (Eat well and feel good). Shows color photos of the labels of the company's 5 main entrees (including this new one) plus natural tofu.

2212. **Product Name:** [Royal Tofu Entrees {Like Quenelles, Midway Between a Sausage and a Souffle; Canned} (Plain, with Mushroom Sauce, or with Shrimp Sauce)].

**Foreign Name:** Royales au Tofu (Nature, Sauce Champignons, Sauce Crevettes).

**Manufacturer's Name:** Innoval. Affiliate of Coopérative Agricole Silos de Valence.

**Manufacturer's Address:** 441 bis Avenue Victor Hugo, 26000 Valence, France. Phone: 75.44.01.61.

**Date of Introduction:** 1989 September.

**Ingredients:** Plain: 67% tofu\*, whole egg\*, palm oil (not hydrogenated), flour (mehl)\*, salt\*, vegetables. \* = Guaranteed organically grown.

**Wt/Vol., Packaging, Price:** 250 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Plain: Per 100 gm.: Calories 153, protein 8.1 gm, carbohydrate 5.8 gm, fat 10.4 gm.

**New Product–Documentation:** Note: This same product was previously made by Sojalpe. Manufacturer's brochure (full color). 1989. "Royales au Tofu. To vary your pleasures. Natural. Cuisine tasty and lean (Cuisine saveur. Cuisine minceur). Low in Calories. Discusses: The new gastronomy. The modern cuisine. Soya. Tofu. Les Royales au Tofu. These go nicely with tomato sauce, mushroom sauce, or with a sauce for fish or shellfish. Innoval: l'alimentation intelligente. The address given in the brochure is: C.C.V., BP 49–Quartier Grangeneuve–26800 Portes-Lès Valence. Phone: 75.57.33.99. A color photo on the front shows 4 objects about the size and shape of small, yellowish potatoes, in a plate with an orange sauce, shrimp, and mushrooms.

Form filled out by Gilles Charriere of Innoval. 1989. Nov. Says that this product was launched by Innoval in Sept. 1989. His address is Innoval S.A., Allée Joule, Zone Industrial (Z.I.) des Auréats, B.P. 1418, 26014 Valence Cédex, France. Phone: 75.41.41.50. He notes that in Sept. 1987 the enterprise Innoval S.A. was created. In Sept. 1988 the personnel were installed at the location. In March 1989 they finished installing the machines for making soymilk and

tofu. In Sept. 1989 they launched their first products.

Photocopies of Labels for all 3 flavors. 1989. 9 by 4 inches. "Food preparation from soya. The taste of equilibrium." A color photo of the food, ready to serve, is on the front panel. On the back panel is an illustration (line drawing) of a large-busted "hip" looking girl in a low-cut swimsuit. Note that the word "tofu" appears only in the ingredients listing. The plain/natural variety goes well with tomato- or bechamel sauces.

2213. Liu, Fu-Kuang. 1989. Food uses of soybeans [in China]. In: E.W. Lusas, D.R. Erickson, and Wai-Kit Nip, eds. 1989. Food Uses of Whole Oil and Protein Seeds. Champaign-Urbana, IL: American Oil Chemists' Society. vii + 401 p. See p. 148-58. Chap. 10. Proceedings of the Short Course on Food Uses of Whole Oil and Protein Seeds held at Makaha, Hawaii, May 11-14, 1986. [7 ref]

• **Summary:** Contents: Introduction. Processing of tofu and soybean products: Manufacture of tofu and soybean products (tofu, bei ye {pressed tofu sheets}, su ji {vegetarian chicken, made from bai ye}, you-tofu {fried tofu}, tofu pi {yuba}, soybean sprouts {dou ya}).

Fermented soybean products: Soybean jiang (dou jiang in China or miso in Japan), fermented soybeans (touchi), tofu lu (fermented tofu). Discussion.

Tables show: (2) Comparison of the essential amino acid composition of soybean milk with cow and human milk. (3) Amino acid composition and nutritive value of various soybean fractions: Meal, hulls, milk, residue [okara], curd, whey protein. (4) Composition of soybean pressed tofu sheet and residue. The pressed tofu sheets contain 70.4% moisture, 17.55% protein (59.29% moisture on a dry weight basis), and 7.10% fat (24.32% fat on a dry weight basis). (5) Amino acid composition of defatted soybean, pressed tofu sheet and residue.

(6) Composition of tofu and tofu pi [yuba] (based on Watanabe 1969). (7) Vitamin content of soybean products: Immature bean [green vegetable soybean], mature bean [whole dry soybeans], sprouts, meal, flour, curd (tofu), milk, miso.

Figures show: (1) Flow sheet for manufacturing soybean curd [tofu]. Address: Wuxi Light Industry Inst., Wuxi, Jiangsu 214036, The Peoples' Republic of China.

2214. Shurtleff, William; Aoyagi, Akiko. comps. 1989. Bibliography of soy protein isolates, concentrates, and textured soy protein products: 2,528 references from 1883 to 1989, partially annotated. Lafayette, California: Soyfoods Center. 328 p. Subject/geographical index. Author/company index. Printed Sept. 8. 28 cm. [2528 ref]

• **Summary:** Although the Chinese had produced a type of isolated soy protein product (tofu) since the tenth century A.D., western research on the isolation of soy proteins began in Germany 1883, when Meissl and Boecker introduced

the terms soy casein and soy albumin. Similar work was published in 1898 by Osborne and Campbell at the Connecticut Agricultural Experiment Station in the USA. In 1903 Oscar Nagel of New York described in detail how he produced “soy casein” and discussed its potential applications as a commercial product. Since that time, the United States has been the world leader in soy protein research and production.

The world’s earliest known commercial food product made from isolated or concentrated soy protein was Albusoy, introduced in 1939 by the Soya Products Division of the Glidden Co. in Chicago. This was an enzyme-modified isolated soy protein product used as a whipping agent. Many of the earliest soy protein products were used like Albusoy in whipping applications. Soyco, launched in 1944 by Soybean Products Co. in Chicago, was a hydrolyzed soy protein whipping agent used as an egg white substitute. Rich’s Whip Topping, introduced in March 1945 by Rich Products Corporation in Buffalo, New York, was used as an alternate for whipped cream. In 1947 Archer Daniels Midland Co. introduced Nutriwhip, the Borden Company debuted Soyco, and Central Soya Co. launched Soy Albumen, all whipping agents.

In 1951 the first patent for spun soy protein fibers was issued to Robert Boyer, formerly a soy researcher at the Ford Motor Co. In 1952 the first soymilk based on soy protein isolate, Soyamel, was introduced by Worthington Foods. Isolates soon replaced soy flour in non-dairy infant formulas worldwide. In 1959 the first food-grade soy-protein concentrates were introduced by Griffith Laboratories.

The 1960s put modern soy protein products on the map. In 1960 the Boyer patent and its 1954 revision started the high-tech meat analog industry when Worthington Foods launched Fri-Chik, a meatless drumstick. In 1961 and 1966 conferences on soy protein foods were at the USDA Northern Regional Research Center in Peoria, Illinois. Many of the 276 attendees at the second conference were pioneers in the field. A major theme at both was that protein malnutrition was the world’s most widespread deficiency disease. In 1966 General Mills introduced Bac\*O’s, meatless fried bacon bits made from spun soy protein fiber. At a May 1968 Conference on Protein Rich Food Products from Oilseeds held by the USDA in New Orleans, Louisiana, oilseed proteins were increasingly seen as the answer to the “protein crisis.” Also that year International Action to Avert the Impending Protein Crisis, a United Nations publication, recommends soybeans as the single most promising protein source to close the “protein gap.” In Nov. 1969 General Mills launched its second bacon analog, Bac-o-Bits, this time made from textured soy flour. Frozen Bontrae meat analogs were sold to the foodservice trade. This pioneering work nationwide by one of America’s largest food companies indicated to the U.S. food industry that the time for soy protein foods of the future had arrived.

In 1971 Dr. K.K. Carroll at the University of Ontario, Canada, published the first modern study showing that even in fat-free diets, animal proteins raise serum cholesterol and soy proteins lower it. Many subsequent studies worldwide confirmed these important results.

During the 1970s soy protein products entered the mainstream. In Jan. 1970 W.T. Atkinson, assignor to the Archer Daniels Midland Co., was issued a key patent for a “Meat-like protein food product,” which was soon widely sold under the registered trademark TVP. In Feb. 1971 textured soy protein products were authorized for use as meat extenders in the U.S. National School Lunch program, opening up a huge potential new market for TVP type products. The amount of products used jumped from 8.5 million lb dry weight in 1971-72 to 87.5 million lb in 1976-77. Also in 1971 the Food Protein Council (renamed the Soy Protein Council in Dec. 1981) was established as a trade association for major soy protein manufacturers.

In March 1973, as meat prices skyrocketed, beef-soy blends containing 25% hydrated textured soy flour began to be introduced to U.S. supermarket chains, marketed for their lower price and higher nutritional value. Predictions of huge future markets (which failed to materialize) were published. In Nov. 1973 the first World Soy Protein Conference was held in Munich, Germany, attended by over 1,000 people from 45 countries. In late 1974 Miles Laboratories/Worthington Foods launched the Morningstar Farms line of meat analogs based on spun soy protein fiber nationwide at U.S. supermarkets. In Aug. 1975 Japan Vegetable Protein Food Association was founded to promote modern soy protein products, primarily soy protein isolates. In Oct. 1976 seminars on the use of soy protein for foods and meal for feeds were held in Moscow, sponsored jointly by three U.S. groups. More than 200 Soviet officials attended. In May 1978 The Keystone Conference on Soy Protein and Human Nutrition was held at Keystone Colorado. Sponsored by Ralston Purina Co., it presented a new view of soy protein quality. In Jan. 1978 the International Soya Protein Food Conference was held in Singapore; 400 people from 24 countries participated. And in Oct/Nov. 1978 the World Conference on Vegetable Food Proteins was held in Amsterdam, The Netherlands; More than 1,000 people attended.

In 1980 soy protein products were approved for use as a beef extender by the U.S. Armed Forces. That same year the World Conference on Soya Processing and Utilization was held in Acapulco, Mexico. In Aug. 1980 Archer Daniels Midland Co. entered the soy protein isolate market with its purchase of Central Soya’s isolate plant. Then in April 1985 Central Soya bought Griffith Laboratories’ line of protein products. And in Feb. 1986 Central Soya purchased the Staley protein line, including Mira-Tex, Procon, and Textured Procon brands. In July 1987 Ralston Purina Co. of St. Louis, Missouri, established Protein Technologies

International as a wholly-owned subsidiary to focus on sales of soy protein for food uses. The company's sales of soy protein products were \$139.8 million in 1986.

But during the 1980s the total market for soy protein products grew very slowly, if at all. In 1984 Dr. Walter Wolf of the USDA Northern Regional Research Center estimated U.S. production as follows: Soy protein concentrates 36,000 tonnes (metric tons), soy isolates 41,000 tonnes, textured soy flour 43,000 tonnes, and textured soy concentrates 4,000 tonnes. The segment showing greatest growth appeared to be that of soy protein isolates, of which Ralston Purina/Protein Technologies International in the largest manufacturer.

Still there is widespread hope that, with the growing concern over dietary cholesterol, the low cost of soy protein relative to meat protein, the inevitable widening of this cost gap in the years to come, and the increasingly positive consumer attitudes toward soy protein products shown in polls, the market for these products will soon begin to realize its long-forecast potential.

This is the most comprehensive bibliography ever published on modern soy protein products. It is also the single most current and useful source of information on this subject available today, since 53% of all references (and most of the current ones) contain a summary/abstract averaging 68 words in length.

One of more than 40 bibliographies on soybeans and soyfoods being published by the Soyfoods Center, it is based on historical principles, listing all known documents and commercial products in chronological order. Containing 37 different document types (both published and unpublished, including many original interviews and partial translations of Japanese and European works), it is a powerful tool for understanding the development of this subject and related products from its earliest beginnings to the present, worldwide.

Compiled one record at a time over a period of 15 years, each reference in this bibliography features (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation, month and issue of publication, and the first author's first name (if given).

It also includes details on 651 commercial soy products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to use the bibliography, a complete subject and geographical index, an author/company index, and a bibliometric analysis of the composition of the book (by language, document type, year, leading countries, states,

and related subjects) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

2215. **Product Name:** Tofu Jerky: Natural Hickory Smoked. **Manufacturer's Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer's Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1989 September.

**Ingredients:** Wildwood Dried Organic Tofu (organic soybeans grown in accordance with Section 26569.11 of the California Health and Safety Code, filtered water and nigari), marinade (water, wheat-free tamari, honey and garlic)

**Wt/Vol., Packaging, Price:** 1.25 oz.

**New Product–Documentation:** Talk with Jeremiah Ridenour. 1989. Sept. 18. The product was introduced this month and is now in 3 stores. Label sent by Billy Bramblett of Wildwood. 1990. 3 by 3.5 inches. Orange and black on white. “Complete vegetable protein. No preservatives. Cholesterol free.”

2216. Stromnes, Lonnie. 1989. New developments at White Wave (Interview). *SoyaScan Notes*. Oct. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In early August 1989 White Wave moved into their new plant in Boulder, Colorado, and started making soyfoods. During the move, many items were out of stock, and many still are. They kept the old plant for making ice cream (which they had discontinued, except for Tofruzen) and a soy yogurt. The Tofruzen company is having problems. Forthcoming new products will be their ice cream, Healthy

Links (a meatless breakfast sausage expected out in mid-October 1988) and the yogurt (expected out in March 1990). Address: White Wave, Inc., 14670 Doolittle Dr., San Leandro, California 94577.

2217. Lietzke, Ron. 1989. Worthington Foods sues to protect trademark. *Dispatch (Columbus, Ohio)*. Oct. 21. p. 8D. Business section.

• **Summary:** “Worthington Foods Inc. has filed a \$6 million lawsuit against Kellogg Co., alleging the Battle Creek, Michigan, company illegally is using its ‘Heartwise’ trademark for a new breakfast cereal.” Worthington contends it has used the term since 1987 to promote a line of cholesterol-free foods sold under Morningstar Farms brand. “Although it has not secured trademark status from the U.S. Patent and Trademark Office, Worthington Foods claims it under a common law provision that is based on its usage over the years, the court documents said...”

“Court documents filed by Kellogg said the company is spending \$40 million to market Heartwise cereal in the first year...”

“Heartwise cereal is being marketed by Kellogg for its reported ability to lower blood cholesterol levels because it contains a grain from India called psyllium.”

2218. Marrese, Anthony. 1989. Re: Soyfoods in France. Letter to William Shurtleff at Soyfoods Center, Oct. 28. 2 p. Handwritten. [Eng]

• **Summary:** The author conducted a soyfoods market study in France for William Shurtleff of Soyfoods Center, sending out forms which were filled out by 12 companies, visiting or interviewing 9 companies, and visiting 5 companies at the Diet Expo ‘89 held 21-23 Oct. 1989 in Paris. It seems like there are four types of companies working with soya in France:

1. Independents, both large and small, mainly in primary soymilk, tofu, or tempeh production, or in second generation burgers, smoked products, or desserts production, with either organic (biological) or non-organically grown products. Examples: Le Ferme du Jas, Innoval/Sojalpe, Société Soy, Le Bol en Bois / Tama / Daizou, La Maison du Tofu, Les 7 Marches, Boulangerie Artisanale des Maures, Odile Corbel & Dan Ludington [named Gaia Enterprises by Feb. 1992], Communauté de la Lix (United Macrobiotic Company), Tofu Kuehn.

2. Non-Independents owned by large companies or agricultural co-ops: Gerblé, Bonnetterre / Triballat, Sojadoc, Cacoja (C.A.C.), Renaitre.

3. Bean or cereal (agricultural) companies: Celnat.

4. Specialty manufacturers for the Asian-European (Japanese, Chinese, Korean, etc.) markets: Yamato.

“I had some very good talks with Bernard Sturup of Société Soy, the Bol en Bois people, Celnat, Bonnetterre, Gerblé and others. In general the market and usage seem

to be going nowhere but up and it is still in the very early stages of ‘real consumer’ type foods, not just health store specialties. Some French soybeans are used but a lot are imported... Real quantity information is not available since it is changing so fast (mainly in an upward direction and mostly with secondary processed products which use tofu or soya in them).” Address: c/o Terre Nouvelle, Eourres, 26560 Séderon, France. Phone: 92.65.10.95.

2219. Lukoskie, Luke. 1989. Where is the best place to sell tofu in supermarkets? (Interview). *SoyaScan Notes*. Oct. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Luke thinks that the best place to sell tofu in supermarkets is in the meat case, next to the hamburger (and tofu-hamburger blend), near the red meat—not in the deli/dairy case. Why? 1. Tofu needs human communication. The butcher is in much closer contact with the average customer than the head of the dairy or deli sections. The only comparable department is produce. 2. Red meat sales are falling. The department is in competition with other departments (dairy, produce, grocery), so they need new healthful products to help pick up sales. 3. The temperatures are the lowest in the store. 4. The people in the meat department are the most sensitive to the need for shelf rotation, good sanitation, etc. 5. One of the easiest ways to tell Americans how to use tofu is simply to mix some with hamburger.

None of Luke’s tofu is sold in any meat case. They once tried to get tofu burgers in there but they were not successful, but that may have had to do with the particular small chain where the experiment was tried. Island Spring got permission from Safeway to test market a hamburger-tofu blend in 5-pound chubs in the meat case, but they have not yet put the product together. Sausages made with a blend of meat (pork and/or beef) and tofu taste very good—much better than the meatless hot dogs which he strongly dislikes. He developed some premium products with organically grown beef and pork, lower cholesterol and sodium and saturated fats, no nitrates or nitrites. But the price was in the \$3-4/lb range, more than twice the typical price.

Most of Island Spring tofu is now sold in the produce section. If it were moved out, the result would definitely be negative for the company, at least in the short term. If that happened, Luke would work to have his tofu sold in the meat section. Safeway is the only chain in the northwest that sells tofu only in the dairy/deli case, near yogurt. Sales of Island Spring tofu at Safeway are now roughly one-fourth of what they were in the produce case 5 years ago, before the yersinia contamination incident. Dr. George Pigott [pronounced PAI-gut] wrote a letter to Safeway warning them that they faced serious health contamination problems of they left tofu in the produce department. Luke feels the main cause of the drop was the change of location to deli/dairy. Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

2220. Mizono, George; Mizono, Jack; Mizono, Bill; Mizono, George. 1989. History of Azumaya, America's largest tofu manufacturer (Interview). *SoyaScan Notes*. Oct. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Details on the date and place of Azumaya's founding are unclear. Nor is it known who coined the company name. The earliest known owner, in the 1920s or early 1930s in San Francisco, was a Mr. Teranishi. Jack Mizono, in talks with the wife of Mr. Teranishi's son, recalls her saying that Mr. Teranishi started Azumaya in the 1920s (probably in the early 1920s) in the San Francisco Bay Area. Then Mr. Teranishi moved the company to Stockton for a while, then his son took over and brought it back to San Francisco, probably in the early 1930s, to 1636 Post St. (between Buchanan and Laguna). (Note: There is no listing for Azumaya in any San Francisco or Stockton city directory prior to 1957). Mr. Teranishi then sold Azumaya to a Mr. Francis Sakamaki, who owned an import-export business and who bought it for a friend who had trouble finding a job. But the friend quit in 1936 because he couldn't take the long hours of hard work, so Mr. Sakamaki was stuck with the business, and put it up for sale.

George Mizono, the eldest of 4 Mizono brothers, had graduated from high school that year and had been working at a fish market for 6 months. In the midst of the Great Depression wages were low and jobs were scarce. George worked 12 hours a day and was paid \$35 a month, with only one Sunday off each month. His father, Saichi Mizono, who was retired and had a little money, advised: "If you're going to work that hard, you might as well work for yourself." So in Feb. 1937 his father bought Azumaya for \$2,500 on the condition that George would work hard at the business. According to George, his father gave the business to him and never meddled, although his parents did help with the daily work. Yet it was a family business, run to support the family. In Jan. 1937 George, now age 19, worked at Azumaya to learn his business then he actually took over ownership in February, and Mr. Sakamaki left. At that time there was one other Japanese tofu shop in San Francisco. Named Umino Tofu Co., it was located at 1613 Buchanan St. Jack Mizono, who was still in high school, helped before school and after school, and on weekends and holidays. Jack went to work for Azumaya when he graduated in June 1937, and George gave him a half interest in the business ownership.

During the first year Azumaya made about 150-200 cakes/day of tofu (each 20-24 oz.) in the 20 by 40 foot space. These were sold in bulk in cans for about \$0.05 per cake, delivered to Japanese grocery stores and restaurants. In the early days Azumaya guaranteed sale of their tofu within 24 hours. Any tofu that was left unsold at a store the next day, they would take back and make it into grilled tofu (yaki-dofu). In addition to the tofu, the company also made agé (deep-fried tofu puffs), ganmodoki (fried tofu

patties), konnyaku, ito konnyaku, and fresh udon noodles. The company was never a bakery (as San Francisco City Directories from 1957 say it was); at New Years the company did make green noodles.

In 1940 or 1941 the company moved into a rental building to 1606A Geary St. In 1942 Azumaya was forced to close since the entire family (both parents, 4 brothers, and 2 sisters, like most West Coast Japanese) was sent to an internment / detention camp during World War II. The Mizonos stored their tofu-making equipment in a government storage warehouse then went to the camp at Topaz, Utah, for 3 years. Other Japanese set up a tofu plant inside the camp; the Mizonos served as advisors. During the war, Jack K., John S. and Bill were drafted into the U.S. Army; George was rejected because of a heart defect. After being released in 1945, the Mizonos did not re-start Azumaya immediately. Most Japanese in the camps were afraid to leave the camps and to return to the Bay Area, so Azumaya had too few customers to sustain operations. George went to work for the phone company and as a welder. Jack got out of the army in Oct. 1946 and the company re-opened at their former location on Geary St. in early 1947. They had very little business, but they had to support the family. Jack had to hold a second job to support his family. George invented a hydraulic press to separate the soymilk from the okara; it was based on a hay press. Azumaya's first inroads into the Caucasian market was through the Berkeley Co-op system during the 1950s. Jack had a good friend, Mike Yoshimine, who worked for the co-op. He picked up the bulk tofu in oyster pails and took it to the co-op in his car.

In about 1957-60 Azumaya was forced to relocate because of the city's redevelopment plan of Japan Center. So they moved (without any relocation funds from the city) to 855 Golden Gate Ave., between Octavia and Goff, near City Hall. They bought the lot (25 by 125 feet) for about \$6,000, and built the first tofu plant that they owned. Bill Mizono, the youngest of the 4 Mizono brothers, and John, joined the company in about 1962; prior to that the company was too small and not busy enough to take him in and the Mizonos worked 14-16 hours a day. The company ownership was divided so that George and Jack each owned one-third, and the remaining one-third was split between Bill and John as an outright gift to them. A little after this time the company was incorporated for tax purposes. There was no issuance of stock. In the late 1960s, while still at Golden Gate (according to Jack's clear recollection) the company began packaging its tofu in individual containers. They were the first tofu company in northern California to do so (though Matsuda & Hinode had started packaging earlier in Los Angeles) and it proved to be the key to their subsequent growth. Jack bought an American-made packaging machine, a 4-flight conveyor, that cost about \$10,000 and did not work very well. It was very slow and labor intensive. 4 trays (containing tofu and

water) were put into a jig then covered with one sheet of plastic and put into the machine, which sealed on the plastic. The 4 packages were then cut apart manually and put into cardboard boxes. Most consumers, including the Berkeley Co-op, did not like the switch to packaged tofu, but store owners like it because it reduced handling (many retail store used to package their tofu in little deli cartons and affix a label and weight), raised profits, and was more sanitary.

While at Golden Gate, in about 1969, after they were packaging in the 4 trays, the Mizonos met Mr. Yamauchi, owner of Matsuda & Hinode Tofu Co in Los Angeles. While they were closed at New Year's they took a week vacation to Disneyland then stopped by to see Mr. Yamauchi's plant (which was much bigger than Azumaya) on the way back. With this visit, a long and mutually beneficial relationship began.

In the late 1960s the city changed the zoning at Golden Gate from industrial to residential. So Azumaya was again forced to move, but they were glad to get out of their cramped quarters into a much larger space. They purchased a lot (about 200 by 80 feet, partly hillside) at 95 Boutwell Street, using \$30,000 in city relocation funds. Then they borrowed \$100,000 and built a large, modern tofu plant (about 9,000 square feet). In 1969, when they moved in, annual gross sales were \$600,000. Jack went to Japan and bought modern tofu making equipment, which played a key role in Azumaya's growth. As a result of this advanced equipment, working time dropped to only 6 hours a day. So needing some new products to fill up their idle time and to help pay for the equipment, they added nama-agé (which Jack had first seen in Japan) and kinugoshi (silken tofu).

With key help from Mr. Yamauchi of Hinode Tofu Co. in Los Angeles, they also installed a modern tofu packaging system (developed by Mr. Yamauchi) using plastic trays made by Sealright in Los Angeles (Mr. Yamauchi had agreed to share his exclusive right to buy these trays with Azumaya) and Fabrikal in Kalamazoo, Michigan.

Azumaya also started to make Chinese-style noodles, wonton skins and eggroll skins, and reintroduced their udon (Japanese style noodles) which they had discontinued at Golden Gate Ave. due to limited demand. Other local companies made these Oriental foods but Azumaya was the first to package them, and packaging was the key to getting them into supermarkets. Now Azumaya had 2 lines of packaged products, and the pasta products and tofu both helped each other to gain entrance to supermarkets. Azumaya also started to make Chinese-style tofu (Cathay Tofu) to try to capture that market.

In 1973 there was a big meat shortage; meat prices skyrocketed between March and August. Azumaya set up a complete sales program—which Quong Hop & Co. quickly copied and then went after Azumaya's supermarket accounts. Bill Mizono stepped in to try to regain lost accounts. He developed new point of purchase materials using Azumaya's

first professionals: a marketing person, ad agency, and home economist. The result was that in 1973 Azumaya published recipes for using tofu to extend meat—Tofu Meat Loaf, Pork Tofu, Sukiyaki, and Sweet 'n Sour Tofu. Below each recipe name was the slogan: "Tofu- from the bean that thinks it's meat!" Matsuda & Hinode in Los Angeles co-sponsored the recipes. Then several weeks before Thanksgiving in 1973 Bill held a press luncheon at San Francisco's famous Bush Garden Restaurant. Forty media people attended, including people from TV channels 4, 5, and 7. Tofu immediately began to get extensive, positive media coverage as a good, inexpensive protein source and supplement to meat. Azumaya's tofu sales skyrocketed.

After the move to Boutwell, Japan Foods Corp. (JFC) was the first real distributor to Azumaya tofu. They took it mostly to smaller stores, but within about 6 months they got Azumaya into local Safeway stores—a huge break. Azumaya then got the Safeway Richmond warehouse account with 200 stores, then Lucky, then many different chains started to carry Azumaya tofu. JFC was cut out as a middleman in sales to supermarkets, though JFC still distributes Azumaya tofu to the Asian-American market. This Azumaya tofu was packed with water in plastic trays (made by Sealright), sealed with a printed film lid.

Packaging still remained a problem. In July 1975 Mr. Yamauchi (of Matsuda and Hinode) and Jack Mizono became partners in starting Airtight Container Inc. in Los Angeles. After about a year of unsuccessfully trying to make their own plastic trays (since supply from Sealright was unreliable, and Azumaya was required to order by the truckload far in advance), they got Merrill's Packaging in Burlingame, California, to start making these high density polyethylene trays in late 1976. Now Azumaya's packaging was matched to their production equipment.

In about 1977-79 George retired; he sold his ownership to the other 3 brothers. In 1977 annual gross sales reached \$1 million. During the 1980s the American concern with cholesterol and better diets further expanded Azumaya sales. Francisco on 2.5 acres of land. In about 1976-80 the company began to sell tofu outside of California, first in Oregon and Washington, then back to the East Coast. In Oct. 1979 Azumaya moved into a much larger, new plant (about 44,000 square feet or 5 times as big) at 1575 Burke Ave. in San Francisco. Tofu production rose from 110,000 lb/week in 1982, to 122,000 lb/week in 1984, and 150,000 lb/week in 1987.

What are the main factors that transformed Azumaya from a tiny Japanese tofu shop into the largest tofu manufacturer in the Western world? The location in California. The early start. The early move to individual packaging. The 1973 meat shortage which gave tofu new publicity. The early entrance into supermarket chains. The rise of health/cholesterol consciousness in the USA. Address: 1&3. San Francisco, California (retired); 2. President,

Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 1. 415-343-8100; 2. 415-221-4470; 3. 415-285-8500.

2221. **Product Name:** Tofu Burgers, Teriyaki Burgers, Miso Burgers, Tofu Nuggets [Plain, or Barbeque].

**Manufacturer's Name:** La Soyarie.

**Manufacturer's Address:** 25 rue St. Etienne, Hull, QUE, J8X 1H5, Canada. Phone: 613-235-5356.

**Date of Introduction:** 1989 October.

**Ingredients:** Incl. tofu, soy sauce.

**How Stored:** Refrigerated.

**New Product–Documentation:** Soya Bluebook. 1989. p. 102-03. Contact: Koichi Watanabe, President.

SoyaCow Newsletter. 1994. July/Sept. Mr. Koichi Watanabe is president of La Soyarie in Hull, Quebec.

2222. Leatherhead Food Research Assoc. 1989.

Vegetarianism and the consumer: Implications for the UK food industry. Leatherhead Food Research Assoc., Randalls Rd., Leatherhead, Surrey, England. vi + 118 p. Oct. No index. 30 cm. Price: £2,700. [2 ref]

• **Summary:** Contents: Foreword. List of 27 tables. List of 16 figures. Management summary. 1. Introduction: Scope of the research, aims, objectives, research method. 2. Profile of consumers reducing / excluding meat / meat and fish from their diet: Definitions, levels of reduction/exclusion of meat/meat and fish consumption, demographic profile, length of time following current eating pattern. 3. Reasons for reduction/exclusion of meat consumption: Summary of reasons for change amongst adults, reasons for change by demographic profile of adult consumers, summary of reasons for change amongst children, reasons for change by eating pattern of consumers. 4. Future potential of vegetarianism and reduced meat consumption: Consumer intentions, reasons for change. 5. Implications for food consumption habits of the exclusion of/reduction in meat and fish consumption: Changes made to in-home consumption patterns by consumers avoiding meat completely, changes made to in-home consumption patterns by consumers reducing consumption of meat, changes made to out-of-home food consumption patterns by consumers avoiding meat, changes made to out-of-home food consumption patterns by consumers who had reduced meat consumption. 6. Trends in consumption of meat and fish: Introduction, meat, fish. 7. Trends in consumption of meat and fish alternatives: Introduction, vegetables, salad and fruit, alternative protein sources, animal-derivative-free products, overview of vegetarian product introductions to the UK, development of vegetarian products within the catering market, development of novel vegetarian products worldwide. 8. Consumer purchasing criteria for vegetarian food: Introduction, distinctiveness of product, retailer and manufacturer preferences, level of healthy eating concern, level of

reaction to food 'scares', level of environmental concern. 9. Conclusions.

In the section on "Alternative protein sources" the subsection on "Meat imitations" states that Realeat Vegebangers, Cauldron Foods Tofu Burgers, Granose Soya Franks and Spicy Links, Protoveg Sosmix, Direct Foods Smokey Snaps, Marks & Spencer Vegetable Cutlets are all on the market (p. 72). Realeat was the pioneer in introducing vegetable burgers (Vegeburgers) and frozen burgers to the health-food trade; they were introduced to supermarkets in about 1986/87. The Vegeburger brand, now owned by Haldane Foods, includes Cheese Vegeburger, Vegebangers, and ready meals. Companies that have introduced vegetable burgers in the last four years include Direct Foods, Vegetarian Feasts, Granose Foods, Tivall, Cauldron Foods, Booker Health Foods, Brewhurst, The Dietburger Company, Realeat, Birds Eye Walls, and supermarket brands. In 1987 Cauldron Foods launched a range of three varieties of tofu burger in vacuum packs; cheeseburgers were launched by both Realeat and The Dietburger Company. In April 1988 Birds Eye Walls launched its Steakhouse vegetable burger and Granose Foods launched four varieties of frozen burgers, incl. Soya & Mushroom, and Nut & Sesame varieties. Tesco introduced a vegetarian burger under its own brand; it was made by Tivall from soya and wheat. In 1989 Realeat (Haldane Foods) introduced a microwaveable Quarter Pounder Burger. In 1985 Granose Foods launched Soya Franks, a meatless sausage. Realeat launched Vegebanger, which includes soya. In 1986 Direct Foods launched a soya-based Sausage Slice and Tivall introduced vegetable protein sausages. In 1987 The Dietburger Company launched an all-vegetable frozen dietbanger and Granose Foods launched Vegetarian Spicy Links. In 1988 Goodlife Whole Foods launched Herb Bean Bangers and Spicy Bean Bangers; Buss Foods introduced a vegetarian sausage, Realeat introduced a frozen Vegebanger, and Granose Foods added a vegetarian sausage to its Wholefoods Kitchen range (p. 76). Address: Leatherhead, Surrey, England.

2223. **Product Name:** Lightlife American Grill (Vegetarian Tempeh Burger).

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 413-774-6001.

**Date of Introduction:** 1989 October.

**New Product–Documentation:** This product is similar to their original tempeh burger, but it has been renamed and the ingredients changed slightly.

Talk with Michael Cohen. 1991. Sept. 17. This tempeh burger has a regular hamburger-like flavor. It is marinated.

2224. **Product Name:** Nature's Patties [Original, or B.B.Q.].

**Manufacturer's Name:** Nature's Path Foods Inc.

**Manufacturer's Address:** 170-2540 Simpson Rd., Richmond, BC, V6X 2P9, Canada. Phone: 604-278-2923.

**Date of Introduction:** 1989 October.

**New Product–Documentation:** Soya Bluebook. 1989. p. 103. Contact: Arran Stephens, President [formerly founder and president of Lifestream, a natural foods distributor in Canada].

2225. Demos, Steve. 1989. White Wave's strategy for marketing soyfoods in America as cholesterol-free protein foods (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** "White Wave welcomes the movement of tofu, a potentially hazardous food, out of the produce case. I think we are positioned and prepared as well as we possibly could be for this kind of change. This is what we've been waiting for! Years ago, White Wave designed its boxed, vacuum-packed tofu with a 60 day shelf life to sell in the dairy case. The disruption of an existing habit pattern opens up to opportunities for innovative companies." Demos does not see, even in the short term, any major loss of sales. At least 2/3 of White Wave's tofu is already out of the produce case and into either the dairy case or temperature controlled cases. He feels the best place to sell tofu is next to yogurt, ideally between yogurt and the deli meats in the dairy/deli case. White Wave conceives of itself as selling a new category of foods, "cholesterol free protein foods." This category should be well defined unto itself. Eventually Demos would like to see this heart/smart concept evolve into the "soyfoods section." Since signs identifying sections are generally not allowed in supermarket cases, the section/category might be partitioned off with plastic dividers at each end, like the Pillsbury Doughboy category. King Soopers has already pioneered this idea, starting in about 1983, putting tofu between the yogurt and the milk (with no plastic dividers), on the basis of the demographics, then building the concept by adding other soyfoods and soymilk. But tempeh, a slow mover, is now in the frozen foods case, and the meatlike products (such as hot dogs) are next to Armour in the deli meats.

Safeway seems to have made a top level decision to aggressively promote soyfoods. This year they called White Wave and said, "We don't know what you make, but give us everything. Then in August, in their two largest new classy "Safeway Marketplaces" in Boulder (and maybe in a few newer or college-oriented stores in Denver), entirely on their own initiative, they installed temperature controlled end-aisle cases at the end of the produce section facing the cash registers. The location is very prominent—an impulse location. Each case has the word "Tofu" in large letters on it. Many different types of soyfoods (and nothing but soyfoods) are sold in these cases—tofu, tofu dressings, tofu hot dogs, soy cheeses, Stir Fruity (soy-based yogurt), etc. All White Wave soyfood products in these 2 stores are sold

in the Tofu case. Demos feels that "Tofu" this is the best title for the case. Also the "Approved by Healthmark" with the Healthmark logo on each display case identifies these as healthy foods. Only foods that are low in cholesterol, fat, and sodium get the Healthmark. Each case, constructed like an open dairy case, 5 feet wide by 6 feet high, has a temperature range of about 35-40°. Demos would definitely prefer to have his products sold in these cases rather than any other location in the store. White Wave's main strategy is to "identify a category," and to group foods in that category together. Again, the current category definition is cholesterol-free protein foods, but the long term goal is to have the category defined as "soyfoods." It is too early to say how the new isolated cases are affecting sales, but preliminary signs all look very positive.

White Wave started pasteurizing its tofu in Dec. 1988. Since then they have not had a single complaint of spoilage or sourness. Pasteurization does effect the tofu texture, making it firmer, but it also makes tofu much more profitable. White Wave makes both a 16 ounce vacuum packed and a 10-ounce single serve water-pack tofu. He prefers the vacuum pack and has worked the bugs out of his Tiromat so that it is no longer a significant source of problems. Tree of Life on the East Coast sells un-boxed vacuum-packed White Wave tofu very successfully, but Demos strongly prefers to box it. He has a whole new tofu plant at his new facility with automatic cooking and curdling, conveyORIZED press tables and pasteurization.

Concerning the competition: Demos compliments Morinaga on a brilliant strategy. The net result is to help in the Americanization of tofu by identifying it clearly as a protein food and therefore forcing it out of the produce case. The irony is that when the dust settles, Mori-Nu Tofu may be the only brand left in what becomes an outdated, foreign location—with the oriental vegetables instead of with the protein foods. Azumaya and Hinode are rooted in the produce distribution network. Getting kicked out of the produce section will be very hard on them and their reaction will probably be to fight it rather than use it to their advantage. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3485.

2226. Lietzke, Ron. 1989. Hospital has a heart-to-heart. Cereal maker to promote Riverside's health messages. *Dispatch (Columbus, Ohio)*. Nov. 2. p. 2G. Business section.

• **Summary:** The Riverside Methodist Hospitals group in Columbus, Ohio, owns the registered service mark "Heartwise," and has used it for years to promote a variety of programs on how to reduce the risk of heart disease. Now the Kellogg Co. in Battle Creek, Michigan, is spending \$40 million to launch Heartwise breakfast cereal, which has a high soluble fiber content from a grain component called psyllium. Kellogg has agreed to print the hospital's health messages on millions of its boxes.

“Worthington Foods, a producer of soy-based foods and meat substitutes, has filed a \$6 million lawsuit against Kellogg, alleging the cereal maker is illegally using the ‘Heartwise’ trademark. Worthington Foods has used it since 1987 to promote a line of cholesterol-free foods sold under the Morningstar Farms label.

“Our dispute is with a cereal company, Kellogg, and is not with our good neighbor, Riverside Hospital,” Worthington Foods President Dale E. Twomley said yesterday.” However Worthington and the Riverside hospital group have been at odds over use of the trademark.

2227. Rivera, Esther. 1989. La Loma Foods, formerly Loma Linda Foods, purchased by Worthington Foods (Interview). *SoyaScan Notes*. Nov. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The General Conference (GC) had accepted the offer by Dr. Martin, who had a given period to come up with the funds and finalize the deal. He was unable to raise the full amount. He asked for an extension but the GC didn’t grant him any more time. So the bidding was opened again. The second bidder didn’t change his bid, but Worthington Foods came up with a new proposal for all cash up front. The GC accepted Worthington’s bid. So on 10 Dec. 1989 La Loma will become Worthington’s property. On Dec. 8 the La Loma office in Riverside will close. Their contract with Nutricia expired on Aug. 31. On Dec. 11, Worthington begins their contract with Nutricia, which is making the products now. Nutricia owns both the Riverside and the Mt. Vernon plants. Basically Worthington purchased the food equipment, the product formulas and trademarks, and the potential accounts. The big question is how many of the former Loma Linda products Worthington will be discontinued, since Worthington has many very similar products. La Loma has many concerned consumers and distributors. What will happen to their “Labels for Learning” program? And their archives? They are scheduled to meet with Worthington marketing people on Dec. 20. Worthington or the GC will probably do a news release. Elder Wm. Murriel (pron MUR-ul) at the GC (phone: 301-680-6000) is chairman of board of La Loma. Address: La Loma Foods, Riverside, California.

2228. Bennett, Kathryn O. 1989. Col. Sanchez traditional foods cookbook. Col. Sanchez Foods, P.O. Box 5015, Santa Monica, CA 90405. 124 p. Index. 24 x 23 cm.

• **Summary:** Contains numerous tofu recipes: Patti’s blended tofu salad dressing (p. 47). Tofu bran muffins #1 and #2 (p. 76-77). Meat loaf (with tofu, p. 97). Curried tofu (p. 98). Judy Tarbet’s buckwheat tofu burgers (p. 100). Tofu cheesecake cookies (p. 107). Rice pudding (with tofu, p. 108). Tofu nut cookies (p. 109). Soy whipped cream (p. 110). Tofu cheesecake (p. 115).

Kathryn Bennett was born in Texas and raised in New Mexico. While in New Mexico, she developed a deep

interest in the Indian people. She obtained a Naturopathic degree and is involved in wholistic counseling. She has operated a natural food business in Los Angeles for the past 10 years. Address: Santa Monica, California. Phone: 213-204-1137.

2229. Goldbeck, Nikki. 1989. American Wholefoods Cuisine. Bird lives: Seitan instead of turkey. *True Food (Woodstock, New York)* 2(3):4-5.

• **Summary:** Seitan is made from gluten, the same elastic-like protein that allows bread to rise. “Its meat-like appearance and texture make it suitable for cutlets, roasts, casseroles, stews, and similar preparations. Our first exposure to seitan was during the early 1980s while in Hong Kong. There, numerous vegetarian restaurants, based on the former traditions of the Chinese Buddhist monks, serve mock beef, pork, chicken and duck, all based on gluten. Often these items are indistinguishable from meat.”

The Goldbecks next encountered seitan in early 1989 (see *True Food*, Vol. 2, No. 2) when they dined on delectable California Seitan at the Unicorn Restaurant in Miami, Florida. Though seitan is high in protein (10%) and relatively low in fat, and in calories (118/100 gm), the quality of that protein is lower than that of many other vegetarian sources such as tofu, tempeh, and legumes. Soymilk or cashews can be used to make an excellent gravy.

Describes how to make kofu (raw gluten dough from 10 cups whole wheat flour) and seitan at home. The broth contains 6 cups water, ¼ to 1/3 cup soy sauce, 4-inch strip kombu seaweed, 4 thin slices of fresh gingerroot (optional), 2 cloves garlic (optional), pepper, thyme, sage, oregano, or other herbs and spices (optional). Gives recipes for: California Seitan (adapted from the Unicorn Restaurant). Brown sauce (with soy sauce). Seitan sauté. Mushroom gravy. Cashew gravy.

2230. **Product Name:** [Deep-fried Tempeh Coins].

**Foreign Name:** Tempeh Taler.

**Manufacturer’s Name:** Life Food GmbH.

**Manufacturer’s Address:** Robert-Bunsen-Strasse 6, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.

**Date of Introduction:** 1989 November.

**New Product–Documentation:** Talk with Klaus Kempff.

1990. May 9. The tempeh is made in sausage skins. The resulting tempeh sausages are sliced into rounds, cold marinated, then deep-fried, and sold 2 pieces at a time. It was first developed in May 1989, but really launched in Nov. 1989, with a brochure. The product is delicious, and has become the company’s best-selling tempeh product.

2231. Tardosky, Cathy C. 1989. Soyfoods entrees: Nutrition for the ‘90s. *Whole Foods*. Nov. p. 48-53.

• **Summary:** Lists (with photos) many second generation soyfood products. Retailers say that demand for soyfoods

is on the rise. Many store owners are quoted, speaking very positively of the category. Worthington Foods is now in its 50th year of vegetarian food production, with a total of 45 different entrees under the Worthington and Natural Touch labels. “The Natural Touch line was developed in the early 1980s as the interest in products went more toward the natural segment of the market.”

2232. Tofu Shop (The). 1989. This holiday season, make it Tofu Turkey (Leaflet). Arcata, California. 1 p. Front and back. 22 x 14 cm.

• **Summary:** Typeset, green on tan, with four illustrations. Identical to the 1988 leaflet / sell sheet, except for the colors. Address: 768 18th St., Arcata, California.

2233. **Product Name:** [Soy and Vegetable Burgers, Tofu and Millet Burgers].

**Manufacturer’s Name:** La Sojeria, S.C.

**Manufacturer’s Address:** Carretera de Vic Km. 30, 08180 Moia (near Barcelona), Spain. Phone: (93) 830 1123.

**Date of Introduction:** 1989 December.

**Wt/Vol., Packaging, Price:** Vacuum packed in plastic bags.

**New Product–Documentation:** Letter from Javier Arocena of Zuaizto, Spain. 1992. Dec. 14. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

Form filled out by Laura Cami and Mario Rimoldi of La Sojeria. 1993. Feb. 13. Their company introduced these products in Dec. 1989. The burgers are sold in vacuum-packed plastic bags.

2234. Marrese, Anthony. 1989. Re: Visit to Tofu Manufaktur Christian Nagel GmbH in Hamburg, Germany. Letter to William Shurtleff at Soyfoods Center, Dec. 2 p. plus many attachments. Handwritten. [Eng]

• **Summary:** Company name and address: Tofu Manufaktur Christian Nagel GmbH, Osdorfer Landstrasse 4, 2000 Hamburg 52, Germany. Phone: (040) 89 49 37.

“Founder and owner: Christian Nagel.

“History: Christian started making tofu in a small garden in a community kitchen in Holland about 7 years ago. When he needed money to support his family, the decision was made to move to Hamburg & he had a strong ‘impression’ he must make tofu. He contacted a man who was listed as a tofu maker, in order to work for him. The man had purchased all the equipment but never started. So Christian bought the equipment from the man and started making tofu 5½ years ago. The company grew slowly for a couple of years and then began to expand. Christian attributed this expansion to the Chernobyl nuclear disaster in the Ukraine (26 April 1986), and the people’s desire for safe food. Christian is again searching for more space in which to make tofu. He has 7 full-time and 4 part-time employees. The people are macrobiotic and have long associations—about 10 years.

Products not purchased (a label for each is enclosed):

1. Tofu-Brottaufstrich (Spread for bread, in a jar; 180 gm; in 3 flavors: Paprika, Räucher [Smoked], Kräuter [Herbs]).
2. Tofu: Plain, with Herbs, Smoked. 3. Burgers, rolls. 4. Tempeh. 5. Seitan.

Marrese encloses a progression of four tofu labels, over 5½ years; the oldest on the top left and the current one on the lower right.

Products purchased (#59) Tofu-Alge. Very good; the way I like it.

Product literature: 1. *Tofu Werkstatt* (leaflet, black ink on yellow, 2 panels each side, mentions *The Book of Tofu*). 2. Tofu Nagel (leaflet, black ink on gray, 2 panels each side). 3. Tofu postcard, 10.5 x 15 cm, single sided.

Notes: (1) The Soja plant symbol used on the above literature is the basic symbol on their product labels. (2) Similar company to Taifun (No. 31). (3) Christian sent information to the Soyfoods Center about 1-2 years ago but I have some of the new “stuff.” (4) Christian is quite active in the ten or so member “Tofu Section” of the *Naturkost* (“Natural Food”) committees and professional work.

Products and production: Tofu (Plain, Smoked, Herbs, with Seaweed), 5½ years. Total production: 1,500 to 2,000 kg per week.

Burgers (*Happen*), 5½ years. Tofu, Grünkern-Tofu Total production: about 3,000 per week.

Kroketten (Croquettes), 2 years. Production small: 100s per week.

Spring Rolls, production small.

Tempeh 5½ years. Production small, 50 kg per week.

Spread for Bread (*Tofu-Brottaufstrich*). Purchased from Tofurei Albert Hess and their label is applied. This is in order to have the product available because of competition and the friendly relationship between Christian and Albert. New product.

Equipment notes: Meat grinder for grinding soaked soybeans. Converted butter churn to separate milk and okara. Milk pasteurizer to cook milk (At present after milk and okara separation) which is causing relatively low yields of 1.7 kg tofu per kg of soybeans. 70 kg tofu tubs which are divided into five x 12 kg pressed slabs. Automatic press for burgers (capacity up to 3,000 per day). Smoke oven.

Okara: Is given away to farmers.

Whey: Is used to warm the water to grind the soybeans. Other products: Seitan. Address: Germany.

2235. Tofu-Manufaktur Christian Nagel GmbH. 1989. Nagel’s Tofu [Nagel’s Tofu (Leaflet)]. Hamburg, Germany. 2 panels each side. Each panel: 21 x 14.8 cm. Undated. [Ger]

• **Summary:** Printed black on bluish-gray paper. At top of front panel, back soybean plant and “Nagel’s Tofu.” Plus the company address and phone number.

Contents: Introduction. The many benefits of tofu: Rich in high-quality protein, excellent for protein

complementarity, low in calories, free of cholesterol, rich in vitamins and minerals, easily digestible, extremely versatile in the kitchen.

A table shows the nutritional composition of tofu, soymilk, fried tofu, grilled tofu, okara, and vegetable tofu (*ganmodoki*). Ideas for cooking with tofu (recipe ideas). Use of tofu as a medicine (tofu plaster). Tofu as a possible solution to the world food problem; the protein yield of different foods and animals from 1 hectare of land. Soybeans are #1 and meat gives the lowest yield. References (2).

Note: An earlier edition of this leaflet was printed (black on yellow) in about 1984 or 1985. Address: Osdorfer Landstrasse 4, 2000 Hamburg 52, Germany. Phone: 89 49 37.

**2236. Product Name:** Meatless Healthy Links (Tofu Breakfast Sausages).

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 1990 North 57th Court, Boulder, CO 80301.

**Date of Introduction:** 1989 December.

**New Product–Documentation:** Talk with Steve Demos. 1989. May 13. This product will be officially launched in Sept. Talk with Steve Demos. 1989. Nov. 1. The term Links need not be approved by the FDA. Anyone can use the term. The product is not yet out, nor has it been in any interstate sales yet. It is made in Denver. It should be out soon, probably by mid-December.

**2237. Product Name:** [Formoja Tofu Lasagna].

**Foreign Name:** Formoja Lasagne au tofu.

**Manufacturer's Name:** Cacoja. Affiliate of Coopérative Agricole de Colmar (CAC) (Marketer).

**Manufacturer's Address:** 8 rue Merxheim, 68500 Issenheim, France.

**Date of Introduction:** 1989.

**Wt/Vol., Packaging, Price:** 300 gm tins (cans).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 100 gm.: Calories 97.5, protein 5 gm, fat 1.5 gm, carbohydrate 16 gm.

**New Product–Documentation:** Paul Tjomb. 1990. RIA (Revue des Industries Agro-Alimentaires) No. 443. 14 May to 5 June. "Le pâté nouveau est arrivé: Ingrédients, soja." A large part of its activity is devoted to developing convenience prepared foods (plats cuisinés) which contain an average of 20% soya. The company also offers quenelles (like sausages), ravioli, and lasagne which are distributed fresh with a shelf life of 3 weeks.

Letter and Label sent by Sylvain Stievenard of Sojinal (named Cacoja prior to Aug. 1990). 1990. Sept. 24. This product was introduced in 1989.

**2238. Product Name:** Tofuloni (Meatless Sliced Tofu Sausage) [Country, or Spicy].

**Manufacturer's Name:** Cauldron Foods Ltd.

**Manufacturer's Address:** 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.

2255. Simpson, J.A.; Weiner, E.S.C. 1989. The Oxford English dictionary. 2nd ed.: Soya. Oxford, England: Clarendon Press. [10 ref]

• **Summary:** The earliest entry is in 1679 from John Locke's

*Journal* in Lord King's *The life of John Locke,...* (1830).

There are also attributive definitions and examples for soya flour (1930, 1951), soya meal (1968), soya milk (1977), soya oil (1917), soyaoil (1982), soyaburger (1953, 1974), soya link (1965), soya sausage (1971). Address: England.

2256. *The legacy of the Japanese in Hawaii: cuisine.* 1989. [Honolulu, Hawaii]: Japanese Cultural Center of Hawaii. 248 p. Illust. (some color). Index. 26 cm.

• **Summary:** A spiral bound book. "The simple elegance of Japanese cuisine sets it apart from other ethnic foods of Hawaii." It is a "culinary art."

"The first group of Japanese, the Gannen-Mono, came to Hawaii as laborers in 1868. The S.S. City of Tokio brought a group of 944 contracted laborers, Kanyaku Imin, on February 8, 1885; and by 1924, 220,000 workers had arrived to become residents of these islands. Thus began the legacy of Japanese in Hawaii" (p. 21).

One chapter, titled "Tofu ryori (Bean curd dishes)" (p. 177-92) contains the following recipes: *Hiya yakko* (Cold tofu, with "2 blocks 'kinu' tofu). *Arare tofu* (Fried tofu cubes). *Agedashi tofu* (Deep fried tofu). *Takigawa tofu* (Jellied tofu strips). *Soba dofu* (Buckwheat soybean curd). *Ken chu / Ken cho* (Meatless or shojin food). *Iri dofu* (Sauteed tofu). *Papaya chanpuru* (Tofu stir-fry with vegetables). *Moyashi chanpuru* (Tofu with bean sprouts). *Gan modoki / Hiryozu* (Deep fried tofu balls). Tofu loaf. Tofu patties. *Okara / Unohana iri* (Seasoned soybean lees [okara]). *Shira ae* (Vegetables with tofu dressing). *Yudofu* (Simmered soybean curd).

For kinako (roasted whole soy flour) see: Rice ball with kinako (variation of Ohagi, p. 230). *Kinako mochi* (variation of mochi, p. 232).

Other soy related recipes *Tori dango no teriyaki* (Teriyaki chicken dumpling, with shoyu, p. 41). *Ika no su-miso* (Squid with miso dip, p. 42). *Satsuma jiru* (Miso soup with pork and vegetables, p. 68-69). *Miso shiru* (Basic soybean paste soup, p. 70). *Sushi no gu* (Ingredients for sushi, incl. Koya-dofu {Dried bean curd} preparation, p. 93). *Inari zushi* (Cone sushi, with "12 aburage {deep fried tofu or bean curd}," p. 98). *Aburage mochi* (Fried bean curd with mochi, p. 115). *Oden* (Vegetables, seaweed & fishcake simmered in fish broth, with "3 aburage," p. 116). *Sukiyaki* (Meat & vegetables cooked in sauce, with "1 block tofu, cut in 1-inch cubes," p. 117). *Basic teriyaki sauce No. 1 & 2* (p. 127). *Niku no teriyaki* (Meat teriyaki, p. 127). *Shibi no misoyaki* (Tuna broiled with soy bean sauce, p. 132). *Tako no teriyaki* (Barbecue octopus, p. 134). *Tori no misoyaki* (Chicken with soybean paste, p. 137). *Stuffed miniature aburage* (Fried bean curd, p. 147). *Miso no ankake* (Soybean paste sauces, p. 149). *Kuromame* (Black soybeans, p. 151). *Hijiki to aburage no irini* (Stir-fried seaweed & fried bean curd, p. 153). *Butaniku miso ni* (Pork with miso, p. 154). *Aburage namasu* (Fried bean curd salad, p. 201). *Ingen no*

*miso ae* (String beans with miso dressing, p. 202). *Fudanso no shira ae* (Tofu & swiss chard salad, p. 202). *Kyuri no sumiso ae* (Cucumber with vinegar-miso sauce, p. 204). *Tofu salada* (Soybean curd salad, p. 205). *Misozuke* (Vegetables pickled in miso, p. 212). Address: Honolulu, Hawaii.

2257. *Vegan Restaurant (The).* 1989. New soyfoods restaurant or deli. 115 Baldwin Ave., Paia, Maui, Hawaii 96779.

• **Summary:** Talk with Michael Klaper. 1990. Feb. Gentle World has recently opened this vegan restaurant on Maui. Menu sent by Jeanie Greenbaum of Gentle World in Alachua, Florida. 1991. March 13. The restaurant is now open for dinner only. Soyfoods on the menu include: Tofu eggless salad. Tofu eggless salad sandwich. The vegan burger (with seitan and tempeh). Entrees (\$5.95 to \$6.95): Lasagna tofucci. Tofu loaf. Lemon broiled tempeh with scalloped potatoes. Side orders: Tofu roll (with broccoli, onions and seasonings, wrapped and baked). Crispy tofu chunks. Desserts: Rice Dream Sundae. Assorted Barat Tofu Chocolates. Smoothies: Float with a scoop of Rice Dream. Address: Paia, Maui, Hawaii. Phone: 808-579-9144.

2258. *Good Food News (Nutrition Education Service, Sanitarium Health Food Company, Australia).* 1989-- . Serial/periodical. New South Wales, Australia: Sanitarium Health Food Co. Frequency: Quarterly.

• **Summary:** Contains information about healthy (largely vegetarian) eating, with recipes that use products made by Sanitarium Health Food Co. The format changed in Sept. 1997 (vol. 9, no. 3) by adding 2 more pages and including a "New Products" section.

Some new soy products and the dates mentioned: Sept. 1997–Crispy Nuggets, Country Burgers, Seafarers Patties, Potato Pockets. 2265. **Product Name:** [Estea Reform Soya Bolognese: Soy Protein in Tomato Sauce].

**Foreign Name:** Estea Reform Soja à la Bolognese: Soja-Eiweiss in Tomatensauce.

**Manufacturer’s Name:** Dr. med. Schneider GmbH.

**Manufacturer’s Address:** Postfach 13 22 15, D-2000 Hamburg 13, West Germany.

**Date of Introduction:** 1989?

**Ingredients:** Tomato paste, water, textured soy protein (texturiertes Soya-eiweiss), onions, Parmesan cheese, soy oil, salt, spices, seasonings, starch, carob seed flour and guar seed flour as thickeners.

**Wt/Vol., Packaging, Price:** 400 gm can. Retail for DM 7.60.

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 100 gm.: Protein 11 gm, fat 4 gm, usable carbohydrates 11 gm, calories 123. 1 BE (Broteinheit, or diabetic exchange) = 108 gm.

**New Product–Documentation:** Label sent by Anthony Marrese. 1990. Jan. 9 by 4 inches. Light green red, yellow, and white on pea green. “This product is suited for everyone, especially those who are busy with their occupation because it can be prepared quickly. Simply warm the contents of the can and, if desired, thin with 300 ml water, milk, or cream.”

2266. **Product Name:** [Eden Soya Chopped Steak, Soya Fricassee, Soya Goulash, Koenigsberg-Style Soya Meatballs, Little Soya Balls].

**Foreign Name:** Eden Soja-Hacksteak, Soja-Frikassee, Soja-Gulasch, Koenigsberger Soja-Klopse, Soja-Baellchen.

**Manufacturer's Name:** Eden-Waren.

**Manufacturer's Address:** P.O. Box 1229, 6232 Bad Soden/Taunus, West Germany.

**Date of Introduction:** 1989?

**Ingredients:** Soja-Klopse: Water, onions, soy protein product, vegetable oil, whole egg, whipped cream, capers, gluten-free fine bread crumbs (*Paniermehl*), starch, milk protein [casein], lemon juice, fruit sugar (fructose), sea salt, seasonings, plant-based stabilizers (guar seed flour, carob seed flour), milk sugar (lactose), vegetable fat (*Pflanzenfett*), spices.

**Wt/Vol., Packaging, Price:** 300 gm paperboard box. Retail for DM 4.95.

**New Product–Documentation:** Manufacturer's leaflet. 1989. "Eden Soja-Gerichte (Eden Soya Dishes). A color photo on one panel shows and describes six of these boxed entrees; one, the Soja-Ragout, is described in a separate record. Eden Soya Chopped Steak comes with carrots, peas, and corn in a piquant sauce with onions, tomatoes, and herbs. Soya Fricassee contains asparagus, peas, and carrots nicely rounded in flavor with white wine, lemon, and seasonings.

Soya Goulash comes with paprika, onions, and tomatoes in a creamy, spicy sauce. Koenigsberg-Style Soya Meatballs are set in a classic caper sauce, with cream, seasonings, and lemon juice. Little Soya Balls come with tomatoes, onions, paprika, and young kidney beans in a hearty sauce with lots of herbs and seasonings. The back of the leaflet is titled "Delicious serving ideas for your meatless days." A photo shows each entree served on a dish, with the recipe and nutritional information. "Meatless dishes—Healthful and nutritious from Eden." Neufarm certification symbol.

"Naturally in Reformhaus/-Depot."

Note: This company also sells a line of canned and bottled vegetable juices and soups for use in their fasting programs. Low-fat quark (*Magerquark*) is also used during fasts.

Note: *Webster's Dictionary* defines fricassee (a term first used in 1586) as "a dish of cut-up pieces of meat (as chicken or veal) stewed in stock and served in a white sauce."

Label for Soja-Klopse sent by Heather Paine of SoyaFoods in London. 1993. Nov.

2267. **Product Name:** [Eden Soya Ragout {Meatless}].

**Foreign Name:** Eden Soja-Ragout {Ohne Fleisch}.

**Manufacturer's Name:** Eden-Waren.

**Manufacturer's Address:** P.O. Box 1229, 6232 Bad Soden/Taunus, West Germany.

**Date of Introduction:** 1989?

**Ingredients:** Water, soy protein product (Sojaeiweisserzeugnis), mushrooms, tomatoes, onions, alcohol-free white wine, vegetable oil, vegetable fat, starch, spices, seasonings, lactose, vegetable (pflanzliche) stabilizers (Guar seed flour, Carob bean meal), milk protein (casein), sea salt.

**Nutrition:** Per 100 gm.: Protein 4 gm, fat 3 gm, carbohydrates 6 gm, calories 67. 1 BE (Broteinheit, or diabetic exchange) = 204 gm.

**New Product–Documentation:** Label sent by Anthony Marrese. 1989. Nov. 5.5 by 5.5 by 1.125 inches. Paperboard box. Brown and green on orange-brown and beige.

“With soya dumplings in a robust vegetable mixture with mushrooms and onions. Elbow macaroni noodles with all their nutrients—the whole grain meal that nature offers us.” A color photo on the front panel shows a bowl of the stew surrounded by sliced mushrooms, vegetables, and grains, in front of a color illustration of a farm landscape. A 1.5 inch square hole cut in back of box allows buyer to see the product. Exklusiv im Reformhaus. Neuform certification symbol. Marrese adds: There are 4 types of this TV dinner.

2270. **Product Name:** [Natura–Naturana Patty Mix, and Bolognese Spaghetti Sauce Mix].

**Foreign Name:** Natura–Naturana Soja Bratlingsmischung, und Naturana Soja Bolognese.

**Manufacturer's Name:** Gebr. Hiller GmbH & Co. KG. [Naturawerk].

**Manufacturer's Address:** Neanderstr. 5, D-3000 Hannover 1, West Germany. Phone: (0511) 66 20 20 / 29.

**Date of Introduction:** 1989?

**New Product–Documentation:** Booklet. 1989? Ach So-Ja. This booklet, with many color photos, shows the manufacturer’s products and recipes using them. The emphasis is on these two TVP-based soy products. Small photos show both Labels. Each has a color photo on the cover against an orange and yellow background. Bratling: “Already seasoned. Made purely from plants (*rein pflanzlich*).” Bolognese: “With all ingredients needed for 200 gm of spaghetti—made purely from plants.”

Label for Naturana Soja-Ragout sent by Anthony Marrese. 1990. Dec. 12. The name of this company now seems to be Naturawerk, located at D-3000 Hannover. The brand is both Naturana (most prominent) and Natural. On the label is shown small color photos of the labels for Naturana Soja-Bolognese, and Naturana Soja-Bratlinge.

Label for Soja-Bratlinge-Fertigmischung sent by Heather Paine of SoyaFoods in London. 1993. Nov. Note that the name of this product has changed slightly. The name of the company seems to be Naturawerk, D-3000 Hamburg. Ingredients: Soya protein, fine bread crumbs, unheated (*ungeh.*) vegetable oil, spices, starch, oat bran, salt, caramel. Retail for DM 5.15. Makes 9 patties.

2271. **Product Name:** [Hensel Soyfoods: Tofu Sausage-like Roll with Herbs].

**Foreign Name:** Hensel Soja-Kost Tofu Rolle mit Kraeuter.

**Manufacturer's Name:** Henselwerk GmbH. Div. of Walther Schoenenberger.

**Manufacturer's Address:** Muehlstrasse 5-7, Postfach 1120, D-7037 Magstadt, West Germany. Phone: 07159/4906.

**Date of Introduction:** 1989?

**Ingredients:** Tofu (water, soybeans, calcium sulfate and calcium chloride coagulants), vegetable oil, water, protein, soy protein, herb and spice mixture, potato starch, whole sea salt, seasonings, carob flour thickener.

**Wt/Vol., Packaging, Price:** 200 gm cellophane bag. Retail for DM 3.95.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Calories 262, protein 12 gm, usable carbohydrate 4 gm, fat 22 gm.

**New Product-Documentation:** Label sent by Anthony Marrese. 1989. 2 by 5 inches. Dark brown, yellow, and white on green. "Free of flesh. Free of gluten. Practically cholesterol free. Broil, grill, or simply eat cold." Neuform certification symbol. Marrese notes that one other flavor is available.

2272. **Product Name:** [Hensel Soyfoods: Tofu Rolls].

**Foreign Name:** Hensel Soja-Kost Tofu-Rolle.

**Manufacturer's Name:** Henselwerk GmbH. Div. of Walther Schoenenberger.

**Manufacturer's Address:** Muehlstrasse 5-7, Postfach 1120, D-7037 Magstadt, West Germany. Phone: 07159/4906.

**Date of Introduction:** 1989?

**Wt/Vol., Packaging, Price:** 200 gm poly bag.

**New Product-Documentation:** Listed on the back of the package for Hensel Soja-Kost Soja-Schrot: Other products from the Hensel Soja-Kost Program. "The 'Bratwurst' without flesh."

Ad in Magstadter Hausfreund. 1990. p. 28. Photo shows 2 tofu sausages in a poly bag. The label is dark brown and yellow on orange. "Free of meat and gluten. Practically free of cholesterol." This same publication (p. 8) gives the

composition of the human body: water 60%, protein 20%, fat 15%, minerals 4.6%, and carbohydrates 1%. Ad (2 by 5.25 inches, full color) in Kurier/Neuform. 1989. Dec. p. 21. "For Hensel Tofu and Tofu Rolls. The tofu is free of cholesterol and rich in protein." The rolls are "The Bratwurst without meat."

2273. Loma Linda Foods, Inc. 1989? Something new for the menu: From Loma Linda Foods. Riverside, California. 12 pages. Each page 21.6 x 8.8 cm. Back to back. Undated.

• **Summary:** A glossy color leaflet. On the cover panel are three meatless casseroles against a background that fades from pink to brown. Recipes show how to use the following Loma Linda meat alternatives: Chik-Nuggets. Chik-Patties. Dinner Cuts. Griddle Steak. Linkettes. Little Links. Redi-Burger. Vegeburger. Vege-Scallops.

On the rear panel are color photos of cans of Loma Linda Dinner Cuts, Vege-Burger, Little Links, and Chik-Patties. Address: 11503 Pierce St., Riverside, California 92515.

2274. Sanitarium Health Food Co. 1989? Sanitarium: The people who believe food should not only taste good, it should be good for you! 148 Fox Valley Rd., Wahroonga, NSW 2076, Australia. 8 p. Undated. Manufacturer's catalog.

• **Summary:** Contents: Background. Manufacture. Retail. Export. Products.

In the late 1800s a group of immigrants from the USA, all of whom were members of the Seventh-day Adventist Church, decided to make their living by distributing health foods. At first they imported a selection of products from Battle Creek, Michigan, then famous for its sanitarium. The first products arrived in Melbourne in 1897. They included Granola, Caramel Cereal, and gluten products. But when demand outstripped supply, in late 1897 a baker, E.C. Halsey, was persuaded to migrate to Australia to start up a manufacturing plant similar to the one he had operated in Battle Creek. On Nov. 8 he arrived in Sydney en route to Melbourne, totally unaware of what he was starting. The records show that the St. George's Bakery was rented in Melbourne in 1898. The production of Caramel Cereal and Granola commenced immediately.

In 1898 the group moved to larger premises in Cooranbong, a rural area south of Newcastle in New South Wales, and adopted the name Sanitarium Health Food Company. With Halsey in charge, production commenced in a large defunct sawmill in 1899. After a period of uncertainty, the Company grew and expanded until today, it has manufacturing plants in all states of Australia, in both islands of New Zealand, and in Papua New Guinea. In about 1906 the company's first retail shop opened in the Royal Arcade, Sydney. Many of the early shops included a vegetarian restaurant. Today the company operates some 70 retail shops. It also has an export division in Sydney. In 1935

the Australasian Food Research Laboratories were started. Located on the spacious grounds of the Cooranbong plant, they now employ a staff of nearly 40 people. Photos show the original Cooranbong factory, early products (incl. Nut Meat, Protose, Weet-Bix, Corn Flakes, and Marmite yeast extract), and today's food factories at Cooranbong, Victoria, and Palmerston, North New Zealand.

Product lines include Cereals (The company's leading product is Weet-Bix, the most popular breakfast cereal in Australia and New Zealand. It was first manufactured under the Sanitarium name in the mid-1920s, and comes in the shape of little biscuits. Other well known brands are Granose, Bran-Bix, and Sanitarium Skippy Cornflakes), Juices and Drinks (So Good, a non-dairy soy drink, is the newest introduction), Spreads (such as peanut butter and Marmite), Muesli Bars, Specialty Lines (such as dried fruits), Canned Protein Foods (all vegetarian, such as B-B-Q Links, Tender Bits, Vegetarian Rediburger, and Nut Meat), and Sundried (incl. TVP products, and Caffex coffee substitute); a color photo shows all of these.

The name and address of the company's head office, export division, and various food factories and retail outlets is given. Address: Wahroonga, NSW, Australia.

**2275. Product Name:** [Tofu Patties {125 gm} (Tomato-Onion, Sauerkraut-Apple, Mushroom-Leek, Pineapple, Broccoli, Dried Fruit-Muesli)].

**Foreign Name:** Tofu Roestling (Tofu-Tomaten-Zwiebel, Sauerkraut-Aepfel, Champignon-Lauch, Ananas, Broccoli, Backobst-Muesli).

**Manufacturer's Name:** Tofukost-Werk TKW GmbH.

**Manufacturer's Address:** Siemensweg 1, D-4724 Wadersloh-Diestedde, West Germany. Phone: 02520-1300.

**Date of Introduction:** 1989?

**Ingredients:** Tofu-Tomato-Onion: Tofu, tomato, onion, whole rolled oats, starch, vegetable mixture, bread crumbs, vegetable protein product, parsley, diced leeks, sea salt.

**Wt/Vol., Packaging, Price:** 125 gm, frozen patties.

**How Stored:** Frozen.

**New Product-Documentation:** Leaflet sent by Anthony Marrese. 1990 March 22. 8.25 by 11.5 inches. Side 1 contains a color photo of each of the 6 patties accompanied by the name and ingredients. Side 2 contains serving suggestions for each. Sold in the frozen food section of stores or distributed to foodservice organizations.

2276. Miller, Bryan. 1990. Restaurants. *New York Times*. Jan. 26. p. C20.

• **Summary:** This is a restaurant review of Shun Lee Palace, 155 East 55th St., New York City. The atmosphere is luxurious and spacious. Mock duck is a light, nonspicy and intriguing dish: "essentially layers of fried tofu skin [yuba] that resemble the texture of duck skin (but not necessarily the flavor), served with hoisin sauce and scallions, like Peking

duck." The flavor and texture, which are unusual, are loved by some people (such as the writer) and loathed by others.

2277. Hicks, Russel. 1990. History of Sweet Earth Natural Foods (Interview). *SoyaScan Notes*. Jan. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was founded by Russel Hicks and Valerie Dallas. They started making and selling foods in 1978 in Pacific Grove. Their first product was named "Vegeburger by Sweet Earth," a soybean based burger introduced in 1978. In the early days, they also had a bakery named Sweet Earth Bakery (P.O. Box 22543 in Carmel). They did all kinds of things. After a year Russel and his wife left for 3 years, then they returned. The company's second product, launched in about 1983, was called "Tofu Rice Burger by Sweet Earth." Both products had round labels, so the product name was arched across the top and "Sweet Earth" was arched across the bottom.

In about 1983-84 Sweet Earth started to get serious about selling foods. In 1985 they introduced their fresh "Deli Line," consisting of perishable, healthy fast and natural foods—especially sandwiches, salads, and soups. (The burgers were vacuum packed with a 3-month shelf life.) Included in this line were various foods in which soy was a major ingredient: Lunch Rush Burrito (with tofu and rice, 1985), Tofummus Sandwich (1985; tofu + hummus), Miso-Vegetable-Barley Soup (1985), Oriental Rice Burrito (1987), Oriental Rice & Tofu Salad (made sporadically, 1987) TMT Spread (with tofu, miso, and tahini, 1989; no longer on the market due to short shelf life). and Tofetti Sandwich (1990). They distribute these perishable foods themselves in the Monterey area, then they have independent distributors that carry their deli line to Santa Cruz, the Bay Area, etc. Veggie Paté Sandwich (with Miso; 1990). They also use a lot of soy sauce and tamari as a seasoning. They buy their tofu from Jack in the Beanstalk in Salinas. They are Wildwood's biggest competitor in the Monterey area. "Tofu is definitely the food of the future. It's probably going to take a couple of more years. We've been watching this slow change. Ten years from now tofu will be everywhere and in everything. All kinds of foods will be made from it. We raise our children on tofu and they eat it right out of the carton. To them it's second nature. I really like the whole soy end of life. It really feels good. I like developing foods with tofu. The biggest problem with tofu is trying to get a long shelf life in products that use it." Address: 597 Lighthouse Ave., Pacific Grove, California 93950. Phone: 408-375-8673.

2278. Belleme, Jan. 1990. The seitan alternative: Nutritious and versatile, wheatmeat well deserves its growing popularity. *East West*. Jan. p. 62-69. [3 ref]

• **Summary:** "My first business venture earned me the nickname 'Seitan Mama.' In 1978 I started making and delivering seitan, hummus, and vegetable sandwiches to

natural foods outlets in Coconut Grove, Florida. It was quickly apparent that seitan, or ‘wheatmeat,’ was the way to go. In no time I was selling 360 seitan ‘burgers’ a week in just three shops in this one Miami suburb. The growth rate chart was nearly vertical, and it seemed to have endless potential.”

“Sandy Chianfoni, owner of Upcountry, of Lenox, Massachusetts, says that her production has grown 1,000 percent—from 180 to 1,800 pounds per week—in just six years. Chianfoni reports that she has never had to do anything to promote her product. Like the majority of seitan manufacturers, Upcountry offers only one product—seitan chunks packaged in their cooking broth...

“Ken Smith of Ken’s Natural Foods in Makawao, Hawaii, developed a new and unique seitan product called Ken’s Hawaiian B-B-Q, in 1986. This product, which is made from Vital Wheat Gluten is more chewy than most seitan... Response on the mainland was so good that the company started making the product in southern California in 1988. Current production is about 700 pounds per week in three flavors, original, spicy, and no salt. Since 1986, sales have more than tripled.

“Sustenance, of Fayetteville, Arkansas, has been making seitan, distributed in sixteen-ounce jars, since 1986. Owner Ted Louraine recently extended the line to include Seitan Stew and Seitan Chili in jars, as well as frozen Barbeque Seitan.

“The Bridge, of Middletown, Connecticut, Great Lakes Grainfoods, of Kalamazoo, Michigan, and Miami-based Creative Kitchens all produce about 300 pounds of seitan per week from organic 100 percent whole wheat flour. Rick Albee of The Bridge says they have been producing at capacity for several years and sometimes get large orders they are unable to fill. Although Great Lakes Grainfoods could produce up to 100 pounds per day, owners Crick Haltom and Colby Wingate reported that 1989 gross sales more than tripled 1987 sales, so it may not be long before they reach their production limits. Creative Kitchens distributes virtually all of its 15,000 pounds a year in bulk to south Florida restaurants. Owner Yaron Yemini has been working with Amani Ayers, owner of a new natural foods restaurant scheduled to open soon in the Fontainebleu, one of Miami’s oldest and most elegant beachfront hotels. Fifty percent of the entrees on the menu will be made from seitan. Ayers has received an enthusiastic response from the Fontainebleu staff on her creative seitan selections.”

Note that the total amount of seitan produced in America by the 5 companies that reported figures is 3,400 lb/week or 170,000 lb per 50-week year. John Belleme later estimated that Sustenance made about 100 lb/week or 5,000 lb/year, bringing the total to 3,500 lb/week or 175,000 lb/year. In Oct. 1985 Barbara and Leonard Jacobs reported in *East West Journal* that about 2,500 lb of seitan were made commercially each week, or about 125,000 lb/year

in the USA. The largest manufacturer at that time was also Upcountry. Thus, weekly seitan production grew by about 40% between Oct. 1985 and Jan. 1990.

This excellent article closes with 9 seitan recipes from various sources, and a detailed recipe for making seitan at home, starting with 8 cups of whole wheat flour.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “seitan burgers” (or “seitan burger”). Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

**2279. Product Name:** [Jean de Preneuf Tofu Burgers {Not Fried} (Garlic and Fines Herbes, Tomato and Basil, or With Three Cheeses)].

**Foreign Name:** Jean de Preneuf Dorés de Soja (Ail et Fines Herbes, Tomate et Basilic, Aux Trois Fromages).

**Manufacturer’s Name:** SOY (Société Soy).

**Manufacturer’s Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1990 January.

**Ingredients:** With Three Cheeses: Tofu (water, soybeans\* 51%), Emmenthaler (Swiss) cheese (8%), Comté cheese (2%), Cheddar cheese (2%), soy sauce\*, rolled oats\*, sea salt, spices and aromatics. \* = Organically grown (issu de l’agriculture biologique).

**Wt/Vol., Packaging, Price:** 2 x 100 gm round patties vacuum packed in a paperboard box.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 12.4 gm, fats (lipids) 13.0 gm, total carbohydrates (glucides totaux) 9.6 gm, calories (Kcal) 205 (857 kJoules).

**New Product–Documentation:** Labels sent by Bernard Storup. 1990. Dec. 26. 3.25 by 4 by 2 inches from front to back. Paperboard box. With three cheeses: Blue, green, orange-brown, and yellow on white. Color photo of 2/3 of a patty on front panel. “Light and balanced. Keep your vitality with Tofu Burgers. For additional information write: Jean de Preneuf, 42 L’Orangerie, 42580 Letrat, France. Store at +4°C. To use: Remove the protective film with the peel-off tab. Re-heat, either: In a skillet over low heat for 5 minutes. In an oven for 7-10 min. In a microwave oven for 2 minutes. Or steam.”

“Soya, with exceptional natural qualities, rich in protein and free of cholesterol, is finally cultivated in France. We transform tofu, a traditional food that originated in China, so that all of the vitality of soya is protected. Ground with water, cooked, then filtered, the soya is transformed into ‘milk.’ Its coagulation gives us tofu. Easy and quick to prepare, tofu burgers are delicious culinary preparations for serving as a main dish, rich in vegetable proteins (riches en protéines végétales).”

Spot in SoyaFoods. 1991. Spring. p. 5. “Dorés de Soja.” The company name is given as “Jean de Preneuf.”

2280. Jennings, Richard. 1990. Making tofu curds with a chewy, hamburger-like texture (Interview). *SoyaScan Notes*. Feb. 5. Conducted by William Shurtleff of Soyfoods Center.  
**• Summary:** Make tofu in a steam jacketed kettle, break up the curds (either coarse or fine), then boil the curds in the whey. Cook, cool, and you end up with hard, chewy curds. Vacuum tumble the curds (in a cylinder with a vacuum) to make the curds better able to absorb flavors.

Richard wants to get foundation money to find research on this, then license the idea to McDonald's and/or maybe to a chain in Japan. On 1 Aug. 1990 he says that he has been working on this hamburger concept for the past 6 months. He is in the process of having the process patented. "We've got the texture down, so we're working on the color and the flavor now." Address: The Food Plant Inc. & Southwest Soyfoods, 2889 Trades West Rd., Santa Fe, New Mexico 87501. Phone: 505-471-8979.

2281. Worthington Foods, Inc. 1990. Worthington Foods: Direct delivery price list. Effective February 5, 1990 (Leaflet). Worthington, Ohio. 6 p. Each single sided.  
**• Summary:** These products are divided into the following categories: Worthington dry. Worthington canned. Natural Touch beverages. Natural Touch confections. Natural Touch dry & canned. Natural Touch frozen. Worthington frozen. La Loma dry. Miscellaneous. La Loma gravies. La Loma cereal. La Loma canned. La Loma beans. Millstone. La Loma frozen. Meat substitute-miscellaneous. Bush's Best products. Emes. Amberwave Foods-frozen. LaFane's Food Enterprises. Sovex. P.A. Pickles. Southeast Territory only-bulk items. Address: Ohio.

2282. **Product Name:** [Sofit Tofu Bratwurst Sausage (Thuringer-Style, or Santa Fe Style)].  
**Foreign Name:** Sofit Tofu-Bratwurst (Thuringer Art, Santa Fe).  
**Manufacturer's Name:** Avo Feinkost GmbH.  
**Manufacturer's Address:** Postfach 1167, D-4500 Osnabrueck, West Germany. Phone: 05406/5080.  
**Date of Introduction:** 1990 February.  
**Ingredients:** Thuringer: Tofu (water, soybeans), vegetable oil, egg whites (albumen), spice mixture, sea salt, yeast extract, vegetable thickener.  
**Wt/Vol., Packaging, Price:** 10 x 100 gm foil pouch.  
**Nutrition:** Per 100 gm.: Protein 11.0 gm, fat 38.3 gm, usable carbohydrates 1.0 gm, calories 393.  
**New Product-Documentation:** Avo catalog. 1990. Feb. "Sofit: Tofu-Vollwertköstlichkeiten: Leicht, gesund-mit viel Geschmack" [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste].

2283. **Product Name:** [Sofit Tofu Burger (Regular, With Cauliflower, With Red Beets, With Cucumbers, With Beans)].

**Foreign Name:** Sofit Tofu-Burger (Regular, mit Blumenkohl, mit Rote Bete, mit Gurke, Tofu-Beans-Burger).  
**Manufacturer's Name:** Avo Feinkost GmbH.  
**Manufacturer's Address:** Postfach 1167, D-4500 Osnabrueck, West Germany. Phone: 05406/5080.  
**Date of Introduction:** 1990 February.  
**Ingredients:** Regular: Tofu (water, soybeans), vegetable oil, onions, egg whites (albumen), spice mixture, herbs, sea salt, yeast extract, vegetable thickener.  
**Wt/Vol., Packaging, Price:** 1,000 gm sterile vacuum pack (Sterildarm).  
**How Stored:** Shelf stable; refrigerate after opening.  
**Nutrition:** Per 100 gm.: Protein 9.9 gm, fat 28.0 gm, usable carbohydrates 1.7 gm, calories 299.  
**New Product-Documentation:** Avo catalog. 1990. Feb. "Sofit: Tofu-Vollwertköstlichkeiten: Leicht, gesund-mit viel Geschmack" [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste].

2284. **Product Name:** [Sofit Tofu Meatless Cold Cuts {For Food Service} (Holstein-Style, Lyon-Style, Budapest-Style, Garden-Style)].  
**Foreign Name:** Sofit Tofu-Pastete {Aufschnitt / Bedienung} (Holsteiner Art, Lyoner Art, Budapester Art, Gaertnerinnen Art).  
**Manufacturer's Name:** Avo Feinkost GmbH.  
**Manufacturer's Address:** Postfach 1167, D-4500 Osnabrueck, West Germany. Phone: 05406/5080.  
**Date of Introduction:** 1990 February.  
**Ingredients:** Holstein-Style: Tofu (water, soybeans), vegetable oil, carrots, egg whites (albumen), broccoli, peas, paprika, flax seeds, spice mixture, yellow mustard seeds, sea salt, yeast extract, vegetable thickener.  
**Wt/Vol., Packaging, Price:** 1,500 gm Cryovac pouch.  
**How Stored:** Shelf stable; refrigerate after opening.  
**Nutrition:** Per 100 gm.: Protein 10.2 gm, fat 27.7 gm, usable carbohydrates 3.4 gm, calories 304.  
**New Product-Documentation:** Avo catalog. 1990. Feb. "Sofit: Tofu-Vollwertköstlichkeiten: Leicht, gesund-mit viel Geschmack" [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste].

2285. **Product Name:** [Sofit Tofu Wurst-like Spread (Braunschweig-Style, Palatinate Style, Herb, or Pepper)].  
**Foreign Name:** Sofit Tofu-Wurst (Braunschweiger Art, Pfaelzer Art, Tofu Kraeuterwurst, Tofu Pfefferwurst).  
**Manufacturer's Name:** Avo Feinkost GmbH.  
**Manufacturer's Address:** Postfach 1167, D-4500 Osnabrueck, West Germany. Phone: 05406/5080.  
**Date of Introduction:** 1990 February.  
**Ingredients:** Braunschweig-Style: Tofu (water, soybeans), vegetable oil, onions, corn starch, apple juice concentrate, sea salt, yeast extract, spice mixture, vegetable extract, smoke.

**Wt/Vol., Packaging, Price:** 100 gm foil pouch (Folienbeutel).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 100 gm.: Protein 9.4 gm, fat 20.0 gm, usable carbohydrates 4.1 gm, calories 235.

**New Product–Documentation:** Avo catalog. 1990. Feb. “Sofit: Tofu–Vollwertköstlichkeiten: Leicht, gesund–mit viel Geschmack” [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste]. Note: Palantinate-style sausage is a liver sausage with big chunks of meat mixed in.

2286. Avo Feinkost GmbH. 1990. Sofit: Tofu–Vollwertkostlichkeiten: Leicht, gesund–mit viel Geschmack [Sofit: Tofu High-Quality Delicacies: Light, healthful, and with lots of taste]. Postfach 1167, D-4500 Osnabrueck, West Germany. Catalog. [Ger]

• **Summary:** The first 7 pages of this attractive brochure describe what tofu is, how it is made, and its many benefits. A photo on the cover shows 7 meatlike products in the Sofit line. Tofu is free of cholesterol, lactose, milk protein (casein), gluten, and sugar. Tofu is rich in protein, minerals and vitamins, unsaturated fatty acids, linoleic acid (Linolsäure), and natural lecithin. The last 6 pages list, then describe in detail (giving all ingredients and a nutritional analysis) 21 tofu products made by Avo, divided into the following categories: For the cheese counter (2 types of fresh seasoned tofu), Roasted/fried foods (2 tofu bratwurst sausages and 5 tofu burgers), Wurst spreads (4), Pastete-type cold cuts (4), and for the salad bar (4 tofu salads). “The soybeans, which are used in making our products, are organically grown.”

Note: Soyfoods Center received a phone call from a relative of Avo on 6 June 1988, stating that Avo is a spice company that wants to import organic soybeans from America for their tofu based meat analogs. They will be launched soon.

Letter from Xavier Karis in Italy. 1990. June 15. “I am enclosing a catalog for a line named Sofit. They started out in Germany about 1-2 months ago. They managed to get their products sold in a supermarket chain called Tengelmann.” Address: Osnabrueck, West Germany. Phone: 05406/5080.

2287. Life Food. 1990. Taifun Produkte: Preisliste fuer Wiederverkaefer [Taifun Products: Price list for retail food stores (Leaflet)]. Robert Bunsen-Strasse 6, D-7800 Freiburg, West Germany. 1 p. Single sided. 30 cm. [Ger]

• **Summary:** This new price list (printed with black ink on tan paper) takes effect on 1 July 1989. Products are: Tofu (400 gm or 250 gm vacuum pack). Tofu (1 kg pack for those buying fresh). Smoked tofu (200 gm). Sprouted tofu (*Sprossentofu*; 250 gm vacuum pack), Hijiki tofu (200 gm vacuum pack), Tofu sausages (*Grill-Knacker*; Tofu Huerstchen; 250 gm vacuum pack of four). Soya Patty (Soja Bratling; 6 or 12 pack). Tofu Cheese Patty (6 or 12 pack). Black Forest Patty (Schwartzwälder Bratling; 6 or 12 pack).

Tempeh Patty (Tempeh-Taler; 125 gm vacuum packed). Tofu Terrine (Graffiti or Rainbow; 200 gm, 500 gm, or 1 kg vacuum pack). Tofu Balls (Tofu-Klöße; 4 in a 250 gm vacuum pack). Vegetable pouches (Gemuesetaschen; open, fresh). Spread for bread (Brotaufstrich; Tempeh 200 gm, Chickpeas 200 gm).

By request, we deliver various sprouts, tempeh, seitan, salad specialties, soy sauce [but no weights or prices are given for these “by request” items]. For feasts and celebrations, we recommend Taifun’s vegetarian party service.

Prices are given for each product: 1 DM equals about \$0.50.

The company now presents itself as Life Food–Freiburg’s Tofu Shop. Natural Foods (*Life Food–Freiburgs Tofurei. natuerliche Lebensmittel*). Address: Freiburg, West Germany. Phone: 0761/50 61 55.

2288. Fehlberg, Eric C. 1990. Seventh-day Adventist health food companies in Europe (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter dated 24 May 1990 clarifying details.

• **Summary:** There are three major Seventh-day Adventist (SDA) food factories in Europe, each owned by the church: DE-VAU-GE in West Germany, Nutana in Denmark, and Granose in England. There are smaller factories in Spain, and Switzerland. All these companies are owned by the SDA church. The leading Adventist food companies, ranked in descending order of annual sales, are: 1. DE-VAU-GE, established 1899 in West Germany. They are by far the biggest in Europe. They manufacture a total of 257 products. DE-VAU-GE began making its own tofu in Jan. 1986; before that it purchased tofu from a Belgian soymilk company [Note: actually from Heuschen-Schrouff in the Netherlands]. When Michael Makowski took over as managing director in about 1972-73, company sales were about US\$3-4 million. By 1983 sales were about \$18 million. Since then growth has been fantastic. 1989 turnover was DM 84 million (US\$49 million). This is due to both excellent management and the German interest in natural, health, and vegetarian foods. 2. Nutana, est. 1898 in Denmark. They are about half the size of DE-VAU-GE. Under the management of Bent Nielsen, who was there until 3 years ago, the company grew rapidly. Since 1987 growth has flattened, but there is great potential for future growth. 3. Nutana in Norway (Nutana Norge), formerly Dagens Kost, est. 1970. They were established as a marketing company for Nutana, Denmark, and they sell all the soyfoods made by Nutana, Denmark. They also manufacture 55 products, but they import and wholesale 321 products. All of the imports come from European Adventist companies. 4. Granose Foods, est. 1899 in England. They manufacture 39 products and distribute 98 more (mostly from Nutana or DE-VAU-GE). They have been

a manufacturer since 1899, and they built a new food plant in 1989. Their business is now growing rapidly. 5. Nutana in Sweden (AB Svenska Nutana) was renamed in 1987. It was formerly named Edakost Food Company, Sweden, est. 1970. 6. Nutana in Finland, formerly Finn-Nutana, est. 1979. 7. Pur-Aliment, est. 1928 in France. They are not a food manufacturer; purely marketing. 8. PHAG Food Factory (Fabrique de Produits Dietetiques), est. 1895 in Switzerland. The small factory produces 40-50 tons of food a month. 9. Granovita Spain, was founded and began manufacturing in about Aug. 1985 in Valencia, Spain. They do not produce any soyfoods at all, but they market soy products made by DE-VAU-GE in West Germany and by Nutana in Denmark. 10. Nutana in the Netherlands, founded in 1986. They are presently selling all the products produced by Nutana of Denmark as well as 5 other products: Vitanex (Sandwich cream), Rondolettes (Chickenlike or beeflike flavor), Snackers (Soy sausages), Boulettes (Dinner balls).

The Austrian Food Company, founded in 1976, was a restaurant rather than a food manufacturer; it was closed in 1987.

Granose and DE-VAU-GE were both importing foods from Loma Linda in the USA. But now that Loma Linda has been sold to Worthington Foods, it is not clear what will happen to these imports. Today, the various Nutana companies are independent, but there is much talk of bringing Nutana in Norway and Holland together with Denmark. Nutana has always been behind the expansion of SDA food work in the Scandinavian countries. Using the common name Nutana greatly facilitates marketing.

The European food companies have grown at different rates, largely dependent on the effectiveness of each company's management. The trend has been generally up. The highest growth rates in the past 5 years have been shown by Granose in England (though it started from a smaller base), followed by DE-VAU-GE in West Germany. Pur-Aliment and Nutana have had a bit of a struggle.

All of these companies pay a portion of their profits back to the church. They are encouraged to pay about 20% of profits back to the church, but some pay almost 50%. This is similar to the dividends paid by secular companies. Fehlberg believes that tofu will be the growth food of the future; it has great growth potential that has not yet begun to be realized. Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

2289. Fehlberg, Eric C. 1990. Thoughts on Loma Linda Foods, its acquisition by Worthington Foods, and the health foods industry in America (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Worthington Foods purchased Loma Linda

Foods (LLF) from the Seventh-day Adventist Church in Jan. 1990. Loma Linda Foods, unlike most other Seventh-day Adventist companies worldwide, tended historically to target its products to Seventh-day Adventists. Within North America there are very, very few respectable SDA businessmen. That is the problem. "Loma Linda has been working since 1906 with their eyes blindfolded. Too often, instead of using a businessman to head the program, the men in their wisdom have elected to install a broken down minister, and expected him to make a roaring success of it."

A very good businessman, George T. Chapman from Australia, ran LLF from 1938 to 1963. The company did very well financially under his leadership. Since 1963 the company has had a series of managers who lacked business experience; the result was ongoing financial problems. In June 1984 Mr. Fehlberg went from his position at the General Conference to Loma Linda where he turned the company around. Fehlberg ran LLF for about 2 years, during which time it went from a substantial loss to a very profitable company. Mr. Pizzaro was brought in Nov. 1984 and has kept it profitable. He is a very conservative man with a background in banking. He was able to hold LLF together but was not inclined to take the risks to make it really take off.

The church first wanted to sell off the infant formula part of the company because of the high cost of liability insurance. The FDA are really down on infant formula foods. If anything goes wrong, there is no end to the strife. LLF had one small recall due to a small shortage of vitamin A—from dissipation. It was very expensive. Fehlberg understands that but does not understand at all and strongly disagreed with the sale of LLF. "I talked myself hoarse on the committee opposing the sale but I didn't win. I am not happy that it ended up in the hands of Worthington Foods. Their financial report over the past 5 years is not that strong. The last year has not been a healthy year. I hope they can survive. Loma Linda will definitely help them survive by giving them a lot of extra new sales with no extra administration or marketing costs. Now that they have a monopoly, they may relax their standards. I believe that once the 5-year non-compete term expires, you'll get an influx of products into the United States from Adventist companies overseas that will make it very difficult for Worthington to operate—unless they can improve things. Fehlberg prefers the flavor the Australian meat analogs, which are less highly flavored and easier to digest.

Fehlberg feels that the USA is 20 years behind many other countries (Australia, West Germany, Japan) in food processing and storage techniques, largely because of Food and Drug Administration (FDA) restrictions. One area where the USA lags behind is in retorting of food products in plastic film containers. We tend to retort foods too long, and do not have foods retorted in sausage-type pouches (e.g., tofu sausages), which require no refrigeration. The FDA

is afraid of botulism in such protein foods, so they require that the foods be frozen. In Australia, West Germany, and Japan these foods are refrigerated, but Adventist tests show they can be stored at room temperature for 6-12 months, or more. If Worthington's frozen meatlike products could put in plastic containers made of this special film (which is available in America) there would be major cost savings in factory storage, transportation, and retail storage. Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

2290. Gaiser, Klaus. 1990. Huegli acquires majority ownership in Yamato Tofuhaus GmbH and in Heirler (Interview). *SoyaScan Notes*. March 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Huegli Naehrmittel A.G. is a Swiss company, but they have a German branch. The head of the German branch approached Gaiser and asked him if Yamato would like to work together with Huegli. Until the spring of 1989 Klaus had a business partner (Wolfgang Haberberger, who had joined the company in early 1984) but he was not very happy with him, so he bought him out. At the time of the buyout, Huegli approached Gaiser, who was now suffering from undercapitalization. Gaiser found Huegli to be fair, trustworthy, and competent. Huegli bought more than 50% of Yamato in April 1989. Before that, Thomas Karas had tried to sell his company to Huegli.

In Jan. or Feb. 1990, Huegli purchased Horst Heirler, the biggest distributor of fresh health foods in West Germany. Heirler's packaging is very attractive. To the best of Klaus' knowledge, there is definitely no relationship between Huegli and Nestlé. Yamato has not yet announced its relationship with Huegli to the general public, so nothing has been published. Tofu production has not yet expanded enough to fill the needs of potential Huegli customers. Yamato is now selling tofu on one of Huegli's tracks—to hospitals and factories (institutions; Grossverpflegung); other tracks are (2) Reform Houses, and (3) industry and supermarket chains. Presently Klaus is working most on track 1. To reach tracks 2 and 3 Yamato would have to develop new packaging and products suited to their very special needs. "At the moment Yamato and Huegli are not yet working so closely or effectively. Their new capital comes one step at a time for specific goals/projects.

Yamato presently makes 8 tofu products: Tofu (250 gm and 400 gm), Tofu Enriched with Mung Bean Sprouts, Smoked Tofu, (the best in Germany), three types of deep-fried tofu (Sour Marinated Tofu, *Hirschauer Laible* [Hirschau is a small village near Tuebingen]; *Laible* = little loaf or loaflet; the tofu is first marinated in soy sauce and spices, then deep fried), and Tofu Burgers with Sprouts (*Sprossen Tofuletten*; made with mung bean, sunflower, radish, alfalfa, and mustard seed sprouts {no soy sprouts},

these burgers were deep fried), 2 tofu pâtés in glasses (a little like sausages), and soymilk sterilized in bottles. He presently developing some new products.

Note: Huegli Naehrmittel A.G. (P.O. Box, CH-9323 Steinach-Arbon, Switzerland. Phone: 71.46.92.92) was founded in 1935. They currently have about 600 employees and capital of 100,000 Swiss francs. They are a well-known company in Switzerland. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

2291. Karas, Thomas. 1990. History of Soyastern Naturkost GmbH (Interview). *SoyaScan Notes*. March 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company started making tofu in Siegburg (at Roonstr. 38, D-5200 Siegburg, West Germany) in 1 Nov. 1982. His business registration bears this date; he actually began to prepare foods on a small scale before that. The original name of the company was Thomas Karas und Ingeborg Taschen. The original brand was Soyastern. Ingeborg Taschen was a woman. Thomas' residence and the business office during this time was at Hauptstrasse 1, D-5232 Ziegenhain, near Siegburg. While in Siegburg, they had three products: Regular tofu, Herb Tofu (Tofu Provence), and Tofu Burgers (written just like this in German and still sold today). On 1 Jan. 1984 three important events took place: (1) Two investor-workers joined the company, Mr. Gyoergy Debreceni (a Hungarian name) and Mr. Bernd Drosihn (pronounced dro-ZEEN); (2) Inge Taschen left the company; and (3) The company changed its name to Debrecini-Drosihn-Karas.

In mid-1985 (about June or July) the company moved to Cologne (*Koeln*). On 19 Dec. 1985 Mr. Debrecini left the company and Drosihn and Karas changed the company name to Soyastern Naturkost GmbH. Both were directors and each owned 50% of the stock.

Harry Whitford, formerly with Byodo in Munich, began advising Soyastern 'unofficially' in Jan. 1987. In July 1987 he moved to Cologne and began working for the company.

In Aug. 1987 Thomas founded a company named Bio-Vera, whose function was to market Soyastern's products to supermarkets under the Bio-Vera brand. Originally he and Drosihn owned 45% each and Charlotte Szamaitat (pronounced Shuh-MAI-tat) owned 10%.

The tofu business in Cologne grew explosively, until the company outgrew its space. Moreover, the Cologne plant was not suited for tofu production, and health inspectors want to close the plant for sanitation reasons. So the owners spent years looking for better, larger buildings but nothing could be found in Cologne. Finally they found a huge building (4,000 square meters, or 43,000 square feet) in Dorsten; it had previously been a chicken slaughterhouse.

On 18 May 1988 Thomas founded Dorstener Tofu Produktions GmbH. Thomas owned most of the shares.

Minority shareholders in that company were Harry Whitford, Wilhelm Hansen, and Charlotte Szamaitat. It was necessary to establish this new company both to raise capital for the tofu plant building, and because the new company could get quite a lot of money from the local government in Dorsten. The new company would take charge of production, and Soyastern would focus on marketing.

Dorstener Tofu Produktions GmbH then rented the huge building in Dorsten. In June 1988 the company began installing tofu making equipment in the new building and tofu production began there in November 1988. The company used only one-third to one-half of the total floor space. At the same time, tofu burgers were still being made at the plant in Cologne, until April 1989, when the company moved out of Cologne. In April 1989 Thomas Karas purchased this building, then rented it to Dorstener Tofu Produktions GmbH (DTP).

On 12 June 1989 Bernd Drosihn left the company, selling all of his stock in various companies to Thomas. He left mainly for personal reasons, but in retrospect he says he felt they tried to make too big a jump too fast. In Sept. 1989 Harry Whitford stopped working and in Jan. 1990 he left the company, selling all of his stock in various companies to Thomas. Harry liked the idea of making a great leap forward but there were personal problems between him and Thomas. Thomas now owns all of Bio-Vera and all of DTP. The general name for Thomas' group of companies is "Soyastern," and he plans to unify them under a "roof" company with that name.

Thomas needed large amounts of capital to buy out all of his former partners and to buy the factory in Dorsten. He services his debt on the loan used to buy the building from the rent paid to him by DTP. The financing would have been adequate if everything had gone 100% smoothly. But the company ran into technical problems with their machinery. This left them short of capital.

Today Dorstener Tofu is making about 7,000 kg/week of tofu, slightly less than the 7,500 kg/week they were making in Nov. 1987. Thomas thinks Soyastern/DTP is still the largest tofu manufacturer in West Germany, but he is not sure. In the natural foods trade, the other big competitor is Yamato; DTP definitely produces more tofu than Yamato, and probably more than TKW.

As to Thomas' present financial situation, he is not desperate, but he realizes that he must soon get one or more investors/partners. He is optimistic that he will be able to get the money that he needs in time. He intends to stay active in the company, and to own a part of the company, but he is willing to sell 50% or more since his main personal interest lies not accumulating capital but in tofu production and marketing. In a very rapidly growing market such as this, the key point is having lots of capital at each stage of growth. He is not as interested in the financial side of the business as in the marketing and production.

Soyastern's only new products in the last few years have been a line of fresh (not sterilized) tofu dressings. Launched in test market in Jan. 1990, they come in 3 flavors: Natural, Dill, and Tomato. Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

2292. Kempff, Klaus. 1990. Brief history of Life Food GmbH–Taifun Tofurei (Interview). *SoyaScan Notes*. March 14. Conducted by Anthony Marrese in Germany.

• **Summary:** Klaus, known as Dhanya, lived in Miami, Florida, for 5 years and has an American wife, although they are separated. His interest in soyfoods began in America. After returning to Germany, in 1985, Klaus bought a little sprout business in a basement / cellar at Wallstrasse 3 in Freiburg. When he bought it, it had no name and was run by a commune of Bhagwan Rajneesh devotees as a Sannyas business.

Since April 1985 the commune had been making various sprouts (not including soy sprouts). Klaus named the business Life Food, and in July 1985 he and several others started producing tofu. In the spring of 1986, in Germany, he got a copy of *The Book of Tofu* by Shurtleff and Aoyagi which helped his work. He sold the tofu along with various sprouts (mung, alfalfa, radish, chick peas, wheat) at the market place. Looking for a way to use his okara, Klaus developed a Soy Burger and started selling it in about Nov. 1985.

Then health officials told them to move out of the basement or be shut down. While struggling with the decision, a new place (a little grocery store at Stuehlinger Strasse 9, D-7800 Freiburg) became available and an order for one hundred 400 gm packs/week of tofu came along, so in Dec. 1985 they decided to go for it and start making tofu on a larger scale. The business grew steadily and in May 1989 they moved into their present location, a larger, new and modern facility that was previously occupied by a catering service. They purchased a new pressure cooker for making the soymilk for their tofu.

Klaus had a friend named Wolfgang Heck (not a follower of Rajneesh), who was an organizer (*Veranstalter*) of international events. The two began to work together in late 1986. In May 1987 Wolfgang started a business named Taifun that cooked Life Food's tofu for the people in the nearby Market Hall for gourmet foods. Taifun had a small walk-up tofu lunch bar at an indoor market. Here they sold their products and tried out new second generation products.

Klaus and Wolfgang decided to merge their two companies. So on 1 Jan. 1990 Life Food GmbH was formed, with 5 shareholders, including Klaus and Wolfgang. Life Food GmbH bought Taifun (the brand name and equipment) and discontinued operation of the Taifun in the market hall. Taifun became the brand name for many of Life Food's products. But some confusion between Life Food and Taifun still remains. For example, today outside the tofu plant there

is a big sign that says “Taifun Tofurei” in big letters and under it in small letters the name of the company, Life Food GmbH.

Life Food GmbH now employs 15 people. Present products they make are tofu burgers (3 types, each 90 gm, 1,250/week), tofu (500 kg/week, started Dec. 1985), tempeh (10-20 kg/week, started July 1987), Tofu Terrine Sausage (just starting; they are terrific). They made samples of white miso in March 1989 and are in the process of bringing it into production. Although most of their okara goes to farmers, some is used in their tofu burgers and the Hop Sing Bratlinge (burger dough for restaurants). Life Food is the only tofu producer in Freiburg, where they control the whole market. They have a 60 kg/hour Takai pressure cooker, a Takai hand okara press, and a meat-type grinder for the soybeans. They make tofu in 10-12 kg batches. They also import and sell a little miso and shoyu.

Follow-up interview by William Shurtleff. 1990. May 9. The company presently makes 800-1,000 kg/week of tofu and 10-15 kg/week of tempeh. They are hoping for a big standing order of 500 kg/week from the student dining hall at Freiburg Univ. The dining hall has already been buying tofu and tofu products for a long time. Their best selling product is tofu, followed by Smoked Tofu, then the Tofu Terrine (made by pressing tofu, mixing it with vegetables, and baking it in a baking pan; it resembles a goose liver pâté).

Update. 1990. May. Bernd Drosihn says Klaus Kempff is no longer in charge; Guenter Klein and Wolfgang Heck have taken over. Address: Founder, owner and manager, Life Food GmbH, Robert-Bunsen Strasse 6, D-7800 Freiburg, West Germany. Phone: (0761) 50 61 55.

2293. Urban, Gyandeva. 1990. Recent developments at Svadesha–Vegetarische Feinkost (Interview). *SoyaScan Notes*. March 14. Conducted by Anthony Marrese in Germany.

• **Summary:** Svadesha (Ruediger Urban) is manager/owner of the company, and Gyandeva (his son) is manager of soya products (secondary). Svadesha is presently in the hospital. He rarely comes to the plant any more. Svadesha and Gyandeva are both followers of Rajneesh. Svadesha began making tofu in 1979. Then he took a 6-month trip to India, entrusting the company to another person while he was gone. The company fell apart during this time, but it was re-started in 1980 and has grown since then. The company moved to Munich in 1984. Recently the name was changed to Feinkost from Svadesha Tofurei, and now sells as Vegetarische Feinkost using a logo of a sun behind a breaking wave.

They presently have 7 full-time and 5 part-time employees who produce 10 batches (each 250 kg) per day, or 1,250 kg per week—more in winter, less in summer. They are closed in August. Their second generation products include tofu burgers in mushroom or seaweed flavors, and a wine and herb spread. They also make tempeh burgers, buying the

tempeh from Byodo in Munich. Address: Ostpreussen 22, D-8000 Munich 81, West Germany. Phone: 089-939005.

2294. Steyer, Bernd. 1990. History of Byodo Naturkost (Interview). *SoyaScan Notes*. March 21. Conducted by Anthony Marrese in Germany.

• **Summary:** The company was founded in about 1983-85 by Harry Whitford (an American) with Herman Conran [Hermann Konrad], and Michael Mossbacher. Whitford left to go to Soyastern (he later left Soyastern also). Mossbacher is now in charge of the company’s wholesale distribution. The company’s first products were burgers made from purchased tofu and tempeh. In 1984 they started to make their own tempeh. Steyer, now tempeh production manager, built the company’s first tempeh incubator. In 1984 they began to make their own tempeh. Production is now 50 kg/week plus 500 burgers/week.

Bernd is very much working for world food transformation and has invited Marrese for a visit. He will send a set of labels.

Interview with Bernd Drosihn. 1990. April 7. Byodo was founded by Lukas Kelterborn. Harry Whitford came a little after it was founded.

Talk with Klaus Gaiser of Yamato. 1990. May 8. Byodo was bought by a butcher, Rottmueller Naturkost, several weeks ago. The butcher, which now owns 55% of the company, runs a “Naturland” company—a grower’s association like Demeter, Bioland, etc.

See also Harry Whitford’s 1990 early history of Byodo. It is probably the most accurate on the early history.

Note: On 9 Aug. 1990 Soyfoods Center received an enquiry from Tofurei Rotmueller at Hirschbergstr. 9, D-8000 Munich 19, West Germany. Address: Hirschbergstr. 9, 8000 Munich 19, West Germany. Phone: (089) 168570.

2295. Storup, Bernard. 1990. The tofu industry and market in France (Interview). *SoyaScan Notes*. March 26. Conducted by William Shurtleff of Soyfoods Center.
